I am extremely grateful for the opportunity that I have had to be involved in a program of this sort. We are operating the Center for Early Development and Education and it is a school that is a community-based school with home intervention, with all kinds of activities. We actually have classes for children ranging from infancy up through the end of sixth grade, in the same old elementary school—the oldest school built in Little Rock, built in 1895—but the kids are splendiferous and I think that the program is also splendiferous or at least has the potential of becoming so, because this kind of continuity is what we must have in these programs.

The next to the last point that I want to make is that if we are going to move beyond this point, we must obtain more careful program description. Here again, we continue to advertise our models and say, that is better than yours, or yours is better than his, and so on. We really don't know that they are that different. I can't help but smile when I read everything that comes out now about the open school. This is the new thing. The open school is everything. Well, the open school to me is absolutely nothing other than what we call the traditional early childhood education classroom. I want to mention a model which I call the ecological model, because I like to say that you have to design an environment and not create a curriculum. But we are probably much more alike than different. Until we get more careful program description, we have no justification for going around and screaming mine is better than yours, or yours is no good. We really need to know what is transpiring.

My last point that I would like to urge is that I hope in the future we will have an exercise, wisdom and good will, in the designation of priorities of money and time. Now wisdom and good will are always nice attributes to have around, but at times of peak excitement about certain ideas, it is easy to campaign for one approach as opposed to another, early childhood versus something else. To seek to divert funds from one endeavor to a different one. As a passionately-committed early childhood educator, I can see no justification at this time for a strategy that would involve massive diversion of funds from education of older children into early education. That may sound like heresy, but I believe that. Rather we need to work for an increase in allocations for programs for all ages. In our enthusiasm for early education it is very easy to promise too much. When too much is promised, a little disappointment seems like a lot. Or to use an expression that I have used on other occasions, the inevitable sequel to oversell is overkill.

We have been through our period of optimism, followed by skepticism, followed by denunciation, followed by a kind of reassessment or an attempt to rise from the ashes, and I think that now we are in a period of consolidation.

It is my greatest hope that in our current enthusiasm for early intervention, we do not try to oversell ourselves to the point where we cannot deliver and thus be forced into another early demise. We do not need another Renaissance of interest in early childhood development. We need only to make certain that the current interest fulfills its obligation. At this time, I think we are more comfortably theory-based and we are substantially data-based. I feel that it will indeed be a possible task. Thank you.

REMARKS BY THE HONORABLE GLENN M. ANDERSON AT MARITIME TRADES DEPARTMENT LUNCHEON

HON. EDWARD A. GARMATZ

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1972

Mr. GARMATZ. Mr. Speaker, on Wednesday, August 16, 1972, my colleague and Member of the Merchant Marine and Fisheries Committee delivered a very important address at the AFL–CIO Maritime Trades Department luncheon. The gentleman from California, Congressman ANDERSON, addressed himself to safeguarding the U.S. coastal sealanes. Never in the maritime history of this great Nation has it been more urgent that we continue the sanctity of the Jones Act and strengthen it. The gentleman from California (Mr. ANDERSON) has done this necessary goal a great service by his timely and important address. I take this opportunity to include Congressman ANDERSON's remarks in the RECORD for the information of the Members of Congress:

REMARKS OF CONGRESSMAN GLENN M. ANDERSON, DEMOCRAT OF CALIFORNIA, AT AFL–CIO MARITIME TRADES DEPARTMENT LUNCHEON, E. L. BARTLETT MEMORIAL AUDITORIUM, TRANSPORTATION INSTITUTE, WASHINGTON, D.C.

In 1920, Senator Wesley L. Jones of the State of Washington, introduced an amendment to the Merchant Marine Act restricting domestic sea trade to ships of the U.S.-flag. With the passage of the Jones Act, this means that no foreign-flag ships could—or can—conduct trade between U.S. ports.

At the time of passage, Senator Jones said, and I quote:

We are entering no brotherly love Sunday School in seeking our part of the world carrying trade. Fair means and foul will be used to defeat us. Fierce assaults will be made upon us from every angle. No meek turning of the cheek will win. We must fight back and fight hard to maintain ourselves, and every honorable means must be used to advance. Other nations will make concessions to attain certain advantages. We have it in our power to secure concessions that we should have. Unquote.

These are different times, of course. But are we really so far removed from that fiercely competitive maritime world Senator Jones saw in 1920? I think not.

Even now, five decades later, the act that bears his name is still the best safeguard we have against the coercion that would naturally follow the takeover of our coastal sealanes by ships of other nations.

Those coastal sealanes are, by any measure, as vital to the future of this nation, our industry and our people as are the rails that crisscross the land, and the airspace above.

I daresay that inroads by foreign operators into the rail and air cargo business between American states and cities would be beaten back by the sheer weight of public opinion.

I don't believe that a single one of us would stand quietly by and allow Air France to fly the shuttle planes between Washington and New York. Nor would we permit the British National Railway System to run the Metroliners.

To do so is to invite chaos in transportation. And yet, by means both "fair and foul" as Senator Jones put it, we are faced with that situation in our waterborne traffic—the traffic that moves thousands of tons of goods each year, and provides a meaningful and necessary link between our nation's seaports.

I said that there are both fair and foul means being brought to bear against the Jones Act. The fairest methods, it seems to me, are those that come before Congress for enactment. We see bills in each session that would exempt a single ship, or a single sailing.

I think that is the fair way to go about it. Fair, because it gives all sides the opportunity to be heard before the representatives of the people. And fair because, if exemptions are made, they are made in the light of publicity and not by underhanded and devious means.

Of course, the Congress has been reluctant to grant exemptions to the Jones Act because, first, the law is good law, relevant to its time and to ours. And secondly, because the Congress appreciates its value to the national interest and security.

But there are foul means afoot as well. Let me describe one method to you that must be nipped in the bud because it bears not only on the Jones Act, but also on the energy crisis that is just ahead of us.

We all know of the vast, rich oil fields on Alaska's North Slope. And, of course, the American oil companies are jockeying for the best use of the fields when the pipeline is put through.

But one of those companies, Amerada Hess, is attempting to seek a competitive gain by what I would brand a very foul method indeed—a blatant attempt to subvert the Jones Act.

The Jones Act when it was written made a notable exception of the American Virgin Islands. Although all the other U.S. states and territories were included, the Virgin Islands was exempted from the provisions because in 1920, it had virtually no commerce.

The Congress provided, however, that the President by executive order could place the Virgin Islands under the act at any time he deemed necessary. And it is my firm conviction that the America Hess scheme makes that inclusion both necessary and crucial to the nation, even if the Congress must do it by law without waiting any longer for Presidential action.

For Hess has the exclusive right to build and operate oil refineries in the Virgin Islands. And they intend, as my colleague in the House, Les Aspin of Wisconsin has revealed, to circumvent the Jones Act by use of those refineries.

Here's how they plan to do it: They have asked the government of Costa Rica for permission to construct a pipeline from the Atlantic to the Pacific across that Central American nation.

Obviously then, they will be able to send their foreign-flag fleet of tankers ships to Alaska to tap the North Slope resources, not as domestic trade, although they are an American firm, but as import-export trade.

And after the oil is pushed through the pipeline, the Hess fleet can stand by at its eastern end to ship the oil to the Virgin Islands for refining. And then use the Virgin Islands exemption to ship it to the contiguous United States, again in foreign vessels.

That's pretty shoddy business and it certainly violates the spirit of the Jones Act, if not the letter of the law.

It is thus clear that we must protect the integrity of the Jones Act in order to prevent maneuvers like the Hess pipeline. But I think that as far as the Alaskan oil goes we must take it one step farther.

With the grave energy crisis which we know looms over our nation, we must prohibit the exportation of that oil, and indeed the exportation of all our needed domestic oil and gas supplies, for as long a period as we are forced to import so much from so many nations around the world.

That becomes important because of reports that the Japanese, who presently import oil from Venezuela, wish to trade that commitment to the United States in return for permission to tap the Alaskan oil supplies.

Sailing distance, of course, is the reason for such a trade. But the obvious losers in the deal would be American shipboard workers who would lose employment to the foreign-flag tankers of the Japanese that called at Valdez.

I need hardly remind this audience that the need of martime is *more*, not less, job opportunities. And the need of the nation is more, not less fuel supply sources.

So if we diminish jobs, and cut into the amount of Alaskan oil available, by selling some to the Japanese, or any other foreign nation, we do ourselves a double disservice.

We in the Congress have the responsibility of seeing that the Jones Act is strengthened. We have the responsibility of protecting those fuel supply sources that we now have by seeing that Alaskan oil stays in the United States.

And equally important, we have the responsibility of insuring that Alaskan oil is carried on U.S.-flag vessels, manned by American seamen—whether or not that oil is refined in the Virgin Islands.

The time has come for us to start exercising those responsibilities with great firmness. For as Senator Jones said, "no meek turning of the cheek will win."

BICENTENNIAL HISTORICAL EVENTS IN AUGUST

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1972

Mr. WHITEHURST. Mr. Speaker, the Communications Committee staff of the American Revolution Bicentennial Commission has compiled an abbreviated list of historical events connected with the Revolutionary period that occurred in the month of August. There are undoubtedly many companion developments in various sections of the country that are equally significant to those on this list. It is by no means the sum total of actions during the month. It does, however, bring to mind the vast amount of important history in developing this Nation: Dates, events, places, and people that need to be recalled, their courage and contributions told again to guide our people into a third century of freedom.

This list also points out the wide ranging events that can be recognized by communities and organizations throughout the land in celebrating the Nation's 200th anniversary in 1976, and indeed during the bicentennial era ending in 1983, for just the one month cited.

The listing follows:

BICENTENNIAL NEWS

Listed below are significant historical events which relate to the Bicentennial Era.

August 1, 1774—Delegates from Virginia counties meet at Williamsburg.

August 1, 1776—Sir Henry Clinton and his force arrive at Staten Island from Charleston. British expeditionary force now 30,000 strong.

August 1, 1776—Action at Oconore, South Carolina.

August 1, 1776—Action at Essenecca Town, South Carolina. Francis Salvador, first Jew to hold elective office in the New World, killed in this skirmish, thus being the first Jew to die for American independence.

August 2, 1775—Congress adjourns.

August 2, 1776—Signatures affixed to the engrossed Declaration of Independence.

August 4, 1775—Lancaster War Dance. By Captain Cresap and his rifle company enroute to Cambridge.

August 7, 1776—Captain Wingate Newman, privateer, commanding the *Hannah* brings prize ship *Reward* into Portsmouth, New Hampshire. Cargo included turtles destined for Lord North.

August 8, 1775—Captain Daniel Morgan and his Virginia riflemen arrive at Cambridge.

August 9, 1775—Naval action at Gloucester, Cape Ann, Massachusetts (Aug. 9–10). British ships, pursuing two American schooners, capture one, but are driven back by gunfire from Gloucester.

August 11, 1776—Action at Tomassy, South Carolina.

August 22, 1776—Howe lands about 20,000 troops at Flatbush, Long Island (August 22–25).

August 23, 1775—Proclamation of Rebellion. George III declares the American colonies to be in open rebellion.

August 25, 1774—Convention to form North Carolina provincial congress meets at New Berne.

August 26, 1776—British night march to envelop General Israel Putnam's forces before Brooklyn.

August 26, 1776—Action at Valley Grove, Iong Island. Preliminary action in the Long Island, New York, Campaign.

August 27, 1776—Battle of Long Island. Continental army defeated by General Howe.

August 28, 1775—General Schuyler begins advance on Canada. Marches from Ticonderoga with 1000 men.

August 28, 1776—Action at Jamaica (Brookland), Long Island. British surprise a small American detachment and take most prisoner.

August 29, 1775—Attack on New York City. (Unexplained item in Heitman; presumably refers to a naval bombardment or a Tory raid).

August 29, 1776—Washington's Evacuation of Long Island (August 29–30).

TELEPHONE CONVERSATION

HON. ALPHONZO BELL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1972

Mr. BELL. Mr. Speaker, I am submitting today a follow-up to the text of the conversation between my constituent Stuart Lotwin of Los Angeles, and Lev Lerner of the Soviet Union, which appeared in yesterday's CONGRESSIONAL RECORD:

TELEPHONE CONVERSATION BETWEEN LEV LERNER, LENINGRAD, U.S.S.R.; S. J. LOTWIN, LOS ANGELES, CALIF.; OPERATOR, MOSCOW, U.S.S.R.

July 7, 1972

S.L. Hello, Lev?

L.L. Yes.

S.L. This is Stuart, again.

L.L. I hear you very bad.

S.L. Very bad? Operator.

L.L. Hello.

S.L. O.K., I'll get our operator to do something. Operator, Operator.

L.L. Hello.

S.L. Hello, Lev? Can you hear me?

L.L. Yes.

S.L. O.K., good. You must be tired. Are you sleepy?

L.L. No, I wait your call.

S.L. Good. Listen, Lev.

L.L. Yes.

S.L. We had here before some people from . . .

L.L. Hello.

S.L. Hello.

L.L. Hello.

S.L. Hello, can you hear me?

OPR. Conversation in Russian with Lerner—Hello, New York, my party can hear you. The line is broken.

S.L. Can he hear me?

OPR. I hear you, not good.

S.L. Not good?

OPR. Yes. The line is bad.

S.L. The line is bad, huh?

OPR. Go ahead.

S.L. Lev, can you hear me better now?

L.L. Now better.

S.L. Now better?

L.L. Yes.

S.L. Good, anyway, Lev, we were here to call you. People from the Los Angeles Times, the Associated Press and the Columbia Broadcasting System were here but they had to leave because we had a bad connection on our end—we couldn't hear you before very well. So, they are, nevertheless, going to write stories about you, your family, and your desire to go to Israel and will publish it in the newspapers in the United States. Do you understand?

L.L. Yes, I understand.

S.L. And, it will be on the radio.

L.L. Thank you very much for your call.

S.L. Hello.

L.L. Hello.

S.L. Yes, did you understand?

L.L. Yes, I understood and all my family thank you very much for your call.

S.L. Oh, a pleasure! It's always good to talk to a good friend.

L.L. Yes.

S.L. We do have one man here who was with the Associated Press and he will want to say hello and give you his personal greetings. He'll be on in just a second. Before he does, tell me if I'm correct that your visa was denied because they said you had information that related to secret material.

L.L. Hello.

S.L. Hello.

L.L. Hello.

S.L. Hello, hello.

At this point a strange male voice (not Lerner) speaks in Russian to the operator. Then another female voice and the male voice started yelling, "Hang-up, hang-up."

S.L. Operator.

OPR. Hello, my party can't hear you, can't hear you.

S.L. He can or cannot hear me?

OPR. I'm sorry, Mister. Please try another time. The line is broken.

S.L. The line is broken?

OPR. Yes, please get back operator in New York City. Now it is not possible to get line.

S.L. It is not possible?

OPR. Yes.

S.L. Can you tell the party in . . .

OPR. Yes, please get back operator, your party cannot hear you—nothing.

S.L. O.K. Would you tell him something for me?

OPR. Me?

S.L. Will you tell him that I will call him Sunday?

OPR. I don't understand what you say.

S.L. Can you hear me?

OPR. I can hear you.

S.L. You can?

OPR. New York?

S.L. Hello.

OPR. New York?

S.L. The New York operator is not on the line.

OPR. Put down the receiver.

S.L. O.K., I'll flip the receiver.

OPR. Yes, you ought to speak with operator in New York City.

S.L. Alright, alright, very well.

OPR. New York, New York, New York, hello, New York?

S.L. Hello?

OPR. New York?

S.L. Hello?

OPR. Where is it you call in Leningrad.

S.L. Where in the city?

OPR. When, when?

S.L. On Sunday.

OPR. Call tomorrow.

S.L. Sunday, Sunday.

OPR. Sunday?

S.L. Sunday!

OPR. What time?

S.L. Sunday, as usual.

OPR. At what time?

S.L. At what time?

OPR. Yes.

S.L. Tell him at 10:00 at night in Leningrad.

OPR. 10:00 in the morning you call again?

S.L. In the evening.

OPR. Will this be your time or Moscow time?

S.L. Leningrad time.

OPR. Your time or Moscow time?

S.L. Moscow time!

OPR. O.K., O.K.

S.L. O.K., good.

OPR. Get New York operator. You can then hear your party in Leningrad.

S.L. Yes, on Sunday. Good.

MISS INDIAN AMERICA

HON. ORVAL HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1972

Mr. HANSEN of Idaho, Mr. Speaker, Idahoans swelled with pride earlier this month when one of their daughters—Louise Edmo of Fort Hall—was crowned Miss Indian America, the first Shoshone-Bannock woman ever to be honored with this title. I am especially proud that she is a resident of my Congressional district.

This lovely young woman radiates life and enthusiasm. She holds great hopes and aspirations for the future of her people and promises to devote her own future to improving the quailty of life of the Indian people. I have worked closely with Miss Edmo's family at Fort Hall through the years and I know that her dedication will continue to grow long after her reign is over.

It is my great pleasure to offer my heartiest congratulations to this deserving young woman, and to insert in the RECORD a personality sketch of the new Miss Indian America by Tom Hodge of the Blackfoot News:

MISS INDIAN AMERICA VOWS TO DEDICATE LIFE TO HER PEOPLE

(By Tom Hodge)

FORT HALL.—The first Shoshone-Bannock woman ever to win the title of Miss Indian America returned here Thursday to make a pledge to "dedicate my life to Indian people."

Louise Edmo, in a news conference at the site of the ninth annual Shoshone-Bannock Indian Festival, said betterment of the Indian race will be her goal during her year's reign.

"But it won't stop there. I plan to dedicate my life to Indian people as my father has done."

Her father, Kesley Edmo, holds several positions of influence among Indian people. He is chairman of the Idaho Inter-Tribal Policy Board, a member of the Governor's Advisory Committee on Indian Affairs, and is a vice president of the Northwest Affiliated Tribes.

Until this summer he was chairman of the Shoshone-Bannock Tribal Council. He lost that seat by just a few votes in the tribal election.

Following the Shoshone-Bannock festival, the new queen will begin an intensive tour of the country for personal appearances and speaking engagements. The first after Fort Hall is at Casper, Wyo., where she'll address members of the Production Credit Association.

In the Miss Indian America contest at Sheridan, Wyo., Miss Edmo said 30 contestants from 27 tribes participated. "Any one of them could serve as Miss Indian America. They were all real sharp, and knew what their goals and aspirations are."

She said Miss Glenna Jenks of Fort Duchesne, Utah, is her runner-up.

"My goals and responsibilities during the next year will be to be a spokesman for my people. I'll lose a year of school, but it'll be well worth it."

Miss Edmo said she has had "numerous invitations to appear all over the country—except from around this area." For some reason, the invitations haven't come from Utah and Idaho, she said.

During the upcoming year, "I plan to put emphasis on the lifestyle and ways of the Indian. I hope I can let non-Indians know what our beliefs are."

Her ability to speak well in public, she said, played a large part in her success at Sheridan. "My parents helped me learn this, and speech classes I took (at Blackfoot High School) were very important to me."

Asked if she will use the Miss Indian America position as a soapbox from which to urge betterment of the lives of Indians, Miss Edmo said she will continue to speak out as she has always done.

The Blackfoot and Pocatello area, Miss Edmo said, "Is the best place to begin to fight."

As an Indian student, she said, "I felt I had to prove myself every day, to learn to communicate with each aspect of society."

The All-American Indian Days organization at Sheridan, she said, "is working effectively to bridge the communications gap between Indians and non-Indians."

Miss Edmo said she will not be identified with more "militant" Indian organizations. "They have good objectives. I agree with the goals, but militant action gets only publicity and usually doesn't benefit people."

Known by the Indian name, "Bird Wing," Miss Edmo said young Indians should "work through channels" to attain their goals. "Channels" she agreed, would include the Federal Bureau of Indian Affairs.

Young people of her race, she said, "should dedicate their lives to Indians. What needs to be done can't be done in two or three years."

After the year as Miss Indian America, she'll return to her home state to attend the University of Idaho. She plans to study pre-law there, and may go on to the University of New Mexico to study law.

"All our lives are based on rules, regulations and laws. An Indian person with a knowledge of law can be real useful."

As a lawyer, she said she believes she could fight to keep Indian lands from "going out of trust."

"I would also work to maintain water, fishing and hunting rights of the Indians," she said.

Miss Edmo, 18, is the daughter of two chiefs, Arimo of the Shoshones and Racehorse of the Bannock. Her successful competition at Sheridan was because of a speech she gave, she said.

The speech, originally prepared for a high school presentation, compares the "Value system" of the Indian with "middle class white society."

In the speech, Miss Edmo said, "The values of the Indian treat older people differently. We respect and understand them . . . the non-Indian is simply forgotten at age 65. We feel older people are the most important resource we have. They are our only means of learning the old ways."

HEW APPROPRIATIONS BILL

HON. MICHAEL HARRINGTON

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

August 17, 1972

Mr. HARRINGTON. Mr. Speaker, yesterday President Nixon vetoed the HEW appropriations bill because it exceeded his budget recommendations by $1.8 million. It seems that the President has developed a habit of vetoing bills which affect the education and health of the nation. In January 1970 he vetoed an HEW appropriations bill for vital education and health needs because it contained $1.26 billion more than his budget request. Similarly, in August 1970 he vetoed an education appropriations bill because of the $453 million which Congress had added for elementary and secondary education, handicapped, vocational and adult education, student college loans, and libraries.

If the President were truly concerned about "reckless Federal spending" and curbing inflation, he would have cut funds instead from the military budget as I and many of my colleagues suggested.

I deeply regret that due to prior commitments I was unable to be here yesterday to vote to override the President's latest veto of an HEW appropriations bill. If I had been present, I would have voted "yes."

U.S. INTERNATIONAL ECONOMIC POLICY AND U.S. AGRICULTURAL POLICY

HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1972

Mr. FRENZEL. Mr. Speaker, this week, Mr. Robert Dierks, representing Cargill, Inc., made an excellent statement concerning U.S. international economic policy and U.S. agricultural policy to the Republican Convention's Platform Committee.

This fine statement, slightly edited by me follows:

INTRODUCTION

A comprehensive and outward-looking U.S. foreign economic policy has become increasingly important. The volume of the international flow of goods, services and capital has grown rapidly. Developed nations have become increasingly interdependent economically, and developing nations are seeking to be included more meaningfully in this process. Longstanding barriers to commercial relations between East and West are coming down.

But the traditional, liberal trade and investment policies of the United States are also facing greater challenges. The international monetary system created at Bretton Woods has collapsed under the strain of prolonged inflexibility in the face of mounting payments imbalances. The economies of Western Europe and Japan have recovered to the point where those regions can compete on a fully equal basis with the U.S. The trading rules of the General Agreement on Tariffs and Trade (GATT) have been gradually and steadily eroded by the creation of free trade areas, customs unions and the widening circle of preferential trading arrangements being concluded by the European Community. Finally, segments of the organized labor and business communities in the U.S. have begun to back away from their traditional support for freer trade and to call for import quotas and restraints on the flows of capital and technology across national boundaries. These domestic concerns surfaced most clearly in the "Foreign Trade and Investment Act of 1972".

It is our firm belief that these developments only confirm the need for a renewed commitment to a coherent, comprehensive and outward-looking U.S. foreign economic policy. Very simply, the United States and her trading partners must meet constructively the substantial problems currently facing international economic policy, and they forge solutions which will mesh with the long-term objective of continued world prosperity and economic cooperation.

The interests of the entire agricultural community lie at the heart of this challenge. Both politically and economically, the challenge of liberalizing the conditions for trade in agricultural commodities demands the highest priority in the shaping of an expansive international economic policy for the United States. The future prosperity of the American agricultural community has become increasingly tied to access on liberal terms to foreign markets, and the political support for a comprehensive trade and investment policy which will benefit the nation as a whole rests in large part on meeting this challenge to agricultural trade.

THE IMPORTANCE OF THE AGRICULTURE EXPORT MARKET

In the year ending June 30, 1969, the total value of agricultural exports was approximately $5.7 billion. Approximately $1 billion of this total was exports under specified Government programs, with the remaining $4.7 billion representing commercial agricultural exports. In the year ending June 30, 1972, U.S. agricultural exports had risen to $8 billion. With exports under Government programs remaining at about $1 billion, this means that commercial agricultural exports have increased by approximately 50 percent during this period.

With population growth slowing in the United States and with American diets already at a relatively high standard, the continuing comparative advantage possessed by American farmers in major field crops has tied dynamic growth in agricultural production and marketing to expansion of foreign markets.

Looking toward the future, the opportunities for continued market expansion for U.S. farm products lie with export market developments.

The first lesson of this future potential market development is the need for the United States to employ its agricultural resources efficiently to meet this rising worldwide demand. Currently, the U.S. withholds more than 60 million acres of cropland from production. The continually rising world demand for fats, oils and protein meals offers an opportunity substantially to increase U.S. soybean acreage and production.

New market demands for wheat and for feed grains present the challenge of increasing U.S. production of those commodities as well. The challenge of reaching the target of $10 billion of farm product exports can be met. The first step in achieving that objective will be to utilize our vast productive resources more efficiently.

AGRICULTURAL TRADE POLICY CHALLENGES

Beyond this, however, each of these present and potential export arkets possesses special problems which need to be surmounted.

I. EUROPEAN COMMUNITY—It has been and remains a cornerstone of U.S. foreign economic policy to encourage the economic integration and development of Western Europe.

At the same time, however, the Community has pursued certain policies which have secured a part of its growth at the expense of third-country exports. One such policy has been the EC's Common Agricultural Policy (CAP) for grains.

While there can be competition among third-country exporters to the EC, the EC farmer is absolutely protected from outside competition. This system, together with the very high price support levels in the EC, has frequently generated surpluses in the Community. These surpluses are then disposed of either through high export subsidies or through denaturing premiums for wheat used as feed. As a result, the CAP for grains has not only reduced U.S. exports to the EC but has also disrupted U.S. exports to other traditional importing nations.

Enlargement of the Community to include four new members will extend this agricultural trade-diverting system to a market for $640 million of U.S. farm exports in 1970–71. The U.S. can expect to lose a substantial portion of this market. In addition, the high price support levels for grains in the EC retard growth in consumption.

Continuation and extension of the CAP for grains poses a serious barrier to growth of U.S. grain exports to the Community.

Another problem posed by the Community centers on the ever-widening circle of preferential arrangements the EC has negotiated or is in the process of negotiating with nonmember countries. 52 of the present 80 signatories of the GATT enjoy some kind of preferential arrangement with the Community member nations. Such preferences seriously undermine the most-favored nation clause of the GATT.

These facets of the development of Community trade policy present serious problems for all U.S. exports, but they—and especially the CAP—pose especially serious impediments to liberalization of the conditions of agricultural trade and to expansion of U.S. farm product exports. Congress and the Administration will have to work closely together to deal with these agricultural trade barriers effectively.

II. SOVIET BLOC NATIONS AND THE PEOPLE'S REPUBLIC OF CHINA—On June 10, 1971, President Nixon removed barriers to trade with Communist China arising under the Trading-with-the-Enemy Act, as well as the requirement that 50 percent of U.S. agricultural exports to Russia, mainland China and some Eastern European nations had to move on U.S. flag vessels. This latter restriction had proven a serious impediment to U.S. agricultural exports to these nations, since U.S. flag vessel rates for bulk shipments were not competitive. Since then, the emergence of Russia as a major new market for U.S. agricultural commodities has been very rapid.

At the same time, however, there remain problems which need to be surmounted. Long-term growth of U.S. agricultural exports to Russia will require: reciprocity in our trade relations with the Soviet bloc nations; Soviet capacity to earn foreign exchange; granting most-favored nation tariff treatment to the Russians; agreement on acceptable credit terms to be offered by each nation; an agreed-upon method for settling commercial disputes; and other operational freedoms characteristic of normal commercial relations among countries. In particular, putting commercial relations with the Soviet bloc on a more normalized basis awaits settlement of lend-lease debts. Beyond this, the U.S. must recognize that exports to Soviet bloc countries can only expand as rapidly as the ability of those nations to earn foreign exchange with which to pay for those commodities, and this foreign exchange must be earned through exports to the free-world economies. Similar problems confront expansion of trade with China, and here we can expect the pace of progress to be substantially slower.

III. JAPAN—U.S. agricultural exports to Japan have grown rapidly, to the point where Japan has become the largest single-nation market for American farmers. At the same time, however, the U.S. has experienced recently a large and rapidly deteriorating balance of trade and payments with Japan. Unless measures are taken soon to correct this situation, the U.S. can expect a balance of payments deficit with Japan in 1972 approaching $4 billion.

Progress must be made to close this serious gap. Lasting and long-term progress will hinge upon the success of broad-scale trade and monetary negotiations among the U.S., the EC and Japan.

The basic principles which could underpin such negotiations have been outlined by Ambassador William D. Eberle, the President's Special Representative for Trade Negotiations. The fundamental character of these principles underline the essentially new circumstances of today's commercial relations—a world increasingly interdependent, where economic change is transmitted across national boundaries more quickly and, in some cases, more massively and where the major economic groupings face each other essentially as equals. Such changed circumstances will require new policies, not only in the sphere of trade policy along the lines developed by Ambassador Eberle, but also in the sphere of monetary policy, where a new international monetary system must be more flexible—providing for adjustments to disequilibria on a more timely basis—with the burdens of adjustment shared equally by surplus and deficit nations.

IV. DOMESTIC ECONOMIC AND POLITICAL PROBLEMS—The other major challenges to securing for American agriculture—as well as for American society as a whole—the benefits of a more liberal atmosphere for international economic relations arise within the United States. Two are especially important.

International trade in agricultural products is highly competitive. Nations which import food and feed stuffs from the United States are understandably concerned about the reliability of the U.S. as a supplier. Nations have shown great confidence in the capacity of the U.S. to produce to meet their import needs. This confidence is reinforced by the productive reserves the U.S. possesses in the form of land withheld from production and by our policy of maintaining adequate reserves. Obviously, however, as world demand for food and feed grains and for oilseeds increases, the U.S. must pursue acreage and production policies which continue to provide adequate supplies to meet this demand.

These policies and this confidence can, however, be undermined when importing nations find themselves closed off from U.S. agricultural exports by recurring dock strikes. This undermining of America's reputation as a reliable supplier is especially unfortunate when grain and oilseed stevedoring is blocked by strikes which do not involve issues arising from those activities. This was the case in the most recent prolonged tie-ups at most of our major ports. Even at peak loading times, grain and oilseed stevedoring requires only about 1200 longshoremen, out of a total national membership of better than 60,000. Consequently, for often unrelated issues arising between parties where agricultural exporters do not have a voice and involving only a few longshoremen, America's farmers must suffer both foregone current exports and further erosion of our reputation as a reliable supplier. An effective solution must provide more effective legal tools to mitigate the victimization of interests other than those involved in contract disputes.

The other major domestic problem arises in connection with growing support for protectionist legislation in the United States. The Burke-Hartke bill is the most obvious example. This and similar proposals would impose quotas across-the-board on imports into the United States, would seriously restrict flows of capital and technology across national boundaries and would alter the tax treatment of foreign earnings in ways which would put U.S. foreign direct investors at a serious competitive disadvantage vis-a-vis foreign concerns, thereby seriously discouraging investments which have demonstrably benefitted the U.S. in a variety of ways.

These proposals must be of serious concern to all who share the goal of the President's Commission on International Trade and Investment Policy—that the U.S. play a constructive role in achieving a "world economic community of nations." But such proposals pose an especially acute threat to the entire agricultural community. Import quotas are inflationary. The farm community would become one of the first and most seriously injured victims of an inflationary spiral. Quotas would also prompt retaliation from our trading partners, since successful trading relations must run on a two-way street. Seeing their exports to the U.S. impeded by quotas, other nations would retaliate against U.S. exports. Past experience and the multiplicity of sources for agricultural products both demonstrate that U.S. agricultural exports would be among the first, and hardest-hit, victims of such retaliation. Restraints on the flow of technology and capital across national boundaries would undermine one of the most important marketing tools for agricultural exports. The ability to invest in and develop U.S. feeding technologies in foreign markets helps generate markets for exports of U.S. feed ingredients, since those feeding technologies are closely tied to U.S. farm products. Policies to tax foreign earnings in ways which would deter U.S. investment abroad would similarly undermine such export-promoting activities.

Trade restraints—through their inflationary effects and the inevitable retaliation which follows—merely transfer the costs of adjustment on to other industries. In this case, these burdens would be passed on to the most dynamic, export-oriented industries, with agriculture being one of the most serious victims. Secondly, trade restriction protects both those firms within an industry which need protection and those which do not, creating a windfall gain for some industries. Protection would also isolate the U.S. from the challenge of competition, impairing our ability to innovate and reducing the real welfare of all of our workers. Fourthly, while one can understand the political pressures to institute quotas—since the costs of such a policy are hidden in the prices consumers must pay rather than apparent in appropriations which must be made to meet real social needs—such policies do not solve the underlying problems; they merely allow those problems—and the substandard wages which are frequently associated with non-competitive industries—to be perpetuated. Finally, in contrast to the once-and-for-all costs of an adequate adjustment assistance program, the costs of protection cumulate overtime.

While rejecting the Burke-Hartke bill, we cannot ignore the very real problems which confront some workers, firms, industries and communities in adjusting to the pace of change in a more interdependent world. Those costs are very real—lost income, lost pension rights, lost health and life insurance, lost dignity.

It is important that supporters of a freer trade policy—which benefits the society as a whole—recognize and meet effectively the social and human costs that a few are asked to bear to secure those benefits. It is equally important to recognize that these costs of adjustment are the same, whether the dislocations which produce them arise from foreign or domestic competition. Indeed, with imports less than 4 percent of our total Gross National Product, the burdens of adjustment to domestic economic changes may well outweigh the burdens of adjusting to foreign competition. The social, economic and human costs of adjustment demand a coordinated industrial and manpower development strategy.

CONCLUSION

The main themes of this presentation can be summarized as follows. First, some of the most important policies affecting the future health and structure of American agriculture will not resemble traditional agricultural policies or issues. With the rapidly growing importance of the export market for American farmers, the progress (or lack of it) which is made in liberalizing the conditions of international trade in farm products and in devising a responsive and flexible international monetary system must be considered among the most important, if not the most important, challenges facing individuals concerned with the future of U.S. agriculture.

Secondly, with agricultural exports currently about one-fifth of total U.S. exports and with the marked potential for future growth in such exports (if the challenges to that opportunity can be met), securing substantially liberalized conditions for trade in agricultural commodities must be among the nation's highest foreign economic policy priorities. If such an objective were achieved, the U.S. balance of payments would be improved, U.S. productive resources would be more fully and more efficiently utilized, U.S. industry would be buoyed by the improved economic well-being of one of its largest customers—the agricultural community—and the society as a whole would gain from the continued commitment of the United States to an outward-looking trade and investment policy.

Finally, a positive and comprehensive trade and investment policy designed to further these objectives would include: (1) a commitment to keeping American agricultural production competitive in terms of price and quality and therefore capable of helping to meet the world's rising demand for food; (2) a commitment to providing U.S. trade negotiators a mandate to liberalize the conditions of world trade, with a high priority placed upon liberalizing the terms of trade in agricultural commodities; (3) a commitment to securing an international monetary system which is flexible, able to respond to the needs for adjustments to imbalances on a timely basis and based upon a mutuality of obligations for both debtor and creditor nations; and (4) an industrial and manpower strategy which is geared to achieving improved U.S. competitiveness in international markets and to meeting effectively, efficiently and in a timely fashion the very real economic, social and human needs of adjustments that arise in the increasingly equal, interdependent and competitive economic world in which we live.

We believe that these objectives are among the most important in our common commitment to building a new, lasting and equitable prosperity for the nation.

LEAD AND ZINC ACT OF 1972 AND ZINC ORE DUTY-SUSPENSION BILL

HON. JAMES A. McCLURE

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1972

Mr. McCLURE. Mr. Speaker, the gentleman from Colorado (Mr. ASPINALL) the chairman of the Committee on Interior and Insular Affairs, yesterday gave this House a typically lucid and comprehensive explanation of why the two bills introduced are badly needed. I take great pleasure in joining the gentleman from Colorado and other Members in cosponsoring those two bills.

I agree with everything Chairman ASPINALL said about the need for bringing stability to our lead and zinc industries. They are of vital importance to America and to my State. In 1971 Idaho was the second-ranking lead ore producing State, with a production of 65,000 tons of recoverable lead. Idaho also was among the top five producers of zinc ore, producing 43,000 tons of recoverable zinc. In addition, there is a large lead smelter and refinery and a large zinc smelter and refinery in the Coeur d'Alene district in the northern part of Idaho. Directly and indirectly, about 10,000 jobs depend on Idaho's lead and zinc mines, smelters and refineries.

I support this legislation, however, not only because it will benefit the people of my State, but also because it will help our country. This legislation will help America by providing jobs, by helping to ensure adequate supplies of two strategic materials in time of national emergency, by safeguarding consuming industries against possible shortages, and by conserving our foreign exchange reserves.

On May 20, 1971, I remarked to this House that the lead and zinc industries had their backs to the wall. But, as Chairman ASPINALL has noted, the situation has become even worse since then. Meanwhile, foreign producers are pulling ahead.

They are pulling ahead because governmental policies and programs provide foreign producers with advantages that are not available to American producers. For example, in this country we are, quite rightly, taking steps to reduce pollution. In fact, the United States is in the forefront among the nations of the world in the battle to improve the environment. Most foreign countries are not taking the energetic measures we are taking. This means that American lead and zinc producers will have to incur added costs of several hundred million dollars over the next 4 or 5 years, while their foreign competitors will incur only a fraction of those costs.

Moreover, foreign goverments employ a number of tax incentives to encourage new investment, very rapid amortization, sometimes in a single year, being a favorite device. If we also take into account the subsidies and low interest loans which foreign producers receive, plus the fact that foreign wage rates are distinctly lower than ours, we can reach only one, inescapable conclusion: the competition is decidely unfair.

The two bills introduced will take an important step toward correcting the unfair, competitive imbalance that now exists. Thereby they will add to the stability of two industries badly in need of stability.

The Mining and Minerals Policy Act of 1970—Public Law 91-631—calls on us to take this action. Our national and industrial security requires us to take it.

I join Chairman ASPINALL in the hope that these two bills will find wide support in the House.

SOVIET SHAME CONTINUES

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1972

Mr. DERWINSKI. Mr. Speaker, Monday is the fourth anniversary of the invasion of Czechoslovakia by the Soviet Union. On August 20 and 21, 1968, the frontiers of that tiny satellite were violated by 650,000 Russian, Bulgarian, East German, Hungarian, and Polish troops.

Invasion of other countries by the Kremlin's soldiers was, of course, nothing new. From the day back in 1917 when the Bolsheviks wrested power from the regime that overthrew the Romanoff dynasty until the present hour, the Soviet Empire has coveted the soil of its neighbors.

In the early 1920's it seized several nations, including such ancient lands as Ukraine, Byelorussia, and Armenia. In 1939 it collaborated with National Socialist Germany to take over Poland. Less than a year after that it extinguished the independence of Estonia, Latvia, and Lithuania.

During the late 1940's the Iron Curtain descended over a number of countries that had won their freedom from Hitler only to see it terminated by another international gangster, Stalin. Among these new colonies of the Soviet Empire were Bulgaria, Czechoslovakia, East Germany, Hungary, Poland, and Romania. The uprisings staged by East Germans, Magyars, and Poles at various times during the last two decades were put down with great severity when the tyrants in the Kremlin sent in overwhelming military forces.

The dispatch of troops to Czechoslovakia in 1968 was especially shocking because that nation had been a Soviet satellite for 21 years. Some inadequate reforms, were too much for the men in Moscow.

Despite the millions of words that have been spoken and written during the last few years to the effect that the Communists have mellowed and that their leaders have undergone a metamorphosis from socialistic totalitarianism to capitalistic free enterprise, the status of Czechoslovakia shows us that the facts are otherwise. The people who inhabit that unhappy nation can provide eloquent testimony to demonstrate the utter falsity of statements that proclaim the advantages of peaceful coexistence.

Mr. Speaker, the blackest midnight must eventually and inevitably yield to tomorrow's sunrise. Likewise, the people of Czechoslovakia, who witnessed the annihilation of Naziism, can take confort in the knowledge that godless Communism is doomed to eventual destruction. God speed the day when the power of international communism will disintegrate and that its victims, such as the long-suffering people of Czechoslovakia, will once more walk in freedom.

ONE MAN'S COMMITMENT TO A BETTER WORLD

HON. JENNINGS RANDOLPH

OF WEST VIRGINIA

IN THE SENATE OF THE UNITED STATES

Friday, August 18, 1972

Mr. RANDOLPH. Mr. President, America, in recent years, has become very environmentally aware. We are properly concerned that, as a result of our Nation's expansion, we are making parts of America undesirable places to live. It is encouraging, however, to know that millions of our citizens are aware of the danger and are alert to the opportunities to reverse the past neglect.

There is more to creating a clean, healthful, and enjoyable environment than just ending the pollution of our air and water. It is important to take positive steps to enhance the world around us.

The August 5 edition of the Sabbath Recorder, the weekly publication of the Seventh Day Baptist Church, contains a story of one man's commitment to a better world. Written by the Reverend Leon M. Maltby, editor of the magazine, it tells of the efforts of Earl D. Gardiner, of Watertown, N.Y., who, singlehanded, transformed a barren area into a place of beauty.

Mr. President, I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Sabbath Recorder, Aug. 5, 1972]

A LESSON IN ECOLOGY

We hear much about the ecological crisis that we are getting our country into and not very much about efforts that have been underway for a long time to conserve or rebuild our natural resources. The editor had occasion recently to observe one such local effort which, if repeated many times, would give reason for encouragement.

New York State, though not as densely populated as New Jersey, contains our largest city and many others that drain our resources and pollute air and water. On the other hand, there are large portions of northern New York that have gone out of cultivation and are producing valuable trees and an increasing supply of good, clean water in many creeks and rivers.

In Jefferson County where dairy farming is still prosperous, many marginal farms have gone back to nature by default or by plan. There is a stretch of several miles along the North Branch of Sandy Creek that holds much of nostalgia for the editor. It was the nearest swimming hole and the finest place to catch rock bass and to try to catch several other varieties of fish, including pickerel and pike. As boys we knew every bend, every swale, every tree crossing, and almost every large rock or overhanging bush that was likely to provide shelter for a bass that could be tempted with wriggling worms freshly dug from the moist barnyard. The whole creek bottom was pastured as well as the woods and open fields on the steep hillsides that made up the back end of several farms. The barbed wire fences extending to the banks of the creek were a hazard for overalls and fishing poles but helped one to keep his bearings as he trudged up and down this half-wild, half-tame country. It was the pasturing that made it possible to fish the creek. All this has changed.

There was one small farm on the creek bottom where a small bridge (which seemed big to a young boy's eyes) spanned the creek on a road that ran along the foot of the barren stony hill on the opposite side. We seldom traversed that steep road leading eventually to the village of Rodman a few miles away. Fresh spring water was piped across the bridge from a spring on our side and poured continuously into a big iron kettle to serve the cattle and the people in the Collins house. There were other springs and gurgling rivulets from which a thirsty young fisherman could drink like Gideon's band. We never thought of drinking from the main creek although its quality and its flow were even then being tested for use in the nearest city.

The narrow rocky road on our side of the creek that slanted down the long hillside and doubled back at the foot of the hill to cross the bridge was abandoned several years ago along with the bridge which is now only a skeleton of steel girders. It is reported that mischievous boys twice tore up the planking for the fun of launching the planks down the stream. Although the little farm on the bottom land had long since become inoperative the house and garden could be reached via the dirt road down the opposite hill, so I had heard. The easiest way to get a quick look at that fine old creek might be to approach it by car from the other side, since the unpastured woods on our side had grown up to briers and the hill is a harder climb at 66 than at 16.

Having laid this background we come to the ecology angle of this story with which we began. In company with longtime residents the editor set out to find the other end of that once-barren rocky road and follow it down the hill to that skeleton bridge. Much to his surprise, there was no barren brown hill. We drove through a young forest of pine and larch and native growth that completely overshadowed the road all the way down to the little clearing around the house where there was a tended lawn. On the way we heard an airplane and a helicopter overhead but could not see them or be seen by them as we burrowed through the green bower.

At the foot of the hill we met the owner of the land, a man well along in his seventies with pruning shears in his hand. He had a story to tell that would have done credit to a ranger in a national forest. Since 1927 he had been enlarging his land holdings in that area for purposes of reforestation and improving the ecology of the region.

Starting with a large farm at the top of the hill he had planted trees down the sides and included the little farm. The bottom land was set out to Christmas trees, which he was shaping with his shears. His picnic table was made with twelve-inch untrimmed white pine planks grown from a 1927 planting.

Through the years this one man had hand-planted half a million trees and carefully measured their growth and their contribution to the environment. He called our attention to the closely planted larch trees standing straight and limbless for seventy-five feet. He mentioned judicious harvesting of pulpwood and some other timber. In the nature of the case, he would not live to realize much financial gain from his years of labor, but he had made what seemed to him to be a worthy contribution to life. In spite of his advancing years he was still planting trees and watching the little seedlings put out new leaves as they struggled for light amid the grass. Our new friend was also planting shrubs that would yield winter food for the birds that now frequented the wooded area.

I went back to see the stream that had so much meaning for me as a boy. Though it was far less accessible and had lost some of its romantic charm because its banks were no longer closecropped by grazing dairy herds, I had to observe that there was much less erosion. It was a time of high water due to recent rains, but the stream was clean and clear, not muddy. The farmers had helped by keeping their cows closer to home, but the man who planted trees had more consciously done his part in making up-state New York a better place to live in.

Not everyone can make the same contribution to life, to be sure. We must doff our hats to such men as the one mentioned here who prepare benefits for the oncoming generations with little thanks from the present and keep on working regardless. When we look at efforts like this, we have hope that man will not make uninhabitable the world that God has made to be inhabited and cared for.

RESULTS OF SURVEY OF CONGRESSMAN ROBERT McCLORY'S YOUNG CITIZENS' COUNCIL

HON. ROBERT McCLORY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1972

Mr. McCLORY. Mr. Speaker, there are a great many myths which surround the views and attitudes of young citizens of America—particularly the views of those in the age group of 18 to 21—who will be voting in the presidential elections this year—for the first time.

I have been most anxious to communicate directly with as many as possible of these young citizens in order to determine their views—and to indicate my desire to learn and understand their positions. Also, I have sought to express my individual opinions on issues which are of special interest and concern to these young voters.

Mr. Speaker, several months ago, I conceived the idea of establishing a young citizens' advisory council—a loosely organized body of young citizens composed mainly of high school seniors and college students, who can inform me of the concerns of young voters in my district. While the organization is still in the formative stages, it has already demonstrated its utility as a vehicle for communicating some of my positions on subjects such as first, the environment; second, ending the war in Indochina and reducing world tensions; third, extending the legal rights of 18-, 19-, and 20-year-olds; and, fourth, other issues.

Mr. Speaker, at the recent county fairs held in Kane, Lake, and McHenry Counties, members of my young citizens' advisory council were able to take a survey of the opinions of hundreds of young Americans on some issues in which young people frequently voice an interest. These young citizens who responded to this survey represent a broad cross section of those in this age group who inhabit this great section of the Nation. The survey demonstrated that, for the most part, these young Americans were well informed and held definite opinions on the six issues on which they were queried. I am confident that the results of this survey will be of interest to my colleagues and to other young Americans throughout the Nation. The results of the survey are as follows:

RESULTS OF THE SURVEY CONDUCTED BY CONGRESSMAN ROBERT McCLORY'S YOUNG CITIZENS' ADVISORY COUNCIL

Question	Yes	No	Don't know	Percent yes
1. Do you feel that full rights of citizenship should be extended to 18-year-olds?	452	71	28	80
2. Do you feel that the Federal, State and local governments are doing enough to protect the environment?	47	468	41	9
3. In view of the pending constitutional change granting equal rights to women, should women be included in any new draft law?	240	245	69	43
4. Do you favor a greater student exchange program for high school and college—including foreign study programs for American students?	441	67	50	79
5. Should busing of students be required to achieve greater racial balance in our schools?	137	350	70	25
6. Do you favor lifting all legal restrictions on marijuana to permit marketing of marijuana in the same manner as tobacco?	216	305	32	39

Mr. Speaker, the questionnaire also contained a question 7 in which those surveyed were invited to suggest other subjects which they felt were of equal or great importance. Only 60 out of 565 considered that other issues were of equal or greater importance—including 33 who mentioned Vietnam, 30 who referred to the existing Illinois 18-year-old drinking law, six who mentioned the economy—inflation, unemployment, poverty, 15 who referred to the existing laws on abortion, and 11 who raised the question of taxes, as well as a few who referred to other issues.

Mr. Speaker, a survey of the members of this body might result in differences of opinion on at least some of the issues upon which these young citizens were polled. However, the differences can be measured in percentage points and not in any diametric opposition to the views which these young Americans have expressed.

Mr. Speaker, I believe I interpret accurately the trend of thinking in this nation in support of respect and concern for those issues which are prominent in the minds of young Americans. Surely, in many instances we can sense a lack of perspective or a need for moderation of positions which many of our young citizens have taken. On the other hand, the results of the survey conducted by my Young Citizens' Advisory Council, and my own observations, establish that there is already a great deal of balance and good judgment being expressed by those who may be voting for the first time in this fall's election.

Mr. Speaker, it seems most significant to note that a substantial majority of these young citizens are opposed to the legalizing of marihuana.

Mr. Speaker, it is interesting also to note, that an extremely high percentage of the young students favor an expanded student exchange program—including foreign study programs of American students.

It would seem well for those of us in the Congress to ponder the overall results of this meaningful survey conducted by young citizens—among young citizens—on issues of concern to them—and to all Americans.

McGOVERN: GAINING IN STATURE

HON. ROBERT L. LEGGETT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. LEGGETT. Mr. Speaker, the announcement by AFL–CIO president, George Meany, that his organization will remain neutral in this year's Presidential election has led some observers to predict that McGOVERN will lose both union money and union votes. It is becoming increasingly clear that these predictions suffer from what Vice President AGNEW has termed "instant analysis."

Despite Mr. Meany's influential position among labor unions, he has been unable to prevent a large number of union leaders from bucking his neutral dictum and supporting Senator McGOVERN for President.

On August 14, 25 unions in the AFL–CIO publicly announced the formation of a national labor committee to work for the election of GEORGE McGOVERN.

Included among these unions were such important groups as the American Federation of Teachers, the International Union of Electrical Workers, the American Federation of State, County, and Municipal Employees, the Amalgamated Clothing Workers Union, the International Association of Machinists, and the Newspaper Guild.

Despite their individual differences of opinion, all of these unions are united in their opposition to President Nixon. As Joseph Beirne, president of the 300,000 member Communications Workers of America, has said:

> We recognize a 12 year record in the Senate that is rated 93 percent right by COPE and that's a damned good record compared with President Nixon's zero-minus record.

It is ridiculous to assume that labor will remain neutral in a presidential election. They are fully aware of the difference between the Democratic and Republican Party. Despite their objections to a few of McGOVERN's programs, they know that he will better represent their interests than the present incumbent.

Under President Nixon's leadership the working man's wage has been frozen, while the cost of living has continued to soar. At the same time the corporate share of the Federal tax burden is decreasing. It was 35 percent in 1960 and it is estimated that it will fall to 26 percent in fiscal 1972. This of course means that a greater and greater share of the tax burden is being placed on the shoulders of the working men and women of this country.

The repudiation of Meany's policy of neutrality should not be viewed as a repudiation of the man himself. As one California labor executive put it:

> We in the labor movement have the greatest regard for George Meany.... But this time he is wrong. Can labor survive four more years of Nixon?

In the weeks ahead, more and more labor leaders will be answering that question.

At this point in the RECORD I insert three articles from the August 7 Solano and Napa County Labor Journal.

STATE CARPENTER LEADERS FOR McGOVERN

"But this he (George Meany) is wrong. Can labor survive four more years of Nixon?" With that the two top executives of California State Council of Carpenters last week released a statement calling the attention of all carpenters in the state that "Nixon must be defeated and McGovern must be elected if America is to move forward toward the solution of the problems that are tearing this nation apart."

The following is the statement released by Council President Gordon A. McCulloch and Executive Secretary-Treasurer Anthony Ramos:

"For the past three years, elected officials of the labor movement and the labor press have continuously pointed out the urgent necessity of removing Richard Nixon in the 1972 Presidential election.

"On the basic issues of reducing unemployment, controlling inflation, eliminating poverty, rebuilding our cities, ending the war in Vietnam—the Nixon administration has failed miserably.

"None has been more outspoken in his criticism of the Nixon administration than AFL–CIO President George Meany.

"Now Brother Meany has changed his mind. With the field narrowed down to Nixon or McGovern, Brother Meany's position is that the AFL–CIO should remain neutral.

"We in the labor movement have the greatest regard for George Meany. He has led the fight against the monstrous inequities of the so-called wage-price freeze. He spearheaded the opposition to Nixon's attempt to place outrageously unqualified nominees on the U.S. Supreme Court. He has thrown the support of organized labor behind the fight for consumer protection, for equal opportunity under the Civil Rights Act and for protection of the environment.

"But this time he is wrong. Can labor survive four more years of Nixon?

"While it is true that Senator McGovern has made wrong decisions in the past on some issues important to labor and while it is not to be expected that all labor leaders are going to agree with all of his programs, there is no question in our minds that his overall program will aim to serve the needs of working people, as contrasted to the trickledown, 'What's good for big business is good for the nation,' economic theories of Mr. Nixon.

"Nixon must be defeated and McGovern must be elected if America is to move forward toward the solution of the problems that are tearing this nation apart."

STATE BUILDING TRADES CALL FOR DEFEAT OF NIXON

A resolution calling for the defeat of President Nixon in the November 7 general election won the unanimous approval of more than 400 delegates taking part in the 46th Annual Convention of the State Building and Construction Trades Council of California in San Diego last week.

The resolution, which put the Council "on record as endorsing the defeat of Richard M. Nixon," charged Nixon and his administration with:

Deliberately adopting policies and actions that doubled unemployment.

Taking direct action against all workers by holding back wage increases negotiated in legal collective bargaining contracts.

Conducting "a deliberate policy of character assassination of public officials who support the program of organized labor."

Vetoing "every decent piece of social legislation passed by the Congress."

Manipulating the Department of Justice so that more than 200 labor officials were charged with what the resolution termed "contrived violations of federal laws."

The delegates also adopted a resolution opposing the California Coastline Initiative to appear on the November ballot.

James S. Lee, the Council's president, said that the Building Trades have historically supported sound, reasonable and realistic environmental legislation.

But the problem is that many advocates of ecology and conservation movements have adopted a zero growth philosophy and this philosophy tends to ignore the job needs of workers as well as other human and property rights, he said.

The Building Trades Council's resolution opposing the Coastline Initiative said:

It urged all union members to vote against the initiative.

John F. Henning, executive officer of the California Labor Federation warned the delegates that "a Nixon sweep in California would inevitably mean a return of the Assembly and Senate to Republican party control."

"Unfortunately," he said, "conservatives would dominate the Republican legislative bodies . . .

"A Nixon sweep in California would be disastrous for the labor movement of the State," he declared.

In other actions, the building trades delegates:

Called for enactment of a state law to abolish the Division of Labor Law Enforcement, the agency responsible for collecting wages employers have refused to pay their workers. It charged that the division has deteriorated into a "do nothing body" that is "nothing more than a sham and a waste of the taxpayers' money." Instead, it supported a plan to place the collection of wages and fringe benefits under the jurisdiction of civil courts.

Called on the AFL-CIO National Building Trades Department to develop a new policy to resolve jurisdictional work disputes between building and construction trades unions.

Reelected Lee of Painters Local 595, Van Nuys, and J. J. Twombley of Operating Engineers Local 12 as president and secretary-treasurer respectively, and elected Ray Mendoza of Hod Carriers, Building and General Laborers Local 542 in Los Angeles to be the Council's Executive Board in District 3.

AMALGAMATED CLOTHING WORKERS OF AMERICA—WE BACK MCGOVERN FOR PRESIDENT

George McGovern is the Democratic Presidential nominee, and the Amalgamated and every other union must spare no effort to see that he is elected in November.

Nixon has brought the U.S. closer to economic collapse than any President since Herbert Hoover. In 1972 as in 1932 the majority of Americans are suffering because of a national administration oriented to big business. Now, as then, we've got to return America to its rightful owners.

Today, the corporate share of the federal tax burden is decreasing. It was 35 per cent in 1960, and it is estimated it will fall to 26 per cent in fiscal 1972. This means the public's share of the tax burden has been increasing.

The federal tax structure is rigged against income from work, and in favor of unearned income, There is a triple standard that government applies to income taxes.

One standard applies to wages and salaries. This income is taxed in full.

A second standard applies to income from stocks, real estate and other so-called capital assets sold at a profit.

A third standard is applied to some incomes which never appear on the tax form—interest on state and local bonds, the income that is washed out by phantom costs as oil depletion, fast depreciation write-offs, and bookkeeping farm losses. This type of income escapes taxation completely.

According to I. W. Abel, Chairman of the AFL-CIO Economic Policy Committee, in testimony to Democratic Platform Hearings, there has been a massive shift in income distribution—from low and middle-income people to big business and the wealthy. The unfair tax structure is part of it. The Phase 2 program that began Nov. 14, with the end of the freeze, is part of it. They are all of one piece—reflecting the Administration's view that economic progress begins and ends in the stock market and corporate financial reports. They reflect the Administration's view that the business of America is business.

The people around Nixon call McGovern a "radical" because he wants to reverse this trend. The business of America should be people, McGovern is saying, and we agree.

For the last 100 years or so we've been victims of the trickle-down theory—make businessmen rich, the theory goes, and enough will trickle down to the workers to keep them happy.

It's time to start the "trickle-up" theory of prosperity. This theory says that if there is full employment at decent wages, then businessmen will make profits because people will have money to buy. Businessmen are clever enough to find ways to make a profit. But the first consideration should be to the welfare of most of the people.

At no time in the last 100 years have we had such a significant opportunity to reverse the priorities of our government and put the people first. This is why the election of McGovern is so important and why we must use all of our resources to win in November.

ANOTHER TRAGIC RESULT OF OVERSIZE VEHICLES

HON. FRED SCHWENGEL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. SCHWENGEL. Mr. Speaker, no one needs to be an expert on the laws of physics to feel uneasy when a huge truck or bus approaches him on the highway. The danger is a fact of life, and has been documented. According to a 1968 report by the Federal Highway Administration, the heavier commercial vehicles constitute 7 percent of the Nation's registered motor vehicles, account for 11 percent of the total vehicle miles traveled, and are involved in 19 percent of highway fatalities.

Also known to practically every driver is the fact that blast and suction effects created by these massive vehicles can cause marked instability in cars overtaking or being overtaken by them.

Some may discount the danger of trucks and buses that push the limits of safety by their size alone, feeling that their turbulence rarely causes accidents. However, when such a tragic accident happens, the victims derive little comfort from being told that their plight is unusual.

On Interstate 80, in Henry County, Ill., July 21, another such accident happened. The report reads as follows:

Driver of Unit No. 1 stated she had just passed a unit and was about to pull back into right lane of traffic when she looked into the rear-view mirror and saw a commercial type bus passing her on the right side. As the bus went by it caused a vacuum between the two units and unit one lost control and tipped over in the median. Unit No. 2 did not stop.

Bleeding wounds were inflicted upon two of the car's three occupants. I am sure all three occupants would agree that other travelers should be spared the horrible experience, and that we are not at present doing nearly enough to protect them.

AIRLINERS IN NEAR MISS OVER TOKYO

HON. JAMES W. SYMINGTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. SYMINGTON. Mr. Speaker, I have previously called attention to the possibility of a "Titanic of the air" through continued absence of collision avoidance systems throughout the airline industry. and the lack of resolution on the part of the FAA in that regard. Such a tragedy almost occurred recently over Japan, as the following article indicates. If it had not been avoided people would have immediately and justifiably called both governments to account for failure to require the incorporation of technology that has existed for years, technology such as McDonnell Douglas EROS system which would have prevented this near miss and a number of fatal collisions in the recent past. The FAA should move collision avoidance another notch up in priority, and work more expeditiously with the world's airlines to insure passenger safety. Comparisons in cost between accidents of the dimension of the one described and a national program of collision avoidance are noted in CONGRESSIONAL RECORD, volume 118, part II, page 23846.

Herewith follows the article which appeared in the Washington Evening Star and Daily News on August 4, 1972:

PAN AM, JAPANESE JETLINERS IN NEAR-MISS OVER TOKYO

TOKYO.—Pan American and Japan Air Lines 747 jumbo jetliners passed between 100 to 200 feet of each other in the skies near Tokyo Wednesday, endangering the lives of 501 passengers and crewmen, the Japanese Ministry of Transportation reported yesterday.

It said the near-miss occurred at 7:26 p.m. (6:26 a.m. EDT) at about 4,000 feet over Chiba, across Tokyo Bay from Tokyo International Airport.

A ministry spokesman identified the Boeing 747S and Pan Am Flight 820, which had just taken off for Honolulu with 343 passengers and 7 crew members, and JAL Flight 942, en route from Guam to Tokyo with 122 passengers and a crew of 19.

(A Pan Am spokesman in New York identified its pilot as Capt. Kevin Keith and quoted him as saying the two planes were at least 1,000 feet apart when they passed. He said Keith reported he saw the other plane approaching as he was climbing out and made a turn "purely as a precautionary measure.")

INSURING A FREE COMPETITIVE PRESS

HON. HUGH L. CAREY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. CAREY of New York. Mr. Speaker, on June 30, 1972, a report was submitted to the Economic Analysis Division, Planning and Marketing Department of the U.S. Postal Service, entitled "A Study of the Demand for Advertising, Newspapers, and Magazine Mail." This report reflects the new approach of the U.S. Postal Service to maximize rates and revenues. The recent decision of the nine governors of the U.S. Postal Service to increase the postal service rates for second-class mail reemphasizes the new attitude of the Postal Service.

The new rate formula is very complicated since it involves differing rates on editorial and advertising material, with distinctions made for distance of delivery as well as a per piece surcharge. Although the overall average increase is 127 percent, this figure is very deceptive. The new increase of second-class postal service rates will affect our Nation's various newspapers and magazines to varying degrees. In many cases, particularly with the smaller publications, the postal rates will actually be an increase of several hundred percent over pre-1971 rates.

Generally speaking, the new increase will be relatively larger for small newspapers and magazines. These publications provide our Nation with the most effective means of expressing controversy, dissent, criticism, and minority viewpoints. They provide the public with a free flow of ideas and opinions which is indispensable to the integrity and vitality of democratic institutions.

In 1787 Thomas Jefferson recognized the vital role played by these small publications when he stated:

> The basis of our government being the opinion of the people, the very first object should be to keep that right; and were it left to me to decide whether we should have a government without newspapers or newspapers without a government I should not hesitate a moment to prefer the latter. But I should mean that every man should receive those papers and be capable of reading them.

I believe the U.S. Postal Service has an obligation to the well-being of the American people. In 1901 the then Postmaster General, Charles E. Smith, said:

> Our free institutions rest on popular intelligence, and it has from the beginning been our fixed and enlightened policy to foster and promote the general diffusion of public information. Congress has wisely framed the postal laws with this just and liberal conception. It has uniformly sought to encourage intra-communication and the exchange of intelligence.

I do not believe that this recent increase which would economically intimidate a vast portion of our country's independent journals would be consistent with the policy outlined by Mr. Smith. Indeed I believe it would be a disservice to the American people and a threat to our democratic institutions.

I believe that the free flow of opinions and information on the public level is seriously threatened by the recent increase of postal service rates.

Mr. Speaker, today I am introducing legislation which would reiterate the traditional congressional support for the dissemination of news, information, and opinions through the mails. This legislation was introduced on June 28, 1972, by the distinguished Senator from Wisconsin, the Honorable GAYLORD NELSON.

This bill would amend section 101(a) of title 39 of the United States Code by adding that "the Postal Service shall also be obligated to provide postal services at rates which will encourage and support the widest possible dissemination of news, opinions, scientific, cultural, and educational matter."

The bill would freeze the second-class postal rates at the level of June 1, 1972, for the first 250,000 issues of papers and magazines sent through the mails. Any increases in postal rates on editorial content for issues over the 250,000 ceiling would be phased in over a 10-year period.

Finally, this legislation would expressly write into law the longstanding congressional policy that the postal service shall not apply per piece surcharges on individual issues of second-class publications. These per piece surcharges place an unequal burden upon the smallest, lightest weight publications.

The Postal Service clearly needs more revenue. But it cannot be permitted to impose a rate increase which will drive hundreds of marginal publications out of business and reduce the quality of those that remain.

Mr. Speaker, economic censorship can destroy the free press just as effectively as political censorship. It is the responsibility of Congress to safeguard the public well-being by assuring the continuing existence of a free, competitive press.

THE APPROPRIATION BILLS OF THE SESSION

HON. GEORGE H. MAHON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. MAHON. Mr. Speaker, for the information of Members and others, I am including a table on the appropriation bills as they stand today with respect to the current fiscal year 1973. The table which I am including refers to new budget spending authority in the appropriation bills for 1973.

SUPPLEMENTALS, 1972

At this session, in respect to the fiscal year 1972 which ended last June 30, the Congress considered four supplemental measures and, in those four measures, appropriated a total of $7,105,174,329, representing a net reduction below the President's budget requests considered in those measures of $418,245,119.

In respect to the current fiscal year 1973, the table shows the totals including the vetoed Labor-HEW bill, and the totals excluding the vetoed Labor-HEW bill.

HOUSE ACTIONS

Omitting the vetoed Labor-HEW bill—for which a new bill must be formulated—House actions to date on the appropriation bills for 1973 are as follows:

Budget requests considered	$56, 145, 266, 099
Approved	55, 365, 860, 309
Net reduction in these bills	−779, 405, 790

In addition to the $28.8 billion of budget requests involved in the Labor-HEW appropriation bill, the House also has for consideration approximately $92 billion of appropriation requests to consider in connection with regular bills not yet reported, namely, Defense; Military Construction; and Foreign Assistance; and a closing supplemental bill.

SENATE ACTIONS

Omitting the vetoed Labor-HEW bill—for which a new bill must be formulated—Senate actions to date on the appropriation bills for 1973 are as follows:

Budget requests considered	$56, 339, 149, 994
Approved	57, 467, 671, 344
Net increase in these bills	+1, 128, 521, 350

CLEARED TO THE PRESIDENT

Again omitting the vetoed Labor-HEW bill, the 10 other bills for 1973 cleared to the President involve the following totals:

Budget requests considered	$51, 634, 823, 394
Approved	51, 957, 078, 075
Net increase in these bills	+322, 254, 681

PENDING FINALIZATION

In addition to the $28.8 billion of budget requests to be reconsidered in connection with a new Labor-HEW appropriation bill, the Congress has yet to finalize action on about $97 billion in budget requests involved in the State, Justice, Commerce, and judiciary appropriation bill, now in conference; the foreign assistance bill; the defense bill; the military construction bill; and the closing supplemental bill.

FINAL SESSION OUTLOOK

Mr. Speaker, as I indicated on the House floor earlier this week, when the work is all done this fall and we complete all the appropriation bills for fiscal year 1973, I would not be at all surprised if the House has not provided, in total, something materially below the total of the budget requests considered in the 1973 appropriation bills. I refer only to the annual appropriation bills. And I refer only to the House.

But even in respect to final action by the Congress on the annual appropriation bills for 1973, when we consider all the measures which will be before us, it now seems to me that we might very well be, in total, about even, or perhaps a few hundred million dollars below the related budget requests.

Mr. Speaker, I include the table referred to:

NEW BUDGET (OBLIGATIONAL) AUTHORITY IN THE APPROPRIATION BILLS FOR 1973 (REVISED TO AUGUST 18, 1972)

[Note: As to fiscal year 1973 amounts only]

Bill	Budget request considered	Approved	Change, (+) or (−)
IN THE HOUSE			
1. Legislative	$433, 627, 004	$427, 604, 764	−$6, 022, 240
2. State-Justice-Commerce Judiciary	4, 687, 988, 600	4, 587, 104, 350	−100, 884, 250
3. HUD-Space-Science-Veterans	20, 173, 185, 000	19, 718, 490, 000	−454, 695, 000
4. Transportation	2, 909, 181, 095	2, 791, 614, 095	−117, 567, 000
Advance 1974 appropriation	(131, 181, 000)	(131, 181, 000)	
5. District of Columbia (Federal funds)	343, 306, 000	332, 306, 000	−11, 000, 000
6. Labor-HEW (H.R. 15417, Vetoed)	[27, 327, 323, 500]	[28, 603, 179, 500]	[+1, 275, 856, 000]
7. Labor-HEW (New bill)			
8. Interior	2, 520, 340, 000	2, 529, 558, 200	+9, 218, 200
9. Treasury-Postal Service-General Government	5, 066, 603, 000	5, 057, 145, 000	−9, 458, 000
10. Public Works—AEC	5, 489, 058, 000	5, 437, 727, 000	−51, 331, 000
11. Agriculture—Environmental and Consumer Protection	12, 952, 177, 400	12, 897, 010, 900	−55, 166, 500
12. Disaster Relief Supplemental, 1973	1, 569, 800, 000	1, 587, 300, 000	+17, 500, 000
13. Defense	(79, 594, 184, 000)		
14. Military Construction	(2, 661, 384, 000)		
15. Foreign Assistance	(5, 163, 024, 000)		
16. Supplemental, 1973			
Total, House bills (as passed)	83, 472, 589, 599	83, 969, 039, 809	+496, 450, 210
Less: Vetoed Labor-HEW bill	27, 327, 323, 500	28, 603, 179, 500	+1, 275, 856, 000
Total, House bills (excl. Labor-HEW)	56, 145, 266, 099	55, 365, 860, 309	−779, 405, 790
IN THE SENATE			
1. Legislative	519, 347, 899	514, 722, 880	−4, 625, 019
2. HUD-Space-Science-Veterans	20, 258, 183, 000	20, 583, 370, 000	+325, 187, 000
3. District of Columbia (Federal funds)	343, 306, 000	313, 706, 000	−29, 600, 000
4. State-Justice-Commerce-Judiciary	4, 704, 326, 600	4, 820, 717, 769	+116, 391, 169
5. Transportation	2, 909, 181, 095	2, 906, 994, 095	−2, 187, 000
Advance 1974 appropriation	(131, 181, 000)	(131, 181, 000)	
6. Treasury-Postal Service-General Government	5, 066, 603, 000	5, 057, 186, 000	−9, 417, 000
7. Labor-HEW (H.R. 15417, Vetoed)	(28, 776, 633, 500)	(31, 354, 930, 500)	(+2, 578, 297, 000)
8. Labor-HEW (New bill)

Prepared August 18, 1972, in the House Committee on Appropriations.

COMPREHENSIVE BUDGET SCOREKEEPING REPORT

Mr. Speaker, I again add that the foregoing table relates only to the annual appropriation bills. Those bills do not encompass all actions—or inactions—that have an impact on the budget recommendations. In that connection, I would again call attention to the periodic budget "scorekeeping" reports issued by the Joint Committee on Reduction of Federal Expenditures. These reports are designed to keep tabs, currently, on what is happening in the legislative process to the budget recommendations of the President, both appropriationwise and expenditurewise, and on the revenue recommendations, and not only from actions in the revenue and appropriation bills but also in legislative bills that affect budget authority and expenditures—backdoor bills, bills that mandate expenditures, and so on.

I should say that the budget has been seriously breached by three or four nonappropriation bills this year.

Several of these scorekeeping reports have been issued this year. The latest will be available sometime next week. Copies are sent to the office of each Member.

LES ASPIN'S FIGHT FOR TAX REFORM

HON. ADLAI E. STEVENSON III

OF ILLINOIS

IN THE SENATE OF THE UNITED STATES

Friday, August 18, 1972

Mr. STEVENSON. Mr. President, few Members of the 92d Congress have fought more vigorously and effectively for the public interest than LES ASPIN, of Wisconsin's First District. This is all the more remarkable when one considers that Representative ASPIN is serving his first term and is one of the youngest Members of Congress.

One of LES ASPIN's most significant achievements has been his leadership in the House in the fight to eliminate special tax bills creating loopholes for special interest groups, commonly called Members' bills. His successful effort in stopping more than a dozen special interest "Members' bills" from being passed by the House constitute one of the most important tax reforms of the 92d Congress.

I ask unanimous consent that there be printed in the RECORD two newspaper articles detailing Representative ASPIN's leadership in the fight to make our tax system fairer and more progressive. The first article appeared in the Milwaukee Journal on March 1, 1972. The second article was published in the Christian Science Monitor on April 20, 1972.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Milwaukee Journal, Mar. 1, 1972]

ASPIN ACTION BLOCKS SPECIAL INTEREST BILLS

(By Frank A. Aukofer)

WASHINGTON, D.C.—Rep. Les Aspin (D-Wis.) teamed up with Rep. Wright Patman (D-Tex.) Tuesday to block House action on a group of special interest tax bills.

"Some of them were clearly just incredible boondoggles for people in particular situations," Aspin said. "No wonder our tax laws are just like Swiss cheese with these coming in here like this. The whole process stinks anyway."

He was referring to a long standing House procedure under which so called "members' bills"—that is, bills requested by individual members to deal with specific tax inequities—are brought to the House floor and acted on by unanimous consent.

USUALLY PASSED

In the past, Rep. Wilbur Mills (D-Ark.), chairman of the House Ways and Means Committee, simply introduced the bills and explained them briefly. They were considered passed if no one objected.

Aspin, with substantial advice from Rep.

Henry Reuss (D-Wis.), started the move against the bills over the weekend. On Monday, he sent a letter to Mills.

"We are being asked to unanimously pass 22 tax bills, only one of which would actually increase revenue, and 14 of which we believe are unjustified," Aspin wrote Mills. "Passage of these bills under the unanimous consent rule will make our expressed concern for tax reform appear hypocritical."

Mills argued that it would be impractical to suggest hearings on bills of this type because, he said, their impact was so narrow.

Rep. John Byrnes (R-Wis.), senior Republican member of the committee, backed Mills.

Aspin received support from Patman, chairman of the House Banking and Currency Committee, when he pointed out that one of the bills involved a $70 million tax break for banks. Patman is a foe of high interest rates and special treatment for banks.

Patman objected to two of the bills, Aspin objected to one. Reuss spoke against another, and four passed. Then Mills gave up and announced that he would not attempt to introduce the others.

Aspin said the worst bills were among those not brought up. One would have changed the method of taxing cigars to give the cigar industry a $9 million tax break this year and a $21 million break next year. Another would have temporarily suspended tariffs on olives to help that industry—at a cost of $3 million.

GAMBLERS COVERED

Among those that passed was a bill which, among other things, would prevent the government from disclosing information about persons who paid a federal gambling tax.

Aspin said he believed eight of the 22 bills were worthwhile. The rest, he said, favored special interests.

[From the Christian Science Monitor, Apr. 20, 1972]

TAX REFORM IGNITES IN CONGRESS

(By David B. Francis)

WASHINGTON.—Cigarmakers saw a special tax break blow up in their faces Monday.

"Congress has gotten the message that the taxpayer is fed up with expensive tax loopholes for the rich and special interest groups," commented Rep. Les Aspin (D) of Wisconsin, the congressman who led the successful fight against the cigar bill in the House of Representatives.

Under an old tradition, members of the House Ways and Means Committee have pushed through the House without hearings and little or no debate various minor tax bills that often have given sizable tax benefits to private interests.

Such bills are called "members' bills" because they are sponsored by members of the Ways and Means Committee.

HR 3544 was such a bill. It would reduce the excise tax on cigars by $120 million between now and 1979 and $21 million per year after that. It was sponsored by Democratic Rep. James A. Burke, whose Boston, Mass., district has some cigarmaking firms.

41 BILLS EMERGED

This was one of 41 members' bills that emerged from the Ways and Means Committee last October.

These bills are supposed to correct unintended inequities in the tax law. They are not supposed to change basic tax policies.

Tax reformers, however, contend that the bills sometimes amount to giveaways for various industries, corporations, or individuals.

For instance, HR 3544, according to the committee report on the bill, was intended to "make administration of the tax easier. . . ." It would have placed the tax on the wholesale price of cigars rather than the retail price. And it would have replaced a system of setting the tax according to price brackets with a simple 8.5 percent ad-valorem tax.

At the same time, however, the bill dramatically reduced the tax load. In defence, the committee report held that the cigar industry had a "relatively low" rate of return. It was said to be 9 percent on sales in 1970, a recession year. (Many other industries had lower profit levels that year.)

ROADBLOCK SET UP

On February 29, HR 3544 came up for a vote in the House along with 21 other members' bills. Normally, the rules of the House would have been suspended, and the bills would have zipped through without recorded vote.

However, a group of liberal Democrats led by Representative Aspin decided to stop the process. They objected to three bills, thereby blocking the "unanimous consent" of the House needed for suspension of the rules. Fifteen other bills were then withdrawn by their sponsors. Four passed without objection.

HR 3544 was one of the 15. Last Thursday it was put back on the legislative calendar for April 17.

Immediately Mr. Aspin sent a letter to members of the House stating: "At a time when tax reform has become one of the most important issues in the country, I find it incredible that we are being asked to approve a blatant $120 million tax break for the cigar industry without the benefit of committee hearings and without the right to offer amendments to the bill on the floor."

LOBBYING PARTNERS

Mr. Aspin was joined in the lobbying against the bill by Common Cause, Americans for Democratic Action, and Ralph Nader's tax-reform research group.

In a letter to Rep. Wilbur D. Mills (D) of Arkansas, chairman of the Ways and Means Committee, Albert H. Turkus of the Nader group wrote: "It seems ironic that, on the very day when millions of taxpayers will be completing their struggle to comply with their obligations under the internal revenue code, you and the members of the Committee on Ways and Means will be asking the House to enact this special-interest tax cut."

On Monday the bill was again withdrawn.

The tax reformers saw an important victory. They figured it was withdrawn because it would not have obtained the necessary two-thirds vote for passage under suspension of the rules.

"Congress is not likely to pass any more loopholes—at least for a while," said Mr. Aspin. He figures most representatives don't want to vote for anything that could be regarded as a loophole.

REBUTTAL GIVEN

A key staff member of the Ways and Means Committee, however, held that it was withdrawn because Mr. Mills was in New York making speeches and would not be on the floor to handle it. He held there should be no problem in passing it.

Representative Burke, in a telephone interview, said it was withdrawn because of "some inaccurate information" sent out by Mr. Aspin.

Mr. Burke dispatched a rebuttal to the Aspin charges Saturday in a letter to members. But he held members would have had inadequate time to consider it before the vote on Monday.

In defense of the bill, Mr. Burke held that increased sales of cigars, stimulated by the tax cut, might have reduced or eliminated any revenue losses.

An aide of Mr. Aspin noted that they were using revenue losses estimated by the Treasury that were based on assumption of constant sales.

DEBATE ABOUT INDUSTRY

Mr. Burke argued that the bill would have ended an unfair and regressive tax system on cigarmakers. He said the ad valorem system would help those making cheap cigars.

In reply, Mr. Aspin's aide said they would have had no objection to the bill if it changed the taxation system without reducing revenue. Indeed, it was noted, the tax could be made progressive—that is taxing expensive cigars more than cheap ones.

Mr. Burke said the industry had dropped from some 15,000 producers some 30 years ago to about 200 today and needed help.

This decline, according to the Aspin Staffer, was largely due to the arrival of automation in the cigarmaking industry.

Mr. Burke said his bill will be reintroduced at a later time. Mr. Aspin said he will again fight it.

To the tax reformers, the most significant aspect of the dispute is that it has occurred. Tax reform has become a popular issue.

So much so, indeed, that the Nixon administration may be advocating its own tax-reform program soon. The Treasury's top tax-policy official, Edwin S. Cohen, has a major speech scheduled for April 29 in Boston, preceded the day before by a press conference here. He is expected to make a major announcement on the question of tax reform.

It is not considered likely that any major tax reform will be proposed for this year. But, it is speculated, Mr. Cohen may announce a program for next year. This would presumably take some of the political steam out of the tax-reform proposals being ballyhooed by the various Democratic presidential candidates.

REGULATION TO OBLIVION

HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. FRENZEL. Mr. Speaker, there has been a great deal of discussion the last few years concerning the overcomplexity of government and the thousands of regulations which are put into effect every year. An article in the July 10 issue of Industry Week contains a warning of great importance to every elected official. The problem seems to be getting worse; not better. I am submitting for the RECORD a short section of the article in Industry Week:

REGULATION TO OBLIVION

Why not rules for government no less stringent than those it imposes on others? Under a Truth in Government Act we would see legislative labels like these:

"Caution: This legislative package contains unknown costs and may have unforseen consequences."

"Contents: This program includes 78% administrative burden, 19% overhead, and 3% benefits."

"Warning: This regulatory action may be hazardous to economic efficiency."

"Warranty: This law, if unsatisfactory within 12 months, will be cheerfully repealed and taxes reduced accordingly."

Or is it illogical to ask—if a deteriorating environment and rising pollution require government agencies to prepare a detailed environmental impact statement for each action—why a deteriorating economy and rising regulation ought not require a detailed economic impact statement?

For if we stand ready to turn over free markets and private enterprise to regulation, should we not then at least regulate the regulators?

REGULATION ESCALATION

The problem comes down to this: Rising foreign competition demands that our wealth, our resources, and our managerial skills be applied more efficiently and more effectively than ever before to increase economic growth.

Government itself agrees. Yet specious regulations which dissipate that wealth, constrain resources, and inhibit effective management action are escalating out of control.

During the 91st Congress, 20,000 bills were introduced in the House and 4,600 in the Senate. Some 3,000 bills were introduced during 1971 on pollution alone, truly a legislative avalanche.

Yet consider that just one regulatory agency—the Occupational Safety & Health Administration—during that same first year of its existence laid down 15,000 commandments and is readying 15,000 more.

We could find no one in government, including the Office of Management & Budget, who even knows how many agencies exist with such regulatory authority—let alone how many regulations were promulgated during 1971. But there are dozens of regulatory agencies which directly affect industry, and the Federal Register in which their regulations are promulgated bulged to 25,497 pages last year.

The Encyclopaedia Britannica contains only 28,715 pages.

But were it not bad enough that we have cacophony and chaos when we need unity and purpose, the regulatory approach has demonstrated time and time again that it does not solve problems—but creates them.

DECISIONS BEYOND COMPUTATION

It seems obvious why this should be so. The function of the free market, as President John F. Kennedy observed a decade ago, is that of a decentralized regulator of our economic system. "The free market is not only a more efficient decisionmaker than even the wisest planning body," he continued, "but even more important, the free market keeps economic power widely dispersed. It is thus a vital underpinning of our democratic system."

DRU GODWIN, PAPERGIRL

HON. DAWSON MATHIS

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. MATHIS of Georgia. Mr. Speaker, in a recent issue of the Albany, Ga., Junior College newspaper Mode there was an article written involving a fine young lady whom I have known for some time. This article deals with her part-time job which is, indeed, unusual for a young lady; but I believe it exemplifies young America at its finest. I present the article for the examination of the Members of the House:

HURRAY FOR WOMEN'S LIB! DRU GODWIN, "PAPERGIRL"

Being a paperboy isn't such an unusual job, but for Dru Godwin it is definitely different.

Dru, a 20 year-old Albany Junior College sophomore, has been "papergirl" on the Albany Herald route through Shoreham Apartments for over a month. So far her only problem has been people's constant kidding.

"I wanted to do something different after working in an office for four years." Dru laughs. "So I got this job!"

Starting on her daily route, Dru reaches into an Albany Herald carrier bag, pulls out a tightly-rolled newspaper and tosses it onto a second-floor Shoreham balcony. An elderly man on the route taught her to throw the papers underhanded during her first week. She estimates that after a month of practice she is on target at least 80 percent of the time.

Dru's 18 year-old brother, Kerry, who also attends Albany Junior College, was responsible for her getting the job. "He has been a paperboy for a long time," Dru explains as she continues on the route. "Kerry brings me my papers in the afternoons. I don't like to pick them up myself at the platform downtown—other paperboys really laugh at me there!"

Recalling an unusual reaction to her job, Dru tells of the ten-year-old girl who ran up to her on the route, saluted her, elatedly proclaiming, "Hurray for Women's Lib! Gloria Steinham can be proud of you!"

After half an hour, Dru folds up the empty Herald bag and starts back to her car. "You know, I'll miss this job when I transfer to the University of Georgia next fall. There aren't many jobs that permit you to wear blue jeans, a jersey, and tennis shoes. But then maybe the Athens paper will need an experienced papergirl . . ."

CENSORED MY LAI REPORTS REVEALED AFTER LONG FIGHT

HON. TOM STEED

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. STEED. Mr. Speaker, for the past 2½ years editors of the Daily Oklahoman newspaper of Oklahoma City have sought the release of several Army reports connected with the My Lai incident of 1968. The following article which appeared in the May 14, 1972, edition of the Oklahoman describes the accounts of the struggle which lead to the release of the information.

CENSORED MY LAI REPORTS REVEALED AFTER LONG FIGHT

(By Jack Taylor)

When the news of an atrocity committed by U. S. Troops in Vietnam began to unfold more than two years ago, the American public was deluged with confusing and conflicting reports, statements, evidence and testimony.

What happened at My Lai on that day in the Spring of 1968 would be unraveled, as best the Army could determine, at the hearings and courts-martial that would follow. But why it happened—the circumstances and contributing factors that made it possible—received far less attention, even from the Army.

By analyzing official records, some of which even the Army had not perused. The Daily Oklahoman has found new bits of information that throw new light on some parts of the most debated military controversy since the Dreyfus Affair.

On Dec. 1, 1969, The Daily Oklahoman requested records of the principal unit involved in the My Lai incident under an Army regulation directing release of information from Army records and files. That initiated a 2½-year struggle against Army censorship that included promises made and broken by Army officials, collisions with conflicting Army regulations, bureaucatic bungling and, finally, an appeal directly to the Secretary of the Army.

During the intervening months, Army spokesmen frequently said one thing and did another, censored information the Army already had made public and violated its own regulations—written expressly to forbid such secrecy.

Two weeks after the Army's adjutant general in Washington was asked for release of morning reports—the basic data recording a unit's history—the Army denied the request, citing two regulations "to preserve the privacy of individuals who may be prospective witnesses and to avoid prejudicing the rights of an accused . . ."

Information contained on morning reports, however, is largely statistical, and any narrative is limited to the bare essentials describing the death, injury, hospitalization, promotion, disciplining or transfer of individuals in the unit. And at the time of the Army's refusal to release those records, the names—as well as the comments—of dozens of witnesses already had received widespread publicity.

The Oklahoman then asked the Army for similar records of two other infantry companies in the same task force as the unit whose troops massacred the inhabitants of My Lai. But again the Army refused to release the information, citing the same justification.

More than a year passed while the Army convened an inquiry and courts-martial, filed and dismissed other charges and finally convicted one lieutenant.

When the court-martial of Lt. William L. Calley, the central figure in the tragedy, ended in conviction, the Army was asked on March 31, 1971, for morning reports of the three infantry companies and of a helicopter support company involved at My Lai, plus a copy of the full report of the Army investigative panel headed by Lt. Gen. William R. Peers.

Three weeks later, Maj. General Verne L. Bowers, who had succeeded Maj. Gen. Kenneth G. Wickham, the adjustant general who had first withheld the records, denied the latest request because other litigation was pending. He added, however, that the Army "intends to release" the requested records, including the Peers report, at the conclusion of the trials related to the massacre.

Just before Christmas last year, the last trial was concluded with the acquittal of Col. Oran K. Henderson, commander of the infantry brigade whose troops were involved. Henderson had been accused of participating in a cover-up of the incident.

A week later, on Dec. 28, the Daily Oklahoman renewed its request. Nearly two months passed before a postcard, dated Feb. 22, informed the paper that a reply could be expected within the next month—the first hint the Army might lift its lid of secrecy.

A telephone call determined that the Army had decided to release the morning reports and the delay was necessitated by strenuous censorship officials had decided to impose first.

Finally on March 8, Gen. Bowers wrote that the morning reports would be made available—after expunging certain information for reasons he failed to explain as required by his own regulations. He also reported that the Army, by then, had decided to withhold the Peers report, despite earlier promises to release it. He cited a section of the U.S. Code as justification.

The authority cited for withholding the Peers report is a law exempting public release of "investigatory files compiled for law enforcement purposes . . ." However, the memorandum directing the Peers inquiry specifically restricted the investigation from any such purpose.

The memorandum from then-Secretary of the Army Stanley R. Resor and Army Chief of Staff Gen. William C. Westmoreland directed Gen. Peers on Nov. 26, 1969, that "the scope of your investigation does not include, nor will it interfere with, ongoing criminal investigations in progress."

In effect, the Army had used the same justification for withholding both the morning reports and the Peers report, then looked for other justification to withhold the Peers report when the initial reasoning was no longer sound.

The highly excised morning reports were finally released on April 10 by the Army personnel records center in St. Louis after the newspaper paid $289.55 for reproduction costs. The records reflected 401 separately censored items of information, all apparently designed to prevent an invasion of personal privacy of individuals mentioned in the reports. Virtually every entry except routine transfers was censored.

However, some censored information—such as names of soldiers killed in action—already had been made public. In fact, the Army routinely releases weekly KIA lists that actually contain more personal information, such as the name and address of next of kin, than is ever included in a morning report entry.

In other examples, particularly involving reductions in rank, the Army censored the narrative but left the individual's names, rank and service number, and ignored the strength figures which would pinpoint just such a reduction by the change in figures listed by each rank.

And in one case, the Army left untouched two paragraphs of an Americal Division special order attached to one morning report which included a more detailed accounting of the very information officials were censoring on the basic document. In this case, two men in a signal battalion were reduced in rank or fined for misconduct.

These were minor examples of how the Army's penchant for secrecy sometimes leads to censoring material already released in some other way.

Another, more serious example, is in the heavily censored summary of the Peers report was made public. In it, one category expunged was the numbers and distribution of allied and enemy troop strength and the numbers of maneuver battalions at the time of My Lai. Yet in Gen. Westmoreland's "Report on the War in Vietnam," written when he left there to become Army chief of staff in mid-1968, not only is troop strength for the same period liberally reported, but a map even pinpoints the location of each maneuver battalion.

That report is sold to the public by the U.S. Government Printing Office for $6.

The House Armed Services Investigating Subcommittee, which conducted its own inquiry into the My Lai incident, inclued in its final report several citations from tactical operations journals. Yet the Army says these are currently classified as Confidential and unavailable to the public without a declassification review. That report also is sold to the public by the government printing office, for 50 cents.

A nine-page appeal for the full copy of the Peers report and for the information expunged from the morning reports has been forwarded to Secretary of the Army Robert F. Froehlke. The Oklahoman is citing 23 reasons under federal law and three different Army regulations why the information should be released.

The secretary also has been asked in the event the appeal is denied, that in accordance with another Army regulation he explain fully in writing the justification for withholding the Peers report and for continued secrecy on each of the 401 censored items on the morning reports.

Copies of the appeal, with cover letters requesting intervention on behalf of releasing the information, were sent to 80 members of Congress—members of the Senate Foreign Relations Committee, the Senate and House Armed Services Committees and the Oklahoma congressional delegation, as well as to the Freedom of Information Committee of Sigma Delta Chi, professional journalistic society, the Associated Press Managing Editors Association and the American Society of Newspaper Editors.

TELEPHONE PRIVACY—XXXVI

HON. LES ASPIN

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. ASPIN. Mr. Speaker, I reintroduced the telephone privacy bill on May 10, 1972, with a total of 48 cosponsors.

This bill would give individuals the right to indicate to the telephone company if they do not wish to be commercially solicited over the telephone. Commercial firms wanting to solicit business over the phone would then be required to obtain from the phone company a list of customers who opted for the commercial prohibition. The FCC would also be given the option of requiring the phone company, instead of supplying a list, to put an asterisk by the name of those individuals in the phone book who have chosen to invoke the commercial solicitation ban.

Those not covered by the legislation would be charities and other nonprofit groups, political candidates or organizations, and opinion polltakers. Also not covered would be debt collection agencies or any other individual or companies with whom the individual has an existing contract or debt.

I have received an enormous amount of correspondence on this legislation from all over the country. Today, I am placing a 34th sampling of these letters into the RECORD, since they describe far more vividly than I possibly could, the need for this legislation.

These letters follow—the names have been omitted:

JULY 20, 1972.

U.S. Representative LES ASPIN.

DEAR SIR: Upon reading an article in the Chicago Tribune, "Action Express," I understand you have a bill, HR-14884 introduced, that would keep solicitors from phoning their wares at the expense of our wearing nerves.

My wife and I are both bothered constantly every day by those hucksters who push their resorts and wares upon us. We would like the phone to be kept for the purpose it was intended for, that's why we have our number listed so that others with a purpose, besides selling, would be able to reach us. But it seems these hucksters use the phone list to hound people, and that is what we do not want.

I do hope you get your bill through, we're with you, keep up the good work.

We hope your bill is adopted, maybe our nerves will settle down again.

If your bill is passed, please see that it gets in print so that we can be notified and take action with the Illinois Bell Telephone company to get on their list or an asterisk before our name.

Thank you, and good luck. I remain.

Sincerely,

——— ———.

MILWAUKEE, WIS.

DEAR SIRS: I am not much for writing, but I am for getting this bill passed.

——— ———.

MILWAUKEE, WIS.
August 9, 1972.

Re Bill H.R. 14884.
Representative LEE ASPIN,
House Office Building,
Washington, D.C.

DEAR SIR: I sincerely hope this bill will be passed and an asterisk placed beside the names of people who don't want to be bothered with calls from different companies.

I do not like to have to resort to an unlisted number to get relief from these calls because I have 3 children and a husband who has to travel with his work and in case of an emergency I would want people to be able to reach me, also people from out of town.

When I was recuperating from a long illness I often slept during the day and those phone calls are so annoying. I feel sorry for shift workers and people with babies who are disturbed by these senseless calls and also for the elderly who have difficulty getting to the phone.

I would never buy from someone over the phone or make an appointment with them. I don't like this type of selling.

I think too if this bill passes, anyone calling people who indicate they don't want to be bothered should be guilty of making a nuisance call.

Sincerely,

——— ———.

WARRENVILLE, ILL.

Bravo! I like your bill re: controlling nuisance calls. I'd like a star next to my name. Thank you!

——— ———.

WE NEED OUR STATE MARITIME ACADEMIES

HON. ROBERT L. LEGGETT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. LEGGETT. Mr. Speaker, for many years our State maritime academies have acted as invaluable sources of merchant marine officer power.

They are to the Merchant Marine Academy at Kings Point what ROTC and OCS are to Annapolis and West Point. They turn out high quality, broadly educated merchant marine officers at relatively low cost.

In these days of antimilitary feeling among our most promising young men, the maritime academies serve an additional purpose: They provide a way for a bright young man to begin a seagoing profession without compromising any reservations he may have about military or foreign policy.

These maritime academies are entering a financial crisis which may prove overwhelming if increased Federal support is not forthcoming. Federal assistance has remained constant in terms of dollars, but costs have gone up with the general inflation. The result is that only 17 percent of the budget of the California academy is provided by the Federal Government.

I am inserting in the RECORD at this point a portion of a fascinating article on the academies, which appeared in the June issue of the U.S. Naval Institute Proceedings. The article, entitled "Our Imperiled State Maritime Academies," by Capt. William B. Hayler, is most impressive. I hope my colleagues will read it, and as a result become favorably inclined toward increased funding for these academies.

OUR IMPERILED STATE MARITIME ACADEMIES

(By Captain William B. Hayler, U.S. Navy (Retired))

This country has a tremendous asset in its six state maritime academies. These schools are a very small part of the nation's higher education picture, and are little known and less understood. They are, however, a vital source of trained officers for the U.S. merchant marine, and an important secondary source of officers for the naval reserve.

Indeed, it was a naval officer who provided the stimulus for the founding of a nautical college which would improve the quality of the U.S. merchant marine officer. Admiral Stephen B. Luce founded the Naval War College, but perhaps more important was his service to his country in lobbying to assist in the passage of the "Maritime Schools Act," which became law in 1874. This Act encouraged the establishment of maritime schools and authorized the U.S. Navy to assign officers and training ships to them.

The most important rationale for the continuance of the state maritime academy retaining its role in the education of merchant marine officers stems from one of Alfred Thayer Mahan's reasons for a nation becoming a seapower. The national character of a people, he felt, was one factor upon which seapower is built. So, also, he argued, must the people have an instinct for commerce and an aptitude for the sea. Maine is the best example of a state which has a seagoing heritage, and the presence of Maine Academy midshipmen at home on visits becomes a source of regional pride and serves to stimulate an interest in the sea which might otherwise diminish. In addition, it appears that the state academy graduate generally maintains his home ties and ultimately returns home to live. Consequently, the paycheck of the state academy graduate probably will find its way to his parent state for a long time to come. At the present time, about 55% of all academy-trained officers sailing from California ports are graduates of the California Maritime Academy—adding considerably to the enrichment of the state of California's treasury.

Moreover, it is just as impossible for all future merchant marine officers to attend Kings Point as it is for all future Army, Navy and Air Force officers to attend the appropriate federal service academy. This is why the Armed Services have a number of officer procurement sources to supplement the Service academies, ROTC units, officer candidate schools, and commissioning programs for promising enlisted personnel all help fill the Armed Services officer personnel requirements. And, considering the difficulty in recruiting officers these days, the time, effort, and money consumed in establishing these secondary sources have not been mis-spent.

The California Maritime Academy budget, for example, is about $1.2 million, of which the state will pay about $800,000. The remainder is made up about equally by the Maritime Administration (Marad) subsidy and student fees. The Marad subsidy pays for the maintenance of the training ship and helps defray the students' tuition costs. This sharing of costs of the education of a midshipman at a state academy is good business for the federal government. The federally-financed cost of the education of a state academy graduate is approximately $5,000, as opposed to $19,000 for his Kings Point counterpart. From the viewpoint of the individual student, the federal subsidy is something of a bonanza because it enables him to receive a first class education at a cost considerably less than that obtainable in other college level institutions, even those supported by public funds.

In a legal sense, State maritime academy midshipmen legally are cadets in the U.S. Maritime Service. They are civilians who have given up much, if not all, of the freedom which they would have enjoyed had they elected to live the life of an undergraduate at a nearby liberal arts or engineering college. The discipline under which they live is not military discipline in the sense in which it is inculcated at the Naval Academy or West Point. Rather, it is only that which is considered necessary to prepare them to live as licensed officers on board a well-ordered U.S.-flag merchant vessel. The purpose of this system of what might be termed "enlightened discipline" is to prevent instances of a breakdown in authority under stress, or incompetency in time of emergency where a maritime academy graduate is involved. The departure of many crew members of the *Andrea Doria* before all her passengers could be disembarked, and the ineptness displayed on board the *Morro Castle* when she burned off the New Jersey coast in 1934, are examples of shortcomings in discipline and training which the maritime academies are committed to prevent.

So much variation exists among the respective curricula of the state maritime academies, that it is necessary to generalize somewhat. All academies, however, strive to produce a highly qualified third mate or third assistant engineer who will be useful the day he reports on board his first ship and who also has the capability of growing into higher responsibilities both afloat and in the shore-side industry. State academies have been remarkably successful, and their graduates are prominent among the masters of American flag ships and as executives of shipping companies. The state schools are broadening their curricula, shifting away from the old nautical schoolship concept, but this costs money, and many state legislators who must foot the added bill are grumbling at the additional expense. Nor is there universal acceptance of the expanded course by a basically conservative shipping industry, some quarters of which are reluctant to depart from the traditions and practices of the past.

The maritime academy does not try to teach every midshipman to do everything. Unlike the Naval Academy, and in keeping with Coast Guard licensing requirements, the midshipmen are split into those studying for deck licenses and those aspiring to be engineers, Kings Point does have a pilot program enabling outstanding midshipmen to receive a dual qualification, but it will be some time before a significant number of officers are legally licensed to stand both a deck and an engineroom watch.

Just as some naval subjects, such as missile control and electronic warfare, are of no interest at the state academy, so would subjects of intense interest to a merchant marine officer—e.g., cargo handling and maritime labor relations—receive no more than minimal attention from a naval officer. Although it is no longer enough to be able to "splice, reef, and steer," the maritime academy graduate must have these practical skills or their modern counterpart. He must also have a broad background which will assist him as he goes up the maritime ladder, either ashore or afloat. For this reason, and unlike the Naval Academy, the state academy cannot satisfy its requirements simply by providing a drill or demonstration in machine shop practices or diesel operation. Maritime academy midshipmen must receive sufficient time in a diesel laboratory so that they learn how to operate a diesel, to diagnose its ills, and to repair it, possibly by machining a new part. Later in the same day, the same group of midshipmen may sit in a class in thermodynamics or electricity on an academic level in every way comparable to the Naval Academy.

Deck midshipmen must receive similar training. Since the merchant navy boasts no quartermasters or bosun's mates, it follows that midshipmen must be thoroughly proficient in deck seamanship. And they must be far more familiar with the theory and practice of navigation than their Naval Academy counterparts, who can expect the able assistance of a chief quartermaster in keeping out of harm's way. During their first class cruise, California midshipmen must use the Marcq Saint Hilaire method to work out their sights. They will probably never have to use it again, but if they master this, nothing will ever throw them. Finally, by maritime academy standards, the Rules of the Road as covered at Annapolis is scanty and would not provide the average maritime academy student with sufficient knowledge to pass the licensing exam which the Coast Guard throws at the aspiring merchant marine officer. At California, the Rules course covers seven semester hours. Over-emphasis? Perhaps; but the bridge watch of a merchant vessel is a one-man show. The new third mate will be his own junior officer of the deck, quartermaster, signalman, phone talker, and CIC team. If he is not to become an accident hazard later, he must be equipped with as much professional knowledge as he can hoist aboard while still a midshipman.

A maritime academy midshipman must spend six months at sea in order to qualify to "sit" for his license. A unique source of strength of the State Academy is the training ships owned by MarAd but permanently on loan to the various academies. Once a year practically all the faculty—who are licensed officers—and the midshipmen embark on a cruise of two to three months' duration. Kings Point, which prefers not to have a training ship, assigns its midshipmen to U.S.-flag ships for an equivalent period. Although there is something to be said for the Kings Point system, the state academies feel strongly that the academy schoolship is the best solution for afloat training, and the academies are currently engaged in another round of a perennial struggle with MarAd to retain their own training ships. MarAd's motives, as one might suspect, are economic.

A naval officer will think of a midshipmen's cruise as one in which midshipmen are embarked as supernumeraries for training. This is true with regard to a Naval Academy midshipman's cruise, but not true for a state maritime academy midshipman's cruise. California, for example, hires only ten non-faculty crewmen. Their talents range from those found in a Navy or Coast Guard warrant officer to that of a leading seaman. The rest of the muscle and skills necessary to run the ship come from the midshipmen, assisted and instructed by the licensed faculty. Coast Guard regulations require a licensed officer on the bridge and another in the engineroom. The rest of the watch at sea is made up of midshipmen in training, and the major portion of the maintenance is performed by them. In short, without midshipmen, the *Golden Bear* cannot get underway and stand out to sea.

The midshipmen, under the eye of the faculty, run the entire ship. They navigate, stand bridge and engineering watches, and maintain the ship. The faculty officer will step in only *in extremis*. The strength of the schoolship system is that, upon graduation, the new third mate or third assistant engineer is fully qualified to do any job which he may be called upon to perform. If a midshipman is embarked as a cadet on an American-flag merchant ship on a normal voyage the quality of instruction he receives from the ship's officers will vary from ship to ship. Some ship's officers will take an interest in him. Some can't be bothered. In any case, the midshipman cannot do jobs or perform maintenance which would take work away from an unlicensed member of the crew. The state academies feel, with considerable justice, that their graduate emerges with more practical operational knowledge than does his Kings Point counterpart, although they do begrudge some of the time which their midshipmen must spend maintaining the training ship during the academic year.

As a condition for receiving their MarAd subsidy, the state academy midshipmen must agree to accept a Naval Reserve commission if it is offered. To support this program, the academies all have small Naval Science Departments manned by the only active duty personnel on the campus. All midshipmen take a Naval Science course each academic semester, which course is designed to provide a rudimentary naval indoctrination as well as fill the gaps in the education which he receives as a part of his normal classroom work. Naval Science helps fill in the chasm dividing the education of a third mate and a third assistant engineer. The engineer midshipmen learn their navigation from the Navy, and the deck men learn about naval machinery the same way.

The Reserve program offered at the academies is not a primary source of Reserve officers, and the graduate is not ordered to active duty unless he so requests. The object of the program is to provide the midshipman with sufficient familiarity with the Navy so that he would be at home on the bridge of a merchant ship should he ever operate with naval units or to assist him in his transition to the Navy should he ever be called to active duty. The graduate's military obligation is considered completed if he sails on his license for at least six months a year for three years, or for an equivalent amount of sea time for a longer number of years. The interest in a Navy career varies with the economic climate and, probably, from one academy to the next. The current economic slump may be one of the reasons that the 1971 California class contributed six officers to active duty in the Navy and two to the Coast Guard, as opposed to none and two, respectively, for the Class of 1970. Obviously the small size of the officer input from the state academies does not make much of a dent on the entire officer corps of the Navy, and ashore or afloat, the graduate is a rarity. The author met few during his active Navy service. But those who remain appear in surprising places and achieve success comparable to their civilian counterparts in the maritime industry. They benefit from a thorough grounding in the fundamentals enjoyed by none of their contemporaries from any other source.

State maritime academies are under fire from several quarters these days. A July 1970 *Proceedings* article, "Manpower and the Merchant Marine," by a graduate of the New York Maritime College summarized the difficulties a graduate faces, for example, when sailing on his license in the face of opposition posed by the Marine Engineers Beneficial Association (MEBA). MEBA; incidently, has founded its own school in Baltimore and would probably not mourn too long at the demise of all the state academies.

One would hope that the passage of the Merchant Marine Act of 1970, and the trend toward larger, more sophisticated and automated vessels would make it most evident to the public that a solid maritime education would be necessary for the merchant marine officer of tomorrow. The current economic slump has hit MarAd along with other federal and state agencies. Funds for state academies are in short supply. Even in normal times, MarAd is by no means a front runner in the race to the Treasury. Federal financial assistance has remained constant in dollar value although the states have had to dip increasingly into their own pockets to pick up the deficit. In California, the percentage of the operating budget provided by MarAd has dipped from 27% to 17% in 1971. The state and federal governments have each tried to convince the other to throw more money into the pot. The arguments used by each side are identical: the program is really of primary benefit to the other. Should this financial shuffling continue to the ultimate limit—that a state academy should go under—both the state and the nation will suffer. The California Maritime Academy has been on the verge of being closed during most of the fiscal year 1970–71.

Although the State Maritime Academy is now and should remain only a secondary source of Naval Reserve officers, a careful reassessment by the Chief of Naval Personnel might well disclose ways to improve the Navy's contribution, increasing the dividends which the Navy enjoys from the program while at the same time decreasing the budgetary outlay. As the Navy is forced to close some of the long-established ROTC units throughout the country, this effort could be channeled to the state academies to the mutual advantage of all.

State academies have been in the business of turning out broadly educated merchant mariners for almost a hundred years. Their graduates are among the most successful leaders of the maritime industry both ashore and afloat. By any standard, the financial requirements of the academies are small, but if they are not met, the schools will founder. If this happens, the nation, the maritime industry, and the Navy will have ample reason to regret their inaction.

THE ALCOHOLIC DRIVER

HON. LAWRENCE J. HOGAN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. HOGAN. Mr. Speaker, alcohol and alcoholism have taken their toll in our country in both physical and emotional pain, and alcohol has played a distressingly large role in traffic accidents. It is common knowledge that more than one-half of all traffic fatalities are alcohol related, but when we stop to consider that more than 27,000 people died last year in alcohol-related accidents, the impact is staggering.

And yet what serious measures have been adopted to get the drunken driver off the road? Federal funds have been granted for extensive research into traffic safety, and strides have been made, but the statistics continue to rise.

Two men who are seriously concerned with the ever-increasing number of alcohol-related traffic fatalities have proposed a plan which emphasizes the importance of rehabilitation and strict enforcement of punitive measures. They are Martin G. Blinder and Guy O. Kornblum and their proposal recently appeared in Judicature. Because the article presents a unique insight into the problem of alcoholism and the possibilities of alleviating that problem, I now insert it into the RECORD:

THE ALCOHOLIC DRIVER: A PROPOSAL FOR TREATMENT AS AN ALTERNATIVE TO PUNISHMENT

(By Martin G. Blinder and Guy O. Kornblum)

This article is a condensation of a larger work by the authors which is available as a Society Information Report and may be purchased upon request (See page 34.) The authors wish to express their appreciation to Mr. Edward F. Kearney, executive director, National Committee on Uniform Traffic Laws and Ordinances, Washington, D.C., for his assistance in the preparation of this paper. They also thank the people with whom they corresponded and who provided them with needed research material. However, unless otherwise indicated, all opinions and conclusions are those of the authors.

Five million Americans, five per cent of the adult population, are alcoholics.[1] The majority of them drive.

Statistics, though inadequate to measure the amount of personal anguish consequent to alcoholism, emphasize dramatically the havoc and devastation to all portions of our society: one-half of all automobile deaths are alcohol related; a quarter of all male admissions to mental hospitals and one-half of all general hospital admissions are associated with alcohol; and nearly one-half of all non-traffic arrests are for the "crime" of public intoxication.

A study just completed by the New York State Citizen's Committee on Problems of Alcohol,[2] with the assistance of the National Study Service of New York, reported that there are more than 800,000 alcoholics in New York, that alcoholism contributes in a major way to crime and over-crowding of our correctional system, and that it is a serious drain on business and the economy. Clearly, the facts mandate a reappraisal of the present system.

In most states, individuals convicted of driving while intoxicated are punished as misdemeanants by fine, imprisonment or both.[3] The method of expressing the offense varies. The Uniform Vehicle Code (UVC) states in section 11–902 (a):

"It is unlawful and punishable as provided in section 11–902.2 for any person who is under the influence of intoxicating liquor to drive or be in actual physical control of any vehicle in this state."

Most states follow this language, although some have not included the "physical control" aspect, or have combined references to drugs with those relating to alcohol or intoxicating liquor.[4]

The most used and most popular sanction for drinking and driving is the revocation or suspension of the driver's license. A number of states make suspension of the driver's license a mandatory penalty for driving while intoxicated.[5] The fear of loss of the driving privilege may have an important deterrent effect on the social drinker. However, it does not affect the alcoholic or problem drinker who continues to drive despite the loss of license. A recent California study indicated that two-thirds of all drivers with revoked permits were arrested (some as many as ten times or more) during periods when their driving privileges were revoked.[6] In addition, most states fail almost entirely to take any practical steps to enforce license revocation.

NEW STUDIES

Judicial re-examination of the criminality of the offense of public drunkenness in the light of new studies regarding the existing penal structure has begun. The United States Supreme Court recently stated in *Powell* v. *Texas*[7] that although the eighth amendment's prohibition of "cruel and unusual

---

Footnotes at end of article.

punishment" does not bar processing chronic alcoholics who are drunk in public through criminal courts, the criminal structure is not a particularly effective means of dealing with what is largely a "health problem."

The recent federal cases of *Easter* v. *District of Columbia* and *Driver* v. *Hinnant*,[8] which held that alcoholics cannot be convicted of public drunkenness emphasized the importance of developing alternatives to punishment for dealing with alcohol-related offenses. The President's Commission on Law Enforcement and Administration of Justice recommended that drunkenness in itself should not be a crime, that civil detoxification procedures should be developed, and that comprehensive treatment programs, including "after care" facilities to bridge the gap between the detoxification center and the assimilation into society, should be established.[9]

The President's Commission on Law Enforcement and Administration of Justice [10] studied drunkenness offenses and concluded that the public drunk should no longer be treated as a criminal unless he is disorderly or engages in other criminal conduct such as driving while intoxicated. The drinker who only appears in public in a drunken state should not be treated as a criminal but should be detoxified in a community detoxification center. Similarly, when an alcoholic commits a separate criminal act while intoxicated, not only should the commission of the act be punished but an effort should be made to rehabilitate the offender. If, however, he is unwilling to be rehabilitated, then he should be prevented from committing the prohibited act again.[11]

Since drinking and driving offenses are generally punished as crimes, the usual procedural safeguards apply, including the right to jury trial.[12] However, prosecutors are reluctant to bring even strong cases to trial because they crowd even more the already crowded dockets. Furthermore, juries are frequently sympathetic to the defendant.[13] There are other roadblocks to successful prosecution of arrest for driving under the influence with the result that a plea is usually bargained and the defendant pleads guilty to a minor traffic offense (not involving alcohol) and is placed on probation, retaining his right to drive.[14]

REHABILITATION PROSPECTS

The prospects for rehabilitating the alcoholic driver (who is rarely a skid-row drunk with no family or community ties) are good. The San Francisco Committee on Crime reported:

> The Bureau (San Francisco Bureau of Alcoholism) knows that the vast majority of alcoholics in the city are not on skid-row. The National Council on Alcoholism has estimated that, for every skid-row alcoholic there are 15 to 20 working alcoholics doing jobs as house painters, teamsters, secretaries, bankers and attorneys. The Bureau knows too that alcoholic rehabilitation stands a good chance with patients who have enough ties to family, church or work to want to make it back. . . . One Bureau doctor pointed out that, in all his professional practice, he had never encountered a case in which a skid-row alcoholic was arrested for drunken driving. "By far the most dangerous alcoholics are those who drive," he said, "yet criminal justice does no more to solve their problem than it does to solve the problem of the guy on the skids." [15]

To date, several programs for rehabilitation of the drunken driver have been tried. Although results are incomplete, reports from a program in Nassau County, New York, indicate that rehabilitation has been achieved by a substantial number of alcoholics through small discussion groups with the goal of helping the individual recognize and admit his uncontrollable appetite for alcohol. The objective is to lead him to a realization that he needs medical assistance voluntarily.[16] A rehabilitation program for convicted drunken drivers has been developed at Phoenix, Arizona, by the Phoenix Municipal Court and the Phoenix Alcohol Research and Re-education Project. For more than four years, every resident convicted in Phoenix has had to spend four consecutive Wednesday evenings (ten hours) in an Arizona State University extension course or lose his license to drive. The student is given information about the effects of drinking and driving, and is encouraged to assess his own behavior. Fewer than 10 of the 2,000 individuals who have completed the course have been re-arrested in Phoenix on a charge of driving while intoxicated. However, the primary focus in this program is not only on the problem drinker but on a combination of punishment and education to expose the participants to the dangers of even moderate drinking and driving.[17]

A recent report of the Highway Safety Research Institute reviewed ten published accounts of court-related alcoholic treatment programs in the United States over the past 20 years. The programs were reviewed for their success as based on the following criteria: reduction in the number of arrests, number in treatment for full length of program, improvement in drinking pattern, family and social adjustment, occupational adjustment, and physical status. The report states that the review "consistently indicated that court-related treatment could be successful for at least one-half of the clients seen." [18]

SOCIAL VERSUS PROBLEM DRINKERS

Any program for enforcing "driving while intoxicated" laws should recognize that the social drinker must be treated differently than the problem drinker. Methods should be devised so that a judge has the flexibility to emphasize punishment and education for the former and rehabilitation and education for the latter. The program should also give a judge criteria for identifying those defendants who are alcoholics or problem drinkers a background investigation and interview should be conducted. Alcoholism is not easily recognized in its early stages. This is further complicated by the tendency of most alcoholics to deny that they have a problem. For this reason, conviction for driving while intoxicated could benefit the defendant by introducing him to medical facilities for treatment which he might otherwise have avoided, because he did not recognize his condition, was reluctant to seek treatment, or was not aware that treatment was available.

When making determinations of disposition it is not necessary for the court to become involved in the causes of the particular traffic offender's alcohol abuse or to wrestle with distinguishing between an irresponsible social drinker and an alcohol addict. The traffic court may define the problem drinker as one who has repeatedly demonstrated a driving problem when he drinks.

Some courts have attempted to refer alcoholics and problem drinkers to community medical facilities and social service agencies such as Alcoholics Anonymous, but the Department of Transportation states that what little data is available on the results of these referrals is not encouraging. This is probably due to the informality of such casual referrals. In most cases, the alcoholic is the last to realize he has a problem and it is therefore unusual for him to ask for help unless he has been coreced in one way or another into seeking help for his problem.[19]

CONSTRUCTIVE COERCION

Constructive coercion has been successful in alcoholic rehabilitation programs in industry, penal and correctional institutions, and in courts and hospitals. Thus, it should be susceptible to successful integration into a probation scheme.[20] Usually these rehabilitation programs are a combination of group therapy and individual counseling which work toward a reintegration of the individual into the community.

The use of authority as a means of motivation can be a valuable tool in making an otherwise reluctant individual seek the assistance he needs. Before applying the concept of judicial coercion however, the court should be assured that effective treatment techniques are available in its jurisdiction, and that adequate funds have been secured to implement them.

The use of constructive coercion to achieve rehabilitation is not a new technique. In fact, it would seem that examination and therapy programs such as the Phoenix experience can be put into effect without statutory authorization, as long as the defendant has the choice of the prescribed punishment or the rehabilitation alternative, and as long as the objectives of the alternative are legitimate (rehabilitation, correction and education).

The problem has been summarized in this statement:

> . . . Since a major portion of drunken driving is to be found in the small alcoholic population rather than in the general population of social drinkers, serious consideration must be given to quick recognition of the person with a drinking problem and his removal from the road. It has already been suggested that a prior history of non-traffic alcohol-related arrests is indicative of problem drinking. Certainly, drunken driving between the hours of 6:00 a.m. and noon is a strong indication of alcoholism.
>
> Removing such a person from the road is difficult. Merely revoking the license is not, apparently, sufficient. Alcoholics are more likely to have citations for driving with a revoked or suspended license than drivers with other medical conditions despite a probable equal frequency of license revocations and suspensions. The answer, while by no means simple, appears to lie in the early identification of alcoholism as a disease and prompt referral to treatment, in addition to revocation of license or other legal measures.[21]

A program combining strict enforcement of punitive measures with educational and rehabilitation programs should give the court the flexibility it needs to select the most effective means of processing convicted drunken drivers through the criminal system. This is consistent with what seems to be one of the objectives of the present reform of the penal system: to provide more realistic opportunities for rehabilitation. Hopefully, the above recommendations will encourage courts to work with community agencies in designing a corrective, educational and rehabilitative scheme which is designed to meet the needs of the individual defendant, and is also consistent with the community interest in discouraging future offenses.

FOOTNOTES

[1] Authorities vary as to the definition of "alcoholic" or "alcoholism". The Cooperative Commission on the Study of Alcoholism speaks of "problem drinking," which includes alcoholism. "Problem drinking" is defined as a "repetitive use of beverage alcohol causing physical, psychological and social harm to the drinker or to others." This definition stresses an interference with functioning rather than any specific drinking behavior. The amount or frequency of drinking is not a primary criterion. "Alcoholism" is defined as a "condition in which an individual has lost control over his alcohol intake in the sense that he is consistently unable to refrain from drinking or to stop drinking before getting intoxicated." Plaut, *Alcohol Problems—A Report to the Nation by the Cooperative Commission on the Study of Alcoholism* at 37–

39 (1967) (hereinafter cited as *Alcohol Problems*).

The Uniform Alcoholism and Intoxication Treatment Act adopted in 1971 defines alcoholism in these alternative ways: "a person who habitually lacks self control as to the use of alcoholic beverages, or uses alcoholic beverages to the extent that his health is substantially impaired or endangered or his social or economic function is substantially disrupted . . ."

[2] *Alcohol Abuse and Alcoholism in New York State: Programs, Problems and Promise* (Citizens' Committee on the Problems of Alcohol, State of New York, 1971).

[3] U.V.C. § 11.902.2.

[4] The Canadian Criminal Code refers to "driving while ability impaired by alcohol," in addition to "driving while under the influence." (Can. Crim. Code, § 285, subd. 4(a).) New Jersey, New York and Virginia have adopted this concept and made "driving while impaired" a lesser degree of the violation while under the influence of alcohol (N.J. Stat. Ann., § 39:4–50(b); N.Y. Vehicle and Traffic Law, § 1192(1); Code of Va. § 18.1–56.1).

[5] De-licensing action is mandatory upon first conviction for drunken driving in 45 states and the District of Columbia. It is discretionary in only five states (Hawaii, Nevada, Arizona, Colorado and Georgia). However, only 18 states require the licensing action for one year as in the U.V.C. (§ 6–208). *See Suspension and Revocation of Drivers' Licenses* (Highway Users Federation for Safety and Mobility, 1776 Massachusetts Avenue, NW, Washington, D.C., 1970).

[6] U.S. Department of Transportation, *Alcohol Safety Countermeasures Program* at 207 (June 8, 1970).

[7] *Powell v. Texas*, 392 U.S. 514 (1968) rehearing denied 393 U.S. 989. In *Powell*, the court held in a 5–4 decision that conviction for public drunkenness of an alcoholic did not amount to cruel and unusual punishment, where there was a question as to whether the defendant was "compelled' to drink, and where the defendant was prosecuted because of his public behavior which could present substantial health and safety hazards to the defendant and the general public, and not because of his "status" or "condition." If the reasoning of the dissent in *Powell* had been followed, the constitutionality of drunken driving laws when applied to alcoholics, who have an irresistible compulsion to drink, may be in issue. *But note* Justice Fortas' dissent, 393 U.S. at 559, note 2.

[8] *Easter v. District of Columbia*, 361 F. 2d 50 (CA—D.C. 1966); *Driver v. Hinnant*, 356 F. 2d 761 (CA–4 1966).

[9] President's Commission on Law Enforcement and the Administration of Justice, *Task Force Report: Drunkenness* at 4 (1967).

[10] *Id.* 4–6.

[11] Still, suspension or revocation of the license is unsatisfactory as it is not successful in preventing the alcoholic from driving. "Our studies have shown that the traditional fine and suspension or revocation do not work for problem drivers; they'll continue to drive with or without a license. Perhaps a rehabilitative approach will be meaningful to some defendants. Perhaps harsher, more stringent penalties, long-term revocation, would be the most effective method with others. It may be that with a small percentage of these drunk drivers, only permanent revocation of a license, with strict enforcement and supervision, will keep them off the highways." Wagner, "Problem Drinking v. Public Safety," *Trial Magazine*, at 30 (May–June 1971).

[12] The scope of the constitutional right to jury trial was recently redefined by the U.S. Supreme Court in *Duncan v. Louisiana*, 391 U.S. 145 (1968). The court held that "the right to a jury trial in serious criminal cases is a fundamental right and hence must be recognized by the states as part of their obligation to extend due process of law to all persons within their jurisdiction." 391 U.S. at 154. Petty offenses, however, were excluded from the jury trial requirement. The primary indication of what constitutes a "serious" offense is the severity of the penalty authorized by statute. *See Bloom v. Illinois*, 391 U.S. 194 (1968) (jury trial required where defendant is charged with criminal contempt, the state law does not set a maximum punishment, and defendant was sentenced to 24 months' imprisonment; here whether the crime is "serious" is determined by the penalty actually imposed).

[13] In addition to a fine or imprisonment (juries generally do not consider the possibilities of probation), a conviction for driving under the influence or while intoxicated or while ability is impaired is ordinarily followed by some action against the defendant's license, with considerable variation in the results. In some states, license action is permissive, and it is possible that no license action at all will follow; in others there may be either a revocation or suspension of up to two years. In the case of a minor, suspension may be for the period of minority, N.J. Stat. Ann., sec. 39:4–50(a); N.Y. Vehicle and Traffic Law, sec. 510(6). Where a license is suspended, there is generally automatic restoration of license privileges at the end of the suspension period. When the license is revoked, the licensee is required to "start over" and qualify for a new license. Where there is a mandatory fine or jail sentence, the sentence may be suspended or the licensee placed on probation. Unless a mandatory jail sentence is accompanied by a provision prohibiting its suspension, such a requirement may in practice be nullified by routine sentence suspension. Limiting the court in such a way is often criticized, however, as a legislative infringement upon the prerogatives of the judiciary.

Department of Transportation, *1968 Alcohol and Highway Safety Report*, at 102–103 (hereinafter cited as *DOT—1968 Report*). This report resulted from the National Highway Safety Act of 1966 which required the Secretary of Transportation to submit to Congress a report on the extent of alcohol involved in highway accidents.

[19] Soden, "Constructive Coercion and Group Counselling in the Rehabilitation of Alcoholics," 30 *Fed. Prob.* 56, 57 (1966). Mr. Soden states: "The doctor has intimated that death would be inevitable; the psychiatrist has implied that insanity will result; the clergyman has said that the end will be disastrous; the wife has threatened to leave or has already left; the boss has either fired him or has threatened to do so; the community has branded him a drunk. Or he has become so disgusted with himself that he has lost his self-respect. As a final desperate measure, he seeks help. Often there is no sincere or realistic desire to find help or to be helped. He seeks help only to relieve the pressures which are bearing down on him on him and to 'take the heat off'." Mr. Soden also states that 'constructive coercion can hardly be challenged if it will bring about a change in thinking that will result in the person's doing something about his problem. Considering the harm caused by alcoholism to the person himself, to his family, and to society in general, it is difficult to understand why there would be opposition to the use of constructive coercion in the field of corrections when in reality, circumstances resulting from uncontrolled drinking have actually coerced the individual into seeking or at least giving 'lip service' to some kind of a solution to a critical problem." *Id.*

WHO BLASTED BEAVER DAMS ON PINYON MESA?

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. WHITEHURST. Mr. Speaker, the following article from the Grand Junction, Colo., Daily Sentinel, for Friday, August 11, was brought to my attention by Mr. Howard H. Caudle, director of the Colorado branch of International Defenders of Animals, Inc. At his request, I am inserting it into the Record for the benefit of my colleagues.

It is most unfortunate that such incidents as the one described apparently take place with little forethought.

The article follows:

WHO BLASTED BEAVER DAMS ON PINYON MESA?

(By Ken Botham, Jr.)

Strange it is in this age when man is capable of launching a missile from hundreds of feet under water near Miami and placing that same missile on the pitcher's mound at Yankee Stadium, that a beaver must justify his reason to live.

By now most outdoorsmen that frequent the Glade Park-Pinyon Mesa area are aware that some of the prettiest beaver dams in the state, unspoiled and in the grandeur that only a natural setting can allow, recently were dynamited.

The half tame beavers in the lower ponds were not caught and moved to another area, but were killed.

The 60 to 70 pound patriarch of the lower pond we called "Oscar" was either blown up, shot or trapped.

Many others were killed also, but Oscar was the greatest loss.

This dignified, greying gentleman looked forward to shoots of willow handed to him by people he thought he could trust. It had to be great sport for the man who killed old Oscar as a club would have done the job easily.

This was the only area, less than 40 minutes from Grand Junction, that a man could take his wife and children along with a camera and easily take pictures of deer, elk, bear, ducks and cats, and the beaver, without leaving his log. This was a photographer's mecca.

Oscar delighted in having his picture taken and undoubtedly looked on intently from about 5 feet as the explosive charges were being set. The heartbreak that the author felt as he saw the devastated dams is impossible to explain, and more difficult still is explaining to a 3 year-old son.

Certainly there must have been a good reason for this, so we set out to find it.

The first contact was with Louis Bertlshofer, district ranger, U.S. Forest Service.

Although Bertlshofer did not blow up the dams himself, he took credit for doing so.

After stock civil servant-pass the buck answers, Bertlshofer rationalized the following: There were two reasons why the dams were blown. (1) As the dams were located about Fruita Reservoir 3, the dams had to be the reason for an abnormally high fecal count in said reservoir. (2) Should the beaver dams in question break, this would pose a severe threat on the Fruita Reservoir dam.

Both of these reasons we would have to accept as valid, but let's look at them more carefully.

The beavers were located more than a quarter of a mile above the reservoir, which, had the stream been flowing, would have nearly purified itself. The fact remains that the stream was (and is) bone dry and has been for some time.

When Bertlshofer was asked about the hundreds of sheep on the land and about their effect on the fecal count, he denied that any sheep were in the area although at the moment the sheep were graciously redoing the entire landscape to their liking.

After several attempts to change the subject, Bertlshofer admitted there were "some" sheep in the area. No mention was made of the beaver colony that resides in Fruita Reservoir 3.

The flood hazard reasoning was better.

The beaver dams posed a threat to the Fruita dams because if the beaver dams should break, the earthen structure could wash out. However, if the dams were dynamited, this stress would not occur.

Occasionally a beaver dam on shale or bedrock will wash out, but how many beaver dams, located on a site such as this, have washed out while an entire beaver colony maintains it full time?

Bertlshofer also was asked who had the right to fence off the jeep trail going into the area.

Again he denied that such a situation existed but rather attributed such a blockage to windfall.

That should go down as the greatest coincidence of all time because the aspens had fallen precisely on top of each other, cutting themselves to the correct length and wiring themselves together.

Bertlshofer said he did not know who had blown the dams but acknowledged he was responsible.

Our next contact was with the Grand Junction office of the Colorado Game, Fish and Parks. Manager Glen Rogers was most polite, but after exhausting his stock answers had another appointment.

He did say that he knew nothing of the blasting and that the man to contact was Dwight Owens, wildlife conservation officer, as that was his area.

Again we received the stock answers, only this time with a little more spice.

Owens submitted that he had authorized the killing as the beavers were not needed in that area and that the sediment in the ponds was not to his liking. In view of this he had authorized the town of Fruita to remove both dams and beavers.

Owens said he did not know who had blown the dams.

The Town of Fruita was contacted and we were told that Danny Williams is in charge of the water, including the reservoirs on Pinyon Mesa. We also were told that this is a part-time job with Williams, that he had no office and that reaching him is impossible. Attempts to reach Williams at his home failed.

Although pure speculation it would seem that the owners of the sheep blocked the road to keep you off your land and drive the wildlife out by blowing up the dams so you would have no reason to go there.

Strange it is that the livestock people have so much control that they can take you to court for trespassing on the land that you own and pay for.

It's time for the over-taxed working man to speak out. It's time for the family man who is not familiar with the ways of politics to take a stand for what he knows is morally right.

What will become of the few remaining beaver that reside on the small amount of public land on Pinyon Mesa? Why is it that tragedies like this are allowed to occur? If the men and women who carry the load would band together by sending a letter or speaking out for what they know is right, we could weed out personal interest politics and join in the cause of keeping Grand Junction, our state, and our nation fit for our children and those to come.

WHAT ARE WE FIGHTING FOR?

HON. RONALD V. DELLUMS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. DELLUMS. Mr. Speaker, one examines the arguments of those who still support our insane adventurism in Indochina, and you will notice that positive reasons for our intervention are completely absent. Our intervention is so indefensible that the only way to defend it is to distract people's attention by self-righteously pointing to the cruelties practiced by the North Vietnamese. By calling attention to the mote in our brother's eye, we hope that no one will notice the beam in our own eye.

Yet, the recital of these cruelties is completely irrelevant. It would be easy to come up with stories from Bangladesh, from the Soviet Union, from Brazil and Indonesia that far surpass anything the North Vietnamese have done. Yet no one suggests these as a reason for armed intervention, for a bombing policy that forces American military men to spread far more devastation than the most sadistic bully. The real question we must ask is: Does our action decrease the possibility of atrocities, or, on the contrary, does the suffering and bitterness we cause increase the possibility of revenge and cruelty?

The people who are forced to rely on this sort of argument are especially fond of the streams of refugees leaving the North Vietnamese zone. This tragedy seems to make them proud, seems to them to prove that somehow the Vietnamese people are choosing us over the North Vietnamese. And yet the explicit aim of our bombing policy is to force these people out of their homes. The moral blindness of this demagogic finger-pointing is frightening.

Mr. Speaker, I would like to enclose a story from a distinguished correspondent in Vietnam that tells us what these people were fleeing from. There is nothing in this story to make Americans feel proud. I hope every Congressman who still has some concern about the moral value of our national actions will read this story and think deeply about it. The article follows:

[From the Los Angeles Times, Aug. 1, 1972]

Lived 3 Months in Bunkers: Quang Tri Refugee Had Lost Hope, Expected To Die Soon

(By Jacques Leslie)

Hue, South Vietnam.—"We had no hope at all. We thought we would die very soon."

With these words a 64-year-old farmer who had just reached safety summed up his experience in living in a bunker in North Vietnamese-held Quang Tri province almost continuously for three months.

Like 15,000 other refugees who reached reception points here in the last three weeks, the man had stayed in his bunker to avoid South Vietnamese and American air strikes and artillery fire.

American officials here estimate that in addition to the 15,000 refugees who have already reached Hue, another 35,000 to 75,000 are still living in bunkers in Quang Tri.

In addition, based on refugee accounts, officials have tabulated "at least 5,000" civilian deaths caused by South Vietnamese and American air strikes and artillery fire. Since many hamlets and villages in Quang Tri are still unrepresented among the refugees, the final figure will undoubtedly be much higher.

The refugees had an opportunity to flee Quang Tri as South Vietnamese troops recaptured parts of the province where they were living. Since reaching Hue they have told stories of suffering and tenacious survival.

These accounts have come to light in interviews with hundreds of refugees.

Among the accounts are these:

Families frequently divided up into two bunkers so that even if one bunker was destroyed, some family members would survive.

Because of continual air strikes and shelling, many refugees did not dare to go outside even to bury the bodies around them. One refugee said he saw dogs eating civilian corpses.

An American official said refugees from one hamlet told him their bunkers were half-filled with water on the two occasions of heavy rain during the three months. They took advantage of the flooding in the bunkers to run to a nearby stream, find pregnant fish, replace the fish in the bunkers, get back in themselves, and then gradually eat the fish offspring.

A 65-year-old man fled from Quang Tri while carrying his 72-year-old invalid wife on his back for 12 miles.

Naval shelling in one area was so regular that people devised accurate schedules of when the firing would take place, and walked outside during the intervals.

CAPTURE OF CITY

When Quang Tri city fell to the North Vietnamese May 1, tens of thousands of people were trapped. Many refugees say they tried to flee south at that time, but North Vietnamese Army soldiers (NVA) stopped them and told them to go back or else artillery fire from both sides was too intense to escape.

In some villages air strikes and naval shelling began immediately after the NVA takeover, while in others it started up to two weeks later. Within two weeks, Quang Tri became a province virtually underground.

When people emerged from their bunkers during the last three weeks, they saw destruction. "Everywhere, everywhere," as one refugee put it. Said Gene Niewoehner, the American war victims adviser in Hue, "The destruction in Quang Tri has been pretty thorough."

SOME GO TO NORTH

Refugee accounts of treatment by North Vietnamese soldiers vary.

North Vietnamese soldiers drafted many young men as laborers, requiring them to carry ammunition, dig bunkers, move supplies and evacuate wounded. In addition, many people were encouraged or forced to go to North Vietnam.

Refugees who have just arrived in Hue said that during the last few days North Vietnamese threatened to kill people who did not go north, but none said he knew of any instance in which the threat was carried out.

Where there was time, NVA soldiers set up political indoctrination sessions for the civilians. In many cases attendance was voluntary. The session ended when shelling and bombing became too heavy.

LITTLE HOSTILITY

At the same time, little hostility was expressed toward the NVA. "They were the same as us—living in bunkers," said one man. In some villages, NVA soldiers apparently left civilians alone. In another they showed civilians how to dig bunkers or suggested the civilians put them in rice fields because hamlets would be more likely to be bombed or shelled.

In early May NVA soldiers in many villages told civilians that Quang Tri and Thua Thien, the province of which Hue is the capital, had already been captured, and that Da Nang, 60 miles south of Hue, would soon be taken.

But some civilians had radios and listened to news broadcasts contradicting the NVA claim. According to one account, NVA soldiers offered to buy the radios. People who made the deal threw away their North Vietnamese money when they came south for fear they would be accused of cooperating with the NVA.

Most civilians lacked materials to give their bunkers solid overhead cover. They used bamboo poles, wood, mud and tin sheets if available. A typical bunker was 5 feet deep, 10 feet long and 6 feet wide, and housed several people. In a few hamlets bunkers were connected by tunnel systems.

DIDN'T TALK IN BUNKER

"The bunker was very unpleasant and very hot," said one refugee. "We didn't talk, we didn't do anything while we were in them. We just lay down and fear dying."

A woman refugee said, "We just sat there quietly. I just held my little girl, She cried almost every day. I prayed to Buddha and my ancestors."

The woman said that when she reached the refugee center she was so dirty she was afraid her relatives would not recognize her.

B-52 strikes were most feared. One villager described how children near a B-52 strike were killed by the shock waves when blood gushed out of their ears. Those who survived were temporarily hard of hearing or acted crazy, he said.

"Unlike the artillery and tactical air, the B-52 strikes were not controlled by people in the field such as marine and airborne advisers." Niewoehner said. "The advisers have been good on shutting off tactical air strikes in areas where we think there are still civilians; but they don't control the B-52's.

"The B-52 targets are selected in advance, and it takes all kinds of higherups to shut one off once the process is begun. We told them about civilians in one area in Quang Tri two weeks ago, but it took about seven days before the B-52s stopped."

Refugees from Quang Tri are first taken to a reception center at a village north of Hue, then to camps several miles from the city. Arrivals at these camps often were emotional. Family members who separated during trips south were aften reunited there.

In some cases, the emotions were not happy. One woman arrived at a reception center to be told that one of her two brothers responsible for her support had been killed. Already wailing, she reached an intermediate point where she was informed that her other brother had also been killed.

One refugee at the reception center said, "The civilians are the people who suffer most. Only when we reached this place did we know we would survive." Almost all refugees interviewed said they wanted to return to their homes, even if only to see what is left.

FHA AND THE FAMILY FARM

HON. WILLIAM J. SCHERLE

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. SCHERLE. Mr. Speaker, the Farmers Home Administration, under the outstanding leadership of our former colleague Jim Smith, will soon have expanded responsibilities when the new Rural Development Act becomes law. As a cosponsor of the House version of this legislation, I am confident that the FHA will meet the challenge of a larger role with the same dedication that they have shown in the past.

An excellent example of the valuable assistance rendered to rural America by the Farmers Home Administration was recorded in the August 14 issue of the Clarinda, Iowa, Herald Journal. The article follows:

THE FAMILY FARM: A PLACE IN AMERICAN AGRICULTURE

A man who left a job as a mechanic to become a full-time farmer believes there's a place for the small family farm in modern American agriculture.

Bill Henry, a Missouri native, moved his family onto a 556-acre spread about a mile east of College Springs in March of this year. Living in Burlington Jct, Mo. he had been working at Maryville garage since 1964.

"I just decided I wanted to farm full-time" Henry said, adding that he had farmed part-time in Missouri for two years. "There were several reasons for the change; one of them was I just wanted to get away from the public and have a little privacy. And of course, like most farmers, I wanted to be my own boss."

Learning of the availability of a farm in Page County, Henry entered into a lease agreement with M M Dockendorf of Pella, and then applied for a loan from the Farmers Home Administration in Shenandoah in October of 1971.

The operating loan, approved Jan. 7, 1972, was a seven-year arrangement to help pay the costs of machinery, livestock feed and seed purchases.

Outlining his operations, Henry said the land on the farm was more conducive to marketing livestock than to growing grain for sale and that about 200 acres would be used for pasture. Stock cows and hogs, he said, will be the primary items.

He currently has 70 head of cows and about 40 sows, of which he owns half interest with the landlord. He said his plans are to eventually market from 400 to 500 hogs yearly plus as many feeder calves as he can manage.

"The way the land is on the farm I don't think a person could make it on selling grain alone," Henry said. "He would have to use a combined livestock-grain operation, which I hope, will work for us."

Henry is handling the farm on a livestock-share arrangement under which the landlord meets half the expense of the feed, seed, fertilizer and other products while the tenant supplies the labor and the machinery. Profits are also divided between the two parties.

"As a temporary set-up, this is satisfactory," Henry said. "Our goal, of course, is to some day own our own farm, but to get started the lease agreement seemed the most practical way."

Henry's spread is classified by the Agriculture Department as a family farm because it employs no outside help for the day-to-day operations.

"This is it for us," he said, pointing to his wife Dora Jean and their two children, Rhonda, 11, and Roger, 9. "We'll either make it or won't make it on our own."

"I believe the family farm does have a future in agriculture today, but certain factors will have to be in your favor."

One of the factors Henry feels is vital is the size of the farm.

"The farm would have to be at least the size of this one before it could pay on its own. On anything smaller there just isn't enough margin of return to make it," he said, pointing to the fact that many persons on farms of 200 acres or less are forced to supplement their incomes by taking non-agricultural jobs at various times or by offering other services from their operations, such as milking, custom baling or stock inseminating.

"There is a certain minimum limit under which one can operate profitably," Henry said, "and for these farmers a real crisis exists. Fortunately, a family farm can be big enough to show a profit and yet not too big to be operated by a single family. And this is where its future is. If the set-up is satisfactory—market prices have a lot to do with this—then I think the family farm can survive."

He added that government support is "looking up every year. They seem to be taking more interest in us and are wanting to help us maintain and keep our farms." Help from the government, he said, must be paired with responsible action on the part of individual farmers.

"They can help us along, but we have the main responsibility for making the operation work."

Since he is a family farmer, Henry is naturally opposed to the proposal to consolidate small farms into large agricultural corporations on the grounds that they would be more efficient and productive.

"Sure their gross profits would be more, but costs are going up all around, too, so I doubt if their profit margins would be high enough to justify eliminating the small farmer from the agricultural scene," he said.

He added that he agreed with those who say higher yields are the key to higher income for the farmer, but said on a cost basis the family farm could produce a large enough yield to survive.

Henry said he wasn't opposed to large-scale operations on their own, but was against building up one phase of agriculture at the expense of another.

"There's a place for both the large farm and the small," he said. "And if the small farm can make it there's no reason to have it absorbed by a corporation."

Other than earlier this spring when weather was unfavorable, Henry said he hadn't encountered any major unexpected problems in moving onto the land.

"We knew it would be a lot of hard work, and it has been," he said. He is currently completing a soil bank, putting up hay, building fences and preparing to farrow sows.

"When we are able to buy our own place we'll probably stay in this area," he said. "It's a pretty good location, especially for marketing livestock."

Gary Beggs, FHA representative, said the operating loan was designed to help farmers get started and enable them to switch over to bank or production credit mortgages later on.

"Usually the farmer doesn't carry the loan much over five years," he said.

Beggs added that applications are being accepted and processed at the FHA office for fiscal 1973, and that sufficient funds are expected to be available to qualifying county farmers.

"We hope that these loans can help the family farmer stay in existence," he said, "because we feel there is definitely a place for these operations. After all, the small farm formed the basis for much of what agriculture is today."

He said several younger men had indicated plans to go into farming, although not as many this year as in 1971.

McGOVERN TAKES A TWISTING ROAD

HON. DAVID W. DENNIS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. DENNIS. Mr. Speaker, I commend to the attention of my colleagues, and of the public, the following perceptive column by William S. White, on the subject of Senator McGovern, taken from the Washington Post for August 18, 1972.

McGovern Takes a Twisting Road

(By William S. White)

Of the McGovern campaign a question of the most somber concern to reasonable people must now be asked. If this is the tone of it in August, at the very beginning of the contest, what will it be like when the climax is reached in October?

The Democratic candidate, all the while weeping at the "unfairness" of the Republicans, is setting a series of ugly precedents of which he himself would be deeply ashamed, and his whole leadership deeply wounded, should he in fact reach the presidency of the United States.

George McGovern is the first presidential aspirant in history to accept without disavowal or real demurrer the public support of an enemy power—in this case Communist North Vietnam—simultaneously engaged in killing the soldiers of the United States and its allies in a shooting war.

George McGovern is the first presidential aspirant in history to tolerate a backer, former Attorney General Ramsey Clark, who is willing to stand in an enemy capital—in this case Hanoi—and denounce the motives of his own country. Clark goes farther, too. He brings back from Hanoi a suggestion from a member of the North Vietnamese propaganda apparatus that some American war prisoners will be freed on the day George McGovern is inaugurated. This gross interference by an enemy power in the American election is another "first," indeed.

Again, George McGovern is the first presidential aspirant in history to flub the elementary obligation to know something about his runningmate before selecting him and then privately driving that runningmate from the ticket while publicly professing a compassionate support for him of "1,000 per cent." And then McGovern permits associates to continue secretly to seek the destruction of Thomas Eagleton even after he bows his head and resigns.

The George McGovern whose people ceaselessly anoint him as uniquely the good, the kind and the "moral" guy is the George McGovern who compares President Nixon's course in Vietnam with Hitler's extermination of the Jews. And this is also the George McGovern who, when Nixon subordinates counter-attack Ramsey Clark for his infamous behavior, mournfully complains that it is the President who is "taking the low road."

Many had hoped that the addition of Sargent Shriver to the McGovern slate might add some touch of civility. Shriver unhappily has proved instead to be only an apt pupil of his chief. Having gladly served for a year and a half as President Nixon's ambassador to Paris, Shriver now discovers nearly four years later that Hanoi was positively aching for a peace denied by the President in early 1969. Vice Presidental nominee Shriver is unable, however, to offer so much as a piece of paper to support to this discovery or any evidence that Ambassador Shriver ever once pointed out this glittering opportunity to the Nixon administration.

Now, nobody should suppose that the Republicans for their part are in this game to play pat-a-cake or that they are dealing or will deal with McGovern and Shriver in all loving kindness. All the same, when it comes to who is "taking the low road" it is only simple fairness to say that by contrast the Republican campaign is almost benign. The fact is that while the "Old Politics" of the GOP is plently tough and rough, the "New Politics" of George McGovern is simply incredible.

One of its techniques is to attack with limitless savagery—and then to moan aloud when the victim responds with one-tenth the venom that had been flung first at him. Another technique is to practice smear politics and to shout out tirelessly that the other fellow is practicing—what? Why, smear politics.

Indeed, the whole nature of the McGovern campaign recalls the wry observation of Marshal Foch of France in the first World War. The German, he said, would first try to beat you with his sword—and then with his tears.

DEFOLIANT STUDY REPORTED

HON. LES ASPIN

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. ASPIN. Mr. Speaker, recent news articles have reported an Army study of herbicides in future conventional conflicts using simulation theory techniques. These reports are based on an article that appeared in Science and Government Report, August 18, 1972.

Everyone understands the need for contingency planning by the Army but if the allegations reported in Science and Government are correct, the study sounds like a flight of fancy right out Dr. Strangelove; a real nightmare of computer lunacy. Use of herbicides in the NATO areas— Liege and Mainz and Bonn and Kassel—is highly questionable on military grounds, potentially politically destabilizing to continued unity of NATO partnership and reprehensible on moral grounds as well.

Congress deserves an explanation from the Pentagon and Secretary of Defense Melvin Laird as soon as possible with regard to the use of chemical defoliants in Western Europe and elsewhere.

The article from Science and Government follows:

Defoliation: Secret Army Study Urges Use in Future Wars

The U.S. Army Corps of Engineers has secretly proposed rewriting the Army's basic battle "scenarios" to allow for the use of herbicides in Western Europe to destroy foliage that might shield advancing Warsaw Pact forces, SGR has learned exclusively.

The Corps' proposal comes at a time when the Senate Foreign Relations Committee has refused to act on the Nixon administration's request for ratification of the 1925 Geneva Protocol, banning first use of chemical weapons, because the administration insists that herbicides are not within the meaning of the Protocol.

Classified secret, the Engineers' proposed revision of the scenarios also includes the use of herbicides in "a conflict in which U.S. forces invade Cuba, defeat the Cuban armed forces and occupy the country pending establishment of a civil government acceptable to the U.S." Scenarios involving the use of herbicides are also given for counterinsurgency operations in Venezuela and Ethiopia, and in conventional warfare in Korea.

The original scenarios, contained in a secret Portfolio of General Purpose Force Requirements, code named SPECTRUM, are in the category of contingency planning, which means they may or may not be invoked in actual combat situation.

Originally drawn up in 1968 to cover 1970–75 and updated last year to cover 1972–79, SPECTRUM consists of 106 scenarios for military situations around the world. What the Corps did was to modify these scenarios to allow for the inclusion of defoliation operations, on the grounds that removal of foliage would substantially reduce U.S. manpower requirements.

The SPECTRUM scenarios are extensively referred to in a three-volume report, "Herbicides and Military Operations"—one classified secret, the others for official use only—that the U.S. Army Corps of Engineers prepared in response to the furor over herbicide use in Vietnam. The three-volume report, completed earlier this year following comprehensive study by the Corps' Engineer Strategic Studies Group, reviews the Vietnam experience, cites the roles that herbicides can play in the SPECTRUM scenarios, and strongly defends the retention of herbicides in the Army's weapons inventory.

Though the Corps' own interviews with hundreds of officers who served in combat in Vietnam produce a mixed picture on the military value of herbicides, the Corps strongly argues in behalf of herbicides on the grounds of military utility.

Thus, in refering to the SPECTRUM scenarios for Ethiopia and Venezuela, the secret study states that "in both of the insurgency scenarios, counterinsurgency force requirements are reduced because factor W (average search width of a patrol) is increased when herbicides are used." The study goes on to state that "offensive forces in Venezuela are reduced to approximately 40 percent of the forces required in the original SPECTRUM analysis and offensive forces in Ethiopia are reduced to approximately 35 percent of those needed without herbicides."

Herbicide use, it continues, "would improve visibility in the evergreen forest, shrub and small tree forests (of Korea), and in the sugar cane fields of Cuba."

The study states that "SPECTRUM Situation D" envisions "a deliberate attack by Warsaw Pact forces to seize Western Europe. France is assumed to participate and the NATO forces are logistically supported" over a line extending through France and the Benelux countries. "This analysis," it states, "investigates the maneuver of forces between Liege and Mainz and Bonn and Kassel," continuing:

"Because the effect of herbicides is to expose the enemy positions while the defender remains concealed in foliage, herbicides have the effect of creating a prepared position . . . (T)he use of herbicides permits NATO forces to prepare successive defensive positions by selecting defoliating areas where the attacking forces must assemble."

Since days or weeks are required for defoliants to take full effect, the use of herbicides in Western Europe is presumably predicted on intelligence warnings preceding an actual attack.

While the three volumes are unstinting in their endorsement of herbicides, synopses of earlier secret studies of defoliation efforts in Vietnam indicate serious reservations on the part of analysts and combat officers who have closely observed defoliation operations. Noting that President Kennedy gave approval for herbicide use against presumed Vietcong croplands "after additional assurance that enemy crops could be distinguished from friendly crops," the Corps of Engineers report notes that a secret 1967 Rand Corporation study concluded that "it appears that the crop destruction program has little effect on VC consumption. Despite the shortcomings of the data and the methodology used, the (Rand) analysis indicated the program is ineffective and that the negative effect on the peasant is too severe to continue the program."

It also reports that a secret study conducted by the Air Force in 1969 found, "There is no system for comprehensive evaluation of each project on the basis of the result it was supposed to achieve." That same study, the Corps reports, also concluded that "the public information program about herbicide operations was never adequate to overcome the resentment associated with the herbicide program."

The Corps' report also takes note of a "computer analysis (of defoliation operations) based on 12,526 sorties on 119 targets in 35 different provinces" in Vietnam. The conclusion: "Historical records of friendly and enemy-initiated incidents and of friendly and enemy personnel killed in action provide an inconsistent picture of the advantage and disadvantage associable with herbicide spray from fixed-wing aircraft."

Questionnaires filled out by several hundred combat officers, ranking from battalion commander and up, who served throughout South Vietnam from 1965–70, produced a generally favorable response concerning the military utility of herbicides, but the favorable responses were far from overwhelming, and in most cases, a small percentage of the officers concluded that defoliation actually worked to the tactical and political advantage of opposing forces.

In response to the question, "Where defoliants were used on wooded areas of VC shelter, friendly cross-country movement was:" the responses, by number, were as follows:

Seriously impeded (5); Impeded Somewhat (33); Unaffected (57); Assisted Somewhat (139); Greatly Assisted (38).

"Where defoliants were used on wooded areas of VC shelter, friendly casualties from enemy ambush were:"

Significantly reduced (65); Slightly reduced (120); Unaffected (67); Increased slightly (2); Increased Significantly (0).

"Where defoliants were used on wooded areas of VC shelter, enemy casualties from air support were:"

Significantly Reduced (2); Slightly Reduced (4); Unaffected (51); Increased Slightly (146); Increased Significantly (39).

"Where defoliants were used on enemy infiltration routes, enemy movement was:"

Seriously Impeded (33); Impeded Somewhat (157); Unaffected (43); Assisted Somewhat (12); Greatly Assisted (2).

In overwhelming numbers the responding officers reported favorably on the utility of herbicides for "perimeter defense," which actually accounts for a tiny proportion of the 5 million acres that have been defoliated in Vietnam, but on the politically sensitive issue of defoliation of food crops, the returns were extremely mixed as to reliability in identifying crops intended for hostile forces and the military and political effects of crop destruction.

In response to the question: "Where herbicides were used on food crops, the distinction between crops grown for use by the enemy and crops grown by noncombatants who were not supporting the enemy was:"

Completely Reliable (21); Usually Reliable (53); Fairly Reliable (63); Not Usually Reliable (5); Unreliable (3); Of Unknown Reliability (14).

THE McGOVERN VIETNAM OFFENSIVE

HON. LARRY WINN, JR.

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. WINN. Mr. Speaker, I have followed the recent controversy over alleged peace overtures made by North Vietnam in 1969 with some concern. It has been brought up now, 3 years later, that the administration ignored this supposedly unequivocal "signal" that the North Vietnamese were ready to end the war. These charges are displayed against a background of former Attorney General Ramsey Clark's melodramatic and rather hastily considered remarks about his trip to North Vietnam. To add to the confusion, we also have the not-too-consistent remarks of Senator McGovern and Mr. Pierre Salinger concerning the latter's "peace mission" to Paris.

I feel the following article from the Wall Street Journal, August 18, 1972, is very helpful in putting this melange of statements and charges into perspective:

THE McGOVERN VIETNAM OFFENSIVE

Senator McGovern is obviously trying to get his stumbling campaign on some sort of track by reigniting the war issue. Far from dispelling the stumbling image, though, the efforts so far leave a feeling that when it comes to Vietnam Senator McGovern and his friends have lost the capacity to draw any distinctions whatever.

To put the Ramsey Clark episode in some context, for example, imagine that John Mitchell had toured Greece or South Africa under an itinerary arranged by the government in power there, had visited one prison and interviewed a few selected prisoners, then returned issuing statements with the thrust that prisoners are being treated humanely. He would of course be alternately flayed and laughed at, and anyone who defended him would immediately be recognized as having utterly lost all critical faculties.

Mr. Clark has just taken precisely such a tour of North Vietnam, with a few added twists. A reporter on Hanoi radio, for example, quoted him as saying "I cannot understand how Nixon could commit such hideous crimes against a village living in peace amid rice fields like this.' Back in the U.S. with a chance to disavow such quotes, Mr. Clark instead announces that if his candidate is elected President the Communists promise to release their prisoners on inauguration day. When Republicans strike back, Senator McGovern charges they are taking the "low road."

Meanwhile, Senator McGovern is refusing briefings with Henry Kissinger on the announced grounds that he can learn more by reading the newspapers. He has, however, designated Paul Warnke to receive any information "that the White House thinks would be useful." He has also dispatched Pierre Salinger to talk with the North Vietnamese in Paris.

The press had initially understood Senator McGovern to deny connection with the Salinger mission, but the Senator says there "is not the slightest discrepancy" between his initial statement and the later confirmation. The first, he explains, merely meant that he hadn't instructed Mr. Salinger to urge the North Vietnamese to settle before the election. Rather, the Senator says, "I would like to get our administration to make a peaceful settlement right now."

The centerpiece of the McGovern Vietnam offensive, though, is the charge by vice presidential nominee R. Sargent Shriver that "Nixon had peace handed to him literally in his lap. He blew it." The charge has been more-or-less backed by W. Averell Harriman and Cyrus R. Vance. It turns out that peace in Mr. Nixon's lap involved the withdrawal of certain North Vietnamese forces from South Vietnam after the collapse of the Communists' "third wave" offensive in 1968. This, say Mr. Harriman and Mr. Vance, was a "signal" that the Communists wanted to settle the war.

Now, one of the important things about the McGovern offensive is the cast of characters. Averell Harriman, Cyrus Vance, Sargent Shriver, Pierre Salinger, Paul Warnke, Ramsey Clark. Every last one of them a high official of the administrations that created the mess in Vietnam. They are second-guessing Richard Nixon and Henry Kissinger in their efforts to clean it up.

The ex-officials argue, of course, that they opposed the policies of their administrations. In fact they won some and lost some; in particular, Mr. Harriman's advice prevailed at the time of the Diem coup, a crucial juncture in our expanding commitment to the war. But even if they were in fact totally absolved of the mistakes of the Kennedy and Johnson years, their criticism of the Nixon administration should be recognized for what it is: the roasting of their domestic adversaries for failing to follow policies they could not sell to their friends when they held seats of power.

This is the context in which to understand the 1968 "peace signal." Since Hanoi did not accompany its troop movements with any diplomatic hint of compromise, the Johnson administration felt they were no great signal. Mr. Harriman and Mr. Vance interpreted them that way as part of their effort to sell their own notion of a settlement, involving some kind of a coalition government practically certain to lead to Communist control. In that sense they are right, the United States could have settled in 1968—by agreeing to a Communist victory. This week's McGovern offensive is merely a rehash of the debate over whether that was a wise idea in 1968, or now, for it is precisely the policy the Senator and his supporters urge today.

Urge with a passion, in fact, that seems to blind their ability to make fine judgments. Judgments, for example, between nebulous signals and peace in our lap. Or between the intransigence of the Communists and the position of the Americans at Paris. Between Kissinger briefings and newspaper accounts. Between the North Vietnamese prisoner-of-war policies and their showcase tours.

Most of all, finally, between an immoral aggressive war which would be justly ended by Communist victory and American atonement, and a mistakenly ambitious defensive war which the Americans must find a way to end without too grievously undermining their position in the rest of the world.

CIPS ACTS TO IMPROVE ENVIRONMENT

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. FINDLEY. Mr. Speaker, everyone is talking about pollution and the environment today. Central Illinois Public Service Co., an electric utility company in downstate Illinois, is doing something about it.

A test project using coal residue from the Coffeen Power Station has just begun, and it offers a promising solution to a mounting waste disposal problem for all electric utilities.

Litchfield Bituminous Corp. of Hillsboro presently is in the process of removing 125,000 to 150,000 tons of boiler slag from the storage pile at Coffeen Station. The slag is being used as a base material in construction of two overpasses on Interstate Highway 55 near Litchfield.

If the material proves suitable in the overpass construction, as thorough testing has indicated it will, other similar uses can be expected to develop and create a sizable market for the product.

Boiler slag, fly ash and bottom ash are natural by-products whenever coal is burned for industrial application. Since electric utilities burn more coal than any other industry in the United States, they produce the most ash and slag. How to dispose of this material is becoming a serious problem for most utilities.

The extent of the coal ash disposal problem facing CIPS is emphasized by the fact that even 150,000 tons represents only about a fourth of the residue pile at Coffeen Station. According to company calculations, the storage area contained approximately 560,000 tons of slag as of May 31.

The original storage area at Coffeen Station rapidly is filling up, with only about 2 years of use left. Another storage area, more than twice as large as the first, has been constructed and will be used for the station's new 600,000-kilowatt second generating unit.

In addition to Coffeen's situation, storage areas at the utility's other three Illinois power stations also contain hundreds of thousands of tons of ash. These stations are located at Hutsonville in Crawford County, Grand Tower in Jackson County, and Meredosia in Morgan County.

In time, continued operation of coal-fired power stations will require use of more and more land area for ash storage, unless practical uses for the material are developed to solve the problem. That is why the present project at Coffeen Station is encouraging.

Litchfield Bituminous began hauling slag from the station in mid-May and had removed 72,864 tons through June 30 for an average of 2,082 tons per day. The company is using up to 24 tandem and dump trucks on a shuttle operation between the power station and construction site.

The slag is being deposited in four large excavations located approximately 300 yards west of route 66 and 2 miles north of Litchfield, where Interstate 55 will bridge the tracks of the Chicago, Burlington & Quincy Railroad. The original soil at the site of the twin overpasses was considered too unstable to provide a solid base for the construction.

Coal residue from Coffeen Station was approved as a substitute base material after meeting all gradation specifications in tests conducted by both Litchfield Bituminous and the Illinois Department of Highways.

Central Illinois Public Service Co. is to be commended for its initiative in cleaning up the environment. Hopefully, this experiment will prove to be an outstanding success and point the way for other electric utilities across the Nation to follow.

"AMERICA THE BEAUTIFUL" YEAR: 1973

HON. HASTINGS KEITH

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. KEITH. Mr. Speaker, remembering the words of the ancient philosopher who said that he would rather write the songs of a nation than write its laws, I commend to the attention of Members of the Congress the following article from the Falmouth Enterprise, Falmouth, Mass. It was a Cape Cod woman, Katharine Lee Bates, the distinguished poet and educator, who wrote our Nation's most beloved song, "America the Beautiful." As we can now see, the words of that hymn express in their own way the philosophy of conservation, preservation, and enlightened planning—those needs that are becoming more urgent by the day in this country. Next year, as the article reminds us, will be the 80th anniversary of "America the Beautiful," written on Professor Bates' first trip west in 1893. The suggestion that 1973 be dedicated to a practical and creative kind of remembrance is worth our serious consideration.

The article follows:

[From the Falmouth (Mass.) Enterprise]

Request for a Proclamation—That 1973 Shall Be Known As "America the Beautiful" Year

(By Robert H. Simmons)

Next year, 1973, will be the 80th anniversary of "America the Beautiful." This moving hymn, by the poet and educator, Katharine Lee Bates—who was born on August 12, 1859, in Falmouth, Massachusetts, and who grew up in our town—was written in the summer of 1893 on the poet's first trip west.

"After visiting at Chicago the World's Fair," Miss Bates recalled in an article published April 6, 1918, "where I was naturally impressed by the symbolic beauty of the White City, I went on to Colorado Springs. Here I spent three weeks or so under the purple range of the Rockies, which looked down with surprise on a summer school [at Colorado College.] This had called to its faculty several instructors from the east. . . My own subject, which seemed incongruous enough under that new and glowing sky, was English Religious Drama. [Miss Bates was Professor of English Literature at Wellesley College, Wellesley, Massachusetts.]

"We strangers celebrated the close of the session by a merry expedition to the top of Pikes Peak, making the ascent by . . . prairie wagons. . . We were hoping for half an hour on the summit, but two of our party became so faint in the rarified air that we were bundled into the wagons again and started on our downward plunge so speedily that our sojourn on the peak remains in memory hardly more than one ecstatic gaze.

"It was then and there, as I was looking out over the sea-like expanse of fertile country spreading away so far under those ample skies, that the opening lines of the hymn floated into my mind. When we left Colorado Springs, the four stanzas were pencilled in my notebook, together with other memoranda, in verse and prose, of the trip. . . ."

One of the summer faculty at Colorado College was Professor Woodrow Wilson of Princeton. At the time Miss Bates wrote the above recollection, Wilson was President and the country was embroiled in World War I. The poet ended her article with the following note:

"That the hymn has gained, in these twenty-odd years, such a hold as it has upon our people, is clearly due to the fact that Americans are at heart idealists, with a fundamental faith in human brotherhood—that faith for which our Nation, in this crucial hour of history, stands ready to risk and suffer all."

According to custom, we should wait for its centennial year to honor this hymn that, without official fiat of any kind, has captured the hearts of Americans, year after year, for the past eight decades.

Realistically, however, we do not have time to wait. A special kind of celebration should, and must, begin next year at the latest.

"America the Beautiful" has taken its own place in American life and thought, without official assistance, because it, better than any other set of words ever written, reflects the vision, the dream, of what our country can be and should be.

The official National Anthem, "The Star-Spangled Banner," was written at a moment that nearly was the dark ending of this Nation's then brief history. It stated, and still states, the thrill of realization—after the anguish of expected defeat—that the greatest and most immediate battle had been won, that the Nation had survived and was safe to resume its chosen life, according to the vision of its rightful citizens.

"America the Beautiful" celebrates that vision itself. Today, it is both a celebration and a challenge.

Traditionally, as noted, we should wait for the 100th anniversary and then observe a ceremony of honors for "America the Beautiful." But we do not have time to wait. By 1993, the words of "America the Beautiful" may be ironic ghosts, with meanings lost in the archives of history. That is the challenge.

Instead of waiting, therefore, it is proposed that a Proclamation be drafted (by someone such as a Governor or a President) designating 1973 as "America-the-Beautiful" Year.

"America-the-Beautiful" Year would be dedicated, with or without ceremonies, to massive practical efforts toward turning back the tide of ugliness and pollution, both of the environment and of the spirit, that continues to threaten the life of this country.

These practical efforts would be carried out in the tradition of the pilgrims—from all nations—who packed up and left the unbearable conditions of their homelands to seek freedom and a better life in America. This time, however, the pilgrims would stay at home, while the homeland itself made the journey—into a better future.

"America-the-Beautiful" Year would represent a practical and re-invigorated beginning to the celebration that is to reach a climax in 1976—the Bicentennial of the signing of the Declaration of Independence and the founding of the United States of America as a Nation.

We have the dreams, in plenty, of what America should be. Our creative citizens—artists, poets, architects, writers, preachers, musicians, conservationists, philosophers, physicians, statesmen, builders, educators, landscape designers, engineers—possess both the vision and the know-how to transform America into a paradise for man and nature.

This vision of what our Nation intends to be was given expression in the hymn, "America the Beautiful." But, while the language of the hymn has become an accompaniment to most of the official functions of the Nation's recent history—inaugurations, graduations, etc.—it, like history texts, is often recited without real understanding or commitment.

In 1973, in this forthcoming symbolic year, the Nation would take a deeper look at the four stanzas of "America the Beautiful" and attempt to find there the guideposts for the year's special activities and chores.

These verses state that America is:

(1) "beautiful for spacious skies"—for unspoiled, fruitful, and abundant nature;

(2) "beautiful for pilgrim feet"—for the strong men, the forefathers, who ploughed and hammered a "thoroughfare for freedom" across the land;

(3) "beautiful for heroes proved"—for the courage of those who were willing to suffer and to die in defense of their principles and dreams;

(4) "beautiful for patriot dream"—for the vision itself, for the goal of a better life for all, for beautiful cities, created out of the wilderness to protect and nourish their citizens, physically and spiritually.

In brief, the hymn, "America the Beautiful," celebrates nature's creativity, man's physical strength and skill, man's spiritual strength and courage, and man's creativity.

We Americans, it states, were given four great gifts—the abundance of a natural wonderland, great strength of body and productive skills, profound courage of principle, and the vision to see a better life toward which to work, utilizing, with enlightenment, the first three gifts.

The hymn asks for the grace of God to illuminate this mission.

With the words of the hymn before us, as we all have sung them a thousand times over, we could, in the practical achievements of "America-the-Beautiful" Year, set straight the course toward that which we all want for the future of the United States of America.

A NEW RACKET

HON. OTIS G. PIKE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. PIKE. Mr. Speaker, it is not my custom to put commercial ads in the Record. On the other hand, when members of the U.S. Army are getting rich doing commercials, I feel that it should be called to the Members' attention. Reading the entire commercial that follows, do you get the impression that Sp4c. Stan Smith, U.S. Army, has more than one racket going for him?

The article follows:

[From Newsweek, Aug. 21, 1972]

How I Won Wimbledon

(By Stan Smith)

I've been preparing for Wimbledon for about a year. Ever since I lost to Newcombe in the finals last year. So I was determined to be 100% physically fit. I did a lot of running beforehand and a lot of stretching exercises. This has been helping my movement on the court and also kept my limbs limber. I've also been doing some yoga for the past six months—not the psychological part, but the physical part.

I've also spent months preparing myself mentally. I know that being seeded number one and being the favorite was something that added a bit of pressure. But then you realize that there's no other tournament in the world that has the tradition, charisma or atmosphere of Wimbledon.

When I walked out on the court for my first match the one thing that I thought about was how much longer the grass was. I was also a little uncertain about it, since I hadn't played on grass since Forest Hills, but then you quickly get mentally involved in the match. I think about the plan of attack or strategy that I'm going to use against that particular player, and if you think about that enough you don't really think about all the other elements involved. My biggest problem was the return of serve. Coming from the clay courts of Mexico City, during the Davis Cup Matches, my style was much different. On clay, I usually chip the return and try not to hit too aggressively. On grass, I'll try to hit a more aggressive return. I concentrated on hitting the ball as early as possible because the ball would come off the grass much faster than I was used to.

Also, I tried to stay down low to the ground, because I have a tendency to jump up as I hit the ball. I wasn't satisfied with my serve during the early matches, so by the time I got to the finals against Nastase I knew I had to try to serve well and get my first one in.

Nastase had been playing extremely well during the entire tournament so I knew I had to eliminate any unnecessary errors against him. Nastase is so fast he gets many balls that most players don't. Which gives you a tendency to overhit.

My strategy in the finals was to put a lot of pressure on his serve. He's got a good serve, but not a great serve and if I could make him get a little worried—especially after he misses his first serve—I could keep the pressure on him. I thought a turning point came in the fifth set on my serve when we were tied four games apiece. I was down Love-30 after he had just played two fantastic points. Then he hit another great shot that I reached for but didn't think I could get, and it hit right off the wood of my Autograph racket and was a perfect drop shot that gave me the point. If he had gotten the point I would have been down Love-40, but taking that point let me go on to win the game and eventually the match. All of a sudden it was over. My first emotion was it couldn't be over and then I realized it was. My feeling at that point is impossible to describe, because after a combination of 25 years and many hours of practice it was one of the happiest points that I can remember in my tennis career.

It was one of these marvelous days when everything was working beautifully—right down to my racket—which incidentally was great throughout the tournament. It's really important to be completely confident in the racket you play. But, I know from past experience with my racket that it will always play great for me.

I helped Wilson design my Stan Smith Autograph racket so I feel really good about it. It has more wood in the construction of the handle and tapers down, so there's less weight in the head of the racket. This lets you get a little more feel and a little more flexibility in the head, so that the ball will stay on the string a bit longer than with a different construction.

The Stan Smith Autograph racket.

THE REAL GEORGE McGOVERN

HON. LOUIS C. WYMAN

OF NEW HAMPSHIRE

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. WYMAN. Mr. Speaker, recently I addressed myself to a call that the real George McGovern please stand. It is important in this election year of choice, that the American people should know the real George McGovern, what he stands for, what he would do to the country, and what he has done on the record, compared with promises.

In this connection a few more McGovern "firsts" are described in a column in this morning's Washington Post by William S. White.

All in all, that record is a sorry spectacle.

The column follows:

McGovern Takes a Twisting Road

(By William S. White)

Of the McGovern campaign, a question of the most somber concern to reasonable people must now be asked. If this is the tone of it in August, at the very beginning of the contest, what will it be like when the climax is reached in October?

The Democratic candidate, all the while weeping at the "unfairness" of the Republicans, is setting a series of ugly precedents of which he himself would be deeply ashamed, and his whole leadership deeply wounded, should he in fact reach the presidency of the United States.

George McGovern is the first presidential aspirant in history to accept without disavowal or real demurrer the public support of an enemy power—in this case Communist North Vietnam—simultaneously engaged in killing the soldiers of the United States and its allies in a shooting war.

George McGovern is the first presidential aspirant in history in tolerate a backer, former Attorney General Ramsey Clark, who is willing to stand in an enemy capital—in this case Hanoi—and denounce the motives of his own country. Clark goes farther, too. He brings back from Hanoi a suggestion from a member of the North Vietnamese propaganda apparatus that some American war prisoners will be freed on the day George McGovern is inaugurated. This gross interference by an enemy power in the American election is another "first" indeed.

Again, George McGovern is the first presidential aspirant in history to flub the elementary obligation to know something about his running mate before selecting him and then privately driving that running mate from the ticket while publicly professing a compassionate support for him of "1,000 per cent." And then McGovern permits associates to continue secretly to seek the destruction of Thomas Eagleton even after he bows his head and resigns.

The George McGovern whose people ceaselessly anoint him as uniquely the good, the kind and the "moral" guy is the George McGovern who compares President Nixon's course in Vietnam with Hitler's extermination of the Jews. And this is also the George McGovern who, when Nixon subordinates counter-attack Ramsey Clark for his infamous behavior, mournfully complains that it is the President who is "taking the low road."

Many had hoped that the addition of Sargent Shriver to the McGovern slate might add some touch of civility. Shriver unhappily has proved instead to be only an apt pupil of his chief. Having gladly served for a year and a half as President Nixon's ambassador to Paris, Shriver now discovers nearly four years later that Hanoi was positively aching for a peace denied by the President in early 1969. Vice Presidential nominee Shriver is unable, however, to offer so much as a piece of paper to support to this discovery or any evidence that Ambassador Shriver ever once pointed out this glittering opportunity to the Nixon administration.

Now, nobody should suppose that the Republicans for their part are in this game to play pat-a-cake or that they are dealing or will deal with McGovern and Shriver in all loving kindness. All the same, when it comes to who is "taking the low road" it is only simple fairness to say that by contrast the Republican campaign is almost benign. The fact is that while the "Old Politics" of the GOP is plenty tough and rough, the "New Politics" of George McGovern is simply incredible.

One of its techniques is to attack with limitless savagery—and then to moan aloud when the victim responds with one-tenth the venom that had been flung first at him. Another technique is to practice smear politics and to shout out tirelessly that the other fellow is practicing—what? Why, smear politics.

Indeed, the whole nature of the McGovern campaign recalls the wry observation of Marshal Foch of France in the first World War. The German, he said, would first try to beat you with his sword—and then with his tears.

FREEDOM IS EVERYBODY'S JOB

HON. EDWARD HUTCHINSON

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. HUTCHINSON. Mr. Speaker, I recently received a communication from one of my constituents, Sp5c. Steve Larkin, of St. Joseph, Mich., presently stationed with the association of the U.S. Army in Europe. Mr. Larkin has sent me a copy of an address recently delivered by former Chief of Staff, Gen. Harold K. Johnson, USA, retired, and, because it is a thoughtful message—one which should be heard by all Americans, I am quoting portions of it herewith:

GEN. JOHN J. PERSHING MEMORIAL DINNER ADDRESS

(By Gen. Harold K. Johnson, retired, Garmisch, Germany, June 3, 1972)

I have debated a long time about what I might talk to you about tonight and I think that I finally came around to something that might be titled "Is It Worth It" which I drew from a lieutenant colonel about one and a half years ago at one of the War Colleges. He came up to me before I spoke to this class and said, "Sir, have I been marching to the beat of the wrong drum all these years?" Wherever I go, not only in the Army, but elsewhere, this question tends to recur.

Is what we are doing important? Is there a future in this day for a military force? Should I be doing something else? Well, for each person I think there is a different answer because each must satisfy himself. But, I think that there is a better answer for all of us and I am going to talk about that tonight. Kipling said, "God and the soldier all people adore, in time of war but not before." Somewhere in the early 1600's an English poet said, "Our God and soldier alike adore, when at the brink of ruin but not before. After deliverance, both our God forgotten and our soldier slighted."

These have been difficult years because much of the public attitude has gone beyond slight, and to a certain extent drifted into an area that one might call contempt. When one serves under conditions like that it's kind of difficult to keep your cool so you have to go back and establish a perspective for yourself and a perspective for the people with whom you associate.

I do it by going back into a little book by Will and Ariel Durant called "The Lessons of History" which says that "War is one of the constants of history and has not diminished with civilization or democracy. In the last 3,421 years of recorded history only 268 have seen no war."

Peace is an unstable equilibrium which can be preserved only by acknowledged supremacy or equal power. I would expect you would find some historians who would debate the equal power because there are times in the world when force of aggression recognized basically only raw, naked superior power. The point I think we all need to remember is that people are greedy. People seek things which are not theirs. This has gone on since there has been man on this earth and until the heart and the mind of man change, it is likely there will continue to be greed and avarice no matter how much we would like to see something else.

At the Freedoms Foundation we have an awards program in which we invite "Letters from Armed Forces". I would like to read what one Army captain said last year about "What is an American":

"If one can look at America's towering, snow-capped mountains and realize that she is beautiful and see her miles upon miles of waving fields of grain and realize that she is fruitful, and watch her mighty rivers flowing to the sea and realize that she is powerful, then he is an American.

If one can look at America's vast, dry wilderness and know that she is harsh and walk through her lush green forests and know that she is wild and observe her soggy, damp swamps and know that she is full of adventure, then he is an American.

If one can gaze at America's towering skyscrapers and know that she is progressive and watch her men walking on the moon and know that she is constantly seeking knowledge and watch machines probing into her abundant natural resources beneath the surface of the earth and know that she is rich, then he is an American.

If one stands a little taller when he hears her national anthem and senses a thrill when he sees her flag waving in the gentle breeze and realizes her freedom when he watches her great bald eagles winging silently in space, then he is an American.

If one can be proud when she is faithful and hurt when she has been wronged and fearful when she is restless and violent, then he is an American.

If one can read her history and realize that she is not perfect and look upon her many races of people and cultures and see only one and attend one of her numerous religious services and know that she is devout, then he is an American.

If one is willing to speak in her behalf when she has been criticized and willing to fight for her when she has been threatened and willing to die for her if she calls him to her aid, then he is an American.

If one can dream impossible dreams and know that America dreams also and hope with all one's heart for a better and more perfect tomorrow and realize that she is trying with all her might and have faith in her when she fails but dares to try again, then he is an American.

When one can watch her long straight lines of men in uniform and know that she is strong and watch her gather the needy of the world to her bosom and know that she is compassionate and observe her courts' process and know that she is just, then he is an American.

If one can speak one's thoughts without fear of punishment and write one's ideas for the whole world to read and finally be allowed to be oneself without fear of critics, then he is an American.

If one can sing when America sings and shout about when she shouts and laugh when she laughs and cry when she cries and struggle when she struggles and pray when she prays, then he is an American.

What you are doing is protecting. How, what are you protecting? There is nothing as constant as change, there is nothing as difficult to accommodate as change and there is nothing as essential as change. We have got to recognize that we are living in a world that is changing at a pace that we cannot keep up with entirely. Things are happening that we do not completely understand. Changes are taking place that we don't like. But there are other changes taking place that we do want, that we need. Change is going to continue to take place.

There is a topic that is highly emotional—Amnesty. Why should a man who runs away be given a consideration? And yet, we don't know why the man ran away and isn't this country all about giving him an opportunity to tell us why before we judge? Sure it is, and that's why your lives have been on the line over many, many years. In my lifetime four wars, every single one of them to uphold a principle that "man is entitled to be free." Man, wherever he is and under whatever condition he lives and serves, wants to be free and we have got to help him. Now, for a moment we seem to be pulling back. But this isn't new, we did the same thing in 1919 and 1920 after World War I.

In 1920 Gen. Douglas MacArthur went up to the United States Military Academy as the youngest superintendent since Thayer, charged with revitalizing, revamping the Military Academy. He had everybody up in arms over the changes he made but changes had to be made just like changes that are going to take place in this society, and you are going to guard the way the change takes place. You are not going to make the change, you are not going to be responsible for the change, you are not merely going to guide it, but you are going to maintain and protect the environment in which that change takes place.

Is it worth it? Do you know how many people have come to this land since we have been a free nation? Forty-one million. Forty-one million from other shores have liked what we have in the United States of America. They wanted to share and they came to share and those of us who were there shared. Perhaps not equally, perhaps not equitable. We have lots of injustices to correct but we have so much that is right about us that we must not forget what's right in our concern about what's wrong. Here's where you have to maintain a balance and here's where you have to maintain perspective.

What is more important then defending your country? Try to name it. The teacher can say I am more important because I am expanding your minds. You don't expand many minds in a closed society. You do this in the kind of free society that the force provides. The preacher can say I do because I am getting you acquainted with your God. Not in a closed society; you do this only in a free society. You are the people who keep it free. The doctor, dentist, lawyer, you name it, none of them can follow their vocation in a society where a man is not free—they can't follow it fully.

That's what you are doing—maintaining a free society. No more noble purpose can you have than defending your country and when people carp and criticize, remember that you have provided them with the opportunity to do just that because without the actions and performance that you have given they couldn't do it. This is what you are doing and it's a great, great privilege you have to be serving in your country's uniform and it's a great, great goal to have of continuing to keep us a free nation. I would like to wind up with one man's description of freedom—something you can take with you when you leave.

Dear God has given to each of us a gift beyond compare.
It is like a polished precious stone with many facets rare.
In one we find the sky and sea, the beauty of this world.
Another shows America with stars and stripes unfurled.
We see the people kneeling in deep and thankful prayer and homes with joyous faces that tell of loved ones and again we find men speaking and writing hopefully their conscience is telling them the truth shall make you free.
The scientist and artisan are working unafraid so man may find new challenges in everything they need.
One facet shows those noble bonds that grow betwix man and man with sacrifice and love and in their daily living plan
This gem of many facets is old yet ever new. It has the name of freedom—its other name is you.

This you can never forget. Freedom is everybody's job. Freedom is everybody's job. Freedom is everybody's responsibility, but a few are chosen to protect and preserve it from violent overthrow and you are among those chosen few. So be proud of what you are and be proud of what you do, above all be proud of the United States of America.

MINERAL KING

HON. RONALD V. DELLUMS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. DELLUMS. Mr. Speaker, the future of the mammoth development planned at Mineral King by Walt Disney Enterprises is still in doubt as a result of the Supreme Court decision on April 19.

Because of the confusion surrounding this issue, I was pleased to read a detailed status report on Mineral King in the June issue of Not Man Apart, published by Friends of the Earth. An article by Tom Turner and Patricia Sarr explains some of the implications of the Court's decision, and outlines the ways conservationists hope to overcome that temporary setback.

I commend this timely article to the attention of my colleagues.

The article follows:

MINERAL KING: DID WE WIN OR LOSE?

On April 19, the Supreme Court dismissed a case, brought before it by the Sierra Club, in which the club sought to prevent the despoliation of a valley in the Sierra Nevada. The dismissal turned on a point of law known as "standing to sue," a point of critical importance to environmental organizations seeking redress in the courts.

"Standing" is recognition by the court that the plaintiff is a legitimate party to bring a given lawsuit. For example, if an airplane crashes into my house, I am obviously the proper person to sue the pilot, the airline, and perhaps the CAB for the damage to my house. If the plane crashes into my neighbor's house without injury to me, it is unlikely that the court will let me be the one to bring suit. One is expected to fight one's own battles.

When the environment is involved there is obviously a question about who should be able to go to court to defend it. For years, the courts insisted that only someone with an economic injury could bring suit, and routinely tossed out cases brought by conservation organizations seeking to protect the public domain on the grounds that they had no pecuniary interest in jeopardy.

Then in 1966, the Scenic Hudson Preservation Conference and others got the U.S. Court of Appeals (second circuit) to recognize that they had standing to participate in Federal Power Commission licensing proceedings to try to stop Consolidated Edison from building a pumped storage power facility at Storm King Mountain on the Hudson River.

The Conference demonstrated that it represented several thousand members who would be harmed by the building of the Storm King Plant, through the loss of aesthetic and recreational values, and claimed the right to sue on their behalf.

So the precedent was set, and more and more environmental cases began to be accepted by courts all over the country.

The Sierra Club used this precedent in June 1969 when it filed suit in the Federal District Court in San Francisco to prevent the Secretaries of Agriculture and the Interior from issuing permits for the development of Mineral King Valley, by Walt Disney Enterprises, as a ski resort. The club objected that the proposed development is so extensive as to completely subvert the purpose of legislation passed in 1926 setting Mineral King aside as the Sequoia National Game Refuge; that the proposed highway and power line through Sequoia National Park, to service Disney, would be illegal; and that the Forest Service could not, in any event, issue permits to private companies in excess of 80 acres under the law (Disney wants 13,000 acres).

The club claimed its right to standing solely since "one of the principal purposes of the Sierra Club is to protect and conserve the natural resources of the Sierra Nevada mountains." The District Court held that this allegation made the Sierra Club "sufficiently aggrieved" to have standing to sue on behalf of Mineral King, and issued an injunction barring the issuance of any permits to begin construction of the ski resort.

The Forest Service and Disney appealed the decision, and the U.S. Court of Appeals (9th circuit) overturned the earlier decision, ruling that the club did not have standing since it had not shown that the club itself would suffer injury. The club petitioned the Supreme Court to hear the case, and the High Court upheld the decision of the Court of Appeals. The Court, however, upheld the 9th circuit only on the precise pleading concerning standing, and did not rule on the merits of the case.

GAMBLING

The Sierra Club's case was dismissed because it tried to get the Court to affirm this broader view of standing, which the District Court had recognized. Rather than claiming a right to standing on the ground that it sponsors outings to Mineral King in the summer, and that it has hundreds of members who enjoy Mineral King in the summer, and that it has hundreds of members who enjoy Mineral King in its pristine state, the club argued that it should have standing to sue simply by virtue of its existence as a stable, reputable, respectable organization with a long-time interest in the environment. The court didn't go for it, but it was close, and there are some very hopeful words both in the majority opinion and in the dissents. (Voting with the majority: Burger, Marshall, Stewart and White; dissenting: Blackmun, Brennan and Douglas.)

(Before the case went to the Supreme Court, Friends of the Earth, The Wilderness Society, and the Izaac Walton League filed an *amici curiae* brief with the Court, setting forth four alternative grounds upon which the Court could support the club's claim to standing, including the outings and other activities the club carries on at Mineral King. The club chose not to adopt that argument in its final Reply Brief to the Court. The majority opinion, written by Justice Brennan and handed down on April 19, referred to that brief: "In an amici curiae brief filed in the Court by The Wilderness Society and others, it is asserted that the Sierra Club has conducted regular camping trips into the Mineral King area, and that various members of the Club have used and continue to use the area for recreational purposes. These allegations were not contained in the pleadings, nor were they brought to the attention of the Court of Appeals. Moreover, the Sierra Club in its reply brief specifically declines to rely on its individualized interest, as a basis for standing. . . .")

So the club lost its gamble. It can, however, amend its complaint to include allegations of use by members, and therefore injury to the club, and refile it with the District Court in San Francisco. In fact, the High Court very nearly recommended this course: "Our decision does not, of course, bar the Sierra Club from seeking in the District Court to amend its complaint by a motion under Rule 15, Federal Rules of Civil Procedure."

But has standing suffered a blow? Probably not. In denying the club's claim to standing, the Court actually moved to broaden the basis for standing, though not quite as far as the club wanted or FOE would have liked.

THE DECISION

In this case, the first time the issue of standing in an environmental case has been ruled on by the court, the majority said, "The injury alleged by the Sierra Club will be incurred entirely by reason of the change in the uses to which Mineral King will be put, and the attendant change in the aesthetics and ecology of the area. Thus, in referring to the road to be built through Sequoia National Park, the complaint alleged that the development would destroy or otherwise affect the scenery, natural and historic objects and wildlife of the park and would impair the enjoyment of the park for future generations. We do not question that this type of harm may amount to an 'injury in fact' sufficient to lay the basis for standing under (section) 10 of the Administrative Procedure Act. Aesthetic and environmental well-being, like economic well-being are important ingredients of the quality of life in our society, and the fact that particular environmental interests are shared by the many rather than the few does not make them less deserving of legal protection through the judicial process. But the 'injury in fact' test requires more than an injury to a cognizable interest. It requires that the party seeking review be himself among the injured."

THE DISSENTS

Three Justices in dissent would have extended the standing doctrine even further than the majority. Justice Blackmun, speaking for himself and Justice Brennan, wrote, "This is not ordinary, run-of-the-mill litigation. The case poses—if we choose to acknowledge and reach them—significant aspects of a wide, growing and disturbing problem, that is, the Nation's and the world's deteriorating environment with its resulting ecological disturbances. Must our law be so rigid and our procedural concepts so inflexible that we render ourselves helpless when the existing methods and the traditional concepts do not quite fit and do not prove to be entirely adequate for new issues? . . .

"I would permit an imaginative expansion of our traditional concepts of standing in order to enable an organization such as the Sierra Club, possessed, as it is, of pertinent, bona fide and well-recognized attributes and purposes in the area of the environment, to litigate environmental issues."

Justice Douglas wrote a second dissent, which contains a jurisprudential theory that may well represent the key to protecting the environment through the judicial process. He said that the real problem lies with the concept of the law which limits its protection to people and their property. Justice Douglas wrote, "The critical question of 'standing' would be simplified and also put neatly in focus if we fashioned a federal rule that allowed environmental issues to be litigated before federal agencies or federal courts in the name of the inanimate object about to be despoiled, defaced, or invaded by roads and bulldozers and where injury is the subject of public outrage. Contemporary public concern for protecting nature's ecological equilibrium should lead to the conferral of standing upon environmental objects to sue for their own preservation . . . This suit would therefore be more properly labeled as *Mineral King* v. *Morton*.

"Inanimate objects are sometimes parties in litigation. A ship has a legal personality, a fiction found useful for maritime purposes. The corporation sole—a creature of ecclesiastical law—is an acceptable adversary and large fortunes ride on its cases. The ordinary corporation is a 'person' for purposes of the adjudicatory processes, whether it represents proprietary, spiritual, aesthetic, or charitable causes.

"So it should be as respects valleys, alpine meadows, rivers, lakes, estuaries, beaches, ridges, groves of trees, swampland, or even air that feels the destructive pressures of modern technology and modern life. The river, for example, is the living symbol of all the life it sustains or nourishes—fish, aquatic insects, water ouzels, otter, fishes, deer elk, bear, and all other animals, including man, who are dependent on it or who enjoy it for its sight, its sound, or its life. The river as plaintiff speaks for the ecological unit of life that is part of it. Those people who have a meaningful relation to that body of water—whether it be a fisherman, a canoeist, a zoologist, or a logger—must be able to speak for the values which the river represents and which are threatened with destruction. . . .

"Those who hike the Appalachian Trail into Sunfish Pond, New Jersey, and camp or sleep there, or run the Allagash in Maine, or climb the Guadalupes in West Texas, or who canoe and portage the Quetico Superior in Minnesota, certainly should have standing to defend those natural wonders before courts or agencies, though they live 3,000 miles away. Those who merely are caught up in environmental news or propaganda and flock to defend these waters or areas may be treated differently. That is why these environmental issues should be tendered by the inanimate object itself. Then there will be assurances that all of the forms of life which it represents will stand before the court—the pileated woodpecker as well as the coyote and bear, the lemmings as well as the trout in the streams. Those inarticulate members of the ecological group cannot speak. But those people who have so frequented the place as to know its values and wonders will be able to speak for the entire ecological community.

"Ecology reflects the land ethic; and Aldo Leopold wrote in *A Sand County Almanac*, 'The land ethic simply enlarges the boundaries of the community to include soils, waters, plants, and animals, or collectively, the land.'

"That, as I see it, is the issue of 'standing' in the present case and controversy."

To that, we can only say, amen.

PROSPECT

As to Mineral King itself, the decision by the Court is not final. The door is still open for the Sierra Club to go back to court to stop the Disney ski development, and club attorneys are confident of eventual victory. Says Jim Moorman, Executive Director of the Sierra Club Legal Defense Fund, "There will never be a ski development at Mineral King."

The major short term problem with the decision is a psychological one. Unsympathetic judges may throw out some cases that they might otherwise have felt compelled to accept. And, ironically, the decision may hurt other groups more than it does the Sierra Club. The club, with its large membership and its extensive outings program, can allege injury to itself and its members in cases involving nearly any area in the country. Other groups may find the scope of their litigation narrowed.

For them, we will have to wait for the wisdom of Justices Blackmun and Douglas to gain the majority.

—TOM TURNER.

Late in May, three members of the NMA staff went to Mineral King Valley for the weekend. It was the kind of trip conservationists can go on and call a business trip, but it was mostly fun. We went, prompted partly by a new volume in the fine series of Sierra trail guides published by the Wilderness Press in Berkeley, wanting to see what the fuss was all about, and wanting to see Mineral King in its natural state, for perhaps the last time. These photos are taken from that trip. We arrived late Thursday night, and set out south for Franklin Pass in the morning. The sky was darkly overcast, and by mid afternoon a light snow began to fall. We made camp and slept, waking up the next morning to find a foot of snow had covered our whole world. By Saturday afternoon, most of the snow on the ground at lower elevations had melted. The peaks were covered with snow while the slopes were green and brown, with white trees on them highlighted by clear, bright sunlight. On a day hike to Sawtooth pass, two of us saw a wolverine thought to be extinct in this part of the Sierra, and close to extinct in California.

Try to imagine, as we found ourselves doing often, the valley covered with buildings, the slopes disfigured by ski tows, the high country jammed with hundreds and thousands of people. Disney expects to cram one million people a year into Mineral King; that's half as many people as visit Yosemite, and Yosemite is seven times the size of Mineral King. Imagine what will happen to the "game" in Mineral King National Game Refuge—to the deer and the marmots and the picas, to that lonely wolverine—when there are 5000 people arriving for a weekend of skiing, laden with gear and looking for a fast run down the slopes. Mineral King does not deserve a ski resort of whatever size. It belongs in the Sequoia National Park, which surrounds it on three sides.—P.S.

HOUSE ERRS IN PASSAGE OF BUSING BILL

HON. JOHN DELLENBACK

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. DELLENBACK. Mr. Speaker, since the landmark Supreme Court decision in Brown against the Board of Education in 1954, the Congress has taken a definite back seat to the executive and judicial branches in the advancement of school desegregation throughout the Nation. The congressional role has been unfortunately minimal during the last 4 years when progress has been particularly outstanding: In 1972 only 10 percent of the schoolchildren in 11 States of the South will attend all-minority schools as opposed to 70 percent in 1968. During this period of remarkable progress, Congress has done little to encourage desegregation. Indeed, in 1971, the House even rejected the Emergency School Aid Act, proposed by the Nixon administration to make Federal financial assistance available to school districts in the process of desegregating. That legislation finally passed the House only after it had been tacked on to an omnibus education bill which included strong antibusing amendments.

At this late date in the development of desegregation, the House has finally entered the fray again. But instead of advancing the progress of school desegregation through our belated entrance on the scene, we have passed a bill calculated not only to slow down this progress, but quite possibly to contribute materially to reversing it. I opposed H.R. 13915 in the Education and Labor Committee. The House added a series of amendments which made this bill even more restrictive and potentially harmful than the original committee version, and I, accordingly, was strongly opposed to its final passage.

The impetus for congressional action on school desegregation at this point in time is the public furor over the widely misunderstood issue of pupil transportation, or busing. Over the years busing students has been used as a tool to achieve many different educational goals, including consolidation of schools, special education for the handicapped, and vocational training. In each instance, busing was used so that the quality of education would be improved. Now that it has been proposed as a tool to help desegregate schools, the old familiar schoolbus has suddenly become an object of wrath. Yet its goal in this new use remains the same: To improve the quality of education. As President Nixon has noted:

> Quality is what education is all about; desegregation is vital to that quality—

In some instances, busing is the only feasible tool to achieve desegregation. For this reason, it is vital that this tool remain available to be used by school districts which are either seeking voluntarily to desegregate or are under court order to desegregate. H.R. 13915 seeks to limit the use of that tool. There is a fine line between limiting the use of busing and actually hindering the progress of desegregation, however, and in crossing that line, H.R. 13915 becomes more than just an antibusing bill. In fact, the bill not only endangers the future progress of school desegregation in this Nation, it also goes against the progress that has been made in the 18 years that have elapsed since the Brown decision.

Making an already harmful bill even

more dangerous, the House has restored to the bill section 406, which the Education and Labor Committee had deleted. This section permits the reopening of desegregation plans already ordered by the courts in accordance with title VI of the Civil Rights Act of 1964, so that such plans may be modified to conform with the provisions of H.R. 13915. The clear and regrettable implication of this provision is that Congress wants to do more than guide and limit what can be done about school desegregation in the future; Congress is also willing to witness and even condone the undoing of what has been accomplished so far.

Yet another serious weakness of H.R. 13915 is that it walks on shaky constitutional grounds. First, although the 14th amendment does grant Congress the "power to enforce, by appropriate legislation, the provisions" of the amendment, this power does not include the right to reduce the extent of equal protection. Therefore, the attempt in H.R. 13915 to narrow the definition of what constitutes equal protection becomes highly questionable.

Second, H.R. 13915 tries to limit the ability of the Federal courts to remedy constitutional violations. This attempt may in fact amount to a denial of due process of law under the fifth amendment.

For all of the above reasons I voted against H.R. 13915. I am convinced that this bill, as passed by the House, would create far more problems than it could ever solve. Congress would be better off to continue to drag its feet on school desegregation and do absolutely nothing than to approve such potentially harmful legislation as this bill.

THE "PEER PRESSURE" DRUG CURE

HON. CLAUDE PEPPER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. PEPPER. Mr. Speaker, on July 5 I had the pleasure of taking members of the Select Committee on Crime on a field trip to the small town of Davie, Fla., for a look at an apparently successful drug rehabilitation center which concentrates on rehabilitating large numbers of adolescent girls and boys.

This visit occurred on the evening following the first 3 days of hearings in Miami on the problem of drug abuse and narcotic addiction among school-age children.

Two articles reporting on these events follow:

"Peer Pressure" Drug Cure Gaining Friends and Critics

(By Doug Clifton)

Fort Lauderdale.—Debbie's mother looked at her 14-year-old daughter, newly free from the grip of drugs, and proudly confided: "I have a piece of canvas and stone from the old Seed building. I'll keep it always."

Her devotion to the two-year-old drug rehabilitation center near Fort Lauderdale is typical. It is shared by a growing group of prominent people.

Rep. Claude Pepper took his Select Committee on Crime to the newly purchased 26-acre compound in Davie. The following day, Art Barker, the center's director, testified before the committee.

Later in the day, U.S. Commissioner Edward Swan, father of a Seed success, offered testimony to the same committee.

Criminal Court Judge Alfonso Sepe refers all his drug-related cases to the Seed and has called it a "miracle." Sen. Edmund Muskie went to the Seed to see and be seen while his presidential campaign was still alive. Actor-singer Sammy Davis stopped by.

And the Seed story, "The Seed of Hope," was told in documentary fashion on television.

Debbie's mother and the others hail Barker as the creator of the program that saves youthful drug users. They claim the Seed transforms 90 per cent of all the youths who enter the program.

But not everyone is convinced that the Seed is the answer. Some doubt the claimed success rate. Others oppose the referral system. Still others fear that the treatment center is too "closed" and may overtreat.

Among critics are members of the Mental Health Association, psychologists, scholars, probation officers and psychiatrists.

How has Art Baker, a one-time Playboy Club comic and reformed alcoholic, convinced so many people that the Seed has the answer—perhaps the only one—to the rampaging drug problem?

It's quite simple, says Barker and his enthusiastic supporters: The program works.

"I save kids," says Barker, "And I don't get involved with the bureaucratic crap that makes all the other programs fail."

For the politician who sees the growing drug problem as trouble at the polls and the judge who sees it as crime in the streets, a simple, cheap ($200 a head) and massive program that works is like a miracle.

Barker tells at least one important person a day that 1,800 youths are "straight" because the Seed made them that way. Almost as frequently, he gives a demonstration of how he saves them through a device he calls an "open meeting."

The open meeting is similar to a revival. Participants stand and confess their drug-riddled past, renounce it and assert their long-abused love for parents.

Parents and children exchange "I love you's," the password of the Barker-Seed subculture. The evening is concluded with the 500 or 600 children singing "America the Beautiful," "Battle Hymn of the Republic" and other patriotic songs.

"I did everything from pot to downs. I started when I was 12. I robbed stuff from six different houses . . ."

Such confessions do not accurately reveal the extent of a child's drug use, say some critics.

Dr. Robert R. Jones, a Nova University professor of psychology and once a candidate to evaluate the Seed program, says admissions may be exaggerated to win status.

But Seed supporters close ranks with Barker on the basis of the performance at the open meeting and parents' testimonials.

Recently Barker has won financial support along with the vocal acclaims.

With the help of the political influence of one of his supporters, the National Institute of Mental Health awarded the program a $177,000 grant, renewable yearly for eight years.

The Law Enforcement Assistance Administration provided a $30,000 grant through the Broward County Narcotic Guidance Council.

Last week the Metro Commission awarded a $12,500 grant to Barker to treat 100 Dade Youth. He has also won wide private support from the community, and several Broward cities are donating $100 for each youth from its limits who attends the Seed.

The support is linked directly to the claim of a 90 per cent success rate.

Merrill Schuers, a Nova University researcher in drug rehabilitation and one of the evaluators of another Broward drug program, says, "It is inconceivable that anyone could seriously advance the proposition that a two-year-old drug program is 90 per cent effective."

Furthermore, says Schuers, the Seed has little or no follow-up program to keep tabs on "graduates."

Schuers and other critics say the program is basically a good one, based as it is on a variety of tested techniques, but judgments about its success must wait.

Barker calls a "Seedling" a success even when he still is undergoing rehabilitation.

But there are many two-term Seedlings and many who have been in the program's 24-hour-a-day surveillance phase—12 hours in therapy and 12 at a foster home—for longer than the prescribed two weeks.

According to a show of hands, at least one-fourth of the several hundred drug users at the Seed one day last week had been on the 10 a.m. to 10 p.m. regimen for at least five weeks. About half had been there more than three weeks.

Half of those present that day had been back to the Seed for a second visit after earlier being released as rehabilitated. Some of those who returned for the second time were at the Seed for "attitude" problems.

One girl had been on the 10–10 program for 54 days, was released and then returned by her parents after she started "playing games." She was 44 days into her second stay.

A boy said he'd been in the program three times. He was on the 10–10 program for 42 days. His story was cut off by Barker because he was "an exceptional case."

A married woman of 22, mother of an infant, admitted to smoking pot 20 times in two years. She was on her 23rd day of a scheduled 30-day stay at the Seed.

The Rev. Robert Kelley, a former Seed board member and, on the whole, a Seed supporter, said:

"Sometimes I think the children are left in the program too long. I know a boy who was left in it for 11 weeks, and it was just too much. That's one of the reasons I wanted more professionals in the program," Kelley says.

Mrs. Powers Sharretts, director of the Broward Mental Health Association, and a less-temperate critic, calls the tool of confrontation and confession employed by the Seed a "dangerous tool when you don't know when to stop it."

Barker says his 10 senior staff members and 12 junior staff members know what makes "druggies" tick better than anyone. All senior and junior staff members are graduates of the program. The Seed has one "professional," a Roman Catholic nun with degrees in psychology, to conform with dictates of the National Institute of Mental Health grant.

Barker regards professionals with disdain, dismissing them in a sweeping comment: "They can't do a damn thing with kids on drugs."

If the professionals and all other drug programs can't work, as Barker says, how can the Seed?

According to Barker, it works on major principle—peer pressure.

"Peer pressure turns them on to drugs, and peer pressure can get them off," he says.

It is Seed-created—peer pressure that does the job, he adds.

Dr. Raymond Killinger, a psychiatrist in private practice and the state's regional chairman for drug rehabilitation programs, says: "For some people, the system Barker uses may have some benefit. But there are those who can be hurt by the program. I think it works best with (drug) experimenters who respond to an authoritarian structure."

And an underlying claim that 75–85 per cent of the boys and girls in schools are heavy users of drugs is disputed by several school officials and Chief Juvenile Court Judge Frank Orlando, who says his experience places the figure much lower.

In support of Barker, however, is School Board Chairman Lyle Anderson, a Seed director.

Seed peer pressure is developed in the program with the basic principles of Alcoholics Anonymous—the system that won Barker from the whisky bottle. The heavy confessional aspect of the Seed and the moral-inventory concept are lifted almost directly from AA.

Basically the program breaks the participant down so that he develops dependence on the group. His good behavior then is rewarded by the group and bad behavior is punished.

In theory, he is placed in the group after an intake interview designed to estimate the depth of his drug habit and the complexity of his personality problem.

Fort Lauderdale child psychologist William Ryan, now with the Lauderdale psychiatric group but formerly a Nova staff member, calls the intake phase of any program vital.

"The intake procedure, as the rest of the program, must be fully evaluated. Children referred through the schools are never examined to determine their suitability for the kind of treatment at the Seed.

If someone came to me with a problem, I wouldn't just put him in shock therapy without first evaluating the nature of his problem," says Ryan, who has occasionally referred patients to the Seed.

In many cases, the person doing the intake interview at the Seed is a junior or senior staff member and not the program's one professional. Sometimes it is Suzy Barker, the director's 19-year-old niece—not a former Seedling, not trained in psychology.

That is not to say all youthful drug users referred to the Seed are not evaluated before being admitted.

In Broward, the chief Juvenile Court judge and the head of the probation division have refused to comply with Barker's request that all drug offenders be routinely paroled to the Seed.

Says Squire Hanni, Probation Department head: "I allow my probation officers full professional integrity. They fully evaluate the child and refer him to the drug rehabilitation facility they believe best suited for his particular personality."

Barker has no kind words for Judge Frank Orlando or Hanni.

Hanni, like nearly everyone else in Broward officialdom, offers restrained comment. Most reserve judgment on the program and refuse comment on Barker.

They would like to give the program a chance and don't like to judge it on their feelings about Barker.

But Barker IS the Seed, as both friends and enemies say.

His is perhaps the only program of its kind that has one man serving as executive director, president and chairman of the board. In the corporate structure, the other position of real importance is held by Barker's wife, Shelley. She is secretary-treasurer.

According to sources close to Barker in the days before he started the Seed, he incorporated with several helpers, including Municipal Court Judge James Balsinger, still a board member.

In a fact sheet about Seed, Barker does not mention that he used a church house provided free by the First Lutheran Church in Fort Lauderdale. The fact sheet does not mention modest funding provided by Broward's poverty agency and generous loans that made it possible for him to move into a second site after he had a falling out with church elders.

Tom Reagan, a Fort Lauderdale businessman who knew Barker in New York, admires the man.

"When Art got something in his head, he'd really argue the point, be adamant about it. He has an ego, sure, but this you have to have if you're ever gonna get your head above the crowd . . . and there's gonna be someone out there to throw rocks," he says.

And people do throw rocks.

"He has a rotten temper," says one former acquaintance. "He's the kind of guy who plays charades at a party and when nobody can guess what it is he flies into a rage and calls everybody stupid."

In the words of Phil Cheaney, a Broward County banker and former Seed board member, "Art burns people out."

"He is so intense a flame, you just can't keep up with him. Barker is an evangelist. If you want to follow him, you have to commit yourself wholeheartedly or not at all," Cheaney says.

[From the Miami (Fla.) News, July 10, 1972]

Twelve-Year-Olds Buy Heroin At School

(By Rick Abrams)

"Twelve-year-olds are experimenting here in Miami with heroin which they can buy in the schoolyard; young girls and boys are popping pills of all kinds; and 13-year-olds are buying dope from their 15-year-old friends."

This statement, by U.S. Rep. Claude Pepper (D-Fla.) was backed last week by many witnesses who appeared before the House Select Committee on Crime, investigating the "Drug Crisis in Dade County Schools," of which he is the chairman.

The other members of the committee are Congressmen Frank Brasco and Charles Rangel of New York, James Mann of South Carolina, Morgan Murphy of Illinois, Charles Wiggins of California and William Keating of Ohio.

The committee questioned dozens of witnesses. If the opinions of former addicts, drug-rehabilitation officials, school-board members, doctors, and parents whose children became addicted and may have died because of drugs are true, Miami is indeed, to use Pepper's words, "gravely in need of help by state, local and national government."

One 18-year-old ex-addict told the committee he robbed stores once a day to support a $200-a-day heroin habit.

A heroin addict's mother testified that her son strangled his 5-year-old sister while in a "drug stupor." The woman told the committee she tried to get help for her son several times.

She said she could not get help from local probation officials, although the boy had been convicted of shoplifting to support his habit.

Art Barker, a founder of The Seed, a Broward County drug rehabilitation program, said he could send any child to any school in Dade County with $10 "and in 20 minutes they could come back with drugs."

"The drug-abuse situation," Pepper said, "has assumed deadly proportions in the Miami area. Over the last five years, more than 450 people have died of drug overdoses or drug-related causes. In the last two years school-age children's drug deaths have more than doubled."

Each day, Pepper began the hearings by saying, "There are presently between 7,000 and 14,000 heroin addicts in Dade County. This means that one in every 137 residents is a hard-core drug addict. In Dade County, of the $58 million worth of property stolen each year, more than half can be attributed to addicts."

Pepper promised that the committee would urge federal legislation so that funds could be given to drug-rehabilitation projects and drug-education programs in schools.

"The federal government," Pepper said, "must take an active and prominent role. We can not let young children's lives turn to crime, degradation and death. We hope that these hearings will be . . . the beginning of a national commitment to assure drug-free schools."

FINANCIAL STATEMENT

HON. JOHN BRADEMAS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. BRADEMAS. Mr. Speaker, I insert at this point in the RECORD a current statement of my financial assets and sources of income.

The information given follows the form of the official financial disclosure statement required by rule XLIV of the House of Representatives.

Mr. Speaker, I also include a complete statement of my securities holdings and their value as of this date, some of which are not required to be disclosed in the official statement:

FINANCIAL STATEMENT OF CONGRESSMAN JOHN BRADEMAS

Securities holdings	Shares	Value
Massachusetts Investment Trust	255	$3, 320
Advance Ross Corp	50	275
General Motors Corp	25	1, 872
Sea Containers, Inc	200	4, 700
Union Carbide Corp	50	2, 463
Xerox Corp	50	8, 232
A.T. & T. 8¾ percent bonds	6	6, 667
Cash account	$332	
Total value of securities as of Aug. 18, 1972		27, 529

2. Income from Professional organizations—None.

3. (a) Income from a single source exceeding $5,000 and not reported in Section 2, above—None.

(b) Capital gains from a single source exceeding $5,000—None.

(c) Reimbursement for expenditures from a single source exceeding $1,000—None.

(d) Source of honoraria aggregating $300 or more from a single source—(1971 and 1972 to date): University of Notre Dame; North American Publishing Company; Indiana University; Education Press Association; Sweet Briar College; School Management Institute. Inc.; Children's Rehabilitation Institute, Baltimore; Indiana Statewide Rural Electric Cooperative; University of St. Louis; New England Program in Teacher Education; Amherst College; IBM Conference; Association of American Publishers; and Pennsylvania Association of Colleges and Universities. Total—1971 and 1972 to date $9,559.00.

4. Unsecured Indebtedness exceeding $10,000—None.

THE AMERICAN DREAM AND THE AMERICAN REALITY

HON. EDITH GREEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mrs. GREEN of Oregon. Mr. Speaker, a recent letter I have received from a constituent has so perfectly portrayed the dilemma of an average citizen of these United States in a period of intense national frustration, uncertainty, anger and bewilderment that I am moved to bring it to the attention of my colleagues. To an extraordinary degree it reveals not only the sources of our great national frustration but illuminates as well causal relationships between such important issues as unemployment, education, welfare, the war in Southeast Asia and the treatment of veterans.

President Nixon, in his now-famous remarks at the Connally Ranch last May concerning the American "work ethic" and the need to revive it in this country, could have found no better representative than the writer of this letter when he described "millions of fine Americans that work hard, are proud of their work—(who) have made—(and) built this country, and (who) are going to build it bigger in the future."

There is a terrible temptation to comment on other aspects of this excellent letter. I will forego the opportunity, commending it to your attention on its own merits as one of the best presentations of the overall U.S. dilemma to come to my attention in a long time.

Hon. EDITH GREEN,
House of Representatives,
Washington, D.C.

DEAR MRS. GREEN: I'm writing this letter to thank you for your recent stand against the war in Vietnam. My wife and I support Senator McGovern wholeheartedly in his efforts to bring this conflict to a swift conclusion. A second matter of concern is the economic chaos created by this war, a portion of which has touched my family.

I'm a veteran of service in the army from 1956 to 1959. My job included typing classified reports on far eastern countries including Vietnam. Upon my separation from the unit I was awarded a letter of appreciation for the manner in which I conducted my duties. My personal opinion has always been that this war was purely a Vietnamese internal matter and did not warrant the intervention of the United States.

Recently I graduated from Portland State University with a B.S. in geology. At the time of graduation I had maintained a GPA of 3.03 the entire four years, in spite of not finishing high school. A lot of hard work and sacrifices has been rewarded by the prospect of no job in the near future in my field and a loss of seniority and chance to regain my former job. The GI Bill to be successful in retraining veterans can't be coupled to a lame economy. At the present I have a GS 7 rating with the federal government as a geologist. I qualified for the higher rating under the superior academic achievement requirement. In spite of federal reinstatement rights for employees, I find it impossible to reenter the federal service if no position can be filled due to the present ceilings.

Prior to 1969 I was employed for ten years by the Postal Service. Taking into account military service I was a thirteen year federal employee. I entered the Postal Service during the last Republican recession in 1959–1960. The pay was only $2.26 per hour and the superintendents worked the substitutes 50 to 65 hours a week with no time and one half for overtime. Considering my army pay of $78.00 per month at the start of my tour and $146.00 per month at the end of it, this was luxury. Just prior to the postal strike I resigned, as did many of my co-workers. Fifteen years seniority was needed to obtain a summer vacation and the pay had lagged far behind what was needed for a man with a family. This is the reason I decided to accept the terms of the GI Bill and complete my education. I had been thoroughly sold on the idea that if I wanted out of the rut—education was the route. I figured that if I worked under the very worst the government had to offer I should at least be given the chance for something better.

During my education I received no other federal or state assistance. My wife and I managed to earn the remainder of the money we need to support a family of five by our own efforts (and wits). The GI benefits came to only $256.00 per month. We ended up spending my entire federal retirement fund to make ends meet. College work study grants are not geared to the needs of a veteran with a family; the machinery to implement such a grant is usually very slow and the jobs are not generally allocated according to amount of need. When I first started to attend full time I applied for a work study job and none was available in spite of the fact that a veteran who had attended the university prior to his military service did hold down such a job while working elsewhere part time, receiving GI benefits, and while married to a working registered nurse. Luckily we are very resourceful people.

Tomorrow I will go to an interview for the position of furniture mover, one of the few jobs available. What's bothering me is the fact that the harder we try the worse things seem to get. Federal regulations at the time prevented my mother from earning enough money to support her family and still retain her social security survivors insurance benefits, which were sorely needed. Federal and state regulations on hazardous work for minors prevented me from holding better paying jobs in my teens and forced me to spend even longer hours in harvest fields for little pay. I am beginning to tire of it!

Having lived like a peon in my younger years I identify strongly with people on lower incomes, this is why I support Senator McGovern. Young people in this country should have an equal opportunity to attend college, should be able to advance to responsible jobs if they are capable, should not be compelled to accept less then a decent standard of living so a privileged minority can profit excessively from a system that could provide well for all. I believe firmly in America, but I will not accept the conditions that I have observed in my lifetime as all that America has to offer.

If conditions don't improve soon our government will be faced with a gradual withdrawal of the consent to be governed by the people. Many otherwise honest people will resort to whatever means they can muster to earn money to pay bills and the U.S. will slip even closer to anarchy. If crime is to be sharply curtailed and the welfare roles reduced, for God's sake lets put Americans back to work.

Sincerely yours

RALPH C. FEELY.

HON. EDWIN D. ESHLEMAN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1972

Mr. ESHLEMAN. Mr. Speaker, I would like to share with my colleagues my good friend, the gentleman from Pennsylvania, PETE BIESTER's latest newsletter to residents of the Eighth Congressional District of Pennsylvania:

AUGUST 1972.

DEAR CONSTITUENT: I am very pleased to report that the results of my sixth annual constituent poll have been tabulated, and the breakdown of responses on each question is printed below for your information.

	Percent		
	Yes	No	No response
1. Which of the following do you consider the most preferable course of action in Vietnam?			
a. Continued phased withdrawal of American forces consistent with the President's program	38		
b. Immediate withdrawal of all American forces	16	-----	6
c. Withdrawal of all American forces by a definite date conditioned on release of POW's	40		
2. The National Commission on Marihuana and Drug Abuse has recommended that the possession of marihuana for personal and private use no longer be an offense. Would you favor such a change in Federal law?	34	63	3
3. Do you favor the President's recent efforts to open more normal relations with China?	85	11	4
4. Do you favor the establishment of federally supported voluntary day care centers for the children of working mothers?	43	52	5
5. How successful have the wage-price regulations been in reducing the pace of inflation?			
a. Highly successful	1		
b. Moderately successful	43	-----	20
c. Unsuccessful	36		
6. Do you favor the continuation of wage-price controls?			
a. For 6 months	12		
b. For 1 year	22		
c. For 2 years	27	-----	23
d. Not at all	16		
7. Would you favor the adoption of a no-fault auto insurance program on the national level if the States fail to adopt a no-fault system?	77	17	6
8. Do you favor the construction of nuclear power plants at Newbold Island and in Bucks and Montgomery Counties?	54	38	8
9. Do you favor legislation to stop new and additional student transportation to achieve racial balance in schools?	75	21	4
10. Do you favor continued efforts to work toward a more racially integrated society?	57	27	16
If so, what steps should we take:			
a. More housing opportunities	35	------	------
b. Increased accessibility to job opportunities and better transportation facilities	50	------	------
c. Other ________ ________	15	------	------
11. With the completion of the Apollo space program, would you favor:			
a. Development of a space shuttle as proposed over the next 6 years?	50		
b. Radical reduction of the entire program	37		13
12. The House Judiciary Subcommittee of which I am a member is presently considering legislation to suspend the death penalty for 2 years.			
a. Do you approve of such a suspension?	21	64	15
b. Would you favor the abolition of the death penalty except in cases where conviction resulted from the death of law enforcement officers?	9	64	27
c. Would you favor the abolition of the death penalty in all instances?	18	59	23
d. Do you favor the death penalty?	66	19	15
13. Would you oppose granting amnesty to draft resisters upon the end of our involvement in Vietnam conditional upon the men involved completing 2 years of military or alternate service?	52	45	

Approximately 172,000 questionnaires were mailed to District residents, and replies were received from over 20,000. As in the past, I was encouraged by the substantial response to the mailing, and the letters which accompanied so many of the questionnaires were particularly helpful in interpreting the results.

After having used the questionnaire as a means of gauging constituent opinion since I first arrived in Washington, I am more convinced than ever of the vital role it plays in the communication process between Congress and the people. In our country today there is a searching on the part of citizens for a vehicle of expression and dialogue with government officials. This can be realized, to a significant extent, through the mechanism of the questionnaire. In fact, the questionnaire prompted letters from people who had never before written to a government official.

One gentleman from Morrisville wrote: "The complexity of government seems to have alienated most of this country's citizens—they no longer feel as if they can make any significant contributions to the process of government," and went on to say he thought the questionnaire realized this objective.

Many of the respondents didn't feel they could adequately express their true sentiments in a simple "yes" or "no," but in order to facilitate tabulation it is necessary to so structure the alternatives. I fully recognize the difficulty of answering complex and far-reaching questions in such a manner since I am often required to do this when I cast my votes on the House floor.

ON THE HORIZON

In recent weeks, Congress has been involved with a number of pieces of legislation I am co-sponsoring and have been actively supporting.

Revenue Sharing—The State and Local Fiscal Assistance Act of 1972, more commonly known as Revenue Sharing, passed the House on June 22nd and the Senate will consider its version on the Senate floor in September where the prospects for passage are very good. Once the Senate acts, the bill would go to conference to iron out any differences.

Under the provisions of both versions, $5.3 billion would be available for 1972 with the remainder of the $29.8 billion to be disbursed over the next four years. According to the House's distribution formulas, Pennsylvania's first year entitlement would be $98.4 million at the state level and $202.5 million for local governments, totalling over $300 million (under the Senate version, Pennsylvania would receive almost $42 million more). All governmental units in Bucks County would receive a total of $7.3 million with the county government receiving $3.3 million, boroughs $1 million and townships almost $3 million. The total amount scheduled for Montgomery County would be $10.3 million, and Lehigh County would be entitled to $4.9 million in the first year.

Revenue Sharing is President Nixon's proposal to provide desperately needed assistance to state and local governments for financing efforts designated by the state and local governments themselves rather than those dictated by the Federal government. Funds to the state are for its unrestricted use while those to local governments are for high-priority objectives in four broad areas—public safety, environmental projects, sanitary protections and public transportation.

The House and Senate versions of the bill contain the fundamental and essential elements of the President's proposal. I am cosponsor of the original Revenue Sharing legislation and have actively supported its passage. In 1971 I headed a Congressional Task Force team on Revenue Sharing which traveled to Richmond and several cities in the Los Angeles area, speaking before civic and business groups and newspaper editorial boards on the merits of Revenue Sharing.

Health—Two bills I am co-sponsoring in the health field—one to establish a National Advisory Commission on Multiple Sclerosis and another to establish a program of treatment and research into Cooley's anemia—passed the House on August 1st.

The purpose of the National Advisory Commission is to determine the most effective means of finding the cause of and cure and treatment for multiple sclerosis. M.s. is a chronic, usually progressive disease of the nervous system, generally striking individuals between the ages of 20 and 40. The paralysis, extreme weakness and shaking of the body which result can cut life expectancy by at least a dozen years. Most of us know someone afflicted with m.s. and appreciate the need for further investigation into some of the promising theories being considered as its causes.

Cooley's anemia is an inherited blood disease affecting approximately 200,000 Americans, mostly children. It is an incurable blood disorder requiring regular and frequent blood transfusions. Characteristics of the disease are poor bone growth, small stature, susceptability to other ailments, fatigue and lack of energy. Its victims seldom live to maturity. The legislation would provide for research projects into the diagnosis, treatment and prevention of the anemia. One of the dozen Cooley's anemia regional chapters is located in Cornwells Heights. A large number of our local residents have been active in leading the attack on the anemia, and I know they must be heartened with this show of Congressional support behind their efforts.

State Department Grievances—A bill I have introduced to establish grievance and appeals procedures for Foreign Service employees has received several days of hearings by a House Foreign Affairs subcommittee.

In testimony I presented to the subcommittee, I noted that, unlike other Federal agencies, the State Department has no formal system of due process through which its employees can appeal arbitrary or unjust actions regarding their employment status. While other Federal employees have such recourse through the Civil Service Commission, Foreign Service personnel do not, and this has caused serious moral problems among State Department employees. Many cases can be cited in which they have had their careers permanently marred by administrative insensitivity and intransigence.

This legislation, I feel, would provide reasonable management practices for a personnel problem which, if left unchanged, will continue to have an adverse impact on the day-to-day execution of our nation's foreign policy. This institution of due process will be in the public interest by creating a stronger climate for free and open debate and challenge, and will in turn promote a well-developed, responsive foreign policy. The Senate has already passed this bill, and I am hopeful the Foreign Affairs Committee will favorably report out the bill for full House consideration.

MAN'S INHUMANITY TO MAN—HOW LONG?

HON. WILLIAM J. SCHERLE

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. SCHERLE. Mr. Speaker, a child asks: "Where is daddy?" A mother asks: "How is my son?" A wife asks: "Is my husband alive or dead?"

Communist North Vietnam is sadistically practicing spiritual and mental genocide on over 1,757 American prisoners of war and their families.

How long?

ARMY HERBICIDE STUDY

HON. LES ASPIN

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. ASPIN. Mr. Speaker, a provocative article appeared in the Washington Post, Sunday August 13, 1972 dealing with a reported U.S. Army study investigating proposed use of herbicidal agents in future conflicts. Despite the abysmal record of defoliants in Vietnam, the Army is apparently making every effort to see that this aspect of warfare will be used in future conventional conflicts. Implications of this development would be profound.

The article follows:

Army Study Asks Use of Herbicides—Sees Defoliants Helping Stop European Invasion

(By Jack Fuller and Tim O'Brien)

A U.S. Army strategic studies group has recommended that herbicides be included in top-secret contingency battle plans ready in case of war in Western Europe, Cuba, Korea, Ethiopia and Venezuela.

Despite its prediction that the controversial chemical defoliants used in the Vietnam war would be of limited effectiveness as a weapon in conventional warfare, the Engineer Strategic Studies Group of the Army's corps of Engineers concluded that defoliation of European forests could help NATO forces slow down an invasion by Warsaw Pact nations.

The group's analysis of possible warfare in Cuba, Ethiopia and Venezuela was based on a counter-insurgency style of fighting, and the conclusion was that in such warfare stripping away heavy vegetation with herbicides can drastically reduce the number of American troops necessary to put down an insurgency.

The group's secret recommendations are reported in a forthcoming issue of Science and Government Report, a private, Washington-based newsletter published by Daniel S. Greenberg. The recommendations are part of a three-volume study of the military effectiveness of herbicides. The volume containing the recommendations is classified secret, and the two others were prepared for official use only.

The five top-secret battle plans analyzed by the study group are part of the Portfolio of General Purpose Force Requirements, code-named SPECTRUM, a compilation of contingency plans which might or might not be invoked in the event of war.

According to Greenberg, the study group examined the impact of defoliation in 106 hypothetical war situations or "scenarios."

One of the scenarios evisions "a deliberate attack by Warsaw Pact forces to seize Western Europe. France is assumed to participate and the NATO forces are logistically supported" over a line extending through France and the Benelux countries. Greenberg quotes the secret report as saying: "This analysis investigates the maneuver of forces between Liege and Mainz and Bonn and Kassel."

These four cities are boundaries for a major corridor through Germany into France, Holland, Belgium and Luxembourg. The corridor was used by German forces in World War II to invade its Western neighbors, and the study group envisions it as a route that might be used by attacking Communist armies.

"Because the effect of herbicides is to expose enemy positions while the defender remains concealed in foliage, herbicides have the effect of creating a prepared position

. . ." the study reportedly says. "The use of herbicides permits NATO forces to prepare successive defensive positions by selecting defoliating areas where the attacking forces must assemble."

Since days and sometimes months are required for defoliants to take full effect, the use of herbicides in defending Western Europe would presumably have to be based on intelligence warnings preceding an actual attack.

The U.S. military presence in Western Europe is generally thought to serve two functions: to assure the Soviet Union that an attack on Europe means the involvement of American forces, aid to help slow down, although not stop, invading Communist troops. Defoliation, presumably, would serve the latter purpose.

The recommendation that defoliation be included in contingency plans for war in Western Europe was based on an analysis of "conventional (linear) warfare."

"In a defensive posture," Volume I of the Army report said, "the effect of herbicides is to increase the days of delay achieved in a sector." Hence, herbicides would contribute to the "trip-wire effect" of American presence in Western Europe.

However, the study did not find that herbicides would allow for much reduction in the manpower necessary to defend a position in a conventional war situation. "In conventional (linear) military conflicts, herbicides (when applied early enough) can yield, at most, localized reductions in force requirements along an entire front and in depth are small," the study said.

In fact, the study concludes that defoliants would be of more value, in terms of troop requirements, to forces attacking Europe than to those defending it: "When the herbicides are used by the attacking force, the estimated impact is a reduction of 3 to 4 per cent of the offensive force requirement for the entire theater. When herbicides are used by the defending force, the force reduction is somewhat less over the entire theater."

According to Greenberg, the secret volume of the Army report also proposed scenarios for using defoliants in a conventional war in Korea.

The recommendation was made despite a finding that about the same number of troops is needed to attack or defend, with or without the aid of defoliants, in a conventional war.

However, the study found herbicides considerably more effective in counter-insurgency situations.

Based on computer and manual simulations of the impact of herbicides on counter-insurgency operations—with special reference to the Ethiopia and Venezula—the study concludes that "in both of the insurgency scenarios, counter-insurgency force requirements are reduced because factor W (average search width of a patrol) is increased when herbicides are used."

More specifically, the study says that "offensive forces in Venezuela are reduced to approximately 40 per cent of the forces required in the original spectrum analysis and offensive forces in Ethiopia are reduced to approximately 35 per cent of those needed without herbicides."

Use of herbicides, the study continues, "would improve visibility in the evergreen forest, shrub and small tree forests (of Korea), and in the sugar cane fields of Cuba."

"The patrol is regarded as the primary offensive element in counter-insurgency," the study says.

"In each of the two specific insurgency scenarios investigated, offensive counter-insurgent forces required to resolve [win] conflicts are reduced by over 50 per cent by using herbicides to reduce foliage. The impact of herbicides on the defensive counter-insurgent forces was not treated quantitatively; but qualitatively; the improved visibility would tend to reduce these [defensive] forces as well."

"The analysis indicated that, under the respective theories of combat, herbicides are a significant aid to military operations in counter-insurgency and of less value in terms of force requirements in conventional (linear) warfare," an unclassified volume of the report said.

The report was careful to point out the limitations of projecting actual troop-level requirements on the basis of simulation theory.

"Nevertheless," the report says, "the results of this study's analysis of the record of herbicide spraying . . . in (Vietnam) . . . tend to confirm the direction if not the degree of the above theoretical estimates for counter-insurgency forces".

A "for official use only" summary of the project concludes that "herbicides produce only two assured military effects." One is increased "horizontal and vertical visibility" where foliage "obstructs liens of sight." The second is that an enemy's crops "can be destroyed in a matter of hours or days at suitable times in their growing cycles."

Even these effects require "special circumstances, the report says—factors relating to enemy determination, his available alternatives, sufficent time to employ defoliants, climatic conditions, and so on.

In a survey of military personnel, including chemical officers, commanders and advisers, the study reports that 518 of them thought herbicides would be required in future conflicts. Only 67 of the surveyed officers said herbicides would not be needed.

But military belief in the need for an arsenal of defoliants is not shared by everyone. Widespread use of herbicides in Vietnam touched off a wave of controversy—partly environmental, partly moral and partly practical.

The military first asked for permission to use herbicides in Vietnam in 1961, according to the report, and their use became most widespread in 1967 and 1968 at a time when the U.S. troop level was also climbing to its highest point.

In April 1970 the most commonly used chemical—Agent Orange—was eliminated. All aerial spraying of herbicides ceased in May 1971. After that, the report says, herbicides were used only to keep down jungle growth surrounding military bases.

In Vietnam defoliation had two aims—to eliminate hiding places used by enemy guerrilla units and thereby make Allied patrolling easier and to destroy rice crops believed to be controlled by the enemy in South Vietnam.

At the same time the use of herbicides was reaching its height public criticism of these military tactics began building up.

In November 1967 two of America's foremost biologists charged that defoliation in Vietnam was both militarily ineffective and extremely dangerous to the long-term health of the Vietnamese environment.

Dr. Arthur Galston, then president of the Botanical Society of America, and Dr. Jean Mayer, Harvard professor of nutrition, charged that the crop destruction tactic had not hurt the Vietcong but rather had caused a food shortage affecting innocent Vietnamese cvilians. They also claimed that defoliation to deprive the enemy of hiding places had little military effect but rather had severely damaged fruit and rubber trees, spinach and bean crops.

In October, 1969, the White House severely restricted the domestic use of Agent Orange as being "potentially dangerous" to humans and in need of further study. The White House move did not affect the military use of Agent Orange.

Early in April, 1970, two associates of consumer advocate Ralph Nader claimed that Agent Orange caused birth defects and demanded that its use be prohibited. At that time the defoliant, which had been developed in the 1940s by Army chemical warfare specialists, was still being used in the U.S. to control weeds along roads in nonagricultural areas.

A little more than a week later the Agriculture Department, which had disputed the Nader associates' charges, imposed drastic restrictions on the domestic use of Agent Orange in the United States. Simultaneously, the Defense Department announced it would stop using Agent Orange and replace it with Agent White in Vietnam.

Some of the critics of herbicides claimed that the Defense Department's move merely replaced one toxic substance with another. The American Association for the Advancement of Science had already asked the Defense Department to stop using the chemicals in Agent White because they could cause birth defects.

Meantime, the Nixon administration struggled with the Senate over the question of whether herbicides were instruments of chemical warfare banned by a Geneva Protocol the administration had submitted for ratification.

The Nixon administration said the protocol's term, "chemical warfare," applied only to chemicals that caused permanent disability or death. Some senators and the Federation of American Scientists sharply criticized that definition's exclusion of herbicides and tear gas.

Last March the administration proposed at the Geneva Disarmament Conference a new ban on chemical warfare which concentrated mostly on chemicals with no civilian use.

The Army study group's report revealed other, secret criticism of the defoliation effort.

Greenberg said the study group wrote that a secret 1967 Rand Corporation report concluded that "it appears that the crop destruction program has little effect on VC consumption. Despite shortcomings of the data and methodology used, the (Rand) analysis indicated the program is ineffective and that the negative effect on the peasant is too severe to continue the program."

Greenberg said the study group also wrote a synopsis of a secret 1969 Air Force report which concluded that "there is no system for comprehensive evaluation of each projection the basis of the result it was supposed to achieve," and also that "the public information program about herbicide operations was never adequate to overcome the resentment associated with the herbicide program."

In 1970 Congress ordered the Defense Department to contract with the National Academy of Sciences (NAS) for a study of the environmental effects of defoliation in Vietnam. The Engineer Strategic Studies Group report was designed as a "counterpart" to the NAS study.

In evaluating the possible use of defoliation in future wars, the Army study group employed highly complicated computer techniques which involve the simulation of various sequences of events, war objectives, terrain and other factors—"scenarios"—under various conditions.

From these computer simulations, programmed to include the effects of a defoliation campaign, and from other, less technical methods of analysis, the Army study group reached its conclusion to propose changes in five SPECTRUM scenarios.

Widespread use of this kind of contingency planning—though at a much higher decision-making level—was revealed in the Pentagon papers, and some Vietnam War critics have claimed that such planning too often ripened into fact without adequate discussion.

The Army study group also compiled and analyzed much data about herbicides' military effect in Vietnam, though it ran no laboratory or field experiments on the chemicals.

Summarizing its finds, the report states: "Herbicides were useful in supporting military operations in RVN (Republic of Vietnam) in selected instances." It recorded the following conclusions:

Herbicides were useful in operations against enemy infiltration routes and base areas, particularly when Allied forces followed up defoliation with observation and surveillance missions. In dense mangrove forests, defoliation made the enemy "unable to maintain an effective force in these areas."

Herbicides helped prevent ambushes near roads and waterways and around military bases.

"At most, the crop destruction program harassed the enemy." It did not succeed in depriving the enemy of much food.

There was evidence that defoliation reduced the number of men needed in some areas.

"The herbicide program in RVN (Republic of Vietnam) has been inexpensive when judged against military systems in general."

The Army study group surveyed military people acquainted with defoliation in Vietnam. The results showed that most believed defoliation helped them in their missions.

The report includes numerous before-and-after photographs of defoliated areas. One set shows how the enemy succeeded in concealing a 100-ton ocean-going ship in the tidewater mangrove forests of the Camau Peninsula at Vietnam's southernmost tip. "By securing trees from the stream banks over the ship," the report states, "the ship's position remained undetected for from several weeks to several months."

INEQUITIES IN THE SOCIAL INSURANCE AND INCOME SUPPLEMENTATION SYSTEM

HON. RICHARD W. MALLARY

OF VERMONT

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. MALLARY. Mr. Speaker, I am very concerned about the thousands of older and disabled citizens who have been denied the benefit of the recent 20 percent increase in social security payments.

Approximately 120,000 citizens receive aid to the aged, blind, and disabled as well as social security. Their AABD payments will be reduced dollar-for-dollar with their increase in social security.

It is estimated that 20,000 veterans receiving pensions for other than service connected disabilities will lose their entire veterans' pensions due to the social security increase.

Past social security increases have usually included, or been followed by, a pass along to these citizens of at least part of the increase, so that they receive an increase in their total income.

Unfortunately, these people receiving Federal assistance based on need, in addition to social security, have been left out by the most recent increase in social security payments.

The speed with which the legislation was considered, and the parliamentary situation at the time prevented Members from taking action to insure that this increase would not adversely affect some citizens.

It is obvious that many reforms in the Federal insurance and retirement programs are needed. I am hopeful that many of the provisions in H.R. 1 will receive favorable action by the Senate. Until these changes can be made through a single measure such as H.R. 1, some changes are needed now to help thousands of needy citizens to counteract the adverse effects of the recent social security increase.

I have introduced two bills to allow recipients of AABD or veterans' pensions as well as social security to retain one-half of their social security increase. The need for this legislation is real.

In this Nation, more than 2 million people receive old age assistance. Of these 2 million, 60 percent also receive social security benefits. In my home State of Vermont, 75 percent of the people receiving old age assistance also receive social security.

None of these people will receive any net benefit whatsoever from the recent 20 percent increase in social security payments. They will lose in their AABD checks, rounded off to the nearest dollar, the amount of the increase in their social security checks.

Some veterans and veterans' widows may even be in a worse position. It is estimated that 20,000 people now receiving pensions will be pushed over the $2,600 income limitation by the increase in social security, and will totally lose their VA checks.

As an example, I discovered that one of my constituents in Burlington, Vt., is a veteran of World War I and is the widow of a World War I veteran. Before the social security increase, she received $2,318 in social security benefits, and $868 in veterans' pensions. With the 20 percent social security increase, her social security income rose to $2,782, and she has received notice from the VA that her veterans pensions will be discontinued. Thus, the social security increase has caused her loss of a net total of $404 per year.

Certainly, no one in the Congress intended to reduce any person's total income by our action, but that is clearly what we did.

Under the bill which I have introduced, H.R. 16371, only half of her social security increase would be counted, so that for VA purposes her total income would be $2,550, and she would be allowed to retain approximately $648 in veterans' pensions. Thus she would receive a net increase of about $244 per year, under the terms of H.R. 16371. This is an increase of nearly 8 percent over her income prior to the social security increase.

Most of the remaining two million recipients of veterans' pensions will notice a marked decrease in their pension checks. In approximate figures, a veteran receiving $1,800 from social security with no other income receives a veteran's pension of $780. With the social security increase, his social security checks would be increased by $360, and his veterans' pension would decrease by $259. Under the terms of H.R. 16371, his pension would be decreased instead by $120. Thus, under this bill, his total income would increase by $240. Even with this improvement, this increase in his total income would be 13 percent—far short of the 20 percent increase passed by the Congress.

When the Social Security Amendments of 1965 increased social security benefits by 7 percent, $5 of this increase was passed along to public assistance recipients. The Social Security Amendments of 1967, which increased social security benefits by 13 percent, increased the pass along to $7.50 per month.

The Tax Reform Act of 1969, which included a 15 percent increase in social security benefits, provided for a $4 pass along. This pass along has been extended, but not increased, despite the enactment of a 10 percent increase in social security benefits in 1971. This heightens the need for a significant pass along of social security increases to public assistance recipients.

Payment schedules for veterans' pensions have also been revised as social security increases have been enacted. As a result of the 1967 Social Security Amendments, income brackets for determining pensions were increased from 3 to 18, and the income limitation was increased by $200.

After the Tax Reform Act of 1969, the income limitation for veterans' pensions was increased by $300. Last November, to counteract the effects of the most recent 10-percent increase in social security benefits, the Congress adopted a formula system to relieve the problems for many veterans, who had a large loss of veterans' pension income caused by a small increase in income. The income limitation was also increased by $300, effective January of 1972.

The need for relief for recipients of veterans' pensions and old-age assistance are at least as serious at this time as those needs were when relief was provided previously.

I am sure that most of us will continue to support major reform of the Federal social insurance and income supplementation programs. Yet it is obvious that there is a great deal of disagreement in the Congress over broad reform proposals.

The two pass along bills which I have introduced, H.R. 16285 and H.R. 16371, are not the ultimate solution to the inequities in the social insurance and income supplementation system. Until major reform can be agreed upon, this limited, specific relief should be enacted.

BILL TO PLUG LOOPHOLE IN TRUTH IN NEGOTIATIONS ACT

HON. LES ASPIN

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. ASPIN. Mr. Speaker, I am introducing legislation today to plug a loophole in the Truth in Negotiations Act. Under present law, individual contractors who refuse to disclose cost and price data can still win a Defense Department contract under a waiver granted by a service Secretary or the Secretary of Defense.

I believe this practice has been overused and abused by the Department of

Defense and the defense contractors. If defense contractors face the choice between losing business or disclosing their cost and price data, they will disclose.

More than $200 million has been granted in contracts in the last 9 years to defense contractors without any knowledge on the part of the Department of Defense about the contractor's actual costs, prices and profits. I believe this loophole should be plugged up. The legislation I am introducing today will amend the Truth in Negotiations Act and prohibit the waivers currently permitted according to that law.

THE ASME CONGRESSIONAL FELLOW

HON. MIKE McCORMACK

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. McCORMACK. Mr. Speaker, I am pleased to announce the opening of the Washington, D.C., offices of the American Society of Mechanical Engineers and the Institute of Electrical & Electronics Engineers, Inc. This is the beginning of a major communications link between the technical community and the Congress. Mr. Bill Miller of the ASME and Mr. Ralph Clark of the IEEE have assured me that they will cooperate with Congress in obtaining information, reports, and technical witnesses on any subject within their respective fields.

In addition, the ASME is taking what I believe to be an important and encouraging step by advertising in their journal for applications for the position of ASME congressional fellow. I cannot think of a better method of encouraging men of science to become involved in the governmental process, while giving the Congress the benefit of their expertise. I would hope that other technical societies will follow their lead.

The advertisement follows:

NEW PROGRAM ANNOUNCED: THE ASME CONGRESSIONAL FELLOW

A program to sponsor ASME Congressional Fellows has recently been authorized by the Executive Committee of the Council. The program calls for ASME to send engineers for a year at the Nation's capitol in Washington and for each to be associated with a congressman or a congressional committee as a resource person. This sponsorship would be shared with the engineer's employer, who would treat the time away from his regular job, in the nature of a sabbatical leave. While the prime purpose of the program would be to assist the legislative process by making technical expertise available, both the individual Fellows and their employers would benefit from the experience. In the long run, the program is seen as a step toward better technical input in the setting of public policy.

The program, patterned on the highly successful experience of the American Political Science Association, has developed from a suggestion which came out during a joint meeting of ASME members with congressional leaders last December. It is a direct response to a number of the ASME goals, particularly the Overriding Goal: "To move vigorously from what is now a society with essentially technical concerns to a society that, while serving the technical interests of its members ever better, is increasingly professional in its outlook, sensitive to the engineer's responsibility to the public's interest, and dedicated to a leadership role in making technology a true servant of man."

The Congressional Fellow would be closely associated with a congressman or committee concerned with legislation on subjects for which an understanding of mechanical engineering is important. He would have available to him the facilities of the office of William P. Miller, ASME's Washington representative, in calling on the resources of the Society.

For the first year ASME will provide up to half of the cost for one man with the understanding that his employer would provide the other half. Facilities of the Congress will make office space and secretarial support available. In taking this action, the Executive Committee of the Council views this one-time cost as seed money, for which reserve funds are available. The action also called for the exploration of other sources for funding in future years.

Members May Apply. The first step for a member of ASME interested in applying for the fellowship available in 1973 would be to establish with his employer the basis under which he could be made available. Applications will be held in confidence and should be directed to Dr. Rogers B. Finch, Executive Director and Secretary, ASME, 345 East 47th Street, New York, N.Y. 10017.

Each application should include:

1. A résumé covering education, engineering experience, and pertinent personal factors.

2. A statement describing the terms of the applicant's leave from his employer. This should state his current salary and the total amount of financial support which the employer would provide.

3. A letter describing the way the applicant views this position and how his experience and abilities qualify him for the post.

Applications will be received up until Nov. 1, 1972, and should cover a period of one year beginning no earlier than Jan. 1, 1973, nor later than Mar. 1, 1973.

NATIONAL AVIATION DAY

HON. CLARENCE J. BROWN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. BROWN of Ohio. Mr. Speaker, tomorrow is celebrated as National Aviation Day, having been so declared by Congress to coincide with Orville Wright's birthday.

Today at Dayton, Ohio, the occasion is being celebrated at an annual Aviation Day luncheon during which the speaker will be Federal Aviation Administrator John H. Shaffer.

Also during the luncheon there will be a presentation of an article written by Fred F. Marshall of Xenia, Ohio, "Wright Brothers of Dayton, Ohio, Solve the Mystery of Winged Flight" which will appear in the winter edition of the Ohioana Library Association Quarterly. Mr. Marshall has been a long-time student of the Wright Brothers and their historic achievements in the development of flight of which the bulk of experimentation and work was carried out at the Huffman Prairie Simms Station experimental flying field which lies east of Dayton in Greene County in the Seventh Congressional District which I represent.

In addition to this article, which I am submitting for publication in the RECORD for the benefit of my colleagues, Mr. Marshall is also author of the book, "The Wright Brothers Chronology" (1903–09), and is the former editor and publisher of the Slipstream, one of the early-day aviation trade journals. Mr. Marshall is also a charter member of the National Aviation Hall of Fame.

The article follows:

WRIGHT BROTHERS OF DAYTON, OHIO, SOLVE MYSTERY OF WINGED FLIGHT

(By Fred F. Marshall)

Since man came upon earth it is apparent that he coveted with child-like and wistful fancy the winged flight of birds.

This insatiable passion to fly is evident in ancient myths and in the stone figures or petroglyphs depicting both humans and animals with wings. Of these there was Pegasus, Media's Dragons, and with the similar forms appearing on ancient Egyptian bas-reliefs.

What school youngster but who is not familiar with the classic legend of Daedalus and his son Icarus who for some unknown reason fled from Greece to the Isle of Crete. Here Daedalus constructed a famous labyrinth for King Minos. Subsequently, Daedalus with his son Icarus were imprisoned in this same labyrinth stronghold. We are told that they saved the feathers from sea birds and eventually fashioned wings for themselves by means of which they soared out over the sea and toward freedom. Daedalus had forewarned Icarus to keep high enough to avoid the dampness of the sea but meanwhile to avoid flying too high lest the heat of the sun melt the wax which held the wing feathers together. But the youthful Icarus, like so many impetuous teenagers of present times, disregarded this latter part of his father's counsel—he zoomed too high, the wax softened, the wing feathers fluttered apart, and Icarus fell into the sea and was drowned.

Amazingly enough, authentic records going back as far as 67 AD indicate that serious experiments were being undertaken in human flight.

And so it was that to the turn of the 20th Century there had been a ceaseless struggle to solve the mystery of flight, and with this impulsive, though futile, outlook persisting through fifty centuries. Though early inventors and scientists seemingly were well on the road to solving some of the basic principles of aerodynamics, they failed repeatedly to make practical application of their findings.

Today the chronology of human flight—from the period of early ballooning experiments, and some years before the era of the Wright Brothers—reveals that many talented scientists were deeply engrossed in the effort to fathom the baffling secrets of flight. Among these notable pioneers we must list Stringfellow, Ader, Lilienthal, Henson, Sir George Caley, A. Penaud and Sir Hiram Maxim.

But now viewed in retrospect, and with the discoveries of the Wright Brothers at hand, their accomplishments cannot be accorded higher distinction than that they present noteworthy milestones in the conquest of human flight.

How utterly improbable, therefore, and how highly tinged with romance it comes about that two unassuming bicycle mechanics of Dayton, Ohio—Orville and Wilbur Wright—go down in history as the first men to fly, and as the inventors of the first engine-driven airplane to get free of the earth and to land safely with its pilot at its controls. This epochal achievement took place a full lifetime ago, December 17, 1903, on the bleak sand dunes of Kitty Hawk along the North Carolina seaboard.

The detail facts of this history-making feat need not be reviewed here in further detail, with the story now being intimate knowledge to peoples, young and old, throughout the world.

How strange, in reassessing the magnitude of the accomplishment and the immensity of its impact upon human advancement, that it was not immediately heralded with universal acclaim! It is also in strange sequence that the sensational aspects of the Kitty Hawk flights did not bring to the Wrights immediate world prominence and affluence.

Actually, only meager bulletin mention was accorded the first Kitty Hawk feat in the press, in the newspapers of Dayton, the home town of the inventors. There is also the fact that despite this day of personal triumph for the Wright boys, and with their three successful flights just before them, it was not to end without sore misfortune if not complete disaster! For, while they stood by in contemplation of their history-making achievement, an errant wind blast caught up their machine and tumbled it over and over leaving it a jumble of wreckage. So, now with Christmas close at hand and with the weather becoming more and more inclement on the bleak dunes, the brothers decided to return home.

First they scribbled off a message to their father, Bishop Milton Wright, back in Dayton, which the nearby life-saving station operator agreed to forward to the telegraph station at Elizabeth City. The message included data on the successful flights and concluded with the word that they would be home for Christmas.

They forthwith crated up their wrecked machine for shipment back to Dayton, boarded up their shop-shack, and engaged a fishing launch to take them and their gear to the Elizabeth City railhead. When they arrived home there was no welcoming fanfare, no delegation of dignitaries, no welcoming party. Shortly they were back in their "West Side" bicycle shop and resuming their customary routine. Nor was there a train of industrial tycoons or of their agents beating a path to their door seeking to acquire an interest in their marvelous flying machine invention. Nor were they promptly visited by foreign agents or notable scientists seeking to learn more intimate facts pertaining to their discoveries.

So with the Wright boys settled back again in their shop they straightway laid plans for building a second flying machine rather than attempt to repair the damaged craft. And, in the process of building the second machine they would employ stronger frame members and supports.

They also set their chief shop mechanic, Charley Taylor, building another engine, hopefully one that would produce more horsepower without much additional weight. Amazingly enough, they accomplished both these projects during the remaining winter months.

There follow now the inexplicable hiatus period, from the years 1904 to 1908, with the Wright Brothers still in the role of virtual unknowns.

Early in 1904 they had made arrangements with a "West Side" banker acquaintance to rent his pasture at Simm's Station, some six miles north of the City of Dayton, for use as an experimental flying field. Here they set up a shed shelter and a launching track for their machine.

Thus, all through the late spring and summer the Wrights were unobtrusively conducting flight experiments. Strangely, Dayton citizenry took little or no note of their flying activities here, nor were they or the world at large cognizant to any degree of the progress the Wrights were making. To point up what would seem utter public indifference toward the Wright flying experiments, let us review briefly a listing of their record flight accomplishments from the years 1904 to 1908.

On September 20, 1904, the first circled flight of record was executed, and then shortly followed "S-shaped courses" and with dives and upward zooms. By the end of that year's flying season they had made two flights of 5-minutes duration!

Then in May, 1905, they perfected a means of placing the pilot in a seated position beside the engine rather than compelling him to take the tiring prone position. Amazingly on September 26, there was a flight of eleven-odd miles in 18 minutes, and the next day a flight of fifteen and a half miles in 19 minutes, followed the next day by a flight of over twenty miles in approximately 24 minutes.

Yet the *Scientific American*, in its issue of December 16, 1905, risked no more than to say that "The only flying machine news worth reporting was the 'box-kite' machine of the Wright Brothers." The entry concluded by saying that ". . . the only successful flying that has been done this year must be credited to the balloon or gas-bag type." At this time the Wrights had flown a total of over 160 miles!

On May 22, 1906, the Wrights finally received a letter patent for their invention of a "Flying Machine."

So, it was not until late 1907 that the Wright Brothers were able to consummate a deal with a Franch syndicate, giving this foreign group the rights to manufacture, sell or license the use of the Wright plane in France, that things appeared to take on a more promising turn.

About the same time (December, 1907), it came about that the U.S. Government became sufficiently impressed with the Wright flying machine that the Ordnance Board, through the Signal Corps, made preparations to issue sealed bids for the purchase of a flying machine after a set of rigid specifications.

Although it had been anticipated that the Wright machine would prove the only one able to meet the specification requirements in the flight tests, there were, surprisingly enough, 41 sealed bids returned. But subsequently most of these were thrown out through lack of the 10 percent bid bond deposit. Then first one and another of the remaining bidders, except the Wright Brothers, chose to eliminate themselves on the promise their bid bond would be returned. Though some further complications arose in light of the single legitimate bid dilemma, means were found to lawfully make award to the Wrights—this on February 8, 1908.

Three weeks later they closed a contract with Lazare Weiller, the wealthy Frenchman, to form the foreign syndicate.

The U.S. Government flight tests would be held at Ft. Myer, Virginia, near Washington. Delivery of the machine to be made August 28, and the acceptance tests to start shortly thereafter in September. But now one of the brothers would have to make demonstrations in France. Neither had flown for months on end, and not much time remained. They could not depend on uncertain wind currents at their Dayton Simms Station test grounds, so would return to the scenes of their initial triumph at Kitty Hawk.

It was decided that Wilbur should conduct the demonstrations in France. Orville would remain at home to get a machine ready and to make the Ft. Myer acceptance flight tests. Wilbur sailed for Europe on May 21. Orville arrived at Ft. Myer in August with two mechanics, Taylor and Furnas.

With the great stretches of open level country about Le Mans in the Sarthe district of France, some 125 miles southeast of Paris, this sector was chosen for Wilbur to stage his flight exhibitions.

Leon Bollee, a popular automobile manufacturer and sports enthusiast, offered Wilbur shop space at his factory, with the Hunaudieres race track grounds selected for the first flight exhibitions being nearby.

An imposing monument now stands in the City of Le Mans in commemoration of the spectacular flight performances conducted by Wilbur Wright in the late summer and autumn of 1908.

Among the teeming, highly emotional throngs who witnessed these flying feats, there were members of the staid, scholarly Aero Club of France as well as high ranking officers of the military. Then, with news spreading of these unprecedented flying performances at Le Mans, there was an influx of foreign scientists, officers of the military staffs, and Royalty. Griffith Brewer, the veteran balloonist, came, as did Charles Rolls of the Rolls Royce auto firm. In September, Wilbur was guest of honor at a dinner in his honor staged in Paris by the Aero Club of Sarthe.

In mid-September, Wilbur received reports of the excellent flight performances that Orville was executing at Fort Myer. Then, on the heels of this, a cable with the horrifying news of the tragic crash of the day before wherein Lieutenant Selfridge, Orville's passenger, was killed and he, Orville, badly injured. But, happily, by late autumn Orville, with his sister Katherine, was able to join Wilbur at Pau, the posh Pyrenees resort where winter flying exhibitions were being continued. Here the Wrights were heralded by the elite of European society and Royalty. They met King Alphonso of Spain, and in the spring of 1909 they met King Edward VII of England, together with Lord Balfour and Lord Northcliffe. There followed plans for the Wrights to stage flights in Rome, where they would train two Italian officers to fly.

The Wrights subsequently went to London to receive gold medals from the Aero Club of the United Kingdom.

The Wrights arrived back in America in early May, 1909. A few weeks later, on June 17 and 18, their hometown of Dayton, Ohio, staged a rousing homecoming for them. It was the greatest celebration in all the city's history. Directly after these ceremonies, the Wrights boarded a train for the nation's Capitol, where they were received at the White House by President William Howard Taft.

In a recent testimonial at the hand of Major Alexander P. de Seversky, notable inventor and member of the Aviation Hall of Fame, he said ". . . the technology started by the Wright Brothers opened the door into space and made possible the exploration of the universe that stretches beyond the gravitation of the earth. The impetus they provided for aerospace research and development has yielded enormous benefits to mankind.

"It resulted in new materials, new technological processes and new industries. It enables us to offer more goods and services to a greater number of people at home and abroad.

"If our youth will emulate the spirit of adventure and perseverance as personified by the Wright Brothers, America's continued greatness is assured."

PROBLEMS OF DRUG USE AMONG SCHOOL-AGE CHILDREN

HON. CLAUDE PEPPER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. PEPPER. Mr. Speaker, members of the Select Committee on Crime recently concluded 3 productive days of hearings on the problem of drug sales and use among school-age children in the Miami area.

These hearings were the second in a series which will take our committee to Chicago, San Francisco and Kansas City in the months ahead to hear from the people what the facts are and what the Federal Government can do to help.

In addition to Miami, we have also held hearings in New York City. We were pleased to note as recently as August 16 that School Chancellor Harvey B. Scribner of New York had taken constructive action recommended by our committee requiring the names of student drug users to be reported to the city's narcotics register where they might receive help.

Following our Miami hearings the school officials there announced a project to begin this September at a cost of $128,000 to determine the extent of drug usage in the schools. It is a first and an important step in recognizing that there is a serious drug problem within our schools.

The news reports referring to these events are placed in the Record at this point:

[From the New York Times, Aug. 16, 1972]

Scribner Says Law Is Forcing Schools To Report Addicts

School Chancellor Harvey B. Scribner said yesterday that city laws had forced a change in policy on reporting the names of student drugs users, and said the rule "may well be inconsistent with current efforts by the schools to fight drug abuse among students."

In a statement "to make clear to the people of New York City" the context in which the new order was given, Dr. Scribner said it was based totally and exclusively on a requirement of law—specifically, the New York City Health Code."

Dr. Scribner gave the order requiring school officials to report the names of student drug users to the city's narcotics register on July 20, after a State Commission of Investigation report criticized the city's schools for refusing to cooperate with the reporting law. The schools had previously only provided summaries of the total number of drug addiction cases discovered among students.

Counselors and drug-education specialists who work in the schools have expressed serious doubts to me that they could successfully obtain the confidence of the students and counsel them away from drugs while also reporting drugs to the central register," Dr. Scribner said in his statement.

The city law, Dr. Scribner continued, "provides no counseling which students need. It provides no drug education, which students need," he said.

Noting the criticism directed against his reporting order by school officials opposed to giving out the names of drug users, the Chancellor concluded:

"I hope that these persons and groups that object to this register report will direct their attention not merely to a school regulation, but primarily to the law which requires the issuing of the regulation."

Mothers Tell House Probers How Dope Killed Their Sons

(By Tom Morganthau)

A sobbing mother opened three days of hearings before the Congressional Committee on Crime and Drug Abuse Wednesday with testimony that her heroin addict son strangled his younger sister while she beat helplessly on her locked bedroom door.

Mrs. Prescola Beneby, of 1100 N.W. 50th St. told members of U.S. Rep. Claude Pepper's House select committee that her son Alvin strangled her daughter Beverly in their home after taking heroin last January.

"There he was, strangling my little daughter," she said, near tears. "He strangled her until I couldn't hear her little voice any more, and she was dead."

Mrs. Beneby, whose son is now a patient at South Florida State Hospital, said he got his introduction to heroin while a student at Miami Jackson Senior High School. She was one of three mothers appearing before the travelling committee to testify on drug abuse in Dade County Schools.

Mrs. Beneby, Mrs. June Mock and Mrs. Shirley Fletcher said that drugs, including heroin, are readily available in junior and senior high schools in Dade. Mrs. Beneby and Mrs. Mock, whose son died of a heroin overdose in 1969, told committee members that school authorities had not notified them that their sons were suspected of drug abuse.

Mrs. Mock, a divorcee mother of three who lives at 1010 NW 147th St., said her son Edward began to use marijuana at Valley High School in Las Vegas, Nev., while living with his father.

When he returned to Dade County to live with her, she said, he obtained drugs at Thomas Jefferson Junior High School.

"My 13-year-old daughter tells me that nearly everyone is on pills or pot at Jefferson," Mrs. Mock said.

She said her son's friends had not been influenced against drug use by his death. "They were upset," she said, "but they considered him a hero. They thought it was a great way to go."

Mrs. Fletcher, whose son Michael died of an overdose of heroin in 1971, told the committee that her son's death was murder.

She said she turned the name of her son's pusher over to police two months before his body was found in the parking lot of Mount Sinai Hospital.

The pusher and a key witness in the trial of two youths later convicted of third degree murder in her son's death were later found dead, also by overdoses of heroin, she said.

"I can only guess that organized crime had a great deal to do with these three deaths," she said.

Committee members also sharply questioned Dr. Marvin Burt, a Washington D. C. researcher who is now evaluating eight Dade County drug rehabilitation programs for County Manager Ray Goode.

Prodded by Reps. Frank Brasco (D., NY.) and Charles Rangel (D., N.Y.), Burt said his research team had asked school administrators to survey Dade students on drug use.

School officials initially agreed to do the survey, he said, then failed to follow through.

Board member Dr. Ben Sheppard, who will testify before the committee Friday, later confirmed that he had been "unofficially" delegated by the board to review the request.

Sheppard said he and a group of school administrators decided against participating in the study because Burt's questionnaire "wasn't worth anything" because no provision was made for checking the truth or falsehood of students' responses.

"The idea seems to be prevalent that the schools haven't done anything," Sheppard said. "That's wrong. This is a large sociological question that can't be answered by 10 congressmen bent for election."

[From the Los Angeles Herald-Examiner, July 7, 1972]

Teen-Ager Tells Panel of Drug and Theft Link

Miami.—Sally Pace, blonde, pretty and 16, told a congressional committee Thursday that 80 per cent of the students in one of south Florida's largest high schools are on drugs and steal to support their habits.

Sally, a former student at Fort Lauderdale's Plantation High, told the U.S. House Select Crime Committee headed by Florida Congressman Claude Pepper that most of her teachers would just let her sleep when she came to school stoned on drugs.

"If you wanted to get stoned at school," she said, "you went to the bathroom or to the parking lot."

Sally and other teen-agers now participating in "The Seed," a Fort Lauderdale drug rehabilitation program for school-age children, were witnesses in the second of three days of hearings on local high schools by Pepper's committee.

Asked by committee members for advice on combatting the school drug problem, the teen-agers said the only thing drug addicts will respond to is "peer pressure," that antidrug programs need vast improvement, and that schools should have authority to force addicts into rehabilitation programs if parents won't.

Larry Pellegrini, who said he began smoking marijuana at the age of 13, told the congressmen he became addicted to heroin and finally turned to armed robbery to support his habit. He estimated he had committed more than 100 crimes.

Pellegrini, 18, said he committed more than a dozen armed robberies and had been arrested at least six times on a variety of charges.

Libby MacDonald testified she and another Florida girl were sent to a 150-student New York boarding school and wound up turning nearly all their classmates to drugs.

"When I got there, there were only a couple of us on dope," Libby said. "Three of us turned on about everyone there during the one year I was there."

"Kids today won't listen to parents, teachers, police or anybody except their peers," said Miss MacDonald. "Peer pressure is the only thing that is going to take the kids off drugs.

"Churches aren't doing any good at all. They provide another recreation place where the kids can sell drugs and get stoned."

[From the Cheyenne (Wyo.) Tribune, July 7, 1972]

Marijuana: Beginning of the End

All those people who wonder whether there's some validity in the argument that marijuana should be legalized because it really isn't any more harmful than liquor, should have read the account of the three mothers who testified before the committee on Crime and Drug Abuse in Miami this week.

The mothers told of their sons' addiction to heroin which began, they testified, with smoking marijuana. The heroin was the end of the road.

One of the mothers told of how her 18-year-old son, high on heroin, locked himself in a room and strangled his five-year-old sister while the mother frantically tried to beat the door down. The son now is in a mental hospital.

The mother of another boy said her son died of a heroin overdose and his body was dumped by two teenagers in a hospital parking lot. A third boy who was to testify at the House hearing also died of a heroin overdose.

Again it has been demonstrated in this hearing that marijuana is but a beginning step in the road to death by hard drugs.

[From the Tampa Times, July 7, 1972]

Committee Hears Drug Addicts' Fathers

Miami.—I thought I was the top expert on drugs in Miami, then I found out my own 15-year-old daughter was hooked on cocaine," said U.S. Commissioner Edward Swann.

"I handled all kinds of drug cases, from customs, the FBI and other agencies. I knew it all.

"But I've been re-educated in the last 90 days," Swann continued. "I knew just this much:" He held up his thumb and forefinger spaced close together.

Swann, father of six children, was testifying before Rep. Claude Pepper's House Select Committee on Crime late yesterday. Pepper, Miami Democrat, and four other congressmen are conducting three days of hearings, ending today, in the Miami area on the problems of drug abuse among school-age children.

Swann told his personal experiences alongside another father, Dr. E. (Jack) Taylor, vice president of student affairs at Fort Lauderdale University, who told of his 19-year-old daughter being rehabilitated after three years as a heroin addict.

Both fathers said they had the means and the drive to "try everything" to straighten out their afflicted children.

"I wasn't a bad parent," said Taylor and Swann nodded agreement that neither was he. Their daughters, they said, had both started with marijuana under pressure to stay in step with their school friends.

When none of the treatments and consultants worked, both wound up forcing their children to enroll in "The Seed," a project in nearby Fort Lauderdale aimed at rehabilitating school-age children hooked on drugs.

Testimony earlier yesterday from four teenage "graduates" of The Seed and from its director, Art Barker, estimated 75 to 80 per cent of junior and senior high students in both public and private schools are using some sort of drugs.

When I put Kathy in the program, she was 15 and had been using drugs for two years," Swann said. "She screamed for her lawyer.

"After two weeks, when we attended one of the meetings, she still tried to con us, whispering 'take me home.' Her mother and I just smiled and whispered back, 'we love you.' The experience will tear your heart out."

"Love" is the big word in the seed program, which teaches the youths 9 to 20 years old to love and respect themselves, their country and their parents and to be honest with everyone, the testimony brought out.

For Swann and Taylor there are happy endings. Both daughters are "straight" now and the families have learned new awareness, attitudes and knowledge about each other, the fathers said.

"When I tell some of my acquaintances, lawyers and professional men, that my daughter was a drug addict," Swann said, "They pat me and say, 'You poor man.'

"Funny thing is, my daughter was shooting drugs with some of their kids.

"We have a brand new beautiful daughter in our home now," Swann declared. "And I don't have to worry about the other children in my home. I have the best CIA agent in the world in my house."

[From the Miami (Fla.) News, July 6, 1972]

"I BEGGED THEM TO HELP MY BOY," TEARFUL MOM SAYS

(By Rick Abrams)

Prescola Beneby pleaded with probation officers for drug rehabilitation for her 18-year-old son, Alvin. He had recently been arrested on a charge of shoplifting—on which profits he supported a heroin habit, his mother said.

"The probation officers told me no—they said they would send him to the stockade," she recalled.

When Alvin was a student at Jackson High, he pumped his first syringe of heroin into his arm, Mrs. Beneby said. Shortly after, he was hooked, she declared—although the youth denied it.

When Alvin was arrested a third time on a shoplifting charge, "I begged the probation officers to send him to a hospital," she said.

Instead, her son was sent to the Dade County Stockade for one month. "I'm sure if he was given help he could have stopped the habit. If only he was given help . . ."

Ten days after leaving the stockade, Alvin, in a drug stupor, locked his five-year-old sister's door, then strangled her, as his mother tried in vain to break in, according to police records.

Through a flood of tears, Prescola Beneby told her story yesterday to the House Select Committee on Crime, holding hearings here on the drug crisis in Dade County schools.

Mrs. Beneby told the Congressional committee she has finally been given the help she so often requested—her son is in the Florida State Hospital.

"The place I asked to get him into—they said no. And so, my daughter had to be killed."

She, along with two others who had lost sons to drug overdoses, was assured by U.S. Rep. Claude Pepper, committee chairman, that "something would be done, to try and prevent these things from happening."

"It's not an easy thing," Mrs. Beneby told the committee. "Even if one person is helped by my testimony . . . even one person."

U.S. DRUG PROBE HERE SPARKS CLASH OVER SCHOOLS

An apparent failure to communicate between the Dade County School Board and a doctor seeking a survey of drug use in schools triggered the dissatisfaction yesterday of a congressional committee investigating the drug crisis in Dade County schools.

The committee of 10 congressmen, led by Rep. Claude Pepper (D., Fla.), heard testimony from Dr. Marvin Burt, who has a $25,000 grant from the county manager's office to compile a survey on heroin addiction here.

When the committee asked Dr. Burt how many addicts there were in local schools, Burt said he didn't know, because the school board had not conducted a survey which he said he had recommended.

However, school board member Phyllis Miller, testified later that "there was never any type of survey asked of us.

"I don't think it's fair to criticize the board for denying the survey when it wasn't even brought to our attention," she said.

Burt's testimony elicited heated response from some committee members, who asked him what good the survey did if it did not include the schools.

Rep. Charles Rangel (D., N.Y.) told Burt: "I'm trying to be objective—it seems that most everyone in this town would be concerned as to the number of school youngsters who are drug addicts . . . It seems to me you're sitting on a powderkeg by denying them recognition."

And Rep. William Keating (Rep., Ohio), told Dr. Burt, "I can't tell what you're doing—and any school board that does not conduct a survey in its schools is really derelict."

However, Mrs. Miller told the committee, that Burt's request for a survey was apparently elicited only at the administrative level.

Burt denied this, saying that the matter was discussed with administrators "and at least one school board official."

Mrs. Miller shook her head, and Ross Stone, in charge of public relations for the board, said the matter had not been up for approval.

The committee, meeting today and tomorrow, is expected to hear from other Dade School Board members tomorrow.

[From the Miami (Fla.) Herald, July 7, 1972]

PEPPER URGES NEW ANTIDRUG PROGRAMS IN SCHOOLS

(By Tom Morganthau)

U.S. Rep. Claude Pepper said Thursday that the Dade County school system should establish broad new programs to identify and rehabilitate student drug users.

"There's no doubt that the schools should have a part in the rehabilitation and recovery of drug abusers," Pepper said, adding that such programs would require new—and unspecified—amounts of state and federal aid.

Pepper made his remarks at the end of two days of hearings on drug use among Dade County secondary school students before his House Select Committee on Crime and Drug Abuse. A third day of hearings, at which School Board member Dr. Ben Sheppard and a group of school administrators are scheduled to testify, will be held today.

"I don't want to pass judgment on the school authorities until we hear from them tomorrow," Pepper said, "But it's pretty clear . . . that adequate recognition has not been given to the problem."

"I'm not blaming the schools for not doing what they don't have the money to do," he said. "But they should be crying on our shoulder about the problem. They should identify the scope of the problem and then go to the Legislature and Congress for funds."

He cited testimony given before the committee on Wednesday that school authorities last year refused a request that they conduct a survey of student drug use.

Dr. Sheppard Wednesday said the schools had declined to administer the study because "it wasn't worth anything."

Pepper's committee, which held similar hearings on drug abuse in New York City schools last week, Wednesday spent over six hours listening to students, parents and staff describe a Broward County drug rehabilitation program, The Seed.

The students—Ann Ryser, 14, Sally Pace, 16, Libby MacDonald, 18, and Larry Pellegrini, 18—told the congressmen that 85 per cent of the high school students they knew used drugs at some time or another.

Three of the four said they had been addicted to heroin prior to entering The Seed program, and Pellegrini said he committed over a dozen armed robberies to support his drug purchases.

Pellegrini, who said he regularly used drugs in school, said few teachers made any attempt to control drug abuse in the classroom.

"The teachers are afraid to say anything because the parents don't want to hear that their kids are on drugs," he said.

"You've got to start cracking down on the schools and make the teachers stand up and do what's right," Miss MacDonald added. "Unless something is done, in five years there won't be any younger generation left—they'll all be dead or in jail."

Other witnesses, however, asserted that school principals thwarted teachers' attempts to control drug abuse by limiting their disciplinary powers.

The committee also heard Criminal Court Judge Al Sepe recommend the creation of involuntary commitment centers for drug rehabilitation.

Sepe said that suspensions from school only compounded the drug abuse problem. "By suspending kids from school, we just give them another holiday and make it easier for them to get involved with drugs," he said. "What we need is involuntary commitment centers . . . where parents can take their children for treatment whether they like it or not."

[From the Tampa (Fla.) Tribune, July 8, 1972]

ACCESSORY TO CRIME

Marijuana, its defenders say, is a nonaddictive drug, no more harmful than beer or whiskey.

But listen to what witnesses told the House subcommittee on crime, headed by Congressman Claude Pepper, in hearings at Miami:

A mother whose 18-year-old son strangled his 5-year-old sister: "He started smoking marijuana when he was 16, in junior high. In two years he was hooked on heroin. He's now in a mental hospital."

The mother of a son who died at 21 of an overdose of heroin: "He started on marijuana, at school."

A 14-year-old girl, now in a rehabilitation program: "I started on marijuana at 11 and went to heroin. I went to school many days stoned. I would steal from stores and cars to get money for drugs."

An 18-year-old youth who testified he had committed more than a hundred crimes, including a dozen armed robberies: "I began smoking pot at 13 and then started shooting heroin. I stole constantly to buy dope."

Two prominent men, one a Federal commissioner, the other a college administrator, who discovered their teen-age daughters were heroin addicts. Both, they said, started smoking marijuana "to stay in step with their school friends" and moved on to hard drugs.

And this statement by the director of the rehabilitation program at Fort Lauderdale: "When I started on this job two years ago, the average age of the junkie coming to me was 20. Now it's 15—with three years of drug experience."

It all adds up to a horror story, in which marijuana, if not a principal in crime, is at least an accessory to the destruction of American youth.

BILL SCOTT REPORTS

HON. WILLIAM LLOYD SCOTT

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. SCOTT. Mr. Speaker, since coming to the Congress, I have sent a regular newsletter to citizens of the Eighth District of Virginia and I am inserting in the RECORD at this point a copy of the August 1972 newsletter:

BILL SCOTT REPORTS

CONGRESSIONAL RECESS

Congress is nearing the end of the present term and will be in recess during the last two weeks in August so that Members will have an opportunity to attend the Republican National Convention in Miami. There was a similar recess in July for the Democratic Convention. It is expected that we will be in session throughout the month of September, but Members are hopeful of adjournment by the first of October. Past experience, however, indicates that adjournment plans are often delayed.

Because we are nearing the end of the session, it might be timely to mention my attendance and voting record during the 6 years I have served in the House of Representatives. According to statistics compiled by the Library of Congress, I was present 93.5% of the time in 1967; 92.7% in 1968; 96% in 1969; 97.8% in 1970; 95.3% in 1971; and 97% so far in 1972. A quorum call or roll call vote often occurs unexpectedly, and a Member may be only a short distance away with constituents and inadvertently fail to be present. Therefore, I am particularly pleased with this record of attendance during the time I have represented you in the Congress.

SPENDING CEILING

The President has recommended and I have co-sponsored legislation that would put a limit of $250 billion on spending for the fiscal year 1973. Frankly, it is much more than I feel we should spend, but our committees are recommending spending at higher levels than the President's budget and oftentimes amendments on the Floor of the House result in additional spending. It is understood that so far this year Federal spending has been authorized at $16 billion over the Administration's budget. Therefore, without some control such as provided by this measure, deficit spending can continue to increase, add to the inflationary spiral, and result in higher prices to consumers.

A CASE IN POINT

A few days ago, the President vetoed the Labor, HEW, and related agencies appropriation bill. It was $1.8 billion above the budget estimate and contained an open ended proposal whereby an additional $3.5 billion could be spent for social services to welfare recipients. Deficit spending and higher prices could jeopardize improving economic conditions, result in damage to individual family budgets and higher taxes. Therefore, I voted to sustain the veto. Hopefully, it will be enacted within a short time in a lower amount with the objectionable features removed.

AMATEUR SLEUTHING

Over the past several months, Members of Congress have been contacted by persons they do not know and oftentimes residents of other states asking to examine the files in a Member's office. These individuals are said to be working under the leadership of Ralph Nader, for the purpose of gauging the effectiveness of the entire Congress and grading the individual members. I understand Mr. Nader has supplemented his regular staff with approximately 800 summer volunteers who are mainly college students. Our staff has been instructed to advise the volunteers that correspondence with constituents is not open to public inspection, but that I would be glad to talk with Mr. Nader if he cares to contact the office for an appointment at a mutually agreeable time. We have also received a 98-page questionnaire which apparently was mailed to each Member of Congress and which I have not answered but filed among our records.

While the office is always open to visits from constituents and others, it seems unreasonable to take time from legislative duties to answer a 98-page questionnaire or to open our files to a self-appointed critic. Constituents often contact their Congressman about personal matters and include statements they would not want to be disclosed to the general public. Nevertheless, the Nader people have reviewed my financial statements filed with the Clerk of the House, contacted former employees and other Members, asking a wide variety of questions. Of course, the general public is entitled to be informed of the activities of their elected representatives and I have recognized this by monthly reports, daily correspondence, and frequent meetings with individuals and groups. Evaluation of Members of Congress can best be made by constituents on election day, and most Members have reservations about the sleuthing being done by Mr. Nader and his associates.

ACADEMY APPOINTMENTS

The Civil Service examination required of all qualified 8th District applicants for nomination to the Army, Navy, Air Force, and Merchant Marine Academies will be held this year on Saturday, September 30. To take the examination, eligible persons should file an application with our office no later than September 10. Those who apply will be notified by letter in advance as to exact time and place of examination. Results of this examination are used as the basis for selection of nominees. Applicants must have attained the age of 17 and not reached their 22nd birthday at the time of admission. Those interested in the Coast Guard Academy are urged to contact the Director of Admissions directly (New London, Conn. 06320) since those appointments are on the basis of an annual nationwide competition without geographic or other quotas.

NATIONAL HEROIN HOTLINE

One of the Federal government's newest tools in the battle against drug abuse is the establishment of a national heroin hotline that will be manned around the clock. Any citizen with information on drug traffic can call 800-368-5363. The hotline is entirely volunteer, and the identity of the caller will be protected if he prefers. Information obtained will be turned over to state and Federal enforcement agencies, including the Bureau of Narcotics and Dangerous Drugs. This new system will permit individual citizens to do their part in our efforts to win the war on this major national problem.

BUSING

For a long period of time there has been a concern over the transportation of children from one neighborhood school to another for the purpose of obtaining racial balance. A Federal court in Richmond, for example, has ordered that school children in the City of Richmond be transported by bus either to Chesterfield or Henrico County and children from the county be transported by bus into the city for the purpose of having the same percentage of black and white children in each school in the city and adjoining counties.

A poll of all of the homes in our District indicate that 91 per cent of the people responding were opposed to this practice. Various bills have been introduced in the Congress to maintain the neighborhood school concept and to prohibit the cross-busing of children. One of them was considered in the House of Representatives a few days ago and passed by a fairly substantial majority even though concern was expressed by some members that the measure would be declared unconstitutional by the courts.

Copies of my remarks on this subject during the consideration of the bill will be forwarded to you upon request. However, the remarks were in favor of preserving the neighborhood school as the best method of obtaining quality education for all of our children. It seems reasonable that families should decide for themselves where they will live, where they will work, and where their children will attend school. This decision appears to me to be a personal one to be decided by each family group. Many amendments were offered on the Floor of the House and most of them strengthened the measure reported by the House Committee on Education and Labor. One of the amendments adopted provided for re-opening of law suits ordering the busing of children such as the city of Richmond, Henrico and Chesterfield Counties. The busing measure passed by a margin of 282 to 102. Nevertheless, I would still like to see a constitutional amendment adopted because in spite of the action taken in the Congress and the strong desire of most people to eliminate busing for racial purposes, the courts could still declare the bill passed by the House to be unconstitutional. Let me also mention that the measure adopted in the House will still have to be passed by the Senate and signed by the President before it becomes law.

FEDERAL JOB INFORMATION

The Civil Service Commission now has toll-free long distance telephone service in Virginia. By dialing 800-582-8171, you can learn of available Federal employment opportunities, including such information as job requirements and qualifications; hiring programs for special groups such as Vietnam veterans or the physically handicapped. Centers serving Virginia are in Norfolk, Richmond, and Washington. However, if you are interested in a particular examination or application form, upon written request our office will attempt to obtain it for you.

APPOINTMENT OF PAGE

Our office was fortunate in obtaining the appointment of a young man from Springfield, Joslin J. C. Neidlinger, as a Page in the House during his summer vacation. We were pleased because only 5 of the House Pages are assigned to Republican Members, and competition is keen when a vacancy occurs. Appointments in the past have been restricted to young men between the ages of 16 and 18 who are in the 11th or 12th grades.

SOMETHING TO PONDER

"The only debt greater than the Federal debt is the one we owe our country."

—Everett Dirksen.

SUBSIDIZING OF PERIODICALS

HON. JOHN H. ROUSSELOT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. ROUSSELOT. Mr. Speaker, recently, the Los Angeles Times published four letters to the editor which relate to subsidizing of periodicals by the Postal Service. Because these letter raise important points that should be considered in the Post Office and Civil Service Committee, of which I am a member, I recommend it to my colleagues for review.

[From the Los Angeles Times, July 12, 1972]

SHOULD LOW POSTAL RATES SUBSIDIZE PERIODICALS?

Perhaps there is more to the second-class postal rates (July 6 editorial, "A Matter of Opinion") than meets the eye.

If enough publications feel the increase squeeze, and it appears many will, they may, as your editorial suggests, have to cease existing. Or will they? Since government now likes to have a hand in everything, it may wish to dash to the rescue by subsidizing the firms involved. While it would probably refer to the action as preventing an economic crisis, it would, in effect, assume a powerful position in the publishing business.

It seems that eventual control of the press by government is its goal anyway. The recent Supreme Court decision, continuous criticism by public officials and gag rules imposed by lower courts all seem to be indications that the First Amendment may someday soon be a joke.

Viewing the rate increase on a long range basis, I can't help but wonder if this is not just another step by the government to someday control everything. I have never thought in terms of my own government being my biggest enemy, but I must admit that it does seem within the realm of possibility.

ROBERT E. HOPPER,
Huntington Beach.

Indignantly Carey McWilliams laments the increase in postal rates for magazines and newspapers. What The Times general proposes editorially has no regard for increased costs, more government employment and of course higher taxes. For the same services and the same employes, the post office would increase its rate to offset general inflation in any case.

Rather than take their lament to Congress to ask for a dole or subsidy for periodicals. The Times might ask for revolutionary economy in the postal service. Half of our post offices might be closed in our wheeled society. Individaul home delivery might be abandoned with street boxes every four blocks. Saturday delivery might be eliminated and delivery made only three days a week to homes.

As a private citizen, I would like to see postal rates reduced back to 3 to 5 cents, but realize I must cheerfully give up something for this.

DAVID G. REYNOLDS,
Whittier.

The Times assertion that it is up to Congress to bring down the postal rates is invalid and only complicates the problem.

The most effective step that can be taken is to sell the U.S. Postal Service and leave the mails up to free enterprise. Efficiency would not only go up several points, but costs could be held down due to competition between several companies.

TOM PALMER,
Huntington Beach.

Dissemination of information and enlightenment of the citizenry by the only means possible at the time were the original justifications for postal subsidies in behalf of periodicals. With today's complete coverage by television, radio, newspapers and magazines can it be argued that continued subsidies benefitting only one medium are desirable?

Does it not follow that all media are important and deserve equal consideration? And what in the way of subsidies is justified to perform the desired function? Does The Times claim that currently popular slick paper pornographic sheets disseminate knowledge and enlighten the public?

Carey McWilliams claims justification for subsidies of all publications because of the good done by a few with limited circulations. Surely there is sufficient private wealth that could be attracted to provide the continued existence of worthwhile publications of all shades of philosophy.

McWililams also states that, since so many other hands are in the public grabbag why not the publishers. It seems to this reader that this is specious reasoning below the dignity of a writer of McWilliams' stature. It also seems to me that The Times has reversed some of its former policies of opposition to indiscriminate subsidies for everything by promoting subsidies for its own industry.

J. C. DAVIS,
Irvine.

HEARINGS ON H.R. 714

HON. ANDREW JACOBS, JR.

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. JACOBS. Mr. Speaker, on September 29, 1971, the Senate Subcommittee on Criminal Laws and Procedures held hearings on S. 2087, the administration-backed proposal to pay a $50,000 gratuity to the survivors of police officers killed in the line of duty. At that time, I testified in opposition to this measure.

Since then, the House Judiciary Committee has taken up consideration of similar legislation, and in May of this year I testified again before the House Judiciary Subcommittee No. 1, this time in support of H.R. 714, legislation which I have introduced in the past three Congresses.

Mr. Speaker, the House of Representatives will be considering this important issue, hopefully in the next few weeks. So that my colleagues may better appreciate the full context of the administration-backed measures and H.R. 714, I insert here my testimony before the Senate Subcommittee on Criminal Laws and Procedures:

TESTIMONY OF CONGRESSMAN ANDREW JACOBS, JR., BEFORE THE SENATE SUBCOMMITTEE ON CRIMINAL LAWS AND PROCEDURES, SENATE COMMITTEE ON THE JUDICIARY

Mr. JACOBS. Mr. Chairman, on August 1, 1969, Senator Bayh and I introduced legislation to extend Federal survivors' benefits to the families of police and firemen killed in the line of duty. The legislation which extends coverage under the Federal Employees' Compensation Act to all public safety officers would provide up to 75% of the deceased officer's base pay to the widow and children until her remarriage and until the children's 18th birthday.

In April of 1968, President Johnson signed Public Law 90–291, which extended coverage under the Federal Employees' Compensation Act to all State and local law enforcement officers who are killed while enforcing a Federal law or while maintaining custody over a Federal prisoner.

It was late in the 90th Congress when Senator Bayh and I introduced our bill; too late, in fact, to solicit Administration support with an eye toward passage in that Congress. So in March, 1969, Senator Bayh and I introduced identical legislation in the 91st Congress. The reaction to our legislation was rapid and gratifying. By mid-summer of 1969 there were 135 co-sponsors in the House of Representatives as well as endorsements from the National Fraternal Order of Police, the International Firefighters' Association [AFL–CIO] and the American Trial Lawyers' Association.

After several phone calls, some prodding, and six months delay, the Administration voiced its opposition to the principle of Federal benefits to the families of slain local public safety officers in an October 8, 1969 letter from Deputy Attorney General Richard Kleindienst to Chairman Celler:

OFFICE OF THE DEPUTY ATTORNEY GENERAL,
Washington, D.C., October 8, 1969.

Hon. EMANUEL CELLER,
Chairman, Committee on the Judiciary, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: This is in response to your request for the views of the Department of Justice on H.R. 7989, a bill "To extend benefits under section 8191 of title 5, United States Code, to law enforcement officers and firemen not employed by the United States who are killed or totally disabled in the line of duty."

Public Law 90–291 (5 U.S.C. 8191–8193) extended the benefits of the Federal Employees Compensation Act (5 U.S.C. 8101 *et seq.*) to eligible State and local law enforcement officers and their survivors. That law defines eligible officers to include a State or local law enforcement officer killed or injured while seeking or attempting to apprehend a person for the commission of a crime against the United States or as a material witness in a criminal proceeding instituted by the United States. Also eligible are law officers protecting a person held for the commission of a crime against the United States or held as a material witness in connection with such a crime. A final category of eligible law enforcement officer is one who, when injured or killed, was attempting to prevent the commission of crime against the United States. In all instances, eligibility for compensation, pursuant to Public Law 91–291 is dependent upon some connection between the death or injury of the law enforcement officer and the enforcement of Federal law.

H.R. 7989, recognizing the valuable service of law enforcement officers and firemen throughout the United States, would amend section 8191 of title 5, United States Code to extend its benefits to professional and volunteer State and local police and firemen; as well as to all other members of legally organized law enforcement agencies. Eligibility for compensation would not be dependent upon any nexus between a injury or death and the performance of a federally connected activity.

The Department of Justice is unable to recommend enactment of this legislation, despite its high regard for those who risk their lives in law enforcement or fire fighting. If the principle of this legislation is sound, it could apply with equal force to retirement benefits and even salaries of public safety officers. In our judgment it is incumbent upon the States and local communities adequately to compensate such personnel when employed, when injured or killed, and when retired. Further, it would appear to be an unreasonable intrusion into State and local government activities for the Federal Government to underwrite the proposed compensation benefits.

The Bureau of the Budget has advised that there is no objection to the submission of this report from the standpoint of the Administration's program.

Sincerely,

RICHARD G. KLEINDIENST,
Deputy Attorney General.

The administration persisted in its opposition to this principle for 20 months, until June 3, 1971:

[From the Washington Post, May 27, 1971]

Nixon, Hoover Discuss Police Deaths

(By Carroll Kilpatrick)

President Nixon summoned Attorney General John N. Mitchell and FBI Director J. Edgar Hoover to his office yesterday to discuss ways in which the federal government can help prevent the slaying of policemen.

White House press secretary Ronald L. Ziegler said after the unexpected meeting that the President feels the recent slayings in New York and Washington were "tragic" and "reprehensible."

"Mr. Nixon will write letters of sympathy to the families of two New York policemen who were shot in the backs last week and of two Washington policemen who died following gunshot wounds suffered in the line of duty, Ziegler said.

The New York policemen killed last week were Waverly M. Jones and Joseph A. Piagnitini. They were shot after having responded to a call for help in a Harlem apartment.

In Washington, William L. Sigmon was killed Tuesday when he attempted to apprehend two robbers of the National Permanent Federal Savings and Loan Assn. office on MacArthur Boulevard NW.

Another policeman, Jerard F. Young, was buried yesterday. He was shot in the head while attempting to make an arrest April 21.

Last November, the President directed the Justice Department "to make available all appropriate investigative resources" to local and state police "when requested in any case involving an assault upon a police officer."

The President said at the time that he had discussed his directive with Hoover and D.C. Police Chief Jerry V. Wilson.

The President "primarily wanted to discuss the scope of the problem and to see what assistance is being provided," Ziegler said yesterday of the late afternoon meeting.

The FBI's main help is in providing laboratory tests and assisting in out-of-state leads on those involved in attacks on police, Ziegler reported.

"The President asked me to express his hope that these tragedies will remind people of the debt we owe policemen for many services, of the protection they so selflessly provide and of the respect and support we owe them for what they do," the press secretary said.

Also attending the meeting in the President's office were John D. Ehrlichman, assistant to the President for domestic affairs, and Egil Krogh, deputy assistant.

Zeigler said that narcotics control also was discussed at the meeting.

The Following Statement Was Delivered Today by Congressman Andy Jacobs (D-Ind.) at a News Conference in the Capitol

In response to the recent tragedies of policemen killed in the line of duty, President Nixon on Wednesday expressed his hope that "these tragedies will remind people of the debt we owe policemen for many services, of the protection they so selflessly provide, and of the respect and support we owe them for what they do."

I share that hope. And I am encouraged to think that the President's concern might indicate that this administration will reconsider its opposition to my three-year effort to enact legislation to compensate the widows and children of police officers and firemen killed in the line of duty.

If it does not reconsider, if it does not withdraw its opposition then one must interpret the true White House message on Wednesday as being, "I can't give you anything but love. . . ."

[From the New York Times, June 4, 1971]

For Slain Policemen's Kin

(By Robert B. Semple, Jr.)

WASHINGTON, June 3.—President Nixon called today for Federal legislation to provide $50,000 to the family of any policeman slain in the line of duty.

At the same time, his Attorney General reiterated the Nixon Administration's opposition to new controls on the sale of handguns.

The new proposal was announced by Attorney General John N. Mitchell at a White House briefing following a morning meeting between the President, nearly two dozen chiefs of police and sheriffs from around the country, Mr. Mitchell, J. Edgar Hoover and several Senators and Congressmen.

The meeting had been called to discuss recent police slayings, to demonstrate the Administration's concern and to unveil the new proposal. By the end of the day, however, the Administration had found itself caught up in new controversies over the motives behind its concern, its stand on gun control legislation and even the composition of the meeting.

Among the prominent absentees were two critics of some aspects of the Administration's policy—Police Commissioner Patrick V. Murphy of New York and Quinn Tamm, executive director of the International Association of Chiefs of Police.

Without going into detail, Mr. Mitchell said that legislation providing a lump sum of $50,000 to the survivors of slain policemen would be forwarded to Congress soon "in further indication" of the Administration's support of law enforcement officers across the country. He said that benefit levels for slain policemen varied widely from state to state and were in some cases insufficient.

The proposal was denounced by Representative Andrew Jacobs, Jr., Democrat of Indiana. He submitted legislation in 1968 that would amend the Federal Employee Compensation Act to provide the widow of a policeman slain in the line of duty 40 per cent of her husband's salary plus 15 per cent per child up to a total of 75 per cent of the total salary.

Asserting that his version would provide larger annuities, Mr. Jacobs said that the Administration submitted an opinion in October, 1969, opposing his measure as "an unreasonable intrusion into state and local government activities." The fact that the Administration had reversed itself on the question of "intrusion," Mr. Jacobs said, suggested that it wished to gain political profit from the concern generated by the recent shootings.

Mr. Chairman, nearly 200 police officers lost their lives in the line of duty and over 50,000 assaults were made against police officers while the Administration opposed this legislation.

There are several salient features which distinguish and favor the Bayh-Jacobs legislation over that of the Administration.

(A) S. 1081/H.R. 714 will grant benefits more closely related to need by basing the annuity in part upon the number of dependents.

(B) The Administration machinery for the implementation of S. 1081/H.R. 714 is extant. In moving the consideration of the Conference Report of what became Public Law 90–291, the Chairman of this subcommittee commended placing the Administrative function of that similar legislation in the Department of Labor, to insure that a disparity did not exist between benefits received by a Federal officer and a non-Federal officer killed enforcing a Federal law. I suggest we should not allow a difference between two non-Federal officers, one of whom dies enforcing a Federal law while the other dies enforcing a State law, but both protecting American lives and property.

(C) S. 1081/H.R. 714 include benefits for permanently disabled public safety officers. The Administration proposal does not. Once more, Mr. Chairman, we are faced with a potential disparity. If a local law enforcement officer is disabled by a car thief from across the State line, he will receive Federal benefits. If the automobile was stolen in the State, the benefits will not accrue to him. It would be shameful if a totally disabled policeman under such circumstances were to wish for the sake of his family that he were dead.

It is well to note that of the 105 claims made to date under Public Law 90–291, nearly one-half [47] have been for disability. 100 police officers are assaulted every day. Some of these assaults result in no more than a bruise, others in total paralysis. Equity requires benefits for disability as well as death.

(D) S. 1031/H.R. 714 provide for the inclusion of firemen in the Federal Employees' Compensation Act. The Administration-backed proposal does not.

In 1970, 115 paid firefighters lost their lives in the line of duty and 38,683 were injured, 195 in civil disorders and an additional 113 as a result of individual acts of violence. 208 firefighters were injured answering and returning from false alarms. 320 firefighters were injured in the line of duty in 1970 to the extent that they had to leave firefighting. 224 left because of occupational disease disability, while another 235 died of occupational disease. Mr. Chairman, according to the F.B.I. statistics for 1970, nearly 10,000 arrests were made for the crime of arson. Though precise figures are not available, all indications point to the probability that deaths and injuries in the line of duty are as high, if not higher, for volunteer firemen. For the purposes of this legislation, amendment should be made to consider volunteer firemen as having a certain GS rating, as is currently mandated for volunteers in VISTA and the Peace Corps who are killed under certain circumstances.

(E) Comparison of the financial benefits which would be paid under the two major proposals for Federal benefits indicate that the annuity method is preferable to the gratuity method. The International Firefighters Association and the National Fraternal Order of Police have indicated that they would rather see their families receive a monthly annuity check than a lump sum which might well have a tendency to evaporate rather quickly. Even if the $50,000 gratuity were invested in 6% bonds, the yield would be only $3,000 a year, a figure which does not approach 75% of the base salary of most public safety officers—nor, for that matter, does it even reach the poverty level of $3,944 a year.

Senator Bayh and I—and, I trust, this Committee and the rest of Congress and most of the country—think the families of those who fall in the fight to make us safe deserve better than that.

THE WONDERS OF A CONSTITUTIONAL GOVERNMENT

HON. WILLIAM S. MOORHEAD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. MOORHEAD. Mr. Speaker, the Sidney Hillman Foundation gave one of its awards for community service to Neil Sheehan, of the New York Times, for his work in exposing the so-called Pentagon papers.

In his remarks to the assemblage, Sheehan reminded them of certain truths about our constitutional form of government that we should never forget.

I would like to introduce Mr. Sheehan's remarks into the Record at this time.

Lessons From the Pentagon Papers

(By Neil Sheehan)

I have a friend, Brendan Gill, the drama critic for *The New Yorker Magazine,* who says that no good deed goes unpunished.

You gave me an award and you invited Robert Coles to give the main address here today. Mr. Coles injured his back and you now have to listen to a reporter preach. Your charity, ladies and gentlemen, has been justly punished. You should take a lesson from the majority of the trustees of Columbia University who yesterday managed to do a good deed and disassociate themselves from it at the same time.

Since you have given me an award for my work on the Pentagon Papers, I shall do my preaching by first drawing some lessons from that archive of American involvement in Indochina over the last three decades. One of the values of the Pentagon Papers is that they provide us with a vast body of facts through which we can see how our government really functions in contrast to how we imagined it to function. There are two central lessons to be drawn from the Papers, as I see them.

The first lesson is that the constitutional system of checks and balances in government envisioned by the Founding Fathers of our country no longer exists in fact. The American Presidency and the state machinery that has grown up under it in the Executive Branch since World War II now far outweighs in power and influence the other two, supposedly counter-balancing branches of government, Congress and the Judiciary. The Executive Branch of our government has become a centralized state in the European sense of the word. The Executive Branch has become the state in America for all intents and purposes.

The second lesson is that the requirements of the Executive Branch to maintain and enlarge our overseas empire has become incompatible with the preservation of our domestic liberties. And I do not use the word empire here in a pejorative sense, but rather in its simplest meaning—to describe the system of overseas dependencies and interests we have acquired in the course of the Cold War.

CITIZEN AND STATE: WHO SERVES WHOM?

What is emerging from the current structure of our government and its constant struggle to maintain this empire is the working concept that the citizen exists to serve the needs of the state. This concept is directly contradictory to the idea that was central to the thinking of the Founding Fathers—that government exists to preserve the liberties of the citizen.

Unless we can find some way to bring the American Presidency and the state machinery of the Executive Branch under control, unless we can find some means to restore a system of checks and balances to our government, unless we can somehow dismantle our overseas empire, we are, I believe, going to see this centralized state gradually turn into an authoritarian state. Unless we can reverse the historical trend that has us in its grip, we are in danger of losing the domestic liberties that have made this country, in the words of Lincoln, "the last best hope of earth."

To some of you I must sound like a Cassandra. You perhaps take comfort in the feeling—I once did—that what is done overseas in the name of America does not fundamentally affect our lives here at home. But I no longer take comfort in that feeling. There is a dynamic that relates foreign and domestic events. They are intertwined in their effects.

Let us take, for one example, the legal battle last summer between the newspapers and the Nixon Administration over the Pentagon Papers. The war in Vietnam led to the compilation of the Pentagon Papers. The compilation of the Papers led to their being published in a series in *The New York Times.* The publication led the Nixon Administration to obtain court orders after the first three articles had appeared, which restrained further publication for 15 days, while the government unsuccessfully fought through the court for a permanent injunction to suppress the material. The First Amendment to the Constitution says that "Congress shall make no law . . . abridging the freedom of speech or of the press. . . ." The language is very simple. The words are: "no law". We also know from the speeches of the Founding Fathers that the First Amendment was specifically designed to prevent restraint of publication, what is known as "prior restraint" in legal parlance, because the English kings used this device to quash political opposition. Yet we had prior restraint in the Pentagon Papers case for the first time since King George.

ROLE OF A FREE PRESS

And what was the main argument that the Solicitor General, the President's chief advocate, relied upon in the Supreme Court? It was not that *The Times* and the other newspapers were breaking the law. The Nixon Administration had initially charged *The Times* with violating the Espionage Act in the Federal District Court here in New York and had been rebuffed. So the Solicitor General argued in the Supreme Court that the publication of the Pentagon Papers would make it difficult for the President to conduct his foreign policy by embarrassing other nations. Therefore, the Solicitor General contended, it was inherent in the power of the President—that is an interesting and ominous phrase, *inherent in the power of the President*—to abridge or to abrogate the right to publication under the First Amendment when the President saw fit. I had always thought that one of the reasons for the existence of the First Amendment was to enable Americans, through the information provided by a free press, to make it as difficult as they liked for a President to conduct his foreign policy. To me that freedom of nonviolent dissent was the miracle of America. And the sole justification for the existence of a free press, if it is to overcome its inherent evil of abuse with the greater good of preserving creative dissent, lies in the right to publish. But the right to publish clearly conflicts with the need the Executive Branch perceives to conduct a war that is unpopular at home yet necessary to its preservation of empire abroad.

Let me give you other examples of this interrelationship between foreign and domestic events.

The decision to go to war in Vietnam leads to inflation at home. The Executive Branch does not stop the war. The war must go on. Instead, the Executive Branch imposes price controls.

Conscripting the sons of the middle class to fight a war of empire, discredits the draft. The Executive Branch then moves towards the creation of what is officially called a volunteer army. The volunteer army, as it is now envisioned by the Pentagon, would not be the small professional force that much of the citizenry associates with that description. Instead, if it materializes, it will be a large standing mercenary army that will constitute a grave potential threat to our freedom.

SUPPRESSING DISSENT

Opposition to the war creates dissent, some of it extreme. Again, the Executive Branch does not stop the war. Rather, it seeks greater ability to suppress dissent, this time through unlimited electronic surveillance. We find the Solicitor General in the Supreme Court once more, arguing that inherent in the power of the President—again that phrase, *inherent in the power of the President*—is the authority to delegate to the Attorney General the power to tap anyone's telephone or bug anyone's home or office or automobile or whatnot whenever the Attorney General decides that the national security might be endangered.

Not only is a court warrant for such surveillance unnecessary, given this inherent power of the President, the Solicitor General argues, but permission should not be sought from judges because they lack the necessary expertise to decide when matters of national security are involved. In other words, the state is restrained by no law in poking into the privacy of the citizen whenever the leaders of the state decide that something called national security is involved.

These signs and arguments of authoritarianism are not the result of any one political party or President. The Pentagon Papers show them developing over a succession of administrations by both major parties. They are the evidence of an Executive Branch that has grown to the point where it now exists more to serve itself than to serve the Republic, and which defines its good as the national good.

GOVERNING BY DECEPTION

The power manager at the top of the machinery sees the world outside the Executive Branch—Congress, the news media, the public, other nations, international opinion in general—as permanent adversaries. They are, to borrow the language of the policy documents in the Pentagon Papers, audiences to be influenced and targets to be moved in a given direction. The credibility gap did not open because horse-trading was part of President Johnson's Texas heritage . . . and it does not persist because President Nixon likes to reserve his confidences for Bebe Rebezo. The credibility gap exists because deception—news management, if you wish to use a polite term—is an essential element in the way the Executive Branch does business. The Executive Branch views information as a tool to further policy, not as a means to inform the public. The greatest evidence I can give you of the effectiveness of secrecy and deception as it is practiced by the Executive Branch is the Indochina War itself. We now know from the Pentagon Papers that the Indochina War was not an accident, it was not a quagmire into which the United States stumbled. Rather, the war resulted from a series of decisions deliberately taken, almost always in secret, by a small group of men at the top of the

Executive Branch of our government through a succession of administrations.

The Constitution says that Congress shall have the power to declare war. One of the prominent evils of the Eighteenth Century world in which the Founding Fathers lived was the prerogative of the European despots and their cabinets to make war. A small group of men set in motion a series of events that affected the lives and fortunes of nations. The Founding Fathers wanted to bar this evil from the American system of government. Before this country embarked upon war, that gravest of human acts, the Founding Fathers wanted the decision to be subjected to lengthy and searching debate by the representatives of the people.

TO WAR: WHO DECIDES?

This country might go to war for the wrong reasons. It might go to war unjustly, as we undoubtedly have, in some of our wars, but the decision to go to war would be made by the representatives of the people.

No such debate took place in the case of the Vietnam War. Congress and the people were ignored of most of the important decisions that committed them to war. The most egregious instance of secrecy and deception occurred during the Tonkin Gulf crisis of August, 1964, when the Johnson Administration tricked Congress into passing the Tonkin Gulf Resolution, a blank declaration of war which the Executive Branch wanted in order to launch open hostilities when it saw fit. Mr. Johnson and his senior foreign policy officials deliberately withheld from Congress and the public, information demonstrating that the President and his advisors may well have provoked intentionally or unintentionally the very attacks on our destroyers in the Gulf of Tonkin which they exploited to drive the resolution through Congress in a moment of patriotic fervor. Even that patriotic fervor we also now know was manipulated by the efficient news management.

Through these decisions taken in secret, the Executive Branch of the Government of the United States has made war in Indochina either indirectly through French or indigenous forces or directly with American troops for most of the past twenty-three years. The conflict has cost the lives of 95,000 members of the French Expeditionary Forces . . . some 55,000 American servicemen so far, and no one knows how many Indochinese; the estimates run from a million to two million men, women and children. A billion to a hundred and fifty billion dollars of the Treasury of the American people has been lavished on this war.

I submit that the power to make war on this scale is power indeed. It is a measure of how much authority the Executive Branch has arrogated to itself. It is a dramatic warning of how gravely the Constitutional processes of our system of government have been distorted and thrown out of balance.

Newspapermen ought to be brief and so I will end here. What I have been trying to say, in sum, is that if we do not find a way to again make the Executive Branch of government our servant, then the Executive Branch is going to make servants of us.

Neil Sheehan, a reporter for The New York Times, was awarded a Sidney Hillman Prize Award for his 1971 series of newspaper articles on the Pentagon Papers. This address was given by Mr. Sheehan in New York City on May 2, 1972, on the occasion of the presentation of the Award.

Sidney Hillman Prize Awards are given in honor of the memory of Sidney Hillman, one of America's greatest labor statesmen and first president of the Amalgamated Clothing Workers of America. Through the Awards program, the Sidney Hillman Foundation seeks to promote the ideals of service in the community that were cherished by Sidney Hillman in his lifetime. Since the initiation of this program in 1950, Sidney Hillman Prize Awards have been given to 113 authors and reporters for books and magazine and newspaper articles, and to script writers and producers of radio and television programs.

THE SOCIAL SERVICES AMENDMENTS OF 1972

HON. ABNER J. MIKVA

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. MIKVA. Mr. Speaker, a great deal of controversy has arisen recently over the lack of a ceiling on appropriations for Federal grants to share the cost of social services provided by the States in areas such as drug abuse control, alcoholic treatment, family counseling, and nutrition services for the elderly.

Various short-range solutions have been proposed to limit the impact on the Federal Treasury, but insufficient attention is being given to the long range need to establish comprehensive social services on a sound footing.

In cooperation with the National Association of Social Workers, I have developed legislation which would provide a long-range approach to the problem.

Under the bill I have introduced today, the Federal Government would fund up to 80 percent of the cost of community social service centers established by the States and local communities to provide a full range or social services to all who need them, regardless of financial need.

Individual and family assistance would be provided in the following areas: personal counseling, adoption, child welfare, homemaking services for the aged, blind and disabled, family planning, foster care, housing, marriage counseling, nutrition, protective services, emergency services, and special services for the blind and disabled.

A full summary of the bill follows:

THE SOCIAL SERVICES AMENDMENTS OF 1972

SUMMARY

This Bill is needed to provide the statutory basis for a public social service system independent of the Public Assistance Cash Payments program. It was designed to solve the increasing controversy over costs of service programs of those in need.

Currently both services and income are interwoven throughout the language of the Social Security Act as amended.

Recently the Department of Health, Education and Welfare has moved to create separation of the services function from the income programs. By regulation and guidelines the Department is requiring states to establish separate administration, program planning and accountability for the state services effort. In addition, the Administration has twice proposed in FY 1971 and 1972 appropriations request that a ceiling be placed on funds available for social services. Under existing Social Security Act provisions the Federal funds are available without limit to match state dollars which increase or decrease as service needs in the state fluctuate.

Clearly the services programs are receiving widespread attention and are undergoing changes. The Bill which is proposed seeks to accomplish that change in an orderly fashion. It would establish a comprehensive, state administered program of social services entirely separate from public assistance. It would create the specificity of definition of services which would make possible accountability and evaluation of effectiveness. It would require a comprehensive study to devise a plan and formula for increased fiscal accountability and restraint in the operation of social services programs. This is needed due to the rising costs of services programs. Yet an arbitrary limit on federal participation in these programs would impose unanticipated hardships on states which have drawn up plans for necessary state and local services.

Accessibility of services is stressed by creation of community multi-service centers which have the responsibility to provide some services directly and to arrange for others.

Consumer participation in planning is required at all levels of policy making.

For those individuals and families of low income all services would be without charge. For those above the established low income level a user charge is established except for a number of basic services which would remain universal and without fee.

The Federal matching is 80% for basic funds to the states. Based on current levels of expenditure ($1.8-billion in FY 1972), the proposed Bill is estimated to require an outlay of $3.8-billion in FY 1973. This increase reflects the increasing acceptance and utilization of service programs by the states and consumers of social services.

Future restraints in funding levels would be based upon a rational study of needs.

DISCUSSION

1. What is the structure of the proposed delivery system?

The social services program will be a state program with Federal financial assistance and standard-setting. The Bill requires the designation or establishment of a single state agency either to administer the program or supervise the administration. The agency designated is to be that agency, if an appropriate one exists, generally recognized in the state as having already a broad range of services—sometimes called an umbrella agency. The reason for this proviso is that the Bill aims to encourage consolidation and coordination of services—an urgent need because services at both state and community levels are usually fragmented and uneven and there are often gaps in types and locale of coverage.

A coordinated continuum of services is encouraged by several means in addition to the required designation or establishment of an umbrella agency to administer or supervise the program. A second means is the granting of Federal funds to finance the planning of coordinated services, research, experiments, and evaluations. A third means is a proviso giving the Secretary, authority to modify plans or requirements for any health, education, welfare, or manpower programs under his direction—including the requirements in this title—if such modifications are needed to achieve a coordinated approach.

Each state is to select local agencies, to administer the program in its political subdivisions. Local officials are to have an opportunity to appeal directly to the state if they are not satisfied with any aspect of state supervision or administration, including state directives, priorities, and interpretations.

2. What services are provided?

The Bill specifically defines all services the program covers. It indicates those the states must provide at the outset and those optional for a time but eventually mandatory. Rather than using general terms like "strengthening family life" or "helping to realize the individual's potentials," the Bill breaks such general services down into hard, visible components. Definitions have been carefully drafted so that the services are broad and comprehensive, although specific. This was done to make sure that there are no gaps in services because authorization is lacking.

Services to be offered are as follows:

Access Services.—Adoption services, Caretaker services, Child Welfare services, Day Care Services for adults, Family Planning services, Foster Care services, Homemaker services, and Information and referral services.

Outreach Services.—Marriage Counseling services, Nutrition services, Protective services for adults, Protective services for children, Self-care services, Services to meet special health needs, Special services for the blind, and Temporary emergency services.

Services are to be provided, in part, through community multi-service centers, to be so located throughout the states that they afford maximum accessibility to the population. Such centers are to provide—as a minimum—information and referral services, temporary emergency services, services to meet special health needs, family planning services, and housing services. The centers may offer "core services," which may be offered either through the centers or other governmental agencies or by grant, contract, purchase, or other arrangements with voluntary agencies. These core services initially are to include information and referral services, adoption services, foster care services, protective services for adults, protective services for children, homemaker services, and special services for the blind. From among the other services the Bill covers, the Secretary from time to time is to select additions to this list, with the objective that by July 1, 1976 all the services will be provided throughout each state. States may initiate on a less-than-statewide basis services they select among the non-required services.

Staff for carrying out the services will have a wide range of skills and educational qualifications. They should include neighborhood workers, new career personnel (low income neighborhood people trained and employed to provide social services), professional social workers, and members of other professional groups. The social services program is to be coordinated, not only with public welfare agencies, but also with vocational rehabilitation, health, and education agencies, as well as all types of voluntary agencies. In addition, plans are to be coordinated with area and community economic development agencies, such as regional authorities interested in broad planning.

3. Who is eligible for services?

The Bill is based on the assumption that public social services should be made available as rapidly as possible throughout each state to all persons requesting them. In moving beyond minimum core services, states may set up a system of priorities for the services they will provide, but they must emphasize the needs of low income people. In addition, states must put into effect methods prescribed by the Secretary to make sure that they bring to the attention of the needy the services presumably available to all in the community. There is to be no charge for services rendered to persons of low income, and above the income line a user's fee is charged on a scale established by the Secretary.

4. Is consumer involvement in policy and planning provided for?

The Bill includes several provisos assuring community involvement in administering and evaluating the program. It establishes a National Advisory Council on Individual and Family Services, to be composed of members representing various geographic sections of the country and including beneficiaries of the services. This council is to have authority to advise and make recommendations to the Secretary regarding major policies, scope, objectives, and operation of the program. There are to be parallel state councils with similar authority.

There is ample provision for program analysis and evaluation, both by the Federal agency and by the states, independently of the Federal Government and in conjunction with it. Results of evaluations are to be made available to the national council and the Secretary's annual report on this program is to include the national council's comments on program evaluation studies.

5. How is the program financed?

The states pay the costs for provision of services, administration, and training and the basic percentage of Federal funds paid to the states toward these costs is 80 per cent. There is special funding, with the percentage of Federal funds going up to 100 per cent, to finance projects having specific objectives. The Secretary will have some money to finance training, research, and experiments. He can use a variety of means, including grants to states and contracts with public and private nonprofit organizations. The Secretary will have another fund from which he can make grants to states to facilitate the provision of coordinated, comprehensive services. Grants can also be made for new career programs. In addition, the Bill includes an amendment to Title II of the Social Security Act, authorizing the transfer of up to $50-million a year from the Social Security Trust Fund to finance the cost of protective services for aged, blind, and disabled adult beneficiaries and child beneficiaries of social security when such services are essential to individuals for the effective use of their social security benefits. This money is to be transferred by the Secretary to the state and local agencies providing the needed protective services. Currently, such urgently needed services are either not provided or are provided irregularly and undependably by public or voluntary agencies.

HOUSING PROGRESS IN PITTSBURGH

HON. WILLIAM S. MOORHEAD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. MOORHEAD. Mr. Speaker, with the recent announcement in Pittsburgh of a plan to construct 500 private homes and a new high rise apartment building for low-income residents, our city has taken a giant step forward in answering the housing needs of its neediest citizens.

Planned on a site that has been the location of a long-time public housing project, complete with all the inherent problems of same, the new project in the Glen Hazel section of town offers hope for homeownership and pride that traditional public housing never contained.

I would like to introduce an editorial from the Pittsburgh Post-Gazette discussing this new project in Pittsburgh.

The editorial follows:

GLEN HAZEL PLANS EXCITING

If innovative housing answers are the key to saving the big cities, then the New Glen Hazel project just announced is momentous beyond just Pittsburgh.

For the new program to transform this 30-year-old public housing area in the Hazelwood district on the Mon into a mixed private and public development seeks to use the many costly lessons learned in recent decades to come up with solid answers.

Specifically, two developments totaling nearly $13 million have been approved by the Housing Authority of the City of Pittsburgh. One is a $10 million private 500-home development with homes for rent or sale, and in which public housing residents would have the option to rent or buy on the same basis as private renters and purchasers. Of this, 305 units will be private, and 195 for public tenants. The other development would be an eight-story high rise for the elderly, costing $2.7 million.

But those bare statistics don't really tell the story. For the Glen Hazel project, the first of its kind in the nation, has components and implications far beyond these aspects.

It represents one of the last major tracts of land available for housing development within the city limits of Pittsburgh. In a land-short community here is the opportunity to build a "new town within town" of the sort being talked elsewhere as the answer in aging urban areas.

Second, the Glen Hazel project is being planned to overcome many of the problems which have plagued public housing projects. It will have a scattered site arrangement, mixing various income levels, rather than the "fortress" type public housing arrangements which have proved so unworkable.

Low income persons will be able to choose homes befitting their family circumstances and have their rent subsidized, living without stigma among their neighbors. They will have an option to buy.

The beauty of this mixed arrangement is that it will enable the sons and daughters to go on to college and upgrade their employability . . . and still be able to return to live in the same neighborhood as their relatives and friends. A great thrust of public education in our country is to open opportunities for the deprived. It has worked (many college graduates have come out of Glen Hazel, for instance). But it also has had a self-defeating aspect. Under the present system, for the children of a public housing family moving up also means moving out, because they are barred by income restrictions from returning to the place where they grew up . . . a disincentive if ever there was one.

Public officials and private architects and builders working on the project also have utilized many new ideas about social and recreational services for such neighborhoods.

Two aspects auger well for the project, aside from its innovations. One is that present tenants of the area—who have waited many long years in steadily deteriorating World War II barracks-type housing—have been involved deeply in the process. The other is that from City Hall down all agencies involved have become excited about the job, making the commitments (streets, sewers, utilities) necessary for success.

Utopia isn't around the corner. But we wish the Glen Hazel project well, for much rides on it. It well could be the most significant experiment in national terms to come out of Pittsburgh since the downtown Renaissance.

EARTH RESOURCES SATELLITE—ERTS-1

HON. LAWRENCE COUGHLIN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. COUGHLIN. Mr. Speaker, on July 23, 1972, NASA launched this Nation's first earth resources satellite, ERTS-1. This spacecraft was designed and constructed by the General Electric Co. in Upper Merion Township, Montgomery County, Pa., in the record time of 2 years from contract initiation to launch.

The successful launch of this spacecraft represents a most significant milestone in our continuing effort to utilize space and space technology "for the benefit of all mankind," and it signals the beginning of a new era of environmental improvement. With the earth resources information gathered by ERTS-1, local, State and Federal agencies can respond to factual data, and not suppositions, fears, or special interest pressures, in taking corrective actions to end the steady undoing of earth's life support systems.

Food crop health and yield can be more efficiently, and continuously, assessed providing man with an information base from which vastly improved planning decisions can be made for better distribution of food for the world's population. An accurate and continuing inventory of our timber resources can be achieved for the first time in history. Water quality data from all over North America can be gathered and evaluated in a few weeks.

Land use and misuse, various kinds of geological and geographic information, and many more facts about our limited life supporting resources can be obtained from ERTS-1, and these are just a few of the objectives of this vitally important spacecraft.

The early imagery being obtained by ERTS-1 is exciting and more informative than the many user agencies and experimenters had expected. NASA has already released many 100-by-100-mile ERTS scenes of these United States which dramatically portray the data return which can be expected from this "milestone" satellite.

Over the past decade, the General Electric Co. has made major contributions to our Nation's space programs. GE men and women in Pennsylvania and in other communities around the Nation have established impressive records for building extremely reliable, long-life space hardware including the highly successful Nimbus weather satellite and major subsystems for spacecraft and space systems widely recognized for exceeding their life and mission expectations.

At a recent earth resources open house held at General Electric's Valley Forge Space Center, I heard GE management describe a companywide best buy program designed to give its customers the best buy in quality, service, and value. For this open house, community leaders and taxpayers were invited as GE Space Division's best customers. Programs like ERTS-1 are indeed the taxpayers' best buy and I believe the American people should be made more aware of the value of these programs which directly benefit us all.

I congratulate NASA's Goddard Space Flight Center, the General Electric Co., and the entire ERTS industry-government team for their outstanding achievement in building this Nation's first earth resources satellite.

NINTH DISTRICT OF NEW JERSEY: LEGISLATIVE REPORT TO SENIOR CITIZENS

HON. HENRY HELSTOSKI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. HELSTOSKI. Mr. Speaker, I include at this point in the RECORD a legislative report which I have prepared for the senior citizens of the Ninth District of New Jersey.

The report follows:

LEGISLATIVE REPORT BY CONGRESSMAN HENRY HELSTOSKI FOR OUR SENIOR CITIZENS

INTRODUCTION

Despite the wage/price controls imposed by the Administration over a year ago, prices continue to soar. Rents, property taxes and food prices especially seem subject to no controls at all. The controls which exist in these areas are wholly inadequate and full of loopholes.

The resulting inflation hits Senior Citizens on fixed incomes the hardest. It is imperative that the Congress act promptly not only to tighten the nation's price controls, but also to relieve the financial crisis afflicting older Americans.

At the end of June, the House of Representatives, with my strong support, and the Senate passed a 20 percent increase in Social Security monthly benefits. This increase, which was reluctantly approved by the President, despite his stated objections, becomes effective this September 1. Having long urged such an increase in Social Security benefits, I was particularly gratified that the Congress at last took the initiative and acted vigorously.

This 20 percent increase augmented 10 percent benefit raises enacted with my full support in early 1971. And, Congress is approaching final action on companion legislation to raise Railroad Retirement benefits by 20 percent. These overdue costs of living increases should go a long way toward relieving the financial burden carried by older Americans. But there is much more which needs to be done.

SOCIAL SECURITY REFORM IN H.R. 1

Last year the House passed a comprehensive Social Security reform plan called H.R. 1. Unfortunately, this legislation has been stalled in the Senate for months, largely because of the controversial welfare reform features added onto the bill in committee. Nevertheless, I hope to see some action on this important bill during this session of Congress.

Under HR 1, Social Security benefits would increase every January in proportion to the increase in the cost of living. In addition, the amount that a beneficiary can earn in a year and still receive full benefits would be automatically increased each time there was a cost of living benefit increase.

Widow's benefits would be increased from 82.5 percent of the husband's retirement benefits to the 100 percent of the retirement benefit the husband would be paid if he were alive.

Finally, the amount that a social security beneficiary can earn and still be paid all of his social security benefits would be increased from $1680 to $2000 a year. Again, this is an improvement over existing law. But I have proposed a bill that would increase allowable income to $3000 a year. This bill, HR 5688, is still awaiting action by the Committee on Ways and Means.

HOUSING ASSISTANCE FOR SENIOR CITIZEN

There is much more that the government should do for our senior citizens. In addition to acting on Social Security benefits increases, the Congress should enact legislation to provide relief to senior citizens, homeowners and apartment dwellers.

I have introduced a bill HR 12609, which would provide an income tax credit or payment of up to $450 for Senior Citizens of limited means to compensate for taxes paid on property they own or rent. In addition to a tax subsidy for homeowners, persons who rent their dwellings would be eligible for an income tax credit or payment amounting to 25 percent of rent paid up to a total of $450. I am hopeful that the Ways and Means Committee will agree to consider this bill as part of its tax reform hearings promised for the near future.

To provide further relief from excessive housing costs and as an alternative to HR 12609, I believe that the federal government should contribute to payments of rent subsidies for elderly persons who have small incomes. Specifically, I have proposed a bill, HR 12608, which would authorize the government to pay the difference between 25 percent of the elderly person's income and his total annual rent, provided that this amount does not exceed $1200. HR 12608, represents significant improvement of existing rent supplement programs. I think this proposal, if adopted, would go a long way toward insuring a decent place to live for all elderly Americans.

THE WHITE HOUSE CONFERENCE ON AGING

One of the most important recommendations of the 1971 White House Conference on Aging was the call for a minimum annual income program for Senior Citizens. While the welfare reform section of HR 1 provides such a program, the annual benefits proposed would not allow older persons of limited income to rise even above the poverty line. The time has come, I believe, to go beyond such half-measures and to insure that all older persons have the right to a decent income.

Other recommendations of the Conference are embodied in my bill, HR 15701, the Older Americans Act Amendments of 1972. Some of its major provisions are:

1. To strengthen the role of the Administration on aging as a focal point of federal concern for our Senior Citizens.
2. To develop a comprehensive system of community-based services for Senior Citizens.
3. To provide emphasis on certain specific areas of concern such as nutrition, transportation and services in connection with specialized housing for the aging.
4. To extend the research, training and national volunteer programs of the Act, and
5. To establish a National Information and Resource Center for the Aging.

A bill embodying these proposals passed the House with my strong support on July 17, 1972 and is now awaiting Senate action.

EMPLOYMENT FOR SENIOR CITIZENS

One of the most shameful situations in our society is that which forces skilled and talented persons to remain idle because they are told that they "are too old to be hired" for regular jobs. I have co-sponsored a bill, HR 3671, which would establish a Senior Citizens Skill and Talent Utilization Program. It would authorize the government to hire and train low income individuals 55 years of age and over so that they could help themselves and make useful contributions to their communities. These persons would be hired to work on local community projects and would be regarded as federal employees.

TRANSPORTATION FOR SENIOR CITIZENS

Transportation within our major cities is a problem that is evident to anyone who has gone to a city as a commuter, a shopper or a tourist. This problem is especially critical for the elderly who cannot always walk from place to place easily. I have therefore proposed H.R. 11259, a bill that would amend the Urban Mass Transportation Act of 1964 to authorize grants and loans to private nonprofit organizations to assist them in providing transportation services, meeting the special needs of elderly persons.

Further dealing with the problem of transportation, I have introduced H.R. 15702, which would prohibit common carriers in interstate commerce from charging elderly people more than half fare for their transportation during non-peak travel periods.

RECREATION FOR SENIOR CITIZENS

I believe that it is very important that Senior Citizens have a means of putting their leisure time to good use. Therefore, I have introduced H.R. 15700, which is a bill to provide financial assistance for the construction and operation of Senior Citizens' Community Centers. I am continuing to urge early consideration of this bill by the Committee on Education and Labor where it is now pending.

HEALTH CARE

Although Medicare has gone a long way toward relieving Senior Citizens of the high cost of health care, there are still a number of reforms which deserve to be enacted. For example, I have introduced H.R. 5679, H.R. 6430, and H.R. 11249, which would, respectively, include the services of Optometrists and Chiropractors as well as prescription drug costs under Medicare. Additionally, I have filed H.R. 10285, which would allow citizens over 65 to deduct from their income taxes the full amount of medical costs. Although several of these measures have received consideration in Committee, the progress of Congress this year makes it seem unlikely that final action will be taken before the 92nd Congress adjourns.

CONCLUSION

It is clear that a great deal remains to be done by the federal government to meet the needs of America's Senior Citizens. Unfortunately, for the past four years, the present Administration has not realistically faced the problems of the nation's elderly. But if we remain indifferent to these problems, we diminish the dreams of all our people.

It is my hope that the Congress will act soon on the reforms I have outlined here so that the government will be able to respond to the needs, hopes and just demands of the people who helped build this country, her Senior Citizens. I would welcome your thoughts an comments on these proposals. For your further information, I am listing all of the bills I have filed in this Congress relating to Senior Citizens. If you wish a copy of any of these measures or should you have suggestions for further proposals, I would be more than happy to hear from you.

H. Res. 158. Creates a Select House Committee on Aging.

HR 2478 Creates a comprehensive system of federally financed national health insurance.

HR 3658 Conquest of Cancer Act. Establishes special, crash program within NIH to seek a cure for cancer. Similar legislation is now public law.

HR 3671 Establishes a Senior Citizens Skill and Talent Utilization Program.

HR 3823 Pension Reform Act. Provides full protection for individuals' contributions to qualified pension plans. Under active consideration in House and Senate.

HR 5679 Provides for payment of optometrists' services under Medicare.

HR 5688 Increases the Social Security outside earnings limitation to $3000.

HR 6430 Authorizes payment for chiropractic services under Medicare.

HR 9567 Authorizes reduced-fare transportation on a space-available basis for persons who are 65 or older.

HR 11249 Amends the Social Security Act to include qualified drugs under the hospital insurance program.

HR 12138 Strengthens and improves the Older Americans Act.

HR 12608 Establishes a Senior Citizens Rent Supplement Program.

HR 12609 Provides a property tax exemption for Senior Citizens.

HR 12610 Establishes a minimum income program for elderly persons.

HR 12728 Provides a 20 percent increase in Social Security benefits (with a $100 Minimum), increases the earnings base to $15,000 for benefit and tax purposes and requires that ⅓ of the revenues required for Social Security programs be contributed by the federal government. Similar legislation is public law.

HR 13811 Establishes an Office for the Aging in the Executive Office of the President.

HR 13933 Liberalizes the eligibility test for receipt of disability benefits.

HR 14626 Provides grants to the States for eye examinations for Senior Citizens.

HR 14839 Enacts the Social Security Reform provisions of HR 1. Passed House.

HR 15700 Authorizes funds for establishment of Senior Citizens Community Centers.

HR 15702 Prohibits common carriers in interstate commerce from charging elderly people more than half fare for the transportation during non-peak periods of travel.

HR 16264 Provides that Social Security or Railroad Retirement payments shall not be regarded as income for purposes of determining eligibility for or amount of a veteran's or widow's pension.

HR 16399 Amends Title II of the Social Security Act to provide for an exchange of credits between the old-age, survivors and disability insurance system and the civil service retirement system. Enables individuals who have some coverage under both systems to obtain maximum benefits based on their combined service.

HR 16400 Provides that State and local taxes paid by individuals shall be allowed as a credit against their liability for federal income tax instead of being allowed as a deduction from their gross income.

HR 16401 Amends the Internal Revenue Code to allow a tax deduction to tenants of houses or apartments for the proportionate share of the taxes and interest paid by landlords.

LAOS FOREIGN EXCHANGE OPERATION FUND

HON. WILLIAM S. MOORHEAD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. MOORHEAD. Mr. Speaker, the Washington Star of August 14, 1972, contained another news article on the U.S. financed Laos Foreign Exchange Operations Fund which should be of serious concern to our colleagues and the public.

Only a short while ago—on August 10, 1972—the House passed H.R. 16029 authorizing $769 million for fiscal year 1973 under the Supporting Assistance provisions of the Foreign Assistance Act. Congress should be made clearly aware that $162 million—21 percent—of this supporting assistance authorization is to be given away to uncontrollable funds as follows:

Laos Foreign Exchange Operations Fund, $20 million;

Cambodia Exchange Support Fund, $17 million;

Vietnam Economic Support Fund, $50 million; and

Vietnam Economic Development Fund, $75 million.

Mr. Speaker, the House Committee on Government Operations called upon our AID officials last year to bring to an end these economic shenanigans in our foreign assistance being provided to the Orient—all to no avail. It is disgraceful that $162 million of the taxpayers' money will be given away with little if any benefit to the poor people it was intended to help.

I again call to the attention of my colleagues inserts in the CONGRESSIONAL RECORD on this subject matter which appear on pages 46605 of Dectmber 13, 1971; 12255 of April 11, 1972; 21211 of June 15, 1972; 21549 of June 20, 1972; and 23759 of June 30, 1972. The Washington Star article by Tammy Arbuckle of August 14, 1972, follows:

DIPLOMATS CHARGE "BIG STEAL" OF LAOTIAN AID FUNDS

(By Tammy Arbuckle)

VIENTIANE.—Diplomats here are hardly critical of the American AID mission and the Lao government for failing to take meaningful steps to halt corruption and mismanagement in the foreign exchange operations fund established to stabilize the Lao economy.

The fund consists of more than $25 million, of which the U.S. contributed more than $16 million.

Diplomats here call the effort "the big steal," and claim the fund almost totally goes to the powerful Lao mandarinate, the Sananikone family, and a handful of Chinese businessmen.

One diplomat described the attitude of the donor nations other than the United States—Britain, France, Australia and Japan—as, "the British treasury feels they need this program like they need a hole in the head, the French and Japanese are squirming to get out of it, and the Australians will follow the British lead."

Diplomats are upset because the fund is for the third time in 10 months running low because they say, of the dollar-hungry Lao elite and Chinese businessmen, and they have no intention apart from the United States of contributing further.

The main complaint about the fund is that it allows the Chinese to import into Laos cheaply by giving them dollars at 600 Lao kip to one, but the merchants do not pass the benefit on to the Lao. Instead, they sell goods at a minimum of 850 Lao kip to the dollar.

There are no price controls effectively enforced by the Lao government because the whole situation is enmeshed in Laos internal politics. The power-hungry Sananikone family is giving the merchants police protection and encouraging them to raise prices at the expense of fellow Laotians, Finance Minister Sisouk Na Champassak says.

Their objective, according to other Laotians, is to eliminate Sisouk as a serious contender for the premiership when Souvanna Phouma steps down, and install as premier their own man, Works Minister Ngon Sananikone. This elimination can be achieved by ruining Sisouk fiscal policies which, of course, is also the U.S. view of how best the aid money should be used.

At the same time, the Sananikone purses become heavier as the leading commercial family in Laos lives off U.S. financial support program, deals with the Chinese and smuggling of luxuries from Laos back into Thailand.

What incenses diplomats most is the failure of U.S. Aid Director Charles Mann to put pressure on Sananikones through the fund Mann reportedly spends his efforts in raising more money for the fund through economic juggling of U.S. AID money instead of cutting it off or increasing the kip-dollar exchange rates, thus soaking up surplus kip and saving the fund's money.

Diplomats assess the U.S. mission as knuckling under to political pressure from the Sananikones, a pressure which is applied by that rightist family by threatening neutralist Souvanna Phouma's position as premier, a position the U.S. judges imperative for Souvanna to retain if there is ever going to be a political accommodation with Lao Communists with honor of some sort.

"The Sananikone has been smelling money and they are not going to let go now," diplomats said. A measure suggested to stop the drain on the U.S. and other donor nations is to stop the fund from allowing the kip-dollar ratio, to rise out of sight, and to put the Sananikone's and the merchants out of business by stopping their high profits. Merchant profiteers would leave Laos and by ceasing to tie the kip to the U.S. dollar, a tie imposed by Americans themselves, price stability could be obtained for ordinary Lao.

Sources note that in certain Lao concerns where proprietors have not felt it necessary to convert their kip profit into dollars, prices remained steady. Soures say much of Lao's imports are unnecessary luxuries which the country only buys because of the U.S. AID policy of soaking up kip with imports in the first place.

The U.S. Embassy fears the Sananikones would retaliate with a coup against Souvanna, but diplomats say the U.S. could prevent this because it pays the army. The Lao budget deficit, which equals the amount of the exchange fund, would be overcome by paring war costs from it and putting them into U.S. military aid, where the money is not stolen, and the U.S. could avoid the blame from ordinary Lao for the cost of living mess.

Diplomatic disgust stems not just from the fact that the FEOF doesn't work, but from revelations of FEOF corruption in the Lao vernacular press.

Vientiane's prestigious Satlao newspaper this week revealed the fund is losing $3,000 per week because government officials are drawing money for holidays abroad, ostensibly for medical treatment by forcing physicians to falsify documents.

Also, the Lao commission which oversees documentation for imports takes 10-percent rakeoff from merchants to process their papers quickly, a tariff which the merchants pass on to the Lao consumer.

ONE STEP CLOSER TO REALIZATION AFTER LONG YEARS OF ARDUOUS EFFORTS A VETERANS HOSPITAL IN SOUTHERN NEW JERSEY

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. ROE. Mr. Speaker, there are 1.2 million veterans in New Jersey and any veteran who has tried to secure medical attention in a veterans' hospital is well aware of the problems of securing admission. It is like a voice crying in the wilderness. There is just not enough room.

At this writing all of us in New Jersey are greatly pleased that the President has signed the fiscal year 1973 appropriations bill for the Department of Housing and Urban Development, Space, Science, Veterans and Other Independent Offices, that I vigorously supported—now known as Public Law 92-383—which appropriates $3.7 million for the construction of a new Veterans' Administration Hospital in southern New Jersey/Philadelphia, Pa. metropolitan region.

The long-fought battle in New Jersey's veterans' interest has been scored with many, many years of effort by veterans organizations and concerned municipal, county and State officials—all seeking Federal action that would permit the construction of a desperately needed Veterans' Administration Hospital in southern New Jersey.

Mr. Speaker, I can speak from firsthand knowledge of these extensive efforts, having personally participated in these endeavors. In my former position in the Governor's cabinet as State commissioner of conservation and economic development having within my department's jurisdiction the State division of veterans services, I have worked with our veterans and veterans' organizations in attempting to secure Federal sanction to locate a veterans hospital in southern New Jersey. On November 8, 1971 I introduced legislation (H.R. 11618) seeking the construction of a Veterans' Administration Hospital in the southern area of New Jersey. This bill, however, was not new to the Congress. In fact, Congressmen from the State of New Jersey in the years before I came to serve in the House had attempted to secure passage of a similar measure.

In addition to the desperate need, there are other significant benefits that can be added to our petition to urge the Veterans' Administration to locate this hospital in southern New Jersey. Governor Cahill has advised me that the State has already undertaken the initial planning work for the establishment of a new medical school of the New Jersey College of Medicine and Dentistry in the south Jersey area which would utilize the proposed Veterans' Administration hospital as well as existing community hospitals for the clinical training of medical students, undergraduate clerkships, intern and residency programs, allied health training and continuing education of physicians. I know from my discussions with prospective students and administrators of medical education facilities in our State that many of our young people in New Jersey have been finding it necessary not only to go out of our State but, in many instances, out of our country to accommodate their needs for an education in medicine because of the sparseness and inadequacy of medical school facilities here in our country to meet the demand and needs of our populace for the education of medical doctors and nurses, medical training programs, and medical care.

The Board of Chosen Freeholders of Camden County has adopted a formal resolution offering 100 acres of land to the Federal Government for a Veterans' Administration hospital at their Lakeland facility near the border of Gloucester County, N.J., which is readily accessible to both Philadelphia and south Jersey via some of the main transportation arteries in this region: the Atlantic City Expressway, Interstate Highway I-295 and the New Jersey Turnpike.

With these built-in advantages of the donation of land, construction of a new neighboring medical school, and the funds to construct a new veterans hospital in southern New Jersey, by accepting this site location in New Jersey, there are indeed overwhelming benefits to be derived by all concerned—our veterans and their families, the Veterans' Administration, and all of the people of our State and Nation.

Mr. Speaker, I would like to take this opportunity to thank you and my colleagues for your support of this appropriations bill and, through this historic journal of Congress, I reach out to my constituents and all of our veterans throughout New Jersey to alert them to this near realization of their efforts. Our battle is almost won and their support with the Veterans' Administration who must now decide on the location of the hospital facility to be constructed with these appropriated funds is of utmost importance.

OMNIBUS HIGHWAY SAFETY ACT OF 1972

HON. RICHARD G. SHOUP

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. SHOUP. Mr. Speaker, I am today announcing my support of Congressman WILLIAM H. HARSHA'S, Republican, of Ohio, Omnibus Highway Safety Act of 1972, House bill H.R. 13538. As many of my colleagues, I have become increasingly distressed over the number of accidents and loss of life, which take place yearly on our Nation's highways. The numbers and cost in Montana alone are enough to give cause for concern. For a 5-year period, the statistics are as follows:

	Reported accidents	Deaths	Economic loss
1967	15,697	319	$57,620,000
1968	16,669	289	57,800,000
1969	17,683	339	69,495,000
1970	15,276	318	69,960,000
1971	18,247	328	82,000,000

Additionally, the death count on Montana highways is 39 ahead of last year's count on the same date, August 8. The figures nationally are equally appalling. Perhaps the most significant statistic is that highway deaths outnumber combat death losses in Vietnam over the period of the war by a factor approaching 10 to 1. It is most important that Congress act now to attempt to alleviate this problem before the Nation's Highways become even more crowded.

Congress has, in past years, attempted to deal with the problem of highway safety. Unfortunately, funds which were to be set aside for safety programs were not sufficient to meet the need. Congressman Harsha's bill, which is cosponsored by all members of the Committee on Public Works, would go a long way toward the promotion of safety on the highways. Through an 11-point program, the bill would provide additional funds for already existing programs while also stimulating the development of new safety concepts. Such stimulation of new programs is definitely needed if we desire to attain any degree of safety upon our national highways.

There is, however, one particular area to which I would draw special attention and that is that portion of the bill calling for spot improvements of high-hazard locations. The problem with this portion of the bill lies in the difficulty which will be encountered in evaluating the off-system locations and justifying requested construction expenditures. One-third of the moneys to be appropriated under this section of the bill are to be spent on projects, not on the Federal-aid system, making this a particularly important problem. Highway departments have had problems in the past justifying projects which are on the Federal-aid system. Problems result from determining exactly what locations are actually hazardous and determining exactly how the hazard could be eliminated as well as anticipating reduction in accidents should a certain improvement be made. Since such difficulty is found in regard to justifying projects which occur on the Federal-aid system in light of the abundance of records kept thereon, the problems faced in trying to justify off-system projects may be impossible to overcome unless the total system of justification was reduced to minimal requirements.

Thus, although I concur generally with the proposals in this bill, I am apprehensive in regard to any specific requirements for off-system expenditures. Yet the bill is one which is desperately needed, particularly in light of the carnage which takes place daily on our highways.

DRUG ABUSE IN OUR SOCIETY

HON. CLAUDE PEPPER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. PEPPER. Mr. Speaker, three seminars on the subject of narcotics and drug abuse were presented over WMWM-Radio in Wilmington, Ohio, some months ago. Panelists included law enforcement officials at all levels, a juvenile judge, a pharmacist, a minister, and students from the local high school.

Mr. Gerald Lee Steese recently sent me a summary of these programs which contains many thoughtful observations on the scope of the drug problem and possible solutions to the crisis.

"The Problem of Drug Abuse in Our Society and Some Suggestions for a Cure or Holding Action for the Problem," is submitted herein with permission of Mr. Steese.

The Problem of Drug Abuse in Our Society and Some Suggestions for a Cure or Holding Action for the Problem

(By Gerald Lee Steese)

(Edited by Susan Steese)

Three seminars on the subject of narcotics and drug abuse were presented over Radio Station WMWM, in Wilmington, Ohio, on three consecutive Sundays in October and November of 1970. The panels included law enforcement officials from state, county, and local levels, ministers, a narcotics parole officer from Dayton, a juvenile judge, a pharmacist, a narcotics expert from the Cincinnati Police Department, and officials and students from the local high school.

The conclusions reached by the panels, and those reached by the author and moderator as a result of further study and research are many and varied. First, current methods of drug abuse prevention, and attempts at education, are simply not working. One main reason for this is that for too long, the question has been handled by our society in the same manner that the subject of sex was handled in past generations.

That is, the subject has been largely glossed over and treated as if it were nonexistent, and those who violated the standards which society had set concerning the subject, were ostracized and treated as if they too did not exist, and in fact, were less than nothing. Any education on the subject in question consisted merely of telling a child that a certain activity was "wrong" and should be strictly avoided.

Parents can no longer afford the luxury of believing that unreasoning, dictatorial decrees and half-truths, or even out-and-out lies, intended as "scare tactics" will carry any weight with the younger generation. Unfortunately, for generations, this has been the only way in which the problem of drug abuse has been handled. Even if a given narcotic, such as heroin, is labeled "bad", this is insufficient cause for most kids for not trying it.

First of all, what is meant by the word "bad"? Second, why, and by whom, was the subject so labeled? We now have, in our teenagers, the most intelligent, curious, and well trained generation ever known on earth, and they are not going to easily accept things at face value.

A program is now being started in the services for the prevention and treatment of drug abuse. I do not believe that this program will work. The services, traditionally, have expected their members to accept everything at face value, on the basis that they should believe, without question or reason, all that they are told by those in authority,

The current group of recruits will not, for the most part, accept this policy. They flatly reject the idea that any one thing is necessarily "right," and another wrong," and must have concrete reasons and explanations for any value judgment that they are expected to accept. In all probability, the only credentials that would be required by the various services for teaching a class on drug abuse would be a general teaching credential or Chaplain's bars, or a certificate of completion from a Service course in instruction.

If a person so qualified goes into a classroom situation, he will very likely meet a problem which extends beyond the scope of the instruction manual. If he is unable to cope with a situation of this type, he will do very little good, and very probably quite a bit of harm in the long run. If the instruction is not credible in the matter of moral judgments or common sense, then that instruction will not be accepted.

To teach a course in narcotics is much different than teaching a course in seamanship or military courtesy; the latter is law, while the subject of narcotics consists, in many areas, of values and morals judgments.

Another matter to be considered by the military and by the Federal programers is the problem of rehabilitation. If a drug abuser is simply dried out and cut loose, he will very probably have to go through the process again, maybe several times. The prevention of recidivism in a drug-oriented youth depends on being able to make a life all over again, to be rehabilitated and then have someplace to go to make a fresh start. This in turn, depends on being able to work, get a job, and be accepted by "straight" society.

The narcotics addict of this decade is in about the same position as the prostitute of another century, or a girl "in trouble" not too many years ago. The only words used in a polite society to describe him or her are "bad", "no good", "irreparable", etc. At this time, the only society which will accept the person who has been on drugs, even if only once, is the drug society. In many places, drug abuse is a felony, and a felon cannot secure much in the way of employment.

As far as the "straight" productive society is concerned, the drug abuser is an outcast, a leper, an untouchable. If the programs which are set up do nothing more than dry out the addict, they have failed miserably.

The Federal Hospitals at Lexington, Kentucky, and Fort Worth, Texas claim a six percent cure rate. This rate is a product of the admission policy, which provides that each admission is recorded as a "first time" admission. In other words, no record is kept of the number of times any one person is re-admitted to the facility. And still their reported cure rate is a low six percent. There may be two reasons for this.

First, the people sent to these two facilities have virtually no choice in the matter. A person must *want* to be helped before any real rehabilitation can take place, as witness Alcoholics Anonymous. Groups such as Synanon and Encounter House work with drug abusers who go there by choice, wanting to be helped, and these groups can claim a sixty-five percent cure rate.

The second reason is that there is nothing for a drug abuser to turn to after he leaves the Federal facility. The addict must be able to rebuild his life before he can stay off drugs, and very often, the same weaknesses which made him dependent on drugs also make him unable to begin a new life without outside help. Government programs, at this time, do not provide this help, and this is what makes it impossible to do an adequate job of rehabilitation.

One of the major obstacles to overcome, in the process of obtaining an adequate rehabilitation program, is the attitude of the society in which the program is attempted. This is probably almost impossible, and a total reversal will most likely never come about, but the efforts of interested individuals can improve the general conditions, and accomplish at least a start at partial, if not total reform.

The "Big Brothers of America" program could provide a part of the pattern for a drug rehabilitation project. Each "Big Brother" deals with one fatherless boy; this individual type handling is also the most effective way to handle a drug abuser. A group cannot so easily work as a group with another group in something of this nature because of the lack of set rules and guidelines.

In the radio seminars, two panel members from Encounter House noted repeatedly that there is no such thing as an ex-addict, just as Alcoholics Anonymous does not believe that there is any such a thing as an ex-alcoholic. For a former abuser of drugs or alcohol, there is always the chance that a slight stress, less than the original stress, will cause them to return to their old habits.

Alcoholics Anonymous has long held, and Encounter House has more recently confirmed, that the best help for drug or alcohol abusers is therapy, and the best therapy is given by those who have encountered and overcome the problem themselves. The best person to straighten out a former drug abuser is a former drug abuser, one who knows the problems being faced, and the best way to overcome them and to find help for the problem which initially caused the user to turn to drugs.

For school and military drug education programs, the most effective job can probably be accomplished by a combination of a former abuser, and an educator who has received special training in drug education. Thus, the educator can give concrete facts on the dangers and effects of drug abuse in the areas of physical and mental health, the ways that the different drugs act, etc., while the former abuser can provide first-hand views and knowledge on the psychological effects of drugs, reasons for not taking them, and the emotional impact of the abuse of drugs.

I believe that three things which an addict needs most are: an authority figure, a feeling of esteem from his peer group, and self-respect. The self-respect cannot come without the group esteem. The type of program which Encounter House provides furnishes a peer group which will put pressure on the individual in the direction in which it wants him to to, i.e., off drugs.

This reinforces the abuser or former abuser in his personal struggle to get off drugs or stay off drugs. A program such as that of Encounter House can also provide an authority in that it can help the abuser in establishing a willingness to accept responsibility and to trust and rely on his own reasoned moral judgments. Authority can also come from law enforcement agencies and from organized religion.

Many former drug abusers turn to the "Jesus Movement" for help in staying off or getting off drugs, as this organization provides them with both an authority figure and an influencing peer group. Thus, the church would be one of the best institutions to help, if they would, the drug oriented youth.

The "Jesus Movement" claims a "get off and stay off" rate of 85%, the highest rate of any drug abuse prevention, control, or education program.

One of the most important aspects of the problem should be the education of children before they begin to take drugs. This can best be accomplished within the family unit, because in the younger children, before they are of school age, the family has the greatest influence.

The average American family of today is far different from that of the turn of the century. There is much more independent movement by the members of the family. Often the mother works, and the younger members of the family unit have a much greater responsibility and personal mobility than any previous, comparable group.

This makes it very urgent that greater emphasis be placed on instilling values and moral guidelines at a young age. No longer can the child be coddled within the bosom of the family until he or she is mentally mature.

How a child is exposed to myriad situations and outlooks at a very early age. Often he is expected to make decisions for which he or she is totally unprepared. Parents must make clear to their children as never before that there are certain standards and guidelines which the society in which they must function and live and are living expects them to follow; that there are many ways of coping with problems that are socially unacceptable.

The children should be given an authority figure and a background upon which they can fall back in times of crisis. Parents should strive to instill within the child a feeling of self-respect and self-confidence, a certainty that he can make the right decisions on his own, and know that they will be right and acceptable.

The child must be informed about the choices that he or she will have to make as he goes through life. He should be given the strength to meet his problems rather than try to escape from them. He must be made to realize that if he uses drugs as a means to escape, the problem will still be there when he comes down, and may be much worse for the fact that he is even less able to cope with it due to his flight into the fantasy of drugs. In short, the problem of drug abuse education is going to take some considerable work on the part of the family.

One great problem is the average American medicine cabinet. This can be one of the greatest advertisements for the value of taking drugs to get out of a tight situation or just to feel better. Children can understand the taking of drugs for a specific medical problem, but if they see their parents taking a pill to pep them up, put them to sleep, keep them awake; pills for stress, pills for activity, pills to lose unnecessary weight or weight unnecessarily, etc.; this will confuse the child as to the true value of and reason for drugs, and give him the idea that pills and drugs are made just to help one cope with the everyday problems.

Children learn best by example. The parents should realize that their children are going to imitate them. To a child's way of thinking, his parents are right, and he is going to follow, but without the knowledge or background of his parents' experience. So parents should overhaul their own attitudes as to the efficacy of overusing or abusing drugs in their own daily lives.

Another essential point is that as long as a society or family keeps saying that no problem exists, then that much longer will they be unable to hear the pleas for help which immediately precede a drug problem right in the home. As was brought out in one of the seminars, "The most lost and most needed art is the art of listening, hearing, and acting on the listening.

"A child may be overloved, underloved, or normally loved, but this makes little or no difference if he has someone who will listen to him when he has a problem and will help him to overcome that problem, or conversely if he has no one to talk to, the problems which start small may become insurmountable or may disappear in a very short time with or without this help." Especially true if that problem is the fact that he has been faced with the decision of taking drugs. As one ancient philosopher once said, "as long as one's mouth is open, one's ears are closed".

The problem can be solved by education, whether by the non-drug addict, the ex-user, the parents, the teacher, but only at a very young age can the child be trained in the matter of drug abuse attitudes. To educate, the truth about each drug must be told, even if that truth does not seem to the teller to be a strong enough case against the abuse or use of the drug.

This younger generation is going to find out the truth, whether you tell them or not. As long as we attempt to educate through lies, those lies will be found out and discounted. One lie will discolor a whole book of truths. The instructor or parent who has attempted to practice this form of deception and his entire organization or peer group will be found out and become useless or worse as a disseminator of information to the youth.

As for the legal aspects, of the problem, for the source, the seller, make the second conviction for selling of illegal drugs, or possession for sale punishable as second-degree murder. For the young, first-time drug abuser, make it possible for him to redeem himself for that first mistake, for which he is now held accountable, often to his personal ruin. Seal the record of his first mistake, and bring it against him only if he, after considerable personal rehabilitation and counseling, fails again.

Those who teach about drug abuse, and the parents, should realize that drugs are different; should tell the youngsters that the effect of one drug is not as bad or as strong as another. They should also quit talking about the "drug problem". It is a problem with heroin, a problem with marijuana, or a problem with a mixture known mostly as "fruit salad".

The effects, and the treatments are different. Referring to the problem as the "drug problem", under one lump heading, is just another method of escape from the total problem, and a putting-off of the use of an effective solution. The problem must be broken down into manageable categories and entities. Individuals must become involved in any program. As pointed out earlier, groups are too bulky to do much good as a group, it will take the involvement of many individuals on an individual basis.

This is the key to a successful program. We must become more interested in solving the problem, preventing its recurrence, than in punishing the person who has made the mistake. I know a young man who made the mistake of experimenting with a drug, but three individuals took an interest in him, and vowed that he would never go that route again. Because of this, that young man is now employed in a good job, and has a much better outlook on life than before. This kind of individual involvement is just what it does and will take to get the job done.

The time is past when a person could feel that he had contributed to the eradication of the drug problem simply because he could say that he personally does not indulge in the abuse of any drug. A person must also help others, and especially, must not condemn. Parents should stand behind their children if the children do become involved in drug abuse. Now, frequently, a child is condemned by his parents on the slightest suspicion. Smoking one joint, or popping one pill may not constitute a habit, but parents should realize that a child can very easily be pushed into a habit by condemnation. Parents must also watch what they themselves use legally. Finally, again, the truth about all drugs must be told, and individuals are going to have to do the work, by getting deeply involved in a problem which can be licked by hard work. Or which, by being ignored, can ruin us.

RAISING OF CHICKENS IS NOT NECESSARILY A PALTRY BUSINESS

HON. WILBUR D. MILLS

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. MILLS of Arkansas. Mr. Speaker, the poultry industry is an important one throughout the Nation and is especially so in my home State. Eliot Janeway, an economic consultant and columnist whose reputation needs no elaboration here, recently devoted a column to one of the leaders in that industry in Arkansas and across the Nation.

I insert in the RECORD at this point the column published in the Chicago Tribune on August 10 under the heading: "Raising of Chickens Is Not Necessarily a Paltry Business." The column follows:

RAISING OF CHICKENS IS NOT NECESSARILY A PALTRY BUSINESS

NEW YORK, August 9.—Chicken feed does not mean big business. But feeding chickens scientifically, efficiently, and economically can grow into big business.

America's poultry raising and marketing revolution of recent years has provided a constructive case history of advanced technology shoring up the traditional social structure of the old institution.

Arkansas' hill country is one of America's poultry producing showcases. Its small farmers had been shut out of America's historic grain and cotton booms. They are being dealt into today's new deal for poultry. Don Tyson, chief executive officer of Springdale-based Tyson Foods, Inc., is one of this new industry's leaders.

JANEWAY. How has the poultry business evolved in this country?

TYSON. It started out as an industry of individual farmers who bore all the risks of fluctuating markets both for the birds they were selling and the feed they were buying. Then the feed dealers and dealer-manufacturers began setting up contractual arrangements with individual farmers under which the dealers would have a sure market for their grain and the farmers would be guaranteed against loss. The next step in this evolution was that the dealer started supplying baby chicks and feed to the farmer and paying him for the birds he raised. The farmer would supply only the tools of his trade and his labor. In most cases, the dealer spread his risk by going into the processing business as well.

JANEWAY. Is this how your operation is set up?

TYSON. Yes. Except that we go one step further; we pay the farmer on a weekly basis while he has birds in his houses, and then a bonus depending on how well he has done. I put it on this basis because I figured that a farmer who has to wait 10 weeks for his pay needs more money than one who gets paid by the week. As it turns out we're one of the main props of the economy in our area and we're helping to perpetuate the small farm in an era when most small farms have become uneconomical.

JANEWAY. Where are you located and where are your markets?

TYSON. Our home base is Springdale, Ark., and our production area is about 2 million birds a week from small farmers in a 25-mile radius area in Northwest Arkansas, half a million a week from an area below Hot Springs and another half million a week from Tennessee. Our markets are from Detroit west. I'd say our number one market is California. Illinois is second and colorado third. We laso have markets in Washington state and Texas. In other words, our production is reasonably close to the Iowa-Illinois grain belt, but is itself in an area where there are no economically feasible land-use alternatives to chicken farming. And our markets are in areas where by doing our own trucking we can capitalize on a freight advantage over our competitors. We have seven manufacturing plants in Arkansas, one in Oklahoma, one in Missouri and two in Tennessee, and we do about $100 million in sales a year.

JANEWAY. What are your products?

TYSON. We have three basic products: chicken meat for the housewife, preweighted and prepackaged; Rock Cornish game hens; and frozen cooked poultry for institutions and restaurants.

JANEWAY. Do you advertise your brand in the supermarkets?

TYSON. We have just started to in the last year. It gives us more opportunities for profit and it cuts the cost of processing for the supermarket chain as well. It seems a natural direction for us to go since we're doing so much of the processilng anyway in order to prevent spoilage.

JANEWAY. Has the higher price of beef affected the price of chicken?

TYSON. No. Not only is chicken selling at 50 per cent below its price 10 years ago but the whole price structure seems to be dominated by the 29 cent special. As beef prices rise the housewife does switch to buying chicken more often so this helps us build volume. The price doesn't go up, however, because the supermarkets use chicken as an everyday low special all over the West. The housewife is so used to this now that she doesn't even bother to stock up when she sees it priced down. It's a loss leader for the stores and for us, but they buy other products from us at markups to cover our losses.

JANEWAY. As food prices rise in general do you see the American consumer cutting back on spending on food?

TYSON. No. I think Americans generally insist on at least maintaining if not improving their food standard of living no matter how much it costs, tho to some extent they switch between high and low cost items or eating out or in to stay within a budget.

JANEWAY. Is there an export market for poultry?

TYSON. It's negligible now. The poultry industry has never been able to hold on to the foreign markets it created. No sooner would we open up a market, in say Germany, than that country would spawn poultry producers of its own and slap tariffs on imports. Five or six years ago we opened up in Japan; now it's starting to produce.

THE SIXTH DISTRICT SPEAKS OUT

HON. WILLIAM G. BRAY

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. BRAY. Mr. Speaker, I am pleased to announce the results of my 1972 public opinion poll. Returns ran upward of 25 percent; this is one of the best responses I have ever had in all the years I have sent out annual polls. As always, a great many letters accompanied the returns. On two questions in particular I had a surprisingly large number of qualifying remarks either in letters or jotted on the margin of the poll cards. These will be discussed further on; the qualifying statements mean the percentages of "Yes" and "No" on these two questions are not quite accurate in and of themselves, even though the percentages givn reflect the tabulation.

Following are the results, in percentages of those who gave a "yes" or "no" answer to each question. Incidentally, the number of those who had "no opinion" on any question or questions was quite low.

	Yes	No
(1) Do you favor busing school children for racial reasons?	4	96
(2) Should draft evaders and military deserters who fled abroad be allowed to return without penalty?	8	92
(3) Do you favor a nationwide, federally-financed child care system?	12	88
(4) Do you favor legalization of marihuana for personal and private use?	10	90
(5) Do you favor total abolition of the draft and reliance solely on an all-volunteer Army?	30	70
(6) Environmental spending is high, and climbing. Federal outlays went up 600 percent between 1969 ($431,000,000) and 1973 ($2,500,000,000 proposed). Private industry will spend $4,900,000,000 this year and must spend another $22,800,000,000 to meet current antipollution regulations. Do you feel this indicates progress?	65	35

BUSING

I did not ask this question on last year's poll but received a very large number of letters and comments concerned with busing. From those who added a comment on busing it totaled up to unanimous opposition, for 1971, to the idea of busing school children for racial reasons. This year I asked it; the return served to confirm last year's sentiments.

The most recent vote on busing was on the Equal Education Opportunities Act, taken last night and in the early morning hours of today. This overwhelming vote against busing, despite constant efforts by social planners to promote busing to achieve a racial balance, demonstrates "democracy in action." The will of the people is having this effect. Congress, at least the House of Representatives, is hearing the people.

Many of us in Congress have, for several years, been attempting to stem this tide of busing pupils hither and yon. The Education and Labor Committee of the House, the committee which must clear such legislation has steadily refused to report a meaningful bill against busing for House action. We have attached amendments to block busing to educational bills but the results have been inconclusive as it is difficult to make a bad bill good by adding amendments.

A bill dealing with higher education, which came up last summer, had some good, strong antibusing amendments attached to it by the House. In some other respects this legislation left much to be desired. Unfortunately, the House's antibusing amendments were badly weakened and distorted in a House-Senate conference, to the point where the bill became, according to one Capitol Hill expert, a "probusing bill." I voted against it.

Finally, antibusing forces have attained at least a temporary victory. Yesterday, Thursday, August 17, 1972, the Equal Education Opportunities Act came before the House of Representatives. It was a fair bill. It banned long-distance busing through the sixth grade. Courts are forbidden from ordering any busing for such students beyond the closest or next closest school to their home. For students in higher grades, busing any farther is only to be used as a last resort.

The House of Representatives, staying in session until well after midnight, added amendment after amendment to this bill to stop busing. This bill passed in the early morning hours of August 18 and went beyond what even the White House had asked. Amendments to the Equal Education Opportunities Act forbid courts from ordering long-distance busing for high school and elementary school students, and also allow reopening of many previously decided court cases where busing had been ordered. I voted "Yes" on both amendments.

An even stronger amendment, which I also supported, would have banned all court-ordered busing for racial purposes; this would have allowed busing only to the closest school. This failed, 211–174. The Senate has not yet acted on this legislation.

What we have here, in these actions by the House, is an example of democracy in action. A large majority of the American people, both black and white, have made it absolutely clear they want an end to busing, for once and for all. Congress must and did act in response to and in accordance with the wishes of the people. It is now up to the Senate to follow the example of the House.

The supporters of busing to achieve integration have borrowed trouble and thrust upon the rest of us things we neither desire nor need. The fight is not over yet; it will go on. The social planners have not given up. The Senate must act favorably to achieve the results the American people are demanding. Has American public opinion gotten through to the Senate? I hope we are getting closer to seeing the end of the day when planners and theorizers use our children as pawns, and seek to inflict on the rest of us things they would never remotely consider for themselves.

AMNESTY FOR DRAFT EVADERS?

Interestingly enough, even those who checked "Yes" to this question frequently threw in qualifying statements, such as "If they will perform, for 2 years, some sort of public service work, such as in hospitals, city ghettos, depressed areas or schools" or "With the provision that they are never entitled to any kind of veterans' benefits." There were, relatively, very few checking "Yes" who would allow these men to come home on an "all-is-forgiven" basis.

I found violent reaction from those checking "No." "Strip them of their citizenship," was common. "Make them feel the full penalty of the law; no one else gets off scot-free when they break the law," was frequent. One comment impressed me in particular: "I have no doubt that many, many young men who were sent to Vietnam also had reservations about the war. But they went, and they died, or were wounded. How can it be fair to their memory—for they were sincere and honest—to pardon men who ran away?"

Some pointed out the fact, often ignored, that "for every one who deserted and fled abroad someone else had to go in his place." Others asked "what kind of a precedent would we be setting for the future if we adopted some kind of overall amnesty, now?" I hope that we will never again find ourselves in a situation approaching the one we are now getting out of, in Vietnam. But maintaining the defenses of this country is something that we are going to have to do for a long, long time. I do not see any chance at all of allowing selective objection, on the part of any one individual, to any particular conflict in which we may become engaged.

No one knows how many of these men there are. Most seem to be in Canada; some have said they never wish to return. That is their choice. Estimates range from as low as 10,000 to as high as 70,000, and an accurate tally is impossible. But, on the strength of this poll, and other nationwide polls I have seen, I do not believe the American people are ready to scrub the entire thing and let these men come back without any penalty when so many others came back—in caskets.

CHILD CARE

Last year President Nixon vetoed an OEO bill that would have created a national child-care system. I had voted "No" on passage of the bill; the President's veto was upheld. Now a new version of this legislation has passed the Senate, but I find nothing in it to make me change my original opposition.

On the surface, the idea of child care may certainly seem attractive to many. However, some very serious objections have been raised by persons who cannot be questioned on their sincerity.

Many poll comments raised the all-important question, what effect does this have on the child? Everyone knows that it will be impossible to have enough people at these proposed day-care centers to have one person for every child. This is especially important at a young age. Dr. Ernest van den Haag, of New York University, told a Senate subcommittee:

> Nothing could be more harmful than the repeated disappearance of adult figures in whom the child has invested affection. Depending on age, the development of object relations and later of a superego will suffer if the child is repeatedly having important relationships with people who disappear. And nothing could be more cruel to impose on small children than these perceived abandonments.

And how about the cost? This was asked by many. Total price tag for the day-care plan would be $2.9 billion, now estimated, over a 3-year period. Will it stop there? The Department of Health, Education, and Welfare warned in 1971 the cost of these child-care centers could run to $20 billion annually. A New York Times writer said it "could easily cost $2,600 a year a child." And, if the day care plan became nationwide, the Emergency Committee for Children figured total cost would hit a yearly figure of $39 billion.

One writer said:

> A Federal program of child care could mean a cumbersome, unwielding, quarreling, jealous and conflicting bureaucracy, constantly squabbling among itself, for authority, and with the Congress, for more money.

The idea may have good intentions but at least public opinion has grave doubts about any meaningful results.

MARIHUANA

Last March the Gallup poll showed use of marihuana among Americans 18 and older had tripled over the last 2½ years to where an estimated 15 million have tried it, or use it. However, in the same poll, 81 percent opposed legalization, which was down only 3 percent from the 85 percent opposed to legalization in 1969.

In March of this year the National Commission on Marihuana and Drug Abuse, in its report to the President, recommended legalization. However, the report has some contradictions. A study of these contradictions is interesting.

The Commission said short-term or occasional use of marihuana is not harmful—medical experts still disagree widely, incidentally, on this point. Yet, the Commission also recommended a $1,000 penalty or a 1-year jail sentence for driving under the influence of the drug.

The Commission recommended keeping penalties on large-scale marihuana transactions, but abolishing those on small-scale deals. Why should giving marihuana away be alright, but selling it be bad? What makes selling it bad, if smoking it is not bad?

The Commission admits marihuana is a long-term risk. Then, why allow it to get a short-term start?

The Christian Science Monitor summed it up in one perceptive paragraph in a lead editorial, March 27, 1972:

> But marihuana, is a mind-affecting drug, is also a cooperative cousin to the other members of the drug family which is taking lives, ruining careers, accentuating personal frailties, and generating crime. In the aggregate, society loses from their use.

I think that is an injunction we should all bear in mind.

A VOLUNTEER ARMY?

I quite honestly expected to find overwhelming support for this idea. No one likes the draft; military service has been unpopular for a long time. With draft calls diminishing to almost nothing, I would have thought the volunteer army idea, where no one has to go unless he wants to, would find great favor.

It was not to be. Those saying "No," of course, made it quite clear they did not think we could maintain a satisfactory defense establishment without the draft.

But those checking "Yes" filled their answer with qualifiers, in marginal notes on the card, and with some long, well-thought-out letters. One of the very best and most perceptive came from a young man, a draftee, who had just gotten out of the Army and had been in Vietnam. Relatively very few felt that simply turning things over to a volunteer system would work. Practically all those saying "Yes" had remarks like "Better keep the draft mechanism handy, just in case," or "What about the cost? Has anyone thought of that?" Quite a few said things like, "Yes, but military service never hurt anyone. There should be some form of compulsory service for young men, to give some time to their country, in some form."

This question, with qualifiers in the answers, means the raw percentages themselves are inaccurate. It has been very, very difficult to decide any other figure but, based on the large number of comments, I would have to say that only about 15 precent favored a volunteer army concept with no draft mechanism and no form of compulsory service. It shows that the issue of keeping a strong and ready national defense is still very much alive and the responses to this question gave me much-needed insight into what promises to become a hotly debated and very thorny problem.

ENVIRONMENTAL SPENDING

Again, I was somewhat surprised at the results, and like the question on the volunteer army, the qualifiers surrounding the answers—probably 70 percent had additional remarks to make—shade the actual percentage figures and make it impossible to get an accurate numerical assessment.

One thing is quite certain: among the respondents to this poll, there was no trace of the panic mentality that has, unfortunately, plagued the environmental issue from time to time.

Those saying, "Yes," they did feel progress was being made, frequently added a comment to the effect that "But should not we stop and see just what we are getting into and how far we are going?" Those who said "No" made it quite clear that they were afraid, in this area, the Federal Government was slipping into that bottomless swamp where spending billions is synonymous with curing a problem.

Well, the billions I cited in my question are already outdated. The President's Council on Environmental Quality, in its latest report, released on August 7, 1972, says the United States will spend an incredible $287 billion in the 10 years through 1980. This is almost triple the amount that had been forecast for the first 6 years 1970–76.

Of this, $93 billion will be on new capital equipment, and $194 billion on operating costs. This is not all Government spending alone; it is total, business, Government, everyone, everything.

Fortunately, there are some very real signs that Congress is putting the brakes on panic spending on the environment. The House had before it, recently, a $5-billion make-work bill that would have put an estimated 500,000 people to work, "fighting pollution."

This was in spite of the fact that a 3-year water pollution bill, with an $18 billion price tag, had already passed both House and Senate, and the deficit in the budget was hovering around the $30 billion mark. However, by 205–192, the House defeated the bill.

I voted "No" on the measure; panic spending is worse than useless and to be avoided at all costs. It is interesting to note that 97 of those who voted for this bill, voted against raising the debt limit a few days earlier. If the debt ceiling had not been raised none of these bills could be paid.

Now, no one closes his eyes to whatever environmental problems there may be and assumes they will go away. Raising the matter to the level of national concern, where it now is, was something that certainly had to be done.

But the poll returns make it clear that the respondents do not think a clean environment is to be instantly achieved by billions. If we do not get our money's worth, then the whole cause is wasted and fruitless. Every individual citizen knows that, and the Congress must bear it in mind, as well as the Federal Government.

SUPPORT OF STUDENT AID

HON. ROBERT PRICE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1972

Mr. PRICE of Texas. Mr. Speaker, I am proud of the manner in which this House has so promptly and properly met and corrected the problem which has arisen in the adminstration of the guaranteed student loan program. I have always been a stanch supporter of assistance to deserving students for continuing their education beyond high school.

We all know the importance of higher education to the individual and to this Nation. And in this day of spiraling costs we must extend a helping hand wherever we can to insure that those of our young people who are qualified will not be denied the opportunity to further their education because of a lack of funds.

The history of legislation on student assistance demonstrates that we in this House of Representatives have endeavored to find always more avenues and means to overcome financial obstacles to higher education. And this was our purpose in amending the guaranteed student loan program—to extend and expand the number of students eligible for assistance through a program of cooperation between the Federal Government and private lending institutions. We understood that those students from families with incomes of less than $15,000 would need help in meeting the present day costs of higher education and we allowed Federal payment of the interest on their guaranteed loan for the period while the student was in school.

In addition, we realized there were occasions when even a student from a large family with an income of more than $15,000 would need help. So the Education Amendments of 1972 amended this program to allow Federal payment of interest, if need was determined at the local level, to these latter students as well.

There never was any intention of eliminating from these benefits some students previously eligible. But somehow the language of the law has been misinterpreted and the regulations could have the effect of excluding some deserving students. It is right to avoid this misfortune and to postpone implementation of these regulations for students receiving loans for this school year until all ambiguity can be clarified. I strongly support this action.

FIFTIETH ANNIVERSARY OF ORDER OF AHEPA

HON. ROBERT F. DRINAN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. DRINAN. Mr. Speaker, I rise in tribute to a distinguished organization, the Order of Ahepa, which recently celebrated its golden anniversary.

The Order of Ahepa was founded on July 26, 1922, in Atlanta, Ga. Since that time this fine organization has spread to all but one State in the Union, with 430 local chapters throughout the country, 23 of these in my home State of Massachusetts.

In addition to the Order of Ahepa, the name of which is an acrostic derived from the first letters of American Hellenic Progressive Association, there are three other organizations within the AHEPA family. These are: the Daughters of Penelope—senior women's auxiliary; The Sons of Pericles—junior young men's auxiliary; and Maids of Athena—junior young women's auxiliary.

While the membership of AHEPA is drawn primarily from men of Greek descent, AHEPA's effects have spread far beyond this base. In addition to promoting the ideals of Hellenism and Hellenic culture, AHEPA has contributed financially to many worthy causes both nationally and internationally. Among these contributions have been relief to hurricane victims, aid to war orphans of Greece, support for the Truman Library, aid to Turkish earthquake victims, and support for the George Papanicolaou Cancer Research Institute in Miami.

AHEPA consists of men from all walks of life, united by the common goal of good fellowship and common understanding. The nine objectives of AHEPA represent a commitment to good citizenship, education, and understanding.

I am proud that AHEPA has been particularly active in Massachusetts, and I wish to salute the chapters of AHEPA in my congressional district and their officers: Fitchburg: George Steffanides, president; Christo Bicoules, secretary; Harris Karris, treasurer; Clinton: Peter Kamataris, president; Arthur Pappas, vice president; Charles Georgeson, secretary; Harry Despotopulo, treasurer; Watertown: Nicholas Chronis, president; William Ravanis, vice president; George Patterson, secretary; George Spiliotis, treasurer; Framingham-Hudson: Andrew Tsantelis, president; James Tzellas, vice president; Harold Garvey, secretary; Ted Tzellas, treasurer; Sterling: Louis Chiamis, president; Andrew Vetras, vice president; Dr. Nicholas Despotopoulos, secretary; Edward Gibbons, treasurer; Brookline: Aristomenes Lydotes, president; George Sakillaris, vice president; George Sarantakos, secretary; John Sinanis, treasurer.

AMERICAN REVOLUTION BICENTENNIAL

HON. HENRY HELSTOSKI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. HELSTOSKI. Mr. Speaker, although the American Revolution Bicentennial Commission is currently embroiled in controversy due to some of its members' activities, I do not believe that we should lose sight of the great events of 1775–76 which the Commission was established to help commemorate.

In preparing for the Nation's 200th birthday, I believe we must address ourselves once more to the ancient ideals of freedom and representative government which motivated the Founding Fathers. Drawing from the thoughts of philosophers who preceded them by centuries, Jefferson, Adams, Franklin, and the others did not reject these "old" ideas, but embraced them and breathed new life into them. It is for us, too, to reach back to the ideals of our revolutionary forefathers, to embrace them, however old or outdated they may seem, and to apply them to our own national circumstances in the late 20th century.

The ideals of the Founding Fathers

are best and most fully embodied in the Declaration of Independence, the anniversary of whose adoption forms the focal point for bicentennial activities. This, too, is an old document, but one which has provided philosophical guidance for two centuries to patriots and lovers of freedom the world over. I hope that the Bicentennial Commission will focus its activities around the content of that document and not merely the birth of a new nation which it represents. All Americans should be encouraged by the Commission to reread the noble words of Jefferson and to ponder how our ongoing democratic system can best be made to conform to the ideals of the Declaration of Independence. It is an old document to be sure, but one which is as relevant today as the day it was written.

FIVE HUNDRED MASSACHUSETTS RESIDENTS VOTE TO END THE WAR IN PEACE POLL

HON. MICHAEL HARRINGTON

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. HARRINGTON. Mr. Speaker, as we in this Chamber debate amendments which would end American involvement in that long and damaging war in Indochina, citizens across the Nation are expressing their sentiments about that conflict. They are voting in response to a poll sponsored by Peace Alert U.S.A., a bipartisan organization with the support of 72 Members of Congress. This poll provides the first chance for Americans to vote directly on the war, by posing the question: Should Congress bring an end to the war by cutting off funds?

Opinion polls have often measured public sentiment on this issue. These generally reliable polls, which measure only sample groups, have yet to provide a clear-cut answer to measure true feelings in this Nation on such an involved and emotional issue. We have been told of an undefined "majority" in favor of continued American involvement in Southeast Asia, while at the same time many professional opinion polls are reporting that more than three-fourths of the American public desire immediate American withdrawal.

The Peace Alert effort, of which I am proud to be a sponsor, has worked to make available for every American an opportunity to vote on the war. To date, votes have been running 20 to 1 against continued funding of the war. I am proud today to insert into the RECORD the names and hometowns of 500 residents of my home State of Massachusetts who have voted to terminate American involvement in Indochina, including bombing and all other military operations. Of course, many more in Massachusetts have voted against the war, joined by thousands of others across the Nation. By inserting these names as a symbolic gesture, however, I implore my colleagues not to ignore the pleadings of these citizens who are urging you to cut off funds for the Indochina war. When you receive the results of balloting in your State in this poll, I implore you to weigh the opinions of your fellow citizens who are expressing their heartfelt feelings about our misadventure in Southeastern Asia.

The list of Massachussets residents follows:

Mary Lou Eukson, Arlington, Barbara Favout, Winchester, Clone S. Buckley, Arlington, Carol McTutosh, Winchester, Joan Mondecar, Holliston, Tom Lombardo, Winchester, Mary M. Miller, Wakefield, Mrs. Richard E. Liebich, Winchester, Susan Erikson, Arlington, Mrs. Jeanne Cammarata, Winchester.

Lorraine M. Shea, Medford, Saurette Bunzel, Winchester, David E. Cincotta, Winchester, Joseph Montori, Springfield, Gloria Bizelia, Arlington, Maryrose Wilson, Winchester, Mrs. Anna V. Sullivan, Watertown, Lois Kuglin, Winchester, Ann Appenherme, Winchester, Mr. John Zaray, Medford.

Ms. Clairn Goroni, Arlington, Duncan Page, Boston, Carl F. Ickerbloom Jr., Winchester, Deborah Page, Boston, Rev. John J. Bishop, Winchester, Sandra Kaplan, Brockton, Ruth A. Cincotta, Winchester, D. R. Sanadi, Lexington, Myriel C. Eykamp, Arlington, Mrs. Lelham Barour, Dorchester.

LuAnn Kuder, Cambridge, Gabriel J. Gauveria, Arlington, Leonard I. Morobacai, Hollistone, Jeanne Emerson, Arlington, Grace Stelark, Somerville, Elizabeth Pepedicurian, Arlington, Mrs. G. G. Wunder, Winchester, Joanne Bishop, Woburn, Barbara Sepore, Arlington, Louise McCarley, Woburn.

TERRY PRAISES DISASTER RELIEF; CALLS FOR FURTHER ASSISTANCE

HON. JOHN H. TERRY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. TERRY. Mr. Speaker, the victims of Agnes have begun to rebuild. They are going home to clean up and put the pieces back together. The key words have been coordination and cooperation.

The coordination at all levels—Federal, State, and local—has been admirable considering the scope of the devastation. In my congressional district, the county, city, town, and village governments went into action immediately and were soon providing rapid emergency aid to victims. They moved quickly to help people find shelter, food, and clothing. Their work and cooperation has been phenomenal. The Federal Government likewise has moved quickly. They set up field offices and began helping flood victims in a very short time.

Thomas R. Casey, Regional Director of the Office of Emergency Preparedness in New York City is running the disaster office in Horseheads, N.Y. His leadership in coordinating the assistance efforts has been commendable and he and his staff have provided immense help to the victims in my congressional district. They are to be praised for these efforts.

The Federal Government, at the inception of this disaster, had an elaborate apparatus for assistance. Under the direction of OEP, more than 100 different services were available to communities and individuals to help with the rehabilitation of homes, businesses, public facilities, and private property. But more was needed because of the scope and severity of the flooding.

Several areas were and are still in need of assistance that has not been forthcoming. Outdoor recreation, for example, suffered severe losses. Parks and recreation areas owned by cities, towns, villages, and counties could not receive disaster relief. They are, in fact, strictly prohibited from receiving such assistance.

The Secretary of the Interior, seeing this as a problem that must be dealt with, has made this a top priority and will provide project grants up to 50 percent of the costs for the restoration of parks, recreation areas and facilities damaged by Agnes. The facilities must be open to the general public and not limited to special groups.

This will help a great deal, but the losses in my district were quite high since much of the economy in the Finger Lakes congressional district is tourist oriented. More needs to be done to get the recreation areas back in shape and prevent further loss of revenues.

Another area of concern is the Corps of Engineers. They have a vast amount of work to do in both cleanup and prevention of future similar catastrophes. I fear that the staff they presently have is not sufficient. I have recently learned that, according to the corps, they will only be able to accomplish their tasks in one end of Livingston County, the hardest hit in my district, this year. This means that the other end will be vulnerable to similar devastation until next year.

I fear that other counties in New York and throughout the flooding area are in a similar situation and that something must be done to give the corps the added capability needed to prevent further tragedy.

A third area of concern is FHA loans to farmers who sustained large crop losses. Currently, loans can be obtained for a period of 1 year with no maximum. Several farmers in the Potter Muck area of Yates and Ontario Counties and in areas of Livingston County in my district have losses of $100,000 or more. These losses are impossible to recoup in 1 year, yet the FHA crop loans are for only one growing season. More assistance to the farmers, the backbone of our economy, is needed.

Finally, one of the major problems I found that I had as a Member of Congress was a lack of knowledge of what to do and how to do it in the case of such an emergency. Something that was lacking and that is sorely needed is a disaster plan for congressional offices. I have written to Gen. George Lincoln, Director of the Office of Emergency Preparedness, on this subject and I conveyed to him the following suggested plan:

Suggested Disaster Plan for Congressional Offices

I. STEPS A CONGRESSIONAL OFFICE SHOULD TAKE TO BE READY IN THE EVENT A DISASTER OCCURS

A. Be aware of the types of disasters that might occur in the district and the weak points in the defense of such a disaster.

B. Have on hand the OEP Disaster Handbook and the information kits OEP uses for disasters.

C. Keep an up-to-date list of all OEP offices, their addresses and telephone numbers, and the people who run them.

D. Keep an up-to-date list of names and telephone numbers of Civil Defense, Corps of Engineers, Small Business Administration, Farmers Home Administration, and other pertinent offices, and State and local officials who have responsibility in a disaster situation.

E. Keep an up-to-date list of local disaster plans (if not available, suggest that they be drawn up).

F. Have on hand the OEP list of eligibility criteria for assistance. It should be very detailed so potential questions can be easily answered.

G. A list of potential sites for emergency information centers to be operated by the Congressional office should be drawn up and kept up-to-date. This will facilitate and expedite emergency operations when they become necessary. Suggested locations include, in addition to district offices, Civil Defense offices, Chamber of Commerce, local officials' offices, State officials' offices, etc.

II. THE DECLARATION OF A DISASTER

A. Definition of a Disaster

B. Procedure for declaring a disaster

C. The role of OEP

D. A list of procedures and criteria for an area to be declared a disaster area.

1. Legislative procedure and legal aspects of a disaster. Legislative history (include such things as the agreement between FHA and SBA on their overlapping programs).

2. Should include a careful explanation of the disaster declaration procedure such as the fact that a Presidential declaration does not necessarily mean OEP will confirm a particular county.

3. Explanation of the differences between an OEP declaration of a disaster area and an SBA declaration.

III. WHAT TO DO IF IT IS IMMINENT THAT A PRESIDENTIAL DISASTER WILL BE DECLARED

A. The Member should immediately contact and coordinate with State and local officials, OEP, Civil Defense.

B. Set up the information centers in the pre-selected spots throughout the district.

1. These offices should be available to answer any and all questions about the disaster.

2. The opening of the offices, their locations, and the telephone numbers, should be widely publicized.

3. The offices should gather statistics and damage estimates and locate the hardest hit areas and get this information to OEP officials for their use. OEP will use the information as a basis for sending out their own damage estimate teams and for setting up its own centers.

4. The offices should coordinate with each other to make sure the same information is being given out at each one. Each should have the previously prepared telephone list.

5. The offices should be closed only after OEP has set up its operations, but the regular district offices should remain available to answer questions and help solve the problems that arise.

6. The offices should maintain close contact with OEP officials in the area and provide a mutual exchange of up-dated information.

C. The Members should tour the stricken area as soon as physically possible so the people will know he is working on the problem. This will help ease the potential for panic which often accompanies such a disaster. A press conference should be called immediately after the tour to publicize the Member's presence in an effort to keep the situation calm.

D. All Members involved in the disaster area should make an effort to appraise each other of their activities and if possible coordinate any major efforts on behalf of the victims.

E. OEP should call a meeting at the White House for all Members and staff people involved in the disaster operations as soon as possible. The best opportunity is concurrent with the declaration and before the Member departs for a tour of the district.

F. Local OEP officials should be contacted immediately after each Member has set up his information centers and appraised of their locations, telephone numbers, and the staff people manning them.

G. OEP should contact these centers daily, or as the situation dictates, to appraise them of the situation and any changes that occur. The information centers should, in turn, relate pertinent information on a regular schedule to the OEP offices.

H. The utmost speed is necessary. Time estimates should be available and given out to victims who make requests for assistance and ask how long it will take. A definite time period should be given where possible because the worst thing you can say to a victim is "soon."

In essence the key words are advance preparation, coordination and speed. Speed is of the essence. The victims of any disaster deserve to be helped quickly and time is of the essence. Often the scope of the disaster will make travel difficult and communication impossible. In such a situation, it is imperative to make an extra effort to quell the possibility of panic. Ways must be found to get into these areas and calm the victims, assuring them that help is on the way.

The Federal Government, at the inception of this disaster, had an elaborate apparatus for assistance. Under the direction of OEP, more than 100 different services were available to communities and individuals to help with the rehabilitation of homes, businesses, public facilities and private property. But more was needed because of the scope and severity of the flooding.

We in Congress have now provided the victims some additional help in the form of H.R. 15692. Among other things, loans from the Small Business Administration and Farmers Home Administration are now available, retroactively, at a rate of 1 percent with a forgiveness feature of $5,000. It also provides much needed assistance in the form of grants to private, nonprofit education institutions which, until this measure was passed, were not eligible for Federal assistance. The ravages of Hurricane Agnes placed these schools in a position where they only alternative would have been to shut down if this assistance had not been provided.

But much more needs to be done if we are to get all of the flood victims back on their feet and prevent such occurrences in the future. More assistance is needed and more corrective and preventive measures must be taken and I call on my colleagues for their cooperation toward that end.

It is my sincere hope that out of this disaster two things will emerge. One, that measures will be taken to insure that such a thing will never again occur. And two, that this feeling of unity and cooperation will carry over into our everyday dealings with our neighbors.

In this hour of great need, my heart goes out to those who have lost so much in the devastating flooding. I have been to the area often and have seen the destruction first hand. We have still much, much more to do.

TULARE, CALIF., REACHES ITS GOAL

HON. ROBERT B. (BOB) MATHIAS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. MATHIAS of California. Mr. Speaker, I would like to bring an interesting fact to the attention of all the Members of this House. That fact is that the city of Tulare, Calif., in my congressional district, raised $161,700 in a period of only 1 month for the purpose of assuring the development of an industrial park. This accomplishment by the people in Tulare is both remarkable and outstanding. They have demonstrated what a public-spirited people can do when they are determined to achieve a particular goal.

The citizens of Tulare have been concerned for some time about attracting new industry and broadening their economic base. And the industrial park was the way they decided to bring new industry into the city and create new job opportunities.

The money was actually raised through

the sale of $100 shares in the Tulare Industrial Site Development Foundation. The stocks were bought by individuals and businesses from every segment of Tulare. The sales began on July 5 and after only 2 weeks $100,000 had been raised. This was enough to get the project going. It was decided to continue with the sales and after 1 month a total of $161,700 in stock had been sold. And they plan to continue until they have reached $250,000 which is the amount needed to complete the job.

The Federal Government was able to play a part in this success story. The Economic Development Administration and the Environmental Protection Agency have each made contributions to the construction of the Laspina-Levin sewer line that will service the park area.

This is indeed a success story of a town concerned about its future and determined enough to do something about it.

Tulare has set an example for other towns throughout the country to follow.

I ask unanimous consent that an article from the August 7 edition of the Tulare Advance-Register entitled "One Month—$161,700" be printed following my remarks:

ONE MONTH—$161,700—INDUSTRIAL PARK ASSURED AFTER WHIRLWIND CAMPAIGN

(By Tom R. Hennion)

Who said it couldn't done?

It could, and Tulare proved it—with flying colors!

Tulare's industrial park will be developed, and Tulare thus soon will make its re-entry into big league competition for new industry. All doubt of that was erased today by the jubilant officers of the Tulare Industrial Site Development Foundation.

They announced that the sale of stock in Tulare's proposed industrial park has reached the $161,700 mark.

That is $11,700 more than the $150,000 which the foundation, which will develop the park, said would be necessary to insure its establishment.

The sale of stock will go on, perhaps until the total has reached $250,000, but the essential amount to get the job started has now been raised.

And it was a true community-wide effort.

In fact, it might well be one of the speediest, most public-spirited sales of stock on record anywhere.

At the office of the Greater Tulare Chamber of Commerce, where the daily sales were tabulated, it was revealed that individual stock purchases ranged from $100 for a single share to $5,000 for 50. Also, sales records showed that purchasers came from all walks of life—from daily wage earners to large corporations.

It was their way of expressing their faith in the Tulare of the future, their way of making certain that Tulare is not handicapped in its quest for a broader economic foundation by lack of a proper place to put new industry.

It was also the serving of a community-wide notice on the world of industry that Tulare is a community that not only is ready to roll out the red carpet of welcome for new industry, but whose individual citizens are so enthusiastic over the idea that they have put up their own money to make it possible.

The actual campaign to raise the $150,000 necessary to get the industry park show on the road began just one month ago.

On July 5, the first offering of stock in the Tulare Industrial Site Development Foundation was made to the people of Tulare.

A community volunteer sales force of more than 20 businessmen, under the guidance of Frank Hulbert, immediate past president of the Chamber of Commerce, began calling on a list of prospects to tell them the industrial park story.

Acceptance of the proposal was even greater than had been anticipated. By July 19—two weeks after the sale started—$100,000 was in hand. That was the amount the foundation was required by the state corporation commissioner to impound in an untouchable bank account before any of the funds could be used.

The sales committee then set its sights on $150,000 as the essential minimum to insure the development.

This money will be used to make a down payment on the industrial park property, to pay for the cost of running a rail spur across So. K Street into the main body of the park, and for other necessary starting expenses.

"There is no intention of halting stock sales now," Dan T. Johns, executive vice president of the chamber, stressed today. "The more money we have the more we can do with the park. If we can reach our ultimate goal of $250,000, we can put together an ideal package to sell to industry."

The more than $150,000 now available to the foundation will, however, permit the group to begin its final planning, to construct the railroad spur, and to begin promoting the new park in nationwide industrial circles, Johns pointed out.

The industrial park, a Tulare dream for more than a decade, will be located on 163 acres of land to be purchased from Manuel and Mary Souza and Mrs. Allene Souza, as guardian for the estate of Gabriel Souza, Jr.

The site is bounded on the east by Blackstone Street, on the south by Paige Avenue, on the north by Levin Avenue, and on the west by So. K Street from Paige almost to Continental Avenue and by So. O Street from there to Levin.

Another 16 acre plot has been purchased on the west side of K Street to insure rail access to the principal park site east of K.

The site has ready and quick access to both Business Route 99 and U.S. 99 Freeway, and also to the Southern Pacific Railroad and Tulare Airpark.

The park will be developed by increments, with money obtained from the sale of the first parcels to industry to be used for the development of additional parcels.

Eventually, the total investment will exceed $1 million.

It will be served by the heavy industrial-type Laspina-Levin sewer line, now nearing completion, which surrounds the park on three sides. The city of Tulare has agreed to put in utilities and the necessary roads and to sink a new water well.

Weekend sales totaling $12,700 put the stock sale over the $150,000 top.

Purchasers included Southern California Gas Co., $2,000; Marion K. and Floy Morgan, $1,000; A. J. and Ruth Elliott, $1,000; Albers Manufacturing Co., an industry which itself is just now building a new plant in Tulare, $1,000; Al Holland, $500; Mary Enid Ledbetter, $500; Dr. Lee H. Smith, $500; Harry Krikorian, $500; and Mr. and Mrs. William Wolfe and Harold Williams. There also were anonymous purchases of $5,000 and $500.

NATIONAL STUDENT ASSOCIATION ON GREECE

HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. ROSENTHAL. Mr. Speaker, the National Student Association, at its 25th congress held this week in Washington passed a forceful resolution on Greece. The NSA has been active, especially through its Center for Greek Studies, in calling attention to continued American support for a military dictatorship which illegally seized power over 5 years ago.

I include below the text of the resolution:

GREEK MANDATE

Whereas, it is now more than five years since a military junta seized power in Greece and destroyed all of that country's free institutions, and

Whereas, despite repeated assurances by both the Johnson and Nixon administrations that democracy was rapidly being restored in Greece, the only assurance that the Greek junta has given in regard to the long-awaited elections is that they will not take place this year either, and

Whereas, arbitrary arrest and torture remain the common experience of the Greek people, and many of the noblest Greeks remain in prison or exile under inhuman conditions, and the weight of the junta's oppression has fallen with especial severity on Greek students, and

Whereas, despite the declared opposition of the U.S. Congress to military aid for the Greek regime, the Administration is endeavoring to expand its aid, both open and concealed, to the junta,

DECLARATION

Therefore, the United States National Student Association demands the implementation of the expressed will of the U.S. Congress by the immediate cessation of all U.S. aid to the Greek junta, whether direct or indirect, open or concealed, and reiterates the condemnation of the Greek dictatorship adopted by the 23rd National Student Congress.

MANDATE

The U.S.N.S.A. is mandated to:

(1) Continue and expand the work of the U.S.N.S.A. Center for Greek Studies.

(2) Support and assist Greek students who are victims of the junta's oppression or actively engaged in resistance to it, both within and outside Greece,

(3) Take action in regard to repression in Greece nationally, by raising the issue with candidates for office, members of Congress and of the Administration, with the U.N. and other international bodies, with the churches and peace organizations, in the press, and in all possible ways.

(Approved by the National Student Congress, August 17, 1972.)

PROVIDING TREATMENT FOR EVERY NARCOTICS ADDICT WHO SEEK IT: THE FIRST PRIORITY

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. EDWARDS of California. Mr. Speaker, on August 9, 1972 there appeared in the Review and Outlook section of the Wall Street Journal an article entitled "The First Step." It is an extremely important article and I am inserting it in the RECORD so that it may have as wide an audience as possible.

We have been hearing much in recent months, from the administration, regarding progress in its declared war against narcotics addiction. Almost every week there is a press conference featuring Mr. Ambrose, Mr. Ingersoll, or Mr. Kleindienst announcing some spectacular achievement in intercepting the narcotics traffic. Yet, despite all of the press releases, the estimated number of narcotics addicts in the Nation continues to grow, and the number of addicts in treatment remains at a level of less than 20 percent of the total addict population.

My Judiciary Subcommittee recently held hearings on narcotics treatment and rehabilitation programs in Los Angeles, San Francisco, and Alameda Counties, Calif. We found that in each of these counties existing narcotics treatment and rehabilitation programs are reaching only a small percentage of the estimated population. In all three counties there are waiting lists of narcotics addicts who want treatment, but cannot obtain it. In Los Angeles County alone, for example, there is a waiting list of over 2,300 persons unable at present to enter the Los Angeles County methadone maintenance program. We were informed that unless supplementary funding is obtained to expand the county's methadone program, it will take about 3 years to serve all of the patients presently on the waiting list.

The problem faced by Los Angeles County exists throughout the country. In every city examined by my subcommittee we have found actual waiting lists of narcotics addicts seeking treatment but unable to receive it. Even in those areas where there are no formal waiting lists established, we have found that newly established treatment programs fill up to capacity within days of their opening.

There is obviously a tremendous need for the expansion of treatment opportunities for narcotics addicts. Dr. Leon Marder of the Los Angeles County General Hospital testified that the minimum national need was for the creation of between 150,000 and 175,000 narcotics treatment slots. He estimates that if sufficient opportunities for treatment were made available and publicized, fully half of the Nation's narcotic addict population would seek treatment voluntarily. At the present time, however, there are only an estimated 30,000 narcotics treatment slots available nationwide.

Thus we are faced with the situation described by the Wall Street Journal: More than 20,000 narcotics addicts on waiting lists unable to obtain treatment. These addicts are being left on the streets with the need to support their habits through criminal activity while the administration issues press releases describing its successes in its war against heroin trafficking. As important as law enforcement efforts against heroin pushers are, and as much as I personally support the intensification of our national law enforcement programs against the heroin traffic, I believe that the administration has misplaced its priorities in its emphasis of law enforcement to the neglect of treatment and rehabilitation programs. Our greatest priority must be the providing of treatment and rehabilitation opportunities to every addict who seeks them.

I urge my colleagues to read the Wall Street Journal article, which I include in its entirety below:

The First Step

Since our business gives us more than a glimpse of mankind's foibles and calamities, very few facts shock us anymore. But one that does set us brooding is that nearly all of the nation's 450 methadone programs have waiting lists.

Imagine the scandal that would surround the discovery of waiting lists for treatment for cancer, or heart disease or broken limbs. Yet we have people asking to be treated for drug addiction, which is not only a personal tragedy but a severe social problem, and they end up on waiting lists.

We recognize, of course, that methadone treatment remains somewhat controversial and experimental, and by no means a complete remedy for the drug problems. We further recognize that the problems associated with the expansion of the programs are real, not matters of mere good intentions or even mere money. Still, if the drug problem is as serious as all the rhetoric about it suggests, those in charge of efforts to combat it ought to be doing whatever they can to help. And it seems to us methadone is one of the very few useful tools anyone has found.

In any event, we have trouble understanding many of the objections to methadone that have fueled the controversy. The treatment consists of switching addicts from heroin to methadone, itself an addictive drug. While this allows them to lead more-or-less normal lives, methadone detractors object that it does not cure their addiction. This objection would of course make sense if anyone knew any method of curing addiction on a large scale, but no one does. So we simply cannot understand logic that would deny what little help is available to addicts seeking it, and also deny what little chance society has to reduce somewhat the costs it pays in addiction-related crime.

Even harder to understand is the ignorant question, if you give them methadone, why not heroin? To insure anything like proper supervision, addicts must generally be made to visit clinics to obtain their maintenance drugs. Methadone is administered orally once a day, while heroin would have to be injected about four times a day. Even more important, methadone blocks the effect of heroin. An addict maintained on heroin would be continuously tempted to try additional illicit heroin for a better "high."

It is proving difficult enough to supervise the distribution of methadone, for that matter, without supervising the distribution of heroin. Here is the real problem of the methadone programs. Addicts have learned to inject the drug, apparently no little trick, and produce a high. Methadone, presumably somehow diverted from supplies intended for maintenance programs, has turned up on the street; people have turned up addicted to methadone without ever having been addicted to heroin.

While this certainly demonstrates the difficulties inherent in any attempt to deal with drug addicts, it seems to us a problem that can be reduced to manageable proportions. Regulations have already been tightened to insure better supervision. This means competent people must be found and a great deal of time expended in supervision. Building such administrative machinery is always slow and difficult work, and this of course goes far toward explaining those waiting lists.

Even so, it seems to us a greater sense of urgency would pay dividends. Estimates place the total waiting lists at about 20,000 addicts. Some 85,000 are receiving treatment, out of a guessed-at 500,000 addicts in the nation. Despite our current suspicions about the federal budget, we even approve of the Nixon administration's decision to ask $135 million extra for anti-drug efforts, including $60 million for local treatment programs that often rely on methadone. But we think cities where the drug problem is acute should not stand around waiting for federal funds, but should find ways to press ahead with their own resources.

No expansion of methadone treatment will end the drug problem, because it cannot help addicts who do not want to be helped. They will remain a large number, and there probably is no way to cope with them except to rely on greater coercion of one type or another. But it seems clear, at least to us, that the first step is to insure that properly supervised methadone programs are avaible to any addict who asks for help.

A FORKED-TONGUE ADMINISTRATION

HON. WILLIAM S. MOORHEAD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. MOORHEAD. Mr. Speaker, it amazes me how often the Nixon administration has one of its junior members spout bountifully about freedom of information and how open the administration is about its policies.

It just ain't so.

The feeling downtown appears to be, why do anything in the open when it is easier to do it in secret.

The most recent instance of this aversion to scrutiny involves a man who performed a supreme service for his country, A. Ernest Fitzgerald.

Ernie Fitzgerald is the guy who blew the whistle on the sweetheart relationship between the Air Force and the Lockheed Aircraft Corp. Ernie caught the Air Force fudging its books and hiding cost overruns on the C–5A giant transport plane. These overruns were costing the taxpayers millions.

The Air Force managed to fire Fitzgerald under questionable circumstances. Now they are trying to muzzle a public hearing on the dismissal.

Ernie deserves his day in court and with all of the openness and freedom which the law allows.

While I support the Pentagon's right to appeal the court's ruling for an open hearing, I think the more the administration fights this development, the more it destroys the faith of the people in our government and the hope of judicial relief.

I would like to introduce into the Record at this time an editorial from the New York Times discussing the Fitzgerald case.

The editorial follows:

Secrecy Shroud

When Richard M. Nixon was a Senator with a penchant for investigations he strongly defended the right of Government officials to testify frankly before Congressional committees. Unless military men and civilian employes "have complete freedom from reprisal," he said in 1951, "the scheduled hearings will amount to no more than a parade of 'yes' men for Administration policies."

Yet the Nixon Administration now, for reasons difficult to understand, is backing up fact that the cost-overruns and Mr. Fitzgerald, the civilian analyst who in 1968 exposed to a Senate committee the $2-billion cost-overrun by Lockheed on the giant C5A transport. The mystery is increased by the fact that the cost-overruns and Mr. Fitzgerald's testimony about them occurred in the Johnson Administration.

The Air Force discharged Mr. Fitzgerald through the subterfuge of abolishing his job, but rumors were spread that he had engaged in questionable activities involving a "conflict of interest." A White House investigation of these innuendos early in the Nixon Administration cleared the analyst and even brought a recommendation for his promotion, according to columnist Clark Mollenhoff, a former member of President Nixon's staff. Nevertheless, Defense Secretary Laird with White House backing has supported the Air Force in its efforts to make the firing stick and even to deny Mr. Fitzgerald public, not closed, hearings in his bid for reinstatement.

A Federal District Court ruled that the closed hearings before the Civil Service Commission were an unconstitutional denial of due process. But the Justice Department, on Air Force urging, is now appealing this decision, although there is no security reason for secret hearings. The Air Force argument that privacy in such hearings is needed for now to insure preservation of evidence was rejected by the District Court on the indisputable ground that the employe, Mr. Fitzgerald, wants an open hearing.

Mr. Fitzgerald's right to take depositions now to insure preservation of evidence was also upheld by the District Court in response to his plea that some of his key witnesses inside the Air Force already have left or are dead and that files may vanish with time. But even this ruling is being appealed by the Administration.

The Air Force clearly would be embarrassed by open hearings that exposed its mishandling of the C5A contract and its questionable tactics in the Fitzgerald case. But elementary justice and the need to discourage cost-overruns—which exceed $28 billion on current weapons development programs—both suggest that the public interest would be served by the prompt scheduling of open hearings that put the facts before the country.

TUSKEGEE STUDY

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. CLAY. Mr. Speaker, on July 26, the New York Times and the Washington Post reported on a study of the effect of syphilis, conducted by the Public Health Service, on 400 black men in Tuskegee, Ala. In the 3 weeks since that report was issued, the horror initially experienced has grown to the point of outrage. We witness continuing accounts of doctors who curiously watched the debilitating effects of syphilis proceed unchecked in 200 human beings. At least seven cases resulted in death.

Alleged statements by these physicians, in justification of this hideous experiment, have been incredibly complacent. They have expressed certainty that, with current knowledge of treatment of this disease and the change in approach to human experimentation, such a study would not be conducted today.

These statements are rather less than convincing however, when one considers the fact, acknowledged by these physicians themselves, that an effective treatment of syphilis with penicillin, had been in active use for at least 20 years. Yet the victims were never even offered this treatment. Just this morning, the Washington Post carried an article from a medical journal which quotes a report by the Public Health Service stating that even the use of the limited treatment available before the discovery of penicillin could have benefited most of the syphilis victims. Apparently the chance to watch the full, deadly effects of this disease proved too enticing to the physicians conducting this study.

This case is particularly abhorrent in view of the deep-seated racism existing in this country. That the lives of a group of poor black men could be deliberately destroyed, reflects the total disregard that whites have historically shown for the lives of black people. The oft-heard charges of genocide, which have been lightly discounted as wild-eyed rhetoric, seem agonizingly close to the truth in this instance.

In a recent article in the Philadelphia Daily News, Mr. Chuck Stone discusses the question of genocide, a question which is increasingly in the minds of a growing number of black Americans. In viewing the Tuskegee study, along with important other factors, such as the disproportionate number of black veterans dying in Southeast Asia, or the failure of the Government to cut off the flow of narcotics from these same Southeast Asian countries into the veins of our black children, even the most moderate must ponder some very ugly possibilities.

Mr. Speaker, I urge this Congress to move quickly with determination to allay the fears of black Americans by taking immediate action to prosecute the figures responsible for this hideous study, and to insure a just reparation for the victims and their families. I include the Washington Post article, and the article by Mr. Stone, in the RECORD:

[From the Washington Post, Aug. 8, 1972]

DOCTORS COULD AID SYPHILITICS IN 1936, MAGAZINE CLAIMS

(By Jean Heller)

NEW YORK, August 17.—U.S. Public Health Service doctors had the knowledge and the medication as early as 1936 to cure black men participating in a federal syphilis experiment in Alabama, but the doctors withheld the treatment, a national medical magazine has reported.

Quoting from PHS' reports on the progress of the experiment, known as the Tuskegee Study, Medical World News reported that only 25 per cent of the untreated syphilitics were normal after several years of study, while all syphilitics treated with the best remedy known at the time were free from the disease.

The Associated Press disclosed last month that doctors at the PHS Center for Disease Control in Atlanta deliberately had denied treatment to participants in the Tuskegee Study, even after the discovery of penicillin, so that autopsies could be performed on those who died.

The treatment of syphilis in the 1930s and early 1940s consisted of weekly doses of mercury and bismuth followed by doses of arsenic. The treatment lasted between 18 months and two years.

CDC doctors have said the doctors who ran the study in the early years chose not to treat some 400 syphilitics with the arsenicals because the treatment could be worse than the disease and sometimes was fatal.

However, Medical World News quoted the CDC report, which indicated that early treatment was better than no treatment at all.

"Adequate anti-syphilitic treatment prevented all forms of clinical relapse . . . whereas only one-fourth of the Negroes with untreated syphilis were normal," the report said.

After disclosure of the study, current CDC officials in Atlanta said their records showed that seven men had died as a direct result of untreated syphilis. They also said at the time that the figure could be higher, and apparently it is.

CDC reports written in 1955, 1961 and again in 1971 said that of 92 untreated syphilitics autopsied between 1935 and 1953, "28 (or 30.4 per cent) had cardiovascular or central nervous system syphilitic lesions as their primary cause of death."

In an earlier report, CDC doctors found untreated syphilis shortened life expectancy among Negroes.

"The fact that nearly twice as large a proportion of the syphilitic individuals as of the control group had died is a very striking one," the report said. "It can be said that the life expectancy of a Negro man between the ages of 25 and 50 who is infected and receives no treatment is, on the average, reduced by about 20 per cent."

Present and past CDC doctors say that Tuskegee and surrounding Macon County, Alabama, were picked for the experiment because the area had the highest syphilis rate in the nation in 1932, when the study was undertaken.

Dr. Donald R. Printz, CDC's chief of clinical research, had said that of the men tested in the area in 1932, 80 per cent had positive blood tests for syphilis.

When CDC was asked to recheck that figure, officials conceded they had misread the areas' population breakdown. "Instead of being 80 per cent syphilitic and 20 per cent uninfected, Macon County in the 1930s was 80 per cent black and 20 per cent white," the medical magazine reported.

[From the Philadelphia Daily News, Aug. 1, 1972]

SYPHILIS AND GENOCIDE

(By Chuck Stone)

It either takes a tough constitution or a rancid morality to sit quietly by and watch 200 men die without doing anything about it.

I call it genocide. Have you got a better name for it?

The act of genocide was even officially sanctioned by the United States Public Health Service.

The experiment began 40 years ago with about 600 black men. Of those 600, about one-third were free of the disease; two-thirds showed evidence of syphilis. Of the syphilitic group, half were treated, but the other half—about 200—received no treatment. And they received no treatment even after penicillin was developed during World War II.

At first blush, the charge of genocide may be considered extravagant rhetoric. But, those 400 black men were "systematically and deliberately destroyed" as a racial group and that's exactly what genocide is.

Even my reaction is a delayed one because I was so revulsed by this official slaughter, I shied away from a comment. What do you say about a group of sadists who wear the snow-white uniforms of medical researchers which permit them to play God with the lives of human beings?

The 13-member Congressional Black Caucus shocked me back into reality with its demand yesterday that "everyone responsible for these hideous acts of crime be brought to justice."

The Caucus also called for reparations to be paid to the families and victims of this 40-year-long experiment.

In its demand for reparations, the Caucus resurrected an idea that enjoyed a wide currency in the black community a few years ago. Former SNCC Director James Forman demanded that America's churches pay reparations to black people for supporting American racism. The idea was contemptuously dismissed as far-fetched, but the Caucus's demand of yesterday gives it a renewed respectability.

"The overall effects of this immoral revelation," continued the Caucus's statement, "extend far beyond the lifelong sufferings of myriad black families and their unborn offspring. It poignantly reflects the deflated value that white people have historically placed upon black lives."

That's an extremely barsh indictment for a group of distinguished elected officials to level against the citizens of their own country.

But its harshness in no way compares to the devaluation of human life that the United States government placed upon the lives of a group of its own citizens.

Sure, in the name of scientific advance, there have been medical experiments in which the victims were injected with a disease or a virus to test the effectiveness of a newly discovered cure. They knew the possibility of death, but they also knew that the medical researchers were hanging in there all the time trying to save their lives.

Not the U.S. Public Health Service this time.

And I think that's an essential difference—that doctors or researchers who usually dedicate themselves to trying to save human beings this time sat casually by for 40 years and watched them slowly die without making any effort to help them to hold on to life.

During the last few years, there has been a rising tide of opinion in the black community that there is a "secret" or "unofficial" plot to wipe out black people.

The continued existence of "detention centers" around the country and some of the cattle round-up methods used by some officials have in dealing with dissent have not diluted that charge.

Family planning or planned parenthood has been widely viewed by many responsible black professionals and leaders as a subtle, but effective effort to destroy the black family and limit its growth.

The high rate of black veterans' deaths in Vietnam (12.5%) compared to the percentage in the armed services (9.8%) worries a black community who see its manhood being systematically wiped out.

And now comes along a U.S.-government-stamped genocide program that takes on some of the coloration of Hitler's systematic destruction of 6 million Jews.

Sure, dismiss the analogy as ridiculous and tut-tut me with the admonition that I'm really being paranoid.

But when you live in a country that deliberately facilitates the deaths of 200 of its citizens of an ethnic group of which you are a part, that's not paranoia.

That's "real-a-noia" and a lot of black people, like the Congressional Black Caucus, are wondering just how much their American citizenship is worth these days.

STUDENTS LOANS

HON. JAMES D. (MIKE) McKEVITT

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. McKEVITT. Mr. Speaker, it was a great deal of pleasure and satisfaction that I learned that Senate Joint Resolution 260 as amended by the House has been sent to the President for his signature.

To me, this measure was essential. Because of the new Higher Education Act and the new formulas, the allocations of funds to the States are yet to be determined. But the important thing is that with this measure we are moving. According to the Office of Education, student loan officers in the various States will soon have an idea of how much money is available and they can plan accordingly. This measure should help alleviate the problem, in most cases.

The fall term is upon us and many students in need of student assistance cannot get their loan application processed. They do not know whether they will be able to pursue their education or not. However, this bill, which will soon be on the President's desk, will assure the loan program and I know that many university and college administrators and students all over the Nation are relieved.

THE NATIONAL NUTRITION, FOOD AND FIBER ACT OF 1972

HON. FRANK E. DENHOLM

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. DENHOLM. Mr. Speaker, the future consumer demand for food and fiber at home and around the world is unknown. The need for an abundant quantity of food and fiber—of the highest quality of nutritional value is imperative in America, in Asia, in Europe, and for all mankind. The availability of the essential quantity and quality of nutritional food and fiber at a fair and reasonable cost to consumers is most important in every family budget at home and around the world.

A price and production program based on manipulation of Government controls and vested interests at public expense is not in the interest of people—consumers or producers, of this country or those suffering the misery of famine and starvation elsewhere in the world.

The national nutrition, food and fiber legislation that I am introducing today for the consideration of the Congress emphasizes the importance of people, compensates performance and production as opposed to the concepts of the past that have attempted to influence upward the price of food commodities by programs of scarcity and the expenditure of public funds for nonperformance and nonproduction with no consideration for people—consumers or producers.

Mr. Speaker, I include the proposal that I have introduced today in the RECORD as follows:

H.R. 16485

Be it enacted by the Senate and the House of Representatives of the United States of America in Congress assembled, an Act to assure maximum national nutrition with the highest quality and greatest quantity of food and fiber at the lowest possible cost to consumers with emphasis on people, performance and production; and

To achieve a balance in the national economic growth and social stability by reducing or tending to reduce the cost of living, by reversing the pressures of continued inflation and by providing alternatives to economic coercion of national population trends; and

To encourage maximum conservation in the preservation of ecological and environmental values in the optimum utilization of human and natural resources; and for other purposes.

SHORT TITLE

This Act shall be cited as "The National Nutrition, Food and Fiber Act of 1972."

TITLE II—DEFINITIONS

SEC. 101. (a) FARM FAMILY UNIT.—Any person as defined by law, including a spouse and issue, head of a household, widow or widower that derives one-half or more of his or her earned annual gross income from the actual production and sales of food and fiber, or

(b) Any person as defined by law, including a spouse and issue, that derives one-half or more of his or her annual gross income from the ownership of land used in the production of food and fiber under a leasehold, share-crop or tenancy agreement with a producer, but not to exceed an annual sum in the aggregate in excess of one-half of the computed annual aggregate total of a qualified Farm Family Unit, as a producer or producers as defined in subsection (a) of Section 101 and notwithstanding any number of such landlord-tenant relationships the owner or owners of any such land used in the production of food and fiber shall not participate in the aggregate benefits in excess of $20,000.00 per annum as provided for a separate Farm Family Unit producer defined in subsection (a) hereof.

SEC. 102. (a) GROSS ANNUAL SALES.—The combined gross cash receipts first received for food and fiber actually produced by a Farm Family Unit in any calendar year or for such other approved 12-month accounting period, including the gross cash receipts plus the compensatory differential payments, not to exceed in the aggregate a gross combined total in the sum of $20,000 per annum.

(b) The gross annual sales shall constitute the combined amount of gross receipts from sales of food and fiber actually produced plus the compensatory differential payments.

(c) DIFFERENTIAL PAYMENTS.—The computed difference between the average market price and parity as defined by law.

SEC. 103. (a) "CARRY BACK" OPTION.—The Farm Family Unit as defined in subsections (a) and (b) of Section 101 of this title may exercise the option of applying sales against the limits of Gross Annual Sales for any next preceding 24-month period that product cash receipts plus compensatory differential payments were less than the allowable annual aggregate total of $20,000 for any one calendar year or such other approved 12-month accounting period and such carry back shall be first applied to the oldest accounting period at the current computed rate or rates in determining the limits thereof.

(b) "CARRY FORWARD" OPTION.—The Farm Family Unit as defined in subsection (a) or (b) of Section 101 of this Title may exercise the option of applying sales against the limits of gross Annual Sales for any next succeeding 36 month period, provided that the computation of Gross Annual Sales is first applied to the next succeeding calendar year, or such other approved 12 month accounting period, and the then computed rate or rates of the Gross Annual Sales shall be computed at current prices received plus compensatory differential payments not to exceed in the aggregate a sum total of $20,000 per annum.

TITLE III—COST OF LIVING PRODUCTION PAYMENTS

SEC. 101. (a) Notwithstanding any other provisions of law, any Farm Family Unit, that markets food and fiber other than berries, market-garden vegetables, melons or tree fruits and sugar beets or cane, shall receive compensatory payments directly from the Government as a differential computed value not less often than semiannually, equal to the difference between the national average farm market price for each product sold and 90 per centum of parity on the first $20,000 of Gross Annual sales marketed in any one 12 month accounting period when the average market price received on such commodity or commodities is less than the determined value of 90 percent of parity thereon.

(b) Gross Annual Sales in excess of $20,000,000 for any 12 months period by a Farm Family Unit shall not be eligible for the computed differential payment unless applied and computed as provided in subsections (a) and (b) of Section 102 of this Title.

SEC. 102. (a) Any Farm Family Unit may exercise the option of applying sales against the limits of Gross Annual Sales for any next preceding 24 month period that product cash receipts plus compensatory differential payments were less than the allowable annual aggregate total of $20,000.00 for any one calendar year or such other approved 12 month accounting period and such "carryback" shall be first applied to the oldest accounting period at the current computed rate or rates in determining the limits thereof.

(b) Any Farm Family Unit may exercise the option of "carrying forward" product sales against the limits of Gross Annual Sales for any next succeeding 36 month period, provided that the computation of Gross Annual Sales is first applied to the next succeeding calendar year, or such other approved 12 month accounting period, and the then computed rate or rates of the Gross Annual Sales shall be computed at current prices received plus compensatory differential payments not to exceed in the aggregate the sum total of $20,000.00 per annum in such acceptable accounting period of time.

(c) The Gross Annual Sales limitation per Farm Family Unit shall be adjusted not less often than annually with the rate of decline or increase of inflation in the total national economy according to government standards of the recorded national cost of living index.

TITLE IV—ADJUSTMENT PROVISIONS IN TRANSITION

SEC. 101. (a) Notwithstanding any other provisions of law, during the first five years of this Act, if the Secretary of the U.S. Department of Agriculture finds that the production of wheat, corn, cotton, feed grains, or any other commodity of production in any calendar year is excessive in relation to available market outlets and desirable strategic reserves, he may require as a condition precedent to receiving food and fiber parity payments, that each qualified Farm Family Unit shall restrict the acreage of those crops in over production to not less than 75 per cent of the acreage planted or harvested in the immediate past three years. An acreage of cropland equal to that diverted from such production shall be set-aside and used only for approved conservation, grazing, recreational and wildlife purposes upon the condition of approved practices of husbandry as may be prescribed by the Secretary and for a compensatory payment equal to the net average income of all acres of production of the Farm Family Unit.

SEC. 102. In any year in which the Secretary informs producers that an increase in acreage planted to any crop is needed to maintain adequate market supplies and rebuild carryover stocks to more desirable levels, the minimum fiber and food subsidy payments shall be increased by not more than 25 per centum over the level specified in section 1901 of title III of this Act.

TITLE V—CONSERVATION, PRESERVATION, AND RECREATION

SEC. 101. Notwithstanding any other provisions of law, each farm family unit shall be entitled to ecological and environmental improvement payments equal to a maximum of 90 per centum of the actual cost of approved practices for land and water conservation, abatement of pollution, preservation of wildlife habitat, and the development of recreational facilities, not in excess of a maximum of $3,000 per annum or in the alternative a direct payment computation equal to the immediate 3-year average per acre net income of the remaining unit acres of production, whichever is greater for actual performance of prescribed practices of ecological and environmental improvement programs.

(a) The intent and purpose of a national effort of ecological and environmental improvement shall be predicated upon the national interest with emphasis on each Farm Family Unit and community improvement.

(1) Farm Family Unit participation shall be compensated upon performance as prescribed by the Secretary but in no case at a rate less than a sum equal to the net average per acre income of the remaining acres of production of the Farm Family Unit.

(i) Farm Family Unit participation in preservation of wildlife habitat and the development of rural recreational facilities shall be premised upon controlled public access as prescribed by the Secretary of the U.S. Department of Agriculture.

(ii) The Secretary of the U.S. Department of Agriculture in prescribing public access to private lands shall rely upon the recommendations of the local, county and state elected Committee members of the existing Agriculture Stabilization and Conservation Service or such other elected "peer" group thereof.

(2) Farm Family Unit participation shall be emphasized and encouraged for the improvement of the community and national ecological and environmental conditions with preference practices for the Farm Family Unit but including community and regional projects participation as may be approved by the Secretary of the U.S. Department of Agriculture.

TITLE VI—REPEAL OF CERTAIN PAST PRICE-SUPPORT LEGISLATION

SEC. 101. All previous legislation relating to price supports and production controls for wheat, corn and feed grains, now in effect are hereby repealed.

SEC. 102. No regulations issued under existing Federal market orders shall be adversely affected by this Act unless deemed to be in direct conflict with the provisions hereof and in such case the provisos of ths Act shall control, prevail and supersede the provisions of such federal market order(s) that increase or tend to increase consumer costs of food and fiber.

TITLE VII—INVESTMENT IMPROVEMENT INCENTIVE

SEC. 101. Each Farm Family Unit possessed of a vested interest in improvements on land shall be entitled to a 7 per cent investment credit against federal income tax liability in a sum equal to the multiple factor of assessed valuations for improvements in the same manner as prescribed in the Internal Revenue Code for personal property used in the production of income.

SEC. 102. The Investment Improvement Incentive Tax credit shall be otherwise administered consistent with and pursuant to the provisions of the Internal Revenue Code of 1954 and Acts amendatory thereto.

TITLE VIII—ACQUISITION CREDIT FOR FOOD AND FIBER PRODUCTION

SEC. 101. (a) The Secretary of the U.S. Department of Agriculture shall establish and provide a system of long term, low interest rate credit for Farm Family Units in need thereof.

(1) Acquisition credit policies shall not exceed a level rate of interest in excess of 4 per cent per annum to qualified borrowers nor exceed a term of 40 years, either or both.

(2) Policies of credit shall provide for maximum participation of the private banking and credit systems with emphasis on the local banking credit facilities of the community in cooperation with the Farm Credit Systems and existing agencies of the federal government.

(3) Participating loans with approved local banks to Farm Family Units shall be fully guaranteed by the government secured by "black acre" with recourse, and,

(i) Land bank notes shall be negotiable in the commercial money market of the private sector of the national economy fully guaranteed by the Federal Government to preserve liquidity of the participating bank and banking interests and such notes secured by mortgage(s) and guaranteed by the Government shall be interchanged and acceptable by the Farm Credit System or exchanged in the private commercial money market to fully monetize the credit capacity of the borrower in acquisition of real property essential to the production of food and fiber and for other purposes as may be prescribed by the Secretary of the U.S. Department of Agriculture.

(ii) The participating bank or banks shall be paid not less often than semiannually, the difference between the level rate of interest (4 per centum per annum) paid by the borrower on the land acquisition loan, and the current money market rate of interest from funds and authorization granted by the Secretary of the U.S. Treasury through the U.S. Department of Agriculture directly to the participating bank(s) for administration and supervision of the acquisition loans approved to the borrower as a qualified Farm Family Unit. The Government shall have full recourse on all secured real estate mortgages so guaranteed subject only to the priority of the participating bank(s) as mortgagee and the Secretary shall reserve all rights of periodic examinations to verify the security interest of the Government without notice.

SEC. 102. The Secretary of the U.S. Department of Agriculture shall have the authority to prescribe criteria for eligibility, participation and qualifications of banks, borrowers and participants with the advice and counsel of a local "peer" committee, such as the ASCS committeemen or such other designated group acting therein.

SEC. 103. The Secretary of the U.S. Department of Agriculture is directed to issue such regulations as shall be deemed essential and necessary to administer all titles of this Act in a fair, just, objective and orderly manner.

TELEPHONE CONVERSATION—PART III

HON. ALPHONZO BELL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. BELL. Mr. Speaker, this is the last in a series of telephone conversations between Lev Lerner of Leningrad and S. J. Lotwin of Los Angeles. It is a followup to the two prior conversations which I inserted this week in the CONGRESSIONAL RECORD:

TELEPHONE CONVERSATION, JULY 9, 1972, BETWEEN LEV LERNER, LENINGRAD, U.S.S.R., AND S. J. LOTVIN, LOS ANGELES, CALIF.

L.L. Hello.

S.L. This is Stuart Lotwin, Lev.

L.L. Yes.

S.L. How are you?

L.L. Bad!

S.L. Bad?

L.L. Yes.

S.L. Would you recap, speaking slowly, what the situation is with you.

L.L. Sometime, about two weeks ago I got the last refusal.

S.L. Yes, I know. Continue on, Lev.

L.L. What?

S.L. Continue, two weeks ago you got the refusal.

L.L. Yes. Exactly—the formula of refusal is that I have in my disposal information which represents the State secrets. But it does not correspond to reality.

S.L. Yes, I know.

L.L. I know that on my first work was the meeting of Technical Committees of which has decided that I have no secret information.

S.L. Very good.

L.L. Because of this meeting there is no reason for the refusal for my whole family. Do you understand?

S.L. Yes, I understand perfectly. Lev, let me say this to you. There was an article in the newspaper in the United States yesterday that said the Russian Authorities are doing this to everyone who is an engineer.

L.L. Yes.

S.L. So, you have not been singled out.

L.L. Yes.

S.L. You see what I mean? Lev, you are now working on textile machinery, is that correct?

L.L. Yes, this is correct.

S.L. Before, what type of product did you work on? Do you know what I mean by product? What type things were you designing for? Do you understand?

L.L. Repeat once more please, loudly.

S.L. What kind of products were you engineering for?

L.L. Before?

S.L. Yes.

L.L. Before I worked as engineer on radio techniques.

S.L. On what?

L.L. Radio techniques.

S.L. O.K. I got that. I understand and we're trying to do something about this and we will. You are still working now though, aren't you?

L.L. No, now my work is on the textile machines.

S.L. Yes, on textile machines; but you're working, yes?

L.L. Yes.

S.L. Yes, good. How is Zina? Is she working?

L.L. She is working but the situation for her work is very unsteady.

S.L. Unsteady. Yes, but she's working now.

L.L. Yes, she is working now.

S.L. Fine! How is everyone otherwise? Is everything well?

L.L. Yes, it is so hard.

S.L. It's what?

L.L. Not very well and not very bad.

S.L. I see, but everyone's O.K. Your parents well?

L.L. Yes.

S.L. That's good. Lev, there's some people here who would like to know why you would like to go to Israel. Could you tell us why?

L.L. Repeat once more, Mr. Lotwin.

S.L. Yes, would you say on the telephone now the reason why you want to go to Israel.

L.L. Yes, I understand. Because we are sure that Israel is our historical and spiritual homeland and it is our national homeland and we could live only in Israel. Do you understand?

S.L. Yes, O.K., fine, very good. Lev, how is Asia? Is she in school? Has she had any trouble in school because of your desire to go to Israel?

L.L. No, there are no troubles in the school.

S.L. Well that's good. So, she has not been affected.

L.L. Yes.

S.L. Lev, there are a couple of other things I wanted to tell you.

S.L. On July 18th, in other words a week from Tuesday, there is a ship arriving in Leningrad that's coming from Hamburg. Our Rabbi is on that ship and he would like to meet you.

L.L. Yes.

S.L. Now, he does not have your telephone number, but I thought if I could give you his name; could you find out what ships are arriving at the port of Leningrad and perhaps meet him at the ship?

L.L. Yes.

S.L. O.K., his last name is Lewis.

L.L. Give him the number of my phone.

S.L. I don't know if he has your telephone number.

L.L. Yes.

S.L. He knows about you. He tried to call you with me on one of the days when we couldn't get through—when President Nixon was there. He wants to meet you but I do not know if he has your telephone number. So, could you find out what ship is coming from Hamburg, Germany to Leningrad on July 18?

L.L. July 18th?

S.L. Yes. His first name is Albert.

L.L. Albert?

S.L. Yes, that's correct.

L.L. The second name?

S.L. Lewis.

L.L. Lewis?

S.L. Lewis, yes correct. He is my Rabbi from Los Angeles.

L.L. Yes, I understand.

S.L. Good, and he would like to meet you and talk to you.

L.L. Yes, we shall wait.

S.L. Then you will try to do that? To meet him?

L.L. Yes, if it will be possible.

S.L. Good, fine. I will try to send him a cable with your telephone number.

L.L. It will be more convenient if he calls to us.

S.L. If he calls you! O.K. Now, I spoke yesterday to Howard Goldenson. Do you remember him?

L.L. Yes.

S.L. Yes, he called me yesterday and we had a very pleasant conversation about you.

L.L. Yes, thank you very much.

S.L. He also gave me the name and address of your relatives in Cleveland, and I will reach them as well.

L.L. Yes, thank you very much.

S.L. Good. There is a man in Cleveland, if we can get to him he can be a big help in getting your visa approved. We're going to try that approach, too.

L.L. Yes.

S.L. O.K. Now, I am glad to hear that you're working and we clearly understand the situation with your visa.

L.L. Yes, yes.

S.L. And I want you to know there are many people here who have been working very hard and you're getting very well known. Yesterday, on Saturday, there was an article in the newspaper about you that has been read—this newspaper is the biggest newspaper in the Western part of the United States—and you are on the first page of it.

L.L. Yes, I understand.

S.L. And you've also been on the radio here.

L.L. Yes.

S.L. And there are newspaper men and radio people who are going to call me in about an hour to learn of our conversation and then to do more about it. So, there's a lot of people who are trying and your name is getting well known in the press and that's got to help.

L.L. Yes.

S.L. And you're trying and you're going to make it, Lev. You understand?

L.L. Yes.

S.L. So, keep your spirits up and your confidence and when it seems bad, don't think that they are only singling you out because it is happening to just about everyone with an engineering degree.

L.L. Yes.

S.L. O.K. So, keep your spirits up because you are going to make it. I am sure of that!

L.L. Yes.

S.L. And I hope it's soon but we're going to have it happen. Now is there anything else you would like to say, Lev, today.

L.L. I want to ask you to say to all our friends that our only one dream is to get the permission for going to Israel and to live with our people in Israeli boundaries.

S.L. Very good, we will and we will have this known by many people as well.

L.L. Yes, thank you very much.

S.L. Lev, would you write a letter to me and I will send you more letters. I think my two letters have not gone through to you.

L.L. Yes, I have sent to you the letter.

S.L. Oh, good, good.

L.L. But did you send me the letter?

S.L. I sent you some letters and I will send you more letters next week. I am going to send you a series of letters including things which you will find interestng to read.

L.L. Yes.

S.L. O.K. I'll send a series of them and I'll send our picture. So if you write; I think if we write to each other every week, whether we get a letter or not, do that because it is good to hear from you, and I think it will be helpful to have letters.

L.L. Yes.

S.L. O.K. Listen, tell Zina's mother that I will give her regards to her brother this week.

L.L. Yes, thank you very much.

S.L. Yes, and also if you will give our regards to your family.

L.L. Yes, and send our greetings to your family, too, and to all our friends.

S.L. I certainly will.

L.L. Yes, thank you very much.

S.L. And what I'll do is I will call you back—probably the beginning of August.

L.L. Yes, thank you but it will be more convenient if it will be on Sundays at the same time.

S.L. Sundays, at this time.

L.L. At the same time, yes.

S.L. The reason we called the other time was because of the people from the newspaper and radio who wanted to talk to you, but we will call you . . .

L.L. It was impossible, yes?

S.L. Yes.

L.L. You couldn't hear me.

S.L. Yes, it was impossible and, I think, deliberate.

L.L. Yes.

S.L. Do you understand?

L.L. Yes, I understand everything.

S.L. So, we'll talk to you the beginning of August this time.

L.L. Yes, thank you very much.

S.L. O.K., fine. So say . . .
L.L. On Sunday at the same time.
S.L. Yes, Sunday. O.K.
L.L. Thank you.
S.L. And Shalom, Lev.
L.L. Shalom to you and to your family.
S.L. Thank you, goodbye now.
L.L. Goodbye.

TRIBUTE TO THE LATE HONORABLE RALPH TYLER SMITH

HON. TOM RAILSBACK

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. RAILSBACK. Mr. Speaker, I join with other members of the Illinois delegation in expressing a personal sense of loss in the passing of former Senator Ralph Tyler Smith, taken from his family and countless friends in the very prime of a productive and distinguished life.

Born in Granite City, Ill., on October 6, 1915, he was graduated in 1937 from Jacksonville's Illinois College and was awarded a law degree from Washington Law School in St. Louis, Mo., in 1940. He began the practice of his profession in Granite City where he joined the U.S. Naval Reserve immediately after Pearl Harbor. As a commissioned officer, he served for 5 years in both the Atlantic and Pacific combat theaters.

After release from active duty, he resumed the practice of law and then sought elective office in 1954. He served 15 years in the Illinois House where his qualities of leadership were recognized by his selection as majority whip and speaker. He was appointed to the Senate of the United States in September of 1970, and served until January of 1971.

Throughout his career he was known for the loyalty he deeply felt and convincingly demonstrated to his country, his State, his party, and his friends. His strongest public stands were taken on issues of fiscal responsibility. As speaker of the Illinois House, he evinced outstanding legislative leadership and sagacity in gaining enactment, by a closely divided body, of his Governor's programs, including the first income tax in the State of Illinois.

At the time of his death, he was devoting his entire energies to practicing law and to participation in church, fraternal, and community affairs. He had refused to abate his effort notwithstanding earlier heart attacks in the past 2 years. He was a past president of the Optimist Club, director of the Greater Alton Association of Commerce, president of Alton Shrine, elder of the College Avenue Presbyterian Church, and a valued member of many other fraternal and civic groups.

I extend my sincere sympathy to his wife, Mary, and to his daughter, Sharon Lynne. Among their cherished memories of their husband and father is their recollection of his role as a dedicated public servant.

YOUTH, DRUGS, AND MINIMUM WAGES

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. CRANE. Mr. Speaker, those who have advocated an increase in the minimum wage as a way in which to help the disadvantaged—the poor, the young, and the black—have produced a situation in which almost exactly the opposite effect is brought about.

Prof. James Tobin, a member of the Council of Economic Advisers under President Kennedy, pointed out that:

> People who lack the capacity to earn a decent living should be helped, but they will not be helped by minimum wage laws, trade union pressures, or other devices which seek to compel employers to pay more than their work is worth. The likely outcome of such regulations is that the intended beneficiaries are not employed at all.

A similar view has been expressed by Dr. Robert M. Reese, executive director of the Ohio Vocational Association. He noted that:

> For years, vocational educators and others have worked diligently to change work laws for youth so that they could obtain experience in employment.

He went on to say, in a letter to columnist Alice Widener, that the recent Senate proposal for a $2.20 minimum wage would "wipe out all the gains we have made in enabling lower-ability, disadvantaged youth to get the motivation of work to stay in school and become productive citizens."

Mrs. Widener, discussing the effect of joblessness among young people and the related rise in narcotics addiction, refers in her article to a question asked by the New York Daily News of an Indiana boy.

The question was:

> How much do you know about the danger of drug addiction?

The answer:

> A whole lot. It's a problem in my hometown . . . Why did these students use drugs? It gave them something to do. I worked every day after school, from 1 p.m. to 9 p.m., so I had plenty to do.

The steady increase in minimum wage laws has made it almost impossible for teenagers to find employment. Such increases, instituted by those who proclaim themselves to be the friends of the "underprivileged," have had an unfortunate result. They have, as with so many Government programs, hurt the very people who were meant to be helped.

I wish to share Alice Widener's column, "Youth, Drugs, and Minimum Wage," with my colleagues. It appears in Human Events of August 16, 1972.

The column follows:

YOUTH, DRUGS, AND MINIMUM WAGE

(By Alice Widener)

Dr. Robert M. Reese, executive director, Ohio Vocational Association, recently wrote in support of my column on youth, work, the minimum wage and child labor laws, "For years vocational educators and others have worked diligently to change work laws for youth so that they could obtain experience in employment."

Dr. Reese went on to say that the recent Senate proposal for a $2.20 minimum wage would "wipe out all the gains we have made in enabling lower-ability, disadvantaged youth to get the motivation of work to stay in school and become productive citizens."

Besides motivation to stay in school, jobs for teen-agers have another great advantage eloquently expressed, Aug. 2, 1972, by an Indiana boy in answer to the New York *Daily News* Inquiring Fotographer, who asked young people, "How much do you know about the danger of drug addiction?"

Larance E. Vinson, 18, a recent high school graduate, Elwood, Ind., replied: "A whole lot. It's a problem in my home town. We've had movies in high school and I know a few students who got sick from overdoses. Why did these students use drugs? It gave them something to do. I worked every day after school, from 1 p.m. to 9 p.m., so I had plenty to do."

That is a most cogent reply. Every member of Congress should read it. Larance obviously put in an eight-hour work day after each school day. Many parents and sociologists might describe such a schedule as cruel. A glance at Larance's handsome, happy, healthy face shining out from the *Daily News* gives the lie to such a judgment.

The young man is obviously the diametric opposite of the pathetic, apathetic or spoiled-rotten idle youth who turns to drugs because he desperately needs, and either consciously or unconsciously wants, "something to do" but isn't trained to do it or spurred on to do it.

Recently it was announced on the noon radio news that the number of teenagers in New York City has soared during the last decade and there are now 70,000 more than in 1960. That is about as many individuals as the entire population of Reno, Nev. With schools closed for three months and teen-age jobs lacking is it surprising there is a tragic increase in street crimes of all kinds, in youth gang warfare, youthful drug addiction, and juvenile delinquency?

When are we going to learn that idleness breeds mischief among teen-agers? When are we going to add up the youth-drugs-unemployment score and quit spoiling our young people by supporting them financially from 13 through 21? When are parents and teachers going to spend as much time in stressing money-jobs education as sex education? Winston Churchill said, "Everyone must work. . . . I do not understand those foolish people who waste their lives killing time till time kills them."

Killing time by young people is maiming and killing many of them through drug addiction arising from idleness. That's what 18-year-old Larance E. Vinson says and he is 100 per cent correct. He should be interviewed on TV nationwide.

HOW CHILDREN LEARN

HON. ORVAL HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. HANSEN of Idaho. Mr. Speaker, at the recent early childhood conference I sponsored in Idaho, three panels were featured on the program. All did an excellent job of pinpointing some of the issues that have come up in the early childhood field and in identifying some of the obstacles that we have to overcome and problems that we must solve as we move ahead to meet the needs of young children.

Dr. Wylla Barsness, assistant professor of psychology at Boise State College, chaired a panel on "How Children Learn." The group discussed some of the ways we can help children get the best possible start on their learning and let them live in the fullest way. Panelists include Margaret Arnold, teacher at St. Michael's Cooperative Preschool in Boise; Corrine Berg, teacher in the Boise Public School kindergartens; Judy Schrag, consultant, Idaho Department of Social and Rehabilitative Service; and Mary C. Smith, kindergarten supervisor, Boise Public Schools.

I would like to include an excerpt from the panel in the RECORD:

HOW CHILDREN LEARN

(By Margaret Arnold)

We are apt to make an artificial distinction between learning and living. We treat preschool and kindergarten programs as experiences to prepare children for the "real" thing to come. But children, and all of us, learn as we experience and every experience provides learning. The question we are asking is "What kind of experiences do we provide?" "How do we let learning happen?" "What are the optimal conditions for learning?"

It is necessary to provide for various elements in a child's early learning environment in order to provide for later development of the child. For example, nutrition of adequate quantity and quality is a necessary environmental element for early development of infants and children. Researchers such as Birch, Platt, and Cravioto have suggested that a critical period for good nutrition exists from 0–18 months and that once this critical period is over, nutrition rehabilitation introduced does not result in the return to normalcy of the affected central nervous system. Their research has shown that children who have experienced acute malnutrition and prolonged malnutrition during infancy and early childhood results in a reduced number of brain cells, reduced brain size and composition, and difficulties in intersensory integration necessary for later learning in school.

A second essential environmental element in early learning is the presence of a climate fostering adequate personality development. A child learns through his feelings as well as his thoughts. The cognitive function is seen as interactive, not independent of the affective function. A child's attitude toward himself as a competent person of worth or as an inept person of little worth will necessarily affect his ability to cope with his environment. It is not necessarily the amount of knowledge and skills which will insure school success, but rather his attitude toward himself as a capable and competent person who can effectively use those skills. An optimal environment fostering personality development stresses genuine relationships with adults who are understanding and supportive of a child's developmental thrusts toward trust, autonomy, and initiative.

Another dimension of an optimal environment for learning is early stimulation. Learning theorists such as Hebb and Piaget have stressed the importance of early sensory and perceptual experiences for problem solving and learning in subsequent periods of development. Researchers have suggested that where the environment rates high in stimulation value, a baby's DQ increases between the ages of 6–12 months—where that stimulation value is low, the baby's DQ is likely to drop. A stimulating environment for the preschool child includes access to many play materials and play experiences. A child learns through his own explorations and through rehearsing and reliving experiences through play. The child, in play, is master of the outcome and thereby develops an increasing ability to cope with the real world.

Other optimal conditions for learning include rich and varied cultural experiences, a social learning environment, and a positive emotional climate.

SUCCESSFUL FARMFEST, U.S.A., ANTICIPATED

HON. ANCHER NELSEN

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. NELSEN. Mr. Speaker, I wish to express my appreciation to the Congress for its agreement to a joint resolution authorizing the President to invite foreign nations as well as the States of our Union to participate in Farmfest, U.S.A., to be held during September in my congressional district in Minnesota.

I was the original author of this resolution, introduced September 28, 1971, in behalf of our entire Minnesota delegation in the House of Representatives, and I am delighted that it has received favorable consideration.

It may be of interest to our Members to know that anywhere from 250,000 to 500,000 persons are expected to attend Farmfest, which its sponsors believe will be the largest agricultural exposition ever held. The weeklong event from September 11 to 17 on the Bert Hanson farm adjacent to Vernon Center, Minn., will feature world, national, and State plowing contests along with exhibits, demonstrations, and such top-flight entertainment as Bob Hope, Roy Rogers, and Dale Evans and country-western star Charlie Pride.

There is also a good possibility that one or both presidential candidates will appear at Farmfest.

At the present time, some 40 competitors from at least 20 countries around the world will be competing during the exposition for the title of world's best plowman. It will be only the second time that the United States has served as host country for the worldwide plowing matches.

Certainly, this agricultural exposition is an event that will boost worldwide friendship and international farm trade as well as serve as a great showcase for farmers, their products, implements, and agribusiness allies. We are grateful to all those in Minnesota who are working so diligently to make this enormous undertaking successful and memorable.

GOVERNOR REAGAN VETOES IMPORTANT FARM JOBLESS BILL

HON. ROBERT L. LEGGETT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. LEGGETT. Mr. Speaker, once again the legislature of my home State of California has pioneered much needed social legislation.

California already has a reputation for progressive legislation concerning education, welfare assistance, and medical aid to the indigent. The California Legislature recently reaffirmed this tradition with their approval of unemployment insurance for farm workers. Unfortunately. Governor Reagan has once again chosen to turn his back on the needs of the people by vetoing this important bill.

California is the breadbasket of the Nation. Its agricultural industry produces 40 percent of all the food and fiber grown in the Nation. The farmworkers are, in turn, the heart of this industry. For too long the farm laborer has been denied the social benefits uniformly granted to all other workers.

There is no reason why someone who works in the field should not be treated with the same dignity and respect that is accorded to white- and blue-collar workers. Farmworkers, after all, are the people responsible for placing the food on our dinner table.

Apparently Governor Reagan does not appreciate the important position of the farm laborer in our society. Moreover, he is apparently blind to other economic benefits to be gained from this legislation.

In the past, farmworkers have been forced to apply for welfare, particularly low wages of the agricultural industry and the seasonal nature of the work. This legislation would have guaranteed a steady income for farmworkers who live by following the harvest around the State. The veto of this bill is a blow to the taxpayers of the State.

At this point in the RECORD, I insert a column from the California AFL–CIO News of August 4, 1972, entitled "Labor Hails Passage of Farm Jobless Pay Bill." Apparently the hailing was too early:

LABOR HAILS PASSAGE OF FARM JOBLESS PAY BILL

Senate action Wednesday giving final legislative approval to a State AFL–CIO bill extending unemployment insurance to farm workers was praised by the Labor Federation this week as "one of the most significant steps the legislature has taken in recent years to help curb the growth of the state's welfare rolls."

That was the comment of John F. Henning, Executive Secretary-Treasurer of the California Labor Federation, AFL–CIO, after the Senate approved AB 205, a labor-backed bill introduced by Assemblyman Jack R. Fenton (D-Los Angeles) on a 21 to 12 vote Wednesday night.

"California's general taxpayer has been obliged for generations to pay the welfare costs of thousands of farm workers who are forced to apply for welfare, particularly from November to March or April every year, largely because of the low wages that have haunted the industry and the seasonal nature of the work.

California agriculture is a $5 billion industry, producing more than 40 percent of all of the food and fiber grown in the nation. There is absolutely no just reason to continue to exclude farm workers from unemployment insurance coverage.

"On the contrary, as the leading agricultural state, California has an obligation to lead the way in bringing farm workers into the mainstream of American life and at the same time easing the welfare costs borne by the state's general taxpayers," Henning declared.

The Senate approved the bill after Senator Nicholas Petris (D-Oakland) urged support for it saying:

"The time has come to lift the mortgage off their backs."

Henning noted that unemployment insurance has long been available to cannery workers, building tradesmen and other workers in seasonal industries.

Voting for the State AFL–CIO-backed bill were:

Senators Alquist (D); Behr (R); Beilenson (D); Collier (D); Dills (D); Gregorio (D); Grunsky (R); Holmdahl (D); Kennick (D); Mills (D); Moscone (D); Nejedly (R); Petris (D); Roberti (D); Rodda (D); Short (D); Song (D); Stiern (D); Teale (D); Wedworth (D); and Zenovich (D).

Opposed were:

Senators Biddle (R); Bradley (R); Burgener (R); Carpenter (R); Coombs (R); Deukmejian (R); Harmer (R); Marler (R); Schrade (R); Stevens (R); Way (R); and Whetmore (R).

TRIBUTE TO J. HAROLD MOORE

HON. CHARLES S. GUBSER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. GUBSER. Mr. Speaker, a distinguished businessman in my congressional district, Mr. J. Harold Moore, will retire on September 1, after serving with the Bell Telephone System for 42 years. He has spent his last 10 years in California as general manager of Western Electric's service operations on the west coast.

I have had the pleasure of touring the Western Electric facility in Sunnyvale with Mr. Moore and particularly noticed the atmosphere of dedication and congeniality among his employees. I am sure this was a direct result of the kind of leadership Mr. Moore has provided. His company and his employees are involved in many community affairs, all of which are designed to make their community a better place in which to live.

Of special note is Western Electric's drug abuse program and the booklet, "Parents Guide to Marijuana," prepared as a community service by the company. Over 5 million copies of this booklet have been published and distributed by Western Electric and other companies and service organizations.

Mr. Moore's personal involvement in community activities has been varied. This year he is general chairman of the U.S. Treasury Department's savings bond drive in commerce and industry. He is past chairman of the Santa Clara County Metro of the National Alliance of Businessmen; and he has served in many capacities with the Santa Clara County United Fund, the Sunnyvale Chamber of Commerce and with Junior Achievement.

There is much more that can be said about this fine gentleman. But in paying tribute to Mr. Moore on the occasion of his retirement, I would like to emphasize that his business successes throughout his entire career have always been turned to the betterment of mankind, a worthy characteristic we should all emulate for a better world.

TELEPHONE PRIVACY—XXXVIII

HON. LES ASPIN

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. ASPIN. Mr. Speaker, I reintroduced the telephone privacy bill on May 10, 1972, with a total of 48 cosponsors.

This bill would give individuals the right to indicate to the telephone company if they do not wish to be commercially solicited over the telephone. Commercial firms wanting to solicit business over the phone would then be required to obtain from the phone company a list of customers who opted for the commercial prohibition. The FCC would also be given the option of requiring the phone company, instead of supplying a list, to put an asterisk by the name of those individuals in the phone book who have chosen to invoke the commercial solicitation ban.

Those not covered by the legislation would be charities and other nonprofit groups, political candidates or organizations, and opinion polltakers. Also not covered would be debt collection agencies or any other individual or companies with whom the individual has an existing contract or debt.

I have received an enormous amount of correspondence on this legislation from all over the country. Today, I am placing a 36th sampling of these letters into the Record, since they describe far more vividly than I possibly could, the need for this legislation.

These letters follow—the names have been omitted:

Menomonee Falls, Wis.,
August 13, 1972.

Representative Les Aspin,
House Office Building,
Washington, D.C.

Dear Sir: I'd like to voice my support for the bill pending in Congress H.R. 14884! As a typically busy mother—nursery school registration chairman, United Fund, P.T.A., brownies, substitute teaching, channel 10 T.V., auction, sewing and mothering—I don't need any unsolicitated phone calls. Last week alone I had 3 calls within 2 days from the *same* carpet firm—needless to say I wasn't overjoyed! Anything you can do to get this bill passed will be greatly appreciated by many of us.

Sincerely,

——— ———.

Milwaukee, Wis.,
August 9, 1972.

Dear Sir: I would like to voice support for the bill pending in Congress, H.R. 14884, under which all you would need to do is to tell the telephone company that you don't want to be bothered by solicitors. The number of these calls is constantly increasing here and they are extremely annoying.

Sincerely,

——— ———.

St. Francis, Wis.,
August 15, 1972.

Dear Sir: I am writing you and urging you to please help to have bill H.R. 14884 passed. It would be wonderful not to be bothered by all the telephone solicitors.

Thank you.

——— ———.

Milwaukee, Wis.

Mr. Aspin: We are in full support of Bill H.R. 14884 pending in Congress to stop the use of the telephone as a selling media and will urge all our friends to voice their support of this bill.

——— ———.

Cudahy, Wis.,
August 10, 1972.

Representative Lee Aspin: I am writing this note out of desperation, to voice my support for the bill pending in Congress, HR-14884.

I certainly do believe that the public should have some control over telephone solicitors. We pay our monthly telephone bills so we may have the convenience of such a service; not so people out to sell us something can use this service.

Not only are these ever increasing calls a nuisance but, I feel that in the privacy of my own home, I should not have to be subjected to such high pressure and irritating antagonisms.

However, there is another aspect to this issue I also find it awkward and embarrassing at times, when such philanthropic organizations as the veterans, all church groups, and all fund raising campaigners call to ask you to buy, give or canvass the neighborhood for contributions.

I feel guilty saying no to these people but in all practicality we are not financially able to contribute to all the groups that call upon us. We have enough coming to our door, to whom I find it too difficult to say no.

With our complete phone directory services and transportation so readily available, it is my opinion that the consumer can go to the supplier when in need of a service or product. At least my family can and wish to do it this way.

When we are in need, we will *go* get it, but in the meantime we don't want to be bothered by these telephoning agents, who incidently have selected you at random, to be the recipient of a special introducing offer, to receive many free gifts or to allow you to invest in some promising business adventure. How much this will all cost is anyone's guess, but it won't look as good on black and white as it sounds over the phone.

Mr. Aspin, I urge you to continue in your efforts concerning the passage of this bill and I hope your co-sponsors will all work diligently concerning this issue.

Sincerely,

——— ———.

EQUITABLE TREATMENT FOR FOREIGN SERVICE EMPLOYEES

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. ASHBROOK. Mr. Speaker, on numerous occasions in the past I have called the attention of the House to serious problems of denial of due process and democratic procedures to employees of the Foreign Service of the United States. Since early 1968, when I introduced legislation calling for an appeals mechanism outside the State Department for Foreign Service officers, I have observed with growing incredulity the ever-proliferating devices to which management can resort to deny due process and fairplay to employees. The case of John Hemenway, a former FSO who was selected out of the State Department, is one instance in which State abuses have received public attention. After a strenuous battle, Mr. Hemenway finally was accorded an appeals hearing on the merits of his case and, after over 2 years in process, a decision on his grievance may be shortly forthcoming.

Recently, Mr. Hemenway voiced opposition to amendments to the constitution of the American Foreign Service Association—AFSA—the group which includes many Foreign Service employees in its membership. As AFSA is involved in the affairs of the Foreign Service, Mr. Hemenway's differences with that organization, of which he is a member, could possibly play an important role in the present drive to secure equitable treatment for Foreign Service employees in their grievance recourses. I insert at this point Mr. Hemenway's letter of August 17 to the chairman of the board of AFSA:

WASHINGTON, D.C.,
August 17, 1972.

AMERICAN FOREIGN SERVICE ASSOCIATION,
Chairman of the Board,
Washington, D.C.

DEAR MR. HARROP: In my letter to you of August 11, 1972, I recorded your personal involvement in attempts to censor materials I wish to send to the American Foreign Service Association (AFSA) membership under Article XI, Section 3 of the AFSA By-Laws. This letter records more fully your efforts at censorship, for the record.

In effect, by various devices, you and other members of the AFSA Board have placed obstacles in my way deliberately to make more difficult the exercise of rights of membership, in this case, my opposition to your proposed amendments to the Certificate of Incorporation (Constitution). I do not have to tell you that censorship can be exercised by a variety of means besides outright deletion or excision of material (which the Board also appears ready to do). In my view, the most insidious of your maneuvers are those calculated to delay my access to the members so long that my communications will become moot through tardiness.

Surrogates for censorship used by you and the Board have included: (a) demands for payment for the AFSA mailing list; (b) insistence that my mailing to the membership meet the Board's test of "germaneness"—even though I was opposing the Board's own amendments; (c) restrictions on the length of my statement of opposition circulated to the membership; (d) various artificial contrivances as the requirement that the address stickers I was required to pay for not be removed from the AFSA Club until attached to envelopes I had provided for the mailout.

Delay—one of the key motivations for all censorship—already has resulted from the Board's action.

The purpose of this letter is to set down as a matter of record various attempts by you and the AFSA Board to suppress information I wish to send to the AFSA membership at my own expense. You are obstructing my efforts to inform the membership that the wise course would be to reject the amendments to the AFSA certificate proposed by you and the AFSA Board.

1. *At the June 28, 1972 Annual Business Meeting,* I requested precise information concerning salaries the Board sought to "regularize" by amending the Certificate. No adequate explanation was ever offered at that meeting. To this day no one (outside the Board) knows what must be "regularized". The term "regularize" was used in the July and August *Foreign Service Journal* in transmitting official Board positions endorsing the amendments. The presumption therefore persists among many informed AFSA members in Washington that something is or was not regular with present Board financial arrangements concerning:

(a) Previous borrowing from the scholarship fund;

(b) Borrowing to cover borrowing from the scholarship fund, now presumably paid back;

(c) Payment of salaries to Board members in the approximate amount of the amounts which have been borrowed.

2. *Restriction by you of opposition statement to 600 words* was, in itself, hardly conducive to "openness". When eight amendments are involved, such restrictions are a blatant curtailment of open discussion. It is a dodge for censorship. Simply to cite the language used in the eight amendments and the changes made would have taken more than 600 words!

My protest to this limitation was met by a deadline of only three (3) hours to get a 600 word protest into the *Journal*. Yet, the *Journal* was not mailed for another three weeks, leaving one to wonder why more time could not have been given me. Twenty-four hours would have been a help.

3. *Denied the right of an adequate statement in the Journal, I decided to contact the membership by mail.* This is the right of any member, under Article XI, Section 3 of the By-Laws. Here I was confronted with a host of problems designed to defeat my decision, delay the mailout, or reduce its effectiveness as an oppostion statement. My suggestions that the ballots and arguments of both sides be sent by first class mail were rejected.

4. *Payment for the list* was required from me, personally, although the list seems to have been given to others for no payment on other occasions. It is a requirement of the By-Laws that the Association address the envelopes for such a mailing; the By-Laws make no reference to payment for this service.

5. An Amendment Committee, handpicked by you personally and endorsed by the AFSA Board, which is pushing the amendments, did not contain a single opponent of the proposed amendments despite my specific suggestion that this would facilitate communication.

6. *The right you demanded to censor* my statement to the membership was expressed a number of times, but nowhere more clearly than the demand you had the Executive Director communicate to me on 11 August, 1972, which I made a matter of record in my letter to you of that date. You required that I make a statement as follows:

"I recognize the right of the AFSA Board to examine the contents of my mailing prior to my being allowed to remove the envelopes (bearing addresses) from the AFSA premises."

In my letter to you of 11 August, 1972, I told you this was a crass effort at censorship.

7. *Allegedly to "protect" the AFSA membership list* (in view of the upcoming elections under EO 11636, it was explained), but in reality in support of the censorship mentioned above, I was forced to affix address labels on the envelopes in the AFSA Club Building. My alternative to this arrangement—stated by the AFSA Board—was to pay an additional $84.00 (bringing the total to $184.00). Envelopes and postage extra, of course! There are a number of problems with this position of yours:

(a) It directly suggests that my opposition to the proposed constitutional amendments is somehow disloyal to AFSA—that I would work against AFSA's best interests.

(b) In fact, I am trying to defend the existing Constitution against what I consider improper usurpations by you and the present AFSA Board. Those of our colleagues who are in the field know little of past unauthorized actions of the AFSA Board and I am trying to inform them, against your opposition. You know very well that these amendments are only the first step to facilitate major revisions in the governing By-Laws of AFSA.

8. *When finally given me, the AFSA mailing list was unmanageable*, for it contained more than 10,000 names (AFSA membership is 7,252). Additional time and expense will be required to go through the names (which are jumbled and random) to find the 3,000 or so duplicate or improper names.

9. *Improper attitude of the AFSA Board* was demonstrated on many occasions, but at on time more appallingly than at the August 14, 1972 Board Meeting, which met to censor me, when Mr. Harris suggested that there was nothing to prevent me from using the US mails to contact anyone I cared to contact. His conclusion may have been that, therefore, the AFSA Board was not and could not "censor" me. That misses the point. To defeat the proposed amendments, I must contact AFSA members who are entitled to vote on the issue. To contact the Foreign Service generally through the Foreign Service list serves no purpose; it would greatly increase my costs. I must have contact with the membership; you, Mr. Harris, and the Board are inhibiting that contact and depriving the membership from having my views, which they can either accept or reject.

In sum, as I said in my *Journal* statement which was written on three hours notice, this matter has provided a very severe test for the much-proclaimed "openness" policy of the present AFSA Board. I think, Mr. Harrop, you and the Board have flunked the test. In that you share something in common with Mr. Macomber, whose policies you seem determined to promote—whether or not they are in the interests of the AFSA membership, the Foreign Service of the United States, or, for that matter, even larger interests.

I do not want to labor the point, but if you were really interested in protecting AFSA interests in the affairs of EO 11636, you would realize that possesion of the AFSA membership is irrelevant. The Foreign Service list is far better suited for someone grinding axes in that struggle. Practically all persons on the Foreign Service list (except CIA, DOD, Treasury and the like) can vote under EO 11636. Many people on the AFSA list can *not* vote under EO 11636. But they *can* vote against your proposed amendments to the AFSA Constitution. That is the vote that interests me and should interest the AFSA membership; no doubt that accounts, in part, for your obstructionist tactics in providing me with the AFSA list, as required by Article XI of the By-Laws.

Under your leadership, AFSA has failed to meet your own test of "openness" when you upheld the decision in an undated letter, of Mr. Michael Gannett, who wrote me:

"It should be understood that your additional statement will have to be germaine (*sic*), as judged by the Committee, to the proposed amendmends (*sic*)." (mis-spelling in the original.)

On August 15, 1972, on instructions from the AFSA Board, AFSA Executive Director Gerald Bushnell wrote me the following:

"In reference to items (2) through (6) listed in paragraph six of your *Outline for AFSA Board Meeting 14 August 1972*, the Board was unable to determine the germaneness of the additional material you proposed. . . ."

My items (2) through (6) to which Mr. Bushnell referred, were the following:

(2) A record of my difficulties in attempting to oppose the AFSA Board in these amendments.

(I believe this germane to all of the amendments.)

(3) Extracts from financial reports showing payments that are to be "regularized."

(Pertinent and germane to amendment no. 4.)

(4) Extracts from recent Congressional Hearings showing attempts of AFSA Board members to attempt to influence legislation and to carry on propaganda.

(Germane to amendment no. 4)

(5) Commentary on the ballot as published with the two statements; what to do to recall your ballot if it is already sent before this mailing was received and therefore marked incorrectly through error or misinformation.

(Germane to all of the amendments.)

(6) A return card that acknowledges that the addressee has received this mailing.

(Germane to this opposition mailing.)

You and the Board stand condemned by your own actions and record in this effort to censor me. The membership of AFSA—your own colleagues in the Foreign Service in Washington and in the field—deserve competency from a leadership aggressively dedicated to their interests. In fact, you and the present Board have supported elements of special interest within management circles of the Department of State which is supervising the noticeable decay of all standards in the service—including tenure and security for competent employees. Unfortunately, I have had to conclude that your decisions, individually and collectively as the AFSA Board, have been colored by your own personal future career planning—not the best interests of AFSA and its membership.

You might wish to comment on the "germaneness" of this letter, for I intend to send it to the entire membership of AFSA and to anyone else who might be interested.

Sincerely yours,

John D. Hemenway.

ELLEN FULLARD-LEO: GRANDE DAME OF HAWAII AMATEUR ATHLETICS

HON. SPARK M. MATSUNAGA

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. MATSUNAGA. Mr. Speaker, honored in Honolulu earlier this month, on the eve of the summer Olympic Games in Munich, was a lady who was saluted by several generations of amateur athletes, including former Olympians. Mrs. Ellen Fullard-Leo, now 88, devoted 64 amazing years to the advancement of amateur athletics not only in Hawaii but also elsewhere in the world.

Affectionately called the "grande dame of amateur athletics" in Hawaii, Mrs. Fullard-Leo at age 32 became the first woman on the AAU Board, and she still serves in that capacity. Recently, the AAU presented her a veteran's award and made her a life member. As a member of the U.S. Olympic Committee, she also served as an official at the first Pan-Am Games in 1951.

In order that others may derive enjoyment from reading about this delightful person in the world of amateur sports, I am submitting for inclusion in the Record an article entitled "She Has Built Her Life Around Amateur Athletics," which appeared in the Honolulu Star-Bulletin and Advertisers of August 6, 1972, and another, entitled "Mrs. Fullard-Leo, 88, Is Saluted Here," which appeared in the Honolulu Star-Bulletin of August 16, 1972:

[From the Honolulu Star-Bulletin and Advertiser, Aug. 6, 1972]

She Has Built Her Life Around Amateur Athletes

(By Ben Kalb)

When Mrs. Ellen Fullard-Leo got into a taxi a few days ago, the husky Hawaiian driver stared at the 88-year-old lady and said. "You look familiar. I've seen you before." He told her his name and she answered, "Oh, you used to be a boxer for Palama Settlement." That stunned driver nearly jumped out of his seat.

It's not uncommon for Mrs. Fullard-Leo to remember amateur athletes from Hawaii. She's built her life around them. And she doesn't really stun too many people nowadays. They just think she's so amazing anyway, that nothing she could do would surpass anything she's done previously.

They call Mrs. Fullard-Leo the grand dame of amateur athletics. It's appropriate. She's done more to organize and support athletics in Hawaii than anybody else and that's not a public relations man talking, that's fact.

She still keeps an up-to-date record book, but you'd figure at this point in her life everything would just become a blur of numbers with no names attached. Wrong.

"I can entertain myself a whole night by looking at these names and remembering the night they broke the records," said Mrs. Fullard-Leo in her slight English accent. "I like to compare what happens from year to year."

Mrs. Fullard-Leo, the youngest and last survivor of 18 natural and 12 adopted children, became interested in sports because her husband was a champion athlete and her mother always told her, "It behooves a good wife to get interested in what her husband does."

She was the first woman on the AAU Board and now 56 years later she's still there. She has been on the U.S. Olympic Committee and was an official at the first Pan Am Games in 1951. She was recently given a veterans award by the AAU and made a life member.

In May she was named Hawaii Mother of the Year ("I think I'm the only mother that ever won on athletic steam.") And if it wasn't for her, there wouldn't be as many athletic clubs in Hawaii. She's had a hand in organizing and supporting every club from judo to swimming.

Mrs. Fullard-Leo feels the emphasis on sports today is in the wrong place. She believes professionalism has taken over.

"People don't get into athletics today for sport, only to go pro, to sell themselves to the highest bidder for promotion," said Mrs. Fullard-Leo. "I like professional sports because an athlete had to be good to get there. But he's not my idea of a sportsman. He's an entertainer."

She believes the trouble with amateur athletics today is the training schedule. She visited Russia a while back and thinks as far as athletics is concerned they have the right idea.

"The Russians get their physical development when they learn their ABCs. Then when you're 10 or 12 you choose what sport you like. In this country you don't get physical development until high school."

She then dismisses the philosophy that if athletes do start young they will burn themselves out and retire from competition at 20 or so—an age when they should just that enjoying it.

"Promoters and the universities put athletes in the limelight too much. They get away from the spirit of sportsmanship. Like all good things they overdo it. Very often mothers and fathers are to blame. They want to make a name for themselves so they push the kids. I blame the newspapers too. You never see anything amateur. It's always professionals. People just place too much value on competition," said Mrs. Fullard-Leo, herself a sports columnist for the Advertiser from 1950–60.

She stands in back of the Olympics and Avery Brundage "200 per cent" but feels that the purpose of the Games has changed a little.

"The Olympics has become an advertisement for the city that hosts it," said Mrs. Fullard-Leo. "The glamor of the Olympics is lost because we have world championships in every event every year. I don't think the Olympics has lost its original purpose, but a gold medal today isn't as important. People want to cash in on it."

The International Hawaiian Canoe Association is throwing a testimonial for Mrs. Fullard-Leo, Aug. 14. They've rented a banquet room in the Ala Moana Hotel. It's a good choice, but if all the people Mrs. Fullard-Leo has helped in Hawaii decided to attend, they wouldn't even fit into Honolulu Stadium.

[From the Honolulu Star-Bulletin, Aug. 16, 1972]

Mrs. Fullard-Leo, 88, Is Saluted Here

Mrs. Leslie Fullard-Leo, 88, who has devoted some 64 years to the development and promotion of amateur athletics in Hawaii and around the world, was honored Monday at an Aha Aina Hoike held at the Ala Moana Hotel.

She was given award after award; was honored in speech and song and was saluted by former Olympians, officials of both government and athletic groups and was entertained by some of Hawaii's finest singers and dancers.

Mrs. Fullard-Leo was presented with replicas of Olympic medals, a life membership in the International Hawaiian Canoe Association, plaques, trophies, leis and carved canoes. She was honored as the "Grand Dame" of the Amateur Athletic Union, Nationally and Internationally.

Letters and citations were read from President Nixon, U.S. Sen. Hiram L. Fong, Rep. Spark M. Matsunaga, the AAU, the U.S. Olympic Committee, the U.S. Olympians, the Morning Music Club of Honolulu and several other organizations.

She also received letters from the mayors of Johannesburg, South Africa (where she was born) and Victoria, Canada, (where she helped organize amateur swimming.)

In response to all this recognition, the humble but fiesty sportswoman leveled criticism at the University of Hawaii for not having a rowing crew and the Hawaii Visitors Bureau for not cooperating with the local AAU. She stressed how the AAU gets no share of the annual "welfare drive" and even must pay rental for use of public school swimming pools, private tracks and the Honolulu International Center for indoor sports.

> "My 64 years in athletics have convinced me that the best advertising medium extant for any community, is competition by its championship-caliber athletes," she said.
>
> And she gave as examples, Chinese table tennis, South Africa's Gary Player in golf and "that chess game in Iceland."
>
> "And didn't Duke (Kahanamoku) in 1912 swim Hawaii right out of the Sandwich Islands?"
>
> Mrs. Fullard-Leo called for a continued promotion of canoe racing and suggested competition with England as part of Hawaii's celebration in 1978 of the discovery of Hawaii by Capt. James Cook.
>
> "We would send an Hawaiian crew to challenge Oxford in orthodox shell boat racing on the Thames—to be followed by an outrigger canoe race across the English Channel," she suggested.

WHO IS DESTROYING OUR ARMED FORCES? (III)

HON. JOHN G. SCHMITZ

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. SCHMITZ. Mr. Speaker, the following is from a UPI dispatch of January 23, 1971:

> The U.S. Army had built a wall around its installation at Cam Ranh Bay to keep out drug pushers and prostitutes. Now, however, the official policy is permitting ladies of the evening to be signed onto its bases officially in central Vietnam to meet American troops in their barracks. The key for admission to such bases is a Vietnamese identity card, a document that any undercover Viet Cong agent can obtain without difficulty. The Army admits that the girls are smuggling dope into the formerly walled installations, as well as posing serious security risks; but says the Army: the risks are worthwhile in the interests of keeping the peace within an increasingly disgruntled and demoralized Army.

That is an example of how Armed Forces policy, which should be building up the morale of our men in uniform, has been contributing to their demoralization in Vietnam. The origins of that policy can be traced to very high levels.

Until June 1970, for instance, two Navy lieutenants were giving morning intelligence briefings to the Chairman of the Joint Chiefs of Staff. Their names were Gordon Kerr and James Pahura, and both were members of the Concerned Officers Movement, an organization which has shown itself to be not concerned about victory over communism, but preferring Communist victory in Southeast Asia.

Going down one step in the chain of command, we come to Adm. Elmo R. Zumwalt, author of the famous Z-Grams. It was these Z-Grams that promulgated more sideburns, more liquor in the quarters, and similar changes in policy leading to what one source in San Diego would call "a dangerous undermining of Navy discipline and morale." It was in San Diego that 180 active and retired admirals voiced their vehement objections to the trend reflected in a New York Times report that:

> San Diego and other Navy towns were filled with off-duty sailors in unpressed dungarees often spotted with grease stains and paint and sometimes ripped.

No wonder a Navy man would comment in the Navy Times for November 1970:

> It is patently obvious Admiral Zumwalt intends to haul the U.S. Navy (willingly or not) into consonance with liberal America as it girds for the 21st century.

As this goes to press, Admiral Zumwalt has hauled the Navy still further in that direction by announcing his capitulation to the Women's Liberation Movement in the form of plans for young ladies to man battle stations aboard ship and perhaps even fly combat missions in Navy aircraft.

These trends were put in clearer perspective upon discovering that on June 2, 1965, Elmo R. Zumwalt became the youngest rear admiral in the Navy while serving as executive assistant and naval aide to Paul H. Nitze, then Secretary of the Navy, now negotiating for President Nixon's Disarmament Agency in Geneva. It was Paul Nitze who headed a five-man committee for the National Council of Churches in 1958 that called for—among other things— opposition to the development of U.S. military strength, except under United Nations control: opposed retaliation by the United States even if attacked; advocated turning over the Strategic Air Command to the United Nations; and urged that Quemoy and Matsu Islands be handed over to the Chinese Communists. Congressman WAGGONNER of Louisiana described this document as "a running theme of appeasement, coexistence, and surrender, the like of which probably cannot be found in any other document this side of the Iron Curtain."

At Fort Carson, Colo., once known as one of the toughest training areas in the United States, the Rocky Mountain News reported November 17, 1971:

> Bikini-clad go-go girls dance nightly in the enlisted men's service clubs. The post has two coffee houses, operated with government funds, where the G.I.'s gather to rap with their commanders, practice arts and crafts and many to vent their anti-Army, anti-Vietnam war views.

This undermining of our military by "pressure from above and pressure from below" follows the classic pattern outlined in Jan Kozak's book "And Not a Shot Is Fired." In a future series I will explore the part that tax-exempt foundations have played and are playing in these developments. Every American would do well to think very deeply on these words of the late Gen. Douglas MacArthur in his annual report as Chief of Staff of the U.S. Army in 1933:

> The unfailing formula for production of morale is patriotism, self-respect, discipline, and self confidence within a military unit, joined with fair treatment and merited appreciation from without. It cannot be produced by pampering or coddling an army, and it is not necessarily destroyed by hardship, danger or even calamity. It will quickly wither and die if soldiers come to believe themselves the victims of indifference or injustice on the part of their government, or of ignorance, personal ambition, or ineptitude on the part of their leaders.

TRAINING AND EDUCATION IN EARLY CHILDHOOD

HON. ORVAL HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. HANSEN of Idaho. Mr. Speaker, three panels at my recent early childhood conference in Idaho singled out some of the issues which are currently of importance in the early childhood field, and identified a number of the obstacles we have to overcome and problems we must solve as we move ahead to meet the needs of young children.

Chairing a panel on "Training and Education in the Area of Early Childhood" was Dr. Everett V. Samuelson, the very distinguished and highly respected dean of the college of education at the University of Idaho. In introducing his panel, Dr. Samuelson said:

> I think that when we say training and education, the first thing is to keep it as broad as possible—the whole idea—so that we won't think only "well, this would be a nice major if you were in college," or that a person must be a professional with umpteen degrees and letters behind his name to deal with children.
>
> The area of training and education should be a part of the long continuum of learning, so we need to think in terms of programs of junior high and high school level and we need to think in terms then of some college curriculums and in graduate work and everything else. By training people in early childhood we not only develop good teachers and good workers but also better parents, so that maybe you could say that there is a two-headed benefit to the area of early childhood.

Panelists were Carolyn Findlay, Idaho Office of Child Development; Dr. Harold Goff, director, education professions development, Idaho Department of Education; Lois C. Moss, home economics instructor, New Plymouth High School, Idaho; Peggy Pletcher, home economist, University of Idaho Extension Service; and Sarah Tracy, director of Child Care Studies, Boise State College.

I include excerpts from the panel in the RECORD:

TRAINING AND EDUCATION IN EARLY CHILDHOOD

(By Lois C. Moss)

> Vocational Home Economics in the Idaho High Schools provides opportunities for training for potential parents. It consists of a semester course proceeded by a general introduction of the subject in Home Economics I. Mostly sophomores and juniors are enrolled in the course.
>
> The over-all objections of the course is to learn how to build a feeling of trust and security in children by meeting and satisfying their basic needs. In trying to accomplish this objective students study the physical, emotional and social needs of children as they develop from infancy to adolescent. Ways of providing creative play are emphasized so the child has the opportunity to advance in sensory, artistic and muscular development.
>
> In about one third of the vocational home economics schools in Idaho a play school is used as a media for teaching child development. This is a very appealing way for students to learn about the development of children. It reinforces learning and at the same time does a service to the community.

Following is an explanation of how New Plymouth's play school is operated.

Fortunately there is available space to set up a play school and storage to keep the equipment the part of the year it is not in use. Girls homemade easels, picture puzzles, play furniture, doll houses and furniture, etc. are used to equip the school. Cast off and extra chairs and desks are borrowed from the elementary school to help equip; plus inflated inner tubes, and parts of junk cars, appliance cartons, blocks salvaged from lumber yards, etc. are used.

The play school is set up in two sessions. The first has children from two and one-half years to five years in attendance for a period of one month. four out of the five school days. Students work with the children, keeping the play and art media within the ability of their age. One class period is set aside to correct wrong procedures, discuss children reactions and plan for the following week. At the end of the younger children's session, the play school is analyzed, and learning procedures and ways of handling children are reemphasized.

Behavioral objectives of children five to school age are then discussed. Additional techniques are taught for development of children. Kindergarten procedures are used with this age group. The play school is repeated with the older children with the follow-up discussion at the end of the session. A comparison of abilities of the two age groups are discussed.

It is felt by many Home Economics educators that the child development classes are the most beneficial to the students. Techniques normally taught only in college classes are learned. The students are much better equipped to raise their own children and many misconceptions are cleared up by this course.

It also benefits the community by allowing a means for pre-school children to be together, learn to play with each other and slightly prepares them for entering the first grade.

IDAHO EXTENSION HOME ECONOMICS PROGRAM

(By Peggy Pletcher)

The University of Idaho Extension Home Economics Program provides education in all aspects of family living. Home Economists are employed in almost every county of Idaho to improve:

Family stability
Consumer competence
Family housing
Family health
Community resource development

Among those being served are:

Young families
Youth
The disadvantaged
The elderly
Professionals in other agencies
The general public

For the purpose of this conference today, I will tell you how extension home economics educates in early childhood development. It is done mainly through three of our programs:

1. 4–H program
2. Young homemaker program
3. Expanded food-nutrition education program

First, the 4–H program:

Through project work in 4–H, girls can gain skills, knowledge and attitudes to enable them to care for young children as baby sitters now and to enable them to provide a satisfactory growth climate for their own children in the future. Many project areas contribute to the girl's education in child development.

In clothing, she learns about children's clothing; in home improvement, she learns how the appearance of the home can influence all family member's happiness; and in art, she can learn the value of creative expression.

But, it is mainly the Foods-Nutrition project and the Child Development project that I want to emphasize. The goal of the Foods-Nutrition project is to promote good eating habits in children that will provide them with good health throughout life. It attempts to help change the national trend in teenage girls' eating. Too frequently their diet of empty calories does not build the body required for the pregnancies of early marriage.

Promoting adequate teenage nutrition today may provide the very best basis for adequate childhood development tomorrow.

The Child Development project itself consists of three units of study of the infant and young child.

1. "Sitting Pretty" is the first project. It emphasizes safety, story-telling and game playing; and skills such as diapering and feeding babies. The project requires 30 hours of child care and the making of a magic bag containing 5 safe toys to entertain children of different age levels.

2. "Toys are Tools" is the second unit. The emphasis is on toys as learning experiences for children. 4–H members learn the value of creative play for children. Again 30 hours of child care are required.

3. "More About Children" is the third project. Activities include helping children to learn a useful skill, to understand nature, and to experience dramatic play. Skills learned are bathing a baby and arranging play areas in the home. In all of these projects the teenager must demonstrate a skill or give a talk. This education is provided to the 4–H member by volunteer adult and older teen leaders who organize and supervise 4–H clubs. The Extension Home Economist trains these leaders.

The young homemaker is another primary educational target in early childhood development. The extension home economist uses radio, television, newspaper, newsletters, workshops, classes, and leader training programs to teach the young mother food needs and clothing needs in young children; creative experiences for children; guidance techniques for children, and human relations skill for all family members.

Intensive training will be given Idaho extension home economists next fall. You can expect a program thrust through increased emphasis on education in child development in 1973.

The third program through which Extension Home Economics teaches is called the Expanded Food-Nutrition Education Program. This education program is relatively new to the United States and very new to Idaho. Three years ago federal money was appropriated for the extension service to promote better health through improved nutrition for low-income and disadvantaged families. This money was used to hire paraprofessionals in 19 counties in Idaho. The Extension Home Economist provided intensive training for three weeks to enable these nutrition aides to work in the homes on a one-to-one basis with homemakers. Further training is provided through a weekly meeting of the aides. Each aide works with about 20 families at one time. While nutrition is the primary emphasis, many contributing areas are covered—money management, referral services, and child development.

Some training materials used with the aides and written in a simple style for the less educated parent are "Talk with Baby," "Play Games With Baby" and "Babies Look and Learn."

When homemakers know how to provide nutritious food for her family, she graduates from the program into a group learning situation.

In summary, we teach the teenager, we teach the young mother, and we teach the para-professional aide. There is a time-worn adage "The hand that rocks the cradle rules the world." Those of us in Extension Home Economics are working to see that it is a loving and capable hand that rocks that cradle.

IS THE WAR IN VIETNAM A RACIST WAR?

HON. SPARK M. MATSUNAGA

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. MATSUNAGA. Mr. Speaker, the administration's recent announcement of yet another increase in the bombing of North Vietnam, coupled with the withdrawal of the last U.S. ground combat forces from South Vietnam, makes it imperative for us to examine an aspect of the war which probably has received less than the attention it deserves.

Involved is a factor which will influence our policy in Asia for years to come, and which is already a source of great concern and embarrassment to some of our stanchest Asian allies.

Is the war in Vietnam a racist war?

Years from now, when the tumult and shouting surrounding Vietnam has subsided, history may record that the United States—a predominantly white nation commanding the greatest resources and the most advanced military technology ever known—systematically destroyed its foe—an Asian agricultural nation smaller than North Dakota—merely because its people wore yellow skins.

Would we pursue this policy of massive bombing and total destruction if the foe were a small, white Western nation? That is a crucial question which is being answered in the negative by some of our Asian allies who recall that a Caucasian nation was the first to use nuclear weapons against an Asian nation.

The total number of bombs dropped on North Vietnam exceeds the total dropped by the United States and its allies during World War II. Despite their numerous wars, the Western nations have stopped short of totally destroying their neighbors. However, Asian people on the other side of the world are different—or at least that is the way it must seem to our Asian allies.

I am submitting for inclusion in the RECORD a thought-provoking article by Honolulu Star-Bulletin Columnist William H. Ewing entitled "The Racist Factor in the War," and I strongly urge my colleagues to give more consideration to this important issue:

[From the Honolulu Star Bulletin, Aug. 16, 1972]

THE RACIST FACTOR IN THE WAR

(By William H. Ewing)

The racial factor seems to be an unmentionable aspect of our war with North Vietnam. Yet we all know the vast majority of white Americans regard any race other than Caucasian as inferior. The reason is that the only substantial contact they have had with another race is with black people. Blacks, they believe, are inferior; so, then, are all others except whites.

Here in Hawaii we know better. We Caucasians are aware that we ourselves are often, if not generally, looked down upon by Chinese and Japanese, and not without cause. We are acquainted with their natural and acquired abilities and we know these often exceed our own. But Hawaii is less than one-half of one per cent of the population of the United States, so we don't count for much as an example of national opinion.

Little by little, really at the pace of a microscopic snail, white Mainlanders are beginning to recognize the talents and latent abilities of black people. It may be true that the reason integration is proceeding faster in Mississippi than in Michigan is that Southern whites know blacks better. The Southern whites have stubbornly held off social integration as long as they could—it is a human failing to prefer to be on top—but there are too many black people who have distinguished themselves in too many fields to ignore them longer.

Mainland whites know very little about Asians, however.

The racial factor revealed itself in the Korean War two decades ago when American soldiers referred to Koreans, their allies as well as the enemy, as "gooks," "slopes" and other terms of denigration. Similar terms have become common in Vietnam.

Little is said about the courage of men who, fighting against the most lopsided odds in history, still are able to give a good account of themselves. No matter where you come from, regardless of the color of your skin, it takes a high order of valor to face and even invite death to accomplish a mission. The Viet Cong and the North Vietnamese have it. We have it, too, but that isn't the point. We assume our own men's courage because they are Americans. The point is that the enemy has it also.

From time to time someone has mulled over the question of whether, had Japan collapsed first in World War II, we would have dropped the atomic bomb on the Germans, a Western nation of Caucasian extraction. Nobody can say for certain, but it is my firm conviction that we would not.

To begin with, our allies would have objected. The Bomb was too fearsome an instrument to explode on a neighbor. The Europeans, despite their countless wars, would have shrunk from exterminating one another so ruthlessly. Asians on the other side of the world were different. In any event, history will record that a Caucasian nation was the first to use a nuclear weapon against an Asian.

History also will record that it was a Caucasian nation that, commanding the greatest resources ever known, and possessing a technology beyond even the imagination of its tiny enemy, methodically reduced that enemy—Asian—to the Stone Age.

Our leaders are not so outspoken as to say, as Gen. Curtis LeMay once said, that we are bombing them back to the Stone Age. But this is what is happening. When a nation loses its industry, its communications and its transport, not much is left except agricultural and animal life.

Would we do this to a Western nation? Would we do it to Cuba? Or Chile, or any other Latin American country? Or a European? Of course we would not. However insolent the enemy might be—a word President Nixon once used to describe the North Vietnamese—we would find a way to settle things without such wholesale destruction. The word "wholesale" is used advisedly. When a country smaller than North Dakota is plastered with the tons of explosive being unloaded on North Vietnam, any more limiting term would be inaccurate.

HOW WASHINGTON DECIDES WHAT MEDICINES YOU MAY TAKE

HON. JOHN G. SCHMITZ

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. SCHMITZ. Mr. Speaker, the following paragraph is from a letter to me from one of my constituents, Mrs. Phil Hardwick of Santa Ana—quoted with her permission:

> I was informed by my doctor's office that the drug Anergex has been taken off the market by the Food and Drug Administration, because they say they have found it ineffective. Both my son and I went through the series of shots for our allergies and found it very effective. . . . This is the one drug my doctor has used on me that really worked and believe me he has tried everything! . . . I hope that you (will) do whatever you can to get Anergex back on the market, to impress upon the Food and Drug Administration that it does work and we need the drug. . . . I really would appreciate it if there is anything you could possibly do."

The following correspondence ensued:

From my first letter to the Food and Drug Administration:

> The enclosed letter from one of my constituents, objecting to your action removing the drug Anergex from the market, is sent to you for comment and further explanation of your action.

From my second letter to the Food and Drug Administration:

> I have your letter of May 10 in response to my inquiry of April 13 following up a constituent's objection to the withdrawal of the drug Anergex from the market. Your letter is couched in very general terms explaining your authority to have such a drug withdrawn and the procedures required to obtain permission to reintroduce it. Your authority to take this action is not in doubt and my constituent is hardly in a position to undertake the procedures for reintroducing the drug to the market. What she needs to know is specifically *why* this drug was withdrawn.

Letter to me from the Food and Drug Administration, June 14, 1972.

> DEAR MR. SCHMITZ: This is in reply to your May 16, 1972 letter further regarding withdrawal of Anergex from the market. Anergex . . . was reviewed by the National Academy of Sciences-National Research Council and subsequently was the subject of an order withdrawing approval of the new drug application (NDA 10-491) published in the Federal Register of June 10, 1971. The Commissioner's finding is based on a lack of substantial evidence that the drug is effective . . . We cannot permit the continued marketing and human administration of Anergex.

Notice that in this correspondence, there is no reference to any findings or even any allegations that this particular drug is harmful to its users; furthermore, it was prescribed by a M.D. after extensive trials of other antiallergic drugs on this patient. The Food and Drug Administration, in its superior wisdom, simply refused to allow the drug to be bought or sold because they found it to be ineffective. Inquiries such as mine hit a solid bureaucratic stone wall. Many other Congressmen have had similar experiences. This is how Washington now decides what medicines you may take.

The same attitude and policies also extend to nutrition and dietary supplements. For several years the Food and Drug Administration has been developing regulations which, once they go into effect, will actually take vitamin pills off the market because of their alleged ineffectiveness. Congressman CRAIG HOSMER's Nutrition Protection Act, which would prevent this action, languishes untouched in committee.

It is bad enough that sufferers from alleregy and dietary problems are being or may be denied relief through actions like this. But it is still worse when people are abandoned to almost certain death by the same kind of bureaucratic arrogance, when a new treatment might save them. That is what is happening with the anticancer agent variously know as Laetrile, Amygdalin, nitriloside, or vitamin B–17, despite solid medical evidence showing that in a substantial number of otherwise terminal cancer cases it has greatly assisted the patient. For it happens that Laetrile does not fit the usual medical categories of anticancer agents; therefore, the Food and Drug Administration has prohibited even its testing by competent medical men. This scandalous situation will be further explained in a subsequent newsletter.

"MANNY" RIDGELL, THE MEMBERS' FRIEND

HON. JOHN A. BLATNIK

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. BLATNIK. Mr. Speaker, on Sunday, August 6, the House of Representatives lost a good friend. A. Emmanuel "Manny" Ridgell suddenly passed away. Manny had been the dedicated helper and friend for so many of us, and had been with the House of Representatives so long, that I guess we all assumed he would always be with us. The sudden and unexpected death of this friend of the House, is thus all the more distressing.

Manny had been Superintendent of the House Office Buildings almost as long as I have been in Congress, and he far outranked most Members in time of service to the Congress. Only Chairman CELLER and Chairman PATMAN have served the House longer.

Mr. Speaker, I wish to join my colleagues of the House in paying tribute to the career of this House veteran. He will be dearly missed. I also join my colleagues in expressing my profound sympathy to his wonderful family—a family that is a shining example of living the faith.

My words can bring them little consolation—far less consolation than their living faith brings to the friends Manny left behind in the House of Representatives.

MINNESOTA FARMBOY LEADS ZESTFUL LIFE

HON. ANCHER NELSEN

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. NELSEN. Mr. Speaker, much to my delight, the Washington Star carried a feature article concerning the healthiness and vigor of midwestern farm people, using as an illustration one of my constituents, Dick FitzSimmons of Good Thunder, Minn. I am pleased to insert this article by Andrew Malcolm of the New York Times News Service in the CONGRESSIONAL RECORD. Young FitzSimmons' story serves as an example of the zestful life enjoyed by people in our State of Minnesota and as an example to the Nation:

FARMBOY TYPIFIES HEALTHY AMERICAN

(By Andrew Malcolm)

GOOD THUNDER, MINN.—The stark farmyard light stands nighttime vigil over by the tool shed where the farm's six tractors are resting.

Then, almost stealthily, a thin band of pink light eases up into the Eastern sky over the tasseled tops of the mile-long cornfield.

As if on signal, the crickets' chirping gives way to the birds' singing.

The stars start to fade, and soon the sun is out again, baking the corn and soybeans and anyone not in the shade.

But by then 16-year-old Dick FitzSimmons already has had his first breakfast and done over an hour of grueling calisthenics for the football season.

VERY VERY HEALTHY

A sturdy, 5-foot-10-inches tall, FitzSimmons has long, dark blond hair billowing over his forehead. His tanned hands are strong and toughened. And he is very, very, very healthy.

In fact, young FitzSimmons fits the American Medical Association's latest profile of the healthy American.

The medical group analyzed the nation's disability days, when a citizen's normal activity is restricted because of illness.

On average, it found farm folk healthier than city people, Midwesterners healthier than any other region's residents, men healthier than women, young healthier than old, affluent healthier than poor, whites healthier than blacks, those living with relatives healthier than those living alone and July through September the healthiest months.

Of course, no one person can be selected as the healthiest American. But Dick FitzSimmons, a soft-spoken farmboy here in Good Thunder (pop. 468), 1,100 miles west of Times Square, in the endless flatness that is southern Minnesota, wouldn't be a bad choice.

UP AT 5 A. M.

Dick awakens at 5 a.m., grabs a piece of toast and a pillowcase holding his clean athletic cloths and heads down the dirt road in his 7-year-old Chevelle, the deep-throated mufflers echoing off the towering corn at roadside.

Twelve miles and 15 minutes later he is in the locker room of the Amboy-Good Thunder High School. By 5:50 a.m. he and 50 other football hopefuls are on the field where the mosquitos rise in tribute from the dew-covered grass.

"It's a beautiful morning," barks Coach Rich Bullard "C'mon, FitzSimmons, move it." And he does "move it" for two hours until his once-white T-shirt is soaked with perspiration and dirt and grass stains.

OFF TO THE STATION

Then a shower and a quick drive to Larson's gas station and lunch counter where he downs 20 ounces of milk and a couple of his favorite caramel rolls.

At home young FitzSimmons, his father and some cousins bale straw, expertly stacking over 300 of the dusty 50-pound bales on wagon after wagon under a cloudless blue sky.

Mrs. FitzSimmons, who is finishing her four daily loads of wash, serves lunch at noon, over three pounds of hamburgers, two dozen ears of corn, a salad, cottage cheese, peaches and pitcher after pitcher of cold milk. In the summer Mrs. FitzSimmons buys at least 14 gallons of milk a week.

"But I've never bought any vitamin pills," she says, "We never seemed to need them. We just get lots of fresh air, exercise and work."

OUR NATION SALUTES THE ESTABLISHMENT OF PASSAIC VALLEY COUNCIL, BOY SCOUTS OF AMERICA BY MERGER OF ALTAHA-AHEKA COUNCILS

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. ROE. Mr. Speaker, with the ever-growing demand for the learning experiences and unlimited opportunities for self-development and responsible service to our communities and our Nation provided to our youth by the Boy Scouts of America personifying all of the noble traditions of the foundation of our American way of life, I am pleased to call your attention to the contemplated merger of two of our most distinguished councils in my congressional district and the State of New Jersey—the Aheka and Altaha Councils—which will be formally incorporated on September 1, 1972 as the Passaic Valley Council, Boy Scouts of America.

As a member of the National Council of Boy Scouts and having been affiliated for many years as an executive board member of the Boy Scouts of America, Altaha Council, and presently as a member of their advisory committee, I am indeed pleased and honored to participate in commemorating the inauguration of this outstanding coordinated program of these prestigious Boy Scout councils, joining together the exemplary leaders and resources of Scouting in my region and providing comprehensive broader opportunities for our young people. There are presently 10,000 young men being served by the Altaha-Aheka Councils, soon to be known as the Passaic Valley Council.

We are all familiar with the noble traditions of the Boy Scouts of America and their outstanding public service to the people of our Nation in helping our young men to achieve leadership qualities of self-reliance, character building, international friendships, kindness, courtesies and eagerness to serve others. Their highest standards of excellence in exercising measures to "Keep America Beautiful," attain greater communion and understanding among all mankind, and continually developing and serving, by example, in working toward freedom and justice for all people in our Nation and throughout the world are a significant investment in the enrichment and excellence of the quality of our way of life here in America.

The fulfillment of the purposes, goals and aims of these Boy Scouts of America could not be achieved without the strong team effort of volunteer and professional leaders of our communities who, themselves, have spent a lifetime of dedication and devotion to these same true American ideals and now participate unselfishly and willingly of their busy schedules in passing these sterling traditions along to our youth of America.

I wish to commend to you and ask you to join with me in heartiest congratulations and best wishes to the officers and trustees of the Altaha and Aheka Councils, Boys Scouts of America, who have been faithfully fulfilling these major leadership endeavors in the Altaha and Aheka Councils. Following is a list of officers and board members:

OFFICERS AND BOARD MEMBERS

ALTAHA COUNCIL

Officers

Sylvan Geismar, Honorary Chairman.
James L. Hamilton, President.

Vice Presidents

Roy R. Dean, Jr.
Andrew E. R. Frommelt.
Russell Graddy.
Robert E. Holloway.
Martin S. Mandon.
John M. Delaney, Treasurer.
William D. Kamp, Scout Commissioner.
Arthur W. Friedman, Exploring Chairman.
Dale L. Nolen, Scout Executive.

Executive board

Dr. E. Foster Arthur.
Alvin G. Blau.
Barnie Bragg.
Howard J. Breeman.
Murray L. Cole, Past President.
Syvert Dalane.
Robert J. Dalzell, Jr.
Eugene O. Davis.
Richard J. Dore.
Eugene H. DuVal.
Dr. R. J. Floody.
Louis Gilmore.
Joseph J. Glatzel.
Thomas L. Heward.
Ronald J. Hinchman.
Walter J. Hunziker, Jr., Past President.
Dr. Leonard Jackel.
LeRoy Kersting.
Paul LaBaissiere.
Frank C. Little.
Jack A. Maltby.
Nicholas R. Marcalus.
W. Fred Meyers.
William S. Mosca.
Nathaniel J. Ontell.
Morris W. Pechenik.
Donald Pierce.
Robert T. Ratcliffe.
Armando Salvini.
Jonas W. Saunders.
T. Norman Schwarz.
Jerome F. Scott.
Alvin H. Smalenback.
Charles F. Unger.
Stanley J. Usinowicz.
Lee A. Van Gorden.
Stephen J. Wolff, Jr.

AHEKA COUNCIL

Officers

Lawrence Gurtman, President.

Vice Presidents

Aldo Costantin.
William J. Bate.
Leo Kleinkopf.
David A. Doyle, Treasurer.
Dr. Samual M. Schlyen, Scout Commissioner.
Nelson L. Carter, Secretary-Scout Executive.
Dr. Carlisle Kramer, Exploring Chairman.

Executive Board

Cowles Andrus, Past President.
James D. Backman.
Joseph A. Banas, Jr.
William J. Bate.
Franklin T. Colcord.
Harold W. Compton.
Aldo V. Costantin.
Joseph M. Dauenhauer.
James DeBiaase.
David A. Doyle.
Richard Drukker.
Ralph F. Eastman.
Ellis W. Edge, Jr., Past President.
I. Lloyd Gang, Past President.
Joseph M. Gondola.
Bennett M. Goodman.
Lawrence Gurtman.
Dr. Wallace J. Haddon.
Edwin C. Jennings, Jr.
Robert Y. Johnson.
Sanford Kalb.
Maurice Kanter.
Louis I. Kievit.
Leo Kleinkopf.
Dr. Carlisle Kramer.
Harris N. Leroy.
Alvin Levitt.
Harold Martin.
Jerome S. Morici.
Everette B. Muh.
Herman B. Packer.
Dr. Bernard D. Pinck, Past President.
Daniel Rachles.
John F. Reynolds.
Joseph Ruddy.
Dr. Samuel M. Schlyen.
Martin Stern.
Robert Taylor.
Walter Tencza.
Albert Tiano.
Arthur L. Troast.
Harold M. Warshaw.
Clarence Whitworth.
Edward J. Wolak.
Edgar Y. Wurch.

May I also commend to you and seek, through this historic journal of Congress, national recognition of the outstanding public service to our youth that has been extended by Altaha Council Scout Executive Dale L. Nolen who has served more than 21 years in professional Scouting and the past 6½ years as our Scout executive. Dale's exemplary ability and sincerity of purpose have already been recognized by the National Council, Boy Scouts of America, and effective September 1 he will be assigned to their east central region where his specialized services will be devoted to Boy Scout Councils in the States of Illinois, Indiana, Michigan, Ohio, West Virginia, and Wisconsin.

Mr. Speaker, I know that you and our colleagues will join with me in saluting all of these great Americans and their good works on behalf of the Boy Scouts of America. We do indeeed extend our best wishes to the officers and directors of the new Passaic Valley Council as they commence their merger of the Altaha and Aheka Councils on September 1, 1972.

EDITORIAL COMMENT FAVORS SPEEDY PASSAGE OF YEN CLAIM BILL

HON. SPARK M. MATSUNAGA

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. MATSUNAGA. Mr. Speaker, a sense of justice and fair play is something with which Americans, as a people, are richly endowed. This was movingly demonstrated today by the expeditious passage by this august body of the so-called yen claim bill, H.R. 8215, which I introduced, and by the unsolicited editorials, in some instances indignantly insistent in tone, calling for the quick enactment of the measure.

The legislation I introduced is directed toward erasing one of the last vestiges of what has been called "the blackest page in American history." I am referring, of course, to the World War II episode involving some 110,000 Americans of Japanese ancestry and their parents who were uprooted from their homes along the west coast and in Hawaii, deprived of most of their property, and imprisoned in what the Federal Government chose to call "relocation centers," but which were in fact concentration camps, complete with barbed wire fences and armed guards.

Many of these immigrant parents, barred by law until 1953 from becoming naturalized American citizens, held yen certificates of deposit in various U.S. branches of the Yokohama Specie Bank. At the outbreak of World War II, the assets in these branch banks were confiscated, or vested, under the authority of the Trading With the Enemy Act, so that such property would not be used to aid the enemy during the period of hostilities.

When Congress in 1946 enacted a comprehensive plan for allowing claims of legitimate creditors of enemy alien firms and entities whose assets had been vested, payment was expressly barred to creditors who were interned or paroled as "enemy aliens." Former internees who held Yokohama Specie Bank certificates of deposit were thus barred from recovering their hard-earned savings, and to this day they remain unrecompensed.

At least two subsequent acts of Congress served only to underscore and prolong the unfortunate plight of these people in their efforts to recover their Yokohama Specie Bank savings. In 1953, Japanese immigrants were permitted to become naturalized American citizens, and thousands, including these former internees, demonstrated their long-felt loyalty by becoming naturalized citizens of the United States. In 1956, Congress refused to discriminate against internees when it passed the Evacuation Claims Act, which compensated Japanese-Americans for certain property losses suffered during the period of wartime hysteria. Under that act, Congress expressly permitted recovery by those who have been interned and subsequently released.

H.R. 8215 would authorize these Japanese-Americans, some 2,000 in number, to recover from the remaining vested assets of the now-defunct Yokohama Specie Bank in the custody of the U.S. Attorney General.

Addressing itself to the situation of these Yokohama Specie Bank depositors, the Honolulu Star-Bulletin called it "Shocking."

The Evening Star-the Washington Daily News said that the money was "unconscionably—and unconstitutionally—taken from them."

The San Francisco Chronicle informed its readers that "It—H.R. 8215—should be promptly enacted."

The Philadelphia Inquirer said, referring to the bill's provision for flat-out repayment, but no interest—

> After 30 years, it is hardly too soon.

Mr. Speaker, being confident that the Senate will now give speedy consideration to this legislation, I submit these editorial views on H.R. 8215 for inclusion in the RECORD merely as reassuring proof that Americans truly have not lost their traditional sense of justice and fair play. Early Senate passage of the measure, of course, will strengthen this conclusion immeasurably.

[From the Honolulu Star-Bulletin, Aug. 7, 1972]

SHOCKING REPORT

It is shocking to read 27 years after the end of World War II that the U.S. is still holding bank savings belonging to 2,000 Japanese-Americans forced into internment camps in World War II.

The yen deposits confiscated from American branches of Japanese banks total $4.5 million.

Congressman Spark Matsunaga of Hawaii is sponsoring legislation to have the Justice Department give the money back. Many of the original depositors, of course, are dead.

The whole internment episode was a black chapter in U.S. history. Now we learn it is not yet closed.

[From the Evening Star and the Washington Daily News, Aug. 11, 1972]

BALM FOR A BAD CONSCIENCE

That old word "sleazy" is being greased up again and applied to Japanese imports by some groups of American workers who are beginning to feel the sting of competition. There is a special irony in this; first, because more and more Japanese products are remarkable for their good quality (they work, they last, the wheels stay on) and second, because sleazy is the way we have been treating our best import from Japan—Japanese people.

There are disturbing reports of increasing anti-Japanese feeling on the West Coast and elsewhere, along with the nastiness and small cruelties that invariably accompany a regrowth of racism. That young Japanese-Americans are beginning to meet this with a display of refined militancy—a show of cohesion and racial pride—is a normal if somewhat disturbing response.

Nothing can make up for the fact that tens of thousands of American citizens of Japanese descent and their parents were separated from their homes and possessions in the early panic after Pearl Harbor and penned up behind barbed wire in concentration camps while their fellow Americans picked over what they'd left behind. The $38.5 million in property claims which the federal government paid to them in subsequent years is estimated to be less than 10 percent of what they actually lost.

Representative Spark Matsunaga, the Hawaii Democrat, has now won committee approval of a bill to return $4.5 million to one or two thousand Japanese-Americans whose savings were seized in the San Francisco and Seattle branches of the Yokohama Specie Bank. They're not asking for the 30 years of interest this money would have earned, or to get it back at today's conversion rate. Just the money that was unconscionably—and unconstitutionally— taken from them.

"If they could just get back a portion of their life savings," a spokesman for Representative Matsunaga said, "they would be satisfied." In the light of such good nature, anything less than speedy action would be sleazy indeed.

[From the San Francisco Chronicle, Aug. 13, 1972]

Injustice Undone

Congress is moving to undo, in part at least, a grave injustice inflicted upon some 2000 Japanese Americans following the attack on Pearl Harbor, December 7, 1941. A House subcommittee has unanimously approved legislation to restore to them—or their heirs—$4.5 million in bank accounts that were confiscated by the government upon their internment as "enemy aliens."

The funds had been deposited in branches of the Yokohama Specie Bank in San Francisco, Los Angeles and elsewhere and have since been held without interest by the Department of Justice.

It is now intended to return this money to its rightful owners—Japanese who, as noted by Representative Matsunaga of Hawaii, "committed no crime or act of sabotage against the country which they had learned to love and which they called their own." Legislation to effect that can be faulted only because of its tardiness. It should be promptly enacted.

[From the Philadelphia Inquirer, Aug. 12, 1972]

Long Wait for Their Money

One of the more shameful episodes in American history was the herding of some 110,000 Japanese-Americans into detention centers shortly after Pearl Harbor.

Many of them were American citizens, born in this country. All of them had to abandon their homes, their farms, their businesses, their professions. None ever received full compensation for their economic losses, let alone their personal suffering, although Congress did, after World War II, pass legislation providing for the return of at least some of their assets.

Even then they had to fight their case through the courts, and it was not until 1968 that the issue was settled. But even then, not entirely.

For 30 years the Justice Department has been sitting on about $4.5 million which had been confiscated from bank accounts in U.S. branches of a Japanese bank. The money belongs to some 2,000 Japanese-American immigrants who, under the benighted immigration laws on the books at the time, could not become American citizens.

Congress had agreed to compensate only American citizens. "Enemy aliens" were specifically ruled out. Catch-22: Because these people had been forbidden to become American citizens, and even though most of them later did become citizens under a more enlightened immigration provision, they still couldn't get their own money back.

Rep. Spark Matsunaga who, like so many young Japanese-Americans in World War II, volunteered and fought bravely for America, has introduced legislation to return these savings to their rightful owners, many of whom are now in their 80s.

The Hawaii Democrat's bill follows the pattern of the 1968 federal court directive—flat-out repayment, but no interest. Rep. Matsunaga calls for prompt action to redress these grievances of Japanese-Americans. After 30 years, it is hardly too soon.

TELEPHONE PRIVACY—XXXVII

HON. LES ASPIN

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. ASPIN. Mr. Speaker, I reintroduced the telephone privacy bill on May 10, 1972, with a total of 48 cosponsors.

This bill would give individuals the right to indicate to the telephone company if they do not wish to be commercially solicited over the telephone. Commercial firms wanting to solicit business over the phone would then be required to obtain from the phone company a list of customers who opted for the commercial prohibition. The FCC would also be given the option of requiring the phone company, instead of supplying a list, to put an asterisk by the name of those individuals in the phone book who have chosen to invoke the commercial solicitation ban.

Those not covered by the legislation would be charities and other nonprofit groups, political candidates or organizations, and opinion polltakers. Also not covered would be debt collection agencies or any other individual or companies with whom the individual has an existing contract or debt.

I have received an enormous amount of correspondence on this legislation from all over the country. Today, I am placing a 35th sampling of these letters into the Record, since they describe far more vividly than I possibly could, the need for this legislation.

These letters follow—the names have been omitted:

August 10, 1972.

Dear Representative Aspin: My wife and I are 100% for the bill pending in Congress, H.R. 14884. We have had our fill of these nuisance telephone calls.

——— ———.

Dear Sir: We are definitely in favor of your bill to stop salesmen from calling our home peddling real estate, cemetery lots, etc.

They usually interrupt meals, too.

——— ———.

August 4, 1972.

Hon. Les Aspin,
House Office Building,
Washington, D.C.

Dear Sir: The telephone as defined by the United States Government is an instrument protected by law as a means of privacy to the individual and a luxury upon which a tax has been placed.

Unfortunately, for the last few years the telephone has not been an instrument of privacy as we have been plagued almost daily with telephone calls from private agencies soliciting for contributions and in particular by land companies that offer a myriad of techniques to entice the telephone subscriber into purchasing. It has been our experience to receive as many as three telephone calls from the same land company in one day! We have repeatedly expressed that we are not at all interested in their projects but this has been to no avail.

I understand that you are a sponsor of HR–14884 which may serve as a solution to this problem that we citizens are subjected to routinely. I further understand that HR–14884 has not been scheduled for action by the House Committee on Interstate and Foreign Commerce. I, therefore, urge you to vehemently promote this bill for passage and assist the citizenry in acquiring some piece of mind.

——— ———.

August 10, 1972.

Hon. Lee Aspin,
House Office Building,
Washington, D.C.

Dear Sir: We would like to voice our support for Bill HR–14884, pending in Congress.

We don't like being bothered by telephone solicitors and would like to see this bill passed.

——— ———.

August 9, 1972.

Dear Mr. Aspin: I would like to take this opportunity to add my voice in support of the bill pending in Congress, HR–14884. I am only one voice among thousands (at *least*) that cries out for relief from the telephone-pest-salesmen and women. My husband works nights and needs to sleep during the day. I work mornings. This means no one is able to "stand guard" at the phone. Consequently my poor husband is disturbed by countless (some, very RUDE) sales calls. Please, somehow, get this bill passed. It would be a godsend. God bless you for trying!!

——— ———.

August 8, 1972.

Dear Mr. Aspin: I read about the bill you introduced in the House—the Telephone Privacy Act. Didn't know the possibility of help was at hand. I'm writing Senator Tower and Senator Bentsen, as well as Representatives Fisher, Gonzalez, Pickle and Kazen.

May I add that I have heard that the phone advertisers can, electronically, compute numbers using all possible combinations. If this be true, even "unlisted" numbers can be reached. This should be unlawful.

Also, the "long distance" call is being used a lot. I know. The last one I got, I was bathing when told I was wanted on long distance. That was the day that I was rude rude rude, as well as dripping wet!! Naturally, the phone company, "the only one in town, though they try not to act like it" is not anxious to stop long distance calls. In fact, the man I talked to (with phone co.) told me there is not much recourse. To do anything, one must take name of person calling, name of company, etc. and relay this to phone company, who will (I wonder!) tell the offender that R. Lilly is an old sorehead and doesn't want the privacy of her castle invaded. Or, one can, he suggested, "merely hang up." Ho, ho. The same company has called me 5 times within the last 2 months. I have said each time, "Take my name off your list! !"

Hope your bill passes. If not, do please try again and again! !

——— ———.

P.S.—One dear caller, from El Paso, Texas, informed me I would "now hear a recording! How can one vent his spleen on a recording??

THE AGENCIES' ROLES AND RESPONSIBILITIES

HON. ORVAL HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. HANSEN of Idaho. Mr. Speaker, at my recent early childhood conference in Idaho, which I sponsored to focus on the needs of the young children, three panels did an excellent job of pinpointing current issues in the early childhood field and in identifying some of the obstacles that we have to overcome and problems that still must be solved.

A panel on "The Agencies' Roles and Responsibilities to Young Children" was led by Dr. John R. Marks, director, Idaho Department of Public Assistance. In his opening remarks, Dr. Marks said:

I think that there are basically three components of programs that the agencies have and by agencies, we are talking about local, state and federal. They have the responsibility in direct service to children and families. They have a responsibility in the training and education of professional, or para-professional people. They have responsibility in educational and information services to parents-to-be.

I think that there are several components of a program that go within these three that I mentioned. An agency should have a program component involving primary prevention of handicapping and of the condition we call childhood disadvantage. This lies in the areas of health, social conditions, economic conditions, educational areas. All agencies that are involved have responsibilities in the area of early identification of the disadvantaged child and the handicapped child. It may not be appropriate to apply all of our resources to change behavior to many children who do not really have need of it. If we are going to be somewhat selective, then we are going to have to identify the various children who need the programs of the various agencies. There has to be, then, on the part of these agencies, if they are going to intercede, if they are going to discover, some means of intervening early.

I think that all of the agencies involved have a responsibility to have an education information program among the general public as to what the needs are as the agency sees them after filtering the input from the people themselves. I think that agencies too often decide "what is needed" and then proceed to go out and apply these programs to the unsuspecting public with very little input from the public themselves. What do the parents think they need?

Panelists with Dr. Marks were Dr. John Cambareri, director of comprehensive health planning, Idaho Department of Health; Robin McCurdy, education developer, Idaho Regional Training Office, Headstart; and Howard Schrag, director, Idaho Office of Child Development.

I would like to include excerpts from the panel in the RECORD:

AGENCIES' ROLES AND RESPONSIBILITIES

(By Dr. John D. Cambarer)

Dr. Zeigler, as the keynote speaker for the Conference, did an exceptionally fine job of setting the broad and complex parameters for discussion of "early childhood development"—emphasizing as he did the importance of the effects of culture, economics, social status and other factors which relate to the current status of the family and the changing role of the parent.

It was unfortunate (though predictable) that the succeeding speakers have moved from the high plane established by Dr. Zeigler into increasingly pedestrian and parochial discussion of the problems of training teachers, teachers of teachers, teachers of teachers of "para-professional" child health care workers.

Like almost all of the other participants in this Conference, I, too, want to deliver a sermon:

We, at this Conference, are all sinners. We all commit the sin of hubris. The sin of "blinding" pride . . . in our professions, our disciplines, our vocations. We all interpret this enormously complex social crisis in terms of our limited and vested interest. We *cannot* approach solution to the problems of early childhood development only by training personnel to operate child care facilities!

There are *no educational requirements to be a parent!* Anyone who is biologically able can be a parent . . . not just those persons who have had high school, college, or other courses in child care . . . but *anyone* who is biologically able. There are no G.E.D. or equivalent requirements to be a parent and if we, who are participants in this conference, concern ourselves only with training (various levels of) personnel to staff child care facilities we are avoiding the real gut issue of the child development problem.

Moreover, federal legislation and/or federal subvention of training programs for child care personnel, or for establishment of child care facilities merely begs the question . . . it offers only partial amelioration of the symptoms; not a cure for the disease—the "disease" is: That the development of many a child is in the hands of rank amateurs who happen by accident to be parents, who did not want the child (for any of a number of social, cultural, economic or other reasons), and who do not know how to raise him.

I believe the more effective solution is to "train" parents. I believe the only real solution is to ensure that a child is born only to parents who are willing and able to love him, feed him, cherish him, and raise him so that the child develops well and, ultimately, he, too, will be a good parent.

If we are to really solve this problem, then we must "bite the bullet" and not restrict our thinking and talking to "training personnel for child care facilities," but also to thinking about some unpleasant problems such as: Family planning, sterilization, abortion laws, laws prohibiting advertisement and sale of contraceptives, etc. . . . those "nasty" issues which must be talked about and resolved before we can talk realistically about enjoying a society in which each child has the best insurance policy for developing into a mature, productive, and happy adult—namely, parents who want him.

Now, after criticizing previous speakers for their simple and single minded solution to this problem—and after also offering you my own simple, single solution, let me quote from someone who has *not* been quoted previously today: H. L. Mencken, who said (as best I can recall): "To every complex human problem there is a solution which is clean, and simple, and wrong!"

Thank you.

HOWARD SCHRAG

Because the Idaho Office of Child Development is relatively new, I will briefly renew its development up to this point.

It was brought into existence through an Executive Order issued by Governor Cecil Andrus on the 15th day of November 1971. The Office itself is a result of commitment from both the Region X Office of Child Development and the Idaho State Interdepartmental Committee on Children and Youth. The need for the office was largely noted when the Interdepartmental Committee on Children and Youth attempted to acquire information concerning children (ages 0–6) in the State. The Committee ultimately concluded that, although the needs could be somewhat defined, how well they are being met or what services were being provided to meet them were unknown.

As a result of this finding the major objectives of the Idaho Office of Child Development are to assess the needs of children 0–6 in the State of Idaho, assess the services being provided, finding existing gaps and duplications in programs, make an extensive fiscal evaluation of State and Federal program funds, and establish State priorities.

With these objectives in mind the Idaho Office of Child Development has become involved in five major activities. The first, now being completed, is an Agency Service Survey. This survey documents the services now being provided to children ages 0–6 in the State by both public and private agencies. It includes interviewing of day care operators, kindergarten teachers, various public and private agencies offering early screening and diagnosis, etc. The second major undertaking of the Idaho Office of Child Development will be a Clientele Survey. The Clientele Survey is to evaluate the services both needed and being received by children ages one through six. A sample of over a thousand children will be randomly drawn. Need areas such as housing, economics, safety, developmental-skill level, nutrition, child care arrangements, and health will be the major components of the survey. The third major survey will be conducted in conjunction with the Western Interstate Commission on Higher Education and the University of Washington School of Medicine with Doctor Ralph J. Wedgewood, Chairman of the Department of Pediatrics. It will be a survey concerning itself both with consumer and vendor services in the prenatal, perinatal, and postnatal areas. Its compltion is expected by September 1, 1972.

The fourth major undertaking is to obtain community input concerning their views and evaluation of needs for children as they see them in their community. This is being done under the auspices of the 4–C Grant received from the Department of Health, Education, and Welfare, Washintgon, D.C. The major vehicle for obtaining this information is the speak-out. Speak-outs are being held in the major planning areas throughout the State in order to provide adequate input from the various planning regions. In addition to this, the regions are anticipated to continue the organization of an advocate system for children. The fifth major undertaking is a review of the literature extending from preconception through six years of age. This review is vital in that it will form the rationale and basis for further planning and program development of children's services in the State of Idaho.

While the Office is relatively new we are now beginning to evaluate the results of the initial Agency Service Survey. Governor Andrus in his introductory remarks included some of our preliminary findings. In addition to what Governor Andrus covered in his remarks, we have noted two major overall areas of concern while completing the survey. The first area is that of program egocentrism—that is, each program or each agency delivering various programs tends to view their programs in operation as central to the needs and concerns of the community with all other programs being ancillary to virtually nonexistent. This observation correlates with the second finding that coordination between programs is virtually nonexistent. In the various communities quite frequently one program director does not know what another program director in the same community is doing. These problems

> are not typical of Idaho alone. The authors of the recent publication *Day Care—Nightmare* found that the same problem existed in the Berkeley and Oakland, California area.
>
> At this point our data is only preliminary and our research has just begun. We anticipate that information obtained by the various surveys on and relating to the overall needs and services being provided for children will be available by December of 1972.

TRADING IN DEATH

HON. JOHN G. SCHMITZ

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. SCHMITZ. Mr. Speaker, the testimony of Antony C. Sutton, research fellow with the Hoover Institution on War, Revolution, and Peace, before the platform committee of the Republican National Convention August 16, 1972:

> There is no such thing as Soviet technology. Almost all—perhaps 90 to 95 percent—came directly or indirectly from the United States and its allies. In effect the United States and the NATO countries have built the Soviet Union—its industrial and its military capabilities. The massive construction job has taken 50 years, since the Revolution in 1917. It has been carried out through trade and the sale of plants, equipment and technical assistance. Fifty years of dealings with the Soviets has been an economic success for the USSR and a political failure for the United States. It has not stopped war, it has not given us peace. The United States is spending $80 billion a year on defense against an enemy built by the United States and West Europe. Even stranger, the U.S. apparently wants to make sure this enemy remains in the business of being an enemy.

On that same date, August 16, I brought Mr. Sutton's evidence and conclusions to the attention of my colleagues in Congress and to the press throughout the country. Here are excerpts from my statement to the House of Representatives:

> Mr. Speaker, the most despicable practice I have encountered in my lifetime is that of successive Republican and Democratic Administrations in carrying on aid and trade with the Communist nations which supply the weapons to kill our men in Vietnam. How any Member of this body, who supports such action, can go home and sleep with a clear conscience, is beyond my understanding. Many of them have sons, like mine, who some day will serve in our armed forces if they are not already doing so, and may well be a target for those weapons whose manufacture we make possible.
>
> In Arlington Cemetery we keep a 24-hour watch over our honored dead, who made the supreme sacrifice to defend our country and freedom against its foes. Their loved ones mourn them still, and will never forget them. Many of these dead would be alive today if we had not done so much to build up and sustain the economy of the Soviet and satellite nations for the last half-century. But as long as the dollars roll in to fill the coffers of the "big money" men who in turn make many of the largest contributions to both Republican and Democrat Presidential candidates, those who profit from aid and trade with the enemy couldn't care less about the cost in blood paid in places like Korea and Vietnam. Business and hyprocrisy of the highest order must be carried on—as usual.

Referring to Mr. Sutton's evidence and conclusions, I said that:

> It is imperative that every Member of this body read what he has to say—and act accordingly.

My statement concluded as follows:

> Mr. Sutton says that "this information has been blacked out by successive Administrations." I intend to see that it is blacked out no longer. . . . For once, let us submerge our differences and unite on an issue on which every man of conscience and honor in this country ought to be able to agree. These facts must not be suppressed or ignored because of concern about face-saving or a desire to pretend that unpleasant truths do not exist. Those who fail to print and publicize Mr. Sutton's evidence do so at the peril of the life-blood of America.
>
> Nor can it be hidden much longer in any case. This story will become too big to kill. You remember the old saying "murder will out." What Mr. Sutton reports is a very sophisticated kind of murder; the bodies involved are those of our own young men, crying out from their graves for justice. The truth about this murder through trade with the enemy is coming out, and it will be heard.

FACING THE REALITIES OF VIETNAM

HON. ROBERT L. LEGGETT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. LEGGETT. Mr. Speaker, once again this Congress has chosen not to make a statement in opposition to the war in Vietnam. The deletion of section 13 from the foreign assistance bill can only be regarded as a grevious error.

I supported the retention of the end-the-war provision in the bill because I think the people of this country do want out from Indochina. Nevertheless, we are only playing games with these end-the-war amendments. No amount of rhetoric will hide the simple fact that the war cannot be ended by provisions which pledge withdrawal of U.S. troops contingent upon the prior release of prisoners of war. President Nixon refuses to accept such a limitation, and so do the Communists.

I have had lengthy informal talks with the other side twice in the last year. There is no way that they are going to release our prisoners before we have completely removed all of our troops. In fact, I doubt whether they would even release our prisoners after we had removed all ground, sea, and air support of the Thieu regime.

Let us remember, we are dealing with people that are slightly paranoid. They want that government in the south, and they want us to hand it over to them on a silver platter. Mr. Nixon is not prepared to overtly destroy the South Vietnamese Government, and frankly I cannot blame him.

The NLF and the North Vietnamese feel badly burned by the 1954 Geneva accords. They had control of most of the country; they let that control be negotiated out of their hands. They are not going to allow that to happen again.

So President Nixon is really deceiving us when he intimates that there is serious negotiation going on. No matter how many secret trips Dr. Kissinger takes, until one side fundamentally alters its position, the killing will continue.

The North Vietnamese position is clear. They consider the Saigon government to be the colonial arm of the United States. Thus, they are not willing to exchange POW's for American troop withdrawal unless that withdrawal also includes the Saigon government and Saigon army.

I have discussed this so-called proportional repatriation plan with the other side. At one point they indicated that they would be receptive to such a plan. This was 2 years ago. Since that time they have become increasingly intranisgent.

The POW's are the other side's "ace in the hole." They will be released when we physically remove the Saigon infrastructure in total.

I have spoken against the Thieu regime on this floor a number of times in the past. It is a democary in name only. It suffers from widespread corruption, and engages in the massive violation of individual liberties. Nevertheless, I am not ready to hand this regime over to the Communists, even for the release of our POW's. Neither, however, am I willing to support the continued bankrupting of the United States in a conflict that is as much an economic disaster today as it was a decade ago when we began escalating in Indochina.

It was reported in the August 14, 1972, New York Times that President Thieu is now questioning the strength of the U.S. commitment to South Vietnam. Thieu argues that—

> Six or seven months of heavy bombing would be enough to destroy North Vietnam's economy and war machine and force Hanoi to accept a cease-fire with international guarantees over all of Indochina.

Gentlemen, this argument would be humorous if it was not so deadly. We have been told since 1965 by a variety of "experts" that just a few more months of bombing will insure an allied victory. In each case the predictions turned out to be incorrect.

There is no light at the end of the tunnel, only the flickering hope of those who desire a continued American presence.

The North Vietnamese have been fighting this war for over two decades. A few more months of bombing will certainly not succeed in breaking their desire to fight. The North Vietnamese have demonstrated that they respond to heavy bombing in the same way as did the citizens of London and Berlin during World War II. Bombing does not make them give in; it makes them dig in and fight harder.

We have spent $200 billion in Vietnam and obligated ourselves for another $200 billion in veterans' benefits. By Secretary Laird's own estimates, the Soviet Union and China have only spent $10 billion in Indochina.

I say $200 billion dollars is enough aid. The South Vietnamese have a million men under arms. If they cannot repulse a Communist attack with this kind of force, then I doubt whether they ever will be able to.

What we should seek in Vietnam, then, is not an escalation of the war nor the destruction of the Saigon regime. We should unilaterally deescalate our posture over the next 6 months such that in all of Southeast Asia we only provide an equal and reciprocal force vis-a-vis South Vietnam as the Soviets and Red China assume toward their Communist counterparts. If this means that the United States must deescalate several hundred percent so be it—it might even be President Nixon's secret solution.

Such a posture would neither be a military victory or a defeat. It would let the Southeast Asians themselves determine who among them in a fair contest is the fittest, and the POW's would be returned in due course. I see no other alternative.

Madame Binh of the NLF recently put in concrete the position of the Communist side which has not altered perceptibly in over a year. A portion of her statement and the statement by Xuan Thuy to the 151st plenary Paris Conference follows:

Plenary Session

Following is English text of PRG opening statement by Madame Nguyen Thi Binh at 151st plenary session of Paris meetings, July 20, 1972, as released to press.

Ladies and gentlemen, at the last session of this conference, I pointed out: "Our position is that the South Viet Nam problem should be solved definitely and exhaustively, i.e. the military and political problems should be settled at the same time so that on the basis of the accords reached, the parties will sign a comprehensive agreement to end the war and restore peace" . . .

On the political field, the United States has installed in South Vietnam an administration devoted to it with a huge machine of coercion and repression, instruments to carry out the U.S. policy of war and neocolonialism and to perpetuate the partition of Vietnam . . .

The "U.S. participation in the war" manifests both militarily and politically, therefore, in order to put an end to such a "participation," these two aspects of the problems should be settled simultaneously. The U.S. side pretends to desire an end to its military "participation" without dealing with the political aspect. This simply means that the United States still wants to maintain in South Vietnam the administration it has set up to implement the policy of "Vietnamization" of the war. If so the United States will never be able to put an end to its military "participation"...

In order to put an end to the U.S. "participation" in the military field, we have advanced the proposal that the United States withdraws in safety from South Vietnam all troops, military advisers and personnel, weapons and war materials of the United States and those of the other foreign countries in the U.S. camp by a precise date, at the same time it dismantles all its military bases in South Vietnam and stops all the activities of its air and naval forces and other acts of war against the Vietnamese people. The U.S. government still refuses to set a precise date for its total troop withdrawal, therefore, until now, there is not a basis to discuss and solve this problem. In order to put an end to the U.S. political "participation," we have put forth the proposal that the U.S. stops supporting the bellicose group it has installed, Nguyen Van Thieu resigns and the Saigon administration renounces its policy of repression and coercion against the people.

[Unofficial translation]

Statement by Minister Xuan Thuy, Chief of the Delegation of the Government of the Democratic Republic of Vietnam at the 151st Plenary Session of the Paris Conference on Vietnam (July 20, 1972)

Ladies and Gentlemen: It should be noted that war is only a means for the United States to materialize its political aims. The creation and maintenance of the Saigon administration by the United States constitute a brazen violation of the South Viet Nam people's right to self-determination. Therefore the United States has the responsibility to cease all support of that administration so as to let the South Viet Nam people exercise their right to self-determination. After the agreement on all military and political questions, a cease-fire will take place: Only such a cease-fire can last and really end the hostilities. Once the military and the political questions are agreed upon, all other questions, such as the release of militarymen captured during the war, can be easily settled.

DUE PROCESS AND THE STATE DEPARTMENT

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. ASHBROOK. Mr. Speaker, on August 4 the News American of Baltimore, Md., called to the attention of its readers the current mess in the State Department and especially in the Foreign Service. As I have noted many times in the past, there is an urgent need for a fair appeals procedure for Foreign Service employees who, unlike those under Civil Service regulations, could not in the past get a fair hearing on their grievances.

Mr. Ned Young, the civil service editor, in his column, "The Federal Log," has done a service for the Hearst papers' many readers by reviewing several cases of State Department employees whose treatment at the hands of the ruling hierarchy was less than equitable.

I insert at this point the column, "Fired Diplomat Gets Hearing," by Mr. Ned Young in the August 4 issue of the News American:

[From the News American (Baltimore, Md.), Aug. 4, 1972]

The Federal Log—Fired Diplomat Gets Hearing

(By Ned Young)

John D. Hemenway, an Annapolis graduate, had spent more than 25 years in the State Department's Foreign Service and was chief of the Berlin section when he was "selected out" (fired) Jan. 17, 1969.

There have been such occurrences in the past.

What makes Hemenway so special is that he has become the first such person in the history of the State Department to obtain under the old rules a grievance hearing before a three-member board of examiners.

He selects one of the examiners. Another is chosen by the State Department, and the third is agreed upon by both sides.

The examiners have conducted at least a dozen hearings to date and heard voluminous testimony, but no decision, at least official, has been reached as yet as to whether or not he should be reinstated.

His service was extended from January to Oct. 4, 1969, and a week before then on September 26, he petitioned Howard P. Mace, then the department's personnel director.

It is reported that the examiner chosen by Hemenway was later in danger of losing his job, due to pressure suddenly brought to bear.

Just recently, Hemenway testified before the Fulbright Committee in opposition to Mace becoming the American ambassador in Sierra Leone. Mace had been nominated for the job by President Nixon.

While Hemenway has gained stature during his period of ordeal in his attempts to prove, officially anyway, that he has been grossly wronged, he is by no means the first member of the Foreign Service to be "selected out" after a satisfactory, if not distinguished, career.

The first such member whose selection out made the headlines, as a result of efforts by himself and friends to become reinstated was Stephen Koczak who also was stationed in Berlin at the time.

Koczak, a cum laude graduate of Harvard who had devoted most of his professional life to the Foreign Service, was fired after he reported a fellow officer was going to East Berlin and telephoning his former mistress in Warsaw.

Despite the efforts of many people, he was never reinstated, and works today as the chief researcher for the American Federation of Government Employes (AFGE).

Perhaps the most famous such case was that of Otto F. Otepka, the State Department's security chief who was demoted from a GS–15 to a GS–14, but never technically fired or selected out.

He nevertheless was placed on leave, and when his leave time ran out, he was placed on leave without pay. This occurred in 1962. In 1967, he was finally granted a hearing, but Dean Rusk, then Secretary of State, upheld the demotion.

Otepka kept fighting, but never won. In 1969, President Nixon appointed him as a member of the President's Board on Subversive Activities.

Charles W. Thomas, a career Foreign Service officer who became an orphan at six years of age, was serving with the American Embassy in Mexico City when he received notice that he was being "selected out."

A diplomat for 18 years, with progressively successful service in West Africa, Central America, the United Nations and Washington, D. C., he was notified in January, 1969, that he was being fired in six months because he had spent an excessive amount of time in the same grade.

It is to be noted that any Foreign Service officer who spends too much time in the same grade is subject to dismissal.

Unable to get another job, Thomas committed suicide. His wife, who is still with the State Department, and who in the past had been rated as outstanding along with her husband when the two worked as a team, is waging a concerted effort along with friends to get her husband reinstated posthumously.

The cases of Hemenway, Otepka, Koczak and Thomas serve as evidence for the contention by many that in the Foreign Service, if not in other agencies, there is what is described as the "hidden government."

The term means that a clique, rather than the rules of government, rules the Foreign Service and determines who works and who doesn't work. In order to keep your job, belonging to the clique is a necessity.

Cliques, of course are nothing new. In fact it is said that the Foreign Service is the last of government agencies to have one—if it does have one.

ARMY'S RECORDS DISPUTE MY LAI FINDINGS

HON. TOM STEED

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. STEED. Mr. Speaker, today I entered an article from the Daily Oklahoman describing the efforts of several of the paper's editors to secure release of Army reports dealing with the My Lai incident of 1968. The following story, also from the May 14, 1972, edition summarizes the information obtained from the reports and gives an interesting analysis of the findings. At this time, the editors are continuing their struggle for the release of the "Peers Report," which they believe will shed some additional light on the events surrounding the My Lai tragedy.

The article follows:

ARMY'S RECORDS DISPUTE MY LAI FINDINGS

(By Jack Taylor)

Official records of military units involved in the My Lai massacre, released to the Daily Oklahoman after a 2½-year struggle against censorship, reveal a wealth of new information disputing some findings of the Army's own investigation of the incident.

The records—morning reports kept by three infantry companies and a helicopter company—show there were numerous errors in previous reports of the composition, organization, chronological history and operations of the units during a three-month period encompassing the tragedy at My Lai four years ago.

The records show the Army apparently did not take advantage of official information it had at hand in impounded records when a panel was ordered to investigate a possible cover-up of the incident, raising questions about the findings and conclusions of that investigation.

Although the records were heavily censored when finally released, a detailed study of the documents led to these findings:

Lt. William L. Calley, the central figure at My Lai and the only one of 25 persons charged in connection with the incident to be convicted, apparently benefited from an entry designed to cover his being absent without leave shortly before My Lai.

Lt. Calley and a fellow platoon leader in his unit—Company C, 1st Battalion, 20th Infantry, 11th Light Infantry Brigade, 23rd Infantry (Americal) Division—apparently were sent to Vietnam illegally in the first place.

Reports that Calley's unit received no replacements in the weeks before My Lai are false.

Reports that Calley's unit was decimated by casualties and greatly under authorized strength at the time of the March 16, 1968, assault on My Lai are greatly exaggerated.

Characterization of Calley's unit as composed of up to 92 per cent draftees is disputed, with the ratio between volunteers and inductees actually at about the average of 60 per cent draftee and 40 per cent volunteer.

Calley's unit actually had an overall personnel turnover rate less than the other two companies, which experienced from twice to nearly three times as much turnover.

Findings and conclusions of the Army's investigative panel headed by Lt. Gen. William R. Peers contain numerous errors in unit strength, casualties and events during operations, when compared with the official records.

Neither the Peers panel nor Army prosecutors apparently ever obtained a complete list of personnel assigned to the units involved at the time of My Lai, although such information apparently was already compiled and readily available from at least two different documents in each unit.

The significance of these new disclosures is twofold.

First, they show that descriptions of Charlie Company as a revengeful, kill-crazy, combat-fatigued, ragtag bunch of GIs, stripped of most of their manpower and unable to get replacements, are largely without factual support.

To fix much of the blame on the unit's manpower problems and combat losses is an apparent oversimplification, for in many respects Charlie Company was better off than either of the two companion units in the same task force.

Second, the number of errors discovered in official proceedings—the Army's investigation, the courts-martial and a congressional inquiry—when compared with official records, raises questions about the objectivity and effectiveness of those proceedings, including the court-martial of Lt. Calley.

Such errors in the most basic data raise the possibility of more numerous and far more serious mistakes in the Army proceedings which could have affected the final findings, conclusions and recommendations.

The Peers panel, for example, wrote in its final report a full chapter dealing with "significant factors which contributed to the tragedy at Son My (the village in which the hamlet of My Lai was located)."

However, that entire chapter was censored from the report when released to the public, as were many other important parts of the report. The errors discovered in the Peers report are in the highly excised summary—primarily background information—that was made public.

John F. Lally, assistant counsel for the My Lai Incident Subcommittee of the House Armed Services Investigating Subcommittee, told The Daily Oklahoman many of the conclusions drawn in its final report were based on the testimony of witnesses—primarily Calley's commander, ex-Capt. Ernest L. Medina—rather than on official records.

Both the Peers panel and the House investigating group experienced considerable difficulty jogging the memories of witnesses who could not or would not recall pertinent facts. Yet more than one witness whose memory was previously fuzzy appeared to have a clearer recollection of events when interviewed by The Daily Oklahoman with the benefit of an accurate chronology based on the official records.

When Calley graduated from Officer Candidate School at Ft. Benning, Ga., on Sept. 7, 1967, he was immediately assigned to Charlie Company, then at Schofield Barracks, Hawaii, and already alerted for deployment to Vietnam.

Calley and another lieutenant, Stephan Karl Brooks of Dade City, Fla., then in the battalion's headquarters company, went to Vietnam in December—apparently in clear violation of Army regulations directing that such green officers "will not be ordered to a hostile fire zone unless they have completed four months duty in leadership type positions . . ."

The Army has been asked under what authority they were sent to Vietnam, but so far has not responded. Lt. Brooks was killed in action with another unit in the same division during an extension of his tour in July, 1969.

After the 11th Brigade was assigned to the Americal Division, Company C and two other rifle companies—Company A, 3rd Battalion, 1st Infantry, and Company B, 4th Battalion, 3rd Infantry—were assigned to the special Task Force Barker, set up shortly before the Tet Offensive at the end of January, 1968.

The task force conducted two major operations in February. During the first, Charlie Company lost its first man—Spec. 4 William J. Weber, Calley's radio-telephone operator, who was killed on Feb. 12.

Three more members of the unit were killed when the company stumbled into a minefield on Feb. 25. A fifth man was killed by a booby trap two days before the My Lai assault, according to the morning reports.

This count of five killed is considerably less than the figures previously reported, which have been as high as 12. Actually, Company C experienced no more killed during the first three months of 1968, although Company B recorded 12 dead (nine before My Lai) and Company A had six killed (two before My Lai).

Even the Peers panel's report on the Feb. 13–15 and Feb. 23–24 task force operations contains faulty casualty figures when compared with the records, and possibly even more grave errors.

A comparison of the panel's reconstruction of events in its report with the record on the morning reports shows the Army investigators may even have been confused about which unit was doing what and suffering which casualties. The panel reported Company B suffered only one killed, when the morning reports show two. There is an inference Bravo Company's casualties were inflicted during the first day of the operation, when the two dead actually came on the third day. Company A, however, suffered one dead and a number wounded on the first day, according to the morning reports, raising the possibility the Peers group actually confused the two units.

The Peers panel wrote that the three infantry companies lost three killed and 28 wounded during the second operation. The morning reports do not reflect a single death for any one of those units during that period, and only 19 wounded seriously enough to warrant evacuation.

During the second operation, Lt. Calley, reportedly still shaken by the death of his RTO, was at Vung Tau, the in-country rest and relaxation center, although being permitted an R&R so soon after arriving in Vietnam was highly unusual.

Charlie Company's morning report of Feb. 19 shows Calley left on a three-day R&R at 6:30 a.m. the previous day. He recalled during his court-martial that he was still on R&R eight days later when his outfit stumbled into the minefield.

The morning report of Feb. 24 has an entry that Calley returned from R&R and was present for duty on Feb. 21—four days before the minefield incident. There is no reason to believe he actually was back in his platoon at the time, and an administrative error can be discounted since no correction was made on subsequent morning reports prepared over the next five weeks.

The entry appears designed to cover the fact Calley overstayed his R&R and was AWOL. When asked about it by The Daily Oklahoman, Medina, now a Menominee, Mich., businessman, refused to answer.

The Army has been asked about the discrepancy, but so far has not responded.

Gregory T. Olsen, a machinegunner in Calley's platoon and now a Portland, Ore., policeman, told The Daily Oklahoman he remembers "some talk about Calley overstaying R&R but that's all."

Previous reports about the minefield incident were among the most exaggerated accounts of any ever reported about Charlie Company, with casualties given in a range all the way from one killed and 15 wounded to six killed and 12 wounded, or, as one report lumped them together, 32 killed and wounded. One report described Charlie Company as no longer an effective fighting force after the minefield encounter. And even the Peers panel and House investigating group apparently didn't have the full picture.

The House group, in its report, quoted the task force's operations journal for that day as recording one killed and 15 wounded. The Peers panel, which worked with the same journal and apparently little else in the way of official records, concluded that two died, based on its findings on total casualties.

Actually, the morning report for Charlie Company on that day shows two men killed and at least 11 wounded, although one of the wounded actually was killed and entered under the wrong category on the report—a fact the Army could have ascertained had it checked its own casualty lists in Washington.

Since the Army censored explanations of such report entries, it is difficult to be certain about the extent of the wounded under the applicable category, "reassignment losses." One, for example, was lost to the unit as apparently wounded on that day, but was picked up three days later as back for duty.

There is no doubt, however, about the killed in action, despite the Army's censorship of those explanations: such entries can only be under the category "separations," which is used only when a soldier is dropped from the rolls.

Those entered under that category on the Feb. 25 morning report were Spec. 4 Bobby Wilson, a Bloomington, Ind., youth who was scheduled to go home early because a brother had just arrived in Vietnam; and Pfc. Gustavo Rotger, a New York City draftee. Actually one of those listed as wounded—Pfc. Donnell Bell, a volunteer assigned as a platoon leader's RTO—also was killed rather than wounded on that day, the casualty lists in Washington confirm.

At this juncture the unit strength and availability of replacements became a critical point in reports of contributing factors leading up to the tragedy at My Lai three weeks later. The bleaker the picture, the more it appeared to justify sympathetic attitudes toward the company's misfortune.

At one point during Calley's court-martial, Capt. George C. White, a lieutenant assigned as a platoon leader in Company A at the time of My Lai, testified as a defense witness that his unit had only 50 men on that day—only about one-third what the records actually show.

That is the most extreme understatement, but it is typical of descriptions of the manpower problem in Task Force Barker reported over and over in past months as significant weaknesses plaguing the infantry companies and contributing to a deterioration of morale.

Even the Peers panel's conclusion of Charlie Company's strength in mid-March was erroneous, reporting a total strength of 141 men with five officers, 125 enlisted men plus 11 men attached. There was never a strength report on any of the unit's morning reports in that period—or even stretching back to February—to justify that conclusion, indicating again either a cursory examination of records or the acceptance of witnesses' testimony at face value. The Army has been asked what records, if any besides the operations journal, were scrutinized by the Peers panel but so far has not responded.

Actually the morning reports show all three infantry companies assigned to Task Force Barker were much better off than has previously been indicated, and probably not in any worse shape than many infantry companies fighting in Vietnam in the wake of the Tet offensive. Only the Peers Report, ironically, overestimated the strength situation for Charlie Company in mid-March.

Each of the infantry companies in Task Force Barker was authorized six officers and 158 enlisted men under then existing criteria. Although the Peers report states the change was made in early March 1968 and the previous authorization was six officers and 175 enlisted men, the morning report for Charlie Company on Feb. 27 notes the change actually was effective on Jan. 15, according to U.S. Army Pacific General Order 16, and that the previous strength level was six officers and 164 enlisted men—a change two months earlier and a strength 11 men less than the Peers panel reported.

The records show that contrary to the popular assumption, Calley's unit actually was just barely under its authorized strength at the beginning of 1968 and that the other two companies were the ones sorely in need of replacements, each with about 40 fewer men than Charlie Company.

Except for a few days in mid-February when one of the other units surpassed Charlie Company, the latter remained at strength levels above the other units until its minefield encounter on Feb. 25, despite a heavy influx of replacement into the others. Charlie Company's strength remained on about a par with the other two companies until shortly before My Lai when it dropped slightly below both for the first time.

At the time of the My Lai assault, Company C had 130 men counting attachments, with three away on leave. Company A had 134 with one on temporary duty elsewhere and Company B had 139 with two on leave or TDY. Even accounting for the 20 or so men always left behind to provide administration and logistic support at the base camp and the heavy weapons platoon usually deployed elsewhere, there were considerably more than the handful of men, sometimes reported as low as 70, involved in the assault on My Lai.

Calley's unit lost only one man wounded that day—Pfc. Herbert L. Carter, a Houston draftee who shot himself in the foot because he reportedly was horrified at what was taking place. On the other hand, each of the other companies lost a man killed and several wounded.

Contrary to many previous conclusions, the replacement picture for Task Force Barker was not at all bleak. In the three months encompassing My Lai the three infantry companies got 135 replacements—men straight from replacement depots, not men returning to their units after recovering from wounds, illnesses, leaves, etc. Company C got 20 of them, fewer than the other units because Charlie Company did not have the greatest need, based on its greater strength.

One report bemoaning Charlie Company's plight concluded: "The company had never received any replacements since it came to Vietnam and certainly none since the minefield disaster."

The morning reports show there were 10 replacements before My Lai and one was assigned after the minefield incident. Company A had 69 replacements before My Lai and 70 overall, while Company B had 55 replacements all before My Lai.

During the critical period of Task Force Barker's operations from late January until the My Lai assault, there was an overall gain of 134 men against a loss of 152—only 18 fewer than the number that started out. Company C gained 12 and lost 44 during the period to come up minus 32 overall, while Company A gained 67, lost 68 and was one down, and Company B gained 55, lost 40 and had 15 men more than at the outset.

The overall turnover was far greater in the other two companies than in Charlie Company for the three-month period. Calley's unit had a 97-man turnover, while Company A had a 212-man turnover and Company B had a 145-man turnover.

In addition, the officer turnover in Charlie Company was far less, giving the unit a stability of leadership not enjoyed by the other companies. Company C's officer turnover was five, while Company A's was 11—including four changes of command—and Company B's was nine.

Charlie Company had fewer noncommissioned officers (sergeants) assigned to the unit at the time of My Lai than did the other two infantry companies, with only 20 (the Peers Report said 23). Company A had 34 sergeants while Company B had 32. Part of the reason for that disparity may have been because far fewer promotions were meted out by Charlie Company.

During the three-month period encompassing My Lai, Calley's unit promoted only 27 men compared with 65 promotions in Company A and 83 promotions handed out in Company B. At the time of the My Lai assault, Charlie Company had 64 privates—about 20 per cent more than the other two companies.

During that same period, Company C sent five men on leave or R&R, while Company A sent only one on R&R and granted no leaves and Company B granted five leaves.

Disciplinary problems reflected in Company C's morning reports, despite the Army's efforts to censor any such indication, were less than in either of the other units. Charlie Company shows two men busted to private in January and February, while Company A's morning reports reflect six different indications of disciplinary problems ranging from reductions in rank to AWOLs and confinements, and Company B's reports show three reductions or confinements.

When attempting to determine an accurate accounting of everyone in Charlie Company at the time of the My Lai assault, one Pentagon authority thought at first there was a roster of Charlie Company personnel. After checking, he said apparently neither the Peers panel nor Army prosecutors ever compiled such a list, despite the apparent need to know who might be potential witnesses.

Asked why, he could only reply: "If you can find out why the Peers panel did about half what they did, let me know."

CONGRESS ENDORSES BUSING WHILE TRYING TO RESTRICT IT

HON. JOHN G. SCHMITZ

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. SCHMITZ. Mr. Speaker, on August 17 and 18, in a debate that dragged on to 1 o'clock in the morning, the House of Representatives passed the legislation which has been presented to the American people as the antibusing bill. The most important fact about this bill—virtually unmentioned in all that has been said about it in the news media—is that it contains the first explicit endorsement that Congress has ever given to busing itself; that is, compulsory transportation of students away from their own neighborhoods because of alleged racial imbalance in neighborhood living patterns.

Since this bill amounts to a Congressional endorsement of busing even though it attempts to limit the scope of the more sweeping Court decisions in this area, I could not vote for it on final passage.

Until now, Congress had consistently and in no uncertain terms rejected compulsory busing of schoolchildren for purposes of racial balance or of desegregation. The Civil Rights Act of 1964 explicitly prohibited such busing though the Federal courts subsequently refused to enforce that section of the act, claiming that their own fantastic interpretation of the Constitution on this point superseded it. From then on through the antibusing amendments added by the House to the Higher Education Act last year, Congress had repeatedly rejected this method of desegregating on the simple and logical ground that every child, regardless of race, creed, or color, should be allowed to attend the public school nearest his home so long as he wished to do so.

The Federal courts defined Congress on this point—first, district court judges and finally, the Supreme Court in the *Swann* case from North Carolina, argued in the fall of 1970 and decided in the spring of 1971. These judges claimed that the 14th amendment's guarantee of equal protection of the laws might require an exchange of schoolchildren among widely separated neighborhoods on the basis of race. They never bothered to explain what then happened to equal protection of the laws for the children who had to be bused against their will and that of their parents, by comparison with others still allowed to attend their neighborhood school. In the fall of 1970, when hearing arguments on the *Swann* case, the Supreme Court refused to accept legal briefs from Members of Congress who had drafted and debated the Civil Rights Act of 1964, explaining just what it was intended to mean.

Faced with this kind of usurpation of power by the courts, Congress could and should have acted long ago—as I have repeatedly urged it to act—under the authority granted to it by article III, section 2 of the Constitution, to prescribe the jurisdiction of the Federal courts, by simply ruling out of Federal court jurisdiction all cases involving transportation of public school students because of their race, creed, or color. The Senate took exactly this action in February of this year, only to reverse itself less than a week later; and the House rejected an amendment to the busing bill just passed, which would have had this effect, by a vote of 174 in favor to 211 opposed.

The bill as finally passed did restrict busing of all public schoolchildren to either the nearest school or to the next nearest, and did reopen cases already decided by Federal judges to make the new restrictions apply to them also. Whether these restrictions will remain in the bill as approved by the Senate, if it is approved by the Senate, remains to be seen. But the bill as passed by the House still says that in formulating a remedy for a denial of the equal protection of the laws, which may involve directly or indirectly the transportation of students, a court, department, or agency of the United States shall consider a series of remedies ending with the construction or establishment of magnet schools or busing to the nearest or next nearest school.

"Magnet schools" is the new term now being surfaced to replace "educational parks"—another example of the familiar gambit of changing the name of an unpopular program without changing its substance. Whatever they are called, the concept of "magnet schools" and "educational parks" is essentially the same: a huge centralized school drawing children from long distances away. Such schools furnish an obvious means of complying with the requirement that court-ordered busing be limited to the nearest or next nearest school, while still forcing children to be transported far away from their neighborhoods. We may expect large urban school districts to begin moving in this direction, and those and other school districts also to take advantage of the clause in the recently passed House bill which specifically authorizes school districts to require busing on their own authority, if school board members and officials wish.

This bill would not stop busing. It is one more example of two steps forward, one step back.

A PARENT'S VOICE OF CONCERN: "WHAT OF THEIR VIEW OF OUR NATION?"

HON. SPARK M. MATSUNAGA

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. MATSUNAGA. Mr. Speaker, the busing provisions of H.R. 13915, "The Equal Educational Opportunities Act of 1972," are surely among the most important legislative provisions which will be considered by Congress this year.

In theory, the Equal Educational Opportunities Act seeks to guarantee every child in America an equal opportunity for a good education. In fact, however, the strict limitations on the use of busing will deny educational opportunity to thousands of children who live in segregated neighborhoods where schools are less than adequate. Moreover, the approval of stringent restrictions on busing would deny to a large segment of our population their right to share in the fruits of American democracy through education and hard work.

The effect of these provisions were well described by Dr. A. Jarrell Raper, a Richmond, Va., parent, in a letter written earlier this year to the Honorable Elliot L. Richardson, Chairman of the President's Committee on School Policy. Dr. Raper has made a copy of his letter available to me. With the thought that my colleagues will find Dr. Raper's letter of interest, I am submitting it for inclusion in the RECORD:

MARCH 6, 1972.

Hon. ELLIOT L. RICHARDSON,
President's Committee on School Policy,
The White House,
Washington, D.C.

DEAR MR. RICHARDSON: My wife and I are white patrons of the City of Richmond's newly integrated and heavily black public school system. I am writing this letter to you in your capacity as a group preparing background material for President Nixon's forthcoming decision on his stance in regards to school integration.

I am deeply alarmed by the political reaction to racial integration in our schools. I use the word "integration" deliberately, because even a brief and cursory look at American residential patterns shows one that meaningful integration in the schools is impossible without transportation of pupils out of their segregated neighborhoods (busing).

My alarm is based on what I believe to be the practical results that would flow from a Constitutional Amendment forbidding assignment of pupils to schools by race. This prediction is based upon intensive personal experience in the Richmond area, upon studies done by competent experts in school integration and resegregation, and upon extensive local conversations with many people of good will engaged for years in matters and organizations furthering interracial contact and understanding.

A Constitutional Amendment would, for Richmond, cause immediate resegregation of most schools into black and white institutions. There would be a few "around the edges" that retained some integration at least for a few years. However, based on past experience in this community the majority of black schools would immediately resegregate, and the majority of white schools with a substantial black minority would do so within a few years. This would be accompanied by and result from rapid population movement (residential resegregation) as the citizens perceived this as the developing national pattern. Whites would never move into black areas, thus destroying a very healthy movement which is already in progress in Richmond at the present time. The pressure upon black families seeking to move into white areas in the face of a national policy of racial separation would be unbearable.

The effect upon the minority (black) self-image here in Richmond would be catastrophic. These people perceive themselves as having been systematically held down and exploited for generations and feel that the Nation and the South is just now beginning to approach an appropriate view of their citizenship. I frankly agree with their view. It is nothing more than the simple history of our nation. You are probably familiar with the educational aspects of such a self-view. Belief that one may, by striving, working hard, and learning, gain some benefits of life for oneself and one's family is the prime motivating force behind school achievement. This would be largely destroyed. It is probable that the black middle class would desert segregated ghetto schools en masse and find space in local private schools or build their own, worsening the racial isolation of the less fortunate students.

The effect on local race relations would be, and already is, very destructive. The blacks would see the larger white community as turning away from what had been previously a national commitment. Relations with local whites would deteriorate. This is already a process here. Recently black parents have told me that there is, State-wide, a black reaction against local "anti-busing" (anti-integration) sentiment in Richmond's suburbs as they interpret this as the whites' position. Thus feeling has been reinforced by recent events at the national level. This is, I believe, just the first corner of the disaster that we can expect if the nation at this point turns back. There are now in the South millions of interracial contacts and even friendships. These are quite real and very important. My own children participate in them, as do my wife and I on the parent level. Such an amendment would destroy these relationships. I've no fear for what I would tell my children as to what is right, and what is wrong, but what of their view of our nation?

It also appears that the image of our nation as being really sincere in its concern for minority groups and for equal opportunity would be badly damaged in the eyes of both races, if such an amendment were ratified. "Equal opportunity" and "democracy" are empty words in a context of segregated inferior schools. This changed pattern of what America's course is really to be would destroy in large measure the influence, now considerable, of moderates of both races, who in the last several years have been using in a positive way all of the Christian, ethical and democratic arguments they can muster as foundations for the ultimate good to our nation of racial integration. A conspicuous movement nationally toward black and white separation would destroy their influence, as they would be seen as impractically idealistic dreamers who did not understand in realistic terms our nation's possibilities and intentions. Their influence would not be soon felt again in the Richmond area, if everything that has been said for the last several years is contradicted at the highest national level.

The effect on radicals of both races would be detrimental to democracy. Frank segregationists would be thoroughly vindicated in their oft repeated view that our nation is not really serious about this problem, that it is they who correctly predicted the future, as they have always said that the white majority was not serious about this matter. The hand of the Black Radicals, now quite weak in Richmond, would be greatly strengthened. Is this not what they have predicted all along? I believe that we could then look for much more racial belligerance and arrogance on both sides, racial bloc voting, further fragmentation of various segments of our society into racial components, and increased demands for local autonomy and community control along racial lines, as the "next best" maneuver in the presence of a national retreat on integration of our society.

Much of what has been described for the City of Richmond would also take place on a national scale, perhaps even more strongly. I regret to say that it is a widespread feeling among white and black middle class racial moderates that President Nixon bears a large degree of blame for inflaming this issue.

The needs of our society are plain for all to see. The educational needs of the black minority are also plain to see, are too long neglected, and can best be met by provision of predominantly middle class classroom environments in those areas where it is geographically possible. Almost all educators agree on this fact.

The real question that remains is the national commitment to justice and to the nation's future. Much is riding on the movements of our government in the next few months. If great care is not taken, trends may be set in motion which will become irreversible, despite later attempts to recover what was lost.

Please be strong enough to obtain for the American people what is best for our nation, not what they think they want. Informed people of both races are in great distress and uncertainty. Please think carefully and deeply.

Sincerely,

A. Jarrell Raper, M.D.

TRIBUTE TO RICHARD POFF

HON. JOHN N. ERLENBORN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. ERLENBORN. Mr. Speaker, the Commonwealth of Virginia deserves commendation on two counts.

First, the people of its Sixth District had the good sense 20 years ago to elect Richard Poff to the House of Representatives and, second, the Governor of their State has now appointed Congressman Poff to the Supreme Court of Virginia.

I have nothing but admiration for Dick Poff. He is a man of firm convictions about right and wrong, but also a man of kindly instincts. In Congress, he has been a valued member of the Judiciary Committee. On the bench, I predict he will be a gentleman, knowledgeable in the law and fair in his interpretation of it.

As he leaves this House to take over his judicial duties, I join my colleagues on both sides of the aisle in wishing him well and in congratulating him.

CONGRESS DID RECEIVE THE AMCHITKA ENVIRONMENTAL REPORTS AND IN COPIOUS QUANTITIES

HON. CRAIG HOSMER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. HOSMER. Mr. Speaker, I was seriously disturbed when I read in the speech given by our distinguished colleague from Pennsylvania, Representative William S. Moorhead, to the International Platform Association, as printed in the August 14th Congressional Record at page 28818. Mr. Moorhead stated that the administration refused to give the Congress the environmental report on Amchitka nuclear test, thereby confirming the desire of the executive branch to conceal its actions from the Congress.

Mr. Speaker, the first draft of the environmental report concerning the proposed Cannikin experiment on Amchitka Island was released in June of 1970. A redraft was issued in the fall of 1970 and the final environmental report was issued in June of 1971, almost 6 months before the experiment was conducted on November 6, 1971. I have obtained from the Atomic Energy Commission a list of those Members of Congress and others to whom the draft, the redraft, and the final report were sent. I am appending this list below.

Our distinguished Colleague was incorrect in his assertion that Congress was refused this document. Some of its Members and committees even got multiple copies. The referred to list of recipients follows:

Cannikin Draft Environmental Statement Was Released on June 12, 1970

The following State and Federal agencies were provided copies on the dates indicated. Comments were returned from those State and Federal agencies as indicated:

State agencies

DATE SENT AND DATE OF COMMENT

Governor of Hawaii, 1; June 17, 1970; July 14, 1970.

Governor of Alaska, 1; June 17, 1970; none received.

Copies sent to:

Director, Department of Natural Resources, 1; June 17, 1970; none received.

Commissioner, Department of Natural Resources, 1; June 17, 1970; none received.

Commissioner, Department of Health and Welfare, 1; June 17, 1970; none received.

Commissioner, Department of Fish and Game, 1; June 17, 1970; none received.

Federal agencies

Council on Environmental Quality, 7; June 17, 1970; none received.

Department of State, 13; June 17, 1970; July 28, 1970.

HEW, 4; June 17, 1970; October 14, 1970.

DOD, 4; June 17, 1970; July 21, 1970.

Department of Interior, 13; June 17, 1970; July 16, 1970.

Department of Transportation, 2; June 17, 1970; July 22, 1970.

Department of Commerce, 3; June 17, 1970; none received.

Copies of the draft Cannikin statement were also provided to the following for their information:

ALASKA

Senator Ted Stevens, 1.
Senator Mike Gravel, 6.
Rep. Howard Pollock, 1.

HAWAII

Senator Hiram Fong, 1.
Senator Daniel Inouye, 1.
Rep. Patsy Mink, 1.
Rep. Spark Matsunaga, 1.

OTHER DISTRIBUTION

Senator Proxmire's Office, 1.
Robert L. Jones, Ca. Legislature, 1.
Western Interstate Nuclear Board, 1.
President, Aleut Indian League.
Joint Committee on Atomic Energy, 2.

INDIVIDUAL REQUESTORS—16

Rep. Dingell, Subcommittee on Fisheries and Wildlife Conservation, Committee on Merchant Marine and Fisheries.
House Appropriations Committee, 1.
Senate Appropriations Committee, 1.

DISTRIBUTION OF REDRAFT CANNIKIN STATEMENT

1971, UNDATED

April 29, 1971

House Appropriations Committee.
Senate Appropriations Committee.

May 4, 1971

Governor William Egan, Alaska.
Alaska Congressional Delegates.
Senator Mike Gravel.
Senator Ted Stevens.

Kevin O'Brien, Office of Congressman Lloyd Meeds; 1; June 23, 1971.

NTIS Input Section, Department of Commerce, Springfield, Va.; 10; July 7, 1971.

FATHER EICHNER

HON. LESTER L. WOLFF

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. WOLFF. Mr. Speaker, I am very pleased to have this opportunity to pay tribute to a man who is dedicating his life and his energies to the education of young men, many of whom reside within my congressional district. This year, Chaminade High School, at Mineola, has dedicated its yearbook to Father Philip K. Eichner S.M. Father Eichner, himself a graduate of Chaminade, returned to his alma mater in 1966 and in 1967 was named superior of the Marianist Community and president of the school.

Since that time, Chaminade, which was founded in 1930, has grown and flourished. Under his capable direction, a student aid fund was established, the school's finances were stabilized, a new school library created, a new wing added and many other improvements completed. All of this at a time when parochial schools are faced with a continuing financial crisis. His administrative abilities and complete dedication to others merits the appreciation of us all.

We are proud of Chaminade and of Father Eichner and of the young men who graduate from Chaminade each year to become upstanding members of our community.

LIMIT ON FEDERAL SPENDING NEEDED TO STOP BUDGET-BUSTING

HON. HAROLD R. COLLIER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. COLLIER. Mr. Speaker, in looking at the actions taken by Congress on authorization and spending bills it appears that any sense of fiscal responsibility has waned. I doubt whether anyone who has reviewed the budget-busting operations of this Congress can refute this conclusion

Regrettably it is the old political story of making a Christmas tree out of virtually every bill which has broad political sex appeal. In the process are not the budget-busters ignoring the simple fact that we are either obliged to go further into debt in a manner that will cause a new round of inflation or provide the increased taxes necessary to meet these obligations?

Speaking on the floor of the House recently, chairman of the House Appropriation Committee, GEORGE MAHON, of Texas, said:

> The House has busted the President's budget request for new spending authority in fiscal year 1973 that began only three weeks ago by the astronomical sum of $20,770,436,000 . . . Does that bring a chill or tear? Apparently not. Have we been dulled and made insensitive by some virus that is infecting the country?
>
> We must provide more revenue, or we must somehow try to do a little less by way of escalating spending. Do I want to go home—do you want to go home—and tell your constituents that you have supported thus far this session $20 billion in spending authority over the President's budget?
>
> Should the people of this country be expected to endure this sort of treatment at the hands of their elected officials?

Despite an original budget figure well above the previous year, the Congress voted $1.8 billion, or an increase of 23 percent, on the HEW bill. Paradoxically, many Members of Congress who voted against increasing the debt ceiling are the same Representatives who have consistently supported greater deficits through bloated appropriation bills. If we are ever going to get our fiscal house in order, the minority within the House who feel that we should balance our budget will need a great deal more help from some of our colleagues than we have been getting in the past.

I and a few of my Illinois colleagues recently cosponsored our own budget reform proposal which seeks to place an annual spending ceiling consistent with our ability to provide the revenue. If there is any way we can get the Congress to approve this resolution, appropriation measures would be handled in the customary fashion with one important exception. A two-thirds affirmative vote would be required for the House to approve any spending bill which exceeds the provisions of the budget resolution.

It is regrettable that there is not some means of informing the general public with regard to the detailed record of the votes cast by Members of the House of Representatives on appropriation bills. There are plenty of organizations around the country who have a peculiar interest in one area of legislation or another who publicize the votes of Members of Congress on the basis of whether or not they support their peculiar positions. In most instances the Members of this House who support an increase in any appropriation bill regardless of the merit of the subject of the legislation are regarded as friends and those who try to keep spending in line are automatically enemies of their cause. For example, if an amendment is offered to increase an already expanded expenditure for some environmental purpose, the Representative who votes to keep that expenditure within the budget figure is presumed to be in favor of dirty water and dirty air. Such an assumption is usually ludicrous.

Again when an education bill was brought to the floor that provided twice the funds of recent previous years and a Member voted to keep the increased figure within the budget request, he was promptly regarded by many as being indifferent to education. There is hardly a pressure group in the country who does not seek more for their particular program than is put in the budget regardless of how that figure may have already been increased, but that is the political nature of trying to make judgments within the realm of fiscal reason.

I am convinced that the average citizen wants Congress to recognize the basic needs of the people and its essential institutions, but I am not convinced sense of balancing the budget, the fiscal chaos as the means of meeting these needs. Perhaps if there were a method of informing the public which Members of this House do recognize the good fiscal sense of balancing the budget, the fiscal responsibility could be restored before it is too late.

In concurring completely with the remarks of Representative MAHON heretofore quoted, I do so as a Member of this body who has not once in 16 years voted to throw the Federal budget out of balance and if every Member of this House had voted as I have over the years, we would have had a balanced budget every year since 1957. I am proud of that record although I recognize that in some instances it has not been regarded as a political plus by individual groups and organizations who are never satisfied with the amount appropriated regardless of how much of an increase has been provided in the original budget.

I sincerely hope that more of our Members will join us in supporting the budget reform proposal with a spending ceiling consistent with our ability to provide the necessary tax revenues.

LAETRILE: THE CANCER FIGHTER WASHINGTON WILL NOT TEST

HON. JOHN G. SCHMITZ

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. SCHMITZ. Mr. Speaker, the following is from a letter to Congressman LOUIS FREY, JR., from Dr. Dean Burk, head of the Cytochemistry Section, National Cancer Institute, May 30, 1972:

> In spite of the aforementioned Food and Drug Administration (FDA) prohibition of Laetrile in interstate commerce, there are well over 1000 cancer-afflicted persons in this country using Laetrile for cancer treatment and amelioration, and a goodly number of noncancer persons using it merely with prevention of development of cancer in view, and these various persons include M.D. physicians as well as laity. I have had considerable personal experience in this regard, for in the past year alone at least 750 persons, including more than 50 physicians, have contacted me for information on the use and availability of Laetrile, and I know of others with approximately the same quantitative extent of similar experience. In over 20 countries of the world, well over 5000 cancer patients have been treated with Laetrile, with, significantly, no demonstrable noteworthy clinical contraindication of its use either alone or in conjunction with virtually any other anticancer agents, chemotherapeutic, radiological, or surgical. Laetrile at physician-prescribed dosages is nontoxic by a factor of 100–1000 times when compared to essentially all anticancer drugs now used with FDA approval. . . .
>
> Although the foregoing Laetrile utilization in this country is proceeding, as indicated, in spite of FDA prohibition, it is even more so because of unwarranted FDA procedures, and lack of FDA scientific and medical justification for its stand, extending to probably unconstitutionality, concerning which many thousands of cancer-afflicted persons and their relatives and physicians are rapidly becoming aware.

In the case of other drugs and medicines removed from the market, as discussed in my newsletter of July 26, 1972, at least some medical tests were cited to show ineffectiveness. But in the case of the anticancer agent Laetrile, the Food and Drug Administration refuses even to make clinical tests. They have ruled Laetrile out because it does not fall within an arbitrary definition that any anticancer drug must be toxic—that is, to some extent poisonous to healthy cells as well as cancer cells.

Incredible as it may seem, some medical bureaucrats have simply decided that no nontoxic substance can ever help cancer patients, and therefore all such substances are to be automatically excluded from the market and no medical evidence in their favor is even to be considered.

If there had been an equivalent of the Food and Drug Administration a century or more ago, it might well have banned, at an enormous cost in human suffering and mortality, both antiseptics and anesthetics, which were strongly opposed by influential elements in the medical community of that day.

This is not a matter of quackery, panaceas or secret remedies. The head of the Cytochemistry Section of the National Cancer Institute is hardly a quack. Far from objecting to testing, or blocking it, this is what Laetrile advocates are asking for, while the supposedly scientific medical establishment is refusing to make the experiments which are the very basis of the scientific method.

I have introduced H.R. 12092 which would override the arbitrary FDA dictate against testing nontoxic anticancer agents and require that this testing be undertaken. This would seem the least that should be done in light of the evidence that Dr. Burk and others have assembled showing that Laetrile can prolong and in some cases save the lives of cancer victims, and the generally agreed upon fact that it does no harm to the patient, while conventional toxic anticancer drugs often have serious side effects precisely because they are toxic.

Millions of dollars are to be spent under the authority of recently passed legislation to search for better treatment or cures for cancer. It would seem that a little of all that money ought to be allotted to find out if Laetrile might be what they are looking for.

MAN'S INHUMANITY TO MAN—HOW LONG?

HON. WILLIAM J. SCHERLE

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 18, 1972

Mr. SCHERLE. Mr. Speaker, a child asks: "Where is daddy?" A mother asks: "How is my son?" A wife asks: "Is my husband alive or dead?"

Communist North Vietnam is sadistically practicing spiritual and mental genocide on over 1,757 American prisoners of war and their families.

How long?

SENATE—*Tuesday, September 5, 1972*

The Senate met at 10 a.m. and was called to order by the President pro tempore (Mr. EASTLAND).

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Eternal Father, we thank Thee for Thy care over us in the days just gone, for Thy presence with us in every event and experience of life and for the opportunities awaiting us here. May we give our best in service to the Nation, knowing that in serving it well we also serve Thee. Make strong the heart and mind of the President and all our leaders. Guard the Nation and its citizens from all that is base or evil. God, mend our every flaw "And crown Thy good with brotherhood from sea to shining sea."

We pray in the Redeemer's name. Amen.

MESSAGE FROM THE PRESIDENT RECEIVED DURING ADJOURNMENT

Under authority of the order of the Senate of August 17, 1972, the Secretary of the Senate on August 31, 1972, received the following message from the President of the United States, which was referred to the Committee on Post Office and Civil Service:

To the Congress of the United States:

As we approach the October date on which pay rates for Federal employees under the statutory pay systems would normally be adjusted, I wish to advise the Congress that I will recommend a pay increase for Federal employees effective January 1, 1973. I believe it is appropriate to point out that section 3 of Public Law 92–210, the Economic Stabilization Act Amendments of 1971, requires that this adjustment this year be delayed until January 1973.

The pay raise required by section 3 of the Economic Stabilization Act Amendments was limited by the terms of the law to the guideline that the Pay Board has established for pay increases throughout the economy, 5.5 percent a year. Clearly it was the intent of this law to see that Federal employees would be treated in a comparable manner with private enterprise employees under the Economic Stabilization Program. In recognition of this intent, on January 11, 1972, I directed that Federal wage employees should also have their pay increase limited by the Pay Board guidelines.

The necessary comparability studies have been completed and, under the Federal Pay Comparability Act of 1970, I will recommend that the increase necessary to achieve comparability, be paid, starting January 1, 1973, the first date our employees will be eligible to receive an increase under the Economic Stabilization Act. Our employees received their full 5.5 percent annual increase last January, and therefore their next increase cannot be effective until January 1, 1973. The provisions of Public Law 92–210 preclude submission of an alternative plan under section 5305(c)(1) of title 5, United States Code.

I believe it is important to express once again my strong personal support for the principle that our Nation's public servants should receive pay that is comparable with pay in private industry. For our Government to operate efficiently in these increasingly complex and demanding times, we must have a civil service of the highest caliber, and to recruit and retain these necessary employees, we must offer them a fair and just wage. Nevertheless, in our efforts to stabilize and revitalize our Nation's economy, it is also appropriate that they be treated the same as employees in the private sector, who are also able to receive such an increase no more frequently than once every 12 months.

RICHARD NIXON.

THE WHITE HOUSE, *August 31, 1972.*

MESSAGE FROM THE HOUSE RECEIVED DURING ADJOURNMENT

Under authority of the order of the Senate of August 17, 1972, the Secretary of the Senate, on August 18, 1972, received the following message from the House of Representatives:

The message informed the Senate that, pursuant to the provisions of section 2 (b), Public Law 89-491, as amended, the Speaker had appointed Mr. BURKE of Massachusetts as a member of the American Revolution Bicentennial Commission, vice Mr. DONOHUE, resigned

The message announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 3323) to amend the Public Health Service Act to enlarge the authority of the National Heart and Lung Institute in order to advance the national attack against diseases of the heart and blood vessels, the lungs, and blood, and for other purposes.

The message also announced that the House had agreed to the amendments of the Senate to the bill (H.R. 15474) to amend the Public Health Service Act to provide assistance for programs for the diagnosis, prevention, and treatment of, and research in, Cooley's anemia.

ENROLLED BILL AND JOINT RESOLUTION SIGNED

The message further announced that the Speaker had affixed his signature to the following enrolled bill and joint resolution:

S. 3726. An act to extend and amend the Export Administration Act of 1969 to afford more equal export opportunity, to establish a Council on International Economic Policy, and for other purposes; and

S.J. Res. 260. Joint resolution to suspend until March 1, 1973, the effectiveness of certain amendments made by the education amendments of 1972 to the guaranteed student loan program.

MESSAGE FROM THE HOUSE RECEIVED DURING ADJOURNMENT—ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED

Under authority of the order of the Senate of August 17, 1972, the Secretary of the Senate, on August 19, 1972, received the following message from the House of Representatives:

That the Speaker had affixed his signature to the following enrolled bills and joint resolutions:

H.R. 3413. An act for the relief of Dr. David G. Simons, lieutenant colonel, U.S. Air Force (retired);

H.R. 8549. An act to amend title 10, United States Code, to broaden the authority of the Secretaries of the military departments to settle certain admiralty claims administratively, and for other purposes;

H.R. 9256. An act for the relief of Kyong Ok Goodwin (Nee Won);

H.R. 10310. An act to establish the Seal Beach National Wildlife Refuge;

H.R. 10713. An act for the relief of Wilma Busto Koch;

H.R. 11185. An act to amend the Internal Revenue Code of 1954 with regard to the exempt status of veterans' organizations, and for other purposes;

H.R. 15474. An act to amend the Public Health Service Act to provide assistance for programs for the diagnosis, prevention, and treatment of, and research in, Cooley's anemia;

H.R. 15580. An act to amend the District of Columbia Police and Firemen's Salary Act of 1958 to increase salaries, and for other purposes;

S.J. Res. 182. Joint resolution authorizing the President to invite the States of the Union and foreign nations to participate in Farmfest—U.S.A. and the world ploughing contest in September 1972; and

S.J. Res. 213. Joint resolution to authorize and request the President to issue a proclamation designating October 6, 1972, as "National Coaches Day."

ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED DURING ADJOURNMENT

Under authority of the order of the Senate of August 17, 1972, the following enrolled bills and joint resolutions were signed by the Vice President, on August 18, 1972:

S. 2166. An act to authorize the establishment of the Grant-Kohrs National Historic Site in the State of Montana, and for other purposes;

S. 3159. An act to authorize the Secretary of the Interior to establish the John D. Rockefeller, Jr., Memorial Parkway, and for other purposes;

S. 3726. An act to extend and amend the Export Administration Act of 1969 to afford more equal export opportunity, to establish a Council on International Economic Policy, and for other purposes;

H.R. 755. An act to amend the Shipping Act, 1916, and the Intercoastal Shipping Act, 1933, to convert criminal penalties to civil penalties in certain instances, and for other purposes;

H.R. 2394. An Act for the relief of Antonio Benavides;

H.R. 2703. An act for the relief of Mrs. Concepcion Garcia Balauro;

H.R. 5158. An act for the relief of Maria Rosa Martins;

H.R. 5814. An act to amend section 2735 of title 10, United States Code, to provide for the finality of settlement effected under section 2733, 3734, 3734a, 3734b, or 2737;

H.R. 12392. An act to amend title 28, United States Code, section 1491, to authorize the Court of Claims to implement its judgments for compensation;

H.R. 12931. An act to provide for improving the economy and living conditions in rural America;

S.J. Res. 260. Joint resolution to suspend until March 1, 1973, the effectiveness of certain amendments made by the education amendments of 1972 to the guaranteed student loan program; and

H.J. Res. 1278. Joint resolution making further continuing appropriations for the fiscal year 1973, and for other purposes.

ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED DURING ADJOURNMENT

Under authority of the order of the Senate of August 17, 1972, the following enrolled bills and joint resolutions were signed by the Vice President, on August 19, 1972:

H.R. 3413. An act for the relief of Dr. David G. Simons, lieutenant colonel, U.S. Air Force (retired);

H.R. 8549. An act to amend title 10, United States Code, to broaden the authority of the Secretaries of the military departments to settle certain admiralty claims administratively, and for other purposes;

H.R. 9256. An act for the relief of Kyong Ok Goodwin (nee Won);

H.R. 10310. An act to establish the Seal Beach National Wildlife Refuge;

H.R. 10713. An act for the relief of Wilma Busto Koch;

H.R. 11185. An act to amend the Internal Revenue Code of 1954 with regard to the exempt status of veterans' organizations, and for other purposes;

H.R. 15474. An act to amend the Public Health Service Act to provide assistance for programs for the diagnosis, prevention, and treatment of, and research in, Cooley's anemia;

H.R. 15580. An act to amend the District of Columbia Police and Firemen's Salary Act of 1958 to increase salaries, and for other purposes;

S.J. Res. 182. Joint resolution authorizing the President to invite the States of the Union and foreign nations to participate in Farmfest-U.S.A. and the world plowing contest in September 1972; and

S.J. Res. 213. Joint resolution to authorize and request the President to issue a proclamation designating October 6, 1972, as "National Coaches Day."

REPORTS OF COMMITTEES SUBMITTED DURING ADJOURNMENT

Under authority of the order of the Senate of August 18, 1972, the following reports of committees were submitted on September 1, 1972:

By Mr. CRANSTON (for Mr. HARTKE), from the Committee on Veterans' Affairs, with amendments:

S. 2108. A bill to amend chapters 17 and 31 of title 38, United States Code, to require the availability of comprehensive treatment and rehabilitative services and programs for certain disabled veterans suffering from alcoholism, drug dependence and alcohol or drug abuse disabilities, and for other purposes (Rept. No. 92-1084).

By Mr. HARTKE, from the Committee on Commerce:

S. 3945. An original bill to amend the Interstate Commerce Act, as amended, in order to make unlawful certain property tax assessments of transportation property of common or contract carriers, and for other purposes (Rept. No. 92-1085).

THE JOURNAL

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the reading of the Journal of the proceedings of Friday, August 18, 1972, be dispensed with.

Mr. JAVITS. Mr. President, reserving the right to object—and I shall not object—if the Senator from Montana will yield to me at this point——

Mr. MANSFIELD. I yield.

Mr. JAVITS. I shall seek at the earliest time a live quorum. I just wish to advise the leadership to that effect. I shall hope to bring that about before any action is taken on second reading of a bill which is over here and at the desk from the House, the so-called busing bill.

I thank the distinguished majority leader.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Montana. The Chair hears none, and it is so ordered.

A LETTER FROM HANOI

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the Record a most interesting letter from Hanoi, which was published in the New Yorker under date of August 12, 1972, which I think is worth the consideration of the Senate.

There being no objection, the letter was ordered to be printed in the Record, as follows:

Letter From Hanoi

August 1.—More than any other capital in the world, probably—and maybe in history as well—Hanoi has grown accustomed to living with war. The city takes its lumps less in the heroic style of London during the blitz than in the spirit of New York at rush hour. Life is unpleasant, and there is an evident need to subordinate self to a larger interest. Still, the misery wears a familiar aspect. It comes in short bursts, and people act in the certain conviction that the trouble will somehow be surmounted.

One reason trouble seems routine is that the American bombing is routine. Almost every day around noon, for instance, a pilotless reconnaissance plane flies in to photograph Hanoi. It moves so rapidly that there is no warning of its approach, and there is small chance for hits by either anti-aircraft guns or the surface-to-air missiles, known as SAMs, that the North Vietnamese have received from the Russians. Only the noise of the drone's breaking through the sound barrier announces its advent. It is a startling noise—like a sudden clap of thunder—but after almost four months of bombing hardly anybody in Hanoi bothers to look up. The drone is dismissed with a shrug as "the noon plane."

Even serious air raids—the raids of June 27th, July 4th, and July 22nd—have a regular pattern. Danger is first signalled by a pre-alert, broadcast through loudspeakers all over town, which announces that American planes have been sighted approaching Hanoi, usually from the southwest, at a distance of more than fifty kilometres—about thirty miles. A second pre-alert, soon afterward, announces that the planes are within the fifty-kilometre radius. Then, within a few minutes, the alert itself sounds—a long, wailing siren note that rises, dips, and then rises again. Minutes later, the planes come into sight—fighter-bombers, floating lazily and then diving on targets to drop bombs, which can be heard as they explode though not seen as they fall. As soon as the planes are visible, the racket of the anti-aircraft guns begins. Almost simultaneously, the SAMs can be seen, powered upward by rocket engines that give off a faint red glow. During the raid of July 4th, it was possible to follow the glow of a missile until a plane was struck and sent spinning to earth, trailing a cloud of black smoke. More often, the SAMs miss the planes, enter the upper atmosphere, and explode in a puff of white vapor. Then, suddenly, the planes are gone, and the siren is sounded on a steady note, signalling the all-clear. Several of the embassies here record the raids, both on film and on tape. The diplomats play the films on tapes over and over, and there has developed among them a kind of connoisseurs' taste in raids. One Canadian representative, before playing his recordings of the July 4th raid, remarked to me, "Visually, June 27th was a better raid, but sonically July 4th was superior." Listening to the recording, I had a chance to clock the raid; from first pre-alert to all-clear, it lasted twenty-seven minutes.

Short though the attacks are, they dominate life in Hanoi. A considerable part (some say forty per cent, some say twenty per cent) of the city's population has been removed to places of safety, in the mountains fifty miles northwest of Hanoi and elsewhere. Most of the government leaders seem to have left, apparently for a mountain hideout. Large numbers of young children have been evacuated, and the streets of Hanoi seem, by Asian standards, empty of boys and girls; when I went to change money recently at the state bank (a formidable pile that in French colonial days housed a main office of the Banque de I'Indochine), one of the women tellers had with her her little girl, who had come in from an evacuation camp for a couple of days.

As a further safety measure, virtually all public gatherings have been stopped. No films are being shown. The theatres are shut down, as are all museums. Boating on the Little Lake, a chief recreation spot in downtown Hanoi, has been suspended. The International Club, which has a pool where diplomats used to seek relief from the terrible hundred-degree heat of summer days, has been closed. Sunday Mass at the Cathedral is now said at four-thirty in the morning. The central markets have regulations to discourage shoppers from dawdling over their purchases, and an effort has been made to put decentralized, travelling markets in all neighborhoods.

The extent of the damage done by the bombing is hard to determine, especially for foreigners. We are restricted in our movements, and since even the driving of cars is forbidden, correspondents and diplomats must rely on government-assigned chauffeurs to get around. The general impression among Western diplomats is that, for reasons of morale, the government understates bombing losses. In trips I took outside Hanoi, I saw evidence of considerable destruction and death. The two main bridges leading east from Hanoi to the port of Haiphong have been bombed out, and the port itself in ruins. All the major bridges on the road leading south to the Demilitarized Zone and the front lines have also been destroyed. The textile town of Nam Dinh, about forty-five miles southeast of Hanoi, has been badly battered, and presumably all towns farther south have been even more badly battered. South of Hanoi, I saw two spots where American bombs had seriously damaged the network of dikes that prevents the Red River from flooding in the rainy season (from mid-May through September): near Phu Ly, I saw a sluice gate that had been smashed; south of Nam Dinh, I saw a dike badly cracked and pitted by bomb craters. The hits were probably accidental, since both sites were close to more likely targets—roads and a railroad. But they did take place, and, in a sense—given the extent of the dikes (twenty-seven hundred miles), the number of bombing sorties daily over North Vietnam (about three hundred), and the probable error made by the pilots (quite substantial, in my judgment)—they were bound to take place. If the hitting of the dikes was not deliberate, it was surely predictable.

On the morning of July 8th, I visited a town thirty-six miles east of Hanoi—a trading center called Hung Wen, with a population of about twenty thousand—within twenty-four hours after it had been struck by American planes. The bombs had hit an area about a thousand yards long and five hundred yards wide in the middle of town. According to the local authorities, eighteen blast bombs had been dropped, along with four anti-personnel bombs; each of the latter contains 192,500 steel pellets, which are hurled through the air when the bomb explodes. Seventeen persons were killed and twenty-five wounded. Forty-three houses were destroyed, thirty-six by fire and seven by the force of concussion. One of the houses destroyed belonged to Vo Nguyen Dam. He and two of his children were killed; his wife and three other children survived. In the rubble of their home, I met one of the survivors, a married daughter. She had been burned in the attack, and was poking about in a dazed way. Bits of a body—a charred jawbone, a hank of hair, what looked like a leg—were lying around, and she was trying to assemble them. She kept muttering, "My brother and sister were innocent."

Another destroyed home belonged to Nguyen Van Lam, a seventy-two-year-old grandfather. He said that he was a Catholic and that his family had been saying prayers when the attack came. His wife, his only son, and his grandson had all been killed. He stood in the rubble, a toothless old man dressed in brownish-red pajamas, and raised his fists to the heavens. "I feel deep hatred against the Americans!" he shouted. "As long as I live, I will have hatred in my heart!"

All sixteen beds in the emergency ward of the local hospital were filled. As I entered, I saw a five-year-old boy, his body covered with burns. There was a thirteen-year-old girl whose left leg had been severed just above the knee. There were two children whose bodies were full of steel pellets from the anti-personnel bombs. The doctor who took me around said as we emerged from the ward, "You Americans say you do not mean to kill people. Why, then, do you use anti-personnel bombs?"

Some sections of Hanoi proper have been bombed. I was shown three public-housing projects, comprising about five hundred apartments, that had been destroyed in the raids of June 27th and July 4th. The authorities claim that the raid of July 22nd knocked out a water-purifying plant. I was told that hospitals and schools had been hit in raids during the spring. The industrial power plant for the city has been destroyed, and the electric current that emanates from the remaining power plant is feeble and subject to repeated failure. But otherwise Hanoi is remarkably intact. It bears the aspect of a nineteenth-century French provincial capital, very clean and rather drab, with broad tree-lined avenues and airy public buildings of reddish or mustard-colored concrete. The working day starts around dawn, breaks at eleven for four hours, and resumes at three in the afternoon for another four hours. At the beginning and end of every break, the streets are filled with men and women going to and from offices, shops, and factories. The men wear sandals, cotton trousers, and short-sleeved sports shirts, usually white and open at the neck. The women are dressed in the traditional *ao dai,* and they all seem to have the lissome beauty made so familiar to Americans by the women of South Vietnam. Compared with Saigon, where the streets are messy with beggars, prostitutes, peddlers, and families cooking on the sidewalks, Hanoi has almost no street life. The police and the military, both highly visible in Saigon, are rarely seen in Hanoi; even their manning of checkpoints at the city gates—by soldiers in little huts, which they rarely leave—is discreet.

Most shopping is done in the early morning, and the closest thing to a crowd in Hanoi is the collection of housewives bustling about the central market just after dawn. By making huge purchases of food, both abroad and from peasants at home, and by rationing such goods as rice and cloth, the government keeps the prices of necessities within the reach of a consuming public whose earnings average ninety dong, or thirty dollars, a month. Rationed rice (under a system that allots thirty-three pounds a month to a worker, nineteen to a child, and thirty to a government minister) costs about six and a half cents a pound. When I visited the market, beef was going for about forty-five cents a pound, fresh carp for thirty-five cents a pound, fish sauce for twenty cents a pound, and fresh eggs for a dollar a dozen. Pineapples cost twenty cents apiece, tomatoes thirty-five cents a pound. Ducks were being sold, live, at thirty cents a pound.

Goods other than food are brought at government-controlled department or specialty stores. At one department store, I priced soap at twenty cents a bar for a Russian-made brand and forty cents a bar for a luxury item from East Germany, conical hats at eighty cents apiece, plastic raincoats at a dollar apiece, and sleeping mats at forty cents. Sandals cost four dollars a pair, and shoes were on special sale, reduced from eight dollars a pair to six dollars. A short-wave radio cost three hundred and fifty dollars, a Russian-made camera five hundred dollars. Next to the department store was a tailor shop, and there I found shirts selling for three dollars and fifteen cents apiece, and trousers for four dollars and seventy-five cents a pair. Next to the tailor shop was a Western restaurant—the Restaurant of European Dishes. Its menu, which was displayed, in the Continental style, outside the entrance, included a beef dish for thirty cents, an omelette for thirty cents, and stuffed crab for sixty cents. I had some of the crab, and it was very good.

The availability of fresh seafood in a Hanoi restaurant bears on one of the never-ending American arguments about Vietnam. Despite the mining of the harbors since mid-May, and the intensive bombing of all internal transportation lines, North Vietnam is plainly not paralyzed. Large quantities of goods move at a fairly rapid clip all the time. Trucks provide the chief means of transport, and downtown Hanoi, where the bombing is relatively sporadic, has become a kind of national parking lot. The railways have been cut at all the major rivers, but at night I saw several trains being pulled by steam locomotives on the lines between bridges. One foreign ambassador told me that on a nighttime trip to Haiphong he had counted seven moving freight trains. I myself have no evidence that a way around the mining has been found, but the Swedish Embassy here recently received a consignment of tonic water sent by sea, and curtains sent by ship to the British mission arrived the other day. Rumors persist that the North Vietnamese are unloading freighter cargoes at sea onto landing craft and other shallow-draft wooden vessels, which pass over the mines without activating them.

Laborious individual effort, systematically organized and repeated over and over again, is required to keep transport moving. Pontoon bridges have been set up to replace most of the bombed-out road bridges. Traffic moves in one-way bursts of half an hour each; at fixed times sections of the pontoon bridges are removed to allow passage of river traffic. To supplement the pontoon bridges, ferries—usually barges pushed by river steamers—have been set up at most major crossings. Sections of the railways are constantly being demolished by bombing and are constantly being replaced. Pontoon bridges cannot replace the destroyed railway bridges, but the North Vietnamese move merchandise by rail between bridges, then load it on trucks for the river crossing, and then back on freight cars. The trucks come from all corners of the Communist world—Russia, China, Czechoslovakia, East Germany—and they have been painted brown, numbered, and incorporated into a national fleet. They move mainly by night, with headlights hooded. During the day, they line the streets of Hanoi, parked in the shadow of buildings or trees and often camouflaged with leafy branches.

Underlying this laborious effort is a furious concentration on the war and its object—reunification with South Vietnam. The foremost official expression of this well-nigh obsessive focus is the last will and testament of President Ho Chi Minh, written in May of 1969 and published at his death, on September 3rd of that year. "Even though our people's struggle against U.S. aggression, for national salvation, may have to go through more hardships and sacrifices, we are bound to win total victory," the testament begins. A subsequent passage asserts:

"The war of resistance against U.S. aggression may drag on. Our people may have to face new sacrifices of life and property. Whatever happens, we must keep firm our resolve to fight the U.S. aggressors till total victory.

"Our mountains will always be, our rivers
will always be, our people will always
be;
"The American invaders defeated, we will re-
build our land ten times more beauti-
ful.

"No matter what difficulties and hardships lie ahead, our people are sure of total victory. The U.S. imperialists will certainly have to quit. Our fatherland will certainly be reunified. Our fellow-countrymen in the South and in the North will certainly be reunited under the same roof. We, a small nation, will have earned the signal honor of defeating, through heroic struggle, two big imperialisms—the French and the American—and of making a worthy contribution to the world national-liberation movement."

The six leading officials of North Vietnam—Le Duan, the First Secretary of the Workers', or Communist Party; Truong Chinh, the President of the National Assembly; Vo Nguyen Giap, the Defense Minister; Pham Van Dong, the Prime Minister; Nguyen Duy Trinh, a Deputy Prime Minister and Foreign Minister; and Le Duc Tho, the Politburo member sits on the North Vietnamese delegation to the Paris peace talks—have all sworn allegiance to Ho's testament. Parts of the testament are reprinted under pictures of Ho in markets, offices, and other public places. A placard bearing the line "No matter what difficulties and hardships lie ahead, our people are sure of total victory" is situated at a particularly lovely spot on the shore of the Little Lake in Hanoi. When I remarked to my interpreter that that seemed a queer place to put a call to arms, he replied that, on the contrary, it was entirely appropriate. The Little Lake, he told me, was also known as the Lake of the Restored Sword. In the early fifteenth century at a time when Vietnam was being invaded by the Chinese from the north, the Emperor Le Loi was out boating, and a tortoise surfaced and gave the Emperor a sword. With that sword, the Emperor beat the Chinese. He then went back to the lake and returned the sword to the tortoise. "The lake," my interpreter said, "is the symbol of our will to be a nation."

Another sign of the intense national commitment to the struggle is the Vietnamese radio. The Voice of Vietnam, as the radio is called, is the principal national medium. Among the twenty-one million residents of North Vietnam, there are five hundred thousand private radios and six hundred thousand loudspeaker units to relay broadcasts to the villages and hamlets. "Our main subject is the fight against U.S. aggression," Tran Lam, the director of the Voice of Vietnam, told me. "Our whole program has as its central theme the strength of our people versus U.S. aggression." On one typical morning, broadcasting began at five with a fifteen-minute program for the peasants. The subject, according to Mr. Lam, was "how to achieve high yield in rice cultivation despite the bombing." At five-fifteen, there was a two-part news bulletin. The first part announced "victories achieved in the past twenty-four hours in North and South Vietnam." The second part dealt with "threats to the dikes by U.S. imperialists and the condemnation of their action by the world public." At five-thirty-five, an announcer read the day's lead editorial in *Nhan Dan*, the official newspaper of the Workers' Party; it dealt with an anti-aircraft unit and the techniques used against low-flying American planes. At five-forty-five, there was a children's program on the subject of "how young people in the country should receive city children who are being evacuated." So it went for the rest of the day. The last program at eleven o'clock at night, was a study of "crimes committed by the U.S. and the lackey Thieu [as President Nguyen Van Thieu is always called here] in terrorizing the students of South Vietnam." The sign-off, at eleven-thirty, was an announcement of the number of American planes shot down—with a separate figure for hits on B–52s—since the war began.

This ceaseless concentration on a war waged against heavy odds has caused some Vietnamese, particularly in the leadership circles, to see themselves at the center of world history—a nation anointed to carry the torch of revolution. In a speech published on February 3rd, which is now deemed important as an expression of Hanoi's decision to launch the March 30th offensive in South Vietnam, Truong Chinh, the Assembly President, called Vietnam "the focus of the basic contradictions of human society." Nguyen Khac Vien, the French-educated editor of the scholarly publication *Vietnamese Studies*, with whom I had one of my rare unsupervised interviews, expounded on the theme without any evident self-consciousness. "Vietnam has become the focus of the three conflicts central to the present age," he said, as though he were stating a known fact apparent to the meanest intelligence. "It is the front line in the fight between colonialists and anti-colonialists. It is the front line in the fight between capitalists and Socialists. It is the front line in the international class struggle between the rich and the people."

Hong Chuong, an editor of the Communist monthly theoretical journal *Hoc Tap*, made the same point with what seemed to me melodramatic self-importance. I met him in the *Hoc Tap* offices, which are in a pleasant tower-shaped building overlooking a pond. The reception room was decorated with cases full of historical mementoes, including a first edition of *Pravada*, some medals depicting Lenin and Ho Chi Minh, and some fragments of American bombs. The ashtrays in the reception room were made from bomb casings. I opened the conversation by asking for a few biographical details, and Mr. Chuong told me, "We don't speak about ourselves, because we consider each individual a drop of water in the ocean of the people. But I can tell you that I am a journalist about fifty years old."

I asked Mr. Chuong whether he was born in North or South Vietnam. He said, "We don't make that distinction. Our President, our Prime Minister, and the First Secretary of our Party were born in the South. Our country is one. The problem of partition is a problem that has been made by you American imperialists."

I asked him to tell me about the Vietnamese approach to Marxism and how it differs from the Russian and Chinese approaches. He said, "Our tradition is one of fighting, and we put it in the framework of Leninism. It is not enough to say that we have been fighting for thirty years. We have been fighting for much longer than that. We have made a contribution to Socialism in military thinking. Let me take as an example our national hero Tran Huong Dao. He rose up against the Mongal invasions two centuries before Columbus. These were the same Mongols who took China and India and Europe. They were defeated in Vietnam. Not once but three times we defeated them. And each time, I may say, we took prisoners and released them—fifty thousand each time. I once read an article by an American comparing Tran Huong Dao with Clausewitz. I think that underestimates Tran Huong Dao. Clausewitz existed in the eighteenth century; Tran Huong Dao was five centuries before him. Moreover, Tran Huong Dao was not only a great military writer, as was Clausewitz. He was also a great general of armies. I think Tran Huong Dao is a head taller than Clausewitz.

"But you asked about the originality of Vietnamese Socialism. Here is an example. In Russia, Lenin replaced Kerensky and the Czar. Lenin represented the proletariat, and Kerensky and the Czar represented the bourgeoisie and the nobles. But they were all Russians. In China, Mao Tse-tung replaced Chiang Kai-shek. Mao represented the peasants, and Chiang was a representative of the warloads. But they were both Chinese. In Vietnam, however, Ho Chi Minh replaced the Japanese Fascists and the French colonialists. President Ho was Vietnamese. They were foreigners. Our contribution to Marxism is not a question of doctrine. We have creative minds, and we are not stuck on any formula. One mistake that the Americans always make is to think that we will do what the Russians did or the Chinese did. In that sense, you are dogmatists. But we follow our own ways, and that is why you are being defeated. If there is a single piece of advice I would give to Kissinger, the adviser of Nixon, it would be: Abandom dogmatism. For instance, in chess you can imagine a board full of pieces where the right move will win. You can also imagine a board where most of the pieces are gone and where the right move will also win. We have used both tactics against the Americans."

I said that I was not sure I followed his argument, and he said, "A baby of two cannot understand an adult of forty, but an adult of forty can understand a baby of two. The United States will be two hundred years old in four years. Vietnams is now four thousand years old. Vietnam can understand the two-hundred-year-old United States. But the United States cannot understand the four-thousand-year-old Vietnam. Nixon said recently that the war had lasted eleven years and had been hard and long. For us, it has not been long enough. We have been fighting eleven centuries, not eleven years. We fought eighty years against the French. When we came to understand that we would have to fight against the United States, we were sure it would take longer. We thought it would take a century, and we are ready to fight for a century. But Nixon has only two cards to play now. He can destroy Hanoi. That is one. He can destroy the dikes. That is the other. But we are not afraid. Let him play them. After that, he will be defeated."

After that interview, I told Ngo Dien, the official of the North Vietnamese Foreign Office who had finally approved my application for a visa to Hanoi, that some of his countrymen seemed to me positively fanatical in their single-minded attention to Vietnam and the war. He said, "We are not fanatics. If we were fanatics, we would lynch the pilots when they were shot down, not treat them correctly in prison camps. If we were fanatics, you would not be here." He went on to point out that immoderate boasting was one response of a small and backward country caught up in a war with a great power, and that another response was to show the special modesty personified by Ho Chi Minh. "The example of our President," he said, "has had a great impact on the Vietnamese people."

Perhaps by accident, perhaps by prearrangement, in everything that happened to me thereafter in Hanoi the softer side of the Vietnamese character emerged. A curious instance occurred at a dinner given for me by the Vietnamese press association. Among the guests was Colonel Ha Van Lau, the officer who negotiated the military cease-fire with the French back in 1954, and a former member of the North Vietnamese delegation to the Paris peace talks—a man whom I had come to know as the toughest of the tough. Colonel Lau is now in charge of the office that investigates what the North Vietnamese call American war crimes. In an earlier encounter during my visit to Hanoi, Colonel Lau had described American depredations against his country in the harshest terms. He had flung out his words contemptuously, the way a Spaniard spits. But at dinner he was another person. We talked about President Nixon's visit to China and his trip to the Great Wall. I said that the President's comments had not been distinguished but that it was hard to know how an American President should respond to the sight of the Great Wall. Someone suggested that he should have written a poem. "Better a song," Colonel Lau put in. He said that songs were particularly suitable to memorable places. He said there was one song that always reminded him of Paris. It was sung by an American, Josephine Baker. Did I know it? And suddenly the severe military man, who sometimes, in the fury of his nationalism, affected not to speak French, began to sing, in a voice that wasn't at all bad:

> "J'ai deux amours
> Mon pays et Paris. . . ."

The next day, an interview was arranged with Nguyen Dinh Thi, a writer, whose work ranges from a critique of Aristotle to a song that the national radio uses as its theme. One of his novels, "The Dike That Exploded," was a best-seller. As secretary of the Writers' Union, he has been in touch with literary figures the world over. Yevtushenko had been his guest during a visit to Vietnam. "I liked him very much," Thi said. "But he is an actor. I told him, 'You are the Don Quixote of world literature.'" Thi told me that "by tradition and wisdom and the teachings of Ho Chi Minh, the Vietnamese people have developed a spirit of bitter intransigence in a fight." He went on, "Our people are performing now as the victims of barbarism. I regret that you haven't seen another side of us. We are poor. We are used to a hard life. We have typhoons every year. We do the back-breaking work of cultivating rice. Our tradition is that everybody helps everybody else. We respect literature more than war in our country, and there has never been a military caste here, as there was in Japan. An expression we use all the time is '*Tinh thuong*,' which means a combination of pity, compassion, and love. We know that we live on the edges of the great powers. We see that we have to be prudent and modest. We have a great sense of humanity, a sense of the pity of humanity."

At a reception the day after that, I met Ton That Tung, a distinguished surgeon and a relative of the former emperor Bao Dai. Among other things, Dr. Tung has translated into French the works of To Huu, a leading contemporary poet, who works in the Secretariat of the Workers' Party. I told Dr. Tung that some of his countrymen seemed peculiarly harsh to me—as if fighting were the only way they know of to achieve things. I asked him if there was anything that he found unique in the Vietnamese personality. He said, "You should notice that when we entertain we never lord it over people—we put them wholly at ease. And we don't have religious disputes; except when foreigners were involved, we had toleration for all religions."

He asked me what other impressions I had of North Vietnam. I said something about the need to end the war. Feeling that to be banal, I added that the two sides seemed so far apart and that there was so little mutual trust that I was pessimistic about a settlement. Dr. Tung was not so pessimistic. He said, "I know your people are tired of the war. Do you think our people want to go on fighting forever?"

I found that leaving Hanoi was almost as hard as getting there. Only four regular planes a week come to Hanoi: two small Chinese planes with chancy connections through Nanning to Canton and Hong Kong; an Ilyushin 18, run by Aeroflot, which goes out through Laos; and a converted Second World War Stratoliner, which is run by the International Control Commission set up at the Geneva Conference of 1954, and which also goes out through Laos. Bad weather forced two cancellations, but finally I left aboard the Russian airliner. My chauffeur, my interpreter, and a woman guide from the Foreign Ministry who had supervised my entire trip all came out to the Gia Lam airport to escort me through customs and wait for the plane to take off. As we sipped beer and lemonade in the departure lounge, a good cross-section of the foreign diplomats and journalists stationsd in Hanoi passed in review. They are cut off from normal Vietnamese life by the language barrier and various restrictions, including the prohibition against driving cars.

Much as settlers in the West used to arrange their lives around the pony express, the foreign colony in Hanoi orders its life around the planes from the outside world. Among those I saw were an Arab diplomat, who assured me that a particularly tough statement put out the night before by the North Vietnamese Foreign Ministry was done for "domestic consumption," and an East European diplomat, who said the statement showed that revisionism was finally taking hold in Hanoi. A military attaché observed that he had recently been counting the number of anti-aircraft guns parked along the road from Hanoi to Gia Lam; it was down from ninety-six a week ago to sixty-two—a probable sign that the guns had been moved south toward the front. A West European diplomat observed that though the Paris peace negotiations had resumed, they would probably not get anywhere, because the North Vietnamese did not feel for Nixon the kind of trust they felt for Pierre Mendés-France, who negotiated the Geneva settlement back in 1954. I also saw a Russian diplomat, with whom I shared a bomb shelter at the Foreign Ministry during an air-raid alert, and a Soviet journalist—one of two indistinguishable heavies representing *Pravda* and *Izvestia*, who were known as the speakers of English in Hanoi as Mutt and Jeff. As each of these passing acquaintances talked, my guide drew for me on a napkin the ideograms used to denote their countries. I asked her to draw the characters for America. She did, and then she said, "Literally, the characters mean 'beautiful country.' I wish you Americans would stop behaving in a way that is—I won't say it. I wish you would start behaving again in a way that is beautiful."

JOSEPH KRAFT.

MESSAGES FROM THE PRESIDENT—APPROVAL OF BILLS AND JOINT RESOLUTIONS

Messages in writing from the President of the United States were communicated to the Senate by Mr. Leonard, one of his secretaries, and he announced that the President had approved and signed the following acts and joint resolutions:

On August 19, 1972:

S.J. Res. 260. Joint Resolution to suspend until March 1, 1973, the effectiveness of certain amendments made by the Education

Amendments of 1972 to the Guaranteed Student Loan Program.

On August 20, 1972:

S. 484. An act to designate the Scapegoat Wilderness, Helena, Lolo, and Lewis and Clark National Forests, in the State of Montana; and

S. 3645. An act to further amend the U.S. Information and Educational Exchange Act of 1948.

On August 22, 1972:

S. 559. An act for the relief of Albinila Lucio Z. Manlucu;

S. 596. An act to require that international agreements other than treaties, hereafter entered into by the United States, be transmitted to the Congress within sixty days after the execution thereof;

S. 2704. An act for the relief of Rita Rosella Valleriani; and

S. 2854. An act to amend title 28, United States Code, relating to annuities of widows of Supreme Court Justices.

On August 25, 1972:

S. 2166. An act to authorize the establishment of the Grant-Kohrs Ranch National Historic Site in the State of Montana, and for other purposes; and

S. 3159. An act to authorize the Secretary of the Interior to establish the John D. Rockefeller, Junior, Memorial Parkway, and for other purposes.

On August 28, 1972:

S.J. Res. 182. Joint Resolution authorizing the President to invite the States of the Union and Foreign Nations to participate in Farmfest—U.S.A. and the World Plowing Contest in September 1972.

On August 29, 1972:

S. 3726. An act to extend and amend the Export Administration Act of 1969 to afford more equal export opportunity, to establish a Council on International Economic Policy, and for other purposes;

S. 3824. An act to authorize appropriations for the fiscal year 1973 for the Corporation for Public Broadcasting and for making grants for construction of noncommercial educational television or radio broadcasting facilities; and

S.J. Res. 213. Joint resolution to authorize and request the President to issue a proclamation designating October 6, 1972, as "National Coaches Day".

EXECUTIVE MESSAGES REFERRED

As in executive session, the President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(The nominations received today are printed at the end of Senate proceedings.)

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Berry, one of its reading clerks, announced that the House had passed the following bills of the Senate, each with amendments, in which it requested the concurrence of the Senate:

S. 3490. An act to authorize and request the President to issue annually a proclamation designating August 26 of each year as "Women's Rights Day"; and

S. 3755. An act to amend the Airport and Airway Development Act of 1970, as amended, to increase the United States share of allowable project costs under such Act; to amend the Federal Aviation Act of 1958, as amended, to prohibit certain State taxation of persons in air commerce, and for other purposes.

The message also announced that the House had passed the following bill and joint resolutions, in which it requested the concurrence of the Senate:

H.R. 8215. An act to provide relief for certain prewar Japanese bank claimants;

H.J. Res. 135. Joint resolution to authorize the President to issue a proclamation designating the week in November of 1972 which includes Thanksgiving Day as "National Family Week";

H.J. Res. 1080. Joint resolution providing the observance of "Youth Appreciation Week" during the seven-day period beginning November 13, 1972;

H.J. Res. 1193. Joint resolution to provide for the designation of the week which begins on September 24, 1972, as "National Microfilm Week";

H.J. Res. 1227. Joint resolution approval and authorization for the President of the United States to accept an Interim Agreement Between the United States of America and the Union of Soviet Socialist Republics on Certain Measures With Respect to the Limitation of Strategic Offensive Arms; and

H.J. Res. 1263. Joint resolution authorizing the President to proclaim October 30, 1972, as "National Sokol U.S.A. Day".

HOUSE BILL AND JOINT RESOLUTIONS REFERRED

The following bill and joint resolutions were severally read twice by their titles and referred, as indicated:

H.R. 8215. An act to provide relief for certain prewar Japanese bank claimants;

H.J. Res. 135. Joint resolution to authorize the President to issue a proclamation designating the week in November of 1972 which includes Thanksgiving Day as "National Family Week";

H.J. Res. 1080. Joint resolution providing the observance of "Youth Appreciation Week" during the 7-day period beginning November 13, 1972; and

H.J. Res. 1193. Joint resolution to provide for the designation of the week which begins on September 14, 1972, as "National Microfilm Week"; and

H.J. Res. 1263. Joint resolution authorizing the President to proclaim October 30, 1972, as "National Sokol U.S.A. Day"; to the Committee on the Judiciary.

H.J. Res. 1227. Joint resolution approval and authorization for the President of the United States to accept an Interim Agreement Between the United States of America and the Union of Soviet Socialist Republics Certain Measures With Respect to the Limitation of Strategic Offensive Arms; to the Committee on Foreign Relations.

OUTRAGE AT MUNICH OLYMPIC GAMES

Mr. SCOTT. Mr. President, the shooting at Munich is incredible. Holding citizens of Israel as hostages and attempting to halt the Olympic games so that the Arabs can get their way is unbelievable.

The actions by these irresponsible persons, coming during an event being watched by the free world and others, are vile and barbaric.

The Olympic games have been cast over the years as being nonpolitical. Representatives of other countries, whether in tune ideologically or on the other side, have always been able to put their differences aside to compete. This wholesome activity brings us closer to lasting peace.

But the shooting at Munich can set back all of these gains.

It is hoped that all nations will condemn this barbaric action.

Perhaps the United Nations can summon enough courage to join in condemnation of this inhumanity.

Mr. MANSFIELD. Mr. President, will the distinguished minority leader yield?

Mr. SCOTT. I yield.

Mr. MANSFIELD. I wish to join the distinguished Republican leader in the remarks he has just made, about the reprehensible and outrageous events which have occurred at the Olympic games in reference to the killing and detention of the Israeli athletes by Arab terrorists.

It is outrageous. It is reprehensible.

I would suggest most seriously that the Olympic games be canceled in memory of those who have been killed as a result of what has happened there.

Mr. JAVITS. Mr. President, will the distinguished majority leader yield?

Mr. MANSFIELD. I yield.

Mr. JAVITS. Mr. President, I should like to associate myself both with the majority and minority leaders. This is piracy against the civilized world. The world simply cannot tolerate this kind of lawlessness. I say this without regard to the ideology or social order of any nation—Communist or free.

Mr. President, the last time a dread event like this occurred, the massacre at the Tel Aviv Airport, a high official in the Arab world expressed sympathy with the terrorists. This was hardly designed to discourage them.

I hope that the world will take careful note and hold strictly to account any nation—Arab or otherwise—which gives sanctuary or in any way gives implicit or express approval to these murderers—and that is all they are.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD my statement in the Senate Chamber last June 6 relating to the previous outrage.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF MR. JAVITS

I wish to note that this very morning a United States Air Force plane is bringing back to Puerto Rico the bodies of 16 murdered Puerto Rican Christians who were engaged in a religious pilgrimage to Israel. They were massacred by pro-Arab terrorists at the Tel Aviv airport. This is an outrage that resulted in more than 100 persons being killed or wounded. The citizens of Puerto Rico are American citizens. They serve in the armed forces of the United States, and they are part of our country as much as are the citizens of any State.

These 16 Americans were ostensibly protected by our flag. The responsibility which we have to Americans who travel abroad may well be proven to be devoid of real substance unless our Government does something to dramatize to other governments that we will not countenance airborne terrorism and that we will not countenance any explicit support for such terrorism by any country which has friendly relations with the United States.

I think that the world is appropriately appalled that any people, let alone any nation, would claim credit for such a dreadful and brutal mass murder as took place in the Tel Aviv airport. But credit is being claimed by people in Lebanon who live or who are at least harbored there, and who seem to be training and arming for such international forays.

There was even some satisfaction expressed in Lebanon that this act had been done. We have not seen anyone arrested by Lebanese authorities as a collaborator for this crime, although Arab terrorist organizational spokesmen have come forward and claimed credit publicly for this deed in an office operated openly in downtown Beirut. We heard of a press announcement by an Arab organization's spokesman in Beirut who said, "Our purpose was to kill as many people as possible."

In addition to this, we have the second highest official in Egypt, the Premier of that nation, commenting upon this murder of innocent people in Tel Aviv, including 16 American citizens, that the deed proved, "that we are able to achieve victory over Israel." Actually, the incident proved nothing except that fanatics could be seduced into performing mass murder against innocent travelers.

In my judgment, the United States should require from the government of Lebanon a full accounting of what takes place on its soil involving the murder of Americans. We must demand an investigation to prove or disprove the complicity of those harbored of Lebanese territory in this terrible crime.

What I am seeking to emphasize today is the fact that we are dealing with the killing of American air travelers and not with Arab-Israel relations. We are dealing with the claim that this terrorism and murder originated from Lebanon with which we are friendly, and the statement by the Number Two Man of Egypt that he derives great satisfaction from it. I do not believe the United States can tolerate this wanton barbarism which has resulted in the killing of 16 Americans. There are steps we can take.

We maintain friendly relations with Lebanon and Egypt. American commercial airplanes travel to each of these countries, as do the airlines of the world.

I think our Government has a duty and a responsibility to get to the bottom of the matter of involvement of Lebanon and Egypt, and, if necessary, to cancel or cause our airlines to cancel international flights to both Lebanon and Egypt. In addition, both of these countries solicit American tourism and there is a question whether American tourists should be encouraged to travel to these areas in light of the recent events. I very much hope that the appropriate agencies of the United States Government will immediately look into this matter.

Additionally, I understand that the wounded and other Puerto Rican survivors are people of very modest means and many have even lost their personal belongings in the holocaust. Our government should make arrangements for transportation home of all Puerto Rican Americans involved and provide extended medical care for the wounded.

Mr. JAVITS. Mr. President, today's act is designed to thwart the whole world let alone the small nation of Israel. We simply cannot tolerate it. As men, we must find some way to deal with it. Certainly no sports event, eminent as it may be, should be allowed to stand in the way of concentrating the attention of the world on this dread calamity.

The Arab terrorists have desecrated the Olympic games concept of brotherhood. Any nation that gives them sanctuary or sympathy must be held accountable to all mankind.

Human lives are certainly more important than any sports schedule and the Olympic games schedule must yield to this overriding calamity.

The Arab terrorist action obviously seeks to intimidate the civilized world. We cannot submit to this strategy of of terror.

The distinguished majority and minority leaders have expressed the views of millions and millions of Americans, and I am honored to join them in those views.

Mr. COOPER. Mr. President, will the Senator from New York yield?

Mr. JAVITS. I yield.

Mr. COOPER. I would like to join in the statements just made. There is no greater problem in the world today of a domestic or international nature than the question of the observance of law. This awful event which has just occurred in Munich is a threat to all law-abiding people in the world—wherever they may live.

I agree with the distinguished minority leader that this unhappy event provides an opportunity for the United Nations, in some way, to express its grave concern and to go beyond that, under its commitment to human rights, and express its outrage at this dastardly crime.

ORDER OF BUSINESS

The PRESIDENT pro tempore. Under the previous order, the distinguished Senator from Tennessee (Mr. BAKER) is now recognized for 15 minutes.

REVENUE SHARING

Mr. BAKER. Mr. President, this week, the Congress, at long last, goes into the homestretch in the revenue-sharing derby. It is with a sense of considerable relief and optimism that I rise today to make what I hope and expect to be the last in a long series of formal speeches in the Senate Chamber in support of this vitally important legislation.

The concept of general revenue sharing—or "tax sharing" as it was then called—first came to national attention in the early 1960's, when it was proposed by two distinguished economists, Walter Heller and Joseph Pechman. During my 1966 campaign for the U.S. Senate, I pledged to the people of Tennessee that I would make revenue sharing one of my highest legislative priorities. On March 9, 1967, I devoted my "maiden speech" as a freshman Senator to the introduction of the Tax-Sharing Act of 1967. In 1968, both major political parties included support of general revenue sharing in their national party platforms. On September 23, 1969, I introduced on behalf of the Nixon administration the first general revenue-sharing legislation ever proposed by a President of the United States. On February 9, 1971, I introduced a revised version of the President's proposal. I have testified on behalf of general revenue sharing before five different committees of the Congress and made speeches around the country in support of the plan.

Although I never lost faith in the importance of the concept, I must admit that there were times when I was deeply discouraged about the prospects for its enactment into law. In spite of overwhelming support for revenue sharing at every level of State, county, and municipal government, in spite of strong bipartisan support in the national platforms of both political parties, in spite of the urgent pleas of the President of the United States, in spite of a January 1971 Gallup poll showing 77 percent of the American people supporting revenue sharing, and in spite of bipartisan support in both Houses of Congress, the proposal languished in congressional committees.

On April 26 of this year, however, the House Committee on Ways and Means reported H.R. 14370, the State and Local Fiscal Assistance Act of 1972, and the race toward the finish had finally begun. It has been a story of persistence, hard work, willingness to put partisanship aside, and perhaps most important of all, the eminent logic and necessity of revenue sharing.

There is no need for me to dwell on the well-known virtues of the proposal: its capacity to meet, at least in part, the crushing fiscal needs of State and local governments, the beginning of a reversal of the seemingly inexorable flow of revenue and power to the Central Government, the substitution of progressively raised revenues for regressively raised revenues, the vote of confidence it expresses in the capacity of locally elected officials to meet the most immediate needs of their constituencies, the relative certainty that it will provide for State and local fiscal planning for a period of years, the flexibility it offers State and local governments in making fiscal judgments, and on and on.

I realize that there are those who are deeply and honestly concerned by the fact that the Federal Government, which raises these revenues, will surrender to some degree the control that it has over the expenditure of those funds. It seems to me that there are a number of responses to that concern. There are no such thing as Federal dollars; the Federal tax dollar is not created by the Federal Government but through the exertions and productivity of the American people. The simple fact that the Federal Government collects these dollars does not detract from the fact that the dollars themselves derive from the people. Nor are we proposing to relinquish control over more than a tiny fraction of Federal revenues.

I have long believed personally that the most flexible and creative approach to Federal financial assistance is one that involves a mix of three basic forms: general revenue sharing for general governmental purposes, block grants—or so-called special revenue sharing—for broadly defined areas of national concern and priority, and categorical grant-in-aid programs for those programs and projects where it is adjudged that a strong and detailed Federal administrative presence is called for.

As to the simplistic criticism that there are no revenues to share, the fact is that any Federal expenditure during a period of budget deficit—and who can remember when there was not one?—is an expenditure of borrowed moneys. As far as I am concerned, general revenue sharing, which was included in the President's fiscal year 1973 budget submission, is a program of the very highest priority, and if the Congress is worried about budget deficits—as this Senator certainly is—it should pay more attention to the appropriation of funds in substantial excess over what the President has asked for and not so much on obstructing funds that he has asked for. The Congress should also give immediate consideration to the spending ceiling sought by the administration.

Mr. President, when I appeared before the Senate Committee on Finance on June 29 to testify in support of revenue sharing, I appeared in support of S. 3651, a bill which Senator Humphrey and I and 42 other Senators of both parties had introduced on May 30. S. 3651 was identical to H.R. 14370 as reported by the Committee on Ways and Means and passed by the House. I tried to make it as clear as I could to the Senate committee that the importance of enacting a general revenue sharing bill in this Congress far transcended any partisan political credit that might inure to any individual or any political party. I believe that even more strongly today. There have been so many people, at every level of government and of every imaginable political and ideological persuasion, involved in the evolution of this legislation, that there will be more than ample credit to go around for everyone.

I also stressed to the Senate committee that, while I hoped it would make certain changes in the House-passed bill, especially that provision penalizing States with little or no personal income tax revenue, the fact that I had joined together with Senator Humphrey and others to introduce a bill identical to the House bill was a strong indication on my part that I was more than prepared to accept certain elements of the program that I did not believe wise in order to have the concept itself engraved on the statute books of this Nation. While I am personally delighted by many of the changes made by the Senate committee, and while I believe that in most of its particulars the Senate bill is a better bill than the House bill, I reiterate today my own flexibility with respect to the ultimate product. Although I will resist any effort to restore the so-called strings of the House bill that limit the freedom of local and State governments to spend funds as they choose, and although I will resist any significant change in the ingenious distribution formula devised by the Senate committee, it is hard for me to imagine a general revenue-sharing bill so modified that I could not support it.

General revenue sharing is an idea whose time has long since come. In March of 1971 the Harris poll reported that 85 percent of the American people expressing an opinion on the subject gave the 91st Congress low marks for its inaction on revenue sharing. Let it not be said of this Congress that it let slip through its fingers the most innovative and important means for strengthening our federal system that has come along in decades.

TRANSACTION OF ROUTINE MORNING BUSINESS

The PRESIDENT pro tempore. Under the previous order there will now be a period for the transaction of routine morning business for not to exceed 30 minutes with statements therein limited to 3 minutes each.

CALL OF THE ROLL

Mr. JAVITS. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The second assistant legislative clerk called the roll and the following Senators answered to their names:

Mr. PERCY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. COOPER. Mr. President, I must object.

The PRESIDENT pro tempore. Objection is heard. The clerk will continue to call the roll.

The second assistant legislative clerk resumed and concluded the call of the roll, and the following Senators answered to their names:

[No. 387 Leg.]

Allen
Baker
Byrd, Harry F., Jr.
Byrd, Robert C.
Cooper
Eastland
Fannin
Griffin
Javits
Mansfield
McClellan
McIntyre
Moss
Packwood
Percy
Randolph
Schweiker
Scott
Spong
Stafford
Talmadge

The PRESIDING OFFICER (Mr. McClellan). A quorum is not present.

Mr. ROBERT C. BYRD. Mr. President, I move that the Sergeant at Arms be directed to request the attendance of absent Senators.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from West Virginia.

The motion was agreed to.

The PRESIDING OFFICER. The Sergeant at Arms is instructed to execute the order of the Senate.

After some delay, the following Senators entered the Chamber and answered to their names:

Aiken
Allott
Bayh
Beall
Bellmon
Bennett
Bentsen
Bible
Boggs
Brock
Brooke
Burdick
Cannon
Case
Church

Mr. ROBERT C. BYRD. I announce that the Senator from New Mexico (Mr. Anderson), the Senator from Florida (Mr. Chiles), the Senator from North Carolina (Mr. Ervin), the Senator from Oklahoma (Mr. Harris), the Senator from South Carolina (Mr. Hollings), the Senator from Wyoming (Mr. McGee), the Senator from South Dakota (Mr. McGovern), the Senator from Montana (Mr. Metcalf), the Senator from Maine (Mr. Muskie), the Senator from Rhode Island (Mr. Pell), and the Senator from Alabama (Mr. Sparkman) are necessarily absent.

I further announce that the Senator from Iowa (Mr. Hughes) is absent on official business.

Mr. GRIFFIN. I announce that the Senator from New York (Mr. Buckley), the Senator from Kentucky (Mr. Cook), the Senator from Hawaii (Mr. Fong), the Senator from Arizona (Mr. Goldwater), the Senator from Wyoming (Mr. Hansen), and the Senator from Oregon (Mr. Hatfield) are necessarily absent.

The Senator from South Dakota (Mr. Mundt) is absent because of illness.

The PRESIDING OFFICER (Mrs. Edwards). A quorum is present.

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Madam President, I ask unanimous consent that the period for the transaction of routine morning business, with statements therein limited to 3 minutes, be extended for an additional 15 minutes.

Mr. JAVITS. Madam President, reserving the right to object—and I hope not to object—I should like to have a colloquy, if I may, with the permission of the assistant majority leader.

Mr. ROBERT C. BYRD. Well, Madam President, we have to have an extension of the period for the transaction of routine morning business, if there is to be any colloquy. The period has run its course.

Mr. JAVITS. Madam President, I hope that the Senator will not compel me to object. I believe that the points I wish to make are serious and require answers by him. I would simply object. The Senator leaves me no alternative.

Mr. ROBERT C. BYRD. Madam President, in order to accommodate the Senator, I ask unanimous consent that I may proceed for 3 minutes.

The PRESIDING OFFICER. Is there objection to the request of the Senator from West Virginia? The Chair hears none, and it is so ordered.

Mr. JAVITS. I thank the Senator from West Virginia very much.

It is well known that the House has messaged over a bill, called the antibusing bill, and that it is now on the desk in the Senate.

The Senator from West Virginia has checked the rules, just as I have checked them.

The question which I ask the deputy majority leader is whether under the rules, the House bill having come over and being at the desk, there is any procedure as far as the Senator knows by which I can move to send that bill to committee rather than having it on the calendar, assuming that a Senator objects to further proceeding after the second reading.

Mr. ROBERT C. BYRD. Madam President, under the circumstances there is no such procedure.

Mr. JAVITS. Madam President, with the Senator's permission, if he will allow me, may I make an inquiry of the Chair as to whether there is any way I can move to send the so-called antibusing bill to committee if any Member objects to further proceedings after second reading?

The PRESIDING OFFICER. The bill has to be before the Senate to move to refer a bill. If objection is heard after the second reading, the bill will go to the calendar under rule XIV. The only way to reverse that procedure would be for the Senator to take an appeal from the ruling of the Chair.

Mr. JAVITS. I thank the Chair.

May I point out, Madam President, that it is essential for those on my side of the issue to make a record of the fact that we could not send the bill to committee, even though we want to do so. Then when I or some other Senators at a later date when the bill is before the Senate wish to speak, we can be heard on the fact that we were not allowed to use all our options at this time.

The second point I wish to raise is also very serious. That question concerns the issue of surprise. This is an extremely serious bill. I would like to call the attention of the Senate to the fact that we have five bills on the calendar this morning under a unanimous-consent agreement which allows a very brief period, something like 20 minutes, on amendments to each bill.

It is possible that H.R. 13915 could be added to any one of those bills, and although we did not know at the time we agreed to the agreement, the bill will be on the calendar and can be kept hanging over the Senate and can be called up at any moment. We are in a very difficult position today, and we face a whole series of bills which could with, I think, complete unfairness to the parties concerned—certainly to those who oppose the House bill—result in a very sharply curtailed debate on the first day that we are back in session, at a time when we had to take an hour to get a quorum of 51 Senators to transact business.

I am not asking any Senator to stay his hand. It is any Senator's privilege, just as it was my privilege to get a live quorum and do everything I can to defeat the bill. I ask the leadership as to its intentions regarding the matter of surprise, because if the leadership informs the Senate that it will, insofar as it can, not allow the Senate to be surprised and will give adequate notice and an opportunity for debate on this issue, then if a motion is made to table, with the leadership's support, it will probably prevail.

So I raise that question of surprise with the deputy majority leader in this connection at the very outset of this situation.

Mr. ROBERT C. BYRD. Madam President, I ask unanimous consent that I may be permitted to proceed for an additional 3 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Madam President, as to the question of surprise, the distinguished majority leader is here, and I would defer to him on that matter. However, I would say this in response to the distinguished Senator from New York. Insofar as the bills which are scheduled to come before the Senate following the period for routine morning business today are concerned, no nongermane amendment can be offered to any of those bills under the unanimous-consent agreement previously entered into.

Madam President, I yield to the distinguished majority leader if he wishes to respond.

Mr. ALLEN. Madam President, would the Senator yield?

Mr. JAVITS. Madam President, would the Senator allow me to finish this colloquy?

I do not know that the leadership is ready to tell us anything about this matter today. I would certainly hope they would now express their intentions with regard to the question of surprise with respect to this bill that will be on the calendar. I could not get a pledge from 99 Members of the Senate, any of whom could call up this antibusing measure at any time.

After the leadership has expressed itself on the proposition as to whether they will do their utmost to prevent the Senate from being surprised and will give reasonable notice regarding the measure, a motion to table the measure would probably carry. The leadership cannot guarantee that. However, in the absence of the expression of any views by the leadership on this issue, we stand in great jeopardy with this measure on the calendar and not knowing when it might be called up. Any Member of the Senate might say that it is on the calendar and he is perfectly free to call it up.

Mr. MANSFIELD. Madam President, I agree with the remarks made by the distinguished assistant majority leader. As far as the joint leadership is concerned, it has been our consistent policy down through the years never under any circumstances, insofar as we were aware, to take any Member of the Senate by surprise.

It may be of interest to the distinguished Senator from New York to understand some of the difficulties which the majority leader went through before adjournment. It was his intent at that time to try to protect the rights of all Members of the Senate, both those for and against the proposal which will go on the calendar shortly, not because of his personal interest so much, but because of his interest in the rights of Senators whom he has delegated to look after the matter because of the position which he holds.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. MANSFIELD. Madam President, I ask unanimous consent that I may proceed for an additional 3 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MANSFIELD. Madam President, I will say as far as the joint leadership is concerned—and I know that I can speak for the distinguished Senator from Pennsylvania, the Republican leader—that there never has been and there never will be any surprises pulled. I would not expect any Senator on any side of this question to conduct himself in that manner. I would assume without question that the leadership would be approached and that if any proposals are offered, the leadership would be made aware of them and on that basis the leadership would then be in a position to notify the appropriate interested parties so that they could be on the floor to protect their own interests at that time.

Mr. JAVITS. Madam President, may I say to the distinguished majority leader that so long as this matter is hanging over the Senate, the whole question of unanimous consents will be very difficult. For example, although I was aware of what the Senator from West Virginia (Mr. ROBERT C. BYRD) referred to, that no amendment not germane to the provisions of the bill can be received, an argument can be made and even an appeal taken from the ruling of the Chair respecting the germaneness of an amendment. And if a Senate majority overruled the Chair, the amendment could go on any bill, even the bills on the calendar today that have a limitation of 20 minutes debate on amendments.

I would hope, Madam President, and I raise this suggestion to the leadership, that it will not foreclose any Member of the Senate from offering a motion on any of these bills. And I would not be so presumptuous as to seek a commitment from any Member. However, I wonder if it would not be prudent to wait until after the adjournment of the Senate when we have done our business today to have this matter definitively settled tomorrow so that Members of the Senate may be here and we may have an opportunity to consult.

The bill will go on the calendar. I have studied the rules carefully. I have consulted with the Parliamentarian. There is no way it can be kept off the calendar, but I felt we should give everyone another 24 hours to catch his breath and to see how we can deal with what will be a sword of Damocles hanging over the Senate during what we hope will be a brief session. There will be a tremendous amount of pressing business to which we all wish to lend ourselves but we do not wish to be deprived of due process with respect to this bill.

Mr. MANSFIELD. Madam President, I would be averse to adjourning at this time because we have made commitments to Members and those commitments should be, will be, and must be kept.

Mr. JAVITS. Madam President, if the Senator will yield, I did not suggest adjourning at this time. I was just suggesting we have an opportunity to catch our breath.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. MANSFIELD. Madam President, I ask unanimous consent that I may proceed for an additional 3 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JAVITS. The morning hour has gone by. Unless there is unanimous consent, this measure will not be called up for a second reading today. It will be called up as soon as there is a new legislative day. I have no desire to stall but I did make the suggestion that perhaps after the business today there be an adjournment. Then there will be a morning hour tomorrow, and that bill can go on the calendar tomorrow. This will give everyone a chance to catch his breath, including the leadership, in order to decide how to deal with this situation so that before it goes on the calendar there could be some assurance to the Senate of what we are faced with.

Mr. MANSFIELD. Madam President, if the Senator will yield, I see nothing to be gained by a 24-hour delay. But in view of the suggestion made, I would defer to the distinguished Senator from Alabama as to his reaction to the suggestion which has been made.

Mr. ALLEN. Madam President, I ask unanimous consent that I may proceed for 5 minutes.

The PRESIDING OFFICER. Is there objection?

Mr. MANSFIELD. Madam President, I have the floor and I would like to propound that question to the distinguished Senator on my time before my time is up.

Mr. ALLEN. Very well. The junior Senator from Alabama has no objection whatever to carrying the matter over for an additional day, provided there is an agreement that the bill receives a second reading on tomorrow, Wednesday—not on the next legislative day, but on Wednesday.

Mr. JAVITS. Yes.

Mr. ALLEN. The 6th of September.

With regard to the remarks of the distinguished Senator from New York with respect to surprise, the junior Senator from Alabama does not know to what the Senator from New York has reference because the junior Senator from Alabama on Thursday, before the recess on Friday, obtained unanimous consent of the Senate, and it appears in the RECORD, that when the message with respect to H.R. 13915 came to the Senate, whether that message came on Thursday before the adjournment or on Friday before the adjournment, he would be given 10 minutes during which time he could make such motions, requests, or comments with respect to that legislation that he deemed fit.

Well, surely, the distinguished senior Senator from New York knew that the junior Senator from Alabama was going to see that the bill received its first reading.

The PRESIDING OFFICER. The additional 3 minutes of the Senator have expired.

Mr. MANSFIELD. Madam President, I ask unanimous consent that I may have an additional 3 minutes.

The PRESIDING OFFICER. Without objection it is so ordered.

Mr. ALLEN. Surely the distinguished Senator from New York knew that the bill would receive its first reading the day it came over, that under ordinary circumstances it would receive its second reading today, and go on the calendar for Wednesday. So some 48 hours' notice was given as to what was going to be done. It certainly strikes the junior Senator from Alabama as passing strange that the distinguished Senator from New York would say that there is an element of surprise in connection with this legislation.

Now, the Senator pointed out that with respect to the pending bill, on which time is limited, no amendments not germane can be offered; and if a motion is made to bring this measure up for consideration by the Senate, that would be debatable, as the distinguished Senator from New York knows, and the bill itself would be debatable, so there is no element of surprise. The junior Senator from Alabama is at a loss to understand what the distinguished Senator from New York means by saying he does not want to be taken by surprise and that there is an element of surprise in connection with this legislation.

Mr. MANSFIELD. May I say that it was my assumption that what the distinguished Senator from New York was referring to was not in the past tense but in the future tense and that he was trying to protect his rights in that respect. There has been no element of surprise up to this time nor do I anticipate any element of surprise.

Mr. ALLEN. How could there be surprise? The distinguished Senator from New York knows it is going on the calendar. What surprise could there be?

Mr. MANSFIELD. I assume the Senator referred to taking up the bill or offering it as a substitute to another bill.

Mr. ALLEN. All I am trying to do is to get this bill before us so that it will not be necessary to offer amendments, so that the sole issue is whether or not busing by Federal court decree of schoolchildren should be permitted. He is not asking that it be referred through some collateral means. He wants a vote on this bill, which is basically the President's proposal to Congress.

Mr. MANSFIELD. Madam President, I ask for 3 additional minutes.

The PRESIDING OFFICER. Without objection, the Senator from Montana is recognized.

Mr. MANSFIELD. That was what I assumed the distinguished Senator meant.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. JAVITS. The Senator understands me perfectly and I hope the Senator from Alabama will also. I have no complaint about what occurred. As a matter of fact, everybody has been very accommodating. I was not here at the first reading; I could not be; and yet the leadership was perfectly ready and did protect our rights to see that the second reading was not then carried on by unanimous consent. Nor have I any complaint about the Senator from Alabama nor am I trying to get any commitment from him. He has acted within his rights and he has acted under the rules. The Senator from Alabama knows the rules extraordinarily well for a new Member and he has every right to avail himself of them.

I was directing attention to the problem of the leadership in dealing with so extensive an issue, which could be put on a bill, on which there could be nongermane amendments. I have consulted with the Parliamentarian.

I wish to give notice now that I shall object to any unanimous-consent request which allows nongermane amendments from now until the end of the session. We consider a lot of business here in an hour, in a day, and in a week that might be convenient to the mover and very inconvenient to the overwhelming number of Senators. If Senators wish to speak on matters they have to be here and if they are not here the amendment would be acted on in the absence of speakers, if such an amendment were brought up. The Senator from Alabama, and he is very diligent in his attendance, cannot be here every minute the Senate is in session.

As I have pointed out, the matter will go on the Calendar tomorrow, but it will give us a chance to meet with other Members, to meet with the leadership, to see what we can do in an honorable way to work out the matter to avoid disadvantage to the opponents, but without exacting a promise from the proponents, like the Senator from Alabama, which we could not get.

That was my sole purpose. I state it very clearly. I have learned through a long career here that if matters are laid on the table, justice is generally done, and I have every confidence it will be done in this case.

Mr. MANSFIELD. Madam President, I ask unanimous consent that the time for the conduct of morning business, with a 3-minute limitation on statements therein, be extended until the hour of 11:45 a.m.

The PRESIDING OFFICER. Is there objection?

Mr. JAVITS. Madam President, do I understand also that includes the unanimous-consent request that second reading on the bill we are talking about shall be deferred until tomorrow?

Mr. MANSFIELD. If that meets with the approval of the Senator from Alabama. It will go on the calendar, anyway.

Mr. ALLEN. Yes; if part of the unanimous-consent agreement is that the bill will go to the calendar on Wednesday, the 6th of September.

Mr. JAVITS. In view of the fact that the Chair has already ruled that way, I would simply ask that the unanimous-consent request be that second reading be held. I assure the Senator that will be it. I will not take an appeal.

Mr. ALLEN. But the agreement should also be that the bill will go to the calendar, because, obviously, if objection is not made to further consideration, it will then go to committee.

Mr. JAVITS. The Senator will object to further consideration of the bill, I am sure. I hope he will not cause me the pain of that unanimous-consent request. He should simply leave the matter of second reading to tomorrow. The Chair has already ruled.

Mr. ALLEN. Irrespective of the condition of morning business, it will receive such second reading tomorrow. Then it would be up to the Senator from Alabama to object to further consideration, and it would be on the calendar.

Mr. JAVITS. Would the Chair rule on that? Can the unanimous-consent agreement be stated for the RECORD?

The PRESIDING OFFICER. Without objection, the second reading will be deferred until tomorrow.

Mr. ALLEN. At which time it will take place.

The PRESIDING OFFICER. Without objection, that is so ordered.

Is there objection to the request of the majority leader for the 15 minutes?

Mr. ALLEN. As amended by the request of the Senator from Alabama?

The PRESIDING OFFICER. Yes. Without objection it is so ordered.

Mr. BAKER. Madam President, reserving the right to object—and I shall not object——

Mr. MANSFIELD. All I am trying to do is get the Senate back to the normal calendar.

Mr. BAKER. I want to make one comment on this colloquy, before we go into morning business, about reserving the right to object on the question of the germaneness of amendments. The Senator from Tennessee has great interest in the remark made by the senior Senator from New York, putting the Senate on notice that for the rest of the session he would object to any such unanimous-consent requests for such a provision. I thought I had already made such a request. I hereby notify the Senate and the leadership that in the future I shall continue to make such requests.

Mr. MANSFIELD. Madam President, will the Senator yield?

Mr. BAKER. I yield.

Mr. MANSFIELD. The Senator is correct. Before we reached the stage of considering the unanimous-consent agreement, we had that request cleared with the Senator from Tennessee.

Mr. BAKER. I think this is bad precedent. I think it is bad business. As one Senator, I intend to offer an objection to any future request for unanimous-consent agreements relating to germaneness.

The PRESIDING OFFICER. Without objection, the time requested by the majority leader is granted.

Mr. ROBERT C. BYRD. Madam President, may I ask the Senator from Tennessee and the Senator from New York if I correctly understand what they have just said? I thought I understood the distinguished Senator from Tennessee to say that he will object to any unanimous-consent agreement which would prohibit any nongermane amendments from being offered. I thought, on the other hand, the distinguished Senator from New York indicated he would object to any unanimous-consent agreement that allowed nongermane amendments to be offered.

Mr. BAKER. Madam President, if I can answer on my own behalf, the statement I made previously had been, and it is today, that I will object to any unanimous-consent request that attempts to place a restriction on the offering of nongermane amendments to any matter pending before the Senate.

Mr. ROBERT C. BYRD. I understood the Senator correctly. I wonder if I understood the Senator from New York correctly. If so, we will not be able to get any more unanimous-consent agreements.

Mr. JAVITS. Madam President, the Senator did understand me. Obviously, we have different reasons for our objections. The leadership has already stated—and there are five bills listed for our consideration at this time—that we have an arrangement that contravenes the objection of the Senator from Tennessee (Mr. BAKER). Obviously he has been consulted and it is satisfactory. Of course, the leadership will consult with me also.

Mr. BAKER. May I state that I was not here. I was at Miami Beach, attending the Republican Convention. The Senator from Tennessee was not consulted. I assume the leadership consulted with some member of my staff. However, I take full responsibility for not being here, but, for the record, I did not agree to the provision of this order.

Mr. ROBERT C. BYRD. Madam President, may I say that the leadership on this side of the aisle always consults with the leadership on the Senator's side of the aisle, and in many instances the leadership on the other side of the aisle specifically states that contact has been made with the able Senator from Tennessee or people on his staff. In this instance, I do not recall whether that was done, but, in any event, the leadership on this side of the aisle is aware of the feelings that have been expressed by the distinguished Senator from Tennessee, and, as often as we can, we try to conform to the Senator's requests when we present the unanimous-consent agreements.

As of this moment, no more unanimous-consent agreements can be effectuated unless we find some middle ground, and I am sure the majority leader and I will consult both Senators before we attempt to present any unanimous-consent agreements, but both Senators have the leadership's hands tied, because we cannot devise an agreement that will meet the requirements, as stated, of both Senators.

Mr. BAKER. Madam President, may I offer the comment, in all respect, that I think the Senate can function with the rules as they exist and the precedents as they exist without any unanimous-consent agreements. If the effect is to do that, then that is the effect, but as far as I am concerned, I believe unanimous-consent agreements barring nongermane amendments are bad precedent and bad business for the Senate. While I understand it is a matter of expediting procedure on the part of the leadership, I hope the Senate will accept my notice that I intend to object to every unanimous-consent request to that effect.

Mr. ROBERT C. BYRD. May I say that unanimous-consent agreements barring nongermane amendments are not bad precedent. This type of agreement—I suppose—was entered into many, many times before the Senator from West Virginia became a Senator 14 years ago. It is not bad precedent. It has been going on for a long time. When the majority leader asks unanimous consent for a time limitation on a bill and that the unanimous-consent agreement be printed "in its usual form"——

The PRESIDING OFFICER. The 3 minutes of the Senator have expired.

Mr. ROBERT C. BYRD. Will the Senator from Montana yield me 3 minutes?

Mr. MANSFIELD. Yes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. The words of art "usual form" carry with them automatically the provision that no nongermane amendments can be offered, which would indicate that this had been going on a long time. It is not therefore, a matter of setting new precedent.

However, Madam President, I certainly will do everything I can to cooperate with the Senator, and, may I add, the able Senator from Tennessee, Mr. BAKER, is always most cooperative.

Mr. BAKER. Madam President, one final word. The term "precedent" is meant to mean the effect it would have on the future business of the Senate, as far as I am concerned, not the word as it may be compiled by the Parliamentarian. To make it absolutely clear, I intend to object to any requests for the usual form of request if that includes nongermane amendments.

Mr. ROBERT C. BYRD. The usual form always includes nongermane amendments.

I certainly, or the majority leader, will continue to see that the Senator is consulted before agreements are entered into. The Senator is right in saying that the Senate can function without these unanimous-consent agreements, but it will still be functioning on December 31 of this year, I fear, unless we can get unanimous-consent agreements.

I would hasten to assert that we are very much farther along by virtue of the unanimous-consent agreements that have been entered into heretofore than we would have been otherwise.

Mr. BAKER. Madam President, can the Senator from West Virginia assure the Senator from Tennessee that he will be consulting with him before any unanimous-consent requests regarding nongermane amendments are made, for the remainder of this term?

Mr. ROBERT C. BYRD. I personally would not undertake to give the Senator that assurance. I think that is the prerogative of the leadership on the other side. I will only assure the Senator that I will satisfy myself, before making such requests, of his having been contacted by someone—by me or by someone.

Mr. GRIFFIN. Madam President, will the Senator from West Virginia yield to me?

Mr. ROBERT C. BYRD. I yield.

Mr. GRIFFIN. I thank the assistant majority leader.

The PRESIDING OFFICER. On whose time?

Mr. GRIFFIN. Madam President, may I be recognized for 2 minutes?

The PRESIDING OFFICER. The Senator from Michigan is recognized.

Mr. GRIFFIN. I want to indicate support from the leadership on this side for the position expressed by the assistant majority leader. If we are going to complete the business of the Senate, I agree that it will be necessary to have the cooperation of our colleagues in the future as we have had in the past; that it will be essential to obtain unanimous-consent agreements to the extent possible.

I wish to assure the Senator from Tennessee as well as the Senator from New York that the leadership on this side will be constantly aware of their interest and expressions with regard to unanimous-consent agreements. At the same time, I hope they will not be adamant in opposing all requests for consent agreements because otherwise as has been indicated it should prove to be impossible to obtain any consent agreements.

Mr. JAVITS. Madam President, will the Senator yield?

Mr. GRIFFIN. I yield.

Mr. JAVITS. I did not make any such flat statement. On the contrary, the reason for the 24-hour delay that the Senator from Alabama (Mr. ALLEN) graciously agreed to was to get our ducks in a row.

I do not feel that way. I have given notice that I want to know about it, but that does not mean that I will not consent. I am not committing myself any more than I am asking the Senate to commit itself.

Mr. GRIFFIN. I appreciate that very much.

Mr. JAVITS. I pointed out, for example, to the Senator from Tennessee that we had five measures here today to which the restriction was applied. I assumed he knew about it. He was gracious enough to say that perhaps his staff did.

I would hope that neither the Senator from Tennessee nor I would lower the curtain on the Senate; but he will have to speak for himself. I just want to know about it, and I hope the leadership will accommodate me as it always has, so that we may exercise our prerogatives.

Mr. GRIFFIN. Madam President, I wish to make it clear that I have no objection to the procedure that has been agreed to here today. As the distinguished Senator from New York and the distinguished Senator from Alabama know, I have great interest in this particular measure myself. I agree with the Senator from New York that there should be no surprise when this measure is taken up. Even though I am on the other side of the issue, I believe we are in accord with respect to the need for, and the importance of, reasonable notice to all Senators.

On the other hand, my great concern is whether the bill will be taken up and considered in this session before we adjourn, and I would hope that if we cooperate with the Senator from New York in making sure that there will be no surprise, perhaps we might have some cooperation in return to insure that this important measure will actually be considered so there will be an opportunity to vote on it—so it will not just rest and die on the calendar of the Senate.

Mr. BAKER. Madam President, will the Senator yield briefly?

The PRESIDING OFFICER (Mrs. EDWARDS). All time for the transaction of routine morning business has expired.

Mr. ROBERT C. BYRD. Madam President, I ask unanimous consent that the time for the consideration of routine morning business, with statements therein limited to 3 minutes, be extended for an additional 12 minutes.

The PRESIDING OFFICER. Is there objection to the request of the Senator from West Virginia? The Chair hears none, and it is so ordered.

Mr. BAKER. Madam President, just this brief additional word: I do not want to unduly prolong a procedural matter, but it has great substance, in addition to the precedents it may set for the future.

I am not trying to tie the hands of the Senate. I am not trying to deprive the Senate of the right to proceed on the basis of unanimous consent. I am simply saying that, as I thought I had in the past, I do now serve notice on the Senate that I do not like unanimous-consent agreements that preclude the consideration of nongermane amendments, and that any unanimous-consent agreement which includes that provision will be objected to by the Senator from Tennessee unless we make arrangements to the contrary beforehand.

Mr. ALLEN. Madam President, I commend the distinguished Senator from Michigan for putting his finger on the crux of this issue with respect to bringing before the Senate H.R. 13915, the antibusing legislation.

Yes, there is an obligation not to surprise the opposition. I assume, though, they know the matter is going to be sought to be brought up sometime between now and the 1st of October. But nothing has been said by the opponents of the legislation as to when they would be willing to see the measure come before the Senate and to have a vote thereon. There are two sides of the coin, but obviously the opponents of the legislation want to see only one side of the coin.

With respect to the unanimous-consent agreement, much has been said about objecting to unanimous-consent agreements where nongermane amendments are involved. I want to make this request of the majority leadership: That before such time as a request is made for the setting of an order in which bills will be considered by the Senate, the junior Senator from Alabama will be consulted, in order to make sure that the leadership will, at some stage of the proceedings, include in that priority list the antibusing legislation. I feel inclined, unless I am consulted with respect to the order in which bills will be considered by unanimous consent, to interpose an objection to any further setting of a laundry list of bills to be considered in a certain order.

I have no intention of seeking to surprise the able and distinguished Senator from New York with respect to bringing this bill up. As I pointed out, a mere motion to bring it up is debatable, and I assume there will be at least one Member of the Senate on the floor at all times who would be opposed to bringing it up. It is debatable. Then the matter is debatable if the Senate votes to bring it up. So there can be two series of debates there.

So there seems to be no likelihood that anyone will be taken by surprise. But at some stage of this session of this Congress, if the leadership does not set this bill down for consideration before the Senate, the junior Senator from Alabama and others of like mind do plan to make a motion to bring up the bill. That can only be made, to be effective——

The PRESIDING OFFICER. The Senator's 3 minutes have expired.

Mr. ROBERT C. BYRD. Madam President, I yield the Senator my 3 minutes.

Mr. ALLEN. I thank the Senator from West Virginia.

To be effective, it could only be made at the time the unfinished business is disposed of. Otherwise, if the unfinished business is just set aside temporarily, the regular order could be called for, and we would go back to the unfinished business. But once the unfinished business is disposed of, if the leadership has not indicated that it is going to put this bill on the order for consideration during this session of Congress, the junior Senator from Alabama serves notice right now that when the unfinished business is disposed of, he is going to make a motion to bring up for consideration the antibusing legislation.

So that is notice at this time that unless an agreement has been made to bring up H.R. 13915 for consideration by the Senate when the present unfinished business is disposed of, he is going to make a motion that the Senate proceed to the consideration of the antibusing legislation.

Mr. HARRY F. BYRD, JR. Madam President will the Senator yield?

Mr. ALLEN. I yield.

Mr. HARRY F. BYRD, JR. Madam President, the Senator from Virginia associates himself with the comment just made by the distinguished Senator from Alabama. It is a vitally important piece of legislation. The Senate should have an opportunity to vote on it, and I will join the Senator from Alabama in working to see that the Senate does have an opportunity to express its will one way or the other.

Mr. ALLEN. I thank the distinguished Senator from Virginia.

Mr. JAVITS. Madam President, will the Senator yield me 1 minute?

Mr. PERCY. I yield.

Mr. JAVITS. Madam President, on this very issue it has been made clear that the rights are reserved, including the right to move when the unfinished business is over. I think the Senator from Alabama even said "this unfinished business"—to wit, today's unfinished business.

I simply wish, in return, to serve notice that the very purpose of my colloquy with the leadership was to deal with precisely those situations. We might get into a situation in which the floor has to be monitored every minute in order to avoid what I have defined as surprise—to wit, the bringing up of this matter upon the will of any Member at a time when there may be no possibility even to debate it because Senators simply are not here or do not know about it, and business can finish here in a very summary way, on the consent or other calendar.

So I reiterate my hope that we will not legislate by stratagem without in any way trying to deprive any Senator of his rights, but depending on the leadership to see that a full and orderly debate is possible in respect of so important a measure.

For myself, I do not consider that anybody should exact any promises from me, any more than I am exacting promises from anybody else. It is a leadership problem, not a problem for any Member, and I reserve every right I have.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. ALLEN. Madam President, I ask recognition, in order that I may yield to the Senator.

The PRESIDING OFFICER. The Senator from Alabama is recognized.

Mr. JAVITS. I reserve every right I have, as does every other Member who is of the same mind as I respecting this measure; and I hope that the leadership, having heard this situation and having seen it, will take proper account of exactly what has transpired.

Mr. ALLEN. The Senator realizes that the unfinished business is Senate Joint Resolution 241, the interim agreement, and in no likelihood, in my judgment, is this matter going to be disposed of today. So the distinguished Senator from New York has ample notice of the intention of the junior Senator from Alabama.

Mr. JAVITS. But one never knows about any of these things. I am not trying to exact any promise from the Senator from Alabama. He should not and could not do it, and I should not and could not do it. We are simply putting it up to the leadership.

Mr. ALLEN. I will try to give the distinguished Senator from New York personal notification of my intention.

THE ATTACK BY ARAB GUERRILLAS AT OLYMPIC VILLAGE

Mr. PERCY. Madam President, this morning the world has learned of the outrage committed by Arab guerrillas at the Olympic Village in Munich. As a result of this outrage, the officials of the Olympic games have delayed those games for 24 hours. The guerrillas have killed two members of the Israeli Olympic contingent and threaten to kill additional Israeli hostages at the rate of one every 2 hours if their demands are not met.

These acts are an outrage against humanity, another in a series of crimes committed by Arab guerrillas against airports, airplanes, and public meeting places. The Arab guerrillas damaged their cause before world opinion. They will find that no outrage, no violence, no desperate actions will advance their goal.

It is time now for the leaders of the Arab world, who for so long have encouraged and inflamed the guerrillas, to call a halt to these senseless acts. How refreshing it would be to hear President Anwar as-Sadat of Egypt speak out against terrorism, stating that such actions ill serve the Arab cause.

I pray that the crisis at Olympic Village will be resolved without further loss of life, and I urge that responsible Arab leadership now assert itself against these senseless acts of terrorism. Should they not yield to reason, I see no reason why we should not then group this type of terrorism along with aircraft hijacking and bombing of aircraft, and seek world reprisals against such actions that offer safe haven for terrorists of this kind.

The first step that should be taken is simply to refuse to land international aircraft at any capitals or any nations that provide a safe haven. These bandits and guerrillas must learn that there is no place on earth they can now go, after committing such acts, and find safe haven, and that they must pay the penalty for their terrorist actions.

Mr. JAVITS. Madam President, will the Senator yield?

Mr. PERCY. I yield.

Mr. JAVITS. Madam President, the words uttered by the distinguished Senator from Illinois are most eloquent and most deserved, and I associate myself with them. The expressions on the floor by the leadership, majority and minority, and other Senators, joined in so eloquently by the Senaotr from Illinois, are very heartening.

The world can put a stop to this, as the Senator has said. I know that he will lend his efforts to this end, as the leadership and other Senators and I will lend ours. Let us hope and pray that this horrible carnage may be ended.

Mr. PERCY. I thank the distinguished Senator.

COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The PRESIDENT pro tempore laid before the Senate the following letters which were referred as indicated:

Report of Departments of Agriculture and Housing and Urban Development

A letter from the Secretaries of Agriculture and Housing and Urban Development, transmitting, pursuant to law, a report of those Departments on assistance furnished for nonmetropolitan planning districts in fiscal year 1972 (with an accompanying report); to the Committee on Agriculture and Forestry.

Reports on Overobligations of Appropriations

A letter from the Deputy Secretary of Defense, transmitting, pursuant to law, two reports of overobligations of appropriations (with accompanying papers); to the Committee on Appropriations.

Reports on Final Determinations Relating to Indian Claim Cases

A letter from the Chairman, Indian Claims Commission, reporting, pursuant to law, on its final determination in respect to Docket No. 275, The Creek Nation, Plaintiff, v. the United States of America, Defendant (with accompanying papers); to the Committee on Appropriations.

A letter from the Chairman, Indian Claims Commission, reporting, pursuant to law, on its final determination in respect to Docket No. 342–E, The Seneca Nation of Indians, Plaintiffs, v. United States of America, Defendant (with accompanying papers); to the Committee on Appropriations.

Proposed Transfer of Motor Boat

A letter from the Assistant Secretary of the Navy (Installations and Logistics), reporting, pursuant to law, on the proposed transfer of the Officers Motor Boat, Hull No. C–12928 to the Admiral Nimitz Center, Fredericksburg, Tex.; to the Committee on Armed Services.

Report on Laos Assistance-Related Funds

A letter from the Assistant Secretary for Congressional Relations, transmitting, pursuant to law, reports showing the Laos assistance-related funds expended during the fourth quarter of the fiscal year beginning July 1, 1971 (with accompanying reports); to the Committee on Armed Services.

Report on Export Control

A letter from the Secretary of Commerce, transmitting, pursuant to law, a report on Export Control, for the second quarter of 1972 (with an accompanying report); to the Committee on Banking, Housing and Urban Affairs.

Proposed Legislation Relating to Certain Vessels

A letter from the Secretary of Transportation, transmitting a draft of proposed legislation to deduct from gross tonnage in determining net tonnage those spaces on board vessels used for waste materials (with an accompanying paper); to the Committee on Commerce.

Proposed Amendment of Communications Act of 1934

A letter from the Chairman, Federal Communications Commission, transmitting a draft of proposed legislation to amend the Communications Act of 1934, as amended, with respect to penalties and forfeitures (with accompanying papers); to the Committee on Commerce.

Reports of National Railroad Passenger Corporation

A letter from the Vice President, Public Affairs, National Railroad Corporation (Amtrak), transmitting, pursuant to law, a report of that corporation for the months of March and April 1972 (with an accompanying report); to the Committee on Commerce.

A letter from the Vice President, Public Affairs, National Railroad Corporation (Amtrak), transmitting, pursuant to law, a report of that corporation for the month of May 1972 (with an accompanying report); to the Committee on Commerce.

Report on the Great Lakes and St. Lawrence Seaway Study of Insurance Rates

A letter from the Secretary of Commerce, transmitting, pursuant to law, a report on the Great Lakes and St. Lawrence Seaway Study of Insurance Rates, dated June, 1972 (with an accompanying report); to the Committee on Commerce.

Report of U.S. Travel Services

A letter from the Secretary of Commerce, transmitting, pursuant to law, a report on the activities of the United States Travel Service, for calendar year 1971 (with an accompanying report); to the Committee on Commerce.

Proposed Legislation Relating to U.S. Merchant Marine Academy

A letter from the Secretary of Commerce, transmitting a draft of proposed legislation to authorize the Secretary of Commerce to permit not more than thirty persons at a time from foreign countries to receive instructions at the United States Merchant Marine Academy (with accompanying papers); to the Committee on Commerce.

Report on Work Incentive Program

A letter from the Secretary of Labor, transmitting, pursuant to law, a report on the Work Incentive Program (WIN), dated June 1972 (with an accompanying report); to the Committee on Finance.

Report on Cambodian Assistance-Related Funds

A letter from the Assistant Secretary for Congressional Relations, Department of State, transmitting, pursuant to law, reports showing the Cambodian assistance-related funds obligated during the fourth quarter of the fiscal year beginning July 1, 1971, and for the entire fiscal year (with accompanying reports); to the Committee on Foreign Relations.

Report of U.S. Information Agency

A letter from the Deputy Director, U.S. Information Agency, transmitting pursuant, to law, a report of that Agency, for the fiscal year 1972 (with an accompanying report); to the Committee on Government Operations.

Reports of Comptroller General

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a confidential report on U.S. System for Appraising and Evaluating Inter-American Development Bank Projects and Activities (with an accompanying report); to the Committee on Government Operations.

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Further Improvements Needed in Controls Over Government-owned Plant Equipment in Custody of Contractors", Department of Defense, dated August 29, 1972 (with an accompanying report); to the Committee on Government Operations.

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Impartial Cost-Effectiveness Studies Found Essential To Selecting New Weapons", Department of Defense, dated August 21, 1972 (with an accompanying report); to the Committee on Government Operations.

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Economies Available Through Increased Use of the Federal Telecommunications System by Military Installations", Department of Defense, General Services Administration, dated August 24, 1972 (with an accompanying report); to the Committee on Government Operations.

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Problems of the Atomic Energy Commission Associated With the Regulation of Users of Radioactive Materials for Industrial, Commercial, Medical, and Related Purposes", dated August 18, 1972 (with an accompanying report); to the Committee on Government Operations.

Report on the Budgetary and Fiscal Data Processing System and Budget Standard Classifications

A letter from the Secretary of the Treasury, and Director, Office of Management and Budget, transmitting, pursuant to law, a report on the budgetary and fiscal data processing system and budget standard classifications (with an accompanying report); to the Committee on Government Operations.

A letter from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Achievements, Administrative Problems, and Costs in Paying Black Lung Benefits to Coal Miners and Their Widows," Social Security Administration, Department of Health, Education, and Welfare, dated September 5, 1972 (with an accompanying report); to the Committee on Government Operations.

Report on Prototype Desalting Plants

A letter from the Secretary of the Interior, transmitting, pursuant to law, a report on prototype desalting plants (with an accompanying report); to the Committee on Interior and Insular Affairs.

Proposed Concession Contract in Lake Mead National Recreation Area, Nev.

A letter from the Secretary of the Interior, transmitting, pursuant to law, a proposed concession contract in Lake Mead National Recreation Area, Nev. (with accompanying papers); to the Committee on Interior and Insular Affairs.

Report on Receipt of Project Proposals

A letter from the Assistant Secretary of the Interior, reporting, pursuant to law, on the receipt of project proposals under the Small Reclamation Projects Act of 1956; to the Committee on Interior and Insular Affairs.

Report of Persons Employed by the Equal Employment Opportunity Commission

A letter from the Chairman, Equal Employment Opportunity Commission, transmitting, pursuant to law, a report of persons employed by that Commission, for the fiscal year 1972 (with an accompanying report); to the Committee on the Judiciary.

Report on Defector Aliens

A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, copies of orders entered relating to certain aliens (with accompanying papers); to the Committee on the Judiciary.

Suspension of Deportation of Certain Aliens

Two letters from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, copies of orders relating to the suspension of deportation of certain aliens (with accompanying papers); to the Committee on the Judiciary.

Temporary Admission of Certain Aliens

A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, copies of orders relating to temporary admission of certain aliens (with accompanying papers); to the Committee on the Judiciary.

Reports Relating to Third Preference and Sixth Preference for Certain Aliens

A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, reports relating to third preference and sixth preference for certain aliens (with accompanying papers); to the Committee on the Judiciary.

Report of Commission on Railroad Retirement

A letter from the Chairman, Commission on Railroad Retirement, transmitting, pursuant to law, a report of that Commission (with an accompanying report); to the Committee on Labor and Public Welfare.

Proposed Amendment of Public Buildings Act of 1959

A letter from the Acting Administrator, General Services Administration, transmitting a draft of proposed legislation to amend the Public Buildings Act of 1959, as amended, and for other purposes (with an accompanying paper); to the Committee on Public Works.

Report on Projects To Be Financed and Constructed by the Postal Service

A letter from the Acting Administrator, General Services Administration, reporting, pursuant to law, on projects to be financed and constructed by the Postal Service; to the Committee on Public Works.

PETITIONS

Petitions were laid before the Senate and referred as indicated:

By the PRESIDENT pro tempore:

A joint resolution of the Legislature of the State of California; to the Committee on Interior and Insular Affairs:

"Assembly Joint Resolution No. 6

"Relative to oil drilling

"Whereas, Well blowouts in federal waters off the California coast have caused damage to the coastline and hardship to the people of this state; and

"Whereas, No adequate oil cleanup system capable of operating in rough seas has been developed as yet, much less deployed; and

"Whereas, Although to date no oil has been produced in water depths greater than 380 feet, future oil production in the Santa Barbara Channel is contemplated at water depths of 700 to 1,500 feet, in spite of the fact that the Santa Barbara region is still suffering from the effects of the disastrous 1969 oil spill in federal waters; and

"Whereas, The residents of California coastal areas have the right to the full protection of their property from oil spill damage and the Santa Barbara Channel spill and numerous other environmentally detrimental offshore oil spill accidents off the Gulf Coast in lesser water depths indicate inadequate protection; now, therefore, be it

"Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the President of the United States and the Department of the Interior to:

"1. Forestall any future oil production in any federal waters until absolute safeguards for production and cleanup to protect the coast have been developed, and full and open hearings have been conducted to satisfy and answer the questions of all concerned citizens of the coastal areas; and

"2. Deny the granting of permits for oil drilling in waters off the coast of California until an underwater fail-safe system of extraction has been demonstrated and an adequate oil cleanup system has been developed and deployed; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Secretary of the Interior, and to the Administrator of the Environmental Protection Agency."

A joint resolution of the Legislature of the State of California; to the Committee on Public Works:

"Assembley Joint Resolution No. 35

'Relative to the Santa Ynez River Flood Protection Project—San Miguelito Watershed

"Whereas. In 1951 and 1952 the United States Soil Conservation Service, in cooperation with the Lompoc Soil Conservation District, constructed the Santa Ynez River Flood Protection Project—San Miguelito Watershed, consisting of a debris basin and earthen channel to carry floodwaters directly across a flood plain to the Santa Ynez River; and

"Whereas, At the time of the original construction the purpose of the project, hereinafter referred to as the Miguelito Project, was to protect 3,000 acres of farmland west of the City of Lompoc, and the project was therefore designed for a capacity of 1,575 c.f.s., which was considered the yield of a 25-year storm for the drainage area; and

"Whereas, Since the construction of the original project in 1951 and 1952, conditions have substantially changed in that (1) the population of the City of Lompoc has increased from 7,500 to 26,000 due primarily to the expansion of Vandenberg Air Force Base, (2) provisions have now been made for the diversion of surface storm waters from the city into the existing Miguelito Channel Project, (3) further expansion of the city is probable due to expected new programs at Vandenberg Air Force Base, and (4) because of recent developments in the state of the science and art of hydrology it has recently been determined that the original estimate of the watershed runoff was underestimated; and

"Whereas, Recent studies now indicate a need for expansion of the existing Miguelito Project so that it will have an increased capacity to a total of 7,700 c.f.s. which is the estimated capacity to safely divert the runoff of a 100-year-frequency storm; and

"Whereas, The presently existing lack of capacity of the Miguelito Project endangers the existing federal and local investment in the present project which could be destroyed by a storm in excess of its capacity; and

"Whereas, The Santa Barbara County Board of Supervisors has advanced $30,000 for the preparation of necessary new bridge designs, which are now completed, and the Santa Barbara County Flood Control and Water Conservation District has funds available and will provide safety fencing for the entire project and will accept the responsibility for maintenance of the project upon completion; and

"Whereas, The City of Lompoc will provide funds for bridge betterments not covered by the Department of Water Resources allocation; and

"Whereas, Due to the foregoing there is an urgent need to immediately construct the necessary improvements for the expansion of the Miguelito Project; now, therefore, be it

"Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the United States Soil Conservation Service to provide funds for the construction of necessary improvements to increase the level of protection of the Santa Ynez River Flood Protection Project—San Miguelito Watershed; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Administrator of the United States Soil Conservation Service, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

A joint resolution of the Legislature of the State of Maryland; to the Committee on the Judiciary:

"Resolution 34

"Joint Resolution ratifying a proposed amendment to the Constitution of the United States relative to equal rights for men and women

"Whereas, The 92nd Congress of the United States has passed a Joint Resolution proposing an amendment to the Constitution of the United States relative to equal rights for men and women.

"Whereas, This Joint Resolution passed the House of Representatives of the United States on October 12, 1971, passed the Senate of the United States on March 22, 1972, and now has been submitted to a vote of the states; and

"Whereas, The State of Maryland wishes to ratify this proposed amendment to the Constitution of the United States which, when ratified by the Legislatures of three-fourths of the several states, shall be valid to all intents and purposes as part of the Constitution of the United States, viz:

" 'Article

" 'Section 1. Equality of rights under the law shall not be denied or abridged by the United States or by any State on account of sex.

" 'Sec. 2. The Congress shall have the power to enforce, by appropriate legislation, the provisions of this article.

" 'Sec. 3. This amendment shall take effect two years after the date of ratification.'

"Resolved by the General Assembly of Maryland, That the foregoing proposed amendment to the Constitution of the United States is ratified by the State of Maryland to all intents and purposes as a part of the Constitution of the United States; and be it further

"Resolved, That the Governor of the State of Maryland is requested to forward authentic copies of this Resolution, under the Great Seal of the State of Maryland, to the Secretary of State of the United States, to the presiding officer of the Senate of the United States, to the Speaker of the House of Representatives of the United States, and to the Administrator of General Services of the United States."

The petition of Ronald S. Burgess, of Newton, N.C., praying for a redress of grievances; to the Committee on Armed Services.

A resolution adopted by the National Association of Attorneys General, praying for the enactment of legislation relating to offshore revenue sharing by the Federal Government with coastal States and all other States; to the Committee on Finance.

A resolution adopted by the City Council of Los Angeles, Calif., praying for the enactment of House bill 16058; to the Committee on the Judiciary.

A resolution adopted by the board of directors of Credit Union National Association, Inc., Madison, Wis., expressing appreciation to the President and Congress for their action to provide assistance to Federal credit unions; ordered to lie on the table.

ENROLLED BILLS AND JOINT RESOLUTION PRESENTED

The Secretary of the Senate reported that, on August 18, 1972, he presented to the President of the United States the following enrolled bills and joint resolution:

S. 2166. An act to authorize the establishment of the Grant-Kohrs National Historic Site in the State of Montana, and for other purposes;

S. 3159. An act to authorize the Secretary of the Interior to establish the John D. Rockefeller, Junior, Memorial Parkway, and for other purposes;

S. 3726. An act to extend and amend the Export Administration Act of 1969 to afford more equal export opportunity, to establish a Council on International Economic Policy, and for other purposes; and

S.J. Res. 260. Joint resolution to suspend until March 1, 1973, the effectiveness of certain amendments made by the Education Amendments of 1972 to the Guaranteed Student Loan Program.

ENROLLED JOINT RESOLUTIONS PRESENTED

The Secretary of the Senate reported that, on August 19, 1972 he presented to the President of the United States the following enrolled joint resolutions:

S.J. Res. 182. Joint resolution authorizing the President to invite the States of the Union and foreign nations to participate in Farmfest-U.S.A., and the World Ploughing Contest in September 1972; and

S.J. Res. 213. Joint resolution to authorize and request the President to issue a proclamation designating October 6, 1972, as "National Coaches Day".

ECONOMIC OPPORTUNITY AMENDMENTS OF 1972—REPORT OF A COMMITTEE (S. REPT. NO. 92–1086)

Mr. NELSON, from the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 12350) to provide for the continuation of programs authorized under the Economic Opportunity Act of 1964, and for other purposes, submitted a report thereon, which was ordered to be printed.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. SCOTT:

S. 3946. A bill to grant a Federal charter to the American Golf Hall of Fame Association. Referred to the Committee on the Judiciary.

By Mr. TALMADGE (by request):

S. 3947. A bill to prevent the unauthorized manufacture and use of the character "Woodsy Owl," and for other purposes. Referred to the Committee on Agriculture and Forestry.

By Mr. HRUSKA:

S. 3948. A bill to establish a National Institute of Corrections for the purpose of providing Federal, State, and local corrections personnel with continuing education and guidance on methods of treatment and rehabilitation of criminal offenders. Referred to the Committee on the Judiciary.

By Mr. BAKER:

S. 3949. A bill for the relief of Mohan Deva Bhattarai. Referred to the Committee on the Judiciary.

By Mr. MATHIAS:

S. 3950. A bill to permit the Capital Yacht Club of the District of Columbia to borrow money without regard to the usury laws of the District of Columbia. Referred to the Committee on the District of Columbia.

By Mr. HUMPHREY:

S. 3951. A bill to establish within the executive branch an independent board to establish guidelines for experiments involving human beings. Referred to the Committee on Government Operations.

By Mr. TOWER:

S. 3952. A bill to provide increased job training opportunities for people with limited English-speaking ability by establishing a coordinated manpower training program, a teacher training program for instructors of bilingual job training, and a capability to increase the development of instructional materials and methods for bilingual job training. Referred to the Committee on Labor and Public Welfare.

By Mr. SPONG (for himself and Mr. Sparkman):

S. 3953. A bill for the relief of Datronics Engineers, Inc. Referred to the Committee on the Judiciary.

By Mr. ROBERT C. BYRD:

S. 3954. A bill to amend the Internal Revenue Code of 1954 to permit the deduction of a portion of State sales taxes on motor vehicles which are imposed at a rate higher than the general sales tax rate. Referred to the Committee on Finance.

By Mr. DOLE:

S.J. Res. 263. A joint resolution to authorize and request the President to issue a proclamation designating a week as "National Welcome Home Our Prisoners Week" upon the release and return to the United States of American prisoners of war in Vietnam. Referred to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. HRUSKA:

S. 3948. A bill to establish a National Institute of Corrections for the purpose of providing Federal, State, and local corrections personnel with continuing education and guidance on methods of treatment and rehabilitation of criminal offenders. Referred to the Committee on the Judiciary.

Mr. HRUSKA. Mr. President, I send to the desk a bill to establish a National Institute of Corrections within the Executive Office of the President. I ask that the bill be appropriately referred. In addition, I ask unanimous consent that the complete text of the bill be printed in the RECORD at the conclusion of my remarks.

Mr. President, improving all aspects of the correctional systems of this Nation from the first moment of confinement through parole or probation should be one of the high priority items for action by all levels of government—local, State, and Federal.

For too long we have been guided by the basic philosophy that the best and most effective way to deal with criminal elements in our society is to lock them behind bars for long periods of time and do little or nothing for them during their imprisonment. We have paid far too little attention to developing and implementing rehabilitative procedures that will pay dividends by returning useful and law-abiding citizens to society.

Unless we change the offender while he is incarcerated, the prospects of his returning to society as a law-abiding and contributing citizen are remote indeed. The endless cycle of arrest, imprisonment, release, and rearrest has plagued this Nation for too long. It must be reversed.

The ability of a man who has committed a crime to stay out of trouble once he is released is directly tied to his ability to get and hold a job. Yet, the success of prisons in training convicts for jobs and their ability to get one in the field of that training has been notoriously low. Coupled with this has been the inability of the entire correctional process to get either the money or the staff to do the kind of work it ought to be doing.

Mr. President, the bill that I introduce today has as its rationale the creation of a body of experts whose duty it will be to promulgate to all persons concerned with corrections in this country the best and latest thinking on the subject of corrections.

This approach would insure that there is a comprehensive, integrated and rational approach to this subject. By covering all aspects of the corrections problem, this bill would eliminate the possibility that proposals directed only to fragmented and limited portions of the corrections field will result in inconsistent, contradictory and overlapping recommendations and techniques.

This bill would create a National Institute of Corrections in the White House charged with four main functions: first, a clearinghouse and information center on corrections; second, an educational center; third, a research center; and fourth, development of correctional standards and goals. These functions are carefully detailed in section 5042 of the bill.

The Institute would be headed by a Commission of 14 experts in the corrections field serving as the board of trustees with responsibility for setting policy and affording direction to the permanent staff. Permanent members of the Commission would be the Administrator of the Law Enforcement Assistance Administration, the Director of the Federal Bureau of Prisons, the Administrator of the Youth Development and Delinquency Prevention Administration, the Director of the National Institute of Mental Health, and the Director of the Federal Judicial Center. Nine additional members would be appointed by the President. The Commission would select its own Chairman from among its members.

The day-to-day operations of the Institute would be in the hands of a Director appointed by the Commission. The Director would have sufficient authority to manage the running of the Institute and all of its operations aspects.

One of the important functions of the Institute would be to conduct seminars and workshops and other educational programs aimed at improving the quality of corrections in this country. Sufficient money would be authorized by the bill to carry out the work of the Institute, including the expenses of those participating in the educational programs.

Mr. President, I believe this is a useful proposal consistent with the work of the National Corrections Conference held last December at the direction of President Nixon. At that time the Attorney General indicated that he was directing that a National Corrections Academy be created. Mr. Mitchell said:

> First, as you know, the need for better training and common performance standards among correctional officials is shared by all governmental levels. In this connection I am today directing the Federal Bureau of Prisons and the LEAA to work with the states and localities in establishing a National Corrections Academy. This would serve as a national center for correctional learning, research, executive seminars, and development of correctional policy recommendations. It would cover the whole range of correctional disciplines, from the new employee to the management level. Besides giving professional training of the highest quality, it would provide a continuing meeting ground for the exchange of advanced ideas on corrections. I believe it will be the most effective single means of upgrading the profession and assuring that correction is more than a euphemism for detention. I hope that the members of this Conference will give us the benefit of their ideas on implementing this Academy in the most effective way.

This bill would codify that directive.

It is my hope that the bill can receive early and favorable consideration by the Senate.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3948

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, that this Act may be cited as the "National Institute of Corrections Act".

SEC. 2. Part IV of title 18, United States Code, is amended by adding at the end thereof of the following new chapter:

"Chapter 404.—NATIONAL INSTITUTE OF CORRECTIONS

"Sec.
"5041. Establishment; purpose.
"5042. Functions.
"5043. Director and staff.
"5044. Powers.
"5045. Commission.
"5046. Location; facilities.
"5047. Educational Programs.
"5048. Admissions.

"§ 5041. ESTABLISHMENT; PURPOSE.

There is hereby established in the Executive Office of the President, an institute to be known as the National Institute of Corrections (hereinafter referred to as "Institute"). It shall be the purpose of the Institute to collect and disseminate useful data regarding the treatment and rehabilitation of criminal offenders; to provide assistance to Federal, State, local, public and private organizations and individuals relating to the treatment and rehabilitation of criminal offenders; and to formulate correctional policy, goals and standards.

"§ 5042. FUNCTIONS.

The institute is authorized—

(a) to serve as a clearinghouse and information center for the collection, preparation and dissemination of all information on crime and corrections, including, but not limited to, programs for prevention of crime and recidivism, training of corrections personnel, and rehabilitation and treatment of criminal offenders;

(b) to assist and serve in a consulting capacity to Federal, State, and local courts, departments, and agencies in the development, maintenance, and coordination of programs, facilities and services for education, diagnosis, prevention, counseling, training, treatment, and rehabilitation with respect to criminal offenders;

(c) to encourage and assist State and local government programs and services, and programs and services of other public and private agencies, institutions, and organizations in their efforts to develop and implement corrections programs;

(d) to devise and conduct in various geographical locations, seminars, workshops, and training programs for law enforcement officers, judges and judicial personnel, probation and parole personnel, correctional personnel, welfare workers, and other persons, including lay and paraprofessional personnel, connected with the treatment and rehabilitation of criminal offenders;

(e) to develop technical training teams to aid in the development of seminars, workshops, and training programs within the several states and with the State and local agencies which work with prisoners, parolees, probationers, and other offenders;

(f) to make grants to or enter into contracts with any public or private agency, institution, or individual to carry out seminars, workshops, and training programs authorized by this Act and to evaluate their effectiveness;

(g) to conduct, encourage, and coordinate all forms of research relating to the causes, sociological aspects, prevention, diagnosis, and treatment of criminal offenders;

(h) to make grants to or enter into contracts with any public or private agency, institution, or individual to carry out research programs authorized by this Act; and to prepare reports on the research programs funded under this Act, including a review of the results of such research, an assessment of the application of such results to existing and to new corrections programs, and detailed recommendations for further research to be conducted under this Act; and

(i) to formulate and disseminate correctional policy, goals, and standard recommendations for Federal, State and local correctional agencies, organizations, institutions, and individuals.

"§ 5043. DIRECTOR AND STAFF.

(a) The Institute shall be under the supervision of an officer to be known as the Director, who shall be appointed by the Commission to serve for a term of four years. The Director shall receive basic pay at the rate provided for level V of the Executive Schedule under section 5316 of title 5, United States Code.

(b) The Director shall have authority to supervise the organization, employees, enrollees, financial affairs, and all other operations of the Institute and may employ such staff, faculty, and administrative personnel as are necessary to the functioning of the Institute. The Director shall have the power to acquire and hold real and personal property for the Institute and may receive gifts, donations, and trusts on behalf of the Institute. The Director shall also have the power to appoint such technical or other advisory councils comprised of consultants to guide and advise the Commission. The Director is authorized to delegate his powers under this Act to such persons as he deems appropriate.

(c) If the Office of Director is left vacant, by resignation or otherwise, the Commission shall appoint a successor who shall serve for the unexpired portion of the term of office.

"§ 5044. POWERS.

The functions, powers, and duties specified in this Act to be carried out by the Institute shall not be transferred elsewhere unless specifically hereafter authorized by the Congress. In addition to the other powers, express and implied, the Institute is authorized—

(a) to request any Federal department or agency to supply such statistics, data, program reports, and other material as the Institute deems necessary to carry out its functions. Each such department or agency is authorized to cooperate with the Institute and shall, to the maximum extent practicable, consult with and furnish information and advice to the Institute;

(b) to arrange with and reimburse the heads of Federal departments and agencies for the use of personnel or facilities or equipment of such departments and agencies;

(c) to confer with and avail itself of the cooperation, services, records, and facilities of State and local government or other public or private agencies, organizations or individuals;

(d) to enter into contracts with public or private agencies, organizations, or individuals, for the performance of any of the functions of the Institute;

(e) to compensate consultants and members of any technical or other advisory councils who are not in the regular full-time employ of the United States, at a rate to be fixed by the Director but not exceeding $100 per diem and while away from home, or regular place of business they may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code, for persons in the Government service employed intermittently; and

(f) to submit to the President for transmittal to the Congress an annual report of the Institute's operations, activities, financial condition, and accomplishment under this Act, which may include such recommendations as the Institute deems appropriate.

"§ 5045. COMMISSION.

(a) The overall policy and operations of the Institute shall be under the supervision of the Commission.

(b) The Commission shall consist of the Administrator of the Law Enforcement Assistance Administration, the Director of the Bureau of Prisons, the Administrator of the Youth Development and Delinquency Prevention Administration, the Director of the National Institute of Mental Health, the Director of the United States Judiciary Center, and nine persons having training and experience in the area of corrections appointed by the President.

(c) Members of the Commission appointed by the President shall serve for terms of four years and shall be eligible for reappointment, except that for the first composition of the Commission, one-third of the members shall be appointed to one-year terms, one-third to two-year terms, and one-third to three-year terms, thereafter each member's term shall be for four years. Any member appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor was appointed, shall be appointed for the remainder of such term. Any member of the Commission designated by reason of his office shall serve without term.

(d) While performing their duties, members of the Commission shall be reimbursed under Government travel regulations for their expenses, and members who are not employed full time by the Federal Government shall receive in addition a per diem of $100 in lieu of subsistence, as authorized by section 5703 of title 5, United States Code, for persons in Government service employed intermittently.

(e) The Commission shall elect, from among its members, a Chairman and Vice Chairman. The Commission shall establish its governing rules of procedure.

"§ 5046. Location; facilities

(a) A suitable location for the Institute shall be selected by the Commission.

(b) Following the selection of a location for the Institute, the Director, with the approval of the Commission, shall:

(1) acquire such property as has been selected pursuant to subsection (a), and

(2) make such arrangements as may be necessary or desirable for the construction, equipping, and organization of the Institute.

"§ 5047. EDUCATIONAL PROGRAMS.

The Commission shall design and supervise such seminars, workshops, and training programs utilizing interdisciplinary approaches (to include law enforcement, judicial, correctional, and welfare as well as probation disciplines) which shall be appropriate to the needs of the Institute's students.

"§ 5048. ADMISSION.

(a) Each candidate for admission to the seminars, workshops, and training programs of the Institute may apply for a tuition grant to the State agency established under title I of the Omnibus Crime Control and Safe Streets Act of 1968 (82 Stat. 198; 42 U.S.C. 3701 et seq.), in the State in which the candidate resides. The Director shall prescribe the form of all applications for admission to the seminars, workshops, and training programs of the Institute and shall make the final decision concerning the admission of all students.

(b) While attending any seminar, workshop, or training program of the Institute and while traveling in connection therewith, including authorized field trips, each student may be allowed travel expenses and a per diem allowance in the same manner as prescribed for persons employed intermittently in the Government service under section 5703(b) of title 5, United States Code.

SEC. 3. The table of contents to "Part IV—CORRECTION OF YOUTHFUL OFFENDERS" of title 18, United States Code, is amended by inserting after

"403. Juvenile delinquency__________ 5031"

the following new chapter reference:

"404. National Institute of Corrections ______________________ 5041".

SEC. 4. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

By Mr. HUMPHREY:

S. 3951. A bill to establish within the executive branch an independent board to establish guidelines for experiments involving human beings. Referred to the Committee on Government Operations.

NATIONAL HUMAN EXPERIMENTATION STANDARDS BOARD ACT

Mr. HUMPHREY. Mr. President, much invaluable research is done by the Federal agencies capable of conducting clinical investigation on human subjects. As a result, countless thousands of lives have been saved. Massive sums of taxpayers' money support such investigations. But despite several attempts to legislate national standards, no such standards exist.

Even as our Nation was shocked by the revelation of a barbaric syphilis study involving black men which had been conducted over a period of 4 decades, human experimentation continued, and continues, with neither controls, review or regulation.

A few days ago, we learned of an experiment conducted in the early 1950's on 840 women. They were given the hormone diethylstilbesterol—DES—and now their daughters, aged 15 to 21, are found to have an alarmingly high rate of malignancies. One girl has died. One of the participants in the experiment, in 1950, was only advised she had been part of an experiment in August 1972.

Laws are needed now. But the Congress must be very careful as to how it proceeds.

Laws which make each agency ultimately responsible for the nature of its own experiments are inadequate. What is needed is not a plethora of guidelines, review panels, commissions, and so forth, but a single body capable of reviewing human experimentation programs, establishing national standards, and having the authority to take quick and decisive action if abuses occur. This body should be independent of the agencies conducting the experiments, and dissociated from the experiments themselves.

For this reason, I propose the establishment of a National Human Experimentation Standards Board.

The National Human Experimentation Standards Board would be a separate agency of the executive branch and would operate unencumbered by the guidelines or policies of any single agency. It would be free of any considerations other than those of a medical, social, and ethical nature. The Board would develop national standards which would apply with equal weight to any human experimentation study where Federal dollars are being spent.

The Congress would indeed be remiss if it established a human experimentation review board or boards selected by, and reporting to, the same official in the Government who might also be responsible for the approval of the study.

The question of independence, therefore, is essential to the establishment of a human experimentation standards board. Of equal importance, however, is that the board, knowledgeable in clinical investigations, be empowered to determine the standards of such investigations. The Congress of the United States should not take such powers onto itself. Indeed, the Congress should facilitate the Board's capability to adapt its standards as new discoveries or clinical advances become established among the medical profession.

WHO VOLUNTEERS FOR MEDICAL EXPERIMENTS?

The Congress would make a serious error in adopting measures which establish informed, voluntary consent as the primary standard governing human experimentation.

We have all personally experienced situations in which we were either subtly or overtly coerced into volunteering for something. Does anyone here honestly believe that there is a total absence of subtle pressures, including psychological pressures, in every case involving prisoners serving extended sentences who volunteer for medical projects in the belief that they might get "good time" before the parole board? Parole boards are under no obligation whatsoever to commit themselves to reducing the sentences of those who volunteer in our prisons; indeed, established policy is the contrary. However, we are all aware of cases such as the Leopold case, where parole has occurred accompanied by public statements indicating that the parole resulted from an exceptional voluntary contribution to the advance of medical science.

I submit that consent is a totally inadequate standard for human experimentation. After all, the tragic case of the Tuskegee volunteers demonstrated beyond any doubt the fact that $50 plus burial expenses served as an inducement to the participants to continue in the study.

Consent is often granted under duress, as in cases where a family member is critically ill, and permission is given to try anything. In general, however, it is not clear that where consent is granted, most people know what they have consented to. In fact, the reverse appears to be true.

The famous medical authority Henry Knowles Beecher of Harvard has recently written a book, "Research and the Individual," which is a monument in the field of human experimentation. He writes:

> Lay subjects, sick or well, are not likely to understand the full implications of complicated procedures, *even after careful explanation.*

Who are the people who have been the subjects of medical experiments? The clear and shocking implications of the most recently revealed experiments indicate that the powerless, the poor, the least educated, and members of minority groups are the likeliest human guinea pigs.

Those who are confined, and for whom the experiment at least appears to be a way out of confinement, volunteer their bodies.

Those for whom as little as a $50 payment, or in the case of prisoners, $1 a day, constitutes an inducement, permit experimentation on their bodies.

Those who have been duped, as in the case of the women—mainly Chicano women—who thought they were being given aids to contraception. They too, are the likely subjects of experimentation.

It is those who cannot understand what is being done to them that constitute by far the largest numbers among human experimentation subjects.

Children, the institutionalized and even mentally retarded, they too are the subjects of human experimentation.

In a Missouri prison, 36 volunteers were paid to take part in a malaria experiment. The prisoners were not offered a reduced sentence. At the conclusion of the experiment when the 36 human subjects were compared to prisoners who had not volunteered, there was no difference whatsoever between the levels of comprehension of the two groups as to the nature of the experiment, or what malaria was. Yet, the volunteers had been briefed and had given their informed consent before participating. The study disclosed that in this case about half the prisoners who volunteered had done so for the remuneration.

J. D. Arnold has conducted several investigations into the nature of human experimentation studies. He writes:

> The stake in medical progress involves all classes of people. There is reason to believe . . . that the lower socio-economic groups are the most acutely concerned.

It may be categorically stated that those most likely to purchase and benefit from newly-tested drugs have virtually no likelihood of ever participating in the tests which make new drugs possible.

In his book, "Research and the Individual," Dr. Beecher cites the work of E. E. Smith, whose article, "Obtaining Volunteers for Research," appeared in a 1962 edition of American Psychology magazine.

According to Dr. Beecher's sources, the U.S. Employment Service is considered to be an extremely good source for obtaining volunteers for human experimentation, and it does not hurt to let the U.S. Employment Service know when the experiment is Government financed.

It is contended in this book that those referred by the U.S. Employment Service are much more amenable than students, who tend to anticipate goals and by virtue of their natural curiosity about what is happening to them, are less desirable. It is apparently not necessary to go through channels to gain the cooperation of the U.S. Employment Service.

Dr. Beecher's book further notes that military reserve units are also considered a good source for human volunteers. Again, there is not much redtape involved and if the project is Government financed, so much the better.

The very fact that Government sponsorship or Government funds facilitate the determination of who becomes a clinical investigation subject must make us extremely chary of how we permit these funds to be used.

Dr. Beecher's book cites several other probable sources for medical research volunteers. Operational military units were said to be good sources because the military volunteers were superior to students in their greater naivete regarding the research. The military volunteers were thought to be better motivated and, of course, much more likely to be available for longer periods of time.

Prisoners and firemen were also among the frequent subjects of medical research involving human beings. Other subjects included students, hospital and laboratory personnel, patient volunteers, and members of certain religious or conscientious objector groups.

Many States have laws and regulations governing the basis for the use of prisoners in human experimentation. Some States, however, do not stipulate in the regulations that the subjects should have given their informed consent prior to the experiment.

Informed consent legislation has proved difficult to interpret. Such language was added to the Food, Drug, and Cosmetic Act of 1962, but no overall, standard policy has resulted as yet.

There is just beginning to be amassed a body of data concerning the mental states of those who volunteer for human experiments. In the past, normal subjects were presumed mentally healthy and were usually only examined in terms of their physical health. One study, however, shows that psychiatric tests indicated psychopathology in 46 percent of those who volunteered for hallucinogen studies and they were thought to have volunteered, in the main, due to their maladaptive personality traits.

I hasten to assure the Congress and the public at large that I would not hamper the extraordinary legitimate research in our Nation which has saved so many lives and brought so many of us from sickness to health. Certainly, the overwhelming majority of research is conducted with the strict observance of both medical and ethical considerations. But we must act very carefully, to protect our country from abuses in experiments on human beings, however rare such abuses might, in fact, be.

Let us recall Hippocrates admonition:

> Life is short, and the art long; the occasion instant, decision difficult, experiment perilous.

WHO CONDUCTS HUMAN EXPERIMENTATION?

Professional estimates indicate that 85 to 90 percent of all clinical investigations are Government sponsored and funded.

It is difficult to determine how many agencies or projects there might be since, in some instances, medical investigations are not clearly stated as involving human subjects.

The principal Federal agencies concerned are the Veterans' Administration, the Department of Defense—the Army, Air Force, and Marine Corps—and the National Institutes of Health.

Even the Atomic Energy Commission can become involved in licensing the use of radioisotopes for experimental purposes.

The Congress should act now. There is every indication that clinical investigations will be enormously proliferated in years to come, as cancer research and other major investigative efforts are stepped up.

LEGISLATIVE ACTION ON CONTROL OF EXPERIMENTS INVOLVING HUMANS

A decade ago, a significant amendment was added to the Food, Drug, and Cosmetic Act to provide a statutory basis for policies governing investigations of new drugs.

According to the provisions of this law, manufacturers were to report to the Secretary, projecting the planned clinical tests and including material on preclinical trials on animals, et cetera.

The persons conducting the clinical investigation were to assume direct responsibility for the patients, supervise them directly, and not give out the drug to anyone else to use while tests were still going on.

Of course, since that time we have seen drugs—such as thalidomide—which were widely distributed before they were finally tested and approved. It was later discovered that thalidomide adversely affected thousands of unborn infants.

The 1962 law also defined a new drug, and included in its definition drugs to which new components were added. Commercial distribution and test marketing of drugs were prohibited until such time as the new drug application was acted upon by the Food and Drug Administration.

Finally, the sponsor of the investigation was to obtain signed statements of informed consent from the participants in the experiment. If the subjects themselves could not sign, however, the decision regarding investigation was to be left to the professional judgment of the investigator.

THE NATIONAL HUMAN EXPERIMENTATION STANDARDS BOARD

The National Human Experimentation Standards Board would be an independent agency in the executive branch of the Government. Its members would be appointed by the President by and with the advice and consent of the Senate.

The members of the Board would be persons of demonstrated knowledge, education, and experience in the field of clinical investigations. Each member would serve for a period of 3 years, and would be eligible for reappointment for one additional term.

The members of the Board would be authorized to appoint personnel, and fix the compensation of the personnel in accordance with the provisions of title 5 of the United States Code.

The Board would make the rules which would govern its functions, and have the right to delegate authority.

Experts and consultants could be made available, under the terms of section 3109 of title 5, United States Code.

The Board could appoint one or more advisory committees to be composed of such private citizens and officials of government at all levels as the Board would deem suitable.

The services and facilities of other agencies of Government would, with their consent, be called upon. Other services of a voluntary and uncompensated nature could be accepted by the Board, notwithstanding the provisions of section 3676 of the revised statutes, and unconditional gifts of services or property could be accepted as well.

The Board could enter into contracts or agreements with other public or private nonprofit entities to conduct studies as required by the provisions of this act.

The Federal agencies are authorized and directed to make available to the Board whatever services or information the Board whenever services or information the Board requests, insofar as practicable.

The Chairman and members of the Board would be compensated, respectively, at levels 3 and 4 of the executive pay schedule.

The Board would have subpena powers, and the right to hold hearings. Those who conducted experiments and failed to respond to the Board could be held in contempt of court.

The Board would establish national guidelines for human experimentation in those projects financed by Federal funds. Any experiment could be reviewed in its formulative stages to insure its compliance with the guidelines.

Where experiments already underway are found not to comply with established guidelines, the Board could obtain an injunction to discontinue the experiment.

The Board would submit an annual report to the President which would be transmitted to the Congress with recommendations regarding legislation.

Mr. President, I ask unanimous consent that the text of the National Human Experimentation Standards Board Act be printed at this point in the RECORD, together with the August 30, 1972, Washington Post article on DES experimentation.

There being no objection, the bill and article were ordered to be printed in the RECORD, as follows:

S. 3951

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act shall be known as the "National Human Experimentation Standards Board Act".

ESTABLISHMENT OF BOARD

SEC. 2. (a) There is hereby established, as an independent agency in the executive branch, a National Human Experimentation Standards Board (hereinafter referred to as the "Board").

(b) The Board shall be composed of 5 members to be appointed by the President by and with the advice and consent of the Senate from among individuals who by virtue of their service, experience, or education are especially qualified to serve on the Board. The members shall select a Chairman and a Vice Chairman from among their membership. The terms of office of each member of the Board shall be 3 years except that—

(1) the members first appointed shall serve, as designated by the President, 1 for a term of 1 year, 2 for a term of 2 years, and 2 for a term of 3 years;

(2) any member appointed to fill a vacancy shall serve for the remainder of the term for which his predecessor was appointed; and

(3) a member shall be eligible for reappointment for one additional term.

(c) Any vacancy in the Board shall not affect its powers and 3 members of the Board shall constitute a quorum except that the Chairman may prescribe a lesser number to constitute a quorum for the purpose of conducting hearings.

(d) Members should be chosen from persons who are representative of the fields associated and concerned with clinical investigations.

ADMINISTRATIVE POWERS

SEC. 3. (a) In order to carry out the provisions of this Act, the Board is authorized to—

(1) appoint and fix the compensation of personnel of the Board in accordance with the provisions of title 5, United States Code;

(2) make, promulgate, issue, rescind, and amend rules and regulations as may be necessary to carry out the functions vested in the Board and delegate authority to any officer or employee;

(3) employ experts and consultants in accordance with section 3109 of title 5, United States Code;

(4) appoint one or more advisory committees composed of such private citizens and officials of Federal, State, and local governments as it deems desirable, to advise it with respect to its functions under this Act;

(5) utilize, with their consent, the services, equipment, personnel, information, and facilities of other Federal, State, and local public agencies with or without reimbursement therefor;

(6) accept voluntary and uncompensated services, notwithstanding the provisions of section 3676 of the Revised Statutes;

(7) accept unconditional gifts of donations of services, money, or property, real, personal, or mixed, tangible, or intangible;

(8) take such actions as may be required for the accomplishment of the objectives of the Board; and

(9) make contracts with public or private non-profit entities to conduct, studies related to the purposes of this Act.

(b) Upon request made by the Board, each Federal agency is authorized and directed to make its services, equipment, personnel, facilities, and information (including suggestions, estimates, and statistics) available to the greatest practicable extent consistent with other laws to the Board in the performance of is functions with or without reimbursement.

(c) Each member of a committee appointed pursuant to clause (4) of subsection (a) of this section who is not an officer or employee of the Federal Government shall be compensated at the rate prescribed for GS–18 under section 5332 of title 5, United States Code, for each day he is engaged in the actual performance of his duties (including traveltime) as a member of a committee. All members shall be reimbursed for travel, subsistence, and necessary expenses incurred in the performance of their duties.

(d) (1) The Board or any duly authorized subcommittee or member thereof may, for the purposes of carrying out the provisions of this Act, hold such hearings, sit and act at such times and places, administer such oaths, and require by subpena or otherwise the attendance and testimony of such witnesses and the production of such books, records, correspondence, memoranda, papers, and documents as the Board or such subcommittee or member may deem advisable. Any member of the Board may administer oaths or affirmations to witnesses appearing before the Board or before such subcommittee or member. Subpenas may be issued under the signature of the Chairman or any duly designated member of the Board, and may be served by any person designated by the Chairman or such member.

(2) In the case of contumacy or refusal to obey a subpena issued under paragraph (1) by any person who resides, is found, or transacts business within the jurisdiction of any district court of the United States, such court, upon application made by the Attorney General of the United States at the request of the Chairman of the Board, shall have jurisdiction to issue to such person an order requiring such person to appear before the Board or a subcommittee or member thereof, there to produce evidence if so ordered, or there to give testimony touching the matter under inquiry. Any failure of such person to obey any such order of the court may be punished by the court as a contempt thereof.

COMPENSATION

SEC. 4. (a) Section 5314 of title 5, United States Code, is amended by adding at the end thereof the following new paragraph:

"(59) Chairman, National Human Experimentation Standards Board."

(b) Section 5315 of title 5, United States Code, is amended by adding at the end thereof the following new paragraph:

"(96) Members, National Human Experimentation Standards Board (4)."

FUNCTIONS

SEC. 5. (a) It shall be the function of the Board to—

(1) establish guidelines for the involvement of human beings in medical experiments which are funded in whole or in part with Federal funds;

(2) review all planned medical experiments that involve human beings which are funded in whole or in part with Federal funds to determine if the guidelines established under paragraph (1) are being complied with;

(3) obtain an injunction to prevent such experimentation in a case where such experiments are found not to comply with established guidelines; and

(4) prepare and submit an annual report to the President, for transmittal to the Congress recommending legislation, if required, and detailing the performance of the Board during the preceding year.

Testing of DES in Early 1950's Disclosed

(By Bernard Gavzer)

Chicago.—A synthetic female hormone—recently associated with cancer—was given to 840 pregnant women here in 1950–52 as part of a clinical experiment of which they were unaware. The cases are only now being followed up.

The hormone is diethylstilbesterol, also called DES or stilbesterol. In the late 1960s three Boston researchers found "a highly significant association" between DES and vaginal cancer among the daughters of women there who had taken the drug to prevent miscarriage. The daughters were 16 to 23 years old when the malignancies were identified and treated. One of them died.

(Late last year, the Food and Drug Administration said it was requiring the manufacturers of DES and similar hormones to change the prescribing instructions to warn that they must not be used in pregnancy.)

At the time of the Chicago experiment, physicians had no reason to suspect DES of cancer-causing potential in the patients' children.

Dr. Charles McCartney, who participated in the experiment, said its purpose was to determine whether DES was really helpful in preventing complications of pregnancy, as was widely believed then. The answer from the experiment was negative, he said.

The study was conducted at the University of Chicago's Department of Obstetrics and Gynecology among patients at Chicago's Lying-in Hospital from Sept. 28, 1950, through Nov. 20, 1952.

As each woman registered at the hospital's prenatal clinic during that period, she was automatically entered into the experiment. There were 2,162 in all, but the group was subsequently reduced to 1,646. Of these, 840 were given DES. The others received placebos, or tablets containing no drugs.

Which pill the patient received depended on whether she was an even or odd number or consecutive order. Not even clinicians who attended the women know which tablets had DES because they were concealed in a code.

Describing the manner in which the experiment was conducted, the researchers reported:

"Every patient on registering in our prenatal clinics who was thought to be pregnant between six to 20 weeks, inclusive, was offered a box of tablets without charge. Included were women who were known to have complications such as chronic hypertensive vascular disease, diabetes mellitus, or repeated abortions.

"Each patient was told that previous reports indicated that the tablets were of value in preventing some of the complications of pregnancy and that they would cause no harm to her or her fetus." The report appeared in the American Journal of Obstetrics and Gynecology, Vol. 66, 1953.

The chief author of the report was the late Dr. William J. Dieckmann, chairman of the Department of Obstetrics and Gynecology as well as chief of staff of the hospital. He died in 1957.

Dr. McCartney, who participated in the experiment, said Dr. Dieckmann urged the study because "thousands of women were taking stilbestrol and a great deal was written about the increased salvage rate in high-risk pregnancies . . . Dr. Dieckmann was skeptical . . ."

Dr. McCartney said the experiment was conducted in an era in which there was "no such thing as informed consent." He said, "Informed consent is a current regulation. Now they have very rigid controls. It's done by committee and all that. At that time there were no regulations like that . . .

"At the time of the experiment, there was nothing known about the malignancy potential of this material. Indeed, this still has to be determined."

MAY HOLD ANSWER

Dr. McCartney said the Dieckmann study is of particular value today because it may hold the answer to whether there is a time-bomb effect to DES use.

"As the only satisfactory, scientifically controlled study dealing with the administration of stilbestrol," he said, "it provides a basis for studying the long-range effect of use of the drug during pregnancy.

"It would help us a great deal if the patients in the study can be traced."

The job of tracking down the women involved in the experiment and their children has fallen to Dr. Frederick P. Zuspan, chairman of the Department of Obstetrics and Gynecology and chief of staff at Chicago Lying-in. Zuspan did not take part in the experiment. Officials at Chicago lying-in declined to answer questions about the experiment and directed all inquiries to Zuspan.

"I can answer no questions regarding the study or plans for a follow-up," Zuspan said.

However, a follow-up is in the works. It was learned 1,600 letters had been sent over Zuspan's signature.

A Chicago mother who was involved in the experiment said:

"I first learned of it when I received a letter from the university dated Aug. 8, 1972. I had never been told I was part of an experiment.

"I had no trouble conceiving. I had never had a miscarriage or aborted. I already had one child. There were no complications at all about my pregnancy. I was amazed to learn I was in such an experiment."

She does not know whether she received DES or the blank tablets. Her daughter, who will be 21 in October, has had only one serious illness and that resulted from a ruptured appendix.

The identities of the women who participated in the experiment are known only to Chicago Lying-in officials.

The first indication there might be some association between DES-treated mothers and the occurrence of vaginal cancer in their daughters was contained in a report April 22, 1971, in the New England Journal of Medicine.

EACH TREATED WITH DES

Drs. Arthur Herbst, Howard Ulfelder and David Peskanzer, working at Vincent Memorial Hospital, were mystified by seven cases of vaginal cancer which came to the hospital's attention during the period 1966–69. The patient's ages ranged from 15 to 22. This was considered rare. In the detective work that followed, the investigators sought a variety of explanations and discovered that in each case, the mother had been treated with DES during pregnancy.

The scientists then reported:

"There is a highly significant association between the treatment of the mothers with estrogen diethylstilbestrol during pregnancy and the subsequent development of adenocarcinema of the vaginas in their daughters."

They said, "The time of birth of these patients (1946 to 1951) coincides with the beginning of widespread use of estrogens in support of high-risk pregnancy.

"It is likely that more patients with the tumor will appear as girls who were exposed in utero come to maturity. Furthermore, although our eldest patient was discovered at the age of 22 years, it is possible that these tumors will appear in even older women as the 'at risk' populations matures."

The women who participated in the Chicago experiment were given doses of DES early in pregnancy and the dosage was increased regularly. According to the researchers' report, early doses contained five to 25 miligrams of DES. "In the course of pregnancy, doses increased to as much as 150 mg daily in the 34th and 35th week," the researchers said.

Diethylstilbestrol is still in use. It is prescribed primarily for cancer of the prostate in men, and for menopausal symptoms in women, and in some cases for treatment of breast cancer in women. In some drugs it is combined with male hormones.

By Mr. TOWER:

S. 3952. A bill to provide increased job training opportunities for people with limited English-speaking ability by establishing a coordinated manpower training program, a teacher training program for instructors of bilingual job training, and a capability to increase the development of instructional materials and methods for bilingual job training. Referred to the Committee on Labor and Public Welfare.

BILINGUAL JOB TRAINING ACT OF 1972

Mr. TOWER. Mr. President, I am today introducing the Bilingual Job Training Act of 1972.

For some time now, the Federal Government has undertaken in a variety of forms the task of providing equal educational and economic opportunities for our disadvantaged and minority group citizens. In the field of manpower training, which this proposal addresses, some progress has been made in providing job security for our citizens who lack adequate preparation for many employment opportunities. Unfortunately, this progress has not been consistent across the full spectrum of our society. For instance, a great deal more could be done to provide the tools necessary for those with limited English-speaking ability and those whose culture is very different from that of the English-speaking majority.

Coming from the State of Texas, I can speak with some knowledge about the plight of our Mexican American citizens whose primary language is Spanish. There has been progress in providing many Mexican Americans with those skills needed to become productive members of our society. For instance, Operation SER, Jobs for Progress, is a Spanish-speaking organization primarily involved in scope, Operation SER has had a tremendous impact in many communities across Texas. Other Spanish-speaking service organizations have also been very much involved in teaching Spanish-speaking individuals the proper skills in order to achieve economic success and security.

Nevertheless, I have become convinced of the great need for more direction at the Federal level so that these needed skills may be obtained by those in our society who do not speak English as their primary language. While the Department of Labor and other agencies of the Government have in the past 4 years increased their emphasis on assisting these people, it is apparent that more can be done with the resources available to us.

Additionally, many manpower training

programs have been unable to include a component recognizing the simple fact that Spanish—or some other language—is the participant's primary language. Since these programs are English-based the services offered do not reflect the needs of those for whom they are intended.

A number of vocational training institutions in the State of Texas have also been devoting their efforts toward providing job training for persons with Spanish-speaking backgrounds and some excellent programs have been developed. However, almost without exception, the programs embrace a preliminary basic education program, perhaps followed by a pre-vocational program. Both of these programs are aimed at developing enough English-language ability to allow the participants to be trained in conventional English-language courses, or at best in such English-language courses supplemented by coaching in Spanish. Thus, the participant who is interested in job training is forced into a holding pattern before he is even able to enroll in the training he may desperately need and desire. Naturally, the psychological and economic factors involved result in a high dropout rate.

Mr. President, the legislation I am introducing today is intended to assist the bilingual individual in closing the gap between his own ability and that of others in our society caused by his language and his culture. Further, it is intended to allow the participant to utilize his cultural experience rather than sacrifice it. It is most important that we realize that America's Spanish-speaking and other bilingual people want to achieve success in our society while retaining pride in their own heritage. In implementing socioeconomic programs intended to benefit the disadvantaged, Government should keep this in mind so that the programs will effectively utilize the participants' own experience and background.

This basic fact was well stated in a recent report issued by the Inter-Agency Committee on Mexican American Affairs. The report opened with the following paragraph:

> In addressing ourselves to the special problems of the Mexican-American in education, we must keep in mind that the Mexican-American does not want, nor is he going to accept, systems and techniques which may provide a skill at the expense of his culture and identity.

I think it is safe to assume that this premise exists among all people in our Nation whose main language is something other than English. The bill I am introducing today, focuses upon manpower training in a way that would utilize the background of the bilingual person so that it would not become a crutch in his efforts to achieve economic security. At the same time, the programs as implemented, would be flexible enough to allow for English training when needed. It would be, therefore, intercultural in many respects placing emphasis upon the needs of the individual trainee rather than a particular technique or method.

Part B of the legislation provides for assistance to States, local educational institutions and certain private nonprofit organizations to enable them to conduct bilingual training programs primarily in a language other than English. This is the major section of the bill and would receive 65 percent of the funds appropriated.

Part C would provide grants to State and educational institutions so that they could provide training for teachers and related educational personnel to enable them to participate in bilingual job training programs. It would also provide inservice and development programs to improve the qualifications of those persons participating in the programs. In my research on this overall problem, I found that this type of training was greatly needed and was not being given enough priority by the Federal Government to have a significant impact.

Part D is intended to provide for the development of instructional materials such as textbooks and audiovisual materials. I believe that this type of research and development is very important if this manpower training effort is to keep up with our complex and changing technology and occupational needs.

Mr. President, I sincerely believe that this approach can result in very productive results for our governmental effort to assist the disadvantaged. While I am convinced that it can have a lasting positive impact on all segment of the bilingual community, as a Texan I am particularly interested in the Spanish-speaking American. I am convinced that the Spanish-speaking American has a great deal to offer this Nation and is, for the most part, concerned with obtaining equal opportunity in our society. He is singularly uninterested in welfare. An increased job training effort would be welcomed by the Spanish-speaking community. If we are to remove the vestiges of second class citizenry within this community, I think programs such as the Bilingual Education Act, minority enterprise development, and this Bilingual Job Training Act offer the best type of public response.

In considering legislation of this nature one cannot easily disregard the fact that the average median income of Spanish-speaking families is nearly $3,000 below the average for the rest of our population. Nor can one easily disregard the unemployment rate which is also above the national average, or the fact that approximately one out of every five adults of Spanish origin has completed less than 5 years of schooling compared with only one out of 25 for all others.

My proposal, therefore, represents an investment in the future to assist many of our disadvantaged citizens who, through no fault of their own, have experienced many difficulties. Ultimately, as opposed to a welfare program, it represents an investment toward a stronger nation from both a cultural and an economic standpoint. A meaningful program emphasizing job training and economic security will have the effect of reducing welfare dependency and increasing our economic output.

For these reasons, I am hopeful that Congress will give this legislation its very careful consideration. It entails a program that offers great potential for many of our citizens and for the Nation as a whole.

Mr. President, I ask unanimous consent that the full text of this measure be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3952

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

BILINGUAL JOB TRAINING

PART A—GENERAL PROVISIONS

SHORT TITLE

SEC. 101. This act may be cited as the Bilingual Job Training Act of 1972.

CONGRESSIONAL STATEMENT OF FINDINGS AND PURPOSE

SEC. 102. The Congress hereby finds that one of the most acute problems in the United States is that which involves millions of citizens, both children and adults, whose efforts to profit from job training is severely restricted by their limited English-speaking ability because they come from environments where the dominant language is other than English; that these persons are therefore unable to help to fill the critical need for more and better-trained personnel in many vital occupational categories; and that such persons are unable to make their maximum contribution to the nation's economy and must, in fact, suffer the hardships of unemployment or under-employment. The Congress further finds that there is a critical shortage of instructors possessing both the job knowledge and skills and the dual language capabilities required for adequate instruction of such language-handicapped persons, and a corresponding shortage of instructional materials and of instructional methods and techniques suitable for such instruction.

It is therefore the purpose of this Act to provide for the conduct of job training programs in the combined languages of English and of the person's dominant language and, further, to provide for the development of skilled instructors and of instructional materials and techniques for bilingual job training.

AUTHORIZATION OF APPROPRIATIONS

SEC. 103. There are hereby authorized to be appropriated $20,000,000 for the fiscal year ending June 30, 1973, $40,000,000 for the fiscal year ending June 30, 1974, and $60,000,000 for the fiscal year ending June 30, 1975, for the purpose of making grants in accordance with the provisions of Parts B, C, and D of this Act: *Provided,* That 65 per centum shall be for grants pursuant to part B of this Act, 25 per centum shall be for grants pursuant to part C of this Act, and 15 per centum shall be for grants pursuant to part D of this Act.

DEFINITIONS

SEC. 104. For the purpose of this Act—

(a) The term "job training" means training or retraining which is given in schools or classes (including field or laboratory work and remedial or related academic and technical instruction incident thereto) under public supervision and control or under contract with a State board or local education agency or is conducted as part of a program designed to prepare individuals for gainful employment as semi-skilled or skilled workers or technicians or subprofessionals in recognized occupations and in new and emerging occupations, but excluding any program to prepare individuals for employment in occupations which the Commissioner of Education determines, and specifies by regulation, to be generally considered professional which requires a baccalaureate or higher degree; such term includes guidance and counseling (either individually or through group instruction) in connection with such training or for the purpose of facilitating occupational choices; instruction related to the occupation or occupations to which the students are in training or instruction necessary for students to benefit from such training; the training of persons engaged as, or preparing to become teachers in a job training program; travel of students and job training personnel while engaged in a training program; and the acquisition, maintenance, and repair of instructional supplies, aids, and equipment, but such term does not include the construction, acquisition, or initial equipment of buildings or the acquisition or rental of land.

(b) The term "Secretary" means the Secretary of Labor.

(c) The term "State" includes, in addition to the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Trust Territory of the Pacific Islands.

(d) The term "local educational agency" means a board of education or other legally constituted local school authority having administrative control and direction of public elementary or secondary schools in a city, county, township, school district, or political subdivision in a State, or any other public educational institution or agency having administrative control and direction of an educational program.

(e) The term "high school" does not include any grade beyond grade 12.

(f) The term "post-secondary educational institution" means an institution legally authorized to provide post-secondary education within a State for persons sixteen years of age or older who have graduated from or left elementary or secondary school.

(g) The term "private vocational training institution" means a business or trade school, or technical institute or other technical or vocational school, in any State, which (1) admits as regular students only persons who have completed or left elementary or secondary school and who have the ability to benefit from the training offered by such institution, and (2) is legally authorized to provide, and provides within that State, a program of training designed to fit individuals for useful employment in recognized occupations.

GENERAL RESPONSIBILITIES OF THE SECRETARY OF LABOR

SEC. 105. The Secretary shall, in addition to the specific responsibilities imposed by this act, (1) develop and disseminate accurate information on the status of bilingual job training in all parts of the nation, (2) evaluate the impact of such bilingual job training on the shortages of well-trained personnel, the unemployment or under-employment of persons of limited English-speaking ability and the ability of such persons to contribute fully to the nation's economy, and (3) report his findings annually to the Congress.

PART B—STATE BILINGUAL JOB TRAINING PROGRAMS

AUTHORIZATION OF GRANTS

SEC. 106. From the sums made available for grants under this part pursuant to section 103, the Secretary is authorized to make grants to States, local educational agencies, post-secondary educational institutions, private vocational training institutions, or to such non-profit organizations especially created to serve a group whose language as commonly used is other than English, in supplying training and employment in recognized occupations and new and emerging occupations, to assist them in conducting bilingual job training programs for persons of all ages in all communities of the States which are designed to ensure that job training programs are available to all individuals who desire and need such bilingual job training.

USE OF FEDERAL FUNDS

SEC. 107. Grants under this part may be used, in accordance with applications approved under section 108, for the following purposes:

(a) Bilingual job training programs for high school students which are designed to prepare them for entry into a work situation upon graduation from high school.

(b) Bilingual job training programs for persons who have completed or left elementary or secondary school and who are available for training by a postsecondary educational institution.

(c) Bilingual job training programs for persons who have already entered the labor market and who desire or need training or retraining to achieve year-round employment, adjust to changing manpower needs, expand their range of skills, or advance in employment.

(d) Training allowances for participants in bilingual job training programs subject to the same conditions and limitations as those set forth in section 2583 of the Manpower development and Training Act of 1962 as amended by the Manpower Act of 1965.

APPLICATIONS FOR GRANTS AND CONDITIONS FOR APPROVAL

SEC. 108. (a) A grant under this part may be made to State boards of vocational education upon application to the Secretary at such time or times, in such manner, and containing or accompanied by such information as the Secretary deems necessary. Such applications shall—

(1) provide that the activities and services for which assistance under this title is sought will be administered by or under the supervision of the State board for vocational education;

(2) set forth a program for carrying out the purposes set forth in section 107 and provide for such methods of administration as are necessary for the proper and efficient operation of the program;

(3) set forth a program of such size, scope, and design as will make a substantial step toward achieving the purpose of this act;

(4) set forth policies and procedures which assure an equitable distribution of funds for the purposes stated in section 107 and among the various potential applicant agencies within the State;

(5) provide for such fiscal control and fund accounting procedures as may be necessary to assure proper disbursement of and accounting for Federal funds paid to the applicant under this title; and

(6) provide for making an annual report and such other reports in such form, and containing such information, as the Secretary may reasonably require to carry out its functions under this Act and to determine the extent to which funds provided under this part have been effective in improving the training opportunities of persons in the area served, and for keeping records and for according such access thereto as the Secretary may find necessary to assure the correctness and verification of such reports.

(b) A grant under this part may be made directly to a local educational agency or agencies, or to postsecondary educational institutions, or to private vocational training institutions, or to such non-profit organizations especially created to serve a group whose language as commonly used is other than English, in supplying training and employment in recognized occupations and new and emerging occupations, upon application to the Secretary at such time or times as the Secretary deems necessary, but only if and when the agency of this State which serves the State Board of Vocational Education approves such application in advance. Such application shall conform to the same requirements as those listed under subsection (a) above.

(c) Amendments of applications shall, except as the Secretary may otherwise provide by or pursuant to regulations, be subject to approval in the same manner as original applications.

SEC. 109. (a) The Secretary shall pay to each applicant which has an application approved under this part an amount equal to the total sums expended by the applicant under the application for the purposes set forth therein.

(b) Payments under this part may be made in installments and in advance or by way of reimbursement, with necessary adjustments on account of overpayment or underpayment.

PART C—TEACHER TRAINING PROGRAM

AUTHORIZATION OF GRANTS

SEC. 110. From the sums made available for grants under this part pursuant to section 103, the Secretary is authorized to make grants to States or directly to educational institutions, either public or private, to assist them in conducting training for instructors of bilingual job training programs.

USE OF FEDERAL FUNDS

SEC. 111. Grants under this part may be used for the following purposes: (a) Providing preservice training designed to prepare persons to participate in bilingual job training programs as instructors, aides, or other ancillary education personnel such as counselors, and inservice and development programs designed to enable such persons to continue to improve their qualifications while participating in such programs.

(b) Fellowships or traineeships for persons engaged in such preservice or inservice training.

APPLICATIONS FOR GRANTS AND CONDITIONS FOR APPROVAL

SEC. 112. (a) A grant under this part may be made upon application to the Secretary at such time or times, in such manner, and containing or accompanied by such information as the Secretary deems necessary. Such application shall contain—

(1) a description of the nature, duration, purpose and plan of the proposed training program;

(2) full information as to the capabilities of the applicant institution to teach the job-skills content of the programs for which persons are being trained, including a listing of the job training courses offered by that institution together with the indication of approval by State agencies and/or accreditation by regional or national accrediting associations;

(3) the qualifications of the principal staff who will be responsible for the training including, specifically, information to show that such principal staff is qualified to teach in the language other than English to be used in the bilingual job training program for which the persons are being trained;

(4) a statement of the minimum qualifications of persons to be enrolled in the training program, a description of the processes to be used in the selection of persons to be trained, and the amounts of fellowships or traineeships to be granted to the persons enrolled;

(5) a justification of the amount of grant funds requested; and

(6) such control and fund accounting for Federal funds paid to the applicant.

(b) The Secretary may approve applications for grants under this part only if—

(1) the applications meet the requirements set forth in subsection (a);

(2) the Secretary determines that bilingual job training programs requiring the services of the persons to be trained have been or will be actually conducted in the State or States being served and that enrollees will be selected from or for such programs; and

(3) the Secretary determines that the applicant institution actually has on-going job training programs in the field for which persons are being trained; and that the applicant institution can provide instructors with adequate language capabilities in the language other than English to be used in the bilingual job training program for which the persons are being trained.

(c) Amendments of applications shall, except as the Secretary may otherwise provide by or pursuant to regulations, be subject to approval in the same manner as original applications.

PAYMENTS

SEC. 113. (a) The Secretary shall pay to each applicant which has an application approved under this part an amount equal to the total sums expended by the applicant under the applications for the purposes set forth therein.

(b) Payments under this part may be made in installments and in advance or by way of reimbursement, with necessary adjustments on account of overpayment or underpayment.

PART D—DEVELOPMENT OF INSTRUCTIONAL MATERIALS, METHODS AND TECHNIQUES

AUTHORIZATION OF GRANTS

SEC. 114. From the sums made available for grants under this part pursuant to section 103, the Secretary is authorized to make grants to States, to educational institutions, either public or private, or to other organizations, either profit or non-profit, to assist them in developing instructional materials, methods or techniques for bilingual job training.

USE OF FEDERAL FUNDS

SEC. 115. Grants under this part may be used for—

(a) research in bilingual job training;

(b) training programs designed to familiarize State agencies and training institutions with research findings and successful pilot and demonstration projects in bilingual job training;

(c) experimental, developmental and pilot programs and projects designed to test the effectiveness of research findings; and

(d) demonstration and dissemination projects.

APPLICATIONS FOR GRANTS AND CONDITIONS FOR APPROVAL

SEC. 116. (a) A grant under this part may be made upon application to the Secretary at such time or times, in such manner, and containing or accompanied by such information as the Secretary deems necessary. Such applications shall contain—

(1) a description of the nature, duration, purpose and plan of the project;

(2) the qualifications of the principal staff who will be responsible for the project.

(3) a justification of the amount of grant funds requested; and

(4) such fiscal control and fund accounting procedures as may be necessary to assure proper disbursement of and accounting for Federal funds paid to the applicant.

(b) The Secretary may approve applications for grants under this part only if—

(1) the application meets the requirements set forth in subsection (a);

(2) the program set forth in the application is consistent with criteria established by the Secretary (where feasible, in cooperation with the State educational agency) for the purpose of achieving equitable distribution of assistance under this part within each State.

(c) Amendments of applications shall, except as the Secretary may otherwise provide by or pursuant to regulations, be subject to approval in the same manner as original applications.

PAYMENTS

SEC. 117. (a) The Secretary shall pay to each applicant which has an application approved under this part an amount equal to the total sums expended by the applicant under the application for the purposes set forth therein.

(b) Payments under this part may be made in installments and in advance or by way of reimbursement, with necessary adjustments on account of overpayment or underpayment.

By Mr. ROBERT C. BYRD:

S. 3954. A bill to amend the Internal Revenue Code of 1954 to permit the deduction of a portion of State sales taxes on motor vehicles which are imposed at a rate higher than the general sales tax rate. Referred to the Committee on Finance.

Mr. ROBERT C. BYRD. Mr. President, I send a bill to the desk and ask that it be appropriately referred.

This bill will correct, what I believe to be, an unjust Treasury Department regulation, administered by the Internal Revenue Service, as it applies to the State of West Virginia, and incidently, also to the State of Vermont.

West Virginia currently has in effect a motor vehicle privilege tax, which until very recently has been treated by the Internal Revenue Service as a sales tax on automobiles. As long as this automobile tax was 3 percent—the same rate as West Virginia's general sales tax—the IRS treated it as a sales tax and West Virginians were allowed to deduct these payments on their Federal tax returns.

Last year, the West Virginia Legislature raised this vehicle privilege tax rate to 5 percent, and IRS has now ruled that since this tax exceeds the 3 percent sales tax rate, none of this amount can be deducted from Federal returns. I believe this is an erroneous and an unfair ruling. My bill, if enacted, will permit West Virginians to deduct 3 percent of this 5 percent automobile privilege tax from their returns, and it would make this provision retroactive to January 1971, in order that those who have purchased automobiles since this tax ruling will be covered.

I ask unanimous consent to include in the RECORD a news clipping from the Huntington, W. Va., Herald-Dispatch of August 30, which further explains the need for such relief as would be provided by my bill.

There being no objection the news article was ordered to be printed, as follows:

WEST VIRGINIA LEGISLATORS SEEK NEW RULING ON TAX DEDUCTION

CHARLESTON, W. VA.—The state's two top legislators are going to Washington to try to obtain relief from a ruling that has deprived West Virginia car buyers of a federal income tax deduction.

Senate President Hans McCourt, D-Webster, said Tuesday he and House of Delegates Speaker Lewis N. McManus, D-Raleigh, plan to go to Washington soon after Congress reconvenes Sept. 5.

After conferring with members of the West Virginia delegation, they will seek a meeting with Rep. Wilbur D. Mills, D-Ark., House Ways and Means Committee chairman, McCourt said.

Their purpose, he said, will be to investigate the possibility of obtaining federal legislation to nullify an Internal Revenue Service ruling involving West Virginia's motor vehicle privilege tax.

The tax is imposed when a car title is issued or transferred. It formerly was 3 per cent of the purchase price, less trade-in. Since the rate paralleled that of the state's 3 per cent sales tax (which does not itself apply to cars), the IRS treated it as a sales tax and permitted taxpayers who itemize deductions to deduct payments of the state tax on their federal returns.

Then last year the legislature raised the vehicle privilege tax rate to 5 per cent. Since the rate now exceeded that of the sales tax, the IRS refused to treat the privilege tax any longer as a deductible sales tax. The IRS would not even permit deduction of the privilege tax portion that equalled the sales tax—that is, 3 per cent of the 5 per cent total.

West Virginians who bought cars last year and paid the 5-per-cent tax were not permitted to deduct the payments on their federal returns. The same thing happened to car buyers in Vermont, the only other state affected by the IRS ruling.

"We don't think that Congress intended to treat people in Vermont and West Virginia any different from people in any other state," McCourt said.

McCourt said he and McManus feel seeking corrective federal legislation is "a better approach" than to try to change state law. He added:

"The speaker and I feel that any way we change our state law (to restore a deduction) is going to cause us considerable problems, either in administration or loss of revenue."

The privilege tax brings in about $23 million a year at the 5 per cent rate. All proceeds are earmarked for the state road fund.

The 1972 legislature considered a bill to separate the 5 per cent tax into two taxes of 3 and 2 per cent, with the view that at least the 3-per-cent tax would be deductible on federal returns. But the lawmakers were unable to develop a version acceptable to the leadership from the standpoint of administrative workability and avoidance of revenue loss, and nothing was passed.

ADDITIONAL COSPONSORS OF BILLS AND JOINT RESOLUTIONS

S. 2087

Mr. HRUSKA. Mr. President, I ask unanimous consent that at the next printing, the name of the Senator from South Carolina (Mr. THURMOND) be added as a cosponsor of S. 2087, a bill to amend the Omnibus Crime Control and Safe Streets Act of 1968, as amended, to provide benefits to survivors of police of officers killed in the line of duty. My understanding is that the Senator from South Carolina had thought he was already a cosponsor and had made such a request. This request is made to make sure that he will have his name on it.

I also ask unanimous consent that the names of the Senator from Delaware (Mr. BOGGS), the Senator from Michigan (Mr. GRIFFIN) and the Senator from Illinois (Mr. PERCY) be added as cosponsors of the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

S. 3812

At the request of Mr. CHURCH, the Senator from Massachusetts (Mr. KENNEDY) was added as a cosponsor of S. 3812, a bill to authorize the appropriation of funds to the Department of Transportation for the use of the Washington Metropolitan Area Transit Authority for the purpose of assuring that the facilities of the Metro Rapid Transit System are accessible to the physically handicapped, and for other purposes.

S. 3871

At the request of Mr. BOGGS, the Senator from Nevada (Mr. BIBLE) was added as a cosponsor of S. 3871, a bill to amend the Federal Aviation Act of 1958 in order to provide a more effective program to prevent aircraft hijacking, and for other purposes.

S. 3877

At the request of Mr. BELLMON, the Senator from Pennsylvania (Mr. SCHWEIKER) was added as a cosponsor of S. 3877, a bill to prohibit the impoundment of funds for the Highway Trust Fund.

SENATE RESOLUTION 357—SUBMISSION OF A RESOLUTION TO REFER S. 3953 TO THE COURT OF CLAIMS

(Referred to the Committee on the Judiciary.)

Mr. SPONG, for himself and Mr. SPARKMAN, submitted the following resolution:

S. Res. 357

Resolved, that the bill (S. 3953) entitled "A bill for the relief of Datronics Engineers, Inc.", now pending in the Senate, together with all the accompanying papers, is referred to the Chief Commissioner of the United States Court of Claims; and the Chief Commissioner shall proceed with the same in accordance with the provisions of Sections 1492 and 2509 of title 28, United States Code, and report thereon to the Senate at the earliest practicable date, giving such findings of fact and conclusions thereon as shall be sufficient to inform the Congress of the nature and character of the demand as a claim, legal or equitable, against the United States, or a gratuity, and the amount, if any, legally or equitably due from the United States to the claimant.

The Chief Commissioner is specifically requested to determine the expenses, damages and losses of the claimant to which claimant is entitled by way of equitable or legal relief, attributable in whole or in part, directly or indirectly, to transactions with the United States Navy under contract numbered NBY 48950 awarded on July 19, 1963.

The Congress of the United States waives the defense of lack of privity between the United States and the claimant as a bar to relief or entertainment of a claim for relief commenced under this resolution.

FEDERAL REVENUE-SHARING ACT AMENDMENT

AMENDMENT NO. 1465

(Ordered to be printed and to lie on the table.)

URBAN DIVIDEND AMENDMENT

Mr. JAVITS. Mr. President, in behalf of myself and Senators BROOKE, CASE, INOUYE, MATHIAS, and PERCY, I propose an amendment to the revenue-sharing bill which restores urbanization to the revenue-sharing formula.

This amendment designates an additional $900 million of "no strings" revenue-sharing money as an urban dividend, to be divided annually among the States on the basis of urbanized population. "Urbanized population" carries the same definition as it does in other parts of the Senate bill, but the distribution is made on a simple proportional basis.

The amendment does not change the distribution formula within the States; it changes the amount of money going to each State as a whole. Thus, during the first year almost every State would receive some part of this $900 million, and many of the urban States would recover close to what such States "lost" because of the Senate Finance Committee changes from the House-passed bill.

In my view, the amendment is noninflationary. This is because it is financed largely out of the $300 million annual growth factor which has been written into the basic bill. Section 123(a) of my amendment retains this $300 million only for the last calendar year of operation, that is, 1976. As a result, the amendment, which adds $900 million to the Finance Committee bill in the first year, adds only $600 million in the second and $300 million in the third; for a total additional cost of the amendment over the 5-year period of this bill of $1.8 billion. By 1975, when we should have reached full employment, the annual cost of revenue sharing under my amendment is exactly the same as under the committee bill.

But there is another, more important, reason why the cost of the amendment should not be a bar to its passage. This is because of the rationale for revenue sharing in the first place: that our State and local governments—particularly our urban governments—need the money and will spend it usefully. If we are serious about our rhetoric about reordering our national priorities, now is the time to bring our actions in line with our words.

The amendment we are introducing, therefore, answers a national priority need by restoring urbanization as a factor in the distribution of revenue sharing funds. Passage of the amendment would make revenue sharing dependent upon four variables: general tax effort, relative poverty, population, and concentrations of urban population. The latter factor, which my amendment introduces, would contribute approximately 14 percent to the distribution formula of basic "no strings" revenue sharing money; in other words, 14 percent of that money would be distributed to the States according to urbanization, and the other 36 percent according to the other three factors—general tax effort, relative poverty, and population.

Mr. President, there is general agreement that these four factors comprise the basic package of criteria which most accurately describe the real need of our State and local governments. By the same token, failure to include urbanization ignores a glaring fact which our big city mayors and our urban State Governors know all too well: that the fiscal crunch is felt worst where the concentrations of population are the greatest. It is no exaggeration that in many instances our central cities are disaster areas in need of disaster relief. And, the figures compiled by the Advisory Commission on Intergovernmental Relations—perhaps the most authoritative body in Washington on the subject of State and local government spending—show that the biggest tax increases have come in the urbanized States.

The bill as reported out of the Finance Committee recognizes the needs of big city governments in the formula for distribution of funds within each State; but compared to the House bill it shortchanges the urban States, which must also bear the burden of the cities which are in deep trouble. And it leaves out almost completely those local governments which do not fit within the Census Bureau definition of an urban area.

Mr. President, I ask unanimous consent that the text of the amendment, together with two tables illustrating its effect, be printed in the RECORD.

There being no objection, the amendment and tables were ordered to be printed in the RECORD, as follows:

On page 63, after line 16, insert the following:

Subtitle B—Allocation and Payment of Funds based on Urbanized Population.

Subtitle B—ALLOCATION AND PAYMENT OF FUNDS BASED ON URBANIZED POPULATION

SEC. 121. CREATION OF TRUST FUND.

(a) IN GENERAL.—There is created on the books of the Treasury of the United States a Trust Fund to be known as the Urban Dividend Trust Fund (referred to in this subtitle as the "Trust Fund"). The Trust Fund shall consist of the amounts appropriated to it as provided in this section. There are hereby appropriated to the Trust Fund, out of any moneys in the Treasury not otherwise appropriated, amounts equivalent to—

(1) for the fiscal year ending June 30, 1972, one-half of one percent of the Federal individual income taxes received in the Treasury during such fiscal year;

(2) for the fiscal years ending June 30, 1973, June 30, 1974, June 30, 1975, and June 30, 1976, one percent of the Federal individual income taxes received in the Treasury during each such fiscal year; and

(3) for the fiscal year ending June 30, 1977, one-half of one percent of the Federal individual income taxes received in the Treasury during such fiscal year.

The amounts appropriated by paragraphs (1), (2), and (3) shall be transferred from time to time from the general fund of the Treasury to the Trust Fund on the basis of estimates made by the Secretary of the amounts referred to in such paragraphs. Proper adjustments shall be made in amounts subsequently transferred to the extent prior estimates were in excess of or were less than the amounts required to be transferred.

(b) FEDERAL INDIVIDUAL INCOME TAXES.—For purposes of subsection (a), the term "Federal individual income taxes" means the tax imposed by chapter 1 of the Internal Revenue Code of 1954 on the income of individuals and the tax deducted and withheld at source on wages under chapter 24 of such Code.

(c) TRUSTEES; REPORTS TO CONGRESS.—The Secretary of the Treasury shall be the trustee of the Trust Fund, and shall report to the Congress not later than March 1 of each year on the operation and status of the Trust Fund during the preceding fiscal year.

(d) EXPENDITURES FROM TRUST FUND.—Except as provided in this subtitle, amounts in the Trust Fund shall be available for, and may be used only for, payments by the Secretary to State governments and units of local government under this subtitle. Such amounts shall remain available without fiscal year limitation.

(e) TRANSFERS FROM TRUST FUND TO GENERAL FUND.—The Secretary shall from time to time transfer from the Trust Fund to the general fund of the Treasury any moneys in the Trust Fund which he determines will not be needed to make payments to State governments and units of local government under this subtitle.

SEC. 122. PAYMENTS TO STATE AND LOCAL GOVERNMENTS.

Except as otherwise provided in this subtitle, the Secretary shall, for each entitlement period, pay out of the Trust Fund to—

(1) each State government a total amount equal to the entitlement of such State government for the period (determined under section 123(c)), and

(2) each unit of local government (within the meaning of section 105(d)) a total amount equal to the entitlement of such unit for the period (determined under section 123(d)).

Such payments shall be made in installments during the entitlement period but not less often than once each quarter. Such payments for any entitlement period may be initially made on the basis of estimates. Proper adjustment shall be made in the amount of any payment to a State government or a unit of local government, to the extent that the payments previously made to such government under this subtitle were in excess of or less than the amounts required to be paid.

SEC. 123. ALLOCATION AMONG STATE AND LOCAL GOVERNMENT.

(a) IN GENERAL.—The Secretary shall, for each entitlement period, allocate among the States so much of the moneys appropriated to the Trust Fund for the fiscal year which includes such entitlement period as does not exceed—

(1) $450,000,000, in the case of the entitlement period beginning on January 1, 1972,

(2) $900,000,000, in the case of each of the entitlement periods beginning on July 1 of 1972, 1973, 1974, and 1975, and

(3) $450,000,000, in the case of the entitlement period beginning on July 1, 1976.

(b) ALLOCATION AMONG STATES.—There shall be allocated to each State for each entitlement period an amount which bears the same ratio to the total amount to be allocated for such period under subsection (a) as the urbanized population of that State bears to the urbanized population of all the States.

(c) DIVISION BETWEEN STATE AND LOCAL GOVERNMENTS.—The State government shall be entitled to receive one-third of the amount allocated to that State for each entitlement period. The remaining portion of each State's allocation shall be allocated among the units of local government of that State as provided in subsection (d).

(d) ALLOCATIONS TO LOCAL GOVERNMENTS.—The amount to be allocated to the units of local government within a State under subsection (c) for any entitlement period shall be allocated among such units of local government so that each unit of local government will receive an amount which bears the same ratio to the total amount to be so allocated as—

(1) the payments to which such unit of local government is entitled under subtitle A for the same entitlement period, bears to

(2) the aggregate payments to which all units of local government within the State are entitled under subtitle A for the same entitlement period.

Each unit of local government shall be entitled to receive the amount allocated to it under this subsection.

(e) APPLICATION OF SUBTITLE A.—The provisions of sections 107, 108, 109, and 110 of subtitle A shall apply to the making of payments under this subtitle.

(f) COORDINATION OF PAYMENTS.—To the maximum extent feasible, payments under this subtitle shall be made at the same time and in the same manner as payments are made under subtitle A.

SEC. 124. DEFINITION OF URBANIZED POPULATION.

For purposes of this subtitle, the term "urbanized population", when used in reference to any State, means the population of each area, within such State, which consists of a central city or cities of 50,000 or more inhabitants (and of the surrounding closely settled territory for such city or cities) which is treated as an urbanized area by the Bureau of the Census for general statistical purposes. The data used for determining urbanized population under this section shall be the most recently available data provided by the Bureau of the Census, except that where the Secretary determines that the data so provided are not current enough or are not comprehensive enough to provide for equitable allocations, he may use such additional data (including data based on estimates) as may be provided for in regulations.

On page 38, strike out lines 5 through 14, and insert the following:

(2) $5,300,000,000, in the case of the entitlement period beginning July 1, 1972,

(3) $5,300,000,000, in the case of the entitlement period beginning July 1, 1973,

(4) $5,300,000,000, in the case of the entitlement period beginning July 1, 1974,

(5) $5,450,000,000, in the case of the entitlement period beginning July 1, 1975, and

(6) $2,875,000,000, in the case of the entitlement period beginning July 1, 1976.

On page 63, line 17, strike out "B" and insert "C".

On page 63, line 19, strike out "121" and insert "131".

On page 64, line 12, strike out "122" and insert "132".

On page 66, line 5, strike out "123" and insert "133".

On page 67, line 1, strike out "C" and insert "D".

COST OF REVENUE SHARING BILL

[1] Excluding social services grant.

AMENDMENT NO. 1466

(Ordered to be printed and to lie on the table.)

Mr. HARTKE submitted an amendment intended to be proposed by him to the bill (H.R. 14370) to provide payments to localities for high-priority expenditures, to encourage the States to supplement their revenue sources, and to authorize Federal collection of State individual income taxes.

AMENDMENT NO. 1467

(Ordered to be printed and to lie on the table.)

Mr. TAFT. Mr. President, today I am introducing an amendment to H.R. 14370, the Revenue Sharing Act of 1972, which would provide for Federal Government withholding of city income taxes from compensation paid Federal employees. The amendment would apply to all cities with 200 or more Federal employees, and any other city where the Treasury feels it would be beneficial.

The purpose of the revenue sharing bill is to increase the Federal financial assistance to States, and particularly urban areas, which are hard pressed to make ends meet. This amendment would provide an additional source of income for our cities, without requiring increased Federal funding other than the amount necessary to cover administrative costs.

The increment in local funds would result largely from a reduction in tax delinquencies, and an increase in the cities' ability to collect delinquent taxes from Federal employees. Cleveland's tax department estimates that by reducing losses in uncollected taxes, my amendment could increase the city's resources by $300,000 to $400,000 annually. The city of Cincinnati expects the enactment of the amendment to save its taxpayers about $100,000 per year. Similar savings would, of course, be realized by cities in other States.

To help improve the administration of non-Federal taxation systems, the Revenue Sharing Act of 1972 contains a title authorizing the Federal Government to act as a collection agent for State income taxes. My amendment would make a positive contribution along the same lines. It would decrease the administrative burden for our cities' tax collection departments, by relieving them of the necessity to devote extra attention to Federal workers.

In my own State of Ohio, the cities of Akron, Columbus, and Toledo expect that they could each save between $20,000 and $35,000 annually by trimming administrative costs in this manner.

The cities would benefit greatly from my amendment. The greatest benefits, however, would be realized by the hundreds of thousand of civilian Federal workers affected. Because local income taxes are not withheld from the wages of Federal employees, these workers are forced to pay the taxes in lump sums on a quarterly or annual basis. The obligation to pay a substantial amount in local taxes at one time is a serious hardship for many Federal workers. As of last winter, more than one-third of Cleveland's postal workers had not been able to meet this obligation, and owed the city hundreds of dollars per person in back taxes.

My amendment would allow Federal workers to pay their city taxes in the same convenient manner as other workers, by making the payments in even installments throughout the year.

The major organizations representing groups which my amendment would affect strongly support it. These organizations include the National League of Cities, U.S. Conference of Mayors, the National Postal Union, and other major Federal employees' associations. The Treasury Department has historically supported this type of legislation, and I have been informed that the Department's position has not changed.

I hope that the Senate will seize this opportunity to provide additional assistance for our Federal workers and our cities.

AMENDMENTS NOS. 1469 THROUGH 1472

(Ordered to be printed and to lie on the table.)

Mr. BUCKLEY submitted four amendments intended to be proposed by him to the bill (H.R. 14370), supra.

ADDITIONAL COSPONSOR OF AN AMENDMENT

AMENDMENT NO. 1460

At the request of Mr. TUNNEY, the Senator from New Hampshire (Mr. McINTYRE) was added as a cosponsor of Amendment No. 1460, intended to be proposed to H.R. 14370, an act to provide payment to localities for high-priority expenditures, to encourage the States to supplement their revenue sources, and to authorize Federal collection of State individual income taxes.

NOTICE OF HEARING

Mr. EASTLAND. Mr. President, on behalf of the Committee on the Judiciary, I desire to give notice that a public hearing has been scheduled for Thursday and Friday, September 7 and 8, 1972, at 10:30 a.m., in room 2228, New Senate Office Building, on the bill H.R. 13366, to provide for the payment of losses incurred by domestic growers, manufacturers, packers, and distributors as a result of the barring of the use of cyclamates.

At the indicated time and place persons interested in the hearing may make such representations as may be pertinent.

The subcommittee consists of the Senator from Massachusetts (Mr. KENNEDY) chairman; the Senator from California (Mr. TUNNEY), and the Senator from Nebraska (Mr. HRUSKA).

ADDITIONAL STATEMENTS

OLYMPIC TRAGEDY

Mr. RIBICOFF. Mr. President, the shocking crime now taking place in Munich is more than an outrage against the Olympic games; it is a direct challenge to civilization.

But this is not the first act of barbarism committed by this same group of demented terrorists. Unless all the nations of the world do what is necessary, it will not be the last. Already, it seems, the tragic lesson of the Lod Airport massacre has been forgotten as the current skyjacking conference is deadlocked with political squabbling.

For too long, Arab terrorists have found refuge and welcome in countries like Lebanon, Syria, and Libya, and Algeria.

For too long, Western nations, including West Germany, have succumbed to terrorist blackmail.

For too long Arab murderers and terrorists have been routinely described as "commandos" and "guerrillas."

Those who deliberately ambush school buses, attack innocent air travelers, and plant bombs in supermarkets are not commandos or guerrillas; they are criminals and outlaws.

Those nations which arm them and permit them to operate on their soil share their guilt directly.

And countries which do not take action against those harboring these madmen, and which do not treat these terrorists as criminals only encourage further the acts of outlawry.

According to the latest report from Munich, two members of Israel's Olympic team have been shot dead and nine others are being held hostage. In 1976, it could be members of the American Olympic team, the German team—or the Russian team.

The Olympic games are supposed to represent the brotherhood of man. Instead, we are witnessing the depths to which man can stoop in seeking to impose their perverse will on others.

Whatever the final outcome of the latest assault on innocent civilians, it is clear that we cannot permit these outrages to continue. The only way to stop these outlaws is to deny them safe haven. They must understand that no place on earth will be a refuge for them.

No nation should be permitted to assist these murderers under any pretext. Whether this means denial of landing rights to certain Arab countries or other measures these will be a small price to pay for protecting our civilization from these new barbarians.

I join millions of Americans in praying for the safety of the Israeli hostages, and I plead with all governments, including our own, to immediately take the steps necessary to put a halt to these crimes.

CURRENT U.S. POPULATION

Mr. PACKWOOD. Mr. President, according to current Census Bureau approximations, the total population of the United States as of Friday, September 1, was 209,609,246. This represents an inincrease of 191,207 since August 1 of this year, an increase roughly equivalent to the population of Flint, Mich. It also represents an addition of 1,684,388 since September 1, 1971, an increase roughly equivalent to the population of Dallas, Tex.

THE FOURTH ANNIVERSARY OF THE SOVIET INVASION OF CZECHOSLOVAKIA

Mr. MOSS. Mr. President, the Senate was in recess on August 21, the fourth anniversary of the invasion of Czechoslovakia by the Soviet forces. But I cannot allow this infamous anniversary to pass by unnoticed.

August 21, 1968, is particularly ingrained in my mind because on that date I was in the Soviet Union as a delegate to the Seventh World Power Conference in Moscow. How well do I remember the feelings of emptiness I shared with Czech delegates to that conference. We were all shocked at the Soviet Union's brutal action—an invasion which succeeded in snuffing out the flickering hope of liberal reforms brought about by the Alexander Dubcek government. When I asked one Czech delegate if he would return to his home, he replied simply, "Where is my home now?"

Mr. President, the Soviet Union's terrible aggression may indeed have broken the pace of reforms of the first Czech Government in 32 years to receive popular support, but it did not break the spirit of a freedom-loving people. Even today the Czechs carry on the struggle for independence—a struggle which has a history extending at least 350 years. They tasted the liberties of democracy for a brief 20 years between 1918 and 1938, only to have it stamped out by the tyranny of an insidious Nazi occupation and later Communist control.

What effect has this foreign despotism had on Czechoslovakia? The only East European state to remain an effective parliamentary democracy throughout the period 1918–38, Czechoslovakia was politically defeated when Germany, France, Italy, and the United Kingdom geographically sliced up the country in 1938. Militarily, she was defeated the next year when Germany invaded and established a Nazi "protectorate."

For 6 years Czechs were subject to the control of the Nazi war machine. "Liberation" came in 1945, but it was only short lived. According to "Background Notes," of March 1972, compiled by the U.S. Department of State:

> From May 1945 until the spring elections of 1946, a coalition including Communists ruled the country. The democratic elements, led by President Eduard Benes, hoped the So-

> viet Union would allow Czechoslovakia freedom to choose its own form of government, and they aspired to have Czechoslovakia act as a bridge between East and West. This objective was sustained by Czechoslovakia's highly developed economy, its strong democratic traditions, and its readiness to accept a considerable degree of socialization of the economic system. The Communist Party, however, which won 38 percent of the vote in the 1946 elections, held most of the key positions in the Government and gradually managed to neutralize or silence the anti-Communist forces. Under the cover of superficial legality, the Communists seized power in February in 1948.
>
> After a period of severe purging to consolidate its authority (1949–52) the party held a trial of 14 of its former leaders in November 1952 and sentenced 11 to death. Thereafter, the Czechoslovak Communist leadership was characterized by its stability in tenure.

As a result of the repressive Communist dictatorship, Czechoslovakia's economic system suffered as well. "At the time of the Communist takeover in 1948, Czechoslovakia had a balanced economy, including the highest level of industrialization in Eastern Europe." Under the influence of the Communists, great emphasis was placed on heavy industry and capital goods production—throwing the economy out of balance. Quoting from the "Notes" again:

> Waste and inefficient use of resources resulted from the adaptation of centralized planning techniques to the complex Czechoslovak industrial sector. Although the labor force was traditionally skilled and efficient, inadequate material incentives for labor and management contributed to a high labor turnover, low productivity, and unsatisfactory quality. Economic failures reached a critical stage in 1963 following a poor 1962 harvest, balance-of-payments deficits, material shortages, and construction delays.
>
> Communist Party Central Committee members who were displeased with the slow pace of economic reform and resistance to cultural liberalization showed their displeasure (in the mid-sixties)—with broad support—by removing hardliner Antonin Novotny from party leadership in January 1968 and from the presidency of the Republic in March. A long-time party activist . . . Alexander Dubcek, replaced Novotny as principal party leader.

Dubcek recognized the necessity of political and social reforms in addition to granting wider economic freedoms. Therefore, he launched an action program, adopted in April 1968, which set guidelines for a modern, humanistic-socialist democracy which would guarantee freedom of religion, speech, press, assembly, and travel; separate the government from the Communist Party; create independent courts; introduce multiple-choice, secret-ballot elections; and effect economic reforms. Many hardline government leaders were replaced by reform-minded leaders, who pledged to adhere to the interest of all the people of Czechoslovakia. These fundamental changes were promoted by the newly freed public media, dominated by "progressives."

As a result of Dubcek's efforts to liberalize the country, the public began to take an active interest in government and politics. For the first time in 20 years, a national leader enjoyed broad public support. The government's program called for closer contacts with West European countries and Yugoslavia and Rumania. Czechoslovak citizens were allowed to travel freely and tourists were welcomed in Czechoslovakia.

But these reforms which meant so much to the Czech people caused great concern among other Warsaw Pact Communist governments and parties. They viewed it as a serious threat to the stability and security of their own socio-political and economic systems. And why not? History is replete with examples of how the contagious winds of freedom can inspire men to rise up and throw off the bonds of tyranny.

According to the State Department:

> The Soviet Union, with Bulgaria, Hungary, Poland, and East Germany following suit, insisted on a series of meetings with the Czechoslovak leadership, beginning with a meeting at Dresden, East Germany, in March and concluding with the meetings at Cierna and Bratislava (Czechoslovakia) in late July and early August 1968. At each of these meetings, the Czechoslovaks were asked to explain in detail their internal reforms and their developing foreign policy. Warsaw Pact military maneuvers, held in Czechoslovakia in June, were prolonged at Soviet initiative. These and subsequent maneuvers, in western Ukraine and southern Poland brought large numbers of Soviet troops to Czechoslovakia borders.

Mr. President, the Communists could not tolerate the reform movement in Czechoslovakia. The following passage from the "Background Notes" recounts the terrible course of events set in motion while the Senator from Pennsylvania (Mr. Scott) and I were in Moscow:

> On the night of August 20, Soviet, Bulgarian, Hungarian, Polish and East German troops invaded and occupied Czechoslovakia. The Czechoslovak Government immediately declared that the invading troops had not been invited into the country and that their invasion was in violation of socialist principles, international law, and the United Nations Charter. The principal Czechoslovak leaders, were secretly and forcibly taken to the Soviet Union. Under obvious Soviet duress, the Czechoslovaks engaged in a series of negotiations at Moscow on August 23–26 and again on October 2–3, and finally at Prague on October 16. On the latter date, Soviet Premier Aleksei Kosygen, acting on behalf of all of the invading countries, and Czechoslovak Premier Oldrich Cernik signed a treaty which provided for the "temporary" stationing of an unspecified number of Soviet troops on Czechoslovak soil. In November the troops of the other countries and some of the Soviet troops were withdrawn. In addition to accepting the "legalization" of the stationing of Soviet troops in Czechoslovakia, the Czechoslovak leadership was forced to apply strict censorship of all public media and to curb all the reforms promoted by Dubcek.
>
> The Czechoslovak Central Committee meeting of November 14–16, 1968, formalized the censorship of the public media; restricted travel abroad; reasserted the authority of the police; made Czechoslovak foreign policy subordinate to Soviet policy; accepted the priority of the interest of the international Communist movement over those of Czechoslovakia; and recognized the obligations of the agreements (all signed under duress) reached at Moscow on August 26 and October 3 and at Prague on October 16.
>
> Alexander Dubcek was removed from the position of General Secretary on April 17, 1969. On September 27, he was removed from the Communist Party Presidium and replaced as President of the National Assembly. Dubcek's followers and supporters were forced out of power.
>
> By October 27, 1969, the Soviets had achieved their basic invasion objectives. The Czechoslovak liberalization movement was dismantled; elements of the orthodox Communist Party were back in control; and Soviet troops remained stationed in Czechoslovakia. On that date General Secretary Gustav Husak, Premier Cernik, and President Svododa signed a joint communique with the Soviets at Moscow which justified the invasion, accepted the Brezhnev doctrine limited sovereignty, avowed that the stationing of Soviet troops in Czechoslovakia was essential to the security of Czechoslovakia's western borders, and opened the way for integration of the Czechoslovak economy with that of the Soviet Union. This relationship was further formalized in a 20-year Soviet-Czechoslovak treaty of "friendship, cooperation, and mutual assistance" signed on May 6, 1970.

Mr. President, the Czechoslovak people have struggled for 350 years to rid themselves of a heavy burden inflicted by foreign oppressors. Since the founding of our Republic, America's greatest moments have come when she shared the burden of the oppressed, and strove to alleviate that burden. Now after 25 years of cold war with the Communists, we are attempting to find new solutions to combating evil and oppression and the denial of civil liberties. As we forge forward in this effort, we are acutely aware of the struggle of the people of Czechoslovakia. We do not and cannot forget that struggle. Their freedom and ultimate independence remain a matter of greatest concern to all Americans. We affirm our commitment to their struggle and share their aspirations on this fourth anniversary of the Soviet invasion.

RURAL DEVELOPMENT ACT OF 1972

Mr. CURTIS. Mr. President, as ranking minority member of the Subcommittee on Rural Development of the Committee on Agriculture and Forestry, I was particularly gratified when President Nixon signed the Rural Development Act of 1972 into law on August 25.

Without doubt, this legislation is the most far reaching ever enacted by Congress to attempt to halt the migration from the countryside to our already overcrowded urban centers.

I think it would be good for all Senators to understand what the President thinks about the Rural Development Act of 1972 and what the Nixon administration has already been doing in the area of rural development. Therefore, I ask unanimous consent that there be printed in the Record the text of the President's signing statement and a Department of Agriculture release with regard to the Rural Development Act of 1972.

I also ask that following these two items the text of two releases from the USDA with regard to other rural development activities be printed.

There being no objection, the items were ordered to be printed in the Record, as follows:

Signing Statement—The Rural Development Act of 1972

During the last year and one-half I have on three separate occasions sent to the Congress proposals designed to marshal more effectively the energies of the private sector and of government at all levels in a cooperative program of rural development. The most important of those proposals are:

Rural Community Development Special Revenue Sharing to provide additional financial resources to State and local government without counterproductive Federal strings attached.

The creation of a Department of Community Development to coordinate and focus all Federal programs for rural and urban community development.

New loan authority for commercial, industrial, and community development under a credit-sharing system which would allow the States themselves to select most of the loan recipients. And strengthening certain of the Department of Agriculture's conservation and environmental programs.

The Rural Development Act of 1972 which has finally been enacted by the Congress—H.R. 12931—incorporates some of the important provisions which I originally proposed:

It authorizes new loans for commercial and industrial development in communities whose population is under 50,000 as well as for various local facilities in communities whose population is under 10,000. These new loans represent a major potential for increasing employment opportunities and modernizing our communities in rural areas.

The new loans which it authorizes would be insured and guaranteed, rather than direct, Federal loans. This means that the private sector can play a major role in rural development and that the inflationary impact on the Federal budget will be reduced.

It authorizes new cost-sharing provisions including those related to improving water quality and conserving natural resources which I proposed on February 1 of this year in my message to the Congress on rural development.

And, it includes various improvements in the administrative machinery of the Farmers Home Administration which would facilitate more effective program administration.

The most disconcerting feature of this act is that it does not include one of my most important proposals for rural development, the substitution of Special Revenue Sharing for categorical grants and instead creates a number of new categorical grant programs. That means more decision-making in Washington instead of decentralized decision-making at the State and local level where the pressing needs actually exist. While this act is praiseworthy in providing additional Federal funds for community development, it unfortunately will also bring Federal decision makers into fields of community activity that were previously free from such outside involvement. In addition, this act—if fully funded—would add $400 to $500 million in expenditures to the Federal budget at a time when it has already been overloaded with large spending increases by the Congress this year.

In short, while I would have much preferred that this act contain the provisions which I proposed and reiterated last February, I believe that it probably represents the best compromise which could be enacted by this Congress. Even with the shortcomings I have noted in this act, it is a significant first step in our determination to strengthen economic opportunity and community life through rural America. I do strongly urge, however, that the Congress act quickly and affirmatively on my Government reorganization and Special Revenue Sharing proposals related to rural development. They hold substantially greater promise than this act does for community development in rural and urban areas. Because this act represents an important step—but only the first of several essential steps—I take pleasure in signing it today. But I look forward to early Congressional action on my other proposals which would provide our communities with the tools so desperately needed to attain this Nation's objective of balanced and beneficial growth.

RICHARD NIXON.

A Boost for Rural Opportunity

WASHINGTON, September 1.—The Rural Development Act of 1972 can remake the face of rural America and broaden opportunity for all Americans—urban as well as rural, Earl L. Butz, Secretary of Agriculture, said today.

The Act confers the major responsibility to coordinate rural development on the Department of Agriculture and provides several new authorities that will help to improve rural economic opportunity and community life. "The result should improve rural America, bolster agriculture and help to relieve urban congestion by reducing migration from farms to city and by encouraging a more balanced national growth," Mr. Butz said.

Highlights of the new legislation include:

1. It authorizes guaranteeing and making loans for commercial, industrial, and community development. Private banks and other lenders could make government guaranteed loans to finance rural job creation.
2. It authorizes substitution of insured for direct loans. This would permit private lenders to assume an increased role in financing rural development and reduce the impact on the Federal Budget of such programs.
3. It authorizes loans to rural youth, and increases the limit for farm operating loans from $35,000 to $50,000.
4. It provides for a number of improvements in the administrative machinery of the Farmers Home Administration which will result in more effective program administration.
5. It authorizes cost sharing in watershed project areas for water quality improvement, water supply, pollution abatement, and ground water recharge. Similar authority along with rural fire protection is provided for Resource Conservation and Development areas.
6. It provides for a program to inventory and monitor soil, water, and related conditions, and a land inventory report at five-year intervals.
7. Funds are provided to expand rural development and small farm research and extension activities through the Land-Grant Colleges and Universities.
8. It provides annual authorizations for pollution abatement grants of $25 million to be made to individuals and an additional $50 million to communities.
9. It authorizes a three-year grant program for rural fire protection of $7 million annually.
10. It provides an increase in the annual sewer and water grant authorizations to $30 million for planning grants and to $300 million for development grants.
11. It authorizes ten-year cost share contracts under the Rural Environmental Assistance Program, and provides for cost sharing under this program for pollution abatement practices.

Mr. Butz said the Department will cooperate with all other governmental agencies and the private sector to find the best possible means to implement the legislation and to exploit its full potential to the advantage of rural residents and rural communities.

The Secretary said considerable planning and advance work must be done to implement and coordinate this legislation with ongoing programs. This planning which is already underway will require several weeks more. Furthermore, congressional appropriations may be necessary to implement certain of the newly authorized programs.

USDA Expands Rural Development Work

WASHINGTON, September 5.—Employees of the U.S. Department of Agriculture and State Cooperative Extension Service devoted 34 percent more time to rural development activities in fiscal year 1972, and helped local leaders organize more than 150 new rural development committees.

In a report to Congress, the Department stated that USDA and Extension employees devoted 4,300 man-years to efforts to stimulate progress in rural America from July 1, 1971 to June 30, 1972, compared to 3,200 man-years the previous fiscal year.

The report said 51 new area or multicounty rural development committees were formed, bringing the number of area committees in the nation to 235, and that more than 100 new county committees were formed, pushing the national total to 2,193.

Much of the report is devoted to accomplishments of specific State and local rural development committees.

For instance, government agencies and church groups helped set up a self-help housing program in a Maryland county where housing was poor and rents were high. The program enabled low-income people to occupy modern homes for up to $10,000 less than they would cost commercially. Cooperation and self-help construction reduced costs.

Another cooperative effort was a three-county area of Missouri in need of a hospital. Local citizens raised more than $300,000, civic clubs and local governments supported the project. Location of the adequately-financed hospital has been decided.

Alabama county committees actively pursued industrial development. The Extension Service studied the chances for more lumber finishing in one area. This contributed to a half-million dollar expansion of a wood products firm in the study area.

The report, transmitted to Congress by Secretary of Agriculture Earl L. Butz, said that rural development must advance on several fronts if it is to succeed.

"This third annual report to the Congress . . . reflects USDA's determination to help local leaders push development ahead," the report stated. "The USDA efforts in broad program thrust areas are aimed at making rural America a better place to live and work," the report said.

Single copies of "Rural Development—Information and Technical Assistance Delivered by the Department of Agriculture in Fiscal Year 1972" are available free upon postcard request to the Office of Information, U.S. Department of Agriculture, Washington, D.C. 20250.

HUD-Agriculture Program Speeds Formation of Rural Planning Programs

WASHINGTON, September 1.—A report issued jointly today by the U.S. Department of Agriculture and the U.S. Department of Housing and Urban Development points to a sharp increase in fiscal year (FY) 1972 over previous years in assistance from both for comprehensive rural development planning by local multicounty organizations.

HUD provided $7.7 million for 260 nonmetropolitan planning districts in FY 1972 compared with $3.4 million for 155 districts in the preceding year, according to the report, submitted to Congress today.

USDA field staffs also increased by 25 percent their technical services for land use planning, housing studies, community facilities planning, citizen participation, and other elements of district planning programs. The Department contributed approximately 316 man-years of such services in FY 1972.

"In cooperation with the Federal Government, the States are now actively seeking better methods to improve planning and management at the local government level and to insure that planning will influence government decisionmaking and area development initiatives," Secretary of Agriculture Earl L. Butz and Secretary of Housing and Urban Development George W. Romney said in sending the report to Congress.

The Housing and Urban Development Act of 1968 authorized USDA and HUD assistance to States for support of nonmetropolitan district planning programs. The Agricultural Act of 1970 requires an annual report on this activity, as well as other USDA and Federal services and programs for rural areas.

The report, issued today, is third in an annual series and is entitled "Financial and Technical Assistance Provided by the Department of Agriculture and the Department of Housing and Urban Development for Nonmetropolitan Planning Districts in Fiscal Year 1972."

Copies may be obtained through Office of Information, USDA, Washington, D.C. 20250 or the New Services Division, Office of Public Affairs, Department of Housing and Urban Development, Washington, D.C. 20410.

THE EXPORT-IMPORT BANK

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the Record a statement by the distinguished Senator from Alabama (Mr. Sparkman).

The PRESIDING OFFICER. Without objection, it is so ordered.

Statement by Senator Sparkman

On June 11, the Senator from Wisconsin (Mr. Proxmire), Chairman of the Joint Economic Committee, issued a committee report and included in it "a study" entitled "Export Credit Subsidies and U.S. Exports: An Analysis of the U.S. Eximbank," by Professor Douglas R. Bohi of Southern Illinois University.

While the report was issued as a committee report, I knew nothing about it, had not seen it, and certainly did not agree with the conclusions reached. As a matter of fact, I consider the report as being faulty in that it was based on certain premises that simply are not correct.

I was greatly disturbed when I learned that the report presumed to represent the thinking of the full Committee.

I have long regarded the Export-Import Bank as having probably the greatest potential for stimulating export trade by American manufacturers, farmers, and producers of every kind. I have followed its work over the past several years and have been pleased to be able to put through an Act that greatly expanded its possibilities. Very soon, I believe, a report will be issued by Mr. Henry Kearns, President of the Bank, and by his colleagues on the Board. This report, I am confident, will give us a picture of the tremendous job that the Bank has been doing under its new powers. Mr. Kearns and his Board are entitled to the highest commendation for what they have done.

It seems to me rather odd that the Export-Import Bank should be dealt with and criticized as making "subsidized loans." I think that placing these loans in that category is stretching the definition of "subsidized." Actually, the Export-Import Bank makes a profit.

A very fine and objective study of the Export-Import Bank was made by Dr. Howard Piquet, whom many of us recall as being with the Legislative Reference Service for more than 20 years. He is a well-known economist, and is respected internationally.

Other members of the Joint Economic Committee, I know, were likewise surprised and disappointed that the report, which we feel does not correctly represent the majority of the Joint Economic Committee, has been issued in its name.

The study Dr. Piquet made is available. If Senators would like to have a copy, I shall be glad to send a copy to each one requesting it. Excerpts from Dr. Piquet's report were placed in the Congressional Record by Senator Javits on August 17, pages 28703–05. Likewise, I call attention to the statements by Senator Fong and Senator Tower on the same date, page 28705.

BOMBING OF DIKES IN NORTH VIETNAM

Mr. BAKER. Mr. President, much has been written and said recently about the so-called intentional destruction of dikes in North Vietnam by American bombs. If such a policy were, in fact, deliberate or intentional, then it would, indeed, deserve the attention it has drawn, but deliberate it is not.

On June 29, the President was asked in a news conference about reports that the United States was intentionally bombing dikes. He responded that orders were out not to hit dikes because the "results in terms of civil casualties would be extraordinary."

There is not a shadow of a doubt in my mind that this is the policy being scrupulously followed by our pilots, and I am further convinced that any damage done to dikes that was either filmed or shown to visitors was either accidental or a result of knocking out war installations strategically placed on or near North Vietnamese dikes.

Mr. Joseph Treaster recently spent several days on board the U.S.S. *Saratoga* speaking with some of the American pilots who fly the raids over North Vietnam and filed the following story printed on the front page of the New York Times of August 12.

I ask unanimous consent that Mr. Treaster's article be printed in the Record.

There being no objection, the article was ordered to be printed in the Record, as follows:

Dike Bombing Denied by U.S. Carrier Pilots

(By Joseph B. Treaster)

Aboard U.S.S. "Saratoga" in the Gulf of Tonkin, Aug. 8.—The pilots aboard this aircraft carrier swear that they have never tried to bomb the dikes of North Vietnam and they say they are hurt and irritated that so many Americans at home do not seem to believe them.

The pilots are troubled, too, they say, that some Americans apparently think they are deliberately bombing other civilian targets like schools and hospitals and residential areas.

"The thing that hurts us," said Comdr. Richard Bardone of Pittsburgh, the stocky, curly-haired leader of the pilots on this ship, "is that we make every effort to avoid the dikes. We do not, absolutely not, go after dikes."

Lieut. Comdr. Lew Dunton's eyes flashed, "There are a lot of prisoners in the Hanoi Hilton," he said, "because they were shot down trying to avoid civilian targets. It really galls me."

The pilots and their senior officers scoff at the foreign visitors to North Vietnam who have been quoted as saying they have seen dikes damaged by bombs and that they believed the United States had "deliberately tried to destroy the dikes."

The airmen argue that only isolated damage has been reported—the kind that might likely result from an accident—and they say none of the visitors so far appears to have been qualified to determine whether the damage was done by bombs or other explosives.

"The absurd part about it," one senior officer said, "is that somebody comes up with a hole in a dike and he translates that as meaning we're going after the dikes."

"If we were hitting the dikes with malice or aforethought," the officer continued, "we could clean all of them out in a week without many bombs."

The dikes, the pilots say, are not in well-defended areas and "they'd be a piece of cake."

It seems important to the pilots that they be believed. They put their lives on the line every day and they stand together under an old-fashioned code of military honor. They see themselves as patriots in the service of their country and their President. They would like to have been respected and appreciated. Now they will settle for being believed.

They insist that the President has proscribed the dikes as targets and that they have sometimes increased the risk to themselves to comply with his orders.

An insight into the minds of the pilots came from one senior air officer who said, "Probably the best reason for not hitting the dikes is the fact that the President of the United States has advertised to the whole world that were not hitting the dikes, and we don't want to make a liar out of him."

Not only are the pilots under standing orders not to bomb the dikes, they say, but before each mission they are specifically told again to stay away from them.

During prestrike briefings the pilots say they pore over detailed maps and reconnaisance photographs. Dikes and other "no-no's"—hospitals, churches, clusters of homes and P.O.W. camps, for example—are pointed out and the paths for approaching and departing the targets are planned so as to minimize "collateral" damage.

In some instances, the pilots say, the North Vietnamese have incorporated into the dike system roads, gun positions and missile sites which the United States generally regard as fair game. But, the pilots say, these targets are "off limits" when they are on a dike.

Still, Bardone concedes, "there can be mistakes, especially in a hot environment—where there is heavy antiaircraft fire."

"There is a possibility of a dike being hit," he said. "But I think this is very remote. If it did happen it would be purely accidental."

One pilot on the Saratoga is said to have reported that he accidently bombed a dike, but reconnaissance photographs showed no damage.

Discussing the effect of the bombing on the civilian population of North Vietnam, Commander Bardone said, "most of the targets are isolated, but some are near the civilian population. There is a tremendous amount of secondary explosions and there is debris. There is a lot of overflow and I'm sure this gets over into the populated areas.

"I can't say absolutely that we do not put bombs outside the target area," he continued, "if we put a bomb a couple of hundred feet away from the target it might get into civilian areas. But I'd say 99 per cent of the time it's debris overflow that gets into the civilian areas."

The pilots say that the so-called "smart bombs" that are guided by laser beams and television have greatly reduced the margin of error in bombing. But, they add, even the smart bombs sometimes go astray.

It is routine procedure for pilots under attack by enemy planes to jettison their bombs so they can pick-up speed. These bombs are not armed and are not supposed to explode when they land, but since they weigh several hundred pounds they may have damaging impact.

Another danger to the civilian population, the pilots say, is debris and flak from North Vietnamese antiaircraft guns and missiles. "It all has to come down," said Commander Dunton, who is from Melrose, Mass. "and sometimes it comes down on their heads."

At least once foreign diplomats in Hanoi have said that damage attributed by the North Vietnamese to American planes had actually been caused by Communist missiles.

Citing an example of the official concern for civilian casualties, one senior officer said that before the first big raid this year in the Hanoi-Haiphong area, the attack plan was routinely reviewed in Washington and "they knocked off some targets—some damn fine targets, because they were too close to civilians."

Lieut. Comdr. Grady Jackson, a bombardier-navigator from Indianapolis, said that he and his pilot turned back from a target in the vicinity of Haiphong a few weeks ago because they felt it was too close to civilians.

The pilots know, though, that no matter how painstaking they are, some civilians are likely to be killed.

"Let's face it," said Commander Dutton, who is a boyish-looking 32, "some of the military targets are probably manned by civilians. If you rolled in on the Boston navy shipyard there'd be a lot of civilians hurt. But they are working for the Government war effort. We don't go after those people in their suburban homes and supermarkets."

RETIREMENT OF GORDON F. HARRISON, STAFF DIRECTOR, COMMITTEE ON RULES AND ADMINISTRATION

Mr. McCLELLAN. Mr. President, Gordon F. Harrison recently retired as staff director of the Senate Committee on Rules and Administration after more than 17 years of outstanding service in this important post.

Gordon Harrison served under five chairmen and compiled an outstanding record of achievement—a record that was the capstone of 35 years of faithful and fruitful public service. He served with courage as an officer on the U.S.S. *Franklin* when she was crippled during World War II; with distinction as an attorney in the civil division of the Department of Justice and with integrity and skill as a Senate staff member.

As staff director of the Committee on Rules and Administration, Gordon Harrison was a professional in the finest sense of the word. The test of this is the fact that he is known not only to the members of the committee for which he worked, but to every Member of this great body.

He has served them truly and well. He knows every facet of the Senate and its work and has devoted his considerable knowledge and energy to advising and assisting Members and staff in dealing with questions of law, practice, and procedure that faced them.

Despite his heavy responsibilities, he was always ready to offer advice and help—and not merely with the attitude of a person fulfilling a responsibility—but with the sympathy and courtesy of a friend.

I am certain, Mr. President, that I speak with the full support of the Senate when I salute Gordon Harrison on the occasion of his retirement and wish him many more happy years.

OLYMPIC TRAGEDY

Mr. BOGGS. Mr. President, like many other Senators, I was shocked to learn of the murder of two members of the Israeli Olympic team by Arab guerrillas this morning. I deplore this appalling incident, and I call upon the Arab countries to take whatever action is required to bring an end to the activities of these terrorists.

Their disregard for innocent human life is contrary to the humanitarian principles and the laws of all nations. It must be stopped.

The latest incident of Arab terrorism against Israelis is all the more distressing because it has taken place in the midst of one of man's greatest cooperative ventures. The Olympic spirit of friendly competition and mutual respect has been marred by the hatred of a small band of Arab commandos.

While we pray for the release of the Israeli hostages unharmed, let us resolve to do everything in our power to insure that such an outrage does not happen again.

OUTDOOR RECREATION ON OUR PUBLIC LANDS

Mr. MOSS. Mr. President, a new dimension is developing in outdoor recreation. It is the "open space" dimension—the idea of using open space for whatever recreational opportunity it affords wherever it can be found.

Traditionally we have thought of outdoor recreation as associated with mountains, forests, and water. But in many parts of the country we do not have enough of any of them to meet the explosive demands of our outdoor-hungry, mobile, leisure-timed citizens. Particularly, we do not have enough access roads to those areas which have special attractiveness to allow all of those who seek their recreational benefits to reach them.

So people are looking for an outdoors experience wherever they can find it, and in the Western part of the United States they are finding it more and more often on some of the plains and deserts administered by the Bureau of Land Management. The Bureau is involved in a growing recreation business.

Some 68 million acres of the public land which the Bureau administers are within 120 miles of 16 major urban areas. Much of this land is easily accessible to city dwellers who seek an evening or a weekend away from the tension and pollution that characterizes city life today.

Once they reach the area that is their recreation objective, they are not entirely dependent upon engineered roads. Modern technology has made the lands immediately accessible by the use of a sand buggy, or any other four-wheel drive vehicle—or even just a motorcycle. The normal harshness and aridity and natural restraints of the land are easily overcome. People can roam or explore at will.

The recreationist merely needs to carry his own water, food, and shelter, and he is free from the restraints of city life for a weekend—or a week. Millions of Americans are using our public lands for camping, picnicking, horseback riding, hiking, hunting, fishing, water sports, vehicle competitions, rockhounding and artifact collecting.

Currently, conflicts are building up with this growing use of our public lands for outdoor recreation. Conservation and environmental groups are extremely concerned about natural values of the land which are destroyed by indiscriminate criss-crossings by off-the-road vehicles. There is strong nationwide sentiment for some sort of control of the ORV's. The Bureau of Land Management has drafted regulations to protect natural resources, promote public safety, and minimize use conflicts. These conflicts must be settled, as must the abuse of streams, the scattering of litter, the danger of wild fires, and the other problems which arise from the increasing use of land where there are no sanitary or other types of facilities. And the Congress must consider these problems more carefully in future Bureau of Land Management budget discussions. It may be necessary to give the Bureau some new authorities. But the important thing is that a management program is emerging, and we are aware of our problems and are working toward solutions of them.

A new management plan for the 98-square-mile Little Sahara Dunes Recreation Area in Utah was recently announced by Mr. Robert D. Neilsen, State director of the Bureau of Land Management. The Dunes Area, which is visited by about 100,000 persons each year, is located south and west of Salt Lake City near Eureka, Utah.

A 62-square-mile area within the Dunes is being designated for off-road vehicle use, including Sand Mountain in the southern portion which provides some of the finest competitive hill climbing in the West.

Another section, where dunes provide the best opportunity for sand play, will be off limits to vehicles as a safety measure, as will an area which is ecologically unique which will be designated as the Rockwell Natural Area.

Picnic and campsites with water and sanitary facilities are planned for the north end of the large sand play area, as well as for the sand play area in the southeast portion, and in the center of the site at a point available to both sand play and off-the-road vehicle areas. Facilities are planned for parking, equipment unloading, and sanitation. Some access roads will be constructed to these sites.

Livestock grazing will be allowed to continue and mineral leasing will continue subject to special surface protecting conditions.

I consider the establishment of the Little Sahara Recreation Area in Utah as a great recreational development in the State, and I am hopeful other such developments will follow.

The Bureau of Land Management should be encouraged in this undertaking, and in the many other outdoor recreational programs it is pursuing—its identification and management of primitive areas, of research natural areas, of national conservation areas, and of other designated recreational lands. We need to seek out and develop all areas which have recreational potential in this land. Our existing outdoor recreational facilities of all types are seriously overcrowded.

TERRORISM AT THE OLYMPIC GAMES

Mr. TAFT. Mr. President, even as we discuss here in the Senate, Arab terrorists, calling themselves the Black September Group, have killed two Israelis and are holding others hostage at the Olympic games in Munich. The world is now witnessing on live television coverage an act of unbelievable criminality which is an outrage to all civilized people.

Those who would turn the Olympic games into a spectacle of blood and savagery undermine the very cause which they purport to espouse. Kidnaping and killing do not advance the Arab cause. Kidnaping and killing bring shame, not honor, to the nations which are the homelands of these terrorists. Killing does not advance the cause of religion. Terrorism does not advance the cause of Arab nationalism, and I believe that the Middle East leaders know it. Now is their time to show it. I call upon President Sadat and other Arab leaders to personally convey their outrage to these terrorists. They should do so, not next week, not tomorrow, but this afternoon, while these blood-thirsty terrorists still hold their innocent victims. If Egypt and the Arab States seek a responsible settlement of the problems of the Middle East, this is their hour to demonstrate their concern.

This is blood that can stain the Middle East. This is an hour for statesmanship and an hour for humanity. The Arab leaders, the guerrilla leaders, and their sponsors including the U.S.S.R., must actively demonstrate that the cause of humanity, the cause of peace, and the cause of civilization, are more important than the desire of a few demented terrorists to bring bloodshed and misery to the Jewish people. If they will do so, it can set a pattern to bring a halt to the continuation of repression of the Jews and light a new spark of hope for human freedom and decency under international sanction.

CENTER FOR APPLIED RESEARCH IN THE APOSTOLATE CONTRIBUTES TO BALANCED URBAN-RURAL GROWTH

Mr. HUMPHREY. Mr. President, 67 million people live in nonmetropolitan America, outside of the cities, suburbs, and the urban fringe. Of these, 20 million live in towns of 1,000 to 10,000 populations, and 47 million live in smaller towns or strictly rural areas.

Athough economic, social, educational, and religious characteristics of rural areas vary considerably from region to region, the phenomenon of rapid social change is common to all. This change has resulted from shifts in the economic basis of the population including the decline of the family farm and the rise of rural industry, and from the technological revolutions in transportation, mass media, and so forth, which have greatly altered the traditional rural patterns of social communication.

The resulting breakdown in small-town human, social, and religious values presents a challenge to all our institutions, incuding our churches. Our churches are well aware that they are not called upon to uphold some historical ideal of rural romanticism, but to redeem and reform change, by inserting ultimate religious meaning into the new town and country way of life.

Foremost among the research organizations helping our churches focus on the question of balanced urban-rural growth is the Washington-based CARA—the Center for Applied Research in the Apostolate—the nonprofit, independent but church-related research center founded in 1965 by Catholic church leaders and organizations. CARA's Town and Country Department, which handles the center's nonmetropolitan programs, was founded and is still supported by the vision of the Glenmary Fathers, whose chief concern is the welfare of rural America. The Department's program, directed by the Reverend Bernard Quinn, D., Mass., is largely ecumenical and interfaith in nature as attested by the fact that Father Quinn is also coordinator of the research council of CORA—the Council on Religion in Appalachia.

Because of the major contribution which CARA's nonmetropolitan department is making to our understanding of rural America, I ask unanimous consent to have printed in the RECORD information from Origins—NC Documentary Service and a recent list of the publications from CARA's Town and Country Department. As chairman of the Senate's Rural Development Subcommittee, I believe that the outstanding work of CARA's research program will be of interest to all those interested in the question of rural change and development.

There being no objection, the information was ordered to be printed in the RECORD, as follows:

THE CHURCH IN RURAL AND SMALL TOWN AMERICA—MINISTERING TO THE HEARTLAND

Americans may be flocking to the cities, suburbs and the so-called urban fringe in ever-increasing numbers, but a still sizable segment of our population makes its home in the small towns and rural regions celebrated in our national folklore. In fact, say 1960 figures, 67 million Americans live in non-metropolitan America where tradition has it, human and religious values are best realized. If this was ever really so, church observers today say it is no longer true. The traditional small town religious values are breaking down they say—a consequence of rapid social change. As old patterns disappear and new ways of living emerge, the Church must seek new forms of ministry to serve them. In town and country America, argues the text below, a re-evaluation of the Church's role is demanded as well as the shaping of a ministry that meets the specialized needs of the countryside. The following section on rural ministries was prepared with the help of the town and country department of the Center for Applied Research in the Apostolate (CARA), and features its materials. In the text below, an excerpt from an outline of CARA's town and country research program, the case for a rural ministry is examined. It it followed by questions for a rural ministry taken from the same text.

Sixty-seven million people live in nonmetropolitan America, outside of cities, suburbs, and the urban fringe. Of these twenty million live in towns of 1,000 to 10,000 population, and forty-seven million live in smaller towns or strictly rural areas.—(1960 Census, v. 1–A, p. 1:11.) CARA's interest in town and country research arises from the conviction that the Church's ministry to such a large segment of population is both an important aspect of the over-all American apostolate, and that it presents specialized problems and challenges.

RAPID CHANGE IN TOWN AND COUNTRY

Although economic, social, educational, and religious characteristics of rural areas vary considerably from region to region, the phenomenon of rapid social change is common to all. This change has resulted partly from a shift in the economic basis of population (the decline of agriculture and the rise of rural industry), and partly from the technological revolution (transportation, mass media, etc.), which has greatly altered the traditional rural patterns of social communication.

The change-process in town and country is closely related to the over-all urbanization of American culture, although it would be an over-simplification to explain it entirely on this basis. As Dr. Shirley Green has observed:

> The American culture, (some) would say has become an "urbanized culture" and the problem of the church in town and country is simply this: that it is now belatedly beginning to recognize this fact and the recognition has thrown it into a state of shock. Sometimes I wish I could accept so simple a diagnosis. In my opinion, this over-simplified analysis of the cultural situation reflects a form of "urban fundamentalism" which can only be compared in its blindness to some of the follies of "agrarian fundamentalism" of which some of us in the rural movement have been guilty in times past. The actual facts are much more complex and pluralistic than this urbanization thesis assumes. (The Church and Culture in Crisis in Town and Country [United Church of Christ,] 1964, p. 54.)

This implies that, although town and country problems cannot realistically be considered in isolation from the over-all problem of American urbanization, very real differences requiring specialized attentions will continue to exist and cannot be ignored. The "agrarian fundamentalism" mentioned by Green can be described as the conviction that human and religious values are somehow best realized in a rural atmosphere. As Max Lerner puts it:

> The phrase "small town" has come itself to carry a double layer of meaning at once sentimental and condescending. There is still a belief that democracy is more idyllic at the "grass roots," that the business spirit is purer, that the middle class is more intensely middling. There is also a feeling that by the fact of being small the small town somehow escapes the corruptions of life in the city and the dominant contagions that infest the more glittering places. History, geography, and economics gave each American town some distinctive traits of style that are imbedded in the mind, and the memory of this style is all more marked because of the nostalgia felt, in a largely urban America, for what seems the lost serenity of small-town childhoods. (*America as a Civilization,* Simon and Schuster, 1957, p. 151.)

The reality of social change has now forced perceptive rural leaders to abandon this ideology and image. The new image is still in the process of development; and this creates very special problems for the Church and religion.

In the past, religious values and rural values were considered to have special affinity, and the Church in the small town was considered a "last stronghold against urban paganism." Yet according to the studies of Victor Obenhaus, Arthur Vidich, William Ashdown and others, this hypothesis can no longer be sustained. The evident breakdown of the traditional small town religious values is to be explained partly on the basis of the decline in the "agrarian fundamentalism" with which these values were intertwined, and partly from the secularization process at work in the rest of American life—both factors occasioned by the rapidity of social change.

THE CHURCH'S ROLE

This breakdown in small town values presents a challenge to the Church, because the Church is called upon to redeem and reform this change-process, by inserting ultimate Christian meaning into the newly-emerging town and country way of life. This means that the Church must seek deeper insight into the Christian message and mission as it applies to rural America, must provide the ministry of Word and Sacrament where this is lacking, and make it more effective where it already exists. The Church must examine its own organizational structure so that its ministry becomes truly available and acceptable to every person and within every institution that forms the fabric of rural life. Means of ecumenical cooperation must be sought, in an effort to strengthen the over all Christian witness. A deeper understanding must be achieved about the attitudes, values, social structures, and regional differences which affect people's religious development. And finally, there must be careful and controlled experimentation, in an effort to discover creative new approaches to today's needs.

QUESTIONS FOR A RURAL MINISTRY

1. What is the over-all situation in town and country?

2. What is the religious situation in town and country?

3. What is the past and present response of the Catholic Church to the challenge of town and country? What means is the Church taking to fulfill its responsibility in rural areas, in light of the importance of the town and country apostolate in the over-all mission of the Church?

4. What "philosophy of life" should be developed, to replace the old "agrarian fundamentalism" as the basis for the newly emerging town and country way of life? How can this philosophy be related to solid Christian principles, in order to serve as vehicle for an expression of the Church's catholicity in these areas?

5. In an ecumenical era, what is the theological basis for specifically Catholic witness in areas characterized by Christian pluralism?

6. What are the hierarchical, priestly, religious, and lay roles in the Church's religious and social ministry in town and country?

7. What adaptations in institutional Church structures will be needed in order to serve the changing town and country more effectively?

8. What approach should the Church use in working with the evangelical branch of Protestantism in rural areas?

9. How can the Church achieve ecumenical cooperation with main-line Protestant groups in town and country?

10. What approach should the Church take in working with the so-called "sect religions?"

THE PARISH: GOALS AND PURPOSES

How can the parish apostolate itself be adapted to provide certain types of specialized ministries—such as religious education, counseling and community service—that people in rural areas are coming to expect? At the heart of the problem, according to Rev. Bernard Quinn, director of CARA's town and country program, lies the struggle to define the purpose of the parish today. The parish needs to discover what elements of the Church's over-all mission it can carry out in a highly specialized society like our own, and to concentrate on doing them well. Further, it needs to know what it cannot do, he says, so that instead of feeling threatened, it can encourage the formation of new forms and structures that can. In the excerpt below of his study "Towards a Job Description for the Non-Metropolitan Catholic Parish," Father Quinn lists some of the things he thinks the parish can and should do.

As a local religious organization with residential territorial boundaries, the non-metropolitan parish is in a position to participate in the Church's over-all mission in the following ways:

1. In an age of specialization, it can provide an 'integralist' ministry, a service to the whole man as a total person, in response to those generalized, basic, and elementary spiritual needs that each man has in common with every other. Specialized needs will have to be met at other levels.

2. Its ministry can be directed primarily to persons-as-individuals, in the private dimension of life, rather than to the task of Christianizing the social order. Consequently, the parish must have a 'personal' rather than a 'bureaucratic' flavor, at the same time avoiding the character of an exclusive club.

3. As an organization, the parish can be 'available' to those who seek its ministry, whether they reside within its boundaries or come from the outside. At the same time it can assume responsibility for 'initiative' in seeking out and serving each individual who 'resides' within its boundaries. Thus the Church will have at least one way of making sure that someone is repsonsible for everyone.

4. Its ministry can include both Christian nurture, and evangelistic outreach to the unchurched.

5. As a 'net' structure, containing both good and bad fish, the parish can serve both as a point of focus for the spiritual good of the relatively uncommitted, and as a setting within which the committed can express a higher Christian dedication. As a 'net' structure the parish itself cannot expect to be found at the cutting edge of Christian mission.

6. The parish can be an organization that looks outward as well as inward, and rejoices to have a generous amount of its financial and human resources dedicated to the Church's mission in the world beyond its boundaries.

In this particular job description, the parish is located within the Church's over-all mission, as one important structure among many. In the post-medieval world the parish cannot be "all things to all men," can no longer serve as the Church's all-purpose organization. By consciously divesting itself of certain functions carried in the past but inappropriate to the present, it can be "some things to all men." In today's non-metropolitan world, the parish can remain a vital force as long as it concentrates on doing these "some things" exceedingly well.

FROM THEORY TO PRACTICE: PLANNING AND EXPERIMENTATION

Up to this point an attempt has been made to rough out a tentative job description for today's non-metropolitan parish. Some of the working assumptions underlying the parish's daily operations have been challenged—working assumptions that often are encumbered by unrealistic expectations left-over from a previous age. And at the same time, a matrix has been suggested, within which a modern parish might be able to articulate a new sense of purpose.

Such theoretical speculation can be useful only if skillfully reduced to practice. And in fact, speculation may even be harmful, if practical applications are not made skillfully *enough*.

What is needed here, it seems to me, can be summed up under the rubric of 'planning and experimentation.'

By planning, I mean a conscious process of discovering goals, setting concrete objectives, and devising means of achieving them.

The key word here is 'conscious.' Planning involves an effort to articulate and define goals, objectives, and methods. Conscious planning can be done even in a parish setting, as Lyle Schaller amply demonstrates in the first two chapters of his book, *The Local Church Looks to the Future*. (Schaller also offers much practical advice on methods of involving the entire congregation in the parish planning process.)

The first phase of planning is to articulate general over-all goals; in other words, to define the parish purpose. The present paper has been concerned primarily with certain aspects of this task.

The more crucial phase of planning comes in the effort to translate *purpose* into *objectives*; in other words, to set definite priorities which can serve to balance the various aspects of mission over and against each other. For example, questions like these need to be asked:

1. What percentage of time, effort and resources needs to be devoted to the *nurture* aspect of ministry (congregational care), and what percentage to evangelical *outreach* to the unchurched? Thirty percent to nurture and ten percent to outreach? Seventy-five to nurture and five to outreach? Twenty percent to each?

2. How much effort needs to go into ministry of the Word (catechetics, adult education, and the like), and how much into Worship?

3. What emphasis should be placed on *institutional care*, (administration, finance, and supporting services)? What proportion of finances should be devoted to parish concerns and what proportion to ministries structured outside the parish, and to home or world missions? Fifty percent inside and fifty outside the parish? A percentage of seventy to thirty? Or, perhaps, ninety to ten?

The effort to discover *present* priorities in terms of percentage of time, effort, and funds expended, is salutory. By unmercifully uncovering the parish working assumptions, this effort reveals where the *real* parish priorities lie. It can also lead to adjustment of priorities more in line with what the Church professes its mission in the world to be.

Even after articulating the parish purpose, however, and readjusting its priorities, the task remains of translating these priorities into creative approaches to apostolic action. Some of these approaches will be new; others will represent new ways of doing old things. This is the level of planning where creative ingenuity and imagination come into play, and where the experience of other parishes can be helpful in generating practical ideas for action.

Here the parish enters the area of experimentation, a concept that bears the weight in today's Church, of both favorable and unfavorable connotations. A friend of mine, for example, has defined experimentation as "moseying around like an old cow looking for greener grass." Experimentation can also be a responsible process, whereby the parish, working within a well-defined sense of purpose, and in accordance with definite priorities, seeks to discover new approaches, in a context of calculated risk, which neither denies the possibility of failure nor fears to launch out into the deep.

The territorial parish as an organization has a long history in the Church. Many feel that it is obsolete today. But others feel that—properly renewed—it has a vital contribution to make to today's Church. Perhaps, as has been suggested here, the planning process, involving as it does a concern for purpose, priorities, and experimentation, will be able to help make the task of parish renewal into a hundred-year project instead of a two-hundred-year one. Anyway, there is not a moment to lose.

IN CONTEXT/A CASE HISTORY: A SMALL SOUTHERN TOWN

In the preceding text, it was said that the parish could no longer serve as the "Church's all-purpose organization," but that by divesting some of the functions carried over from its past that are inappropriate to the present, "it can be 'some things to all men,'" and serve well. In the case history below, compiled and written by Father Norman Choate, CARA'S town and country research associate, we see what happened in a small rural parish in the South where Catholics are a minority, when the priests' attempts to serve the community-at-large were caught in a crossfire between the parishoners' expectations and the townspeople's response. The text below is excerpted from Father Choate's report, "Experiments in Town and Country Ministry: Three Case Studies." All names of persons and places in the study are pseudonyms.

Not so very long ago it seemed that the most pressing need was to keep the people close to the church and the parish—a preoccupation that was not without wisdom. In the early years the Catholic Church's concern for its own survival greatly influenced the way in which the priest defined his role. Serving the needs of a large urban parish left him little energy for services to the community. Neither was there much leisure for speculation on the injustices in our midst.

Now that the church is relatively well-established, clergymen are finding that the demands of their calling have undergone radical change. There is great contemporary concern for the poor; but it is generally not the parishioners who are poor. The devices employed by the church in its early years and from which so much of its strength was drawn are simply no longer necessary. It is not uncommon for the St. Vincent de Paul Society, a parish organization founded to feed and clothe the needy, to come to the realization that there are few parishioners who really need their help.

Furthermore, the people of this country are on the move. There is hardly a place where one will not hear pastors speaking of that mobility as a problem. As whites move out of the central cities, leaving the minorities behind, the church in the city is confronted with the need to define the locus of its responsibility. Who will be served—those who stay, who are often not members of the church at all? Or will it be those who go—those whom the church defines as its members and who constitute the community of Christians about which so much is said and written?

In the suburbs, where so many of those leaving the central cities settle, the problems facing the priest are different. Suburban parishes, because they are composed of people who, having moved once, are likely to move again, face all the problems that mobility brings. There is also the question of the approach to be made to people with a new-found wealth and great variety of ways to disperse it. That wealth is intended to bring something vaguely described as security. Some want to respond, from their secure position, to the needs of those they have left behind. These comprise the newly-formed group of liberal Catholics. Others, however, want to enjoy the fruits of their ambition, and not get involved in all that was less pleasant in the past. They are not in sympathy with the clergyman who appears before them with a variety of social causes, demanding that they respond.

Farther away from the central city, in small southern towns such as this study describes, the movement and diversification of industry brings some of the more highly educated Catholics into a culture that is somewhat alien. Those Catholics do not come to reform the existing social system. They come because their jobs brought them there perhaps with the promise of an immediate promotion and a chance for steady advancement.

The movement of population also touches the people who have always lived in small towns. The drain of talent and skill as the young people leave often creates a mentality of defeatism in those who remain behind. Yet it is not only the most talented who leave home. Among those leaving are the least employable—those with the lowest expectation of success at home, who leave with the vague hope that in the city somehow things will be better. This group becomes problematic for the cities in which they settle. A sizeable number return home, after reaching the bitter conclusion that they cannot succeed in the city either. They were a cause of social concern before they left home; they are even more so after they return.

None of this change in our mobile society has been lost on those who are charged with the daily responsibilities of the parish. In all types of areas—cities, suburbs, and towns—priests have begun to turn to those who seem to them to be in need.

It is this "looking outward" that can create difficulties for the parish. The parishioners do not understand why their needs do not receive the same exclusive attention as before. The parish priest continues to serve the people of his parish, but on a more contracted scale. At the same time, with a mandate provided by the Second Vatican Council, he looks outward toward the community, to be of service wherever the needs exist. He begins to move in the direction of a ministry conducted on two levels.

FOOTHILL

It is perhaps in the small southern town with some industry where the parish will most clearly exemplify this two-level ministry, and the problems and success with this new direction implies. Here traditional parish patterns are not likely to be so impervious to change. And here the mobility patterns which pervade the country appear in high relief.

For these reasons, St. Andrews' Parish in Foothill, a small town in a small county in the South, has proved to be a rewarding subject for study. Despite the social and economic characteristics which place it in marked distinction from a large, well-established urban parish, it seems to present something of the future of the church in the United States in microcosm.

Not much of historical note has happened in Foothill, though there was one brief shining hour, in 1825, when gold was discovered in the local streams. The annual "Gold Rush Days" testify to the singular importance of that event. The old courthouse at the center of town has been converted into a museum commemorating the discovery of gold and the promise of a prosperity never fulfilled.

The town is typical of that area, with two exceptions: it contains a small military college, and a small army training base is located nearby. Many of the college students are from out-of-state urban centers, or from military families who have travelled extensively. There is an almost tangible barrier between the students and the townspeople. The young people of the town see the college students as competitors; the older folks find them rather stand-offish and pretentious. Academic pursuits are not accorded high status in Foothill. Neither is the military style, with its penchant for regimentation and commitment to something so abstract as duty.

There is also a small army training base in the county, which utilizes the mountainous terrain for its specialized needs. As with the college, there is a built-in antipathy between the soldiers and their families, and the townspeople. That division is lamented neither by the military administration nor by the town. Foothill is not a shopping center so it stands to lose little by discouraging the soldiers from spending their leisure hour there.

About ten years ago, Foothill benefited from the exodus of the textile industry from New England, when the Worthington Conglomerate built a small plant in the town. This plant employs about 700 people; sizeable for Foothill, but not for Worthington. There are no labor unions in Foothill.

The textile plant brought its own management people from the Northeast, adding yet another element to the town's social fabric. The various strands have been woven into one fabric, but it is clearly not without seams. While the college, the army and the textile industry all provide some prominent citizens for the town, that prominence is more honorary than real, since it carries little real social power. The people who held the power before the outsiders came still hold it, and continue to see the town as an isolated and autonomous entity still very much in their possession. An illustration of the depth of that sense of possession may be seen in the recent indictment of some of the local officials, among them the fire chief, for the burning down of some public buildings. One might hazard the conjecture that some townspeople were quite indignant at the intrusion of the outside investigators who brought the case to light.

One more group of people looms large on the scene in Foothill—the rural poor. It is difficult to categorize them for several reasons. The unemployment rate is not abnormally high, at least for that part of the country. But half of the employed earn wages which place them below the poverty line. There is a substantial school drop-out rate, but apparently most of those who drop out manage to find jobs at home or leave the county.

The crime rates are low and, at least from the reported statistics, the health of the population seems adequate. The two indicators of poverty that seem to be employed most often by the town's socially concerned are the appearance of the homes of poor people and the demeanor and dress of their children at school. Whatever the reality, there is much comment about "our poor." One suspects that the comment stems more from an awareness of the recent and widespread notoriety of the problems of Appalachia than from a firsthand knowledge of the problem itself. When the people of Foothill talk about the poverty-stricken, it is usually in terms of an anonymous "they" who are "out there."

While the various groups in town act very much in awareness of each other, there is no significant social integration apparent to the outside observer. Neither does anyone seem to be much concerned about fusing the different elements.

Most of what is presently familiar to those who live in Foothill is soon to change—for better or for worse. A large and rapidly growing metropolitan center is about an hour's drive from Foothill in one direction and a second is about an hour away in another. It is difficult to image that any area within a hundred mile radius of those growth centers will escape the impact of rapid change. A marked slowing of the emigration from the county, a brisk real estate market, a sizeable increase in capital savings and a growing tourist industry all indicate that Foothill can look forward to new life.

ST. ANDREW'S PARISH

In 1960 the Home Missioners, a group of priests dedicated to serving in non-metropolitan areas of low Catholic population, decided to establish a parish in Foothill, with an attached mission church some twenty-five miles away in Mountainview. What makes the story of St. Andrew's Parish of significance is the ministerial roles which the priests have assumed both in the town and in the parish.

Two factors encouraged the Home Missioners to establish a parish in Foothill: an increasing number of Catholic students on the college campus and the serious shortage of priests in the local diocese. The decision was well advised. The parish has grown in ten years from 5 families to 31. The congregation at this writing numbers 131—a small figure, but one that represents a mean growth rate of 47% a year.

In the relatively short period of its existence, St. Andrew's has taken on all the appearances of a well-established and permanent parish. Operating initially out of a not-too-luxurious one-story rental near the center of town, it has gone on to purchase and renovate a former Protestant church and to build a sizeable parish center next door. This center provides not only living quarters for the pastor and staff, but a parish hall, a club room for the college students, meeting rooms and the pastor's office. The center is more extensive than might have been expected in a parish of this size. Most of the building costs—and a considerable part of the operating expenses—were provided by the diocese and the Home Missioners. It was also undeniably a stroke of good luck to have been able to occupy a long existing church building at the center of town. This avoided the need to be ostentatious about the Catholic presence by thrusting an unfamiliar spire into the Foothill sky.

The growth of the parish is due mostly to the emigration of the textile people, the expansion of the college and the flow of military personnel. While a few of the many unchurched in the area have joined the congregation there has been no significant increase in membership from that quarter.

A small southern town like Foothill has a rapid turn-over in ministers, since the ministers are young and are looking forward to larger pastorates. Only the Southern Baptists, with their large, well-established congregations are exceptions to the general rule. The Protestant clergy have had little reason to look upon the priests in Foothill as competitors, and the priests in turn seem not to have become involved in the less gracious expressions of proselytism. Consequently, relations among the clergymen of the town have been good. There is a desire for frequent fellowship and a certain degree of cooperation.

THE PARISHIONERS

The Catholics who have moved into Foothill have usually come from traditional urban parishes, where the needs of the parishioners have occupied the major portion of the priests' time. In Foothill they find the priests heavily involved in the community and actively working toward a more collegial style in the church. The priests assigned there have been strong personalities, holding strong views. To the parishioners, their actions and the directions they have proposed have been sometimes puzzling, occasionally infuriating and at times delightful. Almost invariably there is a reaction from the people simply because the priests operate differently from what they have experienced in the past. Furthermore, the parish has been established and built largely without the peoples' moral, physical or financial support. The particular freedoms that come from not being financially dependent on the congregation and from belonging to a minority religion, allow for a redefinition of the clerical role. This is an opportunity that has not escaped the priests who have served St. Andrew's. A good deal of the creativity and much of the impact of Catholicism in Foothill has come from the pastor and his staff.

THREE IDEAS THAT WORKED

Part of CARA's town and country research program is to gather information on creative apostolates. CARA's files currently contain data on about 300 rural ministries throughout the United States. Twenty of these ministries were selected for inclusion in the "Town and Country Idea Book" published by program. Its foreword states: "It is hoped that the 'Idea Book' will help multiply their impact beyond the the local area. Good ideas are often hard to come by. Christian stewardship demands that they be shared." With this in mind, "Origins" has printed below three of the programs detailed in the "Idea Book." They include the Rochester diocese's plan for acquainting its middle class and its poor, the Spanish-speaking apostolate of the Toledo diocese and the ministry to vacationing youth devised by the resort town of Lake George, N.Y.

1. ROCHESTER'S HOUSE OF CONCERN

The House of Concern in Penn Yan, New York, through a food-clothing-furniture sales operation, provides a place where middle class women can become acquainted with the poor and discover how best to help.

Father John Hempel, director of the office of human development of the Rochester diocese, and on assignment to Yates County to work among the poor, began the House of Concern in 1968. Father Hempel discovered that 25% of the people in the county were living in "fringe poverty"—barely managing to survive financially, and prone to disaster in case of temporary job loss or sickness. He felt that if middle class people had some way of becoming acquainted with the poor, and learning of their difficulties at first-hand, they would soon discover how they might be able to help. A place where volunteers could sell food, clothing and furniture to the poor at a minimum price, could serve as a concrete focal point where the middle class might learn and the poor might be helped. Thus, the idea for the House of Concern was born.

To set up the House, Father Hempel contacted middle class women living in and around Penn Yan who, by their participation in social action committees in both Protestant and Catholic churches, had already shown the type of concern needed. He explained the rationale behind the proposal and requested their help. Seventy women responded, principally from the local units of the Catholic Daughters of America and the Church Women United.

For $80 a month, the women rented a building formerly used as a garage and automotive parts store. To stock the store, the group contacted several Catholic parishes in the Rochester diocese that agreed to collect canned food, and used clothing and furniture and to deliver them to the store. With sufficient stock on the shelves and a schedule of volunteer workers drawn up, the store opened three days a week to customers who in a short time numbered about 25 families weekly.

A board of directors was soon established for the operation composed of one woman from each of the seven congregations to which the women belonged—Baptist, Catholic, Episcopal, Lutheran, United Methodist, Presbyterian and United Church of Christ.

As the women volunteers came into closer contact with poverty families through the House of Concern, they soon uncovered other urgent needs. The first project to come from this increased awareness was a small clinic offering inexpensive medical and dental care in the neighboring town of Rushville. The women secured a charter for the clinic from the county officials, purchased and renovated a building for its use, and helped raise funds for its operation. The clinic is one example of what is hoped will result from increased contact between the poor and people who out of a Christian concern are seeking ways to help.

2. TOLEDO'S MINISTRY TO MIGRANTS

Each year between May and October approximately 25,000 Mexican-American migrant workers flow in and out of the northern and western sections of the diocese of Toledo. In addition, the diocese contains 30,000 permanent residents who are Spanish-speaking, representing 8% of the total Catholic population.

Priests, sisters and lay persons from parishes that work with the Spanish-speaking have joined together to share ideas, coordinate work, and improve their ministry. They meet monthly to pray and plan their work, as well as to wrestle with their most difficult apostolic challenge: how to serve Mexican-Americans in such a way that their own culture, and particularly their religious culture, can find the proper type of expression in American life.

A six member diocesan department for the Spanish-speaking (a lay director, priest, sister and three other lay persons) assists the apostolate's efforts in various ways, particularly through arranging for part-time placement of clergy in places where migrants swell the population, recruiting sisters to work full time or part time with migrants, arranging training programs in Mexico for priests assigned to the apostolate on a regular basis, and program development. Sisters play an important part in the apostolate to the migrant camps. They provide many of the little services so important for daily survival: helping a house-wife find the best grocery stores, advising on medical care, assisting in buying a car or obtaining a driver's license. They teach religion to children after school, recruit children for the summer schools provided by the state and sometimes serve as full-time volunteers in tutoring programs.

Various services are also offered to permanent residents. Participants in the apostolate, for example, have tried to incorporate Mexican-American cultural elements into their teaching of Christian doctrine. Radio and television programs have been produced, to alert communities to the special needs of the Spanish-speaking. A hymnal has been prepared, containing both old and new Spanish hymns. Programs have been organized for adult religious education and for marriage counseling.

Special centers in Fremont and Toledo, funded jointly by the OEO, offer job assistance, counseling services, health and dental care, legal aid, immigration assistance, housing referrals, and high school equivalency classes. Lay volunteers assist in staffing these centers.

Members of the apostolate have also cooperated with the State Board of Education in sponsoring a leadership training program for Mexican-American residents. To date approximately 165 have participated.

3. LAKE GEORGE: THE SUMMER PLACE

The Lake George Center, Inc., came into being in 1964 to serve the 2000 or 2500 young people who visit Lake George, New York each summer. Most of the young people come to work in the resort's motels, concessions and dining rooms; some, however, come as vacationeers or "wanderers."

The center originated after a minor disturbance on Labor Day weekend, 1963. After hearing rumors that young people from Ft. Lauderdale intended to visit Lake George and "break up the town," and concerned about the crowds of youths that were beginning to gather, anxious officials closed the bars early and called out the fire department to disperse the crowds with water.

Long after the actual disturbance, the community continued to simmer; "simmering" on the part of the churches took the form of general concern for the problems of youth and a specific desire to help the many young people who worked in the resort during the summer. Thus, in the winter of 1964, representatives of the Presbyterian, Episcopal, United Methodist and Catholic congregations held a series of meetings, out of which emerged the Lake George Center, Inc. The center is a non-profit corporation, formed so that the youth ministry would not have a denominational attachment. Although the churches and their members have served on the corporation's committees and have from time to time given both encouragement and financial support, it is the corporation itself and not the local churches that has formally sponsored the ministry.

The first project undertaken by the corporation was to establish a place for young out-of-town summer workers to come. The center, located at first in the room of the Presbyterian Church, and later in a hall donated by a civic club, was to provide both recreation and counseling. For the first three years (1964 to 1966), the center drew young people who used the facilities for a "home away from home"—for inexpensive entertainment, including pool and ping pong, and even for a place to cook.

In 1967 and 1968 the "Summer Place" as the youth center was now called, had become a popular gathering place for all manner of young people: summer workers, vacationers and "wanderers." By 1967 the center was attracting nearly 1000 young people on weekends and from 300 to 500 during the week. Not surprisingly, crowds at times blocked the street. In addition, 1967 marked the beginning of long hair, bare feet, beads and drug abuse at Lake George.

By 1969 community pressure had caused the Summer Place to close. The civic group that had donated the hall informed the corporation that the hall was no longer available for its use. Thus, the Summer Place did not operate during 1969 and 1970.

Although the corporation absorbed the brunt of community displeasure, it continued to minister to young people in other ways. Father Paul Engel, Catholic campus minister at Hudson Valley Community College in Troy, New York, for example, held informal morning "rap" sessions on the beach (a favorite gathering place for "wanderers"), where as many as 25 participants might gather on a given day. In addition, the corporation established an office, directed by a lawyer from Lake George, which helped with housing for young people coming to work at the resort, and involved summer workers in community-oriented programs. This office also recruited young people to inform visitors on busy weekends about town safety regulations.

By 1971 the corporation was again offering a drop-in center, now called "Utopia" and located in the basement of the Episcopal church. This time coke and coffee, magazines, television, discussions, movies, and bands have replaced pool and ping pong. By eliminating pool and ping pong, some of the crowding has been reduced, without seriously affecting the center's popularity. The center provides not only recreational activities, but referrals to agencies able to help with drug problems, mental and physical illness, legal problems, unfair practices and employment counseling.

At the present time, the center receives support from members of the Episcopal, United Methodist, Baptist, United Presbyterial, Jewish, and Catholic churches. Funds for the center's program come from various sources: local churches; the Narcotics Guidance Counsel and the Youth Service divisions of the State of New York; and from Vacationland Interfaith Projects, and ecumenical organization of laymen and ministers concerned with leisure ministries in the Adirondacks.

Currently those concerned with the center are trying to cope with the problem of young people who arrive with sleeping bags, indefinite job plans, no money, and no place to stay. In the summer of 1971, a campsite was provided; eventually the center hopes to be able to provide a hostel where young people can stay while searching for a job.

In general, Lake George Center, Inc., represents a successful ecumenical effort to minister to the young people who work at or visit the resort each summer.

PUBLICATIONS FROM CARA'S TOWN & COUNTRY DEPARTMENT

1. Town and Country Idea Book, edited by James Romer and Bernard Quinn. Brief information on twenty creative rural ministries. [40 pages]

2. Experiments in Town and Country Ministry, by Norman Choate. Three case studies: a rural parish in the South, regional communities in the Diocese of Des Moines, and the Interchurch Coordinating Council in southwestern Missouri. [30 pages]

3. The Changing Context of Town and Country Ministry, by Bernard Quinn. A framework for insight into the social dynamics at work in nonmetropolitan places—from isolated hamlets to rural megalopolis. [42 pages]

4. Toward a Job Description for the Nonmetropolitan Catholic Parish, by Bernard Quinn. Suggested role for the rural parish of the future. [34 pages]

5. Mission, Missions and the Creative Planning Process, by Bernard Quinn. Theological basis for pastoral-missionary action. [30 pages]

6. The Protestant Approach to Town and Country. A Study-Guide for Catholics. [34 pages]

7. Church and Community: Nonmetropolitan America in Transition, edited by Victor Klimoski. Contents: H. Wilson Yates, "Social Change and the Church in Nonmetropolitan Society;" George Donohue and Edward Gross, "The Rural System as an Ideal Model;" William Cofell, "The School and the Church in Changing Rural America;" Edward Henry, "Rural-Urban Balance: Looking Ahead to 1980;" George Tjaden, "Ecumenical Response to Town and Country Mission;" E. W. Mueller, "Is the Church on the Offensive?;" Arleon Kelley, "Tactics for the Church on the Offensive;" Osgood Magnuson, "Planning for Tomorrow." [114 pages]

8. Bibliography: Understanding the Small Community. An annotated bibliography, listing community case studies, works on community theory and rural sociology, and Protestant town and country materials. [64 pages]

9. Supplement to the above: Recent Acquisitions of Cara's Town and Country Library.

10. Booklet: Planning for Action: Aids for Leaders in Church Planning. Practical planning aids for use by local church groups, in popular style. [46 pages]

PROBLEMS OF THE RAILROADS

Mr. TAFT. Mr. President, the report recently issued by the Securities and Exchange Commission on the Penn Central collapse raises very serious questions about the performance of the management of that company and the adequacy of our securities laws in protecting investors. The outrageous management practices which have been reported, if true, should be met with vigorous enforcement action on the part of the SEC and other appropriate agencies.

It would be a serious mistake, however, if we were to conclude that the problems of the Penn Central and other major American railroads are attributable solely to inadequate management. We only deceive ourselves if we believe that good management alone can solve the problems of the Penn Central and other American railroads.

Unfortunately, America's railroads are beset with problems which significantly handicap their ability to remain as viable enterprises. On March 3 of last year I addressed the Senate on the extent to which unprofitable branch lines, unproductive work rules, and archaic rate structures seriously debilitate our Nation's railroads. I introduced a bill which was designed to meet these problems. While the ICC has somewhat facilitated the abandonment of the most unproductive branch lines, we have not done enough in this area and the Congress has failed to act. Recently, I joined with the distinguished Senator from Indiana (Mr. HARTKE) in introducing the Interstate Railroad Act of 1972, which was designed to promote improved service by upgrading main lines. This act would provide to the railroads Federal funds equivalent to the real estate taxes which they pay on their main intercity rights-of-way, which funds would be used for the purpose of improved maintenance of the rights-of-way and roadbeds.

We cannot expect America's railroads to provide good service to shippers and consumers when they are saddled with tens of thousands of miles of unproductive branch lines; when they are forced to retain employees solely because of archaic work rules; when they pay unfair taxes on their rights-of-way; and when they have a rate structure which involves 43 trillion rates on file with the ICC. Years ago, it was popular to blame all of the railroads' problems on the passenger train. Today, it may become fashionable to lay these problems at the door of outrageous management practices.

As questionable as those management practices may have been in the case of the Penn Central, we do the Nation a great disservice if we do not follow through with the fundamental reforms that are required. Unless we are prepared to let America's railroad industry collapse into nationalization, we must understand the necessity of enacting prompt reforms, without further delay.

The Wall Street Journal of August 16 contains an article entitled "Getting the Penn Central Back on Track." I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

GETTING THE PENN CENTRAL BACK ON TRACK

(By John E. Cooney)

PHILADELPHIA.—Ever since the Penn Central Transportation Co., the rail subsidiary of the Penn Central Co., filed for reorganization in June 1970, the railroad's hierarchy has been roundly drubbed in a series of extensive government investigations exposing blundering mismanagement, titillating scandal and shabby ethical practices. A Securities and Exchange Commission report released threatens "possible enforcement action" against unnamed former officers, directors and advisers to the railroad giant.

Indications are that the circus side of the Penn Central will keep going strong even if the railroad doesn't. Take the fascinating game of pin-the-blame-on-somebody-else being played by former chairman Stuart T. Saunders, ex-president Alfred E. Perlman, and former financial officer David Bevan.

Perlman, for instance, leaked substantial information to a major financial publication for an article on the Penn Central and indicated that it was Saunders who did much to run the railroad aground. Saunders, meanwhile, washed his hands of the affair and said he had no idea of the goings on in which Bevan is accused of manipulating Penn Central funds for his own use. And Bevan retorts by releasing a "diary" purporting to show that he's being made a "scapegoat" and that Perlman and Saunders "failed to do their job" and were "incapable of keeping the railroad solvent."

TIME TO TAKE STOCK

But while the Byzantine machinations and lighter side of corporate intrigue are surfacing as factors that hastened the railroad's inglorious foundering, it's time to question how much of the Penn Central's plight is actually due to the human element. It's also time to take stock of the direction the reorganization is going. And although Congress, for the most part, has testily tried to ignore many aspects of the railroad's situation, it appears that whatever the outcome a greater amount of federal intervention will be needed to determine the future of the railroad and the industry as a whole.

If for no other reason than its vast size, the Penn Central must be dealt with. It has some 20,000 miles of lines criss-crossing 16 states, the District of Columbia and two Canadian provinces. More than a million tons of freight travel its lines each day, and 70% of its traffic involves other railroads using its tracks. And with about half of its passenger operations under the aegis of Amtrak, its lines carry about 300,000 passengers a day. Moreover, it is the largest hauler of mail in the United States.

While its size poses problems other railroads don't have to worry about, unfortunately the Penn Central isn't alone. A look at the rail industry reveals that apart from the embarrassing albatross of past managers who continue to make headlines and an intricate system of leased lines that staggers the mind, the Penn Central is merely a big unhealthy chunk of an unhealthy industry.

Indeed, it becomes obvious that the Penn Central, like much of the rest of the industry, would have had problems no matter what its management was like. In the past several years, five of the nation's 68 Class I railroads have filed for reorganization. (Class I systems have at least $3 million in annual operating revenues.) All five came from the Northeast Corridor that is a Penn Central stronghold. Last year, George M. Stafford, chairman of the Interstate Commission, said at least another dozen major railroads were in shaky financial shape. ICC figures show that while freight revenues rose to $11.8 billion last year from $8.2 billion in 1960, operating income steadily slipped to $702 million from $943 million for the industry during the decade. Railroads have the lowest rate of return on investment of any regulated carriers—about 2.5% last year, also one of the lowest rates for any industry.

Moreover, shifting industry, particularly in the Northeast, has caused a loss of freight revenue. Anthracite coal production, once a staple of the rails, is dying out. Although bituminous coal still provides steady revenues, utilities are increasingly turning to oil and gas for their energy sources. And railroads haven't proven to be very aggressive in seeking new sources of freight traffic.

The obvious question is "What's wrong?" Well, the Penn Central's trustees in their reorganization report issued earlier this year made a checklist of critical problems confronting the giant railroad. If the problems are not solved, chances for a viable reorganization are nil, the trustees warned.

The major crises are three, the trustees said. First, they contend that some 9,800 of the company's 83,000 employees are "surplus" and must be phased out for an annual savings of about $100 million a year. Recent agreements with the United Transportation Union have made significant inroads in this area, but the hardest bargaining may be yet to come.

The trustees next recommended cutting the system's 20,000 track miles almost in half to remove unprofitable and marginal freight lines, which means dealing with state and local opposition as well as hoping for sluggish federal action. Thus far, the trustees have identified about 3,200 miles that they want to let go, but the ICC has approved the abandonment of only 585 miles.

The third condition for profitability is that losses from passenger operations be made up from pockets other than the Penn Central's, which most likely means governmental subsidies or unloading remaining passenger lines. The only Penn Central passenger lines left are commuter trains in a half-dozen major cities.

To the trustees' trio of ills, other rail leaders add amendments. They complain that railroads today are hamstrung by regulations designed to hinder 19th century monopolies, especially in the areas of track abandonment and the payment of local property taxes. These conditions, combined with federal subsidies for highways, waterways, and airways give their competitors an unfair advantage, they grouse. And although railroads have received five rate increases within the past five years, industry spokesmen say costs outstrip the increases and they are seeking yet another rate boost. The average cost of freight cars has risen almost $4,000 a unit to nearly $14,000 in 1971 from what it was in 1960, they say.

The precariousness of the Penn Central's position was seen recently when Tropical Storm Agnes battered the East Coast. The railroad suffered about $20 million in damages and anticipated revenue losses for July of $10 million.

To meet the emergency, the road took drastic steps. It laid off 1,000 employees for expected savings of $1 million monthly. It indicated it may defer payments on equipment obligations for "grace periods" until it becomes a matter of default. The trustees rushed to the reorganization court for authorization to use the remaining $15 million in trustees certificates of the $100 million government-backed loans granted the railroad in January 1971. (Even with the $15 million, the company predicted its cash balance this month will only be $11.8 million.) And William H. Moore, the railroad's president, went begging to Washington along with the heads of other roads for $40 million in emergency funds for storm-damaged railroads.

Indeed, the outlook for the Penn Central appears so gloomy that alternatives to an income-based reorganization are periodically profferred by interested parties. The United Transportation Union, for instance, has called on Congress to study nationalization of the railroad, saying the nation's needs aren't being served by privately-run roads. Richard Joyce Smith, trustee of the bankrupt New Haven Railroad, which is one of the Penn Central's largest creditors as well as the holder of nearly one million shares of the transportation company's stock, has recommended that the company sell off the railroad and retain other assets. Only yesterday Mr. Smith sent a letter to the Penn Central Co. recommending that the holding company file Chapter 10 bankruptcy proceedings.

Just last week, a group of creditors and indenture trustees, including some of the largest banks and insurance companies in the nation, petitioned the reorganization court to ignore the trustees' plans for an income reorganization. "Once it becomes clear that the railroad cannot be reorganized on the basis of earnings, there is no longer any legal basis for further erosion of creditors' security, nor for the further suspension of creditors' rights," the petition declared. The group, however, doesn't offer any alternative reorganization proposals.

SOME GAINS MADE

Strides toward the trustees' objectives thus far haven't been altogether fruitless. Recent agreements with the UTU call for phasing out of some 3,100 firemen through attrition and opened the gates for removing excess train crew members with an initial 285 crews to be reduced. The reductions in this category are minimal, though, compared with the more than 6,000 "surplus" crewmen the railroad feels are on trains.

And the train crew agreement expires Nov. 30, leading some observers to speculate the contract is merely the result of White House pressure to delay a strike threatened for this summer until after the presidential election. Indeed, a similar agreement in 1964 backfired when the contract expired two years later; unions struck and the nation's railroads were forced to replace most of the jobs that had been vacated.

Some gains are perhaps more secure. The company has trimmed the total number of employes to 82,818, or 8.8% from last year at this time. In addition, the net loss for the first six months of this year was $124.8 million, some $3.1 million less than a year ago despite the additional costs of nearly $20 million from Tropical Storm Agnes. And as another gauge of success, the company says that freight service complaints are only averaging four a week compared with a high of 70 in March of last year. Moreover, ICC officials say, customers have actually submitted unsolicited praise for improved freight service conditions, "although they couldn't have gotten any worse," one official says.

Overall, however, the image of the Penn Central remains that of a debilitated Gargantua and in that truth apparently lies its base of power. Since it is so powerless, and yet seemingly so insatiable in its demands, Congress can't shunt it aside.

In fact, Congress is being relentlessly driven to do something about the Penn Central and the rail industry as a whole. Measures taken so far, though, have merely been stop-gap emergency funding. First, there was the unprecedented government-backed $100 million in trustees' certificates. Now there is the prospect that Congress will shell out substantial sums for flood stricken railroads with the Penn Central being a major beneficiary. And just this month, the Senate passed a bill that would authorize up to $3 billion for railroads wanting to buy more box-cars to relieve the shortage in the industry.

There are other bills proposed that would help the railroads. The Surface Transportation Act, for example, would make it easier for railroads to abandon tracks, get government-guaranteed loans, and receive some form of tax aid to keep up track beds. And the proposed Interstate Railroad Act of 1972 envisions the creation of an interstate rail system to promote improved service for both freight and passenger operations by encouraging the use of other railroad's lines through track rights arrangements.

THE ROLE OF CONGRESS

While it becomes increasingly clear that Congress is going to have an ever-larger role in the Penn Central's affairs—ranging from labor reform to box-car modernization—it isn't at all clear what the ultimate nature of that role will be. Neither specific recommendations nor forthright debate on the subject exists. "Congress just doesn't want to deal with the Penn Central right now," says one ICC official.

Meanwhile, the Penn Central keeps lumbering along, its trustees putting a brave face on things and steadfastly maintaining that a traditional reorganization is possible. The trustees have asserted that if their goals are met, the Penn Central may begin "to see light at the end of the tunnel" by 1975 or 1976.

The price of the Penn Central's success, however, may be stiff. The Penn Central may require so much help from Congress in order to meet its goals, that the government will demand a greater voice in the operations of the railroad. A quasi-governmental agency, such as Amtrak, may be created to run marginal or unprofitable freight operations, allowing the railroads to run the more profitable lines. And there will more than likely be increased governmental pressure to upgrade the private railroads' services.

"Someday, Congress is going to look at all the money its bound to put up for the Penn Central and the rail industry generally. It will conclude that it may as well start putting the railroads to better public use than the private interests that own them are able to do because they're trying to turn a profit," concludes the federal official.

REPRESENTATIVE DRINAN REPORTS ON ISRAEL

Mr. RIBICOFF. Mr. President, my good friend and colleague, Representative Robert Drinan, recently reported to his constituents on developments in Israeli-American relations. Bob Drinan is uniquely qualified to offer his observations on this important subject, having involved himself in this area for many years. Since coming to Congress, his eloquent voice has been repeatedly heard regarding America's vital stake in preserving Israel's security and on behalf of Soviet Jews.

Bob Drinan's perceptive reports on his visit to Israel and his lucid testimony before the Democratic Platform Committee have already earned him the respect not only of his congressional colleagues, but friends of Israel everywhere.

In his latest report, Representative Drinan has analyzed the nature of the continuing Soviet role in the Middle East in the wake of the partial Soviet withdrawal from Egypt. Warning that "danger signals are already flashing" with regard to the Soviet drive to control Middle East oil, he contrasted the administration policy with congressional initiatives to assist Israel.

I am confident that as long as Bob Drinan is a Member of Congress, his voice will be heard and his votes counted on behalf of Israel and world peace.

I ask unanimous consent that his news column be printed in the Record.

There being no objection, the column was ordered to be printed in the Record, as follows:

Israel-American Relations: Recent Developments

(By Congressman Robert F. Drinan)

In May I had the opportunity to visit Israel once again—my first trip there since being elected to Congress in 1970. Several years before when I was Dean of the Boston College Law School, I was honored to lecture at Hebrew University in Jerusalem under the auspices of the Israeli government. I made my recent trip as a fact-finder on behalf of the National Interreligious Task Force on Soviet Jewry.

During my trips I have talked with Israelis from many walks of life—immigrants, "sabras," (natve-born Israelis), workers, students, government officials. In May I conversed at length with Abba Eban, the distinguished Foreign Minister of Israel.

Dramatic and even astonishing changes have taken place in Israel between my trips there. Events of recent weeks—since my last trip—indicate that the Middle East situation is in a state of momentous change.

While the full significance of the partial Soviet withdrawal from Egypt is yet to be assessed, it is only a single piece of a shifting mosaic. Rational behavior and logic have never in the past characterized Middle East politics. But what does remain clear is that the limited withdrawal of Soviet advisers does not mean the end of a significant Soviet role either in Egypt or in the entire Middle East.

Economically and diplomatically, the Russians have scored notable gains in an area not only of great strategic importance, but one which contains two-thirds of the world's known oil reserves. Predictions of an "energy crisis" in our country in the 1980's are linked with an estimate that 50% of American oil will have to come from the Middle East by 1985. The implications of these predictions are certainly ominous for Israel. They could become a nightmare for that country if the United States were in fact to become wholly dependent on Arab oil.

Danger signals are already flashing. Only recently Iraq nationalized the Iraq Petroleum Co.—a consortium controlled by British, French, Dutch, and American oil interests. The Soviet presence in Iraq can be expected to increase as a result, and along with it Soviet domination over Iraqui oil.

Communist bloc nations also provide the Arab oil nations with oil markets, which give the Arab nations more flexibility in their efforts to exert political pressures on the international oil companies. Libya, which is pushing for union with Egypt, has already shown its skill at exerting such pressures. But Russia's target in this area may really be the Persian Gulf, where most of the Mideast oil reserves are located. For decades Britain dominated this area militarily while American oil companies did so economically. Britain's recent military pullout from this area, however, left a political vacuum. Will Russia fill this vacuum?

With the Russians able to meet their own oil requirements, it is not difficult to see why the Soviet Union is actively seeking domination over the sources of Mideast oil. It appears that Russia would like to become the middleman for Mideastern oil, supplying its friends and controlling the oil tap for Western European countries.

How have American policymakers reacted to these key developments? How have we perceived the threat to Israel posed by intensive Soviet and Arab maneuvering in the Middle East? Until the beginning of this year our government's position with respect to Israel had been weak, vacillating, and, in fact, inflammatory.

The historical record shows that a very serious crisis in U.S.-Israel relations exited for the first three years of the Nixon Administration. It began with the Rogers Plan in December of 1969 which called for almost total withdrawal of Israeli forces from all Arab territories—including Sharm-el-sheikh, which is a strategically essential point for Israel. The crisis was aggravated by the Soviet-Egyptian ceasefire violations in August 1970—and the pervasive American silence which followed those blatant violations.

Relations deteriorated further with the refusal of the current Administration to meet Israel's requests for Phantom jets and other advanced weapons so desperately needed. During the first three years of the Nixon Administration, and during Nasser's war of attrition against Israel, only 18 Phantom jets were sold to Israel. This virtual arms embargo by the United States against Israel was being used to force Israel into agreeing to a political settlement not in Israel's or the United States' interest.

This unfortunate situation has now changed—temporarily at least. Israel is now able to buy a variety of weapons from the United States, including Phantom jet aircraft, air-to-ground missiles, M–60 tanks, heavy field guns, C–130 transport planes, and electronic equipment.

Mainly because of actions started in the Congress during the past three years, Israel is now receiving both military credits and direct economic supporting assistance.

In June, Congress passed legislation since signed into law for non-military foreign assistance, including provisions which I had sponsored for $85 million in aid to Israel for the resettlement of Soviet Jewish refugees.

These provisions, like those in previous legislation benefiting refugees from Cuba, Hungary, Czechoslovakia and other countries which persecute dissent and punish minorities, will aid Israel in providing homes and finding jobs for the 40,000 Soviet Jews expected to arrive there this year.

During my trip to Israel in May I was deeply moved by the plight of the Soviet refugees. Most of them are forced to leave Russia with virtually no possessions.

Israel is doing a tremendous job to assist the refugees readjust to a normal life, but Israel, beset with many problems, needs help: It is expected to cost Israel more than one billion dollars in 1972 to resettle the Soviet Jewish immigrants who will enter that country this year. American assistance will now ease that great burden.

Each of these legislative proposals to help Israel was met with Administration opposition when they were introduced.

Throughout Israel's history the Congress has sought to counter the pro-Arab bias and bad advice of the State Department on the Middle East. If the State Department's views had prevailed Israel would have never been born in the first place. During the recent crisis in American-Israel relations the Congress has been the focal point for strong pressures on the Administration to give Israel greater economic, military and diplomatic support. These pressures have included letters from Congressmen to the Secretary of State and to the President calling for Phantom jet deliveries, and otherwise seeking American solidarity with Israel. In September of 1970, over Administration objections, $500 million in military credits for Israel was approved by the Congress by an overwhelming margin. This amendment authorizing military credits for Israel is being extended by Congress through the end of 1973 to ensure continued support. Through these decisive actions a reluctant Administration was repeatedly reminded of the Congress' firm position on the issue of assistance to Israel.

My support for measures to assist Israel diplomatically, economically and militarily is based on my belief that these policies are in the best interests of the United States and of world peace.

I use the words "world peace" with great prudence. During my testimony on Israeli-American relations before the Democratic Platform Committee on June 22, I discussed at length the many clear differences between American military intervention in Indochina and non-interventionist economic and strategic support for Israel. I shall not repeat that analysis here, except to state emphatically that the nature of the United States' supportive role has been vastly different in these two areas. In Indochina, the United States has lost 50,000 American lives and countless billions of dollars. Conversely, we have never sent a single American soldier to Israel; indeed, in 1971, General Moshe Dayan stated emphatically that American manpower, in either a military or advisory capacity, was the last thing in the world Israel wanted.

We must remember that Israel has not asked for American donations of arms or military equipment; rather, it has merely sought authorization to purchase that equipment.

Finally, American self-interest in the two areas is vitally different. Our involvement in Indochina is determined in large part by an unexamined, reflexive and outmoded policy of "containment," which makes it difficult to pursue a rational policy in Southeast Asia. No such "cold war" interests motivate the United States in the Middle East, where we are motivated not by an unrealistic crusade against Communism, but by a genuine commitment to a democratic country to aid it in its struggles against other countries which have openly vowed to destroy it.

A crucial factor in the recent shift in American policies was the courage and steadfastness of the people of Israel and the remarkable qualities and skills of Prime Minister Golda Meir.

At her meeting with President Nixon last December 2nd, she stated Israel's case frankly and eloquently. No American President, or any world leader for that matter, could have failed to be impressed by her courage, compassion and tenacity. This meeting resulted in the temporary shelving of the Rogers' Plan and the beginning of a flow of desperately needed armaments. One wonders, however, what the situation will be after the elections in November. Should President Nixon be reelected will he be more likely to listen to the advice of the President of Standard Oil or the advice of those who have Israel's interest at heart?

One important factor which appears constant is Arab belligerency and unreasonableness. Allies may be fickle—as the French Government has demonstrated—but Israel's Arab enemies have been remarkably consistent in their intransigence. Mrs. Meir's recent eloquent pleas in the Knesset for direct peace negotiations with Egypt were met with total hostility by President Sadat. Until the day when an Arab leader is ready to go before his people and utter the magic words "peace with Israel", Israel must maintain its vigilance and insist upon secure and defensible borders. But if Israel is to persevere in reaching these goals it must have the solid support of the United States Government and of the Congress.

The history of the Middle East since the Six Day War clearly demonstrates that during the times that the United States has lent Israel its diplomatic and military support the chances for peace have improved. Conversely, during the times when Israel was threatened by the United States with a cutoff of assistance and was pressured to commit itself to withdrawal as a precondition to negotiations, the threat of hostilities increased.

A medieval scholar once said—"The height of stupidity and weakness is not to know an enemy from a friend." It would be the height of folly for the United States to ignore this dictum. The United States must continue to treat Israel as a true friend. Failure to do so can only result in tragedy for Israel, for the United States, and for the entire world.

After all, this tiny, beset democratic nation represents the best of everything in which we Americans believe.

RURAL REHABILITATION—THE COUNTY AGENT

Mr. TOWER. Mr. President, I recently read an article entitled "Rural Rehabilitation—The County Agent," which was published in the Journal of Rehabilitation. It was written by Dr. Carl E. Hansen and William F. Weber, who are associated with the rehabilitation counselor education program at the University of Texas at Austin. The article is well worth reading, for it describes a pilot program which could bring information of rehabilitation services to underserved rural communities. The key to this program is the utilization of existing professional manpower—the county extension agent who already works in conjunction with Texas A. & M. University and the U.S. Department of Agriculture. I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

RURAL REHABILITATION—THE COUNTY AGENT

(By Carl E. Hansen)

RURAL REHABILITATION PROGRAMS

The delivery of rehabilitation services to the rural American seems to be pretty spotty, varying considerably from one section of the country to another. Mississippi has, for example, established a chain of workshops in small communities to provide vocational evaluation, work adjustment and other services best provided in a work setting.[8] Wood County, Wisconsin, conducted a project to find out what it would take in staff, funds and other rehabilitation resources to rehabilitate everyone in the county in need of vocational rehabilitation services. Half of the 60,000 residents of Wood County live in a rural setting.[5]

The regional medical programs are concentrating on ways of making services more available to those living in rural areas. Mobile units are being proposed in certain regional medical programs to take select medical services to sparsely populated areas. One of the most dramatic examples comes from North Carolina where the regional medical program has established a network of small coronary care units in the rural Smokey Mountain area.[7] The mobile unit concept has also been tried in Oklahoma. The Oklahoma state rehabilitation agency formed a team consisting of a psychiatrist, a clinical psychologist and a psychiatric social worker to travel to rural area rehabilitation offices to work and consult with rehabilitation personnel.[8]

In Wyoming, housewives residing in certain small communities have served as rehabilitation aides for clients of their community.[6] The concept of utilizing housewives as aides in a rural setting gathers further impetus from a study conducted by the University of Utah Regional Rehabilitation Research Institute where the use of aides in the rural areas to facilitate the rehabilitation process is strongly recommended.[5] This same study also noted the need to make the potential client aware of rehabilitation services sooner in rural areas.

For the most part, it appears rehabilitation services are being provided by itinerant rehabilitation counselors covering the rural areas of America. The services are being delivered by rehabilitation counselors seeking out those rural residents, as best they can, that need services.

Isolation [2], low occupational aspiration,[3] unemployment,[4] poverty [10] and lack of education [1] are key words or phrases used by authorities concerned with the problems of the rural American. To date, the sociologist, economist and psychologist have been instrumental in focusing our attention on the rural poor living in America. To this list of concerned professional groups, we can add the rehabilitation counselor. The key concern for the rehabilitation counselor is how to effectively deliver services to the disabled, rural individual.

Numerically, the rural population is shrinking, but the intensity of the problem is increasing. It is increasing to the point where new approaches and dramatic ideas need to be considered for the abatement of some of the problems caused by living in a rural setting.

RURAL POPULATION

The definition of *rural* varies slightly from study to study. The Bureau of the Census defines rural as a town with a population of 2,500 or less. The University of Utah study defined rural as a community of 10,000 population or less.[5] It would appear communities with 10,000 population or less may be considered rural.

The question of a defined rural population becomes somewhat more elusive than a numerical definition if one looks closely at the rural scene. It would appear we have three distinct rural populations to consider. Three populations tied together by an agrarian economy but perhaps little else. Population I may be thought of as those citizens living in a rural town of 10,000 or less. Population II may be thought of as the farmer, either the land owner or tenant farmer. The farmer and the small town dweller are relatively stable in the sense of living location. Population III may be thought of as the migrant rural worker. This individual is not very stable in his living arrangements and is often accepted in the rural community as a necessary evil. The migrant labor force represents a necessary community intrusion to be dealt with at harvest time, beet thinning season, etc. Rapidly developing technology in farm equipment may ultimately spell the demise of this flowing rural work force.

It is the migrant worker we know least about, and who is probably the individual most in need of rehabilitation services. The 1967 Amendments to the Vocational Rehabilitation Act clearly point this out in the amendment dealing with handicapped migratory workers. The amendment was based on the consideration that among migratory workers, as among all groups of low-income people, health problems and disability are more prevalent than among the population generally. Some of this arises from chronic illness long neglected; in other instances it is the result of accidents on the job, on the highway or elsewhere. The special system of project grants to state rehabilitation agencies to pay from federal funds up to 90% of the cost of providing vocational rehabilitation services to handicapped migratory agricultural workers.[9]

COUNTY EXTENSION AGENT

It would appear that one of our first concerns in the delivery of rehabilitation services of the rural American resolves about the need to make the potential client aware of rehabilitation services sooner. Who has continuing contact with the rural scene? Who has rapport established with the rural American? Who has the sophistication to understand a state rehabilitation agency, yet easily communicate with rural individuals sometimes suspicious of "outsiders"? The trend of this thinking leads one to believe the county extension agent

---

Footnotes at end of article.

may logically be a source of professional help to the rehabilitation counselor and the disabled, rural individual.

The county extension agent works in cooperation with the A & M university in his state and the United Sttates Department of Agriculture. He is responsible for and provides leadership and direction to agricultural, home economics and related areas of an educational program, which includes working with youth and adults. The Agricultural Extension Service has always had the role and responsibility of providing information about the services of the U.S. Department of Agriculture. One of the bases upon which the Agricultural Extension Service was established and now functions is that of assisting rural Americans to solve their problems.

The county agent could become an extremely viable source in the rehabilitation of the disabled rural individual. Here is an individual assigned to a specific geographical area within a state, operating on the philosophy of helping rural Americans solve their problems. He has continuing contact with the three rural populations this paper earlier developed, his presence is felt in the small town, definitely with the farmers in his assigned region, and with the migrant work force since he is concerned with the crop production of the farmers in his area.

Since the county agent's role by definition is flexible and meaningful to the time, he could well act as a resource person in the dissemination of rehabilitation information and in the referral and establishment of rapport between the client and counselor: Toward this goal of welding forces with the county agent, a possible precedence may be cited. In early 1969, the Texas Department Mental Health and Mental Retardation entered into formal agreement with the Agricultural Extention Service of Texas A & M University to foster public awareness, interest and concern for mental health and mental retardation in the rural and sparsely populated areas of Texas. The Texas project is of a trial nature, covering 42 of the 254 Texas counties. The project aims at utilizing a force of professionals heretofore untapped in the rural regions of America.

It would appear that the county agent's role could be conceived as that of a rehabilitation aide. Conceiving the county agent as a support person may be inaccurate though. Rather, the role of the county agen should be thought of a lateral relationship. A relationship entered into between two agreeing professional groups both concerned about the problems of the rural American. This type of role relationship follows the the thinking of the Sixth Institute on Rehabilitation Services dealing with support personnel where "the concept of support personnel does not refer to reciprocating lateral relationships between the rehabilitation counselor and collaborating occupations such as the social workers, psychologist, physician, etc." [6]

THE COUNTY AGENT'S ROLE

The program plan of action for the county agent might include the following:

1. To refer potential clients to the rehabilitation agency.
2. To increase public awareness and concern for rehabilitation of handicapped persons in rural areas.
3. To act as liaison person between client and counselor as the need arises.
4. To develop recommendations for more effective delivery of services in rural areas.
5. To help stimulate community action programs for handicapped persons at the local level.

These program objectives place heavy emphasis on the county agent to disseminate rehabilitation information. He could do this in his normal course of action, since he is constantly involved with the rural scene. The dissemination of information would be from person-to-person contact, through local meetings, individual consultations, newspaper columns, and radio and television programs. A high percentage of county agents have regular radio programs and prepare weekly newspaper columns for the express purpose of acquainting the public with research information, as well as calling attention to specific educational and community services available to rural residents.

Apart from disseminating information, the county agent could play a vital role in helping as a liaison person between select clients and the rehabilitation counselor. The rural scene may well present a picture of "cultural chasm" between certain rural residents and the rehabilitation counselor. Many rehabilitation studies point out that there are frequently gaps of cultural discrepancy not easily overcome by the counselor on initial contact with certain clients. The county agent may serve as the one person able to bridge this initial gap between client and counselor. Certain farm families, especially in remote regions, have had little contact with agencies providing social services and, therefore, they are sometimes reluctant to admit an "outsider" to their problems. The county agent may be the person available to help allay these feelings of suspiciousness and resistance to aid from a state agency. Many migrant workers certainly present a "cultural chasm." The county agent may be of considerable help, being more attuned to the problems, needs and the very language of the migrant worker.

REHABILITATION'S TRAINING RESPONSIBILITIES

Rehabilitation's commitment in seeing a cooperative plan of this nature take place is in the provision of training for the county agent. This training is needed so he can be knowledgeable about rehabilitation services. The state rehabilitation agency would also have to supply written literature about the services they offer, so each county agent could disseminate informative pamphlets, brochures, etc..It would appear the rehabilitation agency could meet the needs of training by sponsoring short-term workshops. These workshops would not only acquaint the county agent with rehabilitation guidelines, but they would also provide the agent with an insight into the philosophy of rehabilitation. In other words, the county agent needs to not only understand the rehabilitation agencies' services but also the spirit and philosophy of the organization.

Most new program suggestions are viewed with hesitancy due to the additional cost factor and the energy needed to put them into action. Any program of involvement between two professional groups, such as extension agents and rehabilitation counselors, will require an attitude of cooperation and a certain amount of initial energy to get the ball rolling.

The question of money for short-term workshop training is another matter. Energy and desire alone do not always start new program ventures. It would appear though, that the 1967 Amendments to the Vocational Rehabilitation Act allow us to consider some innovative ways in providing services to the migratory agricultural worker. The amendment dealing with the handicapped migratory worker allows the federal government to pay up to 90% of the cost in providing rehabilitation services to the migratory worker. The service of the county agent working in an area where migrant labor is used would logically seem to fit under this amendment. Perhaps some of these funds could be used for training programs, especially in those states having large numbers of migratory workers.

SUMMARY

The county agent appears to be a possible force in the dissemination and understanding of rehabilitation services in the rural areas of America. His contact with the rural community allows him insight and knowledge far greater than most rehabilitation counselors have of the rural scene. His ability to communicate and possibly bridge cultural gaps between select clients and rehabilitation counselors could be useful. The concept has some precedence where in the State of Texas an experimental program between the Department of Mental Health and Mental Retardation and the County Extension Office is in effect to disseminate information about mental health and mental retardation. This precedence could possibly be a starting point for a rehabilitation precedence.

ENVIRONMENTAL CHALLENGE

Mr. MOSS. Mr. President, I have just had brought to my attention the National Wildlife Federation's evaluation of global environmental quality.

This publication was produced in cooperation with the United Nations Conference on the Human Environment which I attended.

Secretary-General Maurice Strong, in a foreword to the publication, emphasizes that the environmental challenge is a challenge to all mankind.

I was particularly impressed with the section on minerals, and in view of the work the Senate Committee on Interior and Insular Affairs has been doing in the area of surface mining reclamation, I ask unanimous consent that the section on minerals be printed in the Record.

There being no objection, the section was ordered to be printed in the Record, as follows:

Minerals—Energy Crisis Looms—Real Crunch: Earth Cannot Support Present Population at Western European Standard of Living

The World Picture on energy and minerals is dominated by this foreboding sequence of facts:

Fossil fuels create energy . . .

Energy runs industry . . .

Industry produces a higher standard of living . . .

All the world aspires to a higher standard of living . . .

There are not enough mineral resources to support 3.7 billion people at a standard of living equal to Western Europe—at least not without important new breakthroughs in technology.

Fossil fuels now provide 97 percent of all energy. Because they are being burned up at such an accelerated pace, experts predict that oil and natural gas wells will run dry within a century—at current consumption rates. Other minerals are in fair supply, with the exception of copper, mercury and silver.

Compounding the problem is the fact that world use of metals and energy has been tremendously uneven. The United States, with only 6 percent of the world's population, consumes 37 percent of the world's energy.

The peoples of Asia, Africa and Latin America are also understandably demanding the fruits of industrialization. But to give every one of the 3.7 billion people on earth an American standard of living would put a fantastic drain on finite mineral resources: 12 times as much natural gas . . . 100 times as much copper . . . 6 times as much petroleum . . . 75 times as much iron as is now produced each year would be needed.

A more optimistic note is sounded by some experts who point out that for many years the United States has had only a 15-year reserve of petroleum. New discoveries, more efficient extraction methods and new technology keep solving the problems—before they reach crisis proportions.

Leaders around the world are gradually waking to the urgent need to step up mining and processing efficiency, and to recycle every single bit of metal. They're also searching for alternate, more efficient sources of power:

Nuclear: Nuclear energy is our best long-term bet. New fission breeder reactors, which convert non-fissionable material into fuel—*while they are producing power*—are being developed, with the Soviet Union in the lead, followed by the United States.

Research is also underway to develop a *fusion reactor* in an attempt to harness the power of the hydrogen bomb. If this long-term project succeeds, fuel will be almost limitless because the oceans supply the heavy water (water enriched in deuterium), the basis of this "fuel." But this is probably decades away.

Solar: Each day the sun's rays deliver the equivalent of one million megawatts to our earth. However, to collect enough solar energy to equal one modern power plant (1,000 megawatt capacity) would require a factory "umbrella" spread over an area of 42 square kilometers. Possible, but hardly practical.

Hydroelectric: The world's water power potential is about four times the total present electric power capacity. But there are two serious drawbacks to developing more: Many people are no longer willing to sacrifice beautiful scenery and productive cropland to produce electric power. And most sites can produce power for less than a century before the reservoirs behind the dams fill with sediment.

Geothermal: Using the natural heat from the Earth's interior can sustain small power plants in local situations. It has been used in Italy for years. More than one oil company is drilling test holes, probing for this energy. However, the potential has been estimated at only 8 percent of the world's total present electric power capacity.

Tourists from industrialized nations traveling through rural Asia and Oceania smile at the local use of paddy husks, coconut shells, jute sticks, and cow dung for heating and cooking. Yet their own children's children may have to resort to such fuels because of drastic energy shortages. Fossil fuels, we must remember, are non-renewable resources and once burned, they're gone forever.

TERRORIST RAID AT THE OLYMPIC GAMES IN MUNICH

Mr. BEALL. Mr. President, I was shocked and distressed to hear of the tragic incident that has marred the 20th Olympiad in Munich, Germany.

These games bring together athletes from all corners of the globe without regard to race, religion, or social, economic, and political systems. The competition actually serves to bring the world closer together and I commend the Olympic officials for the contribution they have made to increasing international understanding and the cause of world peace.

Today's guerrilla raid on the Israeli compound in Munich is an act of unmitigated barbarism. This type of senseless violence has absolutely no place in any peaceful forum where nations meet to increase their awareness of one another. This brutal raid, which was designed to take advantage of the fact that the world's attention is focused on Munich, serves only to weaken the respect for the Arab cause.

The nations directly involved, as well as the rest of the international community, should respond to this barbaric act with determined resolve. I urge the leaders of the Arab world to denounce this criminal act and demand the release of the hostages. The ultimatums should be unequivocally rejected, the terrorists should be captured and tried in accordance with West German law, and the Olympic games should continue—after an appropriate observance of mourning for those participants who have lost their lives.

RURAL MINNESOTA: THE HEALTHIEST PLACE TO LIVE

Mr. HUMPHREY. Mr. President, the New York Times of August 18 contains an article by Mr. Andrew H. Malcolm about a recent study conducted by the American Medical Association revealing its latest profile of the "healthiest American," who, I am proud to report, is a 16-year-old farm boy named Dick FitzSimmons, living near Good Thunder, Minn.

In their study, the AMA found, on the average, that farm people are healthier than city people, Middle Westerners are healthier than any other region's residents, men healthier than women, young healthier than old, affluent healthier than poor, whites healthier than blacks, those living with relatives healthier than those living alone, and July through September the healthier months of the year.

This particular study not only extolls the virtues of farm life with its abundance of exercise, clear air and open spaces, but, in particular, reveals the wonderful and refreshing quality of life of rural Minnesota.

Mr. President, the Senate recently took final action on the Rural Development Act of 1972, which the President subsequently signed. This historic piece of legislation will, if agressively administered, enhance and broaden the opportunities for farm and rural citizens to remain in rural Minnesota as well as other rural regions of our Nation. It will also hopefully make it possible for many millions of other Americans now living in overcrowded cities to choose a life in the countryside or a smaller community if they desire to make that move. According to this latest AMA study, a healthier atmosphere and way of life is also awaiting them there, should they make that choice, especially should that choice be rural Minnesota.

Mr. President, I ask unanimous consent that Mr. Malcolm's article entitled "Midwest Farmboy: A Picture of Health," be printed in the Record.

There being no objection, the article was ordered to be printed in the Record, as follows:

Midwest Farmboy: A Picture of Health

(By Andrew H. Malcolm)

Good Thunder, Minn., Aug. 17.—The farmyard light keeps its nighttime vigil over by the toolshed where the farm's six tractors are resting.

Then, slowly, a thin band of pink light eases up into the eastern sky just over the tasseled tops of the mile-long cornfield. As if on a signal, the crickets' chirping gives way to the birds' singing. The stars start to fade. And soon the sun is out, baking the corn and soybeans and anyone not in the shade.

But by then, 16-year-old Dick FitzSimmons has already had his first breakfast and done over an hour of calisthenics for the upcoming football season.

A sturdy 5-foot-10-inches tall, young FitzSimmons has long, dark blond hair billowing over his forehead. His tanned hands are strong and toughened. He is, in fact, the very embodiment of the American Medical Association's latest profile of the healthiest American—a teen-age boy living with moderately affluent parents on a farm in the north-central United States in the summertime.

DISABILITY DAYS

The medical group reached its findings by analyzing the nation's disability days—days when a citizen's normal activity is restricted by illness.

On the average, the A.M.A. found farm folk healthier than city people, Middle Westerners healthier than any other region's residents, men healthier than women, young healthier than old, affluent healthier than poor, whites healthier than blacks, those living with relatives healthier than those living alone and July through September the healthiest months.

For Dick FitzSimmons, a soft-spoken farmboy in Good Thunder (pop. 468), 1,100 miles west of Times Square, as for thousands of other farm residents in towns like Freeborn, Blue Earth and Blooming Prairie, problems like crime and smog are remote.

So on these muggy summer days, life goes on as usual—slowly, physically demanding, fiercely independent and dictated, as always, by nature and a never-ending list of chores.

There is also always something to be repaired. But it would never occur to anyone to call a repairman. If anything is broken, you fix it yourself.

BIG SPREAD

The FitzSimmon's place is a sizable spread, 1,400 acres farmed in partnership by Robert FitzSimmons and his brother, Michael. They raise over 600 hogs, as well as corn, soybeans and oats, and the income brings Robert Fitz-

Simmons—Dick's father—around $17,000 a year.

But it could all be gone tomorrow in the pelting fury of a hailstorm. And it means a lot of six-day work weeks and very long days for everyone in the family.

Dick awakens at 5 A.M. nowadays, grabs a piece of toast and a pillowcase holding his clean athletic clothes and heads down the dirt road in his seven-year-old Chevelle, the deep-throated mufflers echoing off the towering corn at roadside. His tape player blares the Grass Roots singing "Walking Through the Country."

Twelve miles and 15 minutes later he is in the locker room of the Amboy-Good Thunder High School. By 5:50 A.M. he and 50 other football hopefuls are on the field, where the mosquitos rise in tribute from the dew-covered grass.

"A BEAUTIFUL MORNING"

"It's a beautiful morning," barks Rich Bullard, coach of the Chargers. "C'mon, FitzSimmons, move it." And he does, for two hours, until the once-white T-shirt is soaked with perspiration and dirt and grass stains.

Then a shower and a quick drive to Larson's Gas Station and Lunch Counter where he downs 20 ounces of milk and a couple of his favorite caramel rolls.

At home, young FitzSimmons, his father and some cousins bale straw, expertly stacking over 300 of the dusty 50-pound bales on wagon after wagon under a cloudless deep blue sky. Very quickly Dick's clean brown shirt shows the stains of perspiration.

"I don't know why it's never cool when you're putting up hay or straw," he mutters.

Mrs. FitzSimmons, who is finishing her four daily loads of wash, serves lunch at noon—over three pounds of hamburgers, two dozen ears of corn, a salad, cottage cheese, peaches and pitcher after pitcher of cold milk. In the summer Mrs. FitzSimmons buys at least 14 gallons of milk a week.

"But I've never bought any vitamin pills," she says. "We never seemed to need them. We just get lots of fresh air, exercise and work."

She doesn't recall exactly when anyone in her family was last ill. "I think we had someone down in bed back in the early sixties," she says, "and Dick had a sore throat a few winters ago." Last year's medical bills for the 11 members of the family totaled $203.17.

"I guess we just don't have time to be sick," says Dick FitzSimmons as he buckles on his heavy work boots. His afternoons are spent bailing straw, running errands in town, feeding the hogs, overhauling a tractor or his car or turning the soil between crop rows to keep weeds down.

But every so often those tasks are interrupted by one of those awesome, flashing Middle Western thunder storms that come rumbling in off the Western prairie, within minutes soaking Good Thunder's black soil before rolling on eastward.

This summer it has rained more than usual here—and at the right times. The corn is now over seven feet high and many stalks have two ears. So it looks like a bountiful crop to be sold or ground up to feed the pigs. Feeding the pigs is one of Dick's last chores before an early dinner of pork chops, green beans, carrots, a salad, milk and, perhaps, a homemade doughnut or two.

But by 6 P.M. young Mr. FitzSimmons, who is unsuccessfully cultivating a mustache, is back on the football field in Amboy in search of a likely starting assignment as center and middle linebacker. After another shower he discovers his weight is 159 pounds, a loss of nine pounds in two days.

At home around 8:30 he works on his car, tosses a football around with his brothers or telephones his girl friend, Julie Shouts, a sophomore cheerleader. He usually gets to bed by 11. On Friday nights they see a movie in Mankato, 13 miles to the north, or sip a soda at the Pioneer House Cafe in Good Thunder, where Jesse James is reputed to have once shot his horse.

Mr. FitzSimmons, a junior who gets average grades, has no desire to attend college. "Dad keeps saying this land will be ours someday," he says, and I reckon he's right. I'll stick to farming. It's all I've ever known, you know. No one's hanging over your shoulder all the time telling you what to do. I'd just go up a wall."

Besides, he doesn't like cities. He and three friends recently camped in northern Minnesota, visiting a city on the way home. "That Duluth is a mad place," said Mr. FitzSimmons, "tne people are all over you. And all those hills . . ."

FITTING THE HANDICAPPED FOR JOBS

Mr. DOLE. Mr. President, the mentally handicapped face a multitude of problems in their lifetimes, but many difficulties could be minimized if they were only given a chance to lead more independent lives. Gainful employment is one of the surest routes to this independence, for a good job offers the handicapped a chance for self-support and self-respect.

But before an employer hires a mentally handicapped job applicant, he has a legitimate interest in knowing how well the individual will be able to handle the responsibilities and problems of the job. He wants to know how well the individual communicates; can he be understood on the job? How will his fellow employees communicate with him? Can he understand and use the vocabulary required for the position? And if a individual is looking for a job in business or sales, for example, has he been trained to handle money? Can he use the telephone?

A major effort to supply the answers to these questions and to increase opportunities for the mentally handicapped has been initiated at Union High. School counselors can for the first time assure that prospective employees have such skills and can perform all their duties.

A description of the process involved in preparing the handicapped for employment is found in an article written by Velma Krauch for American Education. I ask unanimous consent that the article entitled "Fitting the Handicapped for Jobs," be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

FITTING THE HANDICAPPED FOR JOBS

(By Velma Krauch)

The noontime rush was just beginning. Customers hurried into the small hamburger shop and headed for vacant stools along the counter. As they seated themselves, Bruce, a 16-year-old part-time student worker who had been setting out silverware and napkins, picked up his order pad. This was the cue for a cameraman waiting nearby to adjust his equipment and focus on Bruce.

"One burger, with onion—and hold the mayonnaise," Bruce called out as he carefully translated the words onto his writing pad in newly learned restaurant code. He hung the order slip on a metal rack above the cook's counter, prepared a plate with lettuce and a slice of tomato, then went back to the counter and his next customer.

Most of the office workers and businessmen who flocked into the restaurant for their quick-order lunch were in a hurry; a few were downright impatient. Bruce, trying to conceal his shyness and nervousness, smiled pleasantly as he took orders. Off to one side, removed from the crush and confusion of the lunch crowd, the cameraman continued with the filming, catching the attention of a few customers who paused to stare. Was a movie scene being shot? A TV documentary perhaps, or maybe something to catch on the six o'clock news?

The fact is that this little episode was none of these things. It was instead a part of a job training program. The cameraman was a television producer-director from the Fullerton Union High School District in the Los Angeles area. He was filming Bruce as part of Project Worker, a special Fullerton High career education program launched in 1968 and designed for handicapped students. The program is more particularly aimed at training and finding jobs for three groups: the educably mentally retarded (those with IQ's that fall below the "normal" range according to standard testing and who have learning difficulties and, more often than not, accompanying emotional problems); the educationally handicapped (those with average and above average IQ's but who are afflicted with learning disabilities in one or more clearly defined areas); and the orthopedically handicapped (those with physical disabilities and, in some cases, learning and emotional difficulties).

Says Nolan Noble, administrator of instructional services, "The handicapped student obviously will be competing at a distinct disadvantage because of his limited learning or physical capabilities. We feel it is our responsibility not only to develop programs that will train these high school students but also to graduate them with skills for which there is a specific demand."

Adds Walter Retzlaff, director of Exceptional Pupil Services and overseer of the project, "We're not babysitting anymore. These students are learning marketable new skills or upgrading those they already possess."

Of approximately 700 students in various special education classes throughout the Fullerton district, some 250 are in Project Workers. Within the district there are three centers for the educable mentally retarded, 12 educationally handicapped sections, and one orthopedically handicapped facility. Classes are small, and any one of them will have students of different abilities working at different grade levels. This variegation succeeds because the emphasis is on the individual—the guiding principle being that each individual is unique and of value, that each has the potential for growth, and that each should have the opportunity to develop that potential.

When a student comes into Project Worker, the staff attempts to find out everything it can about his abilities, aptitudes, and difficulties. Staff members consult in his school records, administer psychological and vocational tests; discuss his condition with teachers, parents, and others who know him well. Priority is placed on searching out the student's own individual needs and special abilities, and his potential for particular kinds of work. Then an attempt is made to match his interests with a suitable job. The emphasis on job training does not mean, however, that academics are left behind.

"If a student's weakness in a certain academic area would prevent him from being hired, then we work on strengthening that weakness in terms of the job he has specifically selected," says John Dewey, a staff vocation specialist. "In some cases, the handicapped person may end up being better trained in that one area than a regular student."

In his beginning year the handicapped student is asked to plot out his personal objectives and goals and start a work-study schedule that calls for classroom-supervised training in such areas as simple office work, washing windows, hosing down patio areas, helping clean laboratories, or setting up for food service in the cafeteria. During this time the teachers closely observe the student's attitudes and performance. Is he able to follow directions well? Is he consistently on time? Does he get along with other people?

"When he demonstrates he's job-ready," says Carol Michael, a department head for the educable mentally retarded, "we place him in an on-campus job situation—the cafeteria, the library, the autoshop, an office, or any number of other available spots. Sometimes with pay, sometimes not. Either way, in most cases the student sets up a pattern of reporting as a regular employee and working for a boss for an established amount of time—usually an hour—each day."

Generally, students hold on-campus jobs during their second year of high school, and most move to an off-campus job during their last two years. Their daily schedule calls upon them to spend two hours on the job, another two hours in regular classrooms, and two hours in special education.

To ready himself for on-the-job training, the student begins an individual study plan. He selects three jobs in which he has an interest and then studies the situations in which he will be expected to perform. His work counselor arranges for him to visit, under supervision, actual work sites in those fields which he has chosen. At these sites he is given an opportunity to talk with workers and potential employers. On the relatively rare occasions when a firsthand visit is not feasible, the staff uses a collection of tapes, slides, pamphlets, and films focused on various job categories.

Students also go through classroom simulations of jobs. If a particular job normally calls upon the employee to work standing up, then the trainee is expected to stand. For one student, a "mockup" station could mean learning to make change from a cash drawer, as was the case for Bruce. For a mechanic trainee, it might mean following directions in repairing automotive equipment, or for a potential nurse's aide, practicing bed-changing techniques with sick patients. During the tape showings and simulation sessions a teacher or teacher aide is in the classroom to guide the student and reinforce his progress.

To illustrate: Bruce chose to work as a waiter in a hamburger drive-in. With his "minimal brain dysfunction" giving him a memory bank on the level of a seven-year-old, Bruce obviously needed special help. His reading was at a third-grade level. Thus remembering instructions and being able to sift out what applied to him was a continual challenge.

Seated at a table with a cash drawer and real money, Bruce drilled on problems of making change as they were flashed on the small TV screen in front of him. The narrator on the screen posed a specific situation, then paused a number of seconds to afford Bruce time to do the necessary computation and then physically to make the proper change. When the correct answer was revealed, Bruce compared the change he had made with the coins and bills shown on the screen.

In addition to working this exercise, Bruce drilled singly or with a teacher memorizing food prices and restaurant order abbreviations. This drill was done in a corner of the classroom using a Carousel slide projector synchronized with tape-recorded narration. The small screen was darkened by folding out hinged wooden sides and top, thereby eliminating the need to darken the entire classroom. Thus by drilling himself daily, Bruce was able to develop the skills he needed to fill the requirements for his chosen job.

Later in the classroom training, when his job choice has been narrowed to a single selection, a student begins learning from videotapes that have been prepared by the district's full-time television technical adviser in cooperation with a work-study coordinator. A videotape library is maintained at the instructional materials center which distributes tapes to all high schools where the project operates. In some cases, training tapes are provided by an individual company or a particular industry.

When a student's performance is seen to be about on a par with that of the worker in the training film, the teacher records the student's actions on videotape for purposes of comparison and evaluation. When the program first began, tapes that displayed students at their maximum proficiency were shown to prospective employers, but this practice proved to be so time-consuming for the employers that it was dropped. Now, interested employers are briefed on a student's competence by a counselor and given a one-page written report on the student's qualifications.

Once a student attains a degree of proficiency in his classroom drills, arrangements are made to place him with an employer participating in the project for on-job training. The employer evaluates him on a quarterly basis. When needed, one of the student's teachers or his counselor is available to consult with the employer.

To insure a steady availability of jobs for the trainees, counselors regularly visit local business firms to solicit their participation in Project Worker. Says one counselor, Carson Hall, "We do a selling job on the advantages of hiring the handicapped. With the help of a three-minute tape we show an employer how we can save him time in recruiting eligible people for jobs that are hard to fill because, for example, of the unusual hours involved. We have a large number of students available at odd hours for full-time or part-time work. And we assure the employer that if one student doesn't work out, we can replace him with another at no cost in time or money to him." To the extent possible, Project Worker attempts to line up jobs that are within walking or bicycling distance of the student's classroom.

When an employer signs up to participate in the program, the counselor provides the students with a written report describing the various conditions and qualifications called for in the job or jobs this employer can offer—whether the student will work inside or outside, whether he will be in cramped quarters, the moving objects he will need to be aware of and what hazards he might encounter, whether the job requires the students to work alone, what special instructions he will be asked to follow. Accompanying this report is a detailed job description and task analysis. The student thus knows in advance what is expected of him before he opts for a particular job.

During his rush-hour filming scene, Bruce was working a daily two-hour, on-the-job shift which is a component part of his special high school curriculum. Subsequent to this "post-employment followup" staged by a counselor, Bruce had an opportunity to view his on-the-job performance and to hear the comments and suggestions of his classmates and his teacher. Actually, the film was designed not only to indicate to Bruce those particular aspects of the job in which he needed to improve but, in showing his accomplishment, to inspire in his classmates a determination to do as well.

Teachers frequently serve as cameramen in the videotaping process. For the more tightly focused evaluative work in a classroom a teacher can use a small, portable taping unit, powered by batteries. When larger areas are involved—service stations, warehouses, or manufacturing plants—the television producer transports regular camera equipment in the district's mobile van.

"Our program is more than 'just another vocational class for the handicapped,'" says one of the teachers in the project. "These kids have hope now. Many of them have been unable to cope with regular classes and could think of themselves only in terms of failing. In Project Worker, one of our first aims is to help them feel better about themselves, to appreciate what they have, and to know that they have a job potential."

Because his job situations is integrated with his school curriculum, Bruce receives work credit for his hours of employment. Also while on the job he is paid $1.65 per hour, the going wage for his job classification. "We don't allow our students to be exploited," says Retzlaff. "If they are capable of performing in their chosen job, we expect them to be paid accordingly and see to it that they are."

Records to date indicate that close to three-fourths of the students in Project Worker are satisfactorily employed, with the number growing as the semester progresses. The program has attracted the participation of 31 companies, some locally owned, some chain-operated. Among them are restaurants, service stations, motels, a supermarket, a department store, manufacturing plants, and an automotive repair shop. Students prepare for such job classifications as assembler, waitress, food preparer, moldmaker, nurse's aide, service station attendant, secretary, office worker, cook, counterman, and sewing machine operator.

And about hiring the handicapped, what do employers say? "Our problems are no greater with them than with other students," says one restaurant manager. "We recognize that the educationally handicapped perform best in set procedures, and if the procedures vary, they may have a tendency to become confused. So we keep an eye on them. Regular students will look for shortcuts, but handicapped students are rigid in hewing to the line."

Then he adds: "But by the same token, they're usually gung-ho because they're holding a paying job, and a certain amount of prestige goes with that. And for us, it's extremely difficult getting consistent, part-time help. These kids can come when we need them. In the case of Bruce, he's one of my best workers—serious, ambitious, and he's learning to think things out on his own."

Says a local manufacturing-plant owner, "Our mentally retarded worker was so well trained when he first came to us that our regular employees took it for granted he could handle more than he really could or should. As a result, he got into a situation where he made the mistake of slipping up on a crucial ingredient in a plastic mixture, which meant some dollars lost for us. But after that, we just made sure someone checked him at this point of the operation. Now he's one of our best workers—reliable, extremely cooperative, and he takes pride in his work. Last summer we hired him full time as a 'regular.' I wish I had more like him."

Project Worker evolved from a concept of Howard Levine, a teacher on one of the eight Fullerton High School district campuses. Levine had already adapted tape-recordings to his approach to teaching the educable mentally retarded and planned to apply for Federal money to support a program that would train such people in job skills. He was thinking of limiting the program to one school. But the idea generated so much enthusiasm that Nolan Noble and Walter Retzlaff proposed an expanded program to be attempted on a districtwide basis. With Superintendent Lenard Murdy lending assistance and support, Project Worker was launched.

Funds came from a Federal grant under title VI–B of the Elementary and Secondary Education Act and also the Vocational Education Amendments. "We ran up our share of wrong-way streets and dead-end alleys until we finally came up with what we believe is a realistic approach," says Retzlaff.

"Now we feel that anyone launching a project of this nature could duplicate it at almost half our original cost."

Understandably, one of the persistent problems is in obtaining personnel who can handle both special education teaching and the technological know-how of videotaping and general television mechanics. Project Worker teachers hold credentials in the field of special education and are required to attend regular inservice workshops during the semester.

Recalls Retzlaff, "We lost a couple of teachers with this new program, but most are very supportive. A few still have reservations, but then there are some so enthusiastic they push us to try new things."

In accenting the positive, one of the satisfying effects of the program has been that the school board and the Fullerton staff have helped make the community think first of the abilities of these young people rather than their disabilities. And in the judgment of Superintendent Murdy:

"Project Worker demonstrates that the educable mentally retarded, the educationally handicapped, and other handicapped students can learn many different tasks, both manipulative and intellectual, when a program of learning is carefully prescribed for each individual. It demonstrates that young people, even those with limited intellectual functioning, can learn when the student is the center of the instructional program. It demonstrates that equality of education is not the same program for all, but the best for each."

URGENT NEED TO CONTROL AIRPORT NOISE

Mr. TUNNEY. Mr. President, in the last few days, two important articles have appeared in the press on the subject of damage from and new attacks on airport noise.

The first article, which appeared on the front page of the Los Angeles Times on August 31, cites evidence from a University of California report that the physical and emotional health of children attending schools near Los Angeles International Airport is being threatened by jet aircraft noise.

According to the report, continuous exposure to a 90-decibel level is a health hazard and peak jet noises in the seven schoolyards surveyed ranged from 95 to 115 decibels. In the classrooms of those schools, jet noises resulted in levels of from 80 to 96 decibels, which, in one example, prevented children from distinguishing among the words "where," "we're," and "wear," because they could not hear the difference in sounds. To the physical and emotional effects from excessive noise must be added these problems in vocal response. Already, two schools around the Los Angeles Airport have been forced to close.

A second article on this subject appeared on the front page of the New York Times of September 3. Entitled "Clamor Against Noise Rises Around the Globe," the article carefully documents the case that noise, "belatedly recognized as the most ubiquitous and most annoying, if not the most deleterious of all the pollutions—is under new attack on many fronts."

Three bills to control noise pollution are now pending before Congress: H.R. 11021, which passed the House earlier this year, and S. 1016, the administration bill, are now pending before the Senate Public Works and Commerce Committees; S. 3342, which I introduced and which is cosponsored by Senator MUSKIE, is pending before the Public Works Committee.

The Air and Water Pollution Subcommittee completed action on S. 3342 on June 8, and the Public Works Committee has given careful attention to the legislation in three markup sessions since that date. While it is commendable that all aspects of the legislation be thoroughly considered, it is noteworthy that this legislation has been the subject of numerous hearings, extensive comment from outside groups, exhaustive staff sessions and discussions by members of the committee. It is to be hoped that the Senate will have a chance to act on the legislation in this session.

I ask unanimous consent that the two articles be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Los Angeles Times, Aug. 31, 1972]

Hearing Damaged: Jet Noise Threat to Students Told

(By Harry Nelson)

The physical and emotional health of children attending schools near Los Angeles International Airport is being threatened by jet aircraft noise, according to a UCLA study released Wednesday.

Noise levels at Felton Junior High, one of 15 schools under the east-west flight path, are so intense that children incur a high risk of permanent hearing damage, the researchers reported.

There have been examples of children having traumatic responses due to jet noise, school officials report a great number of fights among children at these schools and the air pollution is very high due to fallout of jet exhaust fumes, the UCLA study said.

Teachers are forced either to shout or lose teaching time as the jets fly over, causing strained voices. Sometimes the teachers and staff have had to use bullhorns to be heard, the report said.

EVERY 2 MINUTES

Because the schools are not sound-proofed or air-conditioned, the interruption of classroom activities by jet noise every two minutes results in serious disruption of the learning tasks, according to the report.

"These noise levels (in the classroom) exceed by far any known legal limits (or any criteria) for noise in houses, offices, schools, work places and outdoor recreation areas," wrote Dr. William C. Meecham, a UCLA engineering professor, and graduate student Samuel R. Lane.

Their assertion that the children's physical and emotional health are threatened is based on studies reported in the technical literature showing a relationship between high noise levels and hearing damage, psychosomatic disorders and emotional disorders.

Also, they said, hearing tests conducted by school nurses at Felton Junior High revealed that virtually all of the children tested had some hearing loss.

Airport officials declined comment until they could read the report.

Acoustic experts generally consider continuous exposure to a 90-decibel level as hazardous to mental and physical health.

Using precision sound level meters, the researchers surveyed seven of the 15 schools during the spring semester and found that peak jet noises in the school yards ranged from 95 to 115 decibels and in the classrooms from 80 to 96 decibels.

Airport Junior High at 9000 Airport Blvd. was closed more than two years ago because of noise and safety hazards from airplanes using International Airport. The year before that, school officials closed Westchester Elementary School for the same reasons.

TENFOLD INCREASE IN NOISE

The normal background noise level in a quiet neighborhood is about 45 to 50 decibels. An increase of 10 decibels represents a 10-fold increase in noise. Therefore, 100 decibels is 100,000 times noiser than 50 decibels.

The seven schools surveyed were Felton Junior High, Jefferson Elementary, Buford Elemenetary, Lennox High and Whelan Elementary in Lennox, and Woodworth Elementary and Morningside High in Englewood.

The report quotes a letter written in 1970 by Mrs. Sandrah Pohorlak, a teacher at Jefferson, which begins:

"Tonight my nerves are shot! I struggled all day in a losing battle against those jets. The children couldn't hear me and I couldn't hear them, unless I stood 18 inches away from them.

"A child asked me how to spell 'we're'. I say, 'Use it in a sentence, please. He says, 'I we're my jacket. Then I know very well he has not heard the fine sound distinction between where, we're and wear."

In compensating for the noise the children probably are becoming abnormal in their emotional response and vocal behavior, Meecham and Lane said.

They suggested three ways in which the health hazard might be decreased:

Operate the noiseiest aircraft in such ways as to reduce their noise levels.

Have incoming aircraft touch down on runways at a point one mile west of the present touchdown spot. This would allow them to fly over the school areas at a much higher altitude. Jets use only 4,200 feet of the 12,000-foot runways in landing, the report said.

Have all aircraft land from the west, or ocean side, instead of from the east.

A 10-decibel noise reduction is immediately possible by a reduction in throttle settings, a higher altitude or both as the aircraft approach the critical school areas, the report said.

Changing flight patterns so that all planes would land from the west would virtually eliminate the noise problem for most of the Los Angeles area, according to the researchers.

The Federal Aviation Agency recently announced the airport will begin testing a new landing procedure in which aircraft coming in from the north and west will approach over the ocean.

The new procedure, which will begin Sept. 21, applies only to aircraft landing between midnight and 7 a.m.

[From the New York Times, Sept. 3, 1972]

Clamor Against Noise Rises Around the Globe

(By Gladwin Hill)

WASHINGTON, September 2.—Noise, long tolerated around the world as an inevitable concomitant of accomplishment and progress, is reaching a historic peak of unpopularity.

Belatedly recognized as the most ubiquitous and most annoying, if not the most deleterious of all the pollutions, it is under new attack on many fronts.

The current debate in New York City over a proposed new antinoise ordinance is symptomatic of the growing clamor against din—a movement now involving the United Nations, Federal, state and local governments, science, industry, the legal profession and citizens.

Their common goal is to revitalize a public asset so fundamental that, ironically, it is cited in the first sentence of the Constitution: ". . . to insure domestic tranquility . . ."—a reference that courts have held covers noise. At stake in the effort are countless billions of dollars and possibly the mental and physical health of millions of people.

Evidences of the mounting concern about noise include the following developments:

Only last Wednesday, the University of California reported that children attending schools near Los Angeles International Airport ran the chance of suffering permanent hearing damage and were threatened emotionally because of jet aircraft noise.

The United Nations environmental conference in June pinpointed noise as an important area for international study and control.

Congress is now processing noise control legislation.

The states have begun adopting, comprehensive antinoise laws.

Cities are abandoning ancient ineffectual "nuisance" laws on noise in favor of more enforceable scientific standards.

Courts have been handing down an increasing number of rulings granting citizens physical or monetary relief from noise.

The medical profession, long preoccupied with the specialized problem of noise within industry, is giving more attention to the effects of noise on ordinary citizens.

Industry is giving quietness new emphasis in the design of many kinds of machines.

START BEING MADE

To date, no one has noted any marked increase in quietude across the nation. But many signs suggest that a start is being made on stemming the steady ominous increase in background noise in recent decades, and that an actual rollback of the country's cacophony level may not be far in the offing.

At the same time, the conquest of noise gives indications of being the most intricate and difficult of all efforts against pollution. On the troublesome side are such considerations as the following:

A certain level of noise, probably in an objectionable degree, is inherent in present patterns of urban life—although these can be changed.

Enforcement of antinoise laws is difficult because noise is intangible and so often fleeting.

Amelioration of a major noise source, airplanes, is a legal mare's nest that will be years in resolving.

Although persistent noise has irritated people to the point of murder, and there is evidence it can cause mental illness, noise's long-term effects generally are inconspicuous and scientifically imprecise.

Mobilizing public opinion against noise is difficult because people have become accustomed or even addicted to it (subconsciously, for instance, equating the thud of car doors and the roar of vacuum cleaners with solidity and power).

MEASURED IN DECIBELS

Noise is measured in decibels, on a scale that runs, for practical purposes, from zero, the threshold of human hearing to around 140, in the area of loudness that causes pain and permanent ear damage. Each increase of 10 on the scale represents a tenfold increase in sound intensity.

Thus, while 30 decibels is approximately the quietness of a library, 60 decibels represents a thousandfold increase in noise, and is about the point where it becomes objectionable. This is roughly the equivalent of big-city traffic noise.

Ninety decibels is the Federal limit for all-day exposure of factory workers, and constant exposure to more than 90 decibels can cause permanent hearing impairment.

The noise of jet planes is in the 90-to-120 decibel bracket. The volume of some rock concerts has been measured at over 130 decibels, where even short-term exposure can cause ear damage.

Measurements of environmental noise inevitably fluctuate from place to place and from moment to moment. Therefore there is no ready yardstick of the "noise level" of a community. However, experts concur that the noise level in American cities has been steadily rising rather than diminishing. The Environmental Protection Agency and other authoritative observers have estimated the increase at at least one decibel a year, equivalent to a tenfold increase in a decade. At this rate, they have said, by the year 2000 the general din would be deafening.

EXTENT OF DANGER DEBATED

How grave this danger is is a matter of debate among scientific observers. But most of the emerging evidence tends to substantiate concern about it.

The Environmental Protection Agency's latest figures are that about one out of 20 persons has some hearing impairment, and that in about 25 per cent of these cases, the impairment is "noise-associated."

"We are becoming a nation of auditory cripples," according to Dr. Moe Bergman of Hunter College in New York. "Environmental noise is one of the most serious public health problems, urgently requiring solutions and public controls."

Dr. Jack Westman, a University of Wisconsin Medical School psychiatrist, reported at a recent scientific meeting that housewives' increasing complaints of headaches, stomach upsets and nervous tension "are related to exposure to noise, which brings to the surface submerged tensions and results in emotional outburst."

STUDY MADE IN ENGLAND

A recent two-year study of 124,000 persons in two communities in England disclosed a significantly higher rate of admissions to mental institutions from the group that lived near London's Heathrow Airport, with recurrent exposure to 100 decibel noise.

Dr. Lester Sontag of the Fels Research Institute at Yellow Springs, Ohio, reported in 1969 that his studies of unborn babies "justify our concern about the possibility of fetal damage from such violent sounds as sonic booms."

And Dr. William F. Geber, a pharmacologist at the Medical College of Georgia, reported that rabbits and rats exposed to urban noise levels only 10 per cent of each day had produced 25 times as many defective fetuses as animals kept in a quiet environment.

Apart from bodily trauma, noise's toll is extensive. The World Health Organization has reported that in the United States excessive noise cost: upward of $4-billion a year in compensation payments, accidents, inefficiency and absenteeism.

Noise's depreciation of real estate values also undoubtedly runs into the billions. School buildings in Los Angeles and elsewhere had to be deactivated because airplane and traffic noise cut down effective classroom time by as much as 30 per cent. In Mesa Verde, Colo.; Bryce Canyon, Utah, and other national parks in the West, sonic booms have damaged ancient dwellings and caused landslides. The Air Force has had to pay out about $1-million in sonic-boom damage. The noise element was a big factor in the termination last year of the multibillion-dollar supersonic transport development program.

TWO TYPES OF NOISE

There are two kinds of environmental noise: the noise inherent in 20th-century machines, from kitchen blenders to airplanes; and entirely untoward manmade racket, from the snorting hot rod to the wild neighborhood party.

Four obvious avenues of noise abatement are available:

Making and enforcing laws against unnecessary manmade tumult.

Building quieter machines.

Muffling noise, through better building construction, landscaping and use of sound-absorbers such as trees and shrubs.

Through land use planning, segregating unavoidable community noise sources, such as industrial and commercial activity, heavy traffic and airports, from residential and recreational areas.

Generalized laws against undue noise go back to ancient Rome. Alvin G. Greenwald, a Los Angeles legal expert on noise, has counted more than 12,000 community noise codes in the United States. But until lately there has been little effective use of them.

ENFORCEMENT DIFFICULT

Equipment that will scientifically measure sound and record it can now be obtained for about $1,000. But catching of excessive-noise makers in the act, getting conclusive evidence and prosecuting them is a task most local law enforcement agencies have despaired of. The Los Angeles Police Department, when querried recently, could not produce statistical evidence of a single noise arrest last year despite a municipal antinoise ordinance.

Public apathy has contributed to noise increase. A recent visitor to Stockholm, a city with heavy traffic, heard an automobile horn only three times in three weeks. Yet of all the cities in the United States, only Memphis has achieved a comparable reputation.

Memphis in 1938 simply banned unnecessary horn blowing and began issuing tickets for it. This reduced offenses to a current rate of only about 150 a year. This has won Memphis numerous "quietest city" awards, although some Memphis residents say that in other respects it is not notably quieter than other cities.

STRESS ON VEHICLE NOISE

Until recently the most explicit effort to abate din was the action of a number of states in limiting vehicle noise on highways to around 85 decibels. But here also enforcement has been sketchy.

Federal officials say California has the most comprehensive vehicle noise law. Its state highway patrolmen handed out 18,000 tickets last year for noisy cars. But with only six two-man teams to cover 162,000 miles of highways, the level of enforcement is admittedly low.

The first comprehensive state noise legislation was enacted by New Jersey last January. The law made excessive noise a state offense, with fines up to $3,000, and directed the state's Department of Environmental Protection to draw up antinoise regulations.

The agency is now in the process of implementing that legislation. A 13-member citizen council provided for in the law to review regulations is just being appointed.

"We're trying to frame a model ordinance for communities," the Environmental Commissioner, Richard J. Sullivan, said, so the state won't be in the business trying to deal with noisy neighborhood parties.

"Airplanes we can't do anything about, because the Federal Government has preempted jurisdiction. But we've got to formulate standards and enforcement methods for major noise areas like traffic and industry. A year from now we'll be able to tell you whether we're making any progress."

Illinois, Colorado, and some other states are in similar preliminary stages of noise regulation.

CHICAGO ANTINOISE PROGRAM

In July, 1971, Chicago put into effect the most comprehensive program to curb noise of any American city.

Its 3,000-word ordinance sets noise limits for a dozen categories of sources, from bulldozers to garden tools. The limits range from 94 decibels for heavy machinery down to 55 decibels as the maximum that may emanate from a residence. Progressive reductions bring the limits on vehicles and machinery down as low as 65 decibels by 1980. The law carries a penalty of up to a $500 fine and a six-month jail term.

The law is administered by the city's Department of Environmental Control, under a novel technique designed to overcome the classic obstacle in noise law enforcement: the fact that police officers do not have the time or technical wherewithal to issue citations, while technical people generally do not have police powers.

In Chicago three-man teams comprising two noise inspectors and a police officer cruise the city. When violations are spotted, citations can be issued on the spot.

Under this system, 1,649 cases were brought to court in the year ending last June. Of about 1,000 cases completed to date, convictions were obtained in 809 and compliance was obtained in most of the others. A $5,950 fine was imposed on the Grand Trunk Western Railroad for 40 violations at one of its loading docks.

Since Chicago instituted its program, another group of cities has adopted or moved toward similar legislation. The group includes New York, Washington, Baltimore, Kansas City, Mo., Dallas, St. Paul, Minneapolis and Grand Rapids, Mich.

The proposed New York City ordinance, like Chicago's, sets decibel limits for practically every sort of noise source, including subway trains.

It limits the blowing of auto horns to "emergency use" and provides for the muting of horns starting in 1974. A 76-decibel limit is set on car noise, as perceived at a distance of 25 feet, in the city, and this maximum is to be reduced in 70 decibels in 1978.

Enforcement of the ordinance is assigned to the Police Department, with criminal penalties ranging from a $50 fine to $2,000, and 60-day jail terms.

The proposed ordinance has been challenged by people in the construction industry as entailing undue increases in building costs. It is expected to come to a vote in the City Council around the end of September.

AIRPLANES CITED AS SOURCE

The most acute single source of noise is airplanes. About one out of every 10 persons in the country lives close enough to airports to be bothered by plane noise and the number of airports and the amount of air traffic are expected to multiply in the years ahead.

Abatement of airplane noise is a legal puzzle that has lawyers and public officials, as airport area residents, in a quandary.

The Federal Aviation Administration has jurisdiction over all civilian air traffic and over many aspects of airport design and operation. In 1968 Congress also gave the agency the authority to set noise limits on planes from a design standpoint.

In November, 1968, the F.A.A. promulgated limits of 102 to 108 decibels, as "perceived" from nearby points, for the new "generation" of jumbo passenger planes—the 747's, DC–10's and L–1011's.

The older passenger jets produce from 110 to 120 decibels. Argument has been raging for two years about quieting aircraft engines, with the air transport industry saying "retrofitting" is impractical because it would cost a billion dollars. The F.A.A. is expected to issue some modification requirements within the next few months.

AIRPLANE NOISE CONTINUES

Meanwhile, the F.A.A.'s design limits on plane noise do not necessarily match the amount of racket a plane may make flying over a community, and the F.A.A. does not profess to monitor or police individual flights' noisemaking.

This appeared to leave a jurisdictional gap in which communities could set noise limits for airplane operations. A number of communities have tried this. But the Federal courts have repeatedly invalidated such ordinances as an intrusion on a Federal regulatory area.

A Burbank, Calif., "curfew" banning jet traffic between 11 P.M. and 7 A.M. is before the United States Supreme Court and a contested Inglewood, Calif., regulatory ordinance is headed there.

The jurisdictional gap has left airport operators in the middle. California courts have awarded several million dollars in property devaluation damages to residents around the Los Angeles International Airport and the city of Los Angeles is faced with nearly $5-billion in additional suits. Hundreds of similar suits have been filed in other parts of the country.

The jurisdictional bind was made particularly acute in May when a California court ruled in a case involving the city of Santa Monica that an airport was liable not only for property devaluation but also for compensation for personal annoyance.

This ruling moved Los Angeles officials to exclaim that on that basis they might have to close down the Los Angeles airport, second busiest in the country, lest they incur astronomical damage claims. The problem remains unresolved.

Meanwhile, the state of California, which contends it can legally promulgate aviation regulations as long as they do not conflict with existing Federal enactments, is preparing to put into effect in December flight restrictions aimed at reducing noise. The state fully expects its regulations will be challenged by the Federal Government and the airlines.

The mounting concern about airplane noise convinced Congress it should do something about noise generally.

In December, 1970, it created an Office of Noise Abatement and Control in the Environmental Protection Agency, and directed it to study the problem.

The agency turned in a massive report last January. The House of Representatives in February passed a noise control bill (HR 11021) drafted by Representative Paul G. Rogers, Democrat of Florida.

It directs the environmental agency to establish national noise emission limits for four kinds of machinery: transportation equipment, construction equipment, motors and engines, and electrical equipment. It authorizes the agency to assess civil fines of up to $25,000 for violation of these standards by manufacturers and distributors.

In regard to airplanes the measure gives the environmental agency only an advisory role, leaving authority with the F.A.A.

TOUGHER BILL IN SENATE

The Senate has been considering a more stringent bill (S. 3342) sponsored by Senators Edmund S. Muskie of Maine and John V. Tunney of California, both Democrats.

The chief difference in the Senate bill is that it would give the Environmental Protection Agency comprehensive jurisdiction over aircraft noise—even though the agency has demurred at accepting this responsibility on the ground it lacks technical expertise.

The Senate has completed committee hearings and the next step will be to reconcile House and Senate versions of the legislation.

Both bills give the states leeway to formulate their own noise control regulations as long as they do not conflict with Federal standards. The laws would also provide states with technical assistance from the Environmental Protection Agency in setting up organizations to administer noise-control regulations.

EFFORTS BY INDUSTRY

Industry began sensing the public unhappiness about noise several years back, and doing something about it.

The auto makers have been trying to make cars quieter. New York City last year completed replacing its old fleet of 1,480 clanking refuse trucks with quieter hydraulic-compaction trucks.

Inspired by European progress, American manufacturers have been designing quieter air compressors, a major racket-maker on construction projects. Research is under way to tone down tne noise of diesel trucks, whose snorting often reaches the noise level of jet planes.

New York City is experimenting with such refinements as recorded siren noises for emergency vehicles, which can be focused at street level, rather than actual sirens, which project a needless barrage of sound in all directions.

The "leisure time equipment" industry, involving everything from snowmobiles to hedgeclippers, advanced last year through the National Industrial Pollution Control Council a noise-reduction program for machines. Under it, equipment noise now as high as 92 decibels at a distance of 50 feet would be reduced over the next decade to a maximum of 77 decibels.

LAND USE PLANNING

The least-used tactic to date to lessen noise has been land use planning, because most of the nation's communities are locked in, at least for the time being, to archaic layouts in which noise problems were not considered.

Congress has before it several proposals for Federal-state collaboration in more rational land use, in which noise would be a factor. But the measures have been bogged down in debate, and there is no telling when, if ever, legislation will emerge.

Meanwhile, the chief influence in this direction has been the Department of Housing and Urban Development, which can control many things through its construction financing.

A year ago the agency set noise limits in construction specifications and in the location of buildings financed by H.U.D. As a result plans for a number of big projects have been altered.

A planned residential development near the new Dallas-Fort Worth airport in Texas was relocated. Noise-reduction features were superimposed on the design of a nursing home in New York City. H.U.D. is a party in the environmental-impact delay in construction of the new outlying Los Angeles airport at Palmdale.

Perhaps the nation's most venerable anti-noise campaigner, is Dr. Vern O. Knudsen, an internationally noted acoustics expert and chancellor emeritus of the University of California at Los Angeles.

As far back as 1927, in an era of relative silence, he said: "Americans today are paying in shortened tenure of life and reduced efficiency for the noise amid which they must work and live."

Dr. Knudsen is naturally pleased with the blossoming of public awareness of his favorite problem. But he does not think it's any too soon or too fervent.

"I always used to say, quoting Victor Gruen, that noise and smog are slow agents of death," he said recently. "But in a few years we can change 'slow' to 'sure' if this continues. If everybody gives up, we'll be like the dinosaur."

CARE OF THE MENTALLY RETARDED

Mr. TOWER. Mr. President, I am pleased to join Senators JAVITS and WILLIAMS, and other Senators, in the sponsorship of S. 3759. This legislation is to provide for the humane care, treatment, rehabilitation, and protection of the mentally retarded in residential facilities through the establishment of strict quality operation and control standards. Also, it supports the implementation of such standards by Federal assistance and establishes State plans which require a survey of need for assistance to residential facilities to enable them to comply with the standards set forth in this measure. It seeks to minimize inappropriate admissions to residential facilities and develop strategies to stimulate the development of regional and community programs for the mentally retarded which include the integration of such residential facilities.

Mental retardation is one of our Nation's leading health, social, and economic problems. It is widespread, with an estimated 6 million Americans afflicted by it and 120,000 mentally retarded born in the United States each year.

Because of the thousands who reside there, residential care for the mentally retarded demands particular attention. Nationally, 200,000 mentally retarded live in institutions. Texas Department of Mental Health and Mental Retardation facilities were caring for almost 13,000 residents at the close of fiscal year 1971, with over 1,000 on the active waiting list. Also, the quality of residential facilities is crucial due to the greater dependence on their environment than nonretarded individuals. In order to develop their full genetic potential, we must work toward optimum quality in their institutional surroundings.

Texas has made progress in providing for the retarded. New construction was completed at facilities in Corpus Christi, Lufkin, Abilene, Travis, Lubbock, and Richmond, helping to make possible 835 new first admissions during the fiscal year 1971. Also, there was a decrease in the number awaiting admission to mental retardation facilities of over 30 percent.

I am also pleased that Texas institutional programs for the mentally retarded were aided by over $2.9 million in Federal grants.

In order to further aid State, local, and private efforts to improve institutional life for the mentally retarded, I urge passage of this legislation. It will significantly work toward a better life for these mentally retarded who are so dependent on our help.

Specifically, this legislation makes the following provisions:

The bill authorizes $15 million to be appropriated for fiscal year 1973 and each of the 2 succeeding years for State strategy planning. This money is authorized in order to assist the States in comprehensive surveys and analyses of the cost of bringing existing facilities into compliance with the standards of this act and to review existing State plans regarding provision of services and programs for the mentally retarded. It would also aid in the development of strategies which include mechanisms which minimize inappropriate placement in residential facilities and aid in the study of administrative relationships.

Second, it authorizes $15 million to assist the States in upgrading existing residential facilities for the mentally retarded in order to provide the resident with an environment conducive to his development and a fulfilling life. Grants not exceeding $300,000 per institution could be made to cover costs of administering and operating demonstration facilities and training programs.

Third, this legislation would make authorization for appropriations of such sums as are necessary to assist States in meeting the expenses for bringing publicly operated and publicly assisted facilities into compliance with the standards of part C of this act. Priority consideration will be given to those applications whose facilities are in greatest financial need in order to comply with this act. It outlines steps which a State must take in order to receive such grants. Criteria for the amount of grants, payments of grants and maintenance of effort by applicants are also prescribed.

Fourth, this bill provides that 5 years after enactment, no residential facility for the mentally retarded shall be eligible to receive payments either directly or indirectly under any Federal law, unless such facility meets the standards promulgated under part C of this act.

Fifth, for cases in which appropriations for grants under section 1102 of this act do not meet the amount authorized, this legislation authorizes extension of time for the recipients of such grants to comply with the standards of this act.

Sixth, it also makes provision for alternative programs of care to provide community living situations for the mentally retarded other than living-in residential facilities.

Seventh, this legislation establishes a 15-member National Advisory Council on Standards for Residential Facilities for the Mentally Retarded. A majority of this Council shall be representative of consumers of such services. It will advise on regulations implementing standards, study and evaluate such standards to determine their effectiveness, and recommend any changes or improvements in the standards.

Eighth, this bill establishes "Standards for Residential Facilities for the Mentally Retarded." These consist of a detailed and comprehensive description of the standards with which a residential facility must comply in order to qualify for assistance under this act, and eventually, for assistance and funds under any Federal program. These are in the areas of administrative policies and practices, resident living, professional and special programs and services, records, research, safety, and sanitation, and administrative support services.

I believe that these standards and means of Federal assistance will result in significant improvement in the care provided for those who live in residential facilities for the mentally retarded. For the sake of these individuals who are so dependent upon society's help, I urge the passage of this legislation.

NATIONAL FOOD AND FIBER BOARD

Mr. HARTKE. Mr. President, the American farmer is in trouble. For two long decades he has been caught in the grips of an increasingly devastating cost-price squeeze. This squeeze has taken a terrible toll. Every year, 70,000 farm families are forced off their land into our already congested cities. The departure of these families from rural America has now swollen into the greatest mass migration in history. Most of these losses have not been marginal, inefficient farms, but sound, productive units that have produced efficiently down through the years and that could have continued to do so had they been given a chance. Thus, while the productivity capability of America's farm plant has increased dramatically over the past two decades, that increase has been an unrewarding one for the Nation's small- and medium-sized commercial farmer.

The steady and seemingly inexorable demise of the family farmer has, in large measure, been caused by the rise of highly organized big businesses which seek to consolidate their economic power and eventually control this Nation's food supply system. With the independent farmer standing by helplessly, the gigantic corporate interests continue to absorb our productive farmland and turn it into big, depersonalized business units.

With both political parties, the economic power of agribusiness has had far more political clout than individual farmers. The revolutional changes which threaten to alter for all time the face of American agriculture, could not occur without the acquiescence and encouragement of our Government. The American farmer deserves newer and more imaginative thinking from Washington. One such dynamic proposal has come from the Honorable J. J. Exon, Governor of the State of Nebraska. His suggestion for the establishment of a National Food and Fiber Board represents the type of approach which will reverse the current trend of agribusiness.

Mr. President, I ask unanimous consent that Governor Exon's statement on this subject be printed in the Record.

There being no objection, the statement was ordered to be printed in the Record, as follows:

A New House for Agricultural Policy

During the past year, as Governor of one of the Nation's leading agricultural states, I have had the opportunity to visit with many other governors, congressmen and U.S. Senators concerning what I believe to be among the most pressing of problems facing the vast part of our Nation that exists outside the huge metropolitan areas. I refer, of course, to the problems of modern agriculture.

I am convinced that without an economically healthy agricultural production industry, many of the problems facing rural America will never be solved.

Without a healthy agriculture, plans for economic development in many of our small towns will not be able to accomplish established goals, for the economic well-being of small businessmen in rural areas is directly linked to the stability, or lack of it, in earnings of the Nation's farms and ranches.

Even Consumers residing on the 50th floor of a high-rise apartment in New York City have an economic interest in the well-being of those individuals who produce the bulk of this Nation's food and fiber.

If farm and ranch families fail to keep pace with earnings of other sectors of our economy, then the Nation outside the cities may well be drained of the youth and investment opportunities that will be necessary to maintain a steady flow of reasonable priced foodstuffs to the 200 million plus American consumers that depend upon our agriculture.

The solution of the problems of modern

agriculture—unstable and depressed average earnings—lies in the establishment of sound, acceptable and long-range policies.

I am convinced, that the future will offer no improvement in the area of farm policy if we continue present methods of yearly squabbling among ourselves and hoping the Congress will somehow "hit" upon a solution. I believe that what must be done is to establish long-range goals for American agriculture, and once these goals are established develop the detailed programs to reach these goals.

I have devoted considerable time during this past year exploring new approaches to agricultural policy. I have had the opportunity at regional and national governors' conferences and with private visits with other national leaders to present my thoughts on a new house for agricultural policy.

The foundation for a new house for agricultural policy should thus be based on the principle that modern farming must receive a parity of income with other sectors of the economy. Parity of income—equal returns to invested resources—is the foundation. The parity price concept, used for nearly 40 years, is not able to properly evaluate the income situation of modern agriculture. Since farming is a business we must use the measurement tools appropriate for business—returns, not prices.

The second problem area of modern agriculture production is stability, and it is closely related to the problem of returns. Modern business could not operate if the future was completely uncertain. Non-farm business has the capacity to inject stability into market situations by control, to a large degree, of product prices through management of total output. Farms do not have this power—the ability to stabilize output price—and thereby, reduce fluctuations in earnings.

The difficulty is that the cost reducing techniques used by the individual farmers are, by their very nature, also output expanded techniques. The expanded supply often drives prices downward—reducing returns. The change in the quantity of agricultural production is never much in any one year, but enough to cause wide swings in prices and earnings.

I, therefore, suggest that the foundation of a new house for agriculture policy seek stability of agricultural production and prices on an equal footing with the concept of equal returns to invested resources.

I suggest that Congress adopt the concept of stability and parity of resource earnings as the long-term policy goals for modern agriculture and then establish a national food and fiber board to develop the detailed production management programs necessary to insure an adequate supply of food and fiber for the future.

Members of such a board would be nonpartisan, appointed by the president, and would represent all phases of modern agriculture, from the farm-ranch level through to the consumer. Such a board would have broad powers to stabilize agricultural prices by various control and information devices, and to raise earnings of commercial producers by regulating the total quantities produced. Such a board would have major responsibility for the establishment of strategic reserves necessary for price stability. The board would encourage and support farm bargaining associations that also have as their goal the stabilization of an efficient agriculture industry.

This national food and fiber board would provide the focal point for the realization that modern agricultural policy cannot be framed in an arena where the farmer is pitted against the middleman and the consumer. The board would have but one charge, to establish production and marketing control programs—to be implemented by USDA—that will insure production of food and fiber in the most efficient manner by providing stability and reasonable earnings to all concerned.

I might also add that there is some degree of urgency for change in our agricultural policies. First, low earnings in agricultural production today can endanger supply of food in the future. Secondly, the American public is rapidly becoming disenchanted with the inability of past and present programs to "solve" agriculture's problems, and pressures for change might become so great that expediency will be substituted for careful evaluation.

To me, parity of income for agriculture means agricultural resources receive the same income as similar resources are receiving now in the non-agricultural economy. To be more specific, the board should examine the current earnings of typical—highly efficient family farms and compare the returns to management, land, family labor and invested capital to what similar resources are earning in the non-agricultural sector.

Many bases for comparison could be established, and agricultural economists will be required to determine the most equitable measuring rods. However, I suggest that if family labor on our efficient farms is earning wages equal to the average wage of industrial workers, and if returns to land are equal to the returns on industrial bonds, and if returns to invested capital are equal to the average return to stockholders of some broadly based index, then agriculture would be close to parity of income.

The board would require constant information from the agricultural sector as to what earnings are on our efficient farms. One method that could accomplish this—without establishing a vast bureaucracy—would be to draw upon—and coordinate—the ongoing research at our various land grant colleges of agriculture. Farm management specialists in each State have farms under observation and they are continually analyzing the data they receive from these farms on sophisticated computers.

The statistical reporting service of the USDA working through the various State-Federal divisions of agricultural statistics might assume this coordinating function to create a national sample of farms. Farmers selected for the national sample probably should receive some payment to reimburse them for the additional workload that will be associated with the record keeping required to establish their resource earnings.

For the grains, I can visualize the board might use a combination of techniques to adjust production—long-term land retirement for Macro changes in total land use and yearly diversion programs for the Micro adjustments needed to "fine tune" the projected production of certain crops.

The board should activate a strategic reserve of key crops to prevent wide swings in prices caused by unforeseen changes in production or consumption. Food is a basic product, and a program to maintain certain minimum levels in reserve is not only justified, but required for stability in our economy.

Stabilizing the grains will also tend to add stability to the livestock and poultry sectors. I believe stability can be accomplished in the livestock sector without the restrictive controls that are abhorrent to most Americans. I believe that an active information system could be the basis of stability.

Such an active information system would evaluate the data in terms of the impact of observed changes in production on prices in the future, and if these prices appear to be fluctuating above or below a predetermined range, then advise producers of required changes in feeding levels.

If the reactions of producers are sluggish to the degree such that wide fluctuations in price are still occurring, the board could provide incentives for stability through premiums and discounts for various classes of livestock.

Altering the level of premiums and discounts is a sound business practice to accomplish inventory adjustments. In the non-agricultural economy, inventories are constantly being adjusted so that earnings can be stabilized. I am suggesting that agriculture adopt this same concept.

For our smaller farms—and by smaller I mean smaller in terms of total product for sale and not simply acreage—adjusting total production to raise product prices will still leave these farms at depressed income levels. I am firmly convinced that no politically feasible or economically sound price program is capable of raising incomes on our smaller farms to levels deemed adequate—these farms simply produce too little to be meaningfully affected by price programs. Past programs have not raised the small farmer from the poverty position, but the board could generate new thinking in this area based on concepts that retain the dignity of useful labor.

As an example, take the many rural male residents in the 20 to 45 age bracket who do not have large enough production, adequate resources for expansion or opportunity to secure income needed to maintain their families as residents in rural America. This important age group is vital in furnishing replacements to a food production industry where presently the workers' average age is 58 years. A well-trained and qualified labor pool or replacement force is also vital in enticing agri-business or industry to locate in rural America.

I suggest we consider developing a new approach that could have an impact similar to the homestead act that strengthened and settled rural America.

Our modern version of homestead opportunity in rural America could be called the PAL program—a professional agriculture-agribusiness labor force. Men on small farming operations that utilize only a portion of the families' labor capabilities and other individuals anxious to remain residents of a rural community could participate in the PAL program by registering for employment in rural America and thereby immediately secure additional income payments for the family.

Workers registered in the PAL program would be available to both private and public employers requiring temporary help. These employers would reimburse the PAL program for the services of the workers. When opportunity for fulltime employment became available, the PAL member would transfer from the program to a regular employee basis.

The PAL program would retain the dignity of useful labor and could bring immediate hope to rural Americans who are now frustrated in the attempt to provide adequate incomes for their families. This program could aid in reducing the exodus to urban centers and the resulting social problems that are producing unburdenable costs to society.

TERRORISM AT THE OLYMPICS

Mr. BROOKE. Mr. President, the Olympic games symbolize the principles of peace and cooperation among nations. Twenty times in modern history the nations of the world have met for these illustrious competitions.

Today, the vision of peace and human excellence was tragically shattered. Five Arab terrorists, allegedly members of an organization called the Black September, scaled the walls of Olympic Village, reportedly killed two members of Israel's Olympic team, and are currently holding nine other members hostage.

It is reported that these terrorists belong to the same band of willful cowards who hijacked a Belgian airlines jet in 1971, and perpetrated the unbelievably callous slaughter at Lod Airport in Tel Aviv earlier this year.

Mr. President, it is inexcusable that these terrorists should be given sanctuary and allowed to conduct their business by Arab governments or any other government. Their actions shouud long since have been halted by the governments which now cannot but find themselves embarrassed, and their policies threatened by terrorist activity.

In the spirit of cooperation which can bring about the Olympic games, the nations of the world—Communist and free—should band together in concerted action against any and all terrorists, whatever their professed cause.

I pray for the immediate and safe release of the endangered athletes. And I urge President Nixon to issue the sternest possible warning to any nation which might consider aiding or condoning this senseless terrorism.

SPIRIT OF '76

Mr. CRANSTON. Mr. President, we are now in the midst of preparations for the Nation's 200th birthday celebration—the 1976 Bicentennial. Appropriately, this celebration has been characterized by the theme "The Spirit of '76."

California brandy is also enjoying its bicentennial, as it has brought cheer and comfort to generations of Americans for some 200 years. In fact, it can be said that one of the great traditions of American life is the enjoyment of that noble spirit of nature—California brandy—the "soul" of the renowned California grape.

Because of its great heritage and its totally American character, I propose that California brandy be named the "Bicentennial Spirit" as part of the 1976 Bicentennial Celebration. I hope that the Bicentennial Commission will heed this proposal and grant California brandy the recognition it deserves.

SAVAGE BARBARISM AT THE OLYMPIC GAMES

Mr. PACKWOOD. Mr. President, a new spirit has been sweeping the globe for the past several days, thanks to the 1972 World Olympics in Munich. This renewed spirit has been the product of the finest amateur athletic competition in the world. All of us have either seen the superb television coverage provided by the American Broadcasting Co., or read detailed accounts in our daily newspapers. We have all been thrilled by the accomplishments of our own athletes and by athletes of competing nations.

But to see this worldwide, worthwhile competition disrupted by a bunch of craven cowards calling themselves Arab commandos make my blood boil.

These cowards—and I emphasize that they are cowards—have not the courage to fight out their differences man-to-man. Instead, they use the pretext of the World Olympics to seize innocent people and use their lives as pawns in a game that no civilized society will accept.

This savage barbarism must be stopped. The time has come for the United States to seriously consider breaking diplomatic relations with any country which gives these bandits refuge or encouragement.

The civilized world cannot—and will not—stand by for this inhuman level of conduct.

BARBARIC RAID AT THE OLYMPICS

Mr. TALMADGE. Mr. President, law-abiding and peace-loving people the world over are shocked today by the barbaric raid by Arab terrorists on the Israel compound at the Olympics in Munich.

This was a tragic occurrence which can only further inflame the already highly incendiary situation in the Middle East. It not only is a threat to stability in that part of the world, but to peace and unity throughout the rest of the world as well. It is an affront, not only to the splendid athletes who have gathered in Munich, from the free world and the Communist world alike, but also to civilized people everywhere.

One can only guess at the motives of this band of terrorists, other than to create chaos and confusion. However, I hope all the world will join the United States in denouncing this sneak, dastardly attack—including the governments of the Arab States, if indeed they have not become insensitive to public opinion. This was a crime against the world society. It was a violation of every law of human decency.

Our prayers go out for the well-being of the Israel hostages, and every possible effort should be put forth to secure their safe release. Unfortunately, two members of the Israel Olympic athletic delegation have already died, victims of Arab guerrilla brutality. This is the same group which was responsible for the assassination of the Premier of Jordan, and for several aircraft hijackings.

Such terrorism has become characteristic of the Arab dispute with Israel. It has largely prevented the Arab States and Israel from coming together to seek a settlement of their differences in the longstanding Middle East crisis.

So long as insane and dangerously irrational elements of the Arab world are spreading discord and terror, not only in the Middle East but throughout Europe as well, there can never be a suitable settlement of differences in this part of the world. Such harassment and terrorism has become prevalent in the Middle East conflict, and each time the pillars of world peace are shaken.

Terroristic tactics are like attacks of wild, mad dogs, which endanger everyone and everything in their path. They should be dealt with accordingly.

MURDER AT THE OLYMPIC GAMES

Mr. ROTH. Mr. President, all of us are keenly aware that in the past few hours one young man—and possibly two—has been murdered in cold blood at the Olympic games in Munich. Nine athletes are held hostage and countless others endangered by the most ruthless, irresponsible, unforgivable actions possible.

As far as I am concerned, Mr. President, there can be no conceivable excuse or reason for these murders. As great as the differences between Israel and the Arab States may be, they are not so great as to justify this kind of wanton disregard for the lives and safety of young men who were in Munich only for the sake of athletic competition. Those are my sentiments, and I believe they are the sentiments of every other responsible person in the world, regardless of his nationality or religion.

Mr. President, we do not have enough details at this time to know exactly what has happened or to predict what will happen in Munich. But I for one, speaking as a Member of the United States Senate, insist that if the Arab guerrillas escape, they be returned to Germany to stand trial. Furthermore, I believe that if any nation provides refuge for these guerrillas, the United States should take every action appropriate to insure that the guerrillas are returned to stand trial. For these actions, there cannot be and should not be sanctuary.

TWENTIETH ANNIVERSARY OF THE MENTAL RETARDATION NEWS

Mr. DOLE. Mr. President, I wish to take a moment today to recognize an anniversary which means much to the many thousands of Americans who are parents of developmentally disabled children.

Twenty years ago a handful of dedicated pioneers in the field of developmental disabilities started Mental Retardation News, a newspaper to bring the latest information on new developments in the prevention of disability and the care of mentally disabled persons to a special readership who would find this information most valuable.

Starting with a few thousand circulation, this newspaper has grown steadily until now it has a readership of nearly one million around the globe. The newspaper has become the medium through which parents of mentally retarded children, their friends and other concerned persons, as well as physicians, government employees, and legislators, have been able to follow progress and achievements in the developmental disabilities field.

This newspaper has reported for its readers the passage of the developmental disabilities bill, landmark suits for mandatory education and better treatment of developmentally disabled residents of institutions—and stories of courage and triumphs over seemingly insurmountable handicaps. For 20 years it has told of the strides that have been made in bringing mentally disabled citizens into new areas of a more meaningful and fulfilling way of life.

Mental retardation news has been published without interruption since its first issue in August 1952. It is the official publication of the National Association for Retarded Children and has proven to be an exceptional medium for bringing reliable information to concerned citizens throughout the world.

I congratulate this newspaper on its 20th anniversary and for its dedication to serving the mentally handicapped.

TRAGEDY AT THE OLYMPIC GAMES

Mr. SPONG. Mr. President, the Arab guerrilla attack on the Israeli Olympic team is a dastardly and reprehensible act which offends the entire world. It is the product of warped minds and inhumane spirits. It focuses attention not on the plight of Arabs but on the fact that there are elements in the Arab community who, in and of themselves, are incapable of assuming a responsible place among the world of nations.

The act is a blemish upon an ideal that is a symbol to the world—an ideal of nations coming together ever 4 years to compete in fairness and good sportsmanship. The proud history of the Olympic games has been tarnished by a monstrous act against all those who compete and all those who observe.

I know our Nation will cooperate in every way possible to secure the release of those still held hostage, to prevent the loss of further lives, and to restore in some small way a glow to an ideal which should not be defiled.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER (Mr. Harry F. Byrd, Jr.). The time for the transaction of routine morning business has expired.

ORDER OF BUSINESS

The PRESIDING OFFICER. Under the previous unanimous-consent agreement, the Senate will now proceed to consider the following bills, in the following order: S. 2087, S. 16, H.R. 9323, S. 2567, and H.R. 9222.

Debate on each bill is limited as follows: Debate on any amendment to any of the bills will be limited to 20 minutes, to be equally divided and controlled by the mover of the amendment and the manager of the bill, Mr. McClellan, unless the manager of the bill is in favor of the amendment, in which case the time in opposition thereto will be controlled by the minority leader or his designee.

Debate on final passage of any of the said bills shall be limited to 1 hour on S. 2087 and S. 2567 and one-half hour on H.R. 9323, H.R. 9222, and S. 16, with the time for debate on final passage of each bill to be equally divided and controlled by the manager of the bill, Mr. McClellan, and the Senator from Nebraska (Mr. Hruska).

PUBLIC SAFETY OFFICERS' BENEFITS ACT OF 1972

The PRESIDING OFFICER. The Senate will now proceed to the consideration of S. 2087, which will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 2087) to amend the Omnibus Crime Control and Safe Streets Act of 1968, as amended, to provide benefits to survivors of police officers killed in the line of duty.

The Senate proceeded to consider the bill, which had been reported from the Committee on the Judiciary with an amendment to strike out all after the enacting clause and insert:

That this Act may be cited as the "Public Safety Officers' Benefits Act of 1972".

DECLARATION OF PURPOSE

Sec. 101. It is the purpose of this Act to promote the public welfare by establishing a Federal minimum death and dismemberment benefit to public safety officers or their surviving dependents.

Sec. 102. The Omnibus Crime Control and Safe Streets Act of 1968, as amended, is amended by—

(1) redesignating sections 451 through 455, respectively, as sections 421 through 425;

(2) redesignating sections 501 through 521, respectively, as sections 550 through 570;

(3) redesignating parts F, G, H, and I of title I, respectively, as parts I, J, K, and L of title I; and

(4) adding at the end of part G of title I as amended by this Act, the following new part:

"Part H—Death and Dismemberment Benefits for Public Safety Officers

"DEFINITIONS

"Sec. 525. As used in this part—

"(1) 'child' includes a stepchild, an adopted child, an illegitimate child, and posthumous child;

"(2) 'criminal act' means any crime, including an act, omission, or possession under the laws of the United States or a State or unit of general local government which poses a substantial threat of personal injury, notwithstanding that by reason of age, insanity, intoxication or otherwise the person engaging in the act, omission, or possession was legally incapable of committing a crime;

"(3) 'dependent' means a person who was wholly or substantially reliant for support upon the income of a decreased public safety officer;

"(4) 'dismemberment' means the loss of all or a substantial portion of one foot or one hand or legal blindness in one eye;

"(5) 'Intoxication' means a disturbance of mental or physical faculties resulting from the introduction of alcohol, drugs, or other substances into the body;

"(6) 'line of duty' means within the scope of employment or service; and

"(7) 'public safety officer' means a person serving the United States or a State or unit of general local government, with or without compensation, in any activity pertaining to—

"(A) the enforcement of the criminal laws, including highway patrol, or the maintenance of civil peace by the national guard or the Armed Forces,

"(B) a correctional program, facility, or institution where the activity is potentially dangerous because of contact with criminal suspects, defendants, prisoners, probationers, parolees,

"(C) a court having criminal or juvenile delinquent jurisdiction where the activity is potentially dangerous because of contact with criminal suspects, defendants, prisoners, probationers, or parolees, or

"(D) firefighting.

"AWARDS

"Sec. 526. (a) Upon a finding made in accordance with section 529, the Administration shall provide the following benefits:

"Loss	*Benefit payable*
Death or multiple dismemberment	$50,000
Single dismemberment	25,000

"(b)(1) Whenever the Administration determines, prior to taking final action, that a death or dismemberment of a public safety officer is one with respect to which a benefit will probably be paid, the Administration may make an interim benefit payment not exceeding $5,000 to the public safety officer, dependent, or dependents entitled to receive a benefit under section 527 of this part.

"(2) The amount of any interim benefit paid under paragraph (1) of this subsection shall be deducted from the amount of any final benefit paid to such public safety officer, dependent, or dependents.

"(3) Where there is no final benefit paid, the recipient of any interim benefit paid under paragraph (1) of this subsection shall be liable for repayment of such amount. The Administration may waive all or part of such payment.

"(c) The benefit payable under this part shall be in addition to any other benefits that may be due from any other source, but shall be reduced by—

"(1) payments authorized by section 12(k) of the Act of September 1, 1916, as amended (4–531(1) of the District of Columbia Code);

"(2) gratuitous lump-sum death or dismemberment benefits authorized by the United States, a State, or unit of general local government without contribution by the public safety officer, but not including insurance or workmen's compensation benefits;

"(3) amounts received under any Federal program, or program of a State or unit of general local government receiving Federal assistance under this title which provides for the compensation of victims of crime.

"(d) No benefit paid under this part shall be subject to execution or attachment.

"RECIPIENTS

"Sec. 527. Upon receipt of a certification from the Attorney General, the Governor or the highest executive officer of a State that a public safety officer has been killed or has suffered dismemberment in the line of duty and the proximate cause of such death or dismemberment was a criminal act or an apparent criminal act, the Administration shall pay a benefit as provided in section 526 of this part as follows:

"(1) If the public safety officer suffered dismemberment, to the public safety officer.

"(2) If the public safety officer was killed—

"(A) to the dependent person or persons specifically designated in the public safety officer's duly executed authorization to receive the benefit provided for in this part;

"(B) if there is no such surviving designated person or persons and no surviving dependent child of such officer, to the surviving dependent spouse of such officer;

"(C) if there is a surviving dependent child or children and a surviving dependent spouse of such officer, one-half to the surviving dependent child or two-thirds to the surviving dependent children of such officer in equal shares, with the remainder to the surviving dependent spouse of such officer;

"(D) if there is no such surviving dependent spouse, to the dependent child or children of such officer, in equal shares;

"(E) if none of the above, to the dependent parent or parents of such officer, in equal shares; or

"(F) if none of the above, to the other dependent next of kin of such officer under the laws of domicile of such State of such officer at the time of his death, in equal shares.

"LIMITATIONS

"SEC. 528. No benefit shall be paid under this part—

"(1) if the death or dismemberment was caused by the intentional misconduct of the public safety officer or by such officer's intention to bring about his death or dismemberment;

"(2) if voluntary intoxication of the public safety officer was the proximate cause of such officer's death or dismemberment;

"(3) in the event the public safety officer was killed, to any person who would otherwise be entitled to a benefit under this part, if such person's actions were a substantial contributing factor to the death of the public safety officer; or

"(4) if a notification of death or dismemberment has not been filed by or on behalf of public safety officer under this part with the Attorney General or the Governor or highest executive of a State within one year after the date of death or dismemberment, unless the Administration finds that the failure to file was justified by good cause.

"PROCEDURE

"SEC. 529. (a) Awards under this part shall be made as follows—

"(1) in the event the death or dismemberment of a public safety officer serving a State or unit of general local government, the notification of such death or dismemberment shall be filed with the Governor or the highest executive officer of the State of service; or

"(2) in the event the death or dismemberment of a public safety officer serving the United States, the notification of such death or dismemberment shall be filed with the Attorney General or his designate.

"(b) The Governor, the highest executive officer of a State, or the Attorney General upon receipt of notification of the death or dismemberment of a public safety officer shall promptly notify the Administration of the pendency of a certification, and, after due investigation, shall certify to the Administration all facts relevant to the death or dismemberment upon which the benefit will be paid.

"(c) The Administration, upon receipt of certification by a Governor or the highest executive officer of a State, or the Attorney General, indicating that a benefit is due under this part, shall pay such benefit.

"(d) The adjudicatory provisions of chapter 5 of title 5 of the United States Code are not applicable to the procedures authorized under this part.

"MISCELLANEOUS PROVISIONS

"SEC. 103. Section 569 of the Omnibus Crime Control and Safe Streets Act of 1968, as amended and as redesignated by this Act, is amended by inserting '(a)' immediately after '569' and by adding at the end thereof the following new subsection:

"'(b) There is authorized to be appropriated $40,000,000 for the fiscal year ending June 30, 1973, for the purposes of part H.'

"SEC. 104. Until specific appropriations are made for carrying out the purposes of this Act, any appropriation made to the Department of Justice or the Law Enforcement Assistance Administration for grants, activities, or contracts shall, in the discretion of the Attorney General, be available for payments of obligations arising under this Act.

"SEC. 105. If the provisions of any part of this Act are found invalid or any amendments made thereby or the application thereof to any person or circumstances be held invalid, the provisions of the other parts and their application to other persons or circumstances shall not be affected thereby.

"SEC. 106. This Act shall become effective on the date of enactment and the benefits thereunder shall be retroactive with respect to any dismemberment or death of a public safety officer as defined in part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968, as amended by this Act, which occurred on or after January 1, 1967."

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum, and I ask unanimous consent that the time not be charged to either side.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. BAYH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. (Mr. HARRY F. BYRD, JR.). Without objection, it is so ordered.

Mr. BAYH. Mr. President, I ask unanimous consent that Mr. Gerald Brecher, Mr. Peter Coogan, and Mr. P. J. Mode of my staff be permitted the privilege of the floor during debate on the crime bills that are before the Senate or will come before the Senate.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HRUSKA. Mr. President, I ask unanimous consent that Mr. Malcolm Hawk of the Judiciary Committee staff be granted the privilege of the floor during consideration of the five bills to be under consideration by the Senate today.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THURMOND. Mr. President, I ask unanimous consent that a member of my staff, Mr. William E. Hancock III, be permitted the privilege of the floor during the discussion of the five bills in question.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum, and ask unanimous consent that none of the time be taken out of either side.

The PRESIDING OFFICER. Without objection, it is so ordered, and the clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I yield myself 1 minute on the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

TIME LIMITATION ON ECONOMIC OPPORTUNITY ACT CONFERENCE REPORT

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that at such time as the conference report on H.R. 12350, the Economic Opportunity Act, is called up before the Senate, there be a time limitation of 20 minutes thereon, to be equally divided between the manager of the conference report, the distinguished Senator from Wisconsin (Mr. NELSON), and the distinguished Republican leader or his designee. It is my understanding that this matter has been cleared with the other side of the aisle.

The PRESIDING OFFICER. Is there objection to the request of the Senator from West Virginia?

Mr. GRIFFIN. Mr. President, reserving the right to object—and I shall not object to the request—the agreement is satisfactory with the disinguished ranking member of the committee, the Senator from New York (Mr. JAVITS), and also with the Senator from Colorado (Mr. DOMINICK). I do hope, however, that we might have a little notice as to when the matter will be called up so that the Senator from Colorado and others could come to the floor.

Mr. ROBERT C. BYRD. Mr. President, it is my understanding that the distinguished Senator from Wisconsin (Mr. NELSON), the manager of the conference report, is awaiting the arrival of certain papers before he calls up the conference report.

Mr. GRIFFIN. I thank the Senator very much.

The PRESIDING OFFICER. Is there objection to the request of the Senator from West Virginia? The Chair hears none, and it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum with the understanding that there be no time charged against either side.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the distinguished Senator from Wisconsin (Mr. NELSON) may now be recognized for the purpose of calling up the conference report on the Economic Opportunity Act and that the time under the previous order on that conference report not be charged against the time on the bill.

The PRESIDING OFFICER. Is there objection?

Mr. JAVITS. Mr. President, before the Chair rules, let me say I was not here when the unanimous-consent agreement was entered into. I agree with it, but we may be 5 or 10 minutes short in time. Will the leadership assist me if I need 5 or 10 minutes?

Mr. ROBERT C. BYRD. Very well. The leadership will do everything possible to accommodate the Senator.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request? Without objection, it is so ordered.

ECONOMIC OPPORTUNITY AMENDMENTS OF 1972—CONFERENCE REPORT

Mr. NELSON. Mr. President, I submit a report of the committee of conference on H.R. 12350, and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated by title.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 12350) to provide for the continuation of programs authorized under the Economic Opportunity Act of 1964, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Is there objection to the consideration of the conference report?

There being no objection, the Senate proceeded to consider the report.

(The conference report is printed in the House proceedings of the CONGRESSIONAL RECORD of August 18, 1972, at pp. 29143–29149.)

Mr. NELSON. Mr. President, I ask unanimous consent that the joint explanatory statement on the part of the managers be printed at this point in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two houses on the amendment of the Senate to the House bill (H.R. 12350) to provide for the continuation of programs authorized under the Economic Opportunity Act of 1964, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The points in disagreement and the conference resolution of them are as follows:

The House bill authorized $2,304,066,000 for fiscal year 1972 and $3,000,000,000 for fiscal year 1973. Of these amounts $350,000,000 a year was reserved for local initiative programs and a specific authorization of $500,000.000 for fiscal 1972 and $1,000,000,000 for fiscal 1973 was authorized for Project Headstart.

The Senate amendment authorized the following amounts:

[In millions]

	1972	1973	1974
Department of Labor programs:			
Title IABE	$900.0	$950.0	$950.0
Special NYC	500.0	500.0	500.0
Health, education and welfare programs:			
Headstart	500.0	500.0	500.0
Follow Through	100.0	100.0	100.0
ACTION programs: VISTA	37.0	58.0	
OEO programs:			
Total titles II, III, VI, VII, IX, X	(950.0)	(1,000.0)	(1,000.0)
Local initiative [1]	328.9	328.9	328.9
Legal services [1]	71.5	71.5	71.5
Comprehensive health	114.0	114.0	114.0
Emergency food	62.5	62.5	62.5
Family planning	25.0	25.0	25.0
SOS	8.8	8.8	8.8
Alcoholic counseling	$18.0	$18.0	$18.0
Drug rehabilitation	18.0	18.0	18.0
Environmental action	5.0	5.0	5.0
Rural housing	10.0	10.0	10.0
Consumer action	7.5	7.5	7.5
Design and planning	10.0	10.0	10.0
Youth recreation and sports	6.0	6.0	6.0
T. & T.A., SEOO, R. & D.	117.6	117.6	117.6
Title III migrants	38.0	38.0	38.0
Titles VI and X	18.0	18.0	18.0
Title VII	58.0	58.0	58.0
Other	33.2	83.2	83.2
Add ons:			
Title VII		62.0	62.0
Legal services		100.0	100.0
Rural housing		5.0	5.0
VISTA	16.0		
SOS		21.2	21.2
Urban housing	20.0	20.0	20.0
Special assistance	50.0	50.0	50.0

[1] These amounts are reservations as well as authorization levels.

The conference agreement contains the following authorizations of appropriations:

For title I, Parts A, B, and E (work and training programs) the sums of $900,300,000 for fiscal year 1973 and $950,000,000 for fiscal year 1974;

For Headstart the sums of $485,000,000 for fiscal year 1973 and $500,000,000 for fiscal year 1974;

For Follow Through the sums of $70,000,000 for each of fiscal years 1973 and 1974;

For title VIII (VISTA) the sum of $74,000,000 for fiscal year 1974;

For all OEO-administered programs, titles II, III, VI, VII and IX the sums of $840,000,000 for fiscal year 1973 and $870,000,000 for fiscal year 1974. Of the amounts appropriated for OEO programs, the conference agreement reserves not less than $328,900,000 for programs under section 221 of the Act (Local Initiative) for each fiscal year and not less than $71,500,000 for Legal Services programs under section 222(a)(3) for each fiscal year. The conference agreement further provides that the remaining amounts are to be so allocated that for each fiscal year not less than $18,000,000 shall be used for the Alcoholic Counseling and Recovery program under section 222(a)(8) and not less than $30,000,000 shall be used for the Emergency Food and Medical Services program under section 222(a)(5).

For the balance of the programs operated by OEO, the conferees strongly recommend that the following amounts be made available for each of the programs;

	Fiscal 1973	Fiscal 1974
Comprehensive health	$100,000,000	$100,000,000
Family planning	20,000,000	20,000,000
Senior opportunities	8,000,000	18,000,000
Drug rehabilitation	18,000,000	19,000,000
Environmental action	5,000,000	5,000,000
Rural housing	15,000,000	20,000,000
Consumer action	7,500,000	7,500,000
Design and planning	10,000,000	10,000,000
Youth recreation and sports	4,500,000	4,500,000
T. & T.A., SEOO, R. & D.	109,600,000	109,600,000
Title III (migrants)	36,000,000	36,000,000
Title VI and IX (administration and evaluation)	18,000,000	18,000,000
Title VII (community economic development)	40,000,000	55,000,000

In paragraphs (2) and (3) of section 3(c) of the conference agreement, the term "reserve and make available" is used in connection with the reservation and allocation of funds. By this the conferees mean that the sums required to be "made available" shall be newly obligated during each of the fiscal years for which such sums are required to be made available.

The Senate amendment authorized the Secretary of HEW to establish procedures to assure that not less than 10% of the enrollment opportunities in Project Headstart in the nation be available for handicapped children. There was no comparable House provision. The House recedes.

The House bill extended the authority for programs under the Act for two additional years. The Senate amendment extended the provision for three additional years. The House recedes.

The Senate amendment extended the length of time a person can serve on a community action board from three to six consecutive years and increased the total number of years a person may serve to twelve years. There was no comparable House provision. The conference agreement extends the length of service on a community action board to five consecutive years and increases the total number of years to ten.

The House bill required that the public officials who comprise one-third of each community action agency board be elected officials except where fewer than the requisite number of elected officials were available and willing to serve, in which case appointive public officials could be counted toward fulfilling the requirements of this subsection. There was no comparable Senate provision. The Senate recedes with the understanding that elected officials refers to those with general governmental responsibilities or responsibilies encompassing antipoverty programs—not to officials with limited or administrative responsibilities in specialized areas, such as a water district commissioner.

The House bill established guidelines which must be followed by the Secretary of Health, Education, and Welfare in promulgating fee schedules for the participation of non-low-income children in Project Headstart. No charge could be made with respect to any child who was a member of a family with an annual income less than $4,320. A graduated fee schedule was prescribed up to the level of the lower living standard budget as determined by the Bureau of Labor Statistics. Beyond that point the Secretary is given discretion. There was no comparable Senate provision. The Senate recedes.

The Conference agreement further provides that if the Secretary of HEW certifies that the establishment of such a fee schedule would substantially impair the ongoing Headstart programs, he may postpone their establishment, but under no circumstances may such establishment be postponed beyond April 1, 1973.

The Senate amendment allowed addicts enrolled and participating in methadone maintenance treatment or therapeutic programs to participate in the program. The House bill limited participation to rehabilitated addicts. The House recedes.

The Senate amendment allowed the Director to undertake special programs assisting employers in dealing with problems of employee "drug abuse and dependency." The House bill only allowed programs dealing with "drug abuse." The House recedes.

The Senate amendment required that priority be given to areas within the States having the highest percentage of addicts. There was no comparable House provision. The House recedes.

Both the House bill and the Senate amendment called upon the Director to establish procedures whereby addicts undergoing rehabilitation and participation in this program who, during the course of such rehabilitation, became non-low-income as a result thereof would nevertheless remain eligible to participate in this program until they had completed a full course of rehabilitation. The House bill also made clear that there is to be no exception to income criteria for initial entry into the program. The Senate amendment had no comparable provision. The Senate recedes.

Both the House bill and the Senate amendment established an Environmental Action program through which low-income persons would be paid for working on projects to combat pollution or to improve the environment. The Senate amendment also required that such work projects be those which would not otherwise be performed. There was no comparable House provision. The House recedes. The purpose of the provision in the Senate amendment is to insure that the program be operated in such a way as not to displace persons currently employed in similar tasks, but the conferees wish to make clear that they do not expect the Director to arbitrarily use the language as an excuse for no funding programs authorized under this section.

Both the House bill and the Senate amendment authorized a new program to be known as Rural Housing and Rehabilitation. In addition, the Senate amendment allowed the use of persons enrolled in Mainstream programs in the construction, rehabilitation, and repair of housing for low-income persons under this paragraph. The House recedes. The conferees wish it clearly understood that this new program is intended for a limited number of sponsors in order to fully demonstrate its potential. The conferees expect that the program will be administered in the national office of the Office of Economic Opportunity and that no regionalization of the program will take place until Congress has had an opportunity to assess its effectiveness.

The Senate amendment placed the administrative responsibility for the Youth Recreation and Sports Program with the Director of the Office of Economic Opportunity. The House bill placed such responsibility with the Secretary of Health, Education, and Welfare. The House recedes. The conferees wish to make clear that the Director of the Office of Economic Opportunity is given the discretion to continue to enter into delegation agreements he considers appropriate.

The Senate amendment specifically required the participation of all significant segments of low-income population to be served. There was no comparable House provision. The House recedes.

The House bill and the Senate amendment authorized the Director to provide financial assistance for projects designed to serve groups of low-income individuals who are not being effectively served by other programs under this title. The Senate amendment authorized $50 million for fiscal year 1972 and the two succeeding fiscal years. The House bill authorized $50 million for fiscal year 1972 and such sums as may be necessary for each succeeding fiscal year, creating in effect a permanent authorization. The conference agreement contains the substance of the amendment but eliminates the specific dollar authorizations.

The House bill provided for the equitable distribution of financial assistance under the Act to all significant segments of the low-income population within a State and within a community. The Senate amendment required such equitable distribution only within a community. The Senate recedes.

The conferees urge the Director to exercise authority under this section to the extent appropriate to accomplish its purposes, utilizing funds available under the authorization for programs conducted under title II of the Act.

The House bill prohibited the use of funds appropriated for Teacher Corps or ACTION from being used to finance any activity designed to influence the outcome of any election, or for voter registration, or to pay the salary of any officer or employee of OEO, Teacher Corps or ACTION who in an official capacity engages in such activity. As used in this amendment, "election" and "Federal office" are defined as in the Federal Election Campaign Act of 1971. There was no comparable Senate provision. The Senate recedes.

The House bill required that any standards for day care programs be no less comprehensive than the interagency day care requirements as approved by the Department of Health, Education, and Welfare, the Office of Economic Opportunity, and the Department of Labor on September 23, 1968. There was no comparable Senate provision. The Senate recedes.

The Senate amendment amended section 616 of the Economic Opportunity Act to increase the portion of an allocation that may be transferred from one program or activity to another from 15% to 25%. The amendment also deleted the limitation which placed a ceiling on the amount that may be transferred into a program. Existing law provided that such transfers could not result in increasing by more than 100% any program for which there was available $10 million or less or by increasing by 25% any program for which amounts available were in excess of $10 million. The House bill reduced the authority of the Director to transfer earmarked funds to 10% of the amount appropriated or allocated. The House bill further limited the degree to which the program or activity could be increased. The conference agreement increases the portion of an allocation that may be transferred from one program to another to 20 per centum.

The House bill prohibited any funds appropriated for programs administered by the Office of Economic Opportunity or ACTION from being used to finance any activity in which students in higher education perform voluntary or community service where, as a condition for eligibility for funds, an institution is required to award credit to students for training or experience derived from such voluntary or community service. There was no comparable Senate provision. The House recedes.

The Senate amendment prohibited the Director from providing financial assistance to anyone under this Act unless the grant, contract or agreement under which funds are to be provided specifically provides that no person with responsibilities in the operation of such program will discriminate because of race, creed, color, national origin, sex, political affiliation or beliefs. There was no comparable House provision. The House recedes.

The Senate amendment prohibited sex discrimination, to be enforced in accordance with Civil Rights Act procedures. There was no comparable House provision. The House recedes.

The House bill required the national poverty action plan to be presented by December 31, 1971. The Senate amendment required submission by August 1, 1972. The House bill required subsequent plans no later than December 31st of succeeding years. The Senate amendment required subsequent reports on January 31st of each year. The dates provided in both the House and Senate bill presented a situation where it would have been impossible for the agency to comply. Therefore, the conferees dropped the specific date that the national poverty action plan was to be presented to the Congress. It is the intention of the conferees, however, that at the earliest possible date the Office of Economic Opportunity submit such a plan.

Both the House bill and the Senate amendment consolidated all evaluation activities into a single title. They differed in the following respects:

(a) The Senate amendment specified that such evaluations may be made of programs under the Office of Economic Opportunity Act, or related Acts. There was no comparable House provision. The House recedes.

(b) The Senate amendment qualified the directives to develop evaluation standards with the words "to the extent feasible". There was no comparable House provision. The House recedes.

(c) The House bill required the results of evaluation to be considered in renewing financial assistance. There was no comparable Senate provision. The Senate recedes.

(d) The Senate amendment required the Director to exchange data "on a cooperative basis with such agency." There was no comparable House provision. The House recedes.

(e) Under the House bill the Director would "consult where appropriate with States to sponsor jointly funded evaluations" while the Senate amendment read "may consult when appropriate." The Senate recedes.

(f) The House bill required the publication of evaluations where the Senate amendment only required the publication of summaries of such evaluations. The conference agreement requires that summaries prepared by the evaluator be published. The conferees want to make clear that the publication of such summaries in no way relieves the Director from existing obligations to make evaluation reports in their entirety available to the Congress.

(g) The Senate bill authorized the head of any agency administering a program authorized by the Act to conduct evaluations or take other actions authorized under this title but specified that nothing in this section would preclude the Director from conducting such evaluations or taking such actions as otherwise authorized under the Act. There was no comparable House provision. The House recedes.

Both the House bill and Senate amendment established a new title of the Economic Opportunity Act to create a National Legal Services Corporation.

The Conferees regret that it was necessary to delete Title IX, which would have established a National Legal Services Corporation, as a result of the failure to reach agreement with respect to the composition of the Board of Directors and certain other elements of the Corporation.

The Conferees continue to strongly support the existing legal services program and the concept of a legal services corporation and intend to continue to seek appropriate means of expanding the program and insuring its independence, to provide the poor greater access to our system of justice under law.

The Senate amendment established a new program in title II, Design and Planning Assistance Programs, providing for the Director to fund to community-based design and planning organizations to provide technical assistance and professional services to community organizations and to continue existing section 232 programs of a comparable nature. There was no comparable House provision. The House recedes.

The Senate amendment established a new program in title II, Consumer Action and Cooperative Programs, providing for the Director to fund programs in consumer advocacy and protection and to continue existing section 232 programs of a similar nature. There was no comparable House provision. The House recedes.

The Senate amendment established a new program in title II, Urban Housing Demonstration Projects, to authorize the Director to provide financial assistance for demonstration projects in urban areas, and authorized $20.0 million for each of three fiscal years. There was no comparable House provision. The Senate recedes.

While the conferees did not adopt the new specific authority for Urban Housing Demonstration Projects contained in the Senate amendment, they expect the Director of the Office of Economic Opportunity to increase funding of projects to assist low-income families living in neighborhoods characterized by abandonment and deteriorating residential housing to maintain and upgrade existing substandard residential housing in such neighborhoods. The projects are to be carried out by appropriate community based organizations including tenant associations. It is anticipated that such projects may include financial assistance in the form of grants and loans for administrative expenses and to defray costs of repair and moderate rehabilitation, for tenant organization and counseling, management and maintenance services, and for encouragement of home ownership by low-income families. It is anticipated that such projects will be funded from general sources available under the Act, including general demonstration authority and authority under Title VII. Community Economic Development, to the extent consistent with that title; however, no such projects are to be funded from sums made available under the new Rural Housing and Rehabilitation programs.

The Senate amendment prohibited the Director from delegating his functions under section 221 and title VII of such Act, notwithstanding the provisions authorizing delegation of programs of section 602 of the Economic Opportunity Act. There was no comparable House provision. The House recedes.

The Senate amendment combined the existing title I–D Special Impact Program and title III–A Rural Loan Program into a new unified Community Economic Development Program (title VII). This new title provided expanded authorization for grants as well as loans to rural cooperatives. There was no comparable House provision. The House recedes.

The rules of the House forbid managers on the part of the House from accepting Senate amendments that provide for appropriations within authorization bills. It was felt that the transfer of funds from one agency to another and the requirement that interest payments on loans from a revolving fund be returned to the fund rather than to the Treasury would violate the rule against including appropriations provisions in authorizing legislation.

It was therefore necessary for the conferees reluctantly to delete those provisions of title VII that detailed the operation of the newly authorized Community Development and Rural Development revolving funds, to delete those provisions that would have transferred the assets of the existing title III–A loan fund from the Department of Agriculture back to the Office of Economic Opportunity for consolidation with the new Rural Development revolving fund, and to delete those provisions in title VII that would have repealed title III–A. As approved by the conferees, title VII authority for a Rural Development Loan revolving fund will exist in addition to the authority in title III–A for the present Rural Loan revolving fund. It is the intent of the conferees, to the extent not prohibited by law, that the revolving funds authorized by title VII operate as is common with such funds, i.e., that repayments of principal shall be returned to the fund to be available for new loans and that the budget provide for the appropriation of the amount of the interest paid on such loans to the fund, to be used to offset the cost of operating such funds. Further, it is the intent of the conferees that the Office of Economic Opportunity seek to operate the Rural Loan Fund provisions of title VII and those under title III–A in close conjunction pending legislation to transfer the title III–A loan fund to this title. In deleting the language in title VII that detailed the operation of the new revolving funds it was necessary to delete the provision authorizing the use of interest payments to the funds to defray administrative expenses. However the conferees wish to make it clear that it is their understanding that the statutory authority of the Director to make payments out of the existing title III–A revolving fund for "loans, participation, and guarantees" encompasses the same authority as is provided in other federally supported revolving funds to defray such costs as are necessarily incurred in the administration of loans from such revolving funds.

The Senate amendment amended title VIII of the Act by making clear authority for VISTA volunteers to work on environmental problems focused primarily on the needs of low income persons and the communities in which they reside. There was no comparable House provision. The House recedes.

The Senate amendment added a new section to title VI requiring frequent review and revision of the poverty levels based on the changes in the consumer price index. There was no comparable House provision. The House recedes.

The Senate amendment authorized persons who are otherwise eligible and live in public and private institutions to participate in Neighborhood Youth Corps programs. There was no comparable House provision. The House recedes.

The Senate amendment amended section 211 by requiring the Director to insure no local community action agency election be held on a Sabbath Day. There was no comparable House provision. The House recedes.

The Senate amendment amended the Federal Property and Administrative Service Act of 1949 by requiring the GSA to continue its policy of making excess property available to a grantee of any agency under a program established by law for which funds had been appropriated. There was no comparable House provision. The Senate recedes because the rules of the House prohibit House conferees from agreeing to a nongermane Senate amendment.

Managers on the Part of the Senate.

The PRESIDING OFFICER. Who yields time?

Mr. NELSON. Mr. President, I yield myself 5 minutes.

Mr. President, with the agreement of the distinguished Senator from New York (Mr. JAVITS), the previous conference report was recommitted to conference for the purpose of seeing if we could reach agreement on modifying the two principal points that seemed to be most objectionable to the administration. The first point involved the size of the authorizations in the bill. The other involved the structure of the Legal Services Corporation.

We agreed in the new conference to cut back the authorizations a total of $1,031,900,000 from the authorization for fiscal year 1973, below what the Senate-passed bill had contained, and to make a reduction of $918.2 million from the fiscal 1974 Senate authorization.

The conference agreed to those cutbacks because the size of the authorization was objected to by the administration, and also because there was no point in authorizing more money than it was practicable to get appropriated.

A majority of the Senate conferees were willing to modify the provision for Legal Services Corporation to provide that the President would have full discretion to name all of the appointments to the Board of Directors, subject of course to Senate confirmation. I did not think this was a particularly important point because, in fact, the President had, under the previous conference bill, in his control all of the appointments to the Legal Services Corporation.

I never did understand the technical objections the administration was making. I did not think their objections important on the merits. I did not think they were substantive. But if it was so bothersome to them, I was prepared to move, and did move, in conference that the composition of the Board of Directors of the Legal Services Corporation be modified to provide the President with all of the appointments, without even making any specific reference to the provision that the various national legal services associations could make recommendation, as was provided in the previous bill that was then resubmitted to conference.

The willingness of a majority of the Senate conferees to give outright unlimited apppointments to the President was not assented by a majority of the House conferees.

The House did agree to the reductions in the authorization, which still ended up $200 million above the budget request for fiscal year 1973 and $300 million above the actual spending level for fiscal year 1972.

Since we could not reach agreement on the Legal Services Corporation, we simply agreed that the provision for the Legal Services Corporation be stricken from the bill, and that the legal services program remain within the Office of Economic Opportunity where the program has been administered in past years.

Those are the two modifications made in the conference subsequent to the previous conference report which was recommended back to conference.

Mr. President, I wish to make a fuller statement on the Economic Opportunity Act of 1972 conference report.

The conference agreement meets every objection raised by the President when he vetoed the previous Economic Opportunity Act extension in December of 1971.

Briefly, the Economic Opportunity Amendments of 1972 extends through fiscal year 1974 the life of the Office of Economic Opportunity and such programs as Headstart and Mainstream and other work and training programs administered by HEW and the Labor Department under delegation arrangements from the Director of OEO. The bill establishes a National Legal Services Corporation and also enacts a new title VII, consolidating and expanding the present rural and urban community economic development efforts.

Let me take a moment to review the history of the congressional consideration of this legislation over the past year and to remind the Senate of our efforts to meet the President's concerns in regard to poverty legislation.

The Economic Opportunity Act extension vetoed last December was not legislation lightly enacted. Hearings had spread over 9 months— on OEO programs, on legal services, and on child care. Major compromises were reached within the Congress and between the Congress and the administration.

The major provisions of that legislation—the extension of the OEO, the establishment of a Legal Services Corporation and of a new child development program—were each in response to wide public demand and in line with concerns expressed by the administration.

After the President vetoed the Economic Opportunity Amendments of 1971 in December of last year, we reviewed everything we had included in that legislation and responded to each of the President's objections to that legislation.

In response to the President's objections to the child development title of that bill, we dropped the child development title from this year's Economic Opportunity Act extension altogether. Separate compromise child care legislation has passed the Senate and is pending in the House committee.

In his veto message, the President objected to the earmarking of funds for 15 programs in the 1971 poverty legislation. In this year's conference agreement we have dropped all spending level requirements except on four programs: Local initiative community action programs; legal services; emergency food and medical services; and alcoholic counseling and recovery. For two of these programs—local initiative and legal services—we wrote into the bill the administration's budget level. The conference agreement provides earmarking above the President's budget request only for two programs—it earmarks $30 million for the emergency food and medical services program and $18 million for the alcoholic counseling and recovery program.

In his veto message, the President objected to the provision in last year's bill that would have prevented further delegation of OEO programs to other agencies of the Government without specific congressional authorization. This year's bill responds to the President's objections by substantially modifying the provision with respect to spinoffs of OEO programs.

First, the provision only prohibits the Director of OEO from delegating to other agencies two programs—local initiative community action programs under section 221 of the Economic Opportunity Act and the community economic development program under title VII of the act. Any other program may be delegated administratively without congressional review as authorized by section 602(d) of the Economic Opportunity Act—just as the Job Corps, Headstart, and other programs which originated in OEO have in the past years been spun off to other departments.

Second, even with respect to local initiative and community economic development, the President may transfer such programs by Executive reorganization plan. The antispinoff provision of the pending legislation in no way affects the Executive reorganization authority of the President—which he may exercise with respect to all government programs. Of course, any legislation creating a new department or agency may include provisions transferring OEO programs to such department.

Mr. President, now I come to the Legal Services Corporation that has been the chief matter in disagreement.

We began consideration of a Legal Services Corporation after a consensus developed among lawyers and others interested in the program that the cause of the poor and of equal justice in America would best be served by removing the legal services program from the Office of Economic Opportunity and establishing it as a separate National Legal Services Corporation.

President Nixon himself proposed the establishment of a National Legal Services Corporation. However, the administration's position was that it could not agree with the structure of the Corporation as passed last year and preferred that Congress deal with the legal services program in separate legislation. The conferees reluctantly dropped the Legal Services Corporation from this legislation and will consider it in separate legislation in the future.

In terms of the appropriations authorizations, the conference committee cut a total of $1,031,900,000 from the authorization for fiscal year 1973 below the level which the Senate-passed bill had contained and a reduction of $918,200,000 from the fiscal 1974 Senate authorization.

Let me end with this summary:

In his veto message, the President strongly criticized the child development title in the 1971 extension of the Economic Opportunity Act.

Congress has dropped the child development program from this bill.

In his message the President objected to earmarking funds for some 15 separate programs.

Congress has cut earmarking back to only four programs, two of which are earmarked at precisely the level the President requested in his budget.

The veto message objected to a prohibition against the delegation or transfer of any more programs from the Office of Economic Opportunity.

Congress cut back the antispinoff provisions so that they now cover only two programs and those programs may still be transferred by legislation or pursuant to Executive reorganization plan.

The veto message objected to the provisions regarding the Legal Services Corporation in last year's bill and asked that Congress consider the Corporation in separate legislation.

Congress dropped that title, leaving the legal services program under the control of the Director of OEO.

The Congress has granted what the President requested.

Mr. President, I believe it would be fair to say that the Congress has gone the extra mile to meet the President's concerns in this legislation extending the Economic Opportunity Act.

Our overriding concern was with the need to extend the Economic Opportunity Act so that antipoverty programs may go on. The Office of Economic Opportunity is the one agency in the Federal Government with responsibility for championing the cause of the Nation's poor.

I hope that in accommodating the President by meeting every objection raised in his veto message of last year, we have accomplished that overriding purpose.

Mr. JAVITS. Mr. President, will the Senator yield me 10 minutes?

Mr. NELSON. I yield the Senator whatever time he may need.

The PRESIDING OFFICER. The Senator has only 5 minutes remaining.

Mr. JAVITS. Mr. President, I ask unanimous consent that I may have 10 minutes to speak on the conference report.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. JAVITS. Mr. President, as indicated in the conference report, title IX, which would have established a National Legal Services Corporation, was dropped from the bill because it was impossible to reach agreement among the conferees and with the administration and because we were not desirous of seeing a veto of an antipoverty bill. The rock upon which we split was basically the composition of the board of directors. The group representing the House side voted down the idea of a National Legal Services Corporation with the directors appointed by the President and confirmed by the Senate. They wanted to attach some qualifications to the members of the board with respect to where they came from. That was unacceptable to the administration. On the one hand, it was too liberal, on the other hand, it was too conservative, and the corporation fell between both those stools.

Mr. President, it is most regrettable and unfortunate that this fine initiative, which was supported in both Houses previously, and by the administration, as a gifted way in which to establish, for practical purposes, a National Legal Aid Society—and thereby to greatly advance the objective of insuring justice for the poor under our system of law—should have failed and fallen between these two stools.

In that connection, I call the Senate's attention to language in the joint explanatory statement of the committee of conference, which was included at my request and which reads as follows:

> The Conferees regret that it was necessary to delete Title IX, which would have established a National Legal Services Corporation, as a result of the failure to reach agreement with respect to the composition of the Board of Directors and certain other elements of the Corporation.
>
> The Conferees continue to strongly support the existing legal services program and the concept of a legal services corporation and intend to continue to seek appropriate means of expanding the program and insuring its independence, to provide the poor greater access to our system of justice under law.

Mr. President, I thoroughly subscribe to that. I shall devote my efforts in every way toward bringing it about, and I would now like to ask the chairman of the Senate conferees, the Senator from Wisconsin (Mr. NELSON), if I may have his attention, a few questions.

First, does he, as chairman of the Subcommittee on Employment, Manpower and Poverty of the Committee on Labor and Public Welfare, which has jurisdiction of legislation concerning the legal services program, share my desire to proceed at the earliest opportunity with legislation to establish a Legal Services Corporation, or to find other appropriate means of assuring the independence of the program? I yield to the Senator from Wisconsin.

Mr. NELSON. Yes. As the Senator knows, I so stated during the conference. I share that concern, and I regard both the maintenance of the independence of the existing program and the establishment of a corporation or any other appropriate means to increase that independence as of great importance and of a high priority.

Mr. JAVITS. I thank my colleague very much. Second, I ask the Senator from Wisconsin whether he feels with me that the situation calls for an expansion of funding for the legal services program, and that the authorizations which we have in the bill, $840 million for fiscal year 1973 and $870 million for 1974, which amounts are, respectively, $80 million and $110 million above the $760 million requested by the administration for the current fiscal year, 1973, are, therefore, susceptible of increased appropriations above the basic figure of $71.5 million reserved for the legal services program.

Mr. NELSON. Yes, I do.

Mr. JAVITS. Additionally, I ask the Senator whether he agrees with me that various add-on items which we had and which we dropped from this conference report, including $50 million for fiscal 1973 and $100 million for fiscal 1974 for legal services, were dropped solely as a means of getting the total authorization through, and that the deletion of these items in the conference should in no way be construed as a finding by the conferees that the legal services program does not need—as in fact it does—substantially more than the $71.5 million reserved as a minimum.

Mr. NELSON. Yes, I agree with the Senator from New York.

Mr. JAVITS. Would the Senator consider that any Senator is free to seek to increase the appropriation for legal services above the $71.5 million when we reconsider the HEW-Labor appropriations bill, which will be back before us because the basic bill was vetoed by the President?

Mr. NELSON. As the Senator knows, any Senator is within his rights in offering such an amendment, and if it were offered, I would be inclined to support it, myself.

Mr. JAVITS. The Senator also agrees, does he not, that similarly, with the same history, an effort could be made to raise the amount which may be provided by appropriations for special assistance for Senior Opportunities, and for community economic development—I note in regard to the former, special assistance, that in the joint explanatory statement the conferees urged the Director to exercise authority under that section to cover low-income individuals who are not being served effectively by other programs under the community action title; this statement apparently was inadvertently printed in the conference report after a reference to the House provision relating to significant segments, rather than after discussion of the Senate provision, as agreed to by the conferees.

Mr. NELSON. I agree with the Senator from New York.

Mr. JAVITS. I thank the Senator.

Mr. President, on another aspect of the conference report, I wish to call the Senate's attention to the fact that there was deleted a Senate amendment, of which I was the author, to authorize the Director of OEO to furnish financial assistance for demonstration projects in urban housing, authorizing $20 million for each of 3 fiscal years. The conferees did not adopt that provision because of their concern over establishing an authorization for a new program and the concern of the chairman of the conferees on the House side that somehow or other to adopt it as a specific authorization might cut down on sums available for the new rural housing and rehabilitation program.

I had no such desire; and therefore, at my request, though it was dropped, the conferees specifically set forth in their agreed statement in the joint explanatory statement of the committee of conference, that:

> While the conferees did not adopt the new specific authority for Urban Housing Demonstration Projects contained in the Senate amendment, they expect the Director of the Office of Economic Opportunity to increase funding of projects to assist low-income families living in neighborhoods characterized by abandonment and deteriorating residential housing to maintain and upgrade existing substandard residential housing in such neighborhoods. The projects are to be carried out by appropriate community based organizations including tenant associations. It is anticipated that such projects may include financial assistance in the form of grants and loans for administrative expenses and to defray costs of repair and moderate rehabilitation, for tenant organization and counseling, management and maintenance services, and for encouragement of home ownership by low-income families. It is anticipated that such projects will be funded from general sources available under the Act, including general demonstration authority and authority under Title VII, Community Economic Development, to the extent consistent with that title; however, no such projects are to be funded from sums made available under the new Rural Housing and Rehabilitation programs.

Mr. President, this is critically important. The conferees expected that it would be done without the specific authorization. The specfic authorization was stricken out only in order to be wary of any interference with the rural housing and rehabilitation. I hope, therefore, that with the good faith shown in this matter, we will not be disappointed by some attitude of holding back by the OEO. The conferees fully intend, and say so, that projects dealing with deteriorating neighborhoods because of their substandard residential housing should be tried out, as the Senate amendment provided.

Mr. President, I regret very much that we are here with what, to me, is a very sad measure, having gone up the hill on legal services and down again, but to me it was simply either a matter of having some antipoverty bill or none at all, the parties having, as I say, separated because of irreconcilable positions on the two sides, not by Senator NELSON or me, but by the majority of the conferees on the House side and by the administration.

We must simply give it a try again. I am convinced that the legal services program is the new departure for the poor. It gives them a sense of dignity which is priceless and will redeem many from the curse of the poverty syndrome because of this sense of dignity and belonging. But it is inadequately funded, and it cannot possibly be run with effectiveness and independence unless it is some kind of an independent entity. The corporate idea is a very gifted one. Every precaution was taken to preserve the overriding public interest in respect to such a corporation. I am confident that we will have to come back to it, and I want to see us do that at the earliest possible moment, to continue what is probably the most gifted single program for the poor. But under the circumstances, I know of nothing else to do except send the President an antipoverty program by accepting this conference report.

Mr. TAFT. Mr. President, will the Senator yield?

Mr. JAVITS. I yield to the able Senator from Ohio, the ranking minority member of the subcommittee.

Mr. TAFT. I just want to say that I echo very strongly the point the Senator has expressed, and to state that I believe very strongly in the type of legal services program considered in the committee and acted upon favorably, not once but twice. I believe it is going to come to pass eventually, if not in the near future.

I hope also that the functions it can perform, not merely the functions presently being performed, and the additional professionalism and real separation from the political process that could come from an independent legal services program, will merit the early attention of the House and the Senate to this matter.

Mr. JAVITS. I thank my colleague.

The PRESIDING OFFICER. Is all remaining time yielded back?

Mr. NELSON. I yield back the remainder of my time.

The PRESIDING OFFICER. All time has been yielded back.

The question is on agreeing to the conference report.

The conference report was agreed to.

PUBLIC SAFETY OFFICERS' BENEFITS ACT OF 1972

The Senate continued with the consideration of the bill (S. 2087) to amend the Omnibus Crime Control and Safe Streets Act of 1968, as amended, to provide benefits to survivors of police officers killed in the line of duty.

The PRESIDING OFFICER. The Chair recognizes the Senator from Arkansas.

Mr. McCLELLAN. Mr. President, what is the time situation?

The PRESIDING OFFICER. The Senator from Arkansas has 30 minutes.

PRIVILEGE OF THE FLOOR—QUORUM CALL

Mr. McCLELLAN. I yield myself 10 minutes.

I ask unanimous consent that the following individuals have the privilege of the floor during the consideration of this bill: G. Robert Blakey, Elizabeth Bates, Kenneth Lazarus, and Thomas Rowe.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. McCLELLAN. I yield.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum, and I ask unanimous consent that the time not be charged to either side.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLELLAN. Mr. President, this bill was introduced last fall by Senator HRUSKA and myself at the request of the administration. It was reported upon favorably by the Committee on the Judiciary on August 16, 1972. Introduced in response to the alarming increase in killings of public safety officers, S. 2087 was also considered by the committee as title III of S. 2994 and S. 2995, omnibus victims-of-crime bills. As S. 2087 or in these forms, it was cosponsored by 45 of my colleagues: Senators BAKER, BAYH, BEALL, BENNETT, BIBLE, BOGGS, BURDICK, CANNON, CASE, COOK, CRANSTON, EASTLAND, FANNIN, GRAVEL, GRIFFIN, GURNEY, HANSEN, HART, HARRIS, HOLLINGS, HRUSKA, HUGHES, HUMPHREY, KENNEDY, MANSFIELD, MATHIAS, METCALF, MILLER, MONDALE, MOSS, MUSKIE, NELSON, PELL, PERCY, RANDOLPH, RIBICOFF, ROTH, SCHWEIKER, SCOTT, STAFFORD, STEVENS, STEVENSON, THURMOND, WILLIAMS, and YOUNG.

Mr. President, the statistics on violence involving public safety officers are truly disturbing. During 1971, 125 law enforcement officers were killed by felonious criminal action. This figure represents a 25 percent increase over 1970, when 100 law enforcement officers were slain. Since 1961, 758 officers have given their lives to protect persons and property in our society. The most disturbing statistic is that since 1966, 49 officers have been slain from ambush, 20 of them in 1971.

I recognize that 96 percent of these police slayings are now solved within 30 days by the efforts of local officials, assisted by the special Federal investigative aid authorized by a recent directive of the President. But this high clearance rate is of little moment to the officer's family or dependents. It is important that the murderer be brought to justice, but it is also important that concern be paid to the human and personal consequences of his conduct. This is especially true when it was often society in a real sense that was the target of the defendant's attack.

It is not only the policemen who must brave the risk of a felonious death. Civil disorders and social strife have, in recent years, produced new hazards for firefighters. Two firefighters were killed in the Detroit riots, one in Watts, another in Newark. From 1967 to 1969, over 600 firefighters were injured during civil disorders, and an additional 113 sustained injuries due to acts of individual violence.

Finally, mere reference to a small upstate town in New York—Attica—brings to mind the terrible risk that correction officers must now face in this age of antiestablishmentism, protest, and riot.

It was to meet these sad and tragic facts that S.2087 was introduced. Briefly, S. 2087 would provide a lump-sum gratuity of $50,000 to the dependent survivors of public safety officers killed in the line of duty as the result of a criminal act. In the case of dismemberment, the officer would receive $25,000.

Generally, "public safety officer" is defined as a public servant whose occupation places him in danger of physical injury by a criminal act. The concept is broad. It includes full-time and part-time officers and those who are paid and those who are not.

In the case of dismemberment, the award is paid directly to the officer. In case of death, the award will be paid according to a specified order of precedence to the surviving dependents of the officer. If the officer does not exercise an option to specify other dependent persons as recipients, the award will be paid according to criteria set out in the bill and, of course, if no one qualifies as a dependent, no payment would be made.

The officer must have been acting in the line of duty, and the death or dismemberment must have been suffered as the result of a criminal act or an apparent criminal act.

Unless the administration determines that there were extenuating circumstances, notification must be made to an appropriate official within a year after the death or injury. The official will be, depending upon the circumstances, the Governor or highest executive officer of a State, or the Attorney General.

Upon notification, the Governor or Attorney General will in turn notify the administration, which will make the proper payment. Pending a final determination, the administration may make an interim payment of $5,000.

Benefits under S. 2087 would not be subject to Federal income taxes, according to the Internal Revenue Service.

These benefits would be retroactive to deaths occurring under the specified conditions since January 1, 1967, the year that the number of police murders suddenly increased at such a great and horrifying rate.

Mr. President, in my State, during this period, a sheriff with two of his deputies responded to a call and went out to make an arrest of a person who was threatening the lives of the members of his own family. This person was an ex-convict. When the officers undertook to arrest and apprehend this party who was threatening to kill the members of his own family, he opened fire on them, and the sheriff and both of his deputies were killed.

I just mention that as an illustration of what is happening too many times in our land today.

These persons who are our law-enforcement officers and who risk their lives under such circumstances to protect society, to make our land a safe place in which to live, are generally underpaid. Their standard of income is low. It is very seldom that they have resources in the nature of an estate or income on which their dependents can rely for either security or support.

So, Mr. President, it seems to me—and I believe most everyone will agree—that we owe these officers, these guardians of our safety, some measure of consideration beyond the meager salaries we pay them. Certainly, when they are the victims of crime themselves, we should, as a Government and as a society, make some provision for their dependents.

Mr. President, we are rapidly fashioning new legal weapons and strengthening America's crime-fighting arsenal. But let us not underestimate the long, arduous road ahead before the bell tolls any substantial victory over the curse of crime.

We must continually strike at crime with all legal resources that we can command.

We must marshall all forces of decency, law, and order to reverse crimes destructive tide.

Our commitment is clear: We must be determined to make our homes, our streets, and our places of business safe once again.

In doing so, we must provide for those whose great personal sacrifices too often mark the tragedies in this battle against crime.

Mr. President, I urge the immediate enactment of S. 2087.

I reserve the remainder of my time.

The PRESIDING OFFICER (Mr. ALLEN). Who yields time?

Mr. HRUSKA. Mr. President, I yield myself 5 minutes.

The PRESIDING OFFICER. The Senator from Nebraska is recognized for 5 minutes.

Mr. HRUSKA. Mr. President, before I begin my remarks, I ask unanimous consent that the name of the Senator from Michigan (Mr. GRIFFIN) be added as a cosponsor of this bill.

The PRESIDING OFFICER. Without objections, it is so ordered.

Mr. HRUSKA. Mr. President, I am pleased to see that this proposal, S. 2087, has been scheduled for Senate consideration today. It is an important, overdue and humanitarian step in the long process of insuring that law enforcement officials know of the breadth of the support the American people give them.

This bill was originally introduced by the Senator from Arkansas (Mr. McCLELLAN) and this Senator in June a year ago as a response to the killings of police officers in various cities that had just taken place at that time. During the period this measure was under consideration by the Judiciary Committee the scope of the bill was expanded, and rightly so, to include all public safety officers—not just policemen—but also sheriffs, correction guards, firefighters, and national guardsmen. I want to commend the staff of the Criminal Laws Subcommittee for the very careful and scholarly work that was done on this bill which enabled it to reach the floor in this improved form today.

Mr. President, I should also like to pay tribute to the valuable work of the distinguished Senator from Arkansas (Mr. McCLELLAN) not only in introducing this measure but also in expanding it, and refining and perfecting it with a persistence of followup which has been most commendable. These actions on his part have served as another demonstration that he is a true and consistent friend and supporter of law enforcement and peace officers. Always in his mind are their interest and their well-being.

Mr. President, for too long public safety officials in this country have literally laid their lives on the line in the cause of duty without adequate financial resources behind them ready to assume the burdens of support should they be wounded or killed. In numerous incidents following the death of an officer, a public subscription had to be undertaken to provide for the survivors.

This inadequate and uncertain practice must end.

The Nixon administration recognized this problem and proposed legislation to correct the resulting situation. The original S. 2087 was the result of the President's concern for our public safety personnel. In commenting on the reasons for this proposal, the present Attorney General, Richard Kleindienst, said:

> Police officers throughout the country are facing a rising tide of violence. This alarming trend can only be reversed by professional police officers who are assured that they and their families will be compensated in a manner commensurate with the risks inherent in law enforcement.

The administration since Mr. Kleindienst's statement has supported the committee in its efforts to expand the bill to all public safety officers.

The bill now before us for consideration would provide a gratuity of $50,000 to the dependents of public safety officers killed in the line of duty as a result of a crime. It also provides a gratuity in the case of dismemberment under the same circumstances: $25,000 for single dismemberment and $50,000 for multiple dismemberment.

At the time this bill was introduced, this Senator commented:

> I believe that the benefits which this bill would provide are richly deserved and will help to enhance the morale of the gallant men in blue who daily put their lives on the line on our behalf. It merits the prompt and favorable attention of the Senate.

My feelings remain the same today.

The latest FBI Uniform Crime Report released last week indicates that a total of 126 law enforcement officers were killed due to felonious criminal action in 1971. This is an increase over 1970 when 100 law enforcement officers were slain. During the 10-year period, 1962–1971, 722 officers were killed.

Eighty-seven percent of these officers were white and 12 percent Negro. The median years of service for the entire period was five and one-half. Thirteen percent had one year or less service, 43 percent had less than 5 years of service, 28 percent had 5 to 10 years, and 29 percent had over 10 years of service. They deserve our support.

Similar facts are available, I am certain, on the other types of public safety personnel that would be covered by this benefit program.

It is for all of these reasons that I believe this is a timely and useful proposal and it is my hope that it will be approved not only by this body but that it will also receive prompt action in the other body before the adjournment of the current session of the 92d Congress.

Mr. President, if any of my time remains, I yield it back. I yield 5 minutes to the distinguished Senator from Delaware.

The PRESIDING OFFICER. The Senator from Delaware is recognized for 5 minutes.

Mr. BOGGS. Mr. President, I wish to express my strong support for S. 2087 which would provide a $50,000 death benefit and a $25,000 dismemberment benefit for public safety officers killed or injured in the line of duty. I join my colleagues in complimenting the distinguished Senator from Arkansas (Mr. McCLELLAN), and the distinguished Senator from Nebraska (Mr. HRUSKA), and the other members of the Judiciary Committee for bringing this important legislation to the floor. I have long advocated this type of benefit, and I am most pleased that the Judiciary Committee has approved it and followed through with it.

I am hopeful that not only will this legislation pass the Senate today, but also that the other body will act on it expeditiously.

At this time, I ask unanimous consent to be listed as a cosponsor of the legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BOGGS. Mr. President, last year I introduced a similar bill to provide a $50,000 death benefit to the survivors of policemen, firemen, and corrections officers killed in the line of duty. At that time I noted that such a benefit is now paid to the survivors of police officers in the District of Columbia. In addition, special death benefits are now available to State and local law enforcement personnel killed while enforcing Federal law.

While the States have been encouraged to provide comparable benefits for local law enforcement officers, the response has been uneven, resulting in a patchwork of benefits nationwide. Several States, in fact, offer virtually no financial assistance to the survivors of slain law enforcement officers. S. 2087 would correct this inequity by establishing a Federal floor, so to speak, under the benefits that survivors of public safety officers would be entitled to receive.

The committee, I am happy to note, has made a number of significant additions to my original proposal. The definition of a public safety officer has been extended to include highway patrol and National Guard or Armed Forces personnel assigned to civil duty as well as correctional and court personnel in contact with potentially dangerous criminals. I welcome the addition of these persons to my original proposal which covered policemen, firemen, and corrections guards. All of these men and women live daily with potential danger to their well-being and should receive this benefit.

Over the period from 1960 to 1970, the number of public safety officers killed in the line of duty rose sharply. In 1960, 37 policemen and 46 firefighters lost their lives on the job. In 1970, the number had risen to 100 policemen and 115 firefighters. The sharp increase in both categories occurred in 1967 and, therefore, the death and dismemberment benefits available under S. 2087 have been made retroactive to January 1, 1967. I am pleased that this will allow the families of three Delaware State troopers to receive this compensation.

Mr. President, I feel strongly that if we are to continue to attract responsible family men and women into these increasingly hazardous occupations, we must be prepared to provide them with the security of knowing that their families will be provided for should they be severely disabled or killed as a result of their work. The need to fill these jobs with capable men and women and our obligation to them is just as great whether they serve at the Federal, State, or local level.

I urge Senators to approve this legislation.

Mr. HRUSKA. Mr. President, if the Senator would yield, the RECORD should show that when the hearings were held on these and related bills, the Senator from Delaware (Mr. BOGGS) appeared as one of the witnesses. He appeared as one of the witnesses because of his longstanding interest in the field of law enforcement and his desire to support peace officers. I know of his record in this regard when he was Governor of his State. It was a long and consistent and good record. Not only that, but as he has pointed out, he introduced a similar bill that would provide the same benefits.

At this time I acknowledge with appreciation the support the Senator from Delaware gave us during the time of our hearings and I thank him for the fine statement he has made on the floor this afternoon.

Mr. BOGGS. Mr. President, I thank my distinguished friend, the Senator from Nebraska. I am happy to join with him and with other Members of the Senate in moving this legislation forward.

The PRESIDING OFFICER. The bill is open to amendment. Who yields time?

Mr. McCLELLAN. Mr. President, I suggest the absence of a quorum and ask unanimous consent that the time be charged equally to both sides.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HRUSKA. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HRUSKA. Mr. President, I yield 3 minutes to the Senator from Illinois.

The PRESIDING OFFICER. The Senator from Illinois is recognized for 3 minutes.

Mr. PERCY. Mr. President, I thank my distinguished friend, the Senator from Nebraska, and wish to commend both the Senator from Arkansas (Mr. McCLELLAN) and the Senator from Nebraska (Mr. HRUSKA) for the legislation that is before the Senate at this time.

Mr. President, our public safety officers—our policemen and women, sheriffs, correctional guards, firefighters, and National Guardsmen—are a group of men and women who guard that tenuous line that separates us from anarchy. We have become accustomed to the brave deeds and quick responses of these dedicated men and women. However, in the past, our praise and thanks has been pitifully small in comparison to the sacrifices that these people are called upon to make both day and night.

I am pleased to say that with the bill we are considering today, S. 2087, the Congress will begin to deal effectively with some of the harsh realities which face these public service officers and their families. This bill is also a part of S. 2994 which I was pleased to cosponsor. It provides that the families of public safety officers killed in the line of duty may receive up to $50,000 and that those officers who are dismembered may receive up to $25,000 for each limb, up to a total of $50,000. There is no monetary value that we can put on the life of a father, or the arm or eye of a young man; there is no amount of money which could compensate a family for the loss of their loved one. However, this bill does help to ease the loss by insuring that economic deprivation will not be an added burden for the family. The action of the Senate today will see to it that money is coming into the family at a time when its main source of income has been terminated.

Mr. President, in the last 6 years, I have visited with many of the grief-stricken families of police officers killed in the line of duty. In almost every case, these families faced an uncertain future due to the fact that their husbands did not have proper or adequate life insurance. Often, these families were too young to have saved much money. Anyone who has met with families in this situation, as I have, knows that we in the Congress must help ease the burden of these families who have given so much to the communities in which their husbands and fathers served.

I am especially pleased at the retroactivity section of this bill which will cover public service officers killed or wounded in the line of duty since January 1, 1967. Though it is unfortunately true that an arbitrary line has to be drawn in these matters, I feel that the one agreed to is a fair one.

Mr. President, I was pleased to cosponsor this provision as part of S. 2994, and I am pleased to speak in favor of this bill today. I urge my colleagues to join with me in overwhelmingly passing this very important legislation. This can be our way of repaying some of the sacrifices that have been made for the safety and welfare of all of our communities.

Mr. President, I would like to address a question to the Senator from Nebraska. I ask if I might be advised as to what the procedures will be in the House and what action has been taken by that body so that we might expect enactment of this legislation in this legislative year within the next 5 weeks and its signature by the President.

Mr. HRUSKA. Mr. President, I might say that it is our hope that action will be taken. A measure is pending. I do not know the exact extent of the hearings held at this time, but some have been held on this general question. Whether they have been concluded I am not informed. But it is our hope that this bill will receive prompt attention so it can be laid on the President's table for signature into law before this Congress adjourns sine die.

Mr. PERCY. I urge all of us, and I trust we will, to urge our colleagues in the other body to act promptly.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. HRUSKA. I yield the Senator 2 additional minutes.

Mr. PERCY. I know that when we adopt this measure today I intend to telephone the superintendent of police in Chicago and advise him of our action, and urge that he, the mayor of Chicago, and other public officials urge upon our colleagues in the Illinois delegation their swift and prompt action in this regard.

I also intend to telephone some of the widows of policemen whose homes I have visited, and the funerals of husbands I have attended, to advise them of what we have done. I know it will mean a great deal from the standpoint of family security. On the first day of business the Senate has addressed itself to this important matter and it will do a tremendous amount to raise their morale and spirits, and the morale and spirits of all police forces in this country.

Again, I commend my distinguished colleague from Nebraska and the distinguished Senator from Arkansas for the leadership that has been provided in this legislation.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. HRUSKA. Mr. President, I suggest the absence of a quorum, and I ask unanimous consent that the time be equally divided.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. McCLELLAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered. Who yields time?

Mr. BAYH. Mr. President, I send to the desk an amendment.

The PRESIDING OFFICER. The amendment will be stated.

The amendment was read as follows:

> On page 7, after line 13, add the following new subsection:
>
> "(e) In lieu of the benefit provided under subsection (a), any recipient eligible under section 527 may elect to receive compensation under the provisions of the Federal Employees' Compensation Act, 5 U.S.C., Chapter 81, as if the public safety officer had been covered by such Act."

Mr. BAYH. Mr. President, I wish to join with those who have expressed their deep appreciation to the distinguished senior Senator from Arkansas for the work that he has done in this area to try to provide benefits for our policemen, firefighters, and their families. Some time ago, I introduced a bill that is designated S. 1081. The bill was referred to the Committee on Government Operations. During the deliberations the other day on this particular matter—S. 2087—before the Committee on the Judiciary, I did not feel it appropriate at that time to bring my bill to the attention of the full Committee on the Judiciary. We had four or five sections of a bill; there were controversies; and I did not want to muddy the water or cloud the water but I did want to bring to the attention of the Senate now, the provisions of this measure and ask the Senator from Arkansas if he would give it the most careful consideration.

The amendment which the Senator from Indiana has called up would make available the present Federal Employees' Compensation Act benefits to all policemen and also to firefighters injured in the course of their duty. These same benefits are now available under title 5, United States Code, section 8191, with respect to those injured or who are killed enforcing the law with respect to a Federal crime. So I would want to extend these benefits to all police and firefighters, whether or not they are engaged in Federal law enforcement activities.

The way the law is written now there is a distinction between a policeman killed in a small community while trying to enforce the law with respect to a Federal crime, which may have been committed in a large community and the way that same officer and his family are treated if he is killed in the line of duty in connection with a State crime. It is a distinction which has no merit. And so I would erase that distinction. And I feel that firefighters also should be compensated the same as police. All public safety does not involve law enforcement as such, but firefighters too put their lives on the line daily for us, and they as well as policemen should receive these maximum benefits.

The amendment I have introduced would provide that we give to the police officer or the firefighter, or his or her family, the choice of taking the $50,000 lump sum benefit in the bill as it is, or to receive compensation under the Federal Employees' Compensation Act. In many instances, particularly in the case of a widow with several children or in the case of a long term disability of a police officer or firefighter these benefits would be significantly greater in terms of necessary reimbursement and compensation to that policeman, firefighter, or his family than could be achieved under the $50,000 lump sum payment.

Inasmuch as presently we have this one provision of law under which police can receive these benefits, I wonder if the Senator would consider giving the option to the injured policeman or firefighter—or his family—to take either the $50,000 lump sum or the benefits presently made available under the Federal Employees' Compensation Act for that one particular category of police officers—those involved in Federal law enforcement activities?

Mr. McCLELLAN. Mr. President, will the Senator yield?

Mr. BAYH. I am glad to yield to the distinguished Senator from Arkansas.

Mr. McCLELLAN. Mr. President, this amendment presents some issues that, I think, deserve study. I do not think hasty action should be taken. The distinguished Senator from Indiana notes that those who may be killed while undertaking to enforce a Federal law would be entitled to Federal workmen's compensation under existing law. He then proposes that all policemen not enforcing Federal law also come under this legislation.

I would like to make this suggestion to the Senator, who is a member of the Committee on the Judiciary, and who, I note, did not raise this question when the bill was before the committee for consideration. Since he has also introduced a bill to carry out what he seeks to do by this amendment, and that bill is now pending before the Government Operations Committee, I would hope that he might allow that bill to take its due course, and that the Senator would let the committee work its will on it, make a report, and either report the bill favorably or with such amendments as it would deem advisable, and not complicate this bill. I would hope he would let the two issues stand separately.

I would also suggest to my distinguished friend from Indiana that this bill has to go to the House of Representatives. I understand a Member of the House, Representative JACOBS, is interested in the same bill that the Senator from Indiana is discussing. I would like to urge, or suggest, most respectfully, that the Senator let the bill pass as it is, without his amendment, and then, working with Representative JACOBS and others who may share the Senator's views, let the House work its will on the proposal and then let it go to conference. In the meantime we will have an opportunity to study this proposal, and we might be able to reach an accommodation.

But I am not prepared here on the floor to make a snap judgment, in view of the committee's having reported the bill in its present form, and this matter not having been considered by the Judiciary Committee. I would like the Senator to do that.

If we take a vote on it, and it is adopted, of course, it will go to conference; but if it is not adopted, and the House should insert it in the bill, it would make it a little more difficult for the conferences on the part of the Senate to yield to a House provision of that character.

There are some other problems in connection with this proposal that concerns me. I know it leaves it to the dependent to make the election, but what if there is a dependent mother and a child who is under guardianship? Who would make the decision? They both cannot make the decision.

I think there are some possible complications that need to be worked out here. We should not accept this measure in this way. It might take a lot more language than is proposed here to get it into proper form to make it workable.

I say this because I am interested, as the Senator is, in making certain that dependents of officers who may be slain are given some measure of support and security, after they have made the great sacrifice of losing their father or husband, as the case may be.

Mr. HRUSKA. Mr. President, will the Senator yield?

Mr. McCLELLAN. I yield this time out of my time.

Mr. HRUSKA. Mr. President, I subscribe to the view and the hope just expressed by the Senator from Arkansas. The solicitude the Senator from Indiana has consistently shown for the welfare and well-being of police officers is well known. I know he has very fine objectives in mind, but it should be recalled that one reason for the bill being in the form it is is to achieve ease and simplicity in making a claim and processing it. We have had no opportunity to get into the very technical matter of engrafting this gratuity or its equivalent in terms of the Federal Employees Act. It is not an act which is within the purview of the Committee on the Judiciary. I do not recall, and I am not currently informed, as to whether it is within the jurisdiction of the Committee on Post Office and Civil Service, the Government Operations Committee, or the Finance Committee, but it is not in the purview of our committee.

I join the Senator from Arkansas in the request that perhaps the amendment could be withdrawn, with the idea of getting it processed in the other body, and then considering it in conference, if they would see fit to come forward with such a proposal.

I yield back the remainder of my time if any there be.

Mr. BAYH. Mr. President, I am inclined to follow the suggestion of my distinguished colleague the senior Senator from Arkansas and my distinguished colleague from Nebraska, but before doing so I would like to point out that the Senator from Indiana does not make this offer of an amendment lightly. I see present in the Chamber the distinguished Senator from Massachusetts (Mr. KENNEDY), who was a part of the discussion in the Judiciary Committee and was vitally interested in this aspect. Senators will remember that the last committee meeting was rather tumultous. The Senator from Indiana would have felt that he was not doing a favor to the Senator from Arkansas or to the Senator from Massachusetts or other Senators by bringing up this specific measure at that time.

Second, the suggestion to pursue it through the Government Operations Committee is one that really holds little hope as far as can be determined from past history. My measure has been before that committee for the best part of 2 years.

We are now discussing what we do as a society to provide sustenance—there is no way we can replace the loss—to those who remain after a policeman or a firefighter is taken from them or left in a disabled condition. It seems to me that we all want to provide the most effective and helpful scheme of benefits, however, our final determination of those benefits is arrived at.

I wanted to point out the reason why the Senator from Indiana felt dutybound to bring this to the attention of the Senator from Arkansas now was that when this measure was last considered, in 1968, in the case of police killed or injured while enforcing Federal law, the Senate position at that time was for a lump sum benefit. The House pursued the route discussed by the Senator from Indiana, and there was a compromise. There was a melding together. It was accomplished. The Senator from Arkansas, I am sure, will remember that, although he brings attention to this matter, the compromise was between the Senate version—a $25,000 lump sum, and the House version—benefits from the Federal Employees Compensation Act. When I remembered that and when I recalled the obstacle in the House with reference to acceptance of the lump sum benefit, I thought it would be helpful to offer this amendment now to facilitate compromise with the House.

If the Senator will bear with me while I point out those instances where I think we have a stronger bill, I will do so and then withdraw my amendment. I intend to pursue it diligently with Members of the House, with the understanding that the Senator from Arkansas and the Senator from Nebraska will proceed with this approach if the House agrees to go along with it.

Under my amendment, a widow without children would get 45 percent of what her husband was earning. And she would get it for life or until she remarried. If she has children, she gets 40 percent plus 15 percent for each child until she remarries, or her children reach the age of 18, or 22 if they are students. This widow's and children's compensation could be as high as 75 percent of the deceased policeman or firefighter's salary.

If we take that amount on a monthly annuity basis for a mother with young children, and compare it with the $50,000 lump sum settlement, we will see that a mother with three small children gets significantly more that way. Invested at 6 percent, $50,000 would yield only $3,000 annually. A widow with three children under my approach would get $7,500 annually.

Or take the cost of an injured or disabled policeman or firefighter. Under this bill, only if a man lost most of his hand or foot or eye would he be compensated at all, and then no matter what the extent of his injury, his highest benefit would be $50,000. Under my approach, such an injured or disabled policeman or firefighter could get the full range of FECA benefits—medical care, rehabilitation, and far more liberal compensation for loss of his limbs, or his eyesight, or his hearing—or any other disability.

Now, if her husband is slain while enforcing a Federal criminal act she would be eligible for these benefits. But if he was not, then she is not eligible. It seems to me it makes no difference how the husband is killed or injured—the need, the sorrow, and the justification are just as great. But any amendment would allow each beneficiary to choose whether he or she wanted the lump sum or the annuity type payment.

The PRESIDING OFFICER. The Senator's time has expired. Does the Senator from Arkansas care to use any additional time?

Mr. McCLELLAN. Mr. President, I yield myself 1 more minute.

I have expressed my views about this matter, and am still hopeful that the suggestion, which I made in all sincerity, will be accepted and that if the House of Representatives brings in a different approach, in the form of payments under a workmen's compensation type plan, for example, then we will try to resolve the matter in conference. If that is the will of the House, and they prefer to do it that way, or if they make amendments to this bill after due consideration of it, and try to bring in a dual plan, so to speak, then we will be in a position to consider the matter in conference.

I am not taking a position unalterably opposed to this proposal; I just do not want to legislate in the dark here.

There are complications in it, in my judgment, that need to be studied and resolved with some intelligent arrangement, and not just haphazardly.

That is the only concern I have. As I say, I am sure the distinguished Senator from Indiana is just as anxious as I am to try to accomplish the same objective that I have.

In reference to the bill in the Government Operations Committee, it may have been there a year or longer, but I do not recall any request for hearings on it, and after all, we do have a heavy workload, some of us, and often we are not able to accommodate every problem that we are presented.

Mr. BAYH. Mr. President, will the Senator yield?

Mr. McCLELLAN. Yes, I am happy to yield to the Senator from Indiana.

The PRESIDING OFFICER. Does the Senator from Arkansas yield himself additional time?

Mr. McCLELLAN. I yield myself 2 additional minutes.

Mr. BAYH. Mr. President, I would like, for the sake of the record and if an amendment is submitted, now or somewhere else, to talk about what we really want to accomplish here.

It has been brought to the attention of the Senator from Indiana that the way the measure is now worded, if a police officer is killed or wounded while enforcing a Federal law, under the law as it is now, he or his survivors would qualify for Federal Employment Compensation Act benefits under section 8191 of title 5.

If he is killed, under the present bill, is it not also true that in addition to the Federal Employment Compensation Act benefits the family would receive an additional $50,000 lump sum?

Mr. McCLELLAN. That is true.

Mr. BAYH. The Senator from Indiana is trying to provide more benefits to firemen and policemen, not less, but I am just pointing that out, to show that there is a discrepancy in the bill as it is now.

Mr. McCLELLAN. I would point out to the distinguished Senator that I would have no objection to reconsidering this aspect of the bill before it is finally——

Mr. BAYH. So that Federal officials who would get killed today would be entitled to both of them, too. The only people who would not be entitled to both are the State and local police and firefighters whom we are trying to help.

The concern that the Senator from Indiana has is that it is pretty difficult to compensate somebody too much who lays down his life.

Mr. McCLELLAN. I realize that, and that in trying to work these things out, as the Senator has discovered here, with all of our work, sometimes we are not able to handle all of these problems at one time, and some of these matters may deserve further consideration. But I hope the bill will not be further complicated.

Mr. BAYH. I shall pursue this with some of our brethren over in the House of Representatives, but I call this to the Senator's attention so that we may all work together cooperatively. We all want to see that our policemen and firemen are fairly and adequately treated. Money cannot replace a father or a husband, nor can we really compensate a young man who loses his arm or his eyes. But we can take what steps we may to make the loss easier to bear, and I hope that we can all resolve these important questions satisfactorily, in the interests of these brave men and women and their families.

Mr. President, I withdraw my amendment.

The PRESIDING OFFICER. The amendment is withdrawn.

Mr. STENNIS. Mr. President, will the Senator yield?

Mr. McCLELLAN. Mr. President, I yield myself 1 additional minute. I thank the distinguished Senator from Indiana. I believe this colloquy has made a valuable contribution to the consideration of this measure and to the debate.

Mr. STENNIS. Mr. President, will the Senator yield?

Mr. McCLELLAN. I yield myself 1 more minute, and yield to the Senator from Mississippi.

Mr. STENNIS. Mr. President, I call the Senator's attention to page 5, the bottom one-third of the page where it gives the definitions.

(7) Defines "public safety officer," and then (A) states:

> The enforcement of the criminal laws, including highway patrol, or the maintenance of civil peace by the national guard or the Armed Forces,

Now, this "maintenance of civil peace" refers, I assume, to when the National Guard or the Army or Reserves are called out on public duty.

Mr. McCLELLAN. That is correct.

Mr. STENNIS. Will it apply if the National Guard is called out by the Governor, and not federalized?

Mr. McCLELLAN. It would, because they are acting in the performance of their duty at that time which would be law enforcement.

Mr. STENNIS. So they would not have to be federalized, as we call it, in order to come within the provisions of this act?

Mr. McCLELLAN. No, they would not have to be federalized.

Mr. STENNIS. I thank the Senator.

Mr. McCLELLAN. That is the reason for bringing them within the act, because sometimes the National Guard is called on to help preserve civil order.

Mr. STENNIS. And when they are called on, it is frequently a serious matter.

Mr. McCLELLAN. Yes. I thank the Senator.

The PRESIDING OFFICER. The bill is open to amendment.

Mr. HRUSKA. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. On whose time is the quorum call to be made?

Mr. McCLELLAN. I ask unanimous consent that the time not be charged to either side.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HRUSKA. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HRUSKA. I yield 4 minutes to the Senator from South Carolina.

Mr. THURMOND. Mr. President, the problem of crime in the United States has been a matter of great concern to the American people and to Congress in recent years. While main attention has been focused on the necessity for reducing criminal activities and on assisting the victims of crime, the Judiciary Committee has also felt that it is extremely important to focus on the problems of law enforcement personnel in this country. The number of police officers who have been the victims of felonious killings has risen dramatically from 37 in 1961 to 126 in 1971. In addition, it has been found that State and local assistance to the families of deceased policemen and firemen is not adequate. Indeed, there are 18 States which provide no survivors benefits to the families of peace officers slain in the line of duty.

With these factors in mind, S. 2087, the Public Safety Officers Benefits Act of 1972, was conceived. This bill provides for a gratuity of $50,000 to be paid to the dependents of public safety officers killed in the line of duty as a result of a crime. In the case of dismemberment under similar circumstances the sum of $25,000 is to be paid to the victim for single dismemberment and $50,000 for multiple dismemberment. The benefits awarded under this bill would not be subject to Federal income tax.

Mr. President, I believe passage of this bill is most important as I am confident it will accomplish two highly worthwhile purposes. First, it will provide much-needed compensation to the men and their families who are responsible for the public safety of American citizens. Testimony before the Judiciary Committee indicated this bill was supported by the administration and by numerous associations of law enforcement officials, including the National Sheriffs Association and Heroes, Inc., an organization of volunteers to aid the survivors of deceased policemen and firemen. Their testimony, as well as that of others, clearly indicates there is a great need for these benefits and that at present the families who are left when public safety officers are killed suffer severe financial hardship. The cost of appropriate insurance is much higher for these men than for other citizens.

The second reason why I believe this bill should be passed is that I am confident that it will promote and encourage more effective law enforcement. It will certainly provide additional incentive in the recruitment of public safety officers throughout the United States. In addition, it will provide a substantial boost to the morale of public safety officers and their families. The problem of crime in our society greatly affects all Americans and any action which the Congress can take to improve this situation should be taken.

Mr. President, the term "public safety officer" is defined in this bill to be inclusive rather than exclusive and applies to policemen, highway patrolmen, court and prison personnel, and firemen, as well as others. This bill represents a serious attempt on the part of the Congress to provide financial security to public safety officers and their families and to help combat the serious crime rate in this country. I urge the Senate to pass this worthwhile measure.

Mr. KENNEDY. Mr. President, I send to the desk an amendment.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk proceeded to read the amendment.

Mr. KENNEDY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER (Mr. STAFFORD). Without objection, it is so ordered; and, without objection, the amendment will be printed in the RECORD.

The amendment is as follows:

At the end of the bill, add the following new title:

TITLE II

This title may be cited as the "Public Safety Officers' Group Life Insurance Act of 1972."

DECLARATION OF PURPOSE

SEC. 101. It is the declared purpose of Congress in this title to promote the public welfare by establishing a means of meeting the financial needs of public safety officers or their surviving dependents through group life, accidental death, and dismemberment insurance, and to assist State and local governments to provide such insurance.

INSURANCE PROGRAM AUTHORIZED

SEC. 102. The Omnibus Crime Control and Safe Streets Act of 1968, as amended, is amended by—

(1) redesignating sections 451 through 455, respectively, as sections 421 through 425;

(2) redesignating sections 501 through 521, respectively, as sections 550 through 570;

(3) redesignating parts F, G, H, and I of title I, respectively, as parts I, J, K, and L of title I; and

(4) adding at the end of part F of title I, as amended by this Act, the following new part:

"PART G—PUBLIC SAFETY OFFICERS' GROUP LIFE INSURANCE

"SEC. 500. For the purposes of this part—

"(1) 'child' includes as stepchild, an adopted child, an illegitimate child, and a posthumous child;

"(2) 'month' means a month that runs from a given day in one month to a day of the corresponding number in the next or specified succeeding month, except when the last month has not so many days, in which event it expires on the last day of the month and

"(3) 'public safety officer' means a person who is employed full time by a State or unit of general local government in—

"(A) the enforcement of the criminal laws, including highway patrol,

"(B) a correctional program, facility, or institution where the activity is potentially dangerous because of contact with criminal suspects, defendants, prisoners, probationers, or parolees,

"(C) a court having criminal or juvenile delinquent jurisdiction where the activity is potentially dangerous because of contact with criminal suspects, defendants, prisoners, probationers, or parolees, or

"(D) firefighting.

but does not include any person eligible to participate in the insurance program established by chapter 87 of title 5 of the United States Code or any person participating in the program established by, Subchapter III of chapter 19 of Title 38 of the United States Code.

"Subpart 1—Nationwide Program of Group Life Insurance for Public Safety Officers

"ELIGIBLE INSURANCE COMPANIES

"SEC. 501. (a) The Administration is authorized, without regard to section 3709 of the Revised Statutes, as amended (41 U.S.C. 5), to purchase from one or more life insurance companies a policy or policies of group life insurance to provide the benefits specified in this subpart. Each such life insurance company must (1) be licensed to issue life, accidental death, and dismemberment insurance in each of the fifty States of the United States and the District of Columbia, and (2) as of the most recent December 31 for which information is available to the Administration, have in effect at least 1 per centum of the total amount of group life insurance which all life insurance companies have in effect in the United States.

"(b) Any life insurance company issuing such a policy shall establish an administrative office at a place and under a name designated by the Administration.

"(c) The Administration may at any time discontinue any policy which it has purchased from any insurance company under this subpart.

"REINSURANCE

"SEC. 502. (a) The Administration shall arrange with each life insurance company issuing a policy under this subpart for the reinsurance, under conditions approved by the Administration, of portions of the total amount of insurance under the policy, determined under this section, with other life insurance companies which elect to participate in the reinsurance.

"(b) The Administration shall determine for and in advance of a policy year which companies are eligible to participate as reinsurers and the amount of insurance under a policy which is to be allocated to the issuing company and to reinsurers. The Administration shall make this determination at least every three years and when a participating company withdraws.

"(c) The Administration shall establish a formula under which the amount of insurance retained by an issuing company after ceding reinsurance, and the amount of reinsurance ceded to each reinsurer, is in proportion to the total amount of each company's group life insurance, excluding insurance purchased under this subpart, in force in the United States on the determination date, which is the most recent December 31 for which information is available to the Administration. In determining the proportions, the portion of a company's group life insurance in force on the determination date in excess of $100,000,000 shall be reduced by—

"(1) 25 per centum of the first $100,000,000 of the excess;

"(2) 50 per centum of the second $100,000,000 of the excess;

"(3) 75 per centum of the third $100,000,000 of the excess; and

"(4) 95 per centum of the remaining excess.

However, the amount retained by or ceded to a company may not exceed 25 per centum of the amount of the company's total life insurance in force in the United States on the determination date.

"(d) The Administration may modify the computations under this section as necessary to carry out the intent of this section.

"PERSONS INSURED; AMOUNT

"SEC. 503. (a) Any policy of insurance purchased by the Administration under this subpart shall automatically insure any public safety officer employed on a full-time basis by a State or unit of general local government which has (1) applied to the Administration for participation in the insurance program under this subpart, and (2) agreed to deduct from such officer's pay the amount of such officer's contribution, if any, and forward such amount to the Administration or such other agency or office as is designated by the Administration as the collection agency or office for such contributions. The insurance provided under this subpart shall take effect from the first day agreed upon by the Administration and the responsible officials of the State or unit of general local government making application for participation in the program as to public safety officers then on the payroll, and as to public safety officers thereafter entering on full-time duty from the first day of such duty. The insurance provided by this subpart shall so insure all such public safety officers unless any such officer elects in writing not to be insured under this subpart. If any such officer elects not to be insured under this subpart he may thereafter, if eligible, be insured under this subpart upon written application, proof of good health, and compliance with such other terms and conditions as may be prescribed by the Administration.

"(b) A public safety officer eligible for insurance under this subpart is entitled to be insured for an amount of group life insurance, plus an equal amount of group accidental death and dismemberment insurance, in accordance with the following schedule:

If annual pay is—		The amount of group insurance is	
Greater than—	But not greater than—	Life	Accidental death and dismemberment
0	$8,000	$10,000	$10,000
$8,000	9,000	11,000	11,000
$9,000	10,000	12,000	12,000
$10,000	11,000	13,000	13,000
$11,000	12,000	14,000	14,000
$12,000	13,000	15,000	15,000
$13,000	14,000	16,000	16,000
$14,000	15,000	17,000	17,000
$15,000	16,000	18,000	18,000
$16,000	17,000	19,000	19,000

If annual pay is—		The amount of group insurance is	
Greater than—	But not greater than—	Life	Accidental death and dismemberment
$17,000	$18,000	$20,000	$20,000
$18,000	19,000	21,000	21,000
$19,000	20,000	22,000	22,000
$20,000	21,000	23,000	23,000
$21,000	22,000	24,000	24,000
$22,000	23,000	25,000	25,000
$23,000	24,000	26,000	26,000
$24,000	25,000	27,000	27,000
$25,000	26,000	28,000	28,000
$26,000	27,000	29,000	29,000
$27,000	28,000	30,000	30,000
$28,000	29,000	31,000	31,000
$29,000		32,000	32,000

The amount of such insurance shall automatically increase at any time the amount of increase in the annual basic rate of pay places any such officer in a new pay bracket of the schedule and any necessary adjustment is made in his contribution to the total premium.

"(c) Subject to conditions and limitations approved by the Administration which shall be included in any policy purchased by it, the group accidental death and dismemberment insurance shall provide for the following payments:

"Loss	Amount payable
For loss of life	Full amount shown in the schedule in subsection (b) of this section.
Loss of one hand or of one foot or loss of sight of one eye.	One-half of the amount shown in the schedule in subsection (b) of this section.
Loss of two or more such members.	Full amount shown in the schedule in subsection (b) of this section.

The aggregate amount of group accidental death and dismemberment insurance that may be paid in the case of any insured as the result of any one accident may not exceed the amount shown in the schedule in subsection (b) of this section.

"(d) Any policy purchased under this subpart may provide for adjustments to prevent duplication of payments under any program of federal gratuities for killed or injured public safety officers.

"(e) Group life insurance shall include provisions approved by the Administration for continuance of such life insurance without requirement of contribution payment during a period of disability of a public safety officer covered for such life insurance.

"(f) The Administration shall prescribe regulations providing for the conversion of other than annual rates of pay and shall specify the types of pay included in annual pay.

"TERMINATION OF COVERAGE

"SEC. 504. Each policy purchased under this subpart shall contain a provision, in terms approved by the Administration, to the effect that any insurance thereunder on any public safety officer shall cease two months after (1) his separation or release from full-time duty as such an officer or (2) discontinuance of his pay as such an officer, whichever is earlier: *Provided, however,* That coverage shall be continued during periods of leave or limited disciplinary suspension if such an officer authorizes or otherwise agrees to make or continue to make any required contribution for the insurance provided by this subpart.

"CONVERSION

"SEC. 505. Each policy purchased under this subpart shall contain a provision, in terms approved by the Administration, for the conversion of the group life insurance portion of the policy to an individual policy of life insurance effective the day following the date such insurance would cease as provided in section 504 of this subpart. During the period such insurance is in force, the insured, upon request to the Administration, shall be furnished a list of life insurance companies participating in the program established under this subpart and upon written application (within such period) to the participating company selected by the insured and payment of the required premiums, the insured shall be granted life insurance without a medical examination on a permanent plan then currently written by such company which does not provide for the payment of any sum less than the face value thereof. In addition to the life insurance companies participating in the program established under this subpart, such list shall include additional life insurance companies (not so participating) which meet qualifying criteria, terms, and conditions established by the Administration and agree to sell insurance to any eligible insured in accordance with the provisions of this section.

"WITHHOLDING OF PREMIUMS FROM PAY

"SEC. 506. During any period in which a public safety officer is insured under a policy of insurance purchased by the Administration under this subpart, his employer shall withhold each pay period from his basic or other pay until separation or release from full-time duty as a public safety officer an amount determined by the Administration to be such officer's share of the cost of his group life insurance and accidental death and dismemberment insurance. Any such amount not withheld from the basic or other pay of such officer insured under this subpart while on full-time duty as a public safety officer, if not otherwise paid, shall be deducted from the proceeds of any insurance thereafter payable. The initial amount determined by the Administration to be charged any public safety officer for each unit of insurance under this subpart may be continued from year to year, except that the Administration may redetermine such amount from time to time in accordance with experience.

"SHARING OF COST OF INSURANCE

"SEC. 507. For each month any public safety officer is insured under this subpart, the Administration shall bear not more than one-third of the cost of insurance for such officer, or such lesser amount as may from time to time be determined by the Administration to be a practicable and equitable obligation of the United States in assisting the States and units of general local government in recruiting and retaining their public safety officers.

"INVESTMENTS AND EXPENSES

"SEC. 508. (a) The amounts withheld from the basic or other pay of public safety officers as contributions to premiums for insurance under section 506 of this subpart, any sums contributed by the Administration under section 507 of this subpart, and any sums contributed for insurance under this subpart by States and units of general local government under section 515 of this part, together with the income derived from any dividends or premium rate readjustment from insurers, shall be deposited to the credit of a revolving fund established by section 517 of this part. All premium payments on any insurance policy or policies purchased under this subpart and the administrative costs to the Administration of the insurance program established by this subpart shall be paid from the revolving fund by the Administration.

"(b) The Administration is authorized to set aside out of the revolving fund such amounts as may be required to meet the administrative costs to the Administration of the program and all current premium payments on any policy purchased under this subpart. The Secretary of the Treasury is authorized to invest in and to sell and retire special interest-bearing obligations of the United States for the account of the revolving fund. Such obligations issued for this purpose shall have maturities fixed with due regard for the needs of the fund and shall bear interest at a rate equal to the average market yield (computed by the Secretary of the Treasury on the basis of market quotations as of the end of the calendar month next preceding the date of issue) on all marketable interest-bearing obligations of the United States then forming a part of the public debt which are not due or callable until after the expiration of four years from the end of such calendar month; except that where such average market yield is not a multiple of one-eighth of 1 per centum, the rate of interest of such obligation shall be the multiple of one-eighth of 1 per centum nearest market yield. The interest on and the proceeds from the sale of these obligations, and the income derived from dividends or premium rate adjustments from insurers, shall become a part of the revolving fund.

"BENEFICIARIES; PAYMENT OF INSURANCE

"SEC. 509. (a) Any amount of insurance in force under this subpart on any public safety officer or former public safety officer on the date of his death shall be paid, upon the establishment of a valid claim therefor, to the person or persons surviving at the date of his death, in the following order of precedence:

"(1) to the beneficiary or beneficiaries as the public safety officer or former public safety officer may have designated by a writing received in his employer's office prior to his death;

"(2) if there is no such beneficiary, to the surviving spouse of such officer or former officer;

"(3) if none of the above, to the child or children of such officer or former officer and to the descendants of deceased children by representation in equal shares;

"(4) if none of the above, to the parent or parents of such officer or former officer, in equal shares; or

"(5) if none of the above, to the duly appointed executor or administrator of the estate of such officer or former officer.

Provided, however, That if a claim has not been made by a person under this section within the period set forth in subsection (b) of this section, the amount payable shall escheat to the credit of the revolving fund established by section 517 of this part.

"(b) A claim for payment shall be made by a person entitled under the order of precedence set forth in subsection (a) of this section within two years from the date of death of a public safety officer or former public safety officer.

"(c) The public safety officer may elect settlement of insurance under this subpart either in a lump sum or in thirty-six equal monthly installments. If no such election is made by such officer, the beneficiary or other person entitled to payment under this section may elect settlement either in a lump sum or in thirty-six equal monthly installments. If any such officer has elected settlement in a lump sum, the beneficiary or other person entitled to payment under this section may elect settlement in thirty-six equal monthly installments.

"BASIC TABLES OF PREMIUMS; READJUSTMENT OF RATES

"SEC. 510. (a) Each policy or policies purchased under this subpart shall include for the first policy year a schedule of basic premium rates by age which the Administration shall have determined on a basis consistent with the lowest schedule of basic premium rates generally charged for new group life insurance policies issued to large employers, taking into account expense and risk charges and other rates based on the special characteristics of the group. This schedule of basic premium rates by age shall be applied, except as otherwise provided in this section, to the distribution by age of the amount of group life insurance and group accidental death and dismemberment insurance under the policy at its date of issue to determine an average basic premium per $1,000 of insurance, taking into account all savings based on the size of the group established by this subpart. Each policy so purchased shall also include provisions whereby the basic rates of premium determined for the first policy year shall be continued for subsequent policy years, except that they may be readjusted for any subsequent year, based on the experience under the policy, such readjustment to be made by the insurance company issuing the policy on a basis determined by the Administration in advance of such year to be consistent with the general practice of life insurance companies under policies of group life insurance and group accidental death and dismemberment insurance issued to large employers.

"(b) Each policy so purchased shall include a provision that, in the event the Administration determines that ascertaining the actual age distribution of the amounts of group life insurance in force at the date of issue of the policy or at the end of the first or any subsequent year of insurance thereunder would not be possible except at a disproportionately high expense, the Administration may approve the determination of a tentative average group life premium, for the first of any subsequent policy year, in lieu of using the actual age distribution. Such tentative average premium rate may be increased by the Administration during any policy year upon a showing by the insurance company issuing the policy that the assumptions made in determining the tentative average premium rate for that policy year were incorrect.

"(c) Each policy so purchased shall contain a provision stipulating the maximum expense and risk charges for the first policy year, which charges shall have been determined by the Administration on a basis consistent with the general level of such charges made by life insurance companies under policies of group life insurance and group accidental death and dismemberment insurance issued to large employers, taking into consideration peculiar characteristics of the group. Such maximum charges shall be continued from year to year, except that the Administration may redetermine such maximum charges for any year either by agreement with the insurance company or companies issuing the policy or upon written notice given by the Administration to such companies at least one year in advance of the beginnnig of the year for which such redetermined maximum charges will be effective.

"(d) Each such policy shall provide for an accounting to the Administration not later than ninety days after the end of each policy year, which shall set forth, in a form approved by the Administration, (1) the amounts of premiums actually accrued under the policy from its date of issue to the end of such policy year, (2) the total of all mortality, dismemberment, and other claim charges incurred for that period, and (3) the amounts of the insurers' expense and risk charge for that period. Any excess of item (1) over the sum of items (2) and (3) shall be held by the insurance company issuing the policy as a special contingency reserve to be used by such insurance company for charges under such policy only, such reserve to bear interest at a rate to be determined in advance of each policy year by the insurance company issuing the policy, which rate shall be approved by the Administration as being consistent with the rates generally used by such company or companies for for similar funds held under other group life insurance policies. If and when the Administration determines that such special contingency reserve has attained an amount estimated by the Administration to make satisfactory provision for adverse fluctuations in future charges under the policy, any further excess shall be deposited to the credit of the revolving fund established under this subpart. If and when such policy is discontinued, and if, after all charges have been made, there is any positive balance remaining in such special contingency reserve, such balance shall be deposited to the credit of the revolving fund, subject to the right of the insurance company issuing the policy to make such deposit in equal monthly installments over a period of not more than two years.

"BENEFIT CERTIFICATES

"Sec. 511. The Administration shall arrange to have each public safety officer insured under a policy purchased under this subpart receive a certificate setting forth the benefits to which such officer is entitled thereunder, to whom such benefit shall be payable, to whom claims should be submitted, and summarizing the provisions of the policy principally affecting the officer. Such certificate shall be in lieu of the certificate which the insurance company would otherwise be required to issue.

"Subpart 2—Assistance to States and Localities for Public Safety Officers' Group Life Insurance Programs

"Sec. 512. (a) Any State or unit of general local government having an existing program of group life insurance for, or including as eligible, public safety officers during the first year after the effective date of this part, which desires to receive assistance under the provisions of this subpart shall—

"(1) inform the public safety officers of the benefits and allocation of premium costs under both the Federal program established by subpart 1 of this part and the existing State or unit of general local government program;

"(2) hold a referendum of the eligible public safety officers of the State or unit of general local government to determine whether such officers want to continue in the existing group life insurance program or apply for inclusion in the Federal program under the provisions of subpart 1 of this part; and

"(3) recognize the results of the referendum as finally binding on the State or unit of general local government for the purposes of this part.

"(b) Upon an affirmative vote of a majority of such officers to continue in such State or unit of general local government program, a State or unit of general local government may apply for assistance for such program of group life insurance and the Administration shall provide assistance in accordance with this subpart.

"(c) Assistance under this subpart shall not exceed one-third of the premiums attributable to the public safety officers enrolled in such State or unit of general local government program or such assistance as would be available to the public safety officers if they were enrolled under subpart 1 of this part, whichever is less, to the extent the amount of coverage under the State or unit of general local governmental program is comparable with the amount of coverage available under subpart 1 of this part.

"(d) Assistance under this subpart shall be used to reduce proportionately the contributions paid by the State or unit of general local government and by the appropriate public safety officers to the total premium under such program: *Provided, however*, That the State or unit of general local government and the insured public safety officers may by agreement change the contributions to premiums costs paid by each, but not so that such officers must pay a higher fraction of the total premium than before the granting of assistance.

"Subpart 3—General Provisions

"UTILIZATION OF OTHER AGENCIES

"Sec. 513. In administering the provisions of this part, the Administration is authorized to utilize the services and facilities of any agency of the Federal Government or a State or unit of general local government or a company from which insurance is purchased under this part, in accordance with appropriate agreements, and to pay for such services either in advance or by way of reimbursement, as may be agreed upon.

"ADVISORY COUNCIL ON PUBLIC SAFETY OFFICERS' GROUP LIFE INSURANCE

"Sec. 514. There is hereby created an Advisory Council on Public Safety Officers' Group Life Insurance consisting of the Attorney General as Chairman, the Secretary of the Treasury, the Secretary of Health, Education, and Welfare, and the Director of the Office of Management and Budget, each of whom shall serve without additional compensation. The Council shall meet not less than once a year, at the call of the Chairman, and shall review the administration of this part and advise the Administration on matters of policy relating to its activity thereunder. In addition, the Administration may solicit advice and recommendations from any State or unit of general local government participating in a public safety officers' group life insurance program under this part, from any insurance company underwriting programs under this part, and from public safety officers participating in group life insurance programs under this part.

"PREMIUM PAYMENTS ON BEHALF OF PUBLIC SAFETY OFFICERS

"Sec. 515. Nothing in this part shall be construed to preclude any State or unit of general local government from making contributions on behalf of public safety officers to the premiums required to be paid by them for any group life insurance program receiving assistance under this part.

"WAIVER OF SOVEREIGN IMMUNITY

"Sec. 516. The Administration may sue or be sued on any cause of action under this part.

"PUBLIC SAFETY OFFICERS' GROUP INSURANCE REVOLVING FUND

"Sec. 517. There is hereby created on the books of the Treasury of the United States a fund known as the Public Safety Officers' Group Life Insurance Revolving Fund which may be utilized only for the purposes of subpart 1 of this part."

Subpart 4—Miscellaneous

Sec. 103. Section 569 of the Omnibus Crime Control and Safe Streets Act of 1968, as amended and as redesignated by this Act, is amended by inserting "(a)" immediately after "569" and by adding at the end thereof the following new subsection:

"(b) There is authorized to be appropriated $20,000,000 for the fiscal year ending June 30, 1973, for the purposes of part G."

Sec. 104. Until specific appropriations are made to the Department of Justice or the Law Enforcement Assistance Administration for grants, activities or contracts shall, in the discretion of the Attorney General, be available for payments of obligations arising under this Act.

Sec. 105. If the provisions of any part of this Act are found invalid or any amendments made thereby or the application thereof to any person or circumstances be held invalid, the provisions of the other parts and their application to other persons or circumstances shall not be affected thereby.

Sec. 106. This Act shall become effective on date of enactment. Amend the title so as to read: "A bill to amend the Omnibus Crime Control and Safe Streets Act of 1968 to authorize group insurance programs for public safety officers and to assist State and local governments to provide such insurance."

Mr. McCLELLAN. Mr. President, will the Senator yield?

Mr. KENNEDY. I yield.

Mr. McCLELLAN. Is this amendment the same as the bill that the Senator has introduced?

Mr. KENNEDY. Yes.

Mr. President, the substance of this amendment is S. 33, which is an insurance mechanism to protect our policemen and firefighters as well as some correctional guards and court officers.

It is a matter with which the chairman of the Subcommittee on Criminal Laws and Procedures as well as the ranking minority member are completely familiar, because it was a separate title of a more comprehensive piece of legislation which was put together and considered in its entirety during the course of the hearings.

I should like to review, for the benefit of the Senate, where we are with regard to S. 33, which, as I have mentioned, in many ways complements S. 2087, which is the gratuity provision for public safety officers.

This concept was introduced in the 1967 study that was made of crime and disorder in this country. On the basis of what was said in that study, I introduced a measure incorporating this concept of insurance for police. It was passed by the Senate in 1970, but in the conference with the House of Representatives, they felt that it had not had full and adequate hearings in the House of Representatives, and therefore it was dropped.

Later, the administration introduced a somewhat different approach to the problems of dependents of policemen, and that was expanded to include firemen and other public safety officers. But it does not provide, for example, for firefighters or policemen who are involved in accidental death on duty or who suffer death or injury from any cause off duty. We know that public safety officers sometimes have a difficult time getting insurance benefits on regular terms because of the hazardous nature of their duties.

Therefore, this mesaure would provide some incentive to public safety officers by an insurance concept which is modeled after the Federal Employees' Group Life Insurance program as well as the servicemen's insurance program, both of which have been remarkably successful.

Some time ago, just before the recess, in an executive session of the Committee on the Judiciary, the complete measure that had been introduced was reduced title by title and voted on separately. This afternoon we are considering some titles of that provision, under the time limitation of 20 minutes on each amendment.

Because of other commitments, the Senator from Nebraska was unable to attend that meeting; but it was felt that, because of his views on this question, we ought to provide him sufficient time to be able to submit minority views on the insurance program. Those views will be submitted by the end of the week.

Therefore, I am in the position of wanting to follow the procedures of the Senate by making sure that when the report comes before the Senate, full opportunity will be given for minority views. I recognize that we may very well be precluded from acting on what I think is a very essential part of our responsibility to our policemen and firefighters, as included in S. 33, by delaying and not offering this as an amendment to the gratuity bill which is before the Senate this afternoon.

I have indicated to the leadership that if, perhaps, I had been somewhat more alert at the time this measure was being considered or the consent agreement was offered 2 weeks ago last Thursday, I would have thought that we ought to consider these measures together. We have waited until this time in the year for consideration of S. 2087, and certainly a few more days in order to do the complete job would not have seemed an unreasonable request by any Member of the Senate, particularly since these features are so complementary.

I understand that there is some question as to the germaneness of this provision, in that, even though it is closely related to the concept of assisting public safety officers, it could be viewed as are two different approaches toward the same end. But the gratuity and insurance bills have been joined in the victims of crime bill since December of last year. Both would amend the Omnibus Crime Control and Safe Streets Act of 1968. They are both amendments to those provisions. The insurance aspect contains a provision concerning overlap with the gratuities aspect so that any reasonable reading of the Senate rules on this, if we do have that issue raised, would certainly come down on the side of including this as a germane amendment.

But I have had a talk with the acting majority leader and I felt that if we were able to know that S. 33 will come to the floor by the early part of next week, and with his assurance that even with the busy schedule outlined here and the significant workload, he would be willing to schedule this program, then I would feel constrained not to press this amendment to a vote. But I would be interested both in the views of the Senator from Arkansas on the general understanding and in the views of the acting majority leader.

How much time do I have remaining, Mr. President?

The PRESIDING OFFICER (Mr. STAFFORD). Three minutes remain on this amendment.

Mr. KENNEDY. I would like to ask the Senator from Arkansas to speak on his time, if he would.

Mr. McCLELLAN. Mr. President, I yield myself 3 minutes.

The PRESIDING OFFICER. The Senator from Arkansas is recognized for 3 minutes.

Mr. McCLELLAN. Mr. President, I may say to the distinguished Senator from Massachusetts, as he knows, I support his bill—or the amendment as such—as a legislative proposition. As the Senator knows, the Subcommittee on Criminal Laws and Procedures of the Judiciary Committee reported an omnibus bill (S. 2994), title II of which contained the provisions of the Senator's amendment.

When the bill reached the full committee, the full committee, for some reason sufficient to it, separated the various titles of the bill and reported them out individually. I was not present at the meeting at the time this proposal was made and agreed to. I had favored bringing all of them out in the omnibus bill. However, that was not done.

A certain time was given, I believe, to the distinguished Senator from Nebraska in which to file dissenting views. He had opposed this provision even in the subcommittee, but he did agree to let it be reported so that the full committee might work its will. I say all of this as a preface to saying that I am glad that the Senator will withdraw his amendment. I am concerned that we might get into a hassle here, where neither side would have an opportunity to do justice to their points of view.

In view of the fact an arrangement has been made with the leadership to bring the Senator's bill up at an early date, I am pleased, indeed, that the Senator will withdraw his amendment.

Otherwise, I know that there would be a question, possibly, of germaneness, but I favor the Senator's bill, and if we get it up next week or in the next few days, it is my intention to support it, and I hope to see it enacted into law.

Mr. KENNEDY. I thank the Senator from Arkansas.

Now, Mr. President, I yield 2 minutes to the Senator from West Virginia.

The PRESIDING OFFICER. The Senator from West Virginia is recognized for 2 minutes.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished Senator from Massachusetts. The Senator has stated the situation precisely as he had previously discussed it with me.

I have cleared this matter with the majority leader who stated to me that it would be his intention and his hope to bring up S. 33 at an appropriate time after its appearance on the calendar. This will assure the Senator from Massachusetts of an opportunity to get action on his bill.

Of course, the majority leader cannot make this an ironclad assurance but, knowing him as I do, I think this is ample assurance for the Senator.

Mr. KENNEDY. Mr. President, on that basis, then, I will withdraw the amendment. I just remind the Senate that we have considered this matter on a previous occasion, and passed it this year by a virtually unanimous vote in the full Judiciary Committee. I believe it is essential in giving the necessary kinds of assurances to those who are our first line of defense in the communities, towns, and cities of this Nation, our policemen, firemen, and other public safety officers, to insure that when they are performing their responsibilities and protecting the public good, they will be assured of an insurance system to protect their families, their wives and children. This is a matter of great importance.

On the basis of what my colleague from West Virginia has said and the assurances that the majority leader has given to us, I withdraw my amendment.

The PRESIDING OFFICER (Mr. STAFFORD). The amendment of the Senator from Massachusetts is withdrawn.

Mr. TUNNEY. Mr. President, many of America's qualified young men are reluctant to choose a law enforcement career not because of the hazards of their job, but because of the lack of reasonable benefits for their survivors should they be killed in the line of duty. I am supporting S. 2087 because I believe that it will raise the morale of all law enforcement officers.

As much as I support the death gratuity to survivors and dependents, I think we need to realize that this legislation is only one way in which we are attacking the crime problem. We also must try to eliminate crime at its roots by attacking poverty, illiteracy, deprivation, and unemployment that nurture its growth. I do concede, however, that we must deal here and now with the current manifestations of criminal activity.

When our policemen are being attacked and killed by the lawbreaking element of our society, then I feel that we must directly deal with the problem. We need to insure that any man who enters the law enforcement profession will know that we, as a just and compassionate people, will care for his family in the event that something happens to him because of the hazards of his profession. I feel that the $50,000 death gratuity given to any officer who dies in the line of duty will provide a base for the survivor to pay back debts, handle funeral expenses, and look to the future which must be faced without their loved one.

The death gratuity, as has been pointed out, would provide a minimum Federal floor and would be in addition to any other State or local benefit. This would give each officer the confidence that his family would be well provided for in the event of his death.

Policemen have been special targets of violence in recent months and years. Since their primary mission is to enforce criminal laws, they are subject to vicious attacks in even the most routine day-to-day activity. The burdens of the police are staggering.

During the 10-year period 1962–71, 722 officers have been murdered. Contrasting this tragic loss with Great Britain's experience of 24 English police officers killed in the line of duty in the last 50 years brings into sharp focus the enormity of this growing American problem of assaults on police.

FBI figures indicate that the police patrol car officer is in the greatest danger of losing his life in the line of duty. Detectives and special assignment officers have the next highest incidence of deaths in the line of duty, while the foot patrol officers rank third. We also know that police officers are most likely to be killed while attempting to make an arrest or to transport prisoners.

I think that in addition to compensating policemen's families in the event of their murder, we must also overhaul our correctional system and modernize our courts. As I stated earlier, this bill we are voting on today is a constructive step in the right direction, but we cannot let our efforts in the fight against crime lag with the passage of one good bill. We must keep on until we have streamlined the criminal justice system to function in an efficient manner in this modern day and age.

Mr. MONDALE. Mr. President, I am delighted to speak in support of S. 2087, to provide benefits to survivors of public safety officers killed as a result of criminal action. I was pleased to be cosponsor of S. 2994, introduced by the distinguished Senator from Arkansas (Mr. MCCLELLAN), which included similar provisions.

It is most unfortunate that many State and local governments have no program of compensation for survivors of public safety officers killed in the line of duty. Last year, we were rudely made aware of this great inadequacy by a tragic series of police killings in New York City and Washington, D.C. A few weeks ago, a police officer was killed during a bank robbery in Roseville, Minn. Since a Federal crime was involved, his survivors are entitled to benefits. It is vital that we extend the scope of this Federal program to deaths from criminal action, even where Federal laws are not involved.

I am very pleased that S. 2087 has been broadened to cover other public safety officers, such as firefighters and correctional officers, in addition to policemen. It is also important that part-time and volunteer officers be covered, as the bill would do. A great deal of our public safety protection, especially in fire safety, is provided by volunteer personnel. We should extend them and their survivors the same protection afforded to full-time and paid officials.

Last November I introduced S. 2817, the Compensation to Victims of Crime Act. It included provisions for death benefits for public safety officers. I am pleased to join in supporting action now on legislation along these lines. I hope that we will soon be able to take up the legislation to compensate all innocent victims of violent crime, as proposed in S. 2817 and S. 2994.

Mr. GRIFFIN. Mr. President, the Public Safety Officers' Benefit Act of 1972, which is before us today, would provide a $50,000 death benefit to the family of a policeman or fireman killed in the line of duty. Obviously, there really is no way to compensate the widow and children for such a tragic loss, but it seems to me that society has an obligation to provide at least a measure of financial security in such a situation.

Mr. President, for some time I have been an advocate of legislation that would recognize our debt and appreciation to the policemen, firemen, and prison guards who daily assume extraordinary risks in order to protect the rest of us. I testified before the Subcommittee on Criminal Laws and Procedures of the Senate Judiciary Committee in support of similar legislation. I have stated that:

> These brave men are on the front lines of public safety and protection. It is of the utmost importance that they know the nation stands behind them, appreciates their great efforts, and is concerned with their safety and well-being.

In recent years, civil disorders, riots, and prison rebellions have taken a devastating toll. No group has assumed greater burdens than those men and women who have the responsibility for maintaining order.

Two firemen died in the Detroit riots, one in Watts, another in Newark. During the period from 1967 to 1969, more than 600 firefighters were injured in civil disorders.

Eleven of those held hostage in Attica were killed.

In 1970 alone, more than 100 policemen died as a result of violent criminal activity. Since 1961, 633 police officers have given their lives in the line of duty.

Benefits under this legislation would be available to families of public safety officers killed in the line of duty since January 1, 1967. It is, in my opinion, most appropriate for us to recognize the tremendous sacrifice these men have made and the risks that their colleagues continue to assume daily on our behalf.

Mr. President, I urge the Senate to pass this significant legislation.

Mr. ROTH. Mr. President, in early January of 1972 two fine policemen were gunned down by a criminal in my home State of Delaware. The apparent gunman had been paroled in 1970 declaring:

> When I get out I'm going to get me a pig.

The two young officers met their death responding to a motel holdup. Ronald Leslie Carey died immediately leaving his wife and three children suddenly alone in this world. His partner, David C. Yarrington died in a nearby hospital a short time later and he too left a wife and small baby. The person who committed the murder did not know who his victims would be, he just shot to kill two policemen. Still another Delaware policeman, Trooper William C. Keller, died in a traffic accident in 1971 while on duty.

As statistics, officers Carey and Yarrington who held great promise in the law enforcement profession are two of the 61 policemen who have been killed in the line of duty this year. As human beings, officers Carey and Yarrington demonstrated their ultimate concern for the public when they were struck down as symbols of an orderly society.

Can we, as Americans, tolerate a situation where the young families of these men are left behind to struggle on their own? I believe that it demonstrates the good that is within each American that concern has been shown through the establishment of private groups who come to the aid of police families whose lives have been shattered by such a loss. Also a great number of bills have been introduced in this Congress accepting the financial responsibility and moral obligation to the family of a man who has made this society a better, safer one in which to live.

As we consider S. 2087, the public safety officers death gratuity bill, we must realize it is only just and humane that we should give the public safety officer the security of knowing that his loved ones will be taken care of in their hour of need. By providing a $50,000 death gratuity for those men killed in the line of duty, we will not relieve the horrible suffering and mental anguish that only those who face the death of a family member can know, but we will ease the financial burden on the families of the men we have depended upon to protect us. S. 2087 is retroactive to January 1, 1967, which would allow the families of the three Delaware State troopers to receive this compensation.

The physical risks involved in serving as a policeman today are great. It is a fact that police officers throughout the country are facing a rising tide of violence. This alarming trend can only be reversed by professional police officers who are assured that they and their families will be compensated in a manner commensurate with the risks inherent in law enforcement. During the 10-year period, 1962–71, 722 officers have been murdered. In 1971, alone, a record total of 126 law enforcement officers were killed by felonious criminal action.

A second factor necessitating the enactment of this legislation concerns the wide variance from State to State in survivor benefits. Compensation differs in each State and has as many variations as there are individual agencies and statutory provisions. Benefits under these provisions range from $200 to $400 per month for the surviving widow and dependent children. Death benefits for fatalities suffered in the line of duty often provide only a percentage of the officer's salary. Considering that the salary for first year officers range from $4,575 to $11,112, that does not give a surviving family much to live on. In Delaware, the widows of Carey and Yarrington were eligible to receive 80 percent of the officers pay at the time of his death since there were children involved, but this would be provided only for 400 weeks, or until the children reach 18. The maximum payment the two families can expect per week under Delaware law, is $49.

I believe that $50,000 is the minimum that each officer's family should receive. This will assure them the capital for a basic income which when coupled with benefits from the State or locality, will provide at least a subsistence income.

From the testimony which was delivered during the victims of crime hearings last fall and early this year, we know that most of the officers who have been killed are normally in debt and, due to their job, had difficulty getting insurance. Accidental death coverage for a policeman is two times more costly than that for the normal citizen; waiver of premiums is one time more costly and, on their salary, policemen simply cannot afford to buy heavy insurance coverage.

In addition, we learned that the average police officer has a small bank account, and that in most cases, the widow has not had enough money to pay funeral expenses.

I would like to see the day when the children of Officers Carey, Yarrington, and Keller and others like them might have a better feeling for the profession that their fathers chose, and that perhaps someday might even choose this profession for themselves as well. What we are doing here today is providing security for all those policemen who do face the constant risk of death, assuring them that their families will be protected from financial calamity. In doing so, I think that we will strengthen the desire of those qualified citizens who might consider entering the field of law enforcement. This gratuity is small recompense for the heartbreak of losing a loved spouse or parent and the family breadwinner.

Police officers have demonstrated time and again the sacrifices they are prepared to make for the safety of the public. You cannot blame these same officers for being concerned about the welfare and well-being of their families, wives and children if they should be killed in the line of duty.

The facts have never been more obvious, the crisis never so conspicuous, and the need never so manifest.

PUBLIC SAFETY OFFICERS BENEFITS ACT OF 1972

Mr. ROBERT C. BYRD. Mr. President, I wish to add my strong support for S. 2087, the Public Safety Officers Benefits Act of 1972, and to urge its passage by the Senate.

This legislation is designed to meet a deserving, and presently unfilled, need to benefit law enforcement officers and their dependents, in cases where the officer is dismembered or killed in the line of duty as the result of a crime. The vast majority of our law enforcement officers do not earn large salaries, and it usually takes all of their resources to support themselves and their families. Moreover, a law enforcement officer, because of his hazardous occupation, has great difficulty in getting any insurance coverage. When he is able to get insurance, the premiums for accidental death coverage are two to three times the normal rate. Therefore, we usually find that most of these officers do not have insurance coverage, simply because they cannot afford it.

The benefits contained in this bill will not be duplicative of those provided by other governmental agencies. We cannot rely upon the States and municipalities to provide this coverage because, as of October 1970, there were 18 States which provided no assistance whatsoever to the immediate survivors of law enforcement officers. There are also many small towns and municipalities throughout the country which do not provide any benefits of this type, or which only provide minimal compensation payments.

This bill will provide a gratuity of $50,000 to the dependents of public safety officers killed in the line of duty as a result of a crime. It will also provide for a gratuity in the case of dismemberment under the same circumstances, at a level of $25,000 for single dismemberment and $50,000 for multiple dismemberment. To qualify for these payments, the officer must have been acting in the line of duty, and the death or dismemberment must have been suffered as a result of a criminal act or an apparent criminal act.

There is a great need to provide a guaranteed minimum payment that will assure substantial benefits to the families of all law enforcement officers. I believe S. 2087 will provide this guarantee and will in turn improve the quality of law enforcement by lifting the morale of those who enforce the law.

Mr. PEARSON. Mr. President, I support S. 2087, a bill to provide death and dismemberment payments for public safety officers or their dependents.

I am particularly pleased to support the bill, as it is similar to legislation which I introduced earlier this year. The bill before us today provides that the United States shall make a payment to any Federal, State, or local public safety officer who has been killed or has suffered dismemberment in the line of duty and the proximate cause of the tragedy was a criminal act or an apparent criminal act. The benefits payable are $50,000 in case of death or multiple dismemberment and $25,000 in case of single dismemberment. As I had hoped, these benefits would be paid not only to law enforcement officers and firemen, but to correctional and court officers as well whose activities are potentially dangerous.

Mr. President, with increasing frequency we are told of public safety officers who have met death or tragic injury while serving our people. During the past 10 years, deaths among public safety officers have increased. The number of law enforcement officers killed has risen dramatically and tragically from 28 in 1960 to 100 in 1970. In the case of firemen, only 58 lost their lives in 1966, but 1970 witnessed 115 fatalities among these brave individuals. Correctional officers also are not immune from these death figures, for in the past 2 years, 18 have been killed.

Government can provide improved training, equipment, and facilities for their public safety officers, but these are of little solace or use to the officer and his dependents once he is killed or permanently injured. Something more must be done for the unsung heroes of our Nation who daily risk their lives, so our citizens may live secure in body and mind.

In addition, present death and disability payments for public safety officers are woefully inadequate. Many States make no provision for such payments and some provide only limited payments. Besides giving financial security on a nationwide scale to those persons already in the public safety profession, this bill may aid in the recruitment and retention of more qualified and dedicated personnel. This is especially important in rural areas where local governments are often not able to offer the benefits to their safety officers which can be found in more populous localities.

One of the marks of a great society is found in the way it cares for those who protect it. As legislators we have the responsibility, indeed the moral obligation, to provide these dedicated people not only with modern training and equipment, but with modern benefits as well. I therefore urge Senators to meet their obligation and join in the support of the bill.

Mr. McCLELLAN. Mr. President, if no other Senator wishes to speak at this time, I ask for a third reading.

The PRESIDING OFFICER. The question on agreeing to the committee amendment in the nature of a substitute.

The committee amendment in the nature of a substitute was agreed to.

Mr. HRUSKA. Mr. President, I yield back the remainder of my time on the bill.

Mr. McCLELLAN. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

OUTRAGE AT MUNICH OLYMPIC GAMES

Mr. ALLOTT. Mr. President, We can only express outrage and horror that the 1972 Olympic games in Munich have been tragically used by terrorists for their own political ends. As usual the victims of these terrorists are innocent people performing their nonpolitical duty for their country.

The game of the terrorists is always the same: extortion. Civilized people cannot pay their price. Just yesterday Transportation Secretary Volpe called on all nations to band together to prevent hijackings by refusing to harbor hijackers by granting political asylum. That principle should be extended to all acts of terrorism. If the terrorists know they cannot escape justice, they may well think twice about their actions.

One of the unfortunate residual effects which this incident may have could be a dampening of the enthusiasm for the winter Olympics in Colorado in 1976. Having just spent a week traveling through various parts of Colorado, at the very time when the Munich games were being beamed to Coloradans on their television sets, I found renewed enthusiasm for the Olympics and excited anticipation on the part of many that Colorado could enjoy the same kind of spectacular event 4 years hence. It would indeed be a shame if the terrible killings of today would color the Olympic picture unfavorably in the minds of United States and Colorado citizens. I believe the issue should be decided on its merits out in Colorado this November, but the Munich tragedy today does not help those who would make an objective case in favor of the Olympics.

But once again let me state the main point: We call on all civilized nations, nations who are members of the United Nations, not to grant political asylum to criminals and terrorists so that these shameful acts can be stopped.

CIVIL REMEDIES FOR VICTIMS OF RACKETEERING ACTIVITY AND THEFT ACT OF 1972

The PRESIDING OFFICER. Under the previous order the Senate will now proceed to the consideration of S. 16, which the clerk will report.

The assistant legislative clerk read as follows:

Calendar No. 999 (S. 16) to amend title IX of the Organized Crime Control Act of 1970 to provide civil remedies to victims of activities prohibited by said title, and for other purposes.

The Senate proceeded to the consideration of the bill (S. 16) which had been reported from the Committee on the Judiciary with an amendment to strike out all after the enacting clause and insert:

That this Act may be cited as "Civil Remedies for Victims of Racketeering Activity and Theft Act of 1972."

SEC. 101. It is the purpose of this Act to promote the general welfare by strengthening the civil remedies available to the victim of racketeering activity and theft.

RACKETEER CIVIL REMEDIES

SEC. 102. (a) Section 1964 of title 18 of the United States Code is amended by—

(1) inserting in subsection (a) ", without regard to the amount in controversy," immediately after "jurisdiction".

(2) inserting in subsection (b) "subsection (a) of" after "under" each time it appears;

(3) striking the word "action" in subsection (b) and inserting in lieu thereof "proceedings"; and

(4) striking subsections (c) and (d) of such section and inserting in lieu thereof the following:

"(c) Any person may institute proceedings under subsection (a) of this section. In any proceeding brought by any person under subsection (a) of this section, relief shall be granted in conformity with the principles which govern the granting of injunctive relief from threatened loss or damage in other cases. Upon the execution of proper bond against damages for an injunction improvidently granted and showing of immediate danger of irreparable loss or damage, a temporary restraining order and a preliminary injunction may be issued in any action before a final determination thereof upon its merits.

"(d) Whenever the United States is injured in its business or property by reason of any violation of section 1962 of this chapter, the Attorney General may bring a civil action in a district court of the United States, without regard to the amount in controversy, and shall recover the actual damages sustained by it, and the cost of the action.

"(e) Any person who is injured in his business or property by reason of any violation of section 1962 of this chapter may bring a civil action in a district court of the United States, without regard to the amount in controversy, and shall recover threefold the actual damages sustained by him, and the cost of the action, including a reasonable attorney's fee.

"(f) The United States may upon timely application intervene in any civil action or proceeding brought under this chapter, if the Attorney General certifies that in his opinion the case is of general public importance. In such action or proceeding, the United States shall be entitled to the same relief as if it had instituted the action or proceeding.

"(g) A final judgment or decree rendered in favor of the United States in any criminal or civil action or proceeding under this chapter shall estop the defendant in any subsequent civil proceeding as to all matters respecting which said judgment or decree would be an estoppel as between the parties thereto.

"(h) Except as hereinafter provided, any civil action under this section shall be barred unless it is commenced within five years after the cause of action accrued. Whenever any civil or criminal action or proceeding, other than an action under subsection (d) of this section, is brought or intervened in by the United States to prevent, restrain, or punish any violation of section 1962 of this chapter the running of the period of limitations prescribed by this subsection with respect to any cause of action arising under subsections (c) and (e) of this section, which is based in whole or in part on any matter complained of in such action or proceeding by the United States, shall be suspended during the pendency of such action or proceeding by the United States and for two years thereafter.".

(b) Section 1965 of title 18 of the United States Code is amended by—

(1) striking out in subsection (d) "action under section 1964 of" and inserting in lieu thereof "civil action or proceeding under";

(2) striking out in subsection (c) "instituted by the United States"; and

(3) inserting in subsection (d) "civil or criminal" immediately before "action".

(c) Section 1966 of title 18 of the United States Code is amended by striking "any civil action instituted under this chapter by the United States" in the first sentence and inserting in lieu thereof "any civil action or proceeding under this chapter in which the United States is a party."

(d) Section 1967 of title 18 of the United States Code is amended by striking "instituted by the United States", and inserting in lieu thereof "or proceeding".

(e) Section 1968 of title 18 of the United States Code is amended by—

(1) striking out "prior to the institution of a civil or criminal proceeding" in the first sentence of subsection (a) and inserting in lieu thereof "before he institutes or intervenes in civil or criminal action or proceeding";

(2) striking out "case" the first time it appears and inserting in lieu thereof "civil or criminal action" in paragraph (4) of subsection (f) and striking out "case" each time it appears thereafter and inserting in lieu thereof "action";

(3) striking out "case" each time it appears in paragraph (5) of subsection (f) and inserting in lieu thereof "action"; and

(4) striking out "case" and inserting in lieu thereof "action" in paragraph (6) of subsection (f).

THEFT CIVIL REMEDIES

SEC. 103. (a) Section 659 of title 18 of the United States is amended to read as follows:

"§ 659. Interstate or foreign shipments by carrier; State prosecutions; civil remedies for victims of theft

"(a) It shall be unlawful for any person to embezzle, steal, or unlawfully take, carry away, or conceal, or by fraud or deception obtain, with intent to convert to his own use, any money, baggage, goods, chattels, or other property which is moving as, or which is a part of, or which constitute an interstate or foreign shipment from any pipeline system, railroad car, wagon, motortruck, or other vehicle, or from any tank or storage facility, station, station house, platform, or depot, or from any steamboat, vessel, or wharf, or from any aircraft, air terminal, airport, aircraft terminal, or air navigation facility, or to buy, receive, or have in his possession any such money, baggage, goods, chattels, or other property, knowing, or having reason to know, that it has been embezzled, stolen, or otherwise unlawfully taken, carried away, concealed, or obtained.

"(b) It shall be unlawful for any person to embezzle, steal, or unlawfully take, carry away, or conceal, or by fraud or deception obtain, with intent to convert to his own use, any money, baggage, goods, chattels, or other property, which shall have come into the possession of any common carrier for transportation in interstate or foreign commerce, or to break into, embezzle, steal, unlawfully take, carry away, or conceal, or by fraud or deception obtain, with intent to convert to his own use, any of the contents of such baggage, goods, chattels, or other property, or to buy, receive, or have in his possession any such money, baggage, goods, chattels, or other property, knowing or having reason to know that it has been embezzled or stolen or otherwise unlawfully taken, carried away, concealed, or obtained.

"(c) It shall be unlawful for any person to embezzle, steal, or unlawfully take, carry away, conceal, or by fraud or deception obtain, with intent to convert to his own use, any money, baggage, goods, chattels, or other porperty from any railroad car, bus, vehicle, steamboat, vessel, or aircraft operated by any common carrier moving in interstate or foreign commerce, or from any passenger thereon, or to buy, receive, or have in his possession any such money, baggage, goods, chattels, or other property, knowing or having reason to know that it has been embezzled, stolen, or otherwise unlawfully taken, carried away, concealed, or obtained.

"(d) Whoever violates any provision of subsection (a), (b), or (c) of this section shall in each case be fined not more than $5,000 or imprisoned not more than ten years, or both; but if the amount or value of such money, baggage, goods, chattels, or other property does not exceed $100, he shall be fined not more than $1,000 or imprisoned not more than one year, or both.

"(e) The district courts of the United States shall have jurisdiction, without regard to the amount in controversy, to prevent and restrain violations of this section by issuing appropriate orders, including, but not limited to: ordering any person to divest himself of any interest, direct or indirect, in any enterprise; imposing reasonable restrictions on the future activities or investments of any person, including, but not limited to, prohibiting any person from engaging in the same type of endeavor as the enterprise engaged in, the activities of which affect interstate or foreign commerce; or ordering dissolution or reorganization of any enterprise, making due provision for the rights of innocent persons.

"(f) The Attorney General may institute proceedings under subsection (e) of this section. In any proceedings brought by the United States under subsection (e) of this section, the court shall proceed as soon as practicable to the hearing and determination thereof. Pending final determination thereof, the court may at any time enter such restraining orders or prohibitions, or take such other actions as it shall deem proper.

"(g) Any person may institute proceedings under subsection (e) of this section. In any proceeding brought by any person under subsection (e) of this section, relief shall be granted in conformity with the principles which govern the granting of injunctive relief from threatened loss or damage in other cases. Upon the execution of proper bond against damages for an injunction improvidently granted and a showing of immediate danger of irreparable loss or damage, a temporary restraining order and preliminary injunction may be issued in any action before a final determination thereof upon its merits.

"(h) Whenever the United States is injured in its business or property by reason of any violation of this section, the Attorney General may bring a civil action in a district court of the United States, without regard to the amount in controversy, and shall recover the actual damages sustained by the United States, and the cost of action.

"(i) Any person who is injured in his business or property by reason of any violation of this section may bring a civil action in a district court of the United States, without regard to the amount in controversy, and shall recover threefold the actual damages sustained by him, and the cost of the action, including a reasonable attorney's fee.

"(j) Any civil action or proceeding under this section against any person may be instituted in the district court of the United States for any district in which such person resides, is found, has an agent, or transacts his affairs.

"(k) In any civil action or proceeding under this section in any district court of the United States in which it is shown that the ends of justice require that any other party residing in any other district be brought before the court, the court may cause such party to be summoned, and process for that purpose may be served in any judicial district of the United States by the marshal thereof.

"(l) In any civil or criminal action or proceeding under this section in the district court of the United States for any judicial district, subpenas issued by such court to compel the attendance of witnesses may be served in any other judicial district, except that in any civil action or proceeding no such subpena shall be issued for service upon any individual who resides in another district at a place more than one hundred miles from the place at which such court is held without approval given by a judge of such court upon a showing of good cause.

"(m) All other process in any civil or criminal action or proceeding under this section may be served on any person in any judicial district in which such person resides, is found, has an agent, or transacts his affairs.

"(n) The United States may, upon timely application, intervene in any civil action or proceeding brought under this section if the Attorney General certifies that in his opinion the case is of general public importance. In such action or proceeding, the United States shall be entitled to the same relief as if he had instituted the action or proceeding.

"(o) A final judgment or decree rendered in favor of the United States in any criminal action or proceeding under this section shall estop the defendant in any subsequent civil proceeding as to all matters respecting which said judgment or decree would be an estoppel as between the parties thereto.

"(p) Except as hereinafter provided, any civil action or proceeding under this section shall be barred unless it is commenced within five years after the cause of action accrued. Whenever any civil or criminal action or proceeding, other than an action under subsection (h) of this section, is brought or intervened in by the United States to prevent, restrain, or punish any violation of this section, the running of the period of limitations prescribed by this subsection with respect to any cause of action arising under subsection (g) or (i) of this section, which is based in whole or in part on any matter complained of in such action or proceeding by the United States, shall be suspended during the pendency of such action or proceeding by the United States and for two years thereafter.

"(q) A violation of this section shall be deemed to have been committed not only in the district where the violation first occurred, but also in any district in which the defendant may have taken or been in possession of the said money, baggage, goods, chattels, or other property.

"(r) The carrying or transporting of any such money, baggage, goods, chattels, or other property in interstate or foreign commerce, knowing, or having reason to know, it had been embezzled, stolen, or otherwise unlawfully taken, carried away, concealed, or obtained, shall constitute a separate violation and subject the violator to criminal penalties and a civil cause of action under this section and the violation shall be deemed to have been committed in any district into which such money, baggage, goods, chattels, or other property, shall have been removed or into which it shall have been brought by such violator.

"(s) To establish the interstate or foreign commerce character of any shipment in any criminal or civil action or proceeding under this section the waybill or other shipping document of such shipment shall be prima facie evidence of the place from which and to which such shipment was made. The removal of property from a pipeline system which extends interstate shall be prima facie evidence of the interstate character of the shipment of the property. Proof that a person was found in unexplained possession of any money, baggage, goods, chattels, or other property, recently embezzled, stolen, or otherwise unlawfully taken, carried away, concealed, or obtained by fraud or deception in violation of this section, shall be prima facie evidence that such person knew that such property was, or that such person had, embezzled, stolen, or otherwise unlawfully taken, carried away, concealed, or obtained by fraud or deception such money, baggage, goods, chattels, or other property in violation of this section. Proof that a person bought or received for a consideration substantially below its fair market value money, baggage, goods, chattels, or other property embezzled, stolen, or otherwise unlawfully taken, carried away, concealed, or obtained by fraud or deception in violation of this section shall be prima facie evidence that such person knew that such property was embezzled, stolen, or otherwise unlawfully taken, carried away concealed, or obtained by fraud or deception in violation of this section.

"(t) A judgment of conviction or acquittal on the merits under the laws of any State shall be a bar to any criminal prosecution under this section for the same act or acts. Nothing contained in this section shall be construed as indicating an intent on the part of Congress to occupy the field in which provisions of this section operate to the exclusion of State laws on the same subject matter, nor shall any provision of this section be construed as invalidating any provision of State law unless such provision is inconsistent with any of the purposes of this section or any provision thereof."

(b) The analysis at the beginning of chapter 31 of title 18 of the United States Code, for section 659, is amended to read:

"659. Interstate or foreign shipment by carrier; State prosecutions; civil remedies for victims of theft.".

SEVERABILITY

Sec. 104. If the provisions of any part of this Act are found invalid or any amendments made thereby or the application thereof to any person or circumstances be held invalid, the provisions of the other parts and their application to other persons or circumstances shall not be affected thereby.

EFFECTIVE DATE

Sec. 105. This Act shall become effective upon the date of enactment.

Mr. McCLELLAN. Mr. President, this bill was originally introduced by Senator HRUSKA and myself on January 25, 1971. It was favorably reported by the Committee on the Judiciary on August 16, 1972.

As reported, it includes the provisions of two proposals by the Senator from Nevada (Mr. BIBLE), one introduced as S. 2426 and the other as amendment No. 994 to S. 2994. It also reflects the provisions of titles IV of S. 2994 and S. 2995, which are omnibus victims of crime bills. In those forms, the bill was cosponsored by 45 of my colleagues: Senators BAKER, BAYH, BEALL, BENNETT, BIBLE, BOGGS, BURDICK, CANNON, CASE, COOK, CRANSTON,

Eastland, Fannin, Gravel, Griffin, Gurney, Hansen, Hart, Harris, Hollings, Hruska, Hughes, Humphrey, Kennedy, Mansfield, Mathias, Metcalf, Miller, Mondale, Moss, Muskie, Nelson, Pell, Percy, Randolph, Ribicoff, Roth, Schweiker, Scott, Stafford, Stevens, Stevenson, Thurmond, Williams, and Young.

Mr. President, on October 15, 1970, the President signed into law S. 30, the Organized Crime Control Act of 1970—Public Law 91-452. Then Attorney General, John N. Mitchell, termed this act "one of the most imaginative and comprehensive proposals to combat organized crime ever introduced in the Congress." Title IX of the 1970 act adapted certain of the time-tested remedies of antitrust law to the typical techniques employed by racketeers to invade legitimate businesses.

As S. 30 passed the Senate, title IX was fashioned as a tool to be employed by the Government against racketeers. Detailed consideration was not then given to carrying the antitrust parallel out by according the private victims of racketeering activity similar civil antitrust-type remedies.

During the processing of S. 30 in the House of Representatives, however, an amendment was added, at the suggestion of Edward L. Wright of Little Rock, Ark., then president of the American Bar Association, authorizing private treble damage suits and the recovery of attorney fees.

S. 16 would round out the implementation of Mr. Wright's idea. In addition to authorizing recovery of treble damages and attorney fees in a private civil action, it would permit the United States itself to sue for actual damages, when it is injured in its business activity, and to intervene in private suits under the act of general public importance.

S. 16 also authorizes private injunctive relief from racketeering activity, regulates the application of the doctrine of estoppel between criminal and civil proceedings, provides for a statute of limitations for civil actions and its appropriate suspension during pendency of criminal actions, and makes applicable to suits under the amended act nationwide venue and service of process provisions.

During the subcommittee's hearings, the American Bar Association voiced its support for this bill, noting that—

> The adoption of as many of the procedures currently utilized in the anti-trust field as possible might be a profitable course of action in any attempt to restrict the entry of organized crime into legitimate business.

At the suggestion of the Senator from Nevada (Mr. Bible), the bill has also been broadened to strike at the massive and costly problem of cargo theft, attacking the middle man of crime by enabling persons in legal possession of goods to sue for treble damages persons responsible for stealing, buying, or reselling goods moving in interstate commerce.

This aspect of S. 16 has received the endorsement of the following organizations: American Institute of Marine Underwriters; American Trucking Associations, Inc.; Association of American Railroads; and Transportation Cargo Security Council.

And I am pleased to note the administration's support of this bill.

All of us are aware of the depth and breadth of the activities of organized crime, and we know of the diversity of its activities. Organized crime strikes at the very heart of the economy of this country. We ought not to deny to the Government or to the victim any legitimate means of halting such activity.

Cargo has become a favorite and lucrative target for organized crime—direct costs of cargo losses are estimated at $1½ billion a year.

So this provision will both aid the victim of organized crime and reduce the profitability of cargo theft, hopefully aiding the average consumer.

Mr. President, I urge the enactment of this bill.

Mr. HRUSKA. Mr. President, I yield myself 5 minutes.

The PRESIDING OFFICER. The Senator from Nebraska is recognized for 5 minutes.

Mr. HRUSKA. Mr. President, S. 16 as reported by the Judiciary Committee is a well-conceived and very useful proposal in the field of criminal justice and it is my hope that the Senate will approve it today.

This bill, the Civil Remedies for Victims of Racketeering Activity and Theft Act of 1972, is basically an amalgam of two proposals: The original S. 16 introduced by Senator McClellan and this Senator in 1971 to provide strengthened civil remedies to victims of activities prohibited by title IX of the Organized Crime Control Act of 1970; and S. 2426, Senator Bible's bill to provide a civil action for damages to victims of crimes involving property in interstate or foreign commerce.

The marriage of these two bills is a good one which adds additional weapons to the arsenal of weapons available to combat crime in this country.

Title IX of the 1970 act adapted certain antitrust law remedies to the typical techniques employed by racketeers to invade legitimate business enterprises. S. 16 would extend this principle by providing the individual citizens who are the victims of racketeering activities with antitrust remedies similar to those granted to the Government by the 1970 act. Under this proposal, private civil suits can be a valuable adjunct to governmental actions aimed at organized crime.

Section 102 of the bill would:

Permit the United States itself to sue for actual damages when it is injured in its business or property by reason of a violation of section 1962;

Permit the United States to intervene in private suits of general public importance;

Authorize private injunctive relief from racketeering activity; and

Refine and make applicable parallel language in antitrust provisions relating to the doctrine of estoppel between criminal and civil proceedings, statute of limitations, and nationwide venue and process serving.

The administration supports this portion of S. 16. In testimony before the Criminal Laws Subcommittee, Richard Velde, the Associate Administrator of the Law Enforcement Assistance Administration, said:

> The Department of Justice favors enactment of S. 16. We believe that the extension of civil remedies, as contemplated by this bill, would provide additional valuable tools with which to combat organized crime. Our experience has shown that a two-pronged civil and criminal approach has proved successful in the antitrust area. Organized crime has continued to burden society because, over the years, it has been immensely profitable, and criminal sanctions by themselves do not necessarily reduce the riches. Any legal machinery therefore which would have the effect of rendering organized criminal activity less profitable would take us one notch closer to eliminating the problem. The Department believes that S. 16 would strengthen the existing civil remedies provided by Title IX and accordingly favors enactment.

Section 103 of the bill utilizes time-tested antitrust remedies to provide private persons with a means to recover damages sustained through the embezzlement or theft of cargo in interstate or foreign commerce. This bill would authorize injunctive relief and civil actions to recover threefold actual damages plus costs to those persons who are the victims of this type of illegal activity. Additional authority would be granted to the Attorney General to bring civil suits based on injury to the business or property of the United States and to intervene in other actions brought pursuant to section 659, title 18, United States Code.

With regard to this provision of S. 16, Mr. Velde, speaking for the administration, said:

> S. 2426 [now section 103 of S. 16] would also provide civil relief, in this case to any person who has been injured in his business or property because of a violation of section 659 of Title 18 of the United States Code. That section basically proscribes the embezzlement, theft, concealment, or unlawful receipt or purchase of any money, goods, chattels or baggage which are moving as an interstate shipment of freight or express. The principal target of the section is cargo theft.
>
> The bill would permit any injured party to sue in the appropriate district court for treble damages. The purpose of the bill, clearly, is to help prevent cargo theft by reducing the profitability. Today, cargo thefts result in an added cost to consumers of approximately $1.5 billion annually. Here again, criminal penalties do not always affect the profit of these activities, and the aggrieved party is often no better off after a criminal conviction.
>
> The Department is in favor of enactment of S. 2426 [now section 103 of S. 16]. We believe that the availability of a civil remedy could have a dual effect. First, an injured party would be able to more than recoup his actual loss through a treble damage action. Second, the mere fact that such a civil action is possible could act as a strong deterrent against the fencing and purchase of the stolen property and thereby reduce the profitability of cargo theft, with the ultimate benefit being passed on to the American consumer.

Mr. President, I join with the Senator from Arkansas (Mr. McClellan) in urging my colleagues to vote favorably on the measure with the hope that it will soon ripen into a form that is signable into law by the President of the United States.

I reserve the remainder of my time.

Mr. COOPER. Mr. President, will the Senator yield for questions?

Mr. HRUSKA. I yield 3 minutes to the Senator from Kentucky.

Mr. COOPER. Mr. President, I do not know of any opposition to the bill and I consider the explanations given by the Senator from Nebraska and the Senator from Arkansas very good, indeed.

Is it not correct that the acts defined in the bill are already crimes?

Mr. HRUSKA. They are, indeed, under the Organized Crime Control Act of 1970 and 18 U.S.C. 659.

Mr. COOPER. Is it correct that a change we made in the bill is to provide jurisdiction shall lie not only in the district where the act occurs, but also in any other district where the defendant might be found or where the property might be found?

Mr. HRUSKA. That is correct, in part. There is a provision for nationwide venue.

Mr. COOPER. Is it not correct that under law the victim can now bring an action for damages?

Mr. HRUSKA. Yes.

Mr. COOPER. What distinction does this bill provide? Does it provide for triple damages?

Mr. HRUSKA. There would be triple damages, plus cost and attorney's fees which is the equivalent remedy available under the law in antitrust cases.

Mr. COOPER. Among other provisions of the bill, is it correct to say that perhaps the most far reaching, and it could be the most effective, is that it would provide to the Attorney General the right to take action under subsection (e) on page 11, that is, to enable the Attorney General to go into the district courts and secure orders which are now appropriate in antitrust actions. Is that the basis for this section?

Mr. HRUSKA. Yes.

Mr. McCLELLAN. I think there is something else that should be observed here. It also enables the citizens to bring his action in Federal court, whereas heretofore he might have had to sue in the State court. This would enable the suit to be brought in Federal court, and it would carry with it all the superior resources of Federal process.

Mr. COOPER. I am not against the legislation. I think it has great merit. But is the purpose of subsection (e) to authorize the Attorney General to proceed against an individual or individuals who conducted unlawful activities? Will it be possible to secure orders to require the divestiture of property in connection with, for instance, unions, banks, hotels, or any other enterprise?

Mr. HRUSKA. It would indeed, have a wide scope.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. HRUSKA. I yield 2 additional minutes.

Mr. COOPER. This is important because it is a remedy I did not know now existed. On page 11, line 14, subsection (e) it is stated:

> (e) The district courts of the United States shall have jurisdiction, without regard to the amount in controversy, to prevent and restrain violations of this section by issuing appropriate orders, including, but not limited to: ordering any person to divest himself of any interest, direct or indirect, in any enterprise: imposing reasonable restrictions on the future activities or investments of any person, including, but not limited to, prohibiting any person from engaging in the same type of endeavor as the enterprise engaged in, the activities of which affect interstate or foreign commerce; or ordering dissolution or reorganization of any enterprise, making due provision for the rights of innocent persons.

Mr. HRUSKA. The thrust of that subsection would arm the Federal law enforcement authorities to prevent violations. It would be a very, very important part of making it less attractive to engage in this type of business.

Mr. COOPER. We know there are unlawful and criminal interests that have moved into banks and all kinds of businesses, with the attempt to take them over, and conduct them for unlawful purposes.

I assume there may be constitutional problems involved, such as taking property without due process. I assume the courts will take care of the constitutional provision.

Mr. McCLELLAN. All these procedures are already well established in the antitrust law. They have court approval on the issue of constitutionality.

Mr. COOPER. That is correct so far as antitrust law is concerned.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. COOPER. I thank the Senator.

Mr. HRUSKA. Mr. President, I have no further requests for time. I am prepared to yield back the remainder of the time on this side if there is a similar thought on the other side.

Mr. McCLELLAN. Mr. President, if there are no further amendments, I ask that the committee amendment in the nature of a substitute be agreed to.

The PRESIDING OFFICER. If there be no further amendment to be proposed, the question is on agreeing to the committee amendment in the nature of a substitute.

The committee amendment was agreed to.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. Do Senators yield back their time?

Mr. McCLELLAN. I yield back my time.

Mr. HRUSKA. I yield back my time.

The PRESIDING OFFICER. All time is yielded back.

NARCOTIC ADDICT REHABILITATION AMENDMENTS OF 1971

The PRESIDING OFFICER. In accordance with the previous unanimous-consent order the Chair lays before the Senate H.R. 9323, which the clerk will state.

The bill was stated by title as follows:

A bill (H.R. 9323) to amend the Narcotic Addict Rehabilitation Act of 1966, and for other purposes.

The PRESIDING OFFICER. The Senator from Arkansas is recognized.

Mr. McCLELLAN. Mr. President, I yield myself 5 minutes.

The PRESIDING OFFICER. The Senator from Arkansas is recognized for 5 minutes.

Mr. McCLELLAN. Mr. President, this bill, which is supported by the administration, was favorably acted upon by the Committee on the Judiciary on August 16, 1972.

The purpose of H.R. 9323 is to amend the Narcotic Addict Rehabilitation Act of 1966 to permit persons within its purview to be enrolled in methadone maintenance programs as an additional mode of available treatment.

The Narcotic Addict Rehabilitation Act of 1966 was designed to provide treatment for addicts accused or convicted of crimes. It also provided for voluntary treatment of other addicts. At the time of the passage of the 1966 act, there were no known means of treatment through maintenance, so the 1966 act only provided for programs designed to terminate addiction. Since then, however, methadone, maintenance has been established as a useful tool in the rehabilitation of heroin addicts.

This view is substantiated by Dr. Jerome Jaffe, Director of the Special Action Office for Drug Abuse Prevention, who stated that such treatment has been effective in the majority of cases, decreasing or eliminating the use of heroin, and enabling patients to cease criminal activities.

Further, the Food and Drug Administration estimates that approximately 50,000 patients are receiving such treatment now, and progress of these patients indicates that this approach is, indeed, an efficient form of treatment.

This bill would not eliminate any forms of treatment already available under the 1966 act, but would simply add methadone maintenance as another form of authorized treatment.

Surely there is no need to elaborate on the severity of the drug problem in our country or the hideous consequences of drug addiction. It is our duty to provide every possible means of dealing with this tragic problem. This additional method of treatment will, hopefully, be the tool that leads to the rehabilitation of many addicts and thereby reduce the crime and loss of life and health that results from drug addiction.

I urge the enactment of this measure.

Mr. HRUSKA. Mr. President, I yield myself 3 minutes.

I rise to support the words of the Senator from Arkansas (Mr. McCLELLAN) in urging approval of H.R. 9323, a bill to amend the Narcotic Addict Rehabilitation Act of 1966, and for other purposes.

Passage of this measure will mean that methadone maintenance programs can be used as an additional method of treatment for persons covered by the 1966 act by redefining the word "treatment" to include control of dependence as well as termination of dependence.

On June 24, 1971, I joined with other Senators in introducing an identical measure (S. 2140) in the Senate at the request of the President and the Department of Justice. This was done to further the President's June 17, 1971 message to Congress on drug abuse.

Mr. President, H.R. 9323 was drafted in recognition of the role of methadone in the treatment of narcotic addiction. Although they must still be regarded as interim steps requiring close supervision, methadone maintenance programs have indicated that they have a definite place in controlling the narcotic addict's craving for heroin. Addicts involved in such programs have in many instances been able to lead productive lives in their communities, rather than making it their sole purpose in life to secure illegal drugs to support their habits.

When the Narcotic Addict Rehabilitation Act was enacted in 1966 the utility of programs which control, rather than terminate, addiction was not contemplated. As a consequence the word "treatment" as it is used in the act does not include maintenance programs like those relying on methadone.

This bill would amend the definition of the word "treatment" in the Narcotic Addict Rehabilitation Act to include services which control as well as eliminate addiction to narcotics. This means that Federal courts would be able to use the authority of the act to place addicts into methadone maintenance programs in appropriate cases, something which they now cannot do. In the words of President Nixon:

> The evidence indicates that methadone is a useful tool in work of rehabilitating heroin addicts, and that tool ought to be available to those who must do this work.

It is my hope that the bill will receive approval and will also receive prompt processing in the other body of Congress.

I yield back the remainder of the time I requested, and at this time yield 5 minutes to the Senator from New York (Mr. JAVITS).

Mr. JAVITS. Mr. President, I thank the Senator for yielding to me. We are considering this bill with practically no Senators present, and the importance of it may pass us by, and it should not, because the bill has very serious and important implications for the carrying out by the Federal Government of its responsibilities under this act, which is being amended, and in the office regarding drug abuse which we established in the executive department, under Dr. Jaffe, the Special Action Office for Drug Abuse Prevention and for which we have already provided very large sums of money.

The importance of this measure is that it opens up and recognizes a basic fact. Because of the pressure of the addiction on narcotics addicts and the syndrome of crime which is necessary to maintain it, and that of organized crime, the beastial people who sell, push, and smuggle heroin and other addictive drugs into our country which destroy the lives of the addict and the lives of innocent people around them, the crime syndrome has made the tremendous incidence of crime a national crisis, and an especial crisis for great cities like my own city of New York.

The estimate in the committee report is that to maintain the habit, the criminal activity ranges from several hundred million dollars to several billion dollars a year. I think the latter figure—several billions—is more accurate.

We have in New York City the unhappy distinction of having about half the addicts in the United States, an estimated 250,000, and some estimates go as high as 325,000. The mere concept of maintaining this habit, which is estimated to probably cost $100 a day, just boggles the imagination. When one multiplies 250,000 addicts by $100 each day to maintain the habit, and multiplies that aggregate figure for every day of the year, he can see why I speak of billions of dollars in criminal activity.

The important aspect of this bill, the most creditable aspect of it—and I would like to commend the Senator from Nebraska (Mr. HRUSKA), who, as long ago as January 1971, introduced a bill—is based on the work of two brilliant doctors, to whom the country is so indebted, as the principal sponsors of this type of treatment. I refer to Dr. Marie Nyswander, and her husband, Dr. Vincent Dole. I came in contact with them when I was attorney general of New York, and I was at my wits' end to solve the problem. Marie Nyswander, then a young doctor and researcher at New York University, was the one light I saw. I embraced everything she stood for.

I worked with her as an attorney general in the Association of Attorneys General, and have ever since. This has been a very long period of time. It took very long for us to realize that, where we lack a cure, and where the drug-free therapeutic community was so expensive and it takes such a long period of time in treatment for the addict, the rate of recidivism is in excess of 50 percent; it is an unbelievable situation—methadone, which is itself addictive, and the committee states so frankly, is just the only way.

And yet, what is so shocking, and the point I would make here, is that methadone is the only thing until we discover something else. Methadone maintenance is an interim measure—clearly proven effective for certain addicts—and needed now while the search for antagonists and other effective long-term solutions goes on. Dr. Jaffe says he is pretty close to a solution on an antagonist, which will actually, when taken or ingested, repel the drug, so that you do not have to give the user an addictive drug. As of now, at least we know methadone maintenance offers one solution—not a cure-all for all addicts—but it is a proven treatment modality for certain heroin addicts in order to combat the scourge of heroin abuse which is a plague on our society.

Regrettably, a tremendous effort is being made in some quarters to discredit methadone.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. JAVITS. I ask unanimous consent that I may proceed for 5 additional minutes.

Mr. HRUSKA. I yield the Senator another 5 minutes.

Mr. JAVITS. An effort is being made to discredit methadone by pointing out that it is subject to leakage, that some people die of overdoses of methadone, and that it is stolen and gotten out into illicit channels. But, Mr. President, that does not change the fact that it is helpful in most cases. You can steal or hijack anything, or abuse it, whether it is aspirin or some other kind of drug. That should not discredit methadone.

In addition, the effort is made by some to turn to heroin maintenance, which is really keeping the addict in a disabled condition where he cannot work or be a useful member of society, and only compounding the iniquity of the system for heroin production purposes. We would maintain sources which we condemn as illicit to maintain an illicit act. Mr. President, I reject that.

So, Mr. President, this is the only way. There are enormous waiting lists for treatment in methadone maintenance programs. I understand from Dr. Jaffe's office there is a waiting list of 17,000 to 19,000 in New York. That means $2 million in crime a day and that is just for those addicts on the waiting list for methadone maintenance treatment programs.

So I very strongly support this bill, and compliment the committee on the constructive and enlightened approach which has dictated the measure. I also hope the committee will consider it its moral duty to follow through on the question of administration and the question of appropriation, so that these waiting lists, where people want methadone maintenance and cannot get it, and therefore are put out on the streets—we subsidize them in crime by denying them the opportunity they are seeking—that we will adequately finance the methadone maintenance treatment, so that the waiting lists may be cleared up, and hopefully the overwhelming majority of the addicts, until we find a better way, may be put on that program of therapy.

Mr. President, I conclude as follows: Methadone is not the ultimate answer nor a cure-all for all addicts and I am all for seeking a better solution. But in the generality of cases and in the present state of our knowledge the methadone maintenance approach is apparently required. We cannot think only of the addict who has apparently already condemned himself to death and is like a wild animal let loose on society. It is society we are saving with methadone maintenance.

The Senator from Arkansas, when I was on the Judiciary Committee, was the only one who gave me a ray of hope. I could get nowhere with these bills until he incorporated, in a larger bill, what finally resulted as the Narcotic Addict Rehabilitation Act.

Many people, including many of my constituents, have an idea that if a Senator is conservative in his social, economic, or political views, it makes him blind to any problem marked "liberal." Here is an example of two Senators, both of whom pride themselves on what they consider sound conservatism, who are taking a most enlightened approach in a very important and very trying matter. Mr. President, I think that deserves to be emphasized. It is not unique at all; it happens all the time. But it is a striking example which should be called to the attention of the people in the country, who lump so much under the heading "liberal," as if labels were really all that important.

So I am glad that this is being done. The shoe certainly pinches us where I come from. I hope these two influential Senators will lend their aid to the concepts now about to be incorporated in the law.

Mr. McCLELLAN. Mr. President, I yield myself 1 minute.

I thank the distinguished Senator from New York for his compliment. I am grateful for it.

It is true that we sometimes misapply these labels, or we give them a construction—a harsh construction, in many instances—that possibly they do not deserve. Those who are called liberals, or term themselves liberals, or those who are called conservatives, or term themselves conservatives, are joining hands here really seeking legislation to bring about reform. They both subscribe to the same objective and seek to realize it by the same means.

Sometimes they have a different approach but, here we have all been able to agree.

Mr. JAVITS. I thank the Senator.

Mr. President, I believe the report of the committee is a very fine one, contains excellent information, and ought to go in the Record. I ask unanimous consent that the committee report be printed in the Record at this point.

There being no objection, the report (No. 92–1071) was ordered to be printed in the Record, as follows:

Amendments to the Narcotic Addict Rehabilitation Act

The Committee on the Judiciary, to which was referred the bill (H.R. 9323) to amend the Narcotic Addict Rehabilitation Act of 1966, and for other purposes, having considered the same, reports favorably thereon and recommends that the bill do pass.

PURPOSE

The purpose of H.R. 9323 is to amend the Narcotic Addict Rehabilitation Act of 1966 to permit persons within its purview to be enrolled in methadone maintenance programs as an additional mode of available treatment. This would be accomplished by amending the definition of the word "treatment" in the Act to include the concept of control of dependence in addition to current provision for the elimination of dependence.

STATEMENT

H.R. 9323 is an administration-backed measure that would expand the treatment modalities under the Narcotic Addict Rehabilitation Act of 1966 to include methadone maintenance. An identical bill was introduced in the Senate (S. 2140, introduced by Senators Bayh, Griffin, and Hruska on June 24, 1971) and is currently pending in subcommittee.

When the Narcotic Addict Rehabilitation Act was enacted in 1966, the utility of programs which control, rather than terminate, addiction had not yet come to the fore.

The principal sponsors of methadone maintenance, Drs. Vincent P. Dole and Marie Nyswander, began their program of research in 1964, but as recently as 1967, the *Task Force Report on Narcotics and Drug Abuse* of the President's Commission on Law Enforcement and Administration of Justice indicated that ". . . The results of the methadone maintenance research are fragmentary. No final judgments about its suitability as treatment or as a public health approach are yet possible." See *Report* at p. 16, citing Dole & Nyswander, "A Medical Treatment for Diacetylmorphine (Heroin) Addiction," 193 J.A.M.A. 646 (1965); Dole, Nyswander, et al., "Methadone Maintenance, A Report of Two Years Experience," presented to the Committee on Problems of Drug Dependence, National Academy of Sciences, National Research Council, Feb. 11, 1966.

Subsequent events, however, have established that in appropriate cases methadone is a useful tool in the work of rehabilitating heroin addicts: See Executive Communications, *infra*. Accordingly, President Nixon's June 17, 1971, Message to the Congress on Drug Abuse called for the legislation which is the subject matter of this report.

Methadone is a synthetic opiate that is itself addicting. However, given in adequate doses it blocks the euphoric effects of heroin and does not itself produce euphoria, sedation, or distortion of behavior. Patients achieve functional normalcy and can be drawn out of the addict community to begin new social attitudes and relationships. In sum, the drug fosters the social rehabilitation of the addict. It does not directly meet the medical and psychological problems of heroin addiction, although it might indirectly work in these directions. It seems clear that programs of methadone maintenance can return tortured addicts to responsible roles in the community and help reduce the myriad problems associated with drug abuse.

By amending the definition of the word "treatment" in the Narcotic Addict Rehabilitation Act of 1966, H.R. 9323 would authorize Federal courts to place addicts into methadone maintenance programs in appropriate cases, something which they now cannot do. This would not eliminate the use of other forms of treatment which have elimination—as distinct from control—of addiction as their goal. Nor would it recognize methadone maintenance as more than an interim step in the solution of the far more complex problems which give rise to heroin addiction.

THE HEROIN PROBLEM

The heroin addict is not only a danger to himself but to society as a whole in two distinct ways.

1. In order to maintain his habit, the addict becomes involved in various nondrug offenses of the "fund-raising" variety, most commonly the theft of property. Estimates of the cost of their criminal activity range from several hundred million to several billion dollars per year.

2. Organized criminals, by providing the large amounts of cash and connections necessary for large, long-term heroin supplies, realize approximately $20 million in profits annually.

Numerous studies have corroborated these facts and established that the problems of heroin addiction and crime more generally are completely intertwined. See Hearings on Organized Crime and Illicit Traffic in Narcotics before the Permanent Subcommittee on Investigations of the Senate Committee on Government Operations, 88th Congress, 1st and 2d Sessions (1963 and 1964); Organized Crime and Illicit Traffic in Narcotics, report by Permanent Subcommittee on Investigations (89th Cong., 1st Sess., S. Rept. No. 72 (1965)); Report of the President's Commission on Law Enforcement and Administration of Justice (1967); Task Force Reports on Organized Crime and Narcotics (1967); and The World Heroin Problem, H. Rept. No. 92–298, 92d Cong., 1st Sess. (1971). Therefore, to approach one problem is to approach both. By ameliorating the disease of narcotic addiction, it can also be realistically anticipated that we will stem the growing tide of crime in the country.

CONCLUSION

The Committee is of the belief that H.R. 9323 is a positive measure in terms of providing an additional mode of treatment for heroin addicts and also in terms of its crime control feature. It supplements, rather than supplants, existing treatment procedures, providing yet another alternative to confinement. Accordingly, we recommend that the bill do pass.

EXECUTIVE COMMUNICATIONS

Attached hereto and made a part of this report are the following communications from the Department of Justice:

Office of the Attorney General,
Washington, D.C., June 21, 1971.

The Vice President,
U.S. Senate, Washington, D.C.

Dear Mr. Vice President: Enclosed for your consideration and appropriate reference is a legislative proposal to amend the Narcotic Addict Rehabilitation Act of 1966.

That Act was a reflection of the congressional policy that narcotic addicts should be afforded the opportunity to be rehabilitated and restored to health for the benefit of both the individuals and society. To achieve that goal, the Narcotic Addict Rehabilitation Act provides for treatment of addicts who are charged with Federal crimes, and for those who are not so charged upon petition by the addict or a relative.

This legislative proposal would amend the definition of the word "treatment" where it is used in the Act to provide for a more comprehensive effort toward solving the problem of drug addiction. This would be achieved by providing for treatment which controls, as well as that which terminates, addiction. Essentially, the use of methadone would be authorized.

Complete recovery of an addict is not always achieved by complete withdrawal from addictive drugs. The underlying cause of such dependence must be eliminated if one who has ceased to rely on drugs is to be able to retain his independence. When a patient is on a methadone maintenance program, his activities no longer must be centered on the attainment of illicit drugs to support his habit, rather he can channel his energies in a more constructive manner and lead a more normal life, while the basic reason for his drug needs are being explored.

We believe that this change in the Act will be of great assistance in our efforts in this important area of national concern.

The Office of Management and Budget has advised that enactment of this proposed legislation would be in accord with the Program of the President.

Sincerely,

John Mitchell,
Attorney General.

Office of the Deputy
Attorney General,
Washington, D.C., January 3, 1972.

Hon. John L. McClellan,
U.S. Senate.

Dear Senator McClellan: This is in response to your request for information on the value of a methadone maintenance program, and the extent to which this treatment modality would be employed by this Department upon the enactment of S. 2140.

In testimony before a congressional committee in November of this year, Dr. Jerome Jaffe, Director of the Special Action Office for Drug Abuse Prevention, stated:

"Methadone as a maintenance drug has been found to be effective in decreasing the use of heroin or eliminating it altogether in the majority of individuals under treatment. Moreover, significant numbers of patients are able to cease criminal activities and to assume socially acceptable behaviours which are of benefit to them as individuals as well as to their communities."[1]

Dr. Jaffe pointed out that the Food and Drug Administration estimates that up to 50,000 patients are in methadone maintenance programs across the country and data on their progress confirms the acceptability of this method of treatment, its efficacy in reducing illicit drug use and criminal activity, and its beneficial effects toward social and vocational adjustment.

The Council on Mental Health of the American Medical Association has determined that "[a]brupt, complete withdrawal . . . as routine 'treatment' is inhumane, unnecessary, and distinctly contraindicated, even if the patient is in jail."[2] Methadone, when administered in a closely supervised treatment program, permits gradual withdrawal and, for some, long-term maintenance on methadone is required to achieve successful rehabilitation.

The only treatment programs administered by this Department are conducted by the United States Bureau of Prisons. Our programs have emphasized an approach which attempts to alter behavior by dealing with its underlying causes within a therapeutic community. This is more feasible for use in a drug-free institutional setting than is the use of a symptom-oriented approach such as methadone maintenance.

However, in instances where inmates have failed to respond to the therapeutic program, and would be susceptible to the illicit drug traffic outside confinement, methadone maintenance might mean the difference in success or failure for releasee. In such situations as occur in our work release program and in community treatment centers, addicts who are unable to cope with their problems without drugs may be permitted to lead productive lives if maintained on methadone. Hopefully, such maintenance would be temporary, but the evidence is that, for some, lengthy or even permanent maintenance is needed.

While our use of methadone in a maintenance program would certainly be very limited, in those cases where its use is indicated, it would be extremely valuable.

Sincerely,

RICHARD C. KLEINDIENST,
Deputy Attorney General.

CHANGES IN EXISTING LAW

In compliance with subsection (4) of rule XXIX of the Standing Rules of the Senate, changes in existing law made by the bill, as reported, are shown as follows (existing law proposed to be omitted is enclosed in black brackets, new matter is printed in italic and existing law in which no change is proposed is shown in roman):

TITLE 28—UNITED STATES CODE, JUDICIARY AND JUDICIAL PROCEDURE

Chapter 175. Civil Commitment and Rehabilitation of Narcotic Addicts

* * * * *

Sec. 2901. Definitions: As used in this chapter—

* * * * *

(d) "Treatment" includes confinement and treatment in an institution and under supervised aftercare in the community and includes, but is not limited to, medical, educational, social, psychological, and vocational services, corrective and preventive guidance and training, and other rehabilitative services designed to protect the public and benefit the addict by [correcting his antisocial tendencies and ending his dependence on addicting drugs] *eliminating his dependence on addicting drugs, or by controlling his dependence*, and his susceptibility to addition.

* * * * *

TITLE 18—UNITED STATES CODE, CRIMES AND CRIMINAL PROCEDURE

Chapter 314. Narcotic Addicts

* * * * *

Sec. 4251. Definitions
As used in this chapter—

* * * * *

(c) "Treatment" includes confinement and treatment in an institution and under supervised aftercare in the community and includes, but is not limited to, medical, educational, social, psychological, and vocational services, corrective and preventive guidance and training and other rehabilitative services designed to protect the public and benefit the addict by [correcting his antisocial tendencies and ending his dependence on addicting drugs] *eliminating his dependence on addicting drugs, or by controlling his dependence*, and his susceptibility to addiction.

* * * * *

TITLE 42.—THE PUBLIC HEALTH AND WELFARE

Chapter 42. Narcotic Addict Rehabilitation

SUBCHAPTER II.—CIVIL COMMITMENT OF PERSONS NOT CHARGED WITH ANY CRIMINAL OFFENSE*

Sec. 3411. Definitions

* * * * *

(b) "Treatment" includes confinement and treatment in a hospital of the Service and under supervised aftercare in the community and includes, but is not limited to, medical, educational, social, psychological, and vocational services, corrective and preventive guidance and training, and other rehabilitative services designed to protect the public and benefit the addict by [correcting his antisocial tendencies and ending his dependence on addicting drugs] *eliminating his dependence on addicting drugs or by controlling his dependence*, and his susceptibility to addiction.

* * * * *

Mr. JAVITS. Mr. President, I have asked my office for late information, and they have just produced it. I cannot say it is final, or the latest, but it is from the Governor of the State of New York, and it confirms Dr. Jaffe's estimate I previously mentioned and it shows that 16,500 are still on the active waiting list for methadone maintenance in New York; and Dr. Jaffe's office estimates that 28,000 represents the waiting list throughout the United States, so serious is the problem. I ask unanimous consent that this letter from the Governor of New York dated May 9, 1972, be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

STATE OF NEW YORK,
EXECUTIVE CHAMBER,
Albany, May 9, 1972.

Hon. JACOB K. JAVITS,
Senate Office Building
Washington, D.C.

DEAR JACK: Thank you for your recent letter concerning possible federal funds for the expansion of methadone maintenance treatment programs.

As you may be aware, over the last few months the New York State Narcotic Addiction Control Commission has been discussing with Dr. Jaffe various means of expediting the flow of federal money into New York State for the expansion of drug abuse programs. Dr. Jaffe's office should have recently received a comprehensive proposal which includes our most recent and accurate information regarding waiting lists for methadone programs. In addition, Dr. Jaffe is meeting this week with Howard A. Jones, Chairman of the NACC, to discuss drug abuse problems and programs in New York State.

Presently, approximately 18,500 addicts in New York State are receiving methadone maintenance therapy. Over 16,000 of these are enrolled in programs which are either directly operated by the state or function under contract with the state. We estimate that there are another 16,500 addicts who are waiting to enter a methadone program. Because of our dire financial condition, it was not possible to include funds in the 1972–73 budget to provide the expansion necessary to absorb the additional addicts.

Shortly after the state's methadone maintenance program was originated a computerized central waiting list was established at Rockefeller University. Because of rapid expansion of the program, however, the number of people on the waiting list has increased correspondingly, beyond the present computer capacity. The present waiting list estimate of 16,500, therefore, is not absolutely precise, although we have attempted to eliminate duplicate counting. We are now in the process of establishing an expanded computerized central waiting list which will offer a combined applicant-patient registry base of up to 100,000. This system should be operational within a few months and will provide the precise figures which we are seeking. In the meantime, I trust that Dr. Jaffe will find the available information sufficiently reliable.

I am aware of your continued support and cooperation in our shared objective of obtaining expanded federal support for drug programs in New York State. Your efforts are integrally related to our eventual success and are much appreciated.

Sincerely,

NELSON.

Mr. McCLELLAN. Mr. President, I know of no other requests for time or any amendment to be offered. Therefore, I yield back the remainder of my time.

Mr. HRUSKA. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All remaining time having been yielded back, the question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed for third reading, and the bill to be read a third time.

The bill (H.R. 9323) was read the third time.

AIRCRAFT PIRACY AMENDMENTS OF 1972

The PRESIDING OFFICER (Mr. STAFFORD). In accordance with the order previously entered, the Chair lays before the Senate S. 2567, which the clerk will state.

The assistant legislative clerk read as follows:

A bill (S. 2567) to facilitate prosecutions for certain crimes and offenses committed aboard aircraft, and for other purposes.

The PRESIDING OFFICER. On this bill, there is a time limitation of 1 hour for debate, to be equally divided. Who yields time?

---

[1] Testimony of Dr. Jerome H. Jaffe before the Subcommittee on Public Health and Environment, House Committee on Interstate and Foreign Commerce, November 8, 1971.

[2] "Narcotics and Medical Practice," Journal of the American Medical Association, Oct. 25, 1971, vol. 218, p. 4.

*Section 301, Public Law 89–793.

Mr. McCLELLAN. Mr. President, I yield myself 3 minutes.

This bill was introduced on September 23, 1971, by Senator HRUSKA for himself and Senator PEARSON. It was reported out by the Committee on the Judiciary on August 16, 1972.

Mr. President, undoubtedly each of us has searched for solutions to the frustrating problems of air hijackings and threats concerning the safety of aircraft.

Solutions are not easy to find because these acts involve the lives of many innocent people. The danger to passengers and airline personnel is obvious in the case of hijacking. There is, moreover, no such thing as an "idle threat" because any threat results in fear and apprehension as well as a great loss of time and labor.

Generally, these amendments would tighten present law by: First, establishing specific offenses for threats concerning the safety of aircraft; second, curing certain problems of process for civil penalties under the Federal Aviation Act; and third, clearly classify proscribed acts as felonies or misdemeanors.

Mr. President, hijackings and ominous threats continue. If solutions were easily found we would have stopped these offenses long ago. Meanwhile, we must make every effort to discourage further activity of this sort.

This bill, in my judgment, will have some important impact in that direction. Therefore, I urge its enactment.

Mr. HRUSKA. I yield myself 5 minutes.

Mr. President, I shall make a brief statement explaining and supporting this bill insofar as this Senator is concerned, and then I shall refer to a letter addressed by the chairman of the Committee on Commerce to Senator McCLELLAN, under date of August 18, in which a request is made for a reference of this bill to the Committee on Commerce for its brief consideration under circumstances which I shall outline.

Mr. President, most of the crimes that are committed in this country today have been with us since ancient times: robbery, burglary, rape, murder, assault, arson, forgery, to cite the most obvious examples. A few are new and are the product of the technology that characterizes our age. Of these none is more obvious, none is more fearsome, and none is more difficult to control than aircraft piracy. Almost weekly we read in the press of new attempts to hijack airplanes for monetary, political or publicity reasons. The stories are spectacular, enthralling and often tragic. With hundreds of lives at stake in addition to millions of dollars of complex equipment, the authorities unfortunately are often impotent in their powers to deal with this type of modern criminal.

In recognition of the problem, which is international in scope, 77 countries recently agreed to the text of the Hague Convention for the Suppression of Unlawful Seizure of Aircraft. As my colleagues recall, on September 8, 1971, the Senate unanimously agreed to ratify the convention. This convention will be a useful measure to fill certain gaps in the existing body of international law relative to hijacking. Legislation is now before the Commerce Committee of the Senate which will implement this convention.

S. 2567 is an attempt to enact legislation which will permit law enforcement personnel to combat this problem in the United States. Its ultimate goal is to make domestic air transportation safer. No one can object to that.

To accomplish this task the bill is designed to alleviate the very serious substantive and procedural problems often experienced by Federal agencies in trying to prosecute crimes committed aboard aircraft. The committee report on this bill indicates that the existing framework of statutes covering aircraft hijacking, destruction, and related offenses have proved inadequate in several respects to deal with certain fact situations that occur. Certain activity which should be proscribed is not treated under current law. Irrational penalty sanctions stand in the way of effective enforcement. Procedural restraints at least cause inconvenience and unnecessary expenditures by the Government, and can operate to preclude the imposition of warranted civil penalties.

The bill would make illegal threats to hijack or destroy aircraft. Presently, the conveying of false information in order to do a prohibited act is proscribed, but a threat to do the same act is not. The bill would also provide felony penalties for carrying concealed or dangerous weapons aboard aircraft in situations where the offender is acting willfully and without regard for or with reckless disregard for the safety of human life. The present statute provides only for a misdemeanor in all circumstances where weapons are brought on aircraft. This weapons provision would also be extended to foreign aircraft, thereby enabling Federal prosecutions of those who carry concealed or dangerous weapons aboard aircraft within the United States which are operated by foreign air carriers.

I hope S. 2567, as amended, will be approved in the near future.

Mr. President, referring to the letter from Senator MAGNUSON, chairman of the Committee on Commerce, to the Senator from Arkansas (Mr. McCLELLAN), under date of August 18, the letter was referred to me by the Senator from Arkansas inasmuch as this Senator, together with the Senator from Kansas, (Mr. PEARSON), introduced the measure. It is a request that this bill be referred to the Committee on Commerce because they are currently—hopefully, this week—engaging in executive sessions to process the bill they are considering on this same subject. Another bill, S. 2280, dealing with aircraft hijacking, is the work product of the Senator from Nevada (Mr. CANNON) and Senator MAGNUSON.

This Senator has no objection to extending to the Committee on Commerce and to its chairman the courtesy of referring this bill to them, so that they may consider it for the purpose of suggesting such amendments they might want to suggest or such revision of the bill which could be offered by way of a substitute.

Therefore, so far as this Senator is concerned, the request by Senator MAGNUSON certainly is agreeable. But I would like to have some indication from the Senator from Arkansas as to a time limit or any arrangements for time that he may have in mind in this connection, inasmuch as he is the chairman of the subcommittee reporting the pending measure.

Mr. McCLELLAN. Mr. President, I have no objection to the bill being referred to the Committee on Commerce. In fact, I am one of the Senators who believe that the integrity of committee jurisdiction should be respected, observed and preserved in this body.

There is an element in this measure that deals with interstate commerce, and that committee does have jurisdiction over that aspect of the bill. For that reason, since the chairman of the Committee on Commerce has requested that the bill be referred for his committee's consideration, I have no objection.

But I would suggest a limitation of time, for two reasons. The first is the importance of this matter. I think we should have legislation to deal with this problem as expeditiously as practical. For that reason, I would hope that the bill might be returned to this body by the Committee on Commerce at an early date.

Also, if the bill is to be enacted in this session, if the House to have an opportunity to act on it, it is important that the Senate act and get the measure over there for its consideration as promptly as we can.

For those reasons, Mr. President, I suggest that, as of now, the bill be referred to that committee for, say, 10 to 14 days, to give that committee an opportunity to process it and return it. Senator MAGNUSON, the chairman oi the committee is not present today, and I am not trying to take advantage. I make this request with the further comment that, upon his return, if he concludes that the time is not adequate, I would not oppose a request by him for additional time.

I know that the purpose of this is to try to move the proposed legislation so that it can be enacted in this session of Congress. I do that because of the importance I attach to it.

Mr. HRUSKA. Is that in the form of a motion or a suggestion?

Mr. McCLELLAN. I understood that the Senator was going to make a motion. I just make this as a suggestion, as part of his motion. I hope he will include that suggestion in his motion, unless there is objection from some other Senator.

Mr. HRUSKA. Mr. President, I ask unanimous consent that the letter from the chairman of the Committee on Commerce to the chairman of the Subcommittee on Criminal Laws and Procedures be printed at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON COMMERCE,
Washington, D.C., August 18, 1972.
Hon. JOHN L. MCCLELLAN,
Chairman, Subcommittee on Criminal Laws and Procedures, Senate Judiciary Committee, U.S. Senate, Washington, D.C.

DEAR JOHN: I have just spoken with Senator Robert Byrd regarding S. 2567, and explained to him that I was unaware of the unanimous consent agreement which you asked for scheduling Senate action on this bill September 5. Had I known of your Committee's report, I would have spoken to you earlier.

As you know, this bill provides numerous amendments to the Federal Aviation Act dealing with crimes against air transportation. For that reason, my Committee has an interest and concern in the matter. Presently we are working toward adopting certain amendments dealing with air piracy similar to those in your bill. Our amendments will be considered in executive session by the Commerce Committee hopefully the week of September 5.

Because of the nature of the amendments Senator Cannon and I are considering, they will have to be coordinated with the amendments contained in S. 2567. Therefore, I asked Senator Byrd today to postpone Senate consideration of this bill until you and I have had a chance to discuss this personally. I wish I could have contacted you on the phone but understand that you are out of town. It would be my hope that since this bill, S. 2567 amends the Federal Aviation Act of 1958 that the Commerce Committee might obtain jurisdiction to consider it for at least several weeks.

As you know, S. 2280, another bill dealing with the aircraft hijacking situation is on The Senate Calendar. Senator Cannon and I have not yet called it up because of our intention to seek to add to it Committee amendments which will deal with the hijacking problem in a more comprehensive way.

Therefore it seems wise and prudent that before finalizing such amendments the Committee consider S. 2567 in this regard in order to insure that the Committee amendments and S. 2567 are compatible.

I hope I will have an opportunity to discuss this with you personally on September 5 and I will send a copy of this letter to Senator Byrd so that he will be more fully aware of the situation.

Warmer regards.

Sincerely yours,
WARREN G. MAGNUSON,
Chairman.

Mr. COOPER. Mr. President, will the Senator yield?

Mr. HRUSKA. I yield 3 minutes to the Senator from Kentucky.

Mr. COOPER. Mr. President, I do not oppose the motion that is to be made by the Senator from Nebraska.

I want to raise a question; but before doing so, I want to pay my tribute to the Senator from Nebraska (Mr. HRUSKA), the Senator from Arkansas (Mr. MCCLELLAN), and the Judiciary Committee for the bills they have developed and brought before the Senate. Those measures are far-reaching. I have not had the opportunity to study them extensively, but I feel that they offer a hope for the better prosecution of crime.

S. 2567 is a bill designed to find better means of preventing hijacking and of prosecuting those who engage in this cruel and heartless crime, a crime without regard for human life. But we cannot make something a crime except within the Constitution. We cannot write language which flies in the face of the Constitution.

I invite attention to two sections of the bill which disturb me from this viewpoint. One section is on page 2, line 14, section 36, "Imparting or Conveying Threats," and the second section is on page 5, line 8, which contains practically the same language.

It is a definition of crime, not a provision for a civil penalty. It provides:

> Whoever imparts or conveys or causes to be imparted or conveyed any threat to do an act which would be a felony—

It provides that a person who threatens, who says, "I will commit this act" which if committed would constitute a felony, that the statement, in itself, shall be a felony and should be subject to a fine of not more than $5,000 or imprisonment for not more than 5 years, or both.

We have had this issue up a number of times in similar bills that came before the Senate. I know that I have raised this question on former bills, usually without success; but whether we like it or not, the first amendment to the Constitution provides great freedom of speech to an individual. An individual may say, "I will overthrow the Government." I do not like it, and I do not like the individual who says that. There are some people today who are saying just that. But we cannot convict them under the law unless it can be shown that there were some acts committed which would give reason to believe that they would move to overthrow the Government.

As we all know from our law experience one can attempt to commit a crime which does not succeed, but certain actions directed toward the execution of the crime may give authority to designate it a crime punishable by law. In nearly every case, there must be the intent to commit a crime. It is determined by the facts which can be developed as to what the defendant not only said, and what he says may be part of it, and what he did, and what actions he took to carry into execution the threat or the statement that he made. Of course there is case after case which holds that without such intent being proved, there is no crime. The committee itself recognizes that situation.

I have quickly read the report, where it refers to the case of Watts, beginning on page 4, the paragraph reading "This statutory scheme is deficient in two respects," and then through page 5 where it discusses the problem of the inability to cause a threat to be made a crime. It relies on a statute which was interpreted by the Supreme Court in the case of *Watts* v. *United States,* 394 U.S. 705 (1966).

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. COOPER. Mr. President, will the Senator yield me 1 minute more?

Mr. HRUSKA. I yield 3 additional minutes to the Senator from Kentucky.

The PRESIDING OFFICER. The Senator from Kentucky is recognized for 3 minutes.

Mr. COOPER. Mr. President, here the question was where a person was convicted for threatening to kill the President. It was a threat to kill the President. He was convicted and the sentence was upheld in the circuit court of appeals. Upon certiorari to the Supreme Court, the Court reversed the decision on the grounds I have described, that one cannot amend the first amendment to the effect that language alone can become a crime. I want to raise this question because I think it is a serious defect.

Mr. JAVITS. Mr. President, will the Senator from Kentucky yield?

Mr. COOPER. I yield.

Mr. JAVITS. I wanted to make this point, that this will go to another committee which gives a chance for another look. I would commend to the manager of the bill and the ranking minority member the question of the appropriateness of the formula. The formula is different for a criminal punishment than for a civil punishment. I agree, it is a basic constitutional question which the Senator from Kentucky (Mr. COOPER) has brought up. It is most admirable that he raises it.

I should like to point out, however, that in the statement on page 4 of the report where we speak of the criminal penalty and responsible persons who convey false information under circumstances in which it was entirely possible that the threat could have been carried out, I respectfully submit to the members of the committee that this is better language, better language for defining the purpose of the act than an apparent determination to carry the threat into execution.

It seems to me from the point of view of proof, we are better off if we require proof of circumstances, that a person was entirely capable of carrying out the threat he was making, whereas an apparent determination is a strictly cerebral proposition. I personally, as a matter of legislative draftsmanship, like the language in the report better than the language in the statute.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. HRUSKA. Mr. President, I yield 3 additional minutes to the Senator from New York.

The PRESIDING OFFICER. The Senator from New York is recognized for 3 additional minutes.

Mr. JAVITS. Then, when we move over to page 2, I would like again to point out the difference between—and this is a civil penalty—the statute would read that whoever imparts or conveys or causes to be imparted or conveyed any false information, knowing the information be false, I think is a better statement than the statement which is in the report, which says:

> Because of the inappropriateness of criminal action . . . against reputable and otherwise responsible persons who convey false information in ill-advised attempts at humor, the committee recommends a civil penalty for such situations.

It seems to me that there, in a civil penalty, if we require willfulness, we at least compel the jury to consider the circumstances under which it was made, and whether the person making it, even if it was a hoax, was serious about the hoax.

For example, I have had complaints about someone boarding a plane who made the flip remark to the stewardess who had asked him, "What have you got in that violin case?" "Oh, a machinegun." Promptly he was collared by a Federal agent and the U.S. attorney felt that perhaps under the law he was guilty.

So that I think with a chance to look at this legal language again, I thoroughly agree with the committee on the need to deal with these matters, but we can deal with them and deal with them effectively with full regard for constitutional rights and civil liberties.

So I simply commend these ideas to the committee.

Mr. HRUSKA. The colloquy furnished by the distinguished Senator from Kentucky (Mr. COOPER) and the remarks of the distinguished Senator from New York are helpful. They are appreciated. We are, in the field of the first amendment, always required to take into consideration the primacy of the Constitution when we attempt to enact statutes which touch its perimeters. But we might recall that even those rights under the first amendment are not absolute and unlimited. They are subject to some limitation. Mr. Justice Holmes remarked that a man was not entitled under the first amendment to cry "Fire" in a crowded theater. The same rule applies in this context.

The suggestion made by the Senator from New York is a very good one. However, the language, "apparent determination to carry the threat into execution," seems to me would be a sufficient lead to bring into the picture in ascertaining the determination of the defendant all the surrounding facts and the real intent of the man who utters it. On page 5 of the report, for example, there is a reference to the idea where one only conveys knowingly information to hijack or to bomb an aircraft in pursuance of a distorted notion of humor. That is one situation. The difference obviously lies in the intent of the actual threat which for a long time has been the basis for departure in terms of sanctions.

May I make this suggestion, inasmuch as there will be a motion to refer this bill to the Commerce Committee pursuant to the request of the chairman of that committee, that this colloquy will serve as a basis for considering a change in the language along the lines the Senator from New York suggests and also along the lines the Senator from Kentucky suggests.

Mr. JAVITS. I thank the Senator very much.

Mr. HRUSKA. Mr. President, may I ask the Senator from Arkansas (Mr. McCLELLAN) if he has any further comment?

Mr. McCLELLAN. Mr. President, I have no further statement except to agree with the statement just made by the Senator from Nebraska that the Commerce Committee should have an opportunity to consider these suggestions. They are suggestions well worthy of consideration.

We are in a sensitive area of constitutional rights and, therefore, the greatest of care should be exercised in the enactment of this proposed statute. Although I note that I find the present language adequate. But I see no reason why the Commerce Committee cannot take note of this colloquy and the suggestions made and give them proper consideration. After the bill is reported back to the floor for further consideration by the Senate, consideration can then be given to amendments.

I would hope that we might be able to let the bill be referred to the Commerce Committee with instructions to return it at an early date. I would suggest that 10 to 14 days from now would be appropriate.

The PRESIDING OFFICER. Who yields time?

Mr. TUNNEY. Mr. President, the need for Federal legislation to insure the safety of international and domestic air transportation has become ever more apparent and increasingly more urgent in recent years. The aviation industry is annually entrusted with millions of lives and billions of dollars of cargo. The growth of the industry has been accompanied by a corresponding increase in criminal activity directed against its operations. Congress has responded to these problems as they have arisen. Enactment of S. 2567—the Air Piracy Amendments of 1972—as reported to the Senate by the Committee on the Judiciary would cure some of the deficiencies inherent in the present treatment of air piracy and related offenses. These amendments are directed toward the inadequacies of existing Federal law concerning the prescription of conduct which falls short of actual air piracy but which involve various degrees of substantial risks to human life and the threat of significant monetary damage.

S. 2567 deals with several insufficiencies that have come to light with recent enforcement attempts under these provisions. Under present law anyone who states that an aircraft will be hijacked or destroyed knowing that information to be false may be punished under Federal law, while one who conveys the same information and instead of knowing the information to be false fully intends to carry out the threatened offense may not be prosecuted under Federal law until such time as his conduct is elevated to the status of an attempt to commit the offense. Such a distinction is not only illogical, but creates obvious prosecutorial difficulties. The amendments proposed in S. 2567 would make threats to commit aircraft piracy or destruction or any of several related offenses punishable by a fine of not more than $5,000 and/or imprisonment for not more than 5 years.

While present law authorizes the use of civil remedies against those who provide false information as to the destruction of an aircraft or aircraft facilities, it permits only criminal prosecution against those who give false information concerning acts of piracy and related crimes. S. 2567 creates a civil penalty similar to that available in destruction cases in such instances:

> [B]ecause of the inappropriateness of criminal action against reputable and otherwise responsible persons who convey false information in ill-advised attempts to humor.

The bill would make two changes in current law with respect to boarding an aircraft while armed with a concealed deadly or dangerous weapon. First, it makes the provision applicable to foreign as well as domestic air carriers, thereby recognizing the responsibility of the United States to contribute to the safety of international air travel. Second, it increases the maximum penalty for the offense from a fine of not more than $1,000 and/or imprisonment for not more than 1 year to a fine of not more than $5,000 and/or imprisonment for not more than 5 years. As the report of the Judiciary Committee noted:

> The misdemeanor penalty (currently in effect) has been adequate in cases of persons who carry weapons such as unloaded pistols or knives aboard aircraft, but do so without any intent to use those weapons while on board. On the other hand, that penalty has not been adequate in cases where the nature of the weapon involved and/or surrounding circumstances indicate a very real danger that the weapon is intended for immediate use or that human life is imperiled.

The amendment would preserve the substance of an exception granted "law enforcement officers of any municipal or State government, or the Federal Government, who are authorized or required to carry arms, or persons as may be so authorized under regulations issued by the Secretary of Transportation, while acting within their official capacities."

The threat of air piracy and related offenses create too great a public peril to escape congressional prohibition. I therefore support S. 2567 and urge its passage.

Mr. HRUSKA. Mr. President, unless there is a further request for time, I ask unanimous consent that the bill (S. 2567) be referred to the Committee on Commerce with the understanding that it will be reported back to the Senate and placed on the calendar not later than September 19, 1972.

This request is based upon the information received by me a few minutes ago that such a request is agreeable with the chairman of the Commerce Committee.

Mr. McCLELLAN. Mr. President, what was the request?

Mr. HRUSKA. The request was that the bill be reported back to the Senate and placed on the calendar.

Mr. McCLELLAN. Would that be with instructions that the committee consider the bill and place it on the calendar or with a request? I think it should be with instructions.

Mr. HRUSKA. Mr. President, I amend my unanimous-consent request in that manner.

The PRESIDING OFFICER. The unanimous-consent request is accordingly modified.

Is there objection to the unanimous-consent request of the Senator from Nebraska? The Chair hears none, and it is so ordered.

COUNTERFEITING AND FORGERY

The PRESIDING OFFICER. In accordance with the unanimous-consent agreement previously entered into, the Chair lays before the Senate Calendar No. 1023 (H.R. 9222), on which there is one-half hour for debate. The clerk will report the bill by title.

The legislative clerk read as follows:

Calendar No. 1023 (H.R. 9222) to correct deficiencies in the law relating to the crimes of counterfeiting and forgery.

The Senate proceeded to the consideration of the bill which had been reported from the Committee on the Judiciary with amendments on page 1, line 9, after the word "a", strike out "money order issued by or under the" and insert "blank money order or a money order issued by or under the"; on page 3, line 5, after the word "or", strike out "retains" and insert "possesses"; in line 25, after the word "machine", strike out "or any postal money order form"; and, on page 4, line 3, after the word "on", strike out "such" and insert "postal".

Mr. McCLELLAN. Mr. President, I yield myself 5 minutes.

The PRESIDING OFFICER. The Senator from Arkansas is recognized for 5 minutes.

Mr. McCLELLAN. Mr. President, this bill was favorably reported out of the Committee on the Judiciary on August 16, 1972. The bill passed the House on September 20, 1971, having been introduced at the request of the Postal Service to correct certain deficiencies in existing law.

Mr. President, the Postal Inspection Service today faces serious problems in attempting to block traffic by professional criminals in blank money orders stolen in post office burglaries. After being stolen, these money orders are forged and passed throughout the United States. Since the amount of a money order is imprinted by a machine, such machines have also become the target of thieves. The incidents of these thefts have increased as criminal elements have devised new ways in which to subvert security precautions. In fiscal 1970, the potential value of stolen money orders was nearly $8 million. Existing security features prevented this amount of loss from becoming a reality, but clearly the problem is still significant, and we must take these measures to further strengthen the law.

Mr. President, current law, section 500 of title 18, United States Code, does not proscribe illicit trafficking in blank postal money orders. In addition, the present statute does not cover the theft of the processing machines which are used to validate postal money orders.

This bill, as amended, will cure these two basic ills and will recodify existing provisions, improving the language of the provisions.

The bill will also add a "possession" clause to the existing law, enabling direct prosecution for this activity. Now, without such a provision, prosecutors must use other theft statutes and face the problem of establishing the value of the money orders. Further, under current law, theft of a validating machine is only a misdemeanor, because of the low monetary value of the machine.

H.R. 9222 will strengthen the law, so that prosecution in these cases is greatly facilitated. It will also reach the "fences," making dealings in this contraband much riskier, thereby reducing the appeal of this type of criminal activity.

Mr. President, I urge the immediate enactment of this legislation.

Mr. HRUSKA. Mr. President, I yield myself 3 minutes.

The PRESIDING OFFICER. The Senator from Nebraska is recognized for 3 minutes.

Mr. HRUSKA. Mr. President, H.R. 9222 is designed to correct certain deficiencies in presently existing law as it relates to the crimes of counterfeiting and forgery of postal money orders. This is basically a technical bill aimed at perfecting 18 United States Code 500. I urge that it be approved.

Under existing statute, Federal authorities are hampered in their efforts to successfully prosecute money order thieves and passers. During fiscal 1971, more than 1,750 thefts at postal facilities took place resulting in the loss of $1,349,000 in cash and stamps and the disappearance of almost 50,000 blank postal money orders. Since each money order may be valid up to a maximum sum of $100, these orders represent a potential sum of nearly $5 million, although other factors insure that criminals cannot hope to reach this amount. Nonetheless, a very significant law enforcement problem remains as a result of these thefts.

Presently, section 500 does not cover illicit trafficking in blank money orders nor does it include the processing machines used to validate the orders. H.R. 9222 will correct these two existing problems as well as making other technical changes in the present law. All of these new additions to the statute will have the effect of making prosecutions by Federal authorities for crimes involving postal money orders both more certain and more feasible with the result that crimes of this type will decline in attractiveness and, hopefully, frequency.

I hope, Mr. President, that the Senate will approve this bill, thus moving it one step closer to enactment.

Mr. President, I yield back the remainder of my time.

Mr. McCLELLAN. Mr. President, I know of no further amendments or requests for time.

Mr. President, I ask unanimous consent that the committee amendments be agreed to, and that the bill, as amended, be considered as original test for the purpose of further amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLELLAN. Mr. President, I know of no other requests for time for any other amendment to be offered. Therefore, I yield back the remainder of any time remaining on this side.

Mr. HRUSKA. I yield back any time remaining to this side.

The PRESIDING OFFICER. All time is yielded back.

The question is on the engrossment of the committee amendments and third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill (H.R. 9222) was read the third time.

PUBLIC SAFETY OFFICERS' BENEFITS ACT OF 1972

The PRESIDING OFFICER. In accordance with the unanimous-consent order previously entered into the Senate will now proceed to vote on S. 2087. The yeas and nays have been ordered, and the clerk will call the roll.

Mr. ROBERT C. BYRD. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. ROBERT C. BYRD. Mr. President, under the order, as I recall it, 15 minutes will be utilized in calling the roll on this bill, but following this bill, the time on each subsequent bill for rollcalls will be limited to 10 minutes. Am I correct?

The PRESIDING OFFICER. The Chair is advised that the Senator is correct.

Mr. ROBERT C. BYRD. I thank the Chair.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll.

Mr. ROBERT C. BYRD. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Florida (Mr. CHILES), the Senator from North Carolina (Mr. ERVIN), the Senator from Oklahoma (Mr. HARRIS), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Wyoming (Mr. McGEE), the Senator from South Dakota (Mr. McGOVERN), the Senator from Montana (Mr. METCALF), the Senator from Maine (Mr. MUSKIE), the Senator from Rhode Island (Mr. PELL), and the Senator from Alabama (Mr. SPARKMAN) are necessarily absent.

I further announce that the Senator from Iowa (Mr. HUGHES) is absent on official business.

I further announce that, if present and voting, the Senator from Wyoming (Mr. McGEE) would vote "yea."

Mr. GRIFFIN. I announce that the Senator from New York (Mr. BUCKLEY), the Senator from Kentucky (Mr. COOK), the Senator from Hawaii (Mr. FONG), the Senator from Arizona (Mr. GOLDWATER), the Senator from Wyoming (Mr. HANSEN), and the Senator from Oregon (Mr. HATFIELD) are necessarily absent.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The Senator from New Hampshire (Mr. COTTON) is detained on official business.

If present and voting, the Senator from New York (Mr. BUCKLEY), the Senator from Kentucky (Mr. COOK), the Senator from Hawaii (Mr. FONG), and the Senator from Oregon (Mr. HATFIELD) would each vote "yea."

The result was announced—yeas 80, nays 0, as follows:

So the bill (S. 2087) was passed.

The title was amended, so as to read: "A bill to amend the Omnibus Crime Control and Safe Streets Act of 1968 to provide a Federal minimum death and dismemberment benefit to public safety officers or their surviving dependents."

Mr. HRUSKA. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. McCLELLAN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CIVIL REMEDIES FOR VICTIMS OF RACKETEERING ACTIVITY AND THEFT ACT OF 1972

The PRESIDING OFFICER. In accordance with the unanimous-consent order previously entered into, the Senate will proceed to the question of passage of S. 16. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. ROBERT C. BYRD. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Florida (Mr. CHILES), the Senator from North Carolina (Mr. ERVIN), the Senator from Oklahoma (Mr. HARRIS), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Wyoming (Mr. McGEE), the Senator from South Dakota (Mr. McGOVERN), the Senator from Maine (Mr. MUSKIE), the Senator from Montana (Mr. METCALF), the Senator from Rhode Island (Mr. PELL), and the Senator from Alabama (Mr. SPARKMAN), are necessarily absent.

I further announce that the Senator from Iowa (Mr. HUGHES), is absent on official business.

I further announce that, if present and voting, the Senator from Wyoming (Mr. McGEE) would vote "yea."

Mr. GRIFFIN. I announce that the Senator from New York (Mr. BUCKLEY), the Senator from Kentucky (Mr. COOK), the Senator from Hawaii (Mr. FONG), the Senator from Arizona (Mr. GOLDWATER), the Senator from Wyoming (Mr. HANSEN), and the Senator from Oregon (Mr. HATFIELD) are necessarily absent.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

If present and voting, the Senator from New York (Mr. BUCKLEY), the Senator from Kentucky (Mr. COOK), the Senator from Hawaii (Mr. FONG), and the Senator from Oregon (Mr. HATFIELD) would each vote "yea."

The result was announced—yeas 81, nays 0, as follows:

ACT OF BARBARISM BY ARAB TERRORISTS IN MUNICH

Mr. ROBERT C. BYRD. Mr. President, the senseless act of barbarism in which Arab terrorists have seized innocent participants in the Olympic games as hostages, and slain others, will outrage decent peoples and governments throughout the world.

Do these terribly misguided bandits—these so-called, self-styled patriots—really think that their foul deed will do anything but besmirch the Palestinian cause? No one can possibly have sympathy for attacks such as this. Like the massacre at the Tel Aviv airport, it places its perpetrators beyond the bounds of civilized action.

Mere words cannot express the contempt I feel—a contempt which I am sure that millions upon millions of the world's citizens share—for men who would commit atrocities of this nature.

It is only right and proper that other nations and other governments should join the Israelis in seeking to put a halt to the terrorists' unjustifiable tactics. No citizens of any country anywhere are safe when fanatical madmen can with impunity stage international kidnapings.

To protect their own legitimate interests, it behooves the governments of all the Arab States to use every means within their power to stamp out these guerrilla methods. The world will not long sympathize even with the just aspirations of governments or states which continue to countenance underground warfare of this kind.

The terrorists have alerted the world—not to the rightness of any cause they may otherwise espouse or the justness of any grievances they may otherwise bear, but to the totally unacceptable nature of their conduct to civilized people everywhere. The outlaws who have seized and slain the Israeli Olympic athletes must be apprehended and made to pay the full penalty for their unspeakable crime.

MESSAGE FROM THE HOUSE

A message from the House of Representatives by Mr. Berry, one of its reading clerks, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 13089) to provide for acceleration of programs for the planting of trees on national forest lands in need of reforestation, and for other purposes.

ENROLLED BILL SIGNED

The message also announced that the Speaker had affixed his signature to the enrolled bill (H.R. 13089) to provide for acceleration of programs for the planting of trees on national forest lands in need of reforestation, and for other purposes.

REVENUE SHARING ACT OF 1972

The PRESIDING OFFICER. Pursuant to the previous order, the Senate will now proceed to the consideration of H.R. 14370, which the clerk will report.

The assistant legislative clerk read as follows:

Calendar No. 1015 (H.R. 14370), a bill to provide payments to localities for high priority expenditures, to encourage the States to supplement their revenue sources, and to authorize Federal collection of State individual income taxes.

Mr. LONG. Mr. President, I believe that those of us who undertook to make the case for the pending business have explained our position in favor of the pending measure in such language as we believe is appropriate for the time being.

I would imagine, however, that some Senators might wish to discuss their views or might wish to engage in some colloquy about the matter. Until some question is raised, however, for the time being, I think those of us who favor the measure have pretty well made our case.

I therefore yield the floor.

AMENDMENT NO. 1468

Mr. RIBICOFF. Mr. President, I support the basic concept of revenue sharing. Many of our State and local governments are faced with a growing fiscal crisis as the demand for governmental services outpaces their ability to raise revenues.

Between the fiscal years 1955 and 1970 State and local general expenditures rose almost three times in current dollar terms—from $33.7 billion to $131.3 billion. During the same period State and local revenues rose from $31.1 billion to $130.8 billion. In order for these State and local governments to keep pace with costs, they have been forced to raise their taxes dramatically. Many of them, however, have reached the saturation point and can no longer maintain their effort.

Regrettably the Federal categorical grant programs designed to aid State and local governments have failed to alleviate their problems and in some instances have even aggravated them. The proliferation of these programs, each with their own regulations and narrow purpose, is confusing beyond belief. Catalogs now have to be published to guide State and local officials through the bewildering inventory of rules and requirements.

Even the process of applying for a grant may represent a distortion of local priorities. In winning Federal funds, State and local authorities effectively tie their own hands because of the matching funds principle behind most grant-in-aid programs. A State or locality which is successful at obtaining Federal grants soon finds that dollars from Washington can limit the scope and number of projects they would like to initiate on their own.

It is time to return some of the money this Nation's citizens send each year to Washington back to their own State and local governments without the usual restrictive conditions attached. It is time to let the people themselves determine how their hard-earned tax dollars should be put to work at the State and local level.

How this new money will be distributed to the States and localities is the critical element in the consideration of the legislation now before us and the issue which demands the Senate's most careful scrutiny.

I do not believe that anyone will argue against the fact that the rejuvenation of our deteriorating cities was one of the prime considerations in the development of the revenue-sharing concept. Yet the Senate Finance Committee has approved a bill which is only partly responsive to our urban problems. The committee's formula for making the initial allocation of the $5.3 billion pure revenue-sharing fund to the States—one-third State population, one-third State relative income, and one-third State general tax effort—is a conscious attempt to penalize those areas with the most explosive and expensive problems.

Even the most casual examination reveals that the committee's formula gives more of the $5.3 billion to those States which need it least and less to those States most in need.

I ask unanimous consent that a table comparing the amounts received of the $5.3 billion pure revenue-sharing fund under the House and Finance Committee formulas by three pairs of States with relatively equal population—one rural and one urban—be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

SELECTIVE COMPARISON OF DISTRIBUTION OF $5,300,000,000 "PURE" REVENUE-SHARING FUNDS TO PAIRS OF STATES OF RELATIVELY EQUAL POPULATION (1 RURAL, 1 URBAN) UNDER HOUSE AND FINANCE COMMITTEE VERSIONS

	Millions of dollars				Per capita		
	House	Finance Committee	Amount of change	Percent of change[1]	House	Finance Committee	Amount of change
Mississippi	46.0	99.6	+53.6	+116	20.75	44.93	+24.18
Connecticut	72.7	57.5	−15.2	−21	23.98	18.96	−5.02
North Dakota	12.0	21.7	+9.7	+81	19.42	35.11	+15.69
Delaware	17.3	12.9	−4.4	−25	31.57	23.54	−8.03
Alabama	80.2	127.6	+47.4	+59	23.31	37.05	+13.74
Maryland	117.5	94.8	−22.7	−19	29.96	24.17	−5.79

[1] The percent of change for millions of dollars and per capita is the same.

Mr. RIBICOFF. Even more dramatic evidence of the inequities contained in the committee's formula can be found by studying the per capita amounts local governments receive of the $5.3 billion and the relative role the $5.3 billion will play in each local government's budget.

For example, the average per capita grant to all the local governments in Oakland County, Mich., will be $5.67. In Hartford County, Conn., it will be higher, $14.61, but nowhere near the $30.37 and $32.12 received in Jackson County, Ark., and Acadia Parish, La., respectively.

These same revenue-sharing funds will account for 8.3 percent of the total local government income in Oakland County. Again, Hartford's share is slightly higher, 8.9 percent, but far from the 50-percent level found in the Arkansas and Louisiana localities.

It is true that the formula adopted by the committee for determining each locality's share of its State's allotment does aid cities relatively more than the House bill. That, however, does not compensate for the fact that in the total distribution of the $5.3 billion, urban States and their State governments get far less than their fair share. While the greatest burden of urbanization is obviously borne by municipal governments, we must also recognize that many urban-oriented services are provided by State governments.

The committee has made an attempt to rectify this situation by distributing the $1 billion supplemental social service grant program fund on the basis of urbanized population. By adding this money the committee can correctly claim that all but four States and the District of Columbia fare better under its bill than under the House version. It is easy to see why most States get more—the total fund has been increased by $1 billion. The committee's claim ignores the fact that while most State's total rises, the urban States do not receive as large a percentage of the entire fund as they would have under the House bill. For example, while Connecticut's total rises from $72.6 million to $75 million, its percentage of the total drops from 1.4 to 1.2 percent. The impact can be seen in other States as California's percentage drops from 11.5 to 10.2 percent, Ohio's from 4.3 to 3.8 percent, and Michigan's from 4.6 to 4.1 percent.

More important is the fact that there is no way the Finance Committee can guarantee that the final social service formula will be based solely on urbanization or that this new $1 billion fund will even be in the bill. By basing the distribution of the social service funds solely on urbanization the committee has admitted that its original formula was incomplete and unfair. It is however asking the urban States to now place all their eggs—or funds—in one basket.

I do not believe the Senators from the urban States can accept that logic for the risk is too great.

An example of the risk involved is the fact that the $5.3 billion "pure" revenue sharing fund is a direct appropriation of funds which would be guaranteed every year. The $1 billion social service fund, however, has only been authorized and must still go through the appropriations process. No one can say at this time how much, if any, of that $1 billion will be actually appropriated.

During his opening remarks on this bill the distinguished chairman of the Senate Finance Committee argued that the committee had significantly improved the House bill by eliminating the complex dual formula used for determining the distribution of funds to the States and localities and replacing it with a single formula. This was a step in the right direction. We should, however, take it one step further and eliminate the special social service formula and combine all four factors—population, relative income, tax effort, and urbanized population—into one formula for the entire $6.3 billion fund. We must guarantee that no matter what the final size of the fund each State will receive the same relative share.

I, therefore, introduce an amendment to base the distribution of the entire amount authorized by this bill on the following schedule: 30 percent tax effort, 30 percent relative income, 20 percent population, and 20 percent urbanized population. This formula would give the appropriate recognition to the many problems which led to the development of revenue-sharing legislation and would not penalize any single State or group of States.

I ask unanimous consent that a table detailing each State's share under my formula be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

State allocations under Ribicoff formula

[In millions of dollars]

Alabama	103.9
Alaska	6.9
Arizona	58.0
Arkansas	51.7
California	723.2
Colorado	68.7
Connecticut	91.4
Delaware	17.0
District of Columbia	25.2
Florida	192.2
Georgia	124.1
Hawaii	27.1
Idaho	19.5
Illinois	355.3
Indiana	138.6
Iowa	81.9
Kansas	61.7
Kentucky	87.6
Louisiana	110.3
Maine	29.0
Maryland	112.8
Massachusetts	203.5
Michigan	275.3
Minnesota	116.6
Mississippi	68.0
Missouri	129.1
Montana	20.2
Nebraska	44.1
Nevada	15.8
New Hampshire	17.7
New Jersey	224.3
New Mexico	29.6
New York	723.2
North Carolina	135.5
North Dakota	18.3
Ohio	279.7
Oklahoma	67.4
Oregon	63.0
Pennsylvania	348.4
Rhode Island	30.2
South Carolina	73.7
South Dakota	21.4

Tennessee	104.6
Texas	316.9
Utah	34.7
Vermont	14.5
Virginia	127.3
Washington	105.8
West Virginia	47.9
Wisconsin	150.6
Wyoming	9.5

Mr. RIBICOFF. No formula for apportioning revenue-sharing funds will satisfy everyone, but the formula I propose today would fairly allocate money to the States on the combined basis of relative populations, income, general tax effort, and degree of urbanization. I urge the Senate to adopt this amendment.

The PRESIDING OFFICER. The amendment will be received and printed, and will lie on the table.

PROGRAM

Mr. GRIFFIN. Mr. President, may I be recognized?

The PRESIDING OFFICER. The Senator from Michigan is recognized.

Mr. GRIFFIN. Mr. President, I seek recognition for the purpose of asking the distinguished majority leader if he can give us any information about the schedule for the rest of the day and beyond.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. GRIFFIN. Mr. President, I yield to the distinguished majority leader.

Mr. MANSFIELD. Mr. President, may I say in response to the question raised by the distinguished acting Republican leader that, as he is aware, the pending business is revenue sharing, which is on the second track.

Beginning tomorrow, after the conclusion of the morning business, we will then return to the unfinished business, the interim agreement on offensive weapons.

It is my understanding that the prospects for finishing the consideration of the interim agreement before the end of the week are good, and that it might be possible—and I hope that the Senator from Tennessee (Mr. BAKER) and the Senator from New York (Mr. JAVITS) are here, and I note that they are—to attempt a unanimous consent agreement on my amendment rather than on the whole proposal.

I hope that will be satisfactory. It is my understanding that my amendment is the pending amendment to the unfinished business, the Interim Agreement. And as far as I am concerned, I am willing to agree to a 20-minute limitation, with 18 minutes to the other side and 2 minutes to me, because it is a simple amendment. That might be the start.

Then, of course, we hope to finish both the Interim Agreement on Offensive Weapons and the revenue-sharing bill this week.

Then we will have, as has been announced previously, the military construction appropriations, the military procurement appropriations, and foreign aid measures.

I understand that there may be a hearing in the Foreign Relations Committee this week on the foreign aid bill. Am I correct in that?

Mr. FULBRIGHT. Mr. President, we have a meeting scheduled. I was not aware of the plan on the Interim Agreement measure, which is agreeable to me. We do have an executive committee meeting scheduled.

Mr. MANSFIELD. We will then have H.R. 1, the welfare proposal, which I understand is on the verge of being reported. I think that we should take it up and dispose of it in one way or the other.

We will then have the supplemental appropriations measure, the debt limit extension, various conference reports, also such matters as S. 632, the Water Resources Planning Act, and other measures on the calendar which have already been brought to the attention of the Senate.

I would hope that, to keep things going, amendments will be offered to the revenue-sharing bill this afternoon and that there will be further votes. However, I do admit in all candor that I know of no amendments at the present time to the bill.

Mr. GRIFFIN. Mr. President, I thank the majority leader.

Mr. BAKER. Mr. President, will the Senator yield?

Mr. MANSFIELD. I yield to the Senator from Tennessee.

Mr. BAKER. Mr. President, I notice in the list of possible bills and proposals to be considered by the Senate that no mention was made of the House-passed antibusing bill.

Mr. MANSFIELD. The Senator is correct. It is not on the calendar.

Mr. BAKER. Mr. President, does the distinguished majority leader have any information that he might give us as to when we might proceed to the consideration of that matter?

Mr. MANSFIELD. I am sorry. I can give no information at this time. However, after discussing the matter with the distinguished Republican leader, the Senator from Pennsylvania (Mr. SCOTT), I will then be in a better position to answer the question.

Mr. BAKER. I thank the Senator.

Mr. MANSFIELD. Mr. President, it would also be anticipated, if it is agreeable with the distinguished Republican leader, that if time and circumstances allow, the Senate will consider S. 3531, the so-called winter Olympic games bill.

Mr. GRIFFIN. Mr. President, I thank the distinguished majority leader.

ORDER FOR ADJOURNMENT TO 10 A.M.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in adjournment until 10 o'clock a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR TRANSACTION OF ROUTINE MORNING BUSINESS TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that after the two leaders have been recognized tomorrow under the standing order, there be a period for the transaction of routine morning business for not to exceed 30 minutes, with statements limited therein to 3 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER TO LAY UNFINISHED BUSINESS BEFORE THE SENATE TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that at the conclusion of the routine morning business on tomorrow, the Chair lay before the Senate the unfinished business, Senate Joint Resolution 241.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER TO CALL UP H.R. 14370, REVENUE-SHARING BILL, TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that, at no later than 2 o'clock p.m. tomorrow, it be in order for the majority leader or his designee to call up H.R. 14370, the revenue-sharing bill, and make it the second track item, and that at such time as the majority leader or his designee call up H.R. 14370 for consideration, the unfinished business, Senate Joint Resolution 241—the Interim Agreement—be laid aside temporarily and remain in a temporarily laid aside status until the close of business tomorrow or until the disposition of H.R. 14370, whichever is the earlier.

The PRESIDING OFFICER. Without objection, it is so ordered.

QUORUM CALL

Mr. ROBERT C. BYRD. Mr. President I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. ROBERT C. BYRD. Mr. President, the program for tomorrow is as follows:

The Senate will convene at 10 o'clock a.m. After the two leaders have been recognized under the standing order, there will be a period for the transaction of routine morning business of not to exceed 30 minutes, with statements therein limited to 3 minutes, at the conclusion of which the Chair will lay before the Senate the unfinished business, Senate Joint Resolution 241, authorizing the President to approve an interim agreement between the United States and the Union of Soviet Socialist Republics.

The pending question will be on agreeing to the amendment (No. 1434) of the distinguished Senator from Montana (Mr. MANSFIELD). No time limitation agreement has been entered into with respect to the interim agreement or any amendment to be proposed thereto. However, it is hoped by the leadership that progress can be made tomorrow with respect to the Mansfield amendment and other amendments, and that some agreement may soon be entered into with respect to the disposition of the joint resolution.

At no later than 2 p.m. tomorrow, the majority leader or his designee will lay aside the unfinished business, and the Senate will then resume consideration of the so-called second track item, H.R. 14730, an act to provide payments to localities for high-priority expenditures, to encourage the States to supplement their revenue sources, and to authorize Federal collection of State individual income taxes. No agreement has been entered into with respect to time on that bill or amendments thereto.

Rollcall votes may be expected tomorrow, and I would anticipate such.

ADJOURNMENT UNTIL 10 A.M.

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the previous order, that the Senate stand in adjournment until 10 a.m. tomorrow.

The motion was agreed to; and at 4:49 p.m. the Senate adjourned until tomorrow, Wednesday, September 6, 1972, at 10 a.m.

NOMINATIONS

HOUSE OF REPRESENTATIVES—*Tuesday, September 5, 1972*

The House met at 12 o'clock noon.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

Humble yourselves in the sight of the Lord and He will lift you up.—James 4: 10.

O God, our Father, whose love never lets us go, whose strength never lets us down, and whose light follows us all our days: in the glory of a new dawn grant unto us the spirit of understanding and courage as we face the tasks before us. May we now and always seek the highest good for our Nation and for all our people.

In these difficult days and trying times let not any shadow of defeat or discouragement depress our minds but may Thy spirit lift us up, hold us steady and make us steadfast that we may ever do justly, love mercy, and walk humbly with Thee.

In the spirit of the Master we pray. Amen.

THE JOURNAL

The **SPEAKER**. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Arrington, one of its clerks, announced that the Senate had passed with an amendment in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 7375. An act to amend the statutory ceiling on salaries payable to U.S. magistrates.

The message also announced that the Senate had passed bills and a joint resolution of the following titles, in which the concurrence of the House is requested:

S. 173. An act for the relief of Mrs. Naoyo Campbell;

S. 2483. An act to provide a national program in order to make the international metric system the predominant but not exclusive system of measurement in the United States and to provide for converting to the general use of such system within 10 years;

S. 2741. An act to amend the Act of September 7, 1957, authorizing aircraft loan guarantees, in order to expand the program pursuant to such Act;

S. 2816. An act for the relief of Mary Danos Nayak;

S. 3252. An act for the relief of Renato M. Dioquino;

S. 3583. An act for the relief of Gerald Vincent Bull;

S. 3671. An act to amend the Administrative Conference Act;

S. 3835. An act for the relief of Reynaldo Canlas Baecher;

S. 3858. An act to amend the Public Health Service Act to improve the program of medical assistance to areas with health manpower shortages, and for other purposes; and

S.J. Res. 202. Joint resolution to express the sense of Congress that a White House Conference on the Handicapped be called by the President of the United States.

RESIGNATION AS A MEMBER OF THE HOUSE OF REPRESENTATIVES

The SPEAKER laid before the House the following communication:

WASHINGTON, D.C.
August 25, 1972.

His Excellency A. LINWOOD HOLTON,
Governor of Virginia,
State Capitol,
Richmond, Va.

SIR: I hereby tender to you my resignation as a member of the House of Representatives in the Congress of the United States from the Sixth Congressional District of Virginia, effective at the close of business on Tuesday, August 29, 1972.

Sincerely,

RICHARD H. POFF.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, D.C.
August 31, 1972.

Hon. CARL ALBERT,
The Speaker,
House of Representatives.

DEAR MR. SPEAKER: I have the honor to transmit herewith a sealed envelope from the White House, received in the Clerk's Office at 12:55 p.m. on Thursday, August 31, 1972, and said to contain a Message from the President concerning federal pay comparability.

With kinds regards, I am,

Sincerely,

W. PAT JENNINGS,
Clerk, House of Representatives.
By W. RAYMOND COLLEY.

FEDERAL PAY COMPARABILITY—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 92–439)

The SPEAKER laid before the House the following message from the President of the United States; which was read and referred to the Committee on Post Office and Civil Service, and ordered to be printed:

To the Congress of the United States:

As we approach the October date on which pay rates for Federal employees under the statutory pay systems would normally be adjusted, I wish to advise the Congress that I will recommend a pay increase for Federal employees effective January 1, 1973. I believe it is appropriate to point out that section 3 of Public Law 92–210, the Economic Stabilization Act Amendments of 1971, requires that this adjustment this year be delayed until January 1973.

The pay raise required by section 3 of the Economic Stabilization Act Amendments was limited by the terms of the law to the guideline that the Pay Board has established for pay increases throughout the economy, 5.5 percent a year. Clearly it was the intent of this law to see that Federal employees would be treated in a comparable manner with private enterprise employees under the Economic Stabilization Program. In recognition of this intent, on January 11, 1972, I directed that Federal wage employees should also have their pay increase limited by the Pay Board guidelines.

The necessary comparability studies have been completed and, under the Federal Pay Comparability Act of 1970, I will recommend that the increase necessary to achieve comparability, be paid, starting January 1, 1973, the first date our employees will be eligible to receive an increase under the Economic Stabilization Act. Our employees received their full 5.5 percent annual increase last January, and therefore their next increase cannot be effective until January 1, 1973. The provisions of Public Law 92–210 preclude submission of an alternative plan under section 5305(c)(1) of title 5, United States Code.

I believe it is important to express once again my strong personal support for the principle that our Nation's public servants should receive pay that is comparable with pay in private industry. For our Government to operate efficiently in these increasingly complex and demanding times, we must have a civil service of the highest caliber, and to recruit and retain these necessary employees, we must offer them a fair and just wage. Nevertheless, in our efforts to stabilize and revitalize our Nation's economy, it is also appropriate that they be treated the same as employees in the private sector, who are also able to receive such an increase no more frequently than once every 12 months.

RICHARD NIXON.

THE WHITE HOUSE, *August 31, 1972.*

PRIVATE CALENDAR

The SPEAKER. This is the day for the call of the Private Calendar. The Clerk will call the first individual bill on the Private Calendar.

MRS. ROSE THOMAS

The Clerk called the bill (H.R. 2067) for the relief of Mrs. Rose Thomas.

Mr. GROSS. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

MARIA LUIGIA DI GIORGIO

The Clerk called the bill (H.R. 2070) for the relief of Maria Luigia Di Giorgio.

Mr. GROSS. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

MRS. ANNA MARIA BALDINI DELA ROSA

The Clerk called the bill (H.R. 3713) for the relief of Mrs. Anna Maria Baldini Dela Rosa.

Mr. BROWN of Michigan. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

CHARLES COLBATH

The Clerk called the bill (H.R. 4310) for the relief of Charles Colbath.

Mr. HALL. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

MRS CARMEN PRADO

The Clerk called the bill (H.R. 6108) for the relief of Mrs. Carmen Prado.

Mr. GROSS. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

RENE PAULO ROHDEN-SOBRINHO

The Clerk called the bill (H.R. 5181) for the relief of Rene Paulo Rohden-Sobrinho.

Mr. HALL. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

CATHERINE E. SPELL

The Clerk called the bill (H.R. 7312) for the relief of Catherine E. Spell.

Mr. HALL. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

DONALD L. BULMER

The Clerk called the bill (H.R. 1994) for the relief of Donald L. Bulmer.

Mr. GROSS. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

MRS. MARINA MUNOZ DE WYSS (NEE LOPEZ)

The Clerk called the bill (H.R. 5579) for the relief of Mrs. Marina Munoz de Wyss (nee Lopez).

Mr. HALL. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

CARMEN MARIA PENA-GARCANO

The Clerk called the bill (H.R. 6342) for the relief of Carmen Maria Pena-Garcano.

Mr. HALL. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

WILLIAM H. NICKERSON

The Clerk called the bill (H.R. 4064) for the relief of William H. Nickerson.

Mr. HALL. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

MARGARIDA ALDORA CORREIA DOS REIS

The Clerk called the bill (H.R. 6504) for the relief of Margarida Aldora Correia dos Reis.

Mr. BROWN of Michigan. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

EMILIA RUFFOLO

The Clerk called the bill (H.R. 10142) for the relief of Emilia Ruffolo.

Mr. GROSS. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

DONALD P. LARIVIERE

The Clerk called the bill (H.R. 8952) for the relief of Donald P. Lariviere.

Mr. BROWN of Michigan. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

MR. AND MRS. JOHN F. FUENTES

The Clerk called the bill (H.R. 11045) for the relief of Mr. and Mrs. John F. Fuentes.

Mr. HALL. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

ARLINE LOADER AND MAURICE LOADER

The Clerk called the bill (S. 341) for the relief of Arline Loader and Maurice Loader.

Mr. HALL. Mr. Speaker, I ask unanimous consent that the bill will be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

FREDI ROBERT DREILICH

The Clerk called the bill (H.R. 2725) for the relief of Fredi Robert Dreilich.

Mr. BROWN of Michigan. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

DENNIS YIANTOS

The Clerk called the bill (S. 65) for the relief of Dennis Yiantos.

Mr. GROSS. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

WILLIAM JOHN WEST

The Clerk called the bill (S. 2575) for the relief of William John West.

Mr. BROWN of Michigan. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

MRS. GAVINA A. PALACAY

The Clerk called the bill (H.R. 4646) for the relief of Mrs. Gavina A. Palacay.

Mr. HALL. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

ANKA KOSANOVIC

The Clerk called the bill (H.R. 1777) for the relief of Anka Kosanovic.

Mr. HALL. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

CAPT. RONALD W. GROUT, U.S. AIR FORCE

The Clerk called the bill (H.R. 5668) for the relief of Capt. Ronald W. Grout, U.S. Air Force.

Mr. BROWN of Michigan. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

HAROLD J. SEABORG

The Clerk called the bill (H.R. 6467) for the relief of Harold J. Seaborg.

There being no objection, the Clerk read the bill as follows:

H.R. 6467

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of Commerce is authorized and directed to advance Harold J. Seaborg, captain, National Oceanic and Atmospheric Administration (retired), of Edmonds, Washington, to the rank of rear admiral (lower half) on the retired list of the National Oceanic and Atmospheric Administration.

SEC. 2. (a) The Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the said Harold J. Seaborg the sum certified to him by the Secretary of Commerce as being an amount equal to the difference between (1) the retired pay which the said Harold J. Seaborg would have been entitled to receive during the period beginning January 1, 1971, and ending on the effective date of his advancement pursuant to the first section of this Act if during such period he had held the retired rank of rear admiral (lower half), and (2) the retired pay he actually received during such period.

(b) No part of the amount appropriated in subsection (a) of this section in excess of 10 per centum thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this subsection shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

RESCUE MISSION ALLIANCE OF SYRACUSE

The Clerk called the bill (H.R. 10552) for the relief of the Rescue Mission Alliance of Syracuse.

Mr. **BROWN** of Michigan. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The **SPEAKER**. Is there objection to the request of the gentleman from Michigan?

There was no objection.

DONALD W. WOTRING

The Clerk called the bill (H.R. 11047) for the relief of Donald W. Wotring.

There being no objection, the Clerk read the bill as follows:

H.R. 11047

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Corporal Donald W. Wotring, United States Marine Corps, retired, service number 2140988, of Savannah, Georgia, is relieved of liability to the United States in the amount of $688.26, representing overpayments of active duty pay for the period beginning July 1, 1967, and ending December 31, 1967, received by him as a result of administrative error. In the audit and settlement of the accounts of any certifying or disbursing officer of the United States, credit shall be given for amounts for which liability is relieved by this section.

SEC. 2. The Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Donald W. Wotring an amount equal to the aggregate of the amounts paid by him, or withheld from sums otherwise due him, with respect to the indebtedness to the United States specified in the first section of this Act.

(b) No part of the amount appropriated in subsection (a) of this section shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this subsection shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CPL. BOBBY R. MULLINS

The Clerk called the bill (H.R. 11629) for the relief of Cpl. Bobby R. Mullins.

There being no objection, the Clerk read the bill as follows:

H.R. 11629

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled That Corporal Bobby R. Mullins, United States Marine Corps, retired, of Fairborn, Ohio, who suffered the loss of both legs as the result of hostile action in Vietnam, is relieved of liability to the United States in the amount of $430.86, which amount represents the total of overpayments paid to him prior to his retirement on May 28, 1968, such payments having been made as a result of administrative error which occurred without fault on his part and without his knowledge. In the audit and settlement of the accounts of any certifying or disbursing officer of the United States, credit shall be given for the amounts for which liability is relieved by this section.

SEC. 2. (a) The Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the said Bobby R. Mullins, an amount equal to the aggregate of any amounts already paid by him, or withheld of any sums otherwise due him, with respect to the indebtedness to the United States specified in the first section of this Act.

(b) No part of the amount appropriated in subsection (a) of this section shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this section shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendments:

Page 1, line 7: Strike "$430.86, which amount represents" and insert "$341.49, representing".

Page 1, line 8: Strike "May 28, 1968" and insert "May 30, 1968".

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

1ST LT. THOMAS J. TREMBA

The Clerk called the bill (H.R. 11749) for the relief of 1st Lt. Thomas J. Tremba, U.S. Army.

Mr. **BROWN** of Michigan. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The **SPEAKER**. Is there objection to the request of the gentleman from Michigan?

There was no objection.

CLAUDE V. ALCORN AND 21 OTHERS

The Clerk called the bill (H.R. 11814) for the relief of Claude V. Alcorn and 21 others.

There being no objection, the Clerk read the bill as follows:

H.R. 11814

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That:

SEC. 2. The transportation of Claude V. Alcorn, Adrian C. Almond, Aubrey V. Ansell, Thomas Armstrong, Gary A. Bailey, Ronald W. Bradshaw, Harry M. Braudrick, John B. Brewington, Fructoso D. Cabanela, Thurston C. Davis, Donald W. Dodge, Marcus L. Hyde, Junior, Peter E. Johnson, James L. Jones, William G. King, Henry E. Mowbray, Jack L. Norris, Charles Ricketts, Junior, Gerald L. Sellers, Bobby L. Templetton, Lee M. Tillman, or K. C. West to Seattle on the NOAA vessels "Davidson" in September 1967, "Oceanographer" in December 1967, "Fairweather" in March 1968, or "Rainier" in May 1968, shall not be deemed transportation at Government expense in connection with a change of permanent duty station for the purpose of computing their entitlement to travel expenses for such change of permanent duty station under the provisions of section 5724 of title 5, United States Code and applicable regulations. The travel expenses of each of the above-named persons in connection with their transfer of duty station to Seattle in 1967 or 1968 shall, upon a request made within ninety days of the enactment of this legislation, be computed or recomputed in accordance with appropriate Office of Management and Budget regulations: *Provided, however,* That in making such computation or recomputation, transportation on board the vessels at the times referred to in this section shall be disregarded: *And provided further,* That if any of the persons named herein has already received payment for such travel, that amount shall be deducted from the recomputed travel expenses and any remainder paid or credited to the employee.

SEC. 3. No part of the amount appropriated in subsection (a) of this section in excess of 10 per centum thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this subsection shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendments:

Page 2, lines 13 and 14: Strike "in accordance with appropriate Office of Management and Budget regulations" and insert "to provide payment of mileage traveled in privately owned vehicles at a rate not to exceed 12 cents per mile and per diem at a rate not to exceed $16 per day for actual travel time between duty stations not to exceed 8½ days".

Page 2, line 23: Strike "in excess of 10 per centum thereof".

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ANNE M. SACK

The Clerk called the bill (H.R. 12903) for the relief of Anne M. Sack.

There being no objection, the Clerk read the bill as follows:

H.R. 12903

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for purposes of section 8341 of title 5, United States Code, Anne M. Sack, of Cincinnati, Ohio, shall be considered the widow of the late Robert A. Sack (CSA 1113671), notwithstanding the period of legal separation between their first and second marriages to each other.

With the following committee amendment:

Page 1, after line 7, add the following:

"SEC. 2. The annuity authorized by this Act shall be payable on and after January 3, 1972."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ROBERT GIBBONS

The Clerk called the bill (H.R. 11631) for the relief of Robert Gibbons.

There being no objection, the Clerk read the bill as follows:

H.R. 11631

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $454.08 to Robert Gibbons in full settlement of his claim against the Government for reimbursement for loss of his household effects and personal property incident to a shipment from Phoenix, Arizona, to Bagdad, Iraq, in connection with his assignment in Iraq pursuant to a grant agreement administered by the United States Information Agency. No part of the amount appropriated in this Act shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this Act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendment:

Page 1, line 5, strike "$454.08" and insert "374.30".

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

OSSIE EMMONS AND OTHERS

The Clerk called the bill (H.R. 5416) for the relief of Ossie Emmons and others.

There being no objection, the Clerk read the bill as follows:

H.R. 5416

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to each of the following named persons the amounts set forth opposite their respective names in full settlement of their claims against the United States for losses and damages they suffered due to the flooding of their lands due to the release of waters of the Wappapello Reservoir on or about September 25, 1965, without warning or notice which would have enabled them to take steps to avoid or minimize losses from the flooding caused by that release:

Tenant	Landlord	Affected acres	Tenants share	Landlords share	Farm numbers
Ossie Emmons, Dudley, Mo	A. R. Pierce, Clarkton, Mo	150	$5,125.00	$2,122.50	B-844

SEC. 2. No part of each amount appropriated in this Act in excess of 15 per centum thereof shall be paid or delivered or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this Act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendments:

Page 2, after line 2, opposite the name "Robert Huber", under "Tenants share" strike "2,500.00" and insert "1,350.00".

Page 2, line 4, strike "15" and insert "10".

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

SARA B. GARNER

The Clerk called the bill (H.R. 12099) for the relief of Sara B. Garner.

There being no objection, the Clerk read the bill as follows:

H.R. 12099

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That on such terms as it deems just, the United States Postal Service is authorized to compromise, release, or discharge in whole or in part the liability of Sara B. Garner, Postmaster at the Ryland, Alabama, post office, for the loss resulting from a burglary on February 7, 1971, at that post office.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

RICHARD L. KRZYZANOWSKI

The Clerk called the bill (H.R. 15865) for the relief of Richard L. Krzyzanowski.

There being no objection, the Clerk read the bill as follows:

H.R. 15865

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of the Immigration and Nationality Act, Richard L. Krzyzanowski shall be held and considered to have been lawfully admitted to the United States for permanent residence as of February 13, 1966, upon payment of the required visa fees.

With the following committee amendment:

On page 1, lines 6 and 7, after the date "February 13, 1966" strike out the following: ", upon payment of the required visa fees".

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

The SPEAKER. This concludes the call of the Private Calendar.

OLYMPIC TRAGEDY

(Mrs. ABZUG asked and was given permission to address the House for 1 minute, to revise and extend her remarks and include extraneous matter.

Mrs. ABZUG. Mr. Speaker, two developments during the brief period of our recess have given pause to civilized men and women the world over. One to which I shall address myself later in the day, is the Soviet Union's demands that Jews who wish to emigrate must be ransomed. The second, which occurred only this morning in Munich, was the murder of two members of the Israeli Olympic team and the kidnaping of 14 others by a group of Arab guerrillas.

This act can only be described as the work of mindless and inhumane fanatics, and our horror at it is heightened by the fact that it intrudes upon the spirit of international cooperation which surrounds and pervades the Olympic Games. I have today cabled the International Olympic Committee asking for suspension of the games until the hostages are released and the danger has passed and I am pleased that they have acted to do so, at least for the present.

We who sit here in Congress, and those who sit downtown at the White House, can and must do more than ask others to act. It is extremely difficult for the United States to move against these terrorists directly, but we certainly can move against those nations which serve as their bases of operations and give them aid and comfort.

We can cut off direct loans and grants to them, especially those of a military character, under our foreign aid program.

We can prohibit their commerce from entering the United States, whether by air, sea, or land.

We can prohibit American-owned aircraft and ships from landing in these countries.

We can bring them before the United Nations and ask it to declare sanctions or embargoes against them.

If this country really has a commitment to world peace and tranquillity, we can demonstrate it by moving economically against those nations which harbor and countenance such international outlaws as those who perpetrated today's tragic events in Munich.

FURTHER OUTRAGES BY ARAB TERRORISTS

(Mr. WOLFF asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WOLFF. Mr. Speaker, I wish to express my sense of outrage over the killings in Munich of two Israeli athletes by Arab terrorists. It seems incredible that hate and hostility, so alien to the spirit of the Olympic games, could invade the very village where the great athletes of the world have been quartered in such peaceful relations. Even now as I speak these same Arab terrorists, not content with the tragedy they have inflicted upon the innocent, threatened to kill more members of the Israeli team unless outrageous conditions for releasing their fellow terrorists are met.

I cannot help but wonder, Mr. Speaker, whether the Arab world will evidence in this situation some degree of conscience. They have often in the past gloried in the mindless slayings perpetrated by their own terrorists, but surely now with the weight of world opinion arrayed against them, they will take some steps to call a halt to these outrageous acts. For their failure to do so will clearly indicate that they have no sense of decency, no sense of humanity, no respect for peace.

We call upon the Arab world to take positive action to bring about a release of the athletes held hostage.

OUTRAGEOUS ATTACKS BY ARAB TERRORISTS

(Mr. BIAGGI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BIAGGI. Mr. Speaker, the terrorist attack on the quarters of the Israeli Olympic competitors and the holding of hostages is an outrage to the entire world community. The Olympics have long been a neutral ground for competition among the world's athletes. These Arab criminals have turned it into a political battleground.

The United Nations should take immediate action to end this affront. Past inaction by the UN has given a green light to the Arab terrorists to continue to disrupt world peace and threaten the lives and safety of people virtually everywhere. Instead of being all too quick to pass resolutions condemning Israel as they have done in the past, the UN should be taking a strong stand against Arab intransigence and Arab support for such emissaries of violence as are present in Munich today.

West German Chancellor Willy Brant has shown his own personal courage in taking charge of the situation himself. Since the Olympics are an international activity, UN Secretary-General Kurt Waldheim also should take whatever steps are necessary to release the hostages.

How much longer will the world community have to bear these outrages? Both the United States and Israel have offered fair peace plans to settle the Middle Eastern situation. The Arab States supported by the Soviet Union and the UN have continued their conspiracy of silence and terrorism. Terrorist attacks will never be brought to an end until the world community joins in condemning the Arab States' support for these hoodlums and for an atmosphere of war in which they operate.

CONDEMNATION OF OLYMPIC TRAGEDY

(Mr. PEYSER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PEYSER. Mr. Speaker, I have spoken this morning with our Ambassador to the United Nations, George Bush. I have asked him to introduce a motion of censure against the Arab nations of the world who have yet to speak out and condemn the vicious killers who have already taken the lives of two young Israelis taking part in the Olympics in Munich. The gathering together of young people from all nations to take part in this great athletic competition has always been looked on as a way of bringing nations together and creating a common area of understanding in the world. Actions such as the ones that are taking place in the Olympic Village in Munich, endanger the whole future of the Olympics. It is my hope that we here in Congress will also condemn this horrible incident.

SCHOOL BUSING

(Mr. BROOMFIELD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BROOMFIELD. Mr. Speaker, despite the repeated actions of this body in expressing its opposition to forced school busing, thousands of school children are returning to classes this week either on buses or under the pending threat of court-ordered busing.

Just last week we had new evidence of the courts misreading of the will and intent of the Congress in a busing case in Augusta, Georgia. Even in the Detroit metropolitan area where the moratorium bill which I sponsored has delayed massive cross-district busing, the courts seem determined to press on until they can find some new means of justifying such an order.

As the author of the Broomfield amendment to delay implementation of busing until appeals have been exhausted and as one who worked hard for passage of the Equal Education Opportunities Act just a few weeks ago, I am frankly shocked and dismayed.

For all of these reasons, Mr. Speaker, I have signed and placed at the desk today a motion to discharge H.R. 13916, the President's busing moratorium bill from further consideration by the Judiciary Committee. This measure establishes a moratorium on new busing orders until July of 1973 or such time as the Equal Education Opportunities Act is signed into law.

I urge all of my colleagues to give this measure their careful consideration and invite them to join me in this effort to bring an important antibusing measure to the floor for a vote as soon as possible.

While H.R. 13916 is designed to expire on the passage of the Equal Education Opportunities Act, we all know that measure faces, at best, a rocky road in the other body. Passage by the Senate is by no means assured.

Keeping this sobering political fact in mind, and realizing that recent court pronouncements on antibusing legislation have ignored the clear and obvious intent of Congress, I suggest that it is vitally important that H.R. 13916 be brought up for a vote.

It will buy valuable time for this Congress, and if necessary, the Congress that convenes after the fall elections to get to the task of legislating an end, once and for all, to forced busing.

OUTRAGE COMMITTED BY ARAB TERRORISTS

(Mr. KUYKENDALL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KUYKENDALL. Mr. Speaker, the Olympic games have been suspended for 24 hours due to the outrage being committed against the Israeli Olympic team.

Mr. Speaker, I think the fanatics operating throughout the world under the guise "Palestinian Liberation" have forcibly committed the ultimate outrage. There have been previous instances such as the Lod Airport massacre where more people have been killed and endangered; however, never have these international bandits so defied the worldwide community of civilized nations.

I wonder how we would feel, Mr. Speaker, if a group of international bandits were holding our Olympic team as hostages. And particularly since two of our allies, namely, England and Germany, are reported to be allowing offices of two bandit organizations to be operating openly in Munich and London.

It has been reported that the Popular Front for Liberation of Palestine, who have taken credit for the hijacking and bombing of aircraft 2 years ago, has an office operating freely in London and that the Black September Group, who claims credit not only for the present outrage but for the Lod Airport massacre, are operating openly and freely in Munich. I think that it is high time that all of these groups that are so freely breaking international law be placed in the same category as aircraft hijackers and any country allowing them sanctuary be boycotted by all civilized countries.

MRS. JULIA RIVERA VINCENTY

(Mr. CÓRDOVA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CÓRDOVA. Mr. Speaker, I am proud to call to your attention the announcement by the President of his intention to designate a distinguished Puerto Rican, Mrs. Julia Rivera Vincenty, as an alternate member of the U.S. delegation to the General Assembly of the United Nations.

Mrs. Vincenty, our secretary of labor and the daughter of one of our great labor leaders, is a woman of great talent and dedication. Her identification with the cause of the working man has helped her perform in an outstanding manner as the secretary of labor in Puerto Rico. Her background and ability, including the cultural ties with Latin America which she shares, along with all of us in Puerto Rico and with millions on the mainland, will be a positive asset to the United States in the difficult task of maintaining a meaningful dialog with other peoples in the assembly of the nations of the world. The President is to be commended on an excellent choice.

THE SUSPENSION OF THE OLYMPIC GAMES

(Mr. GERALD R. FORD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GERALD R. FORD. Mr. Speaker, the dastardly act perpetrated by the Arab guerrillas should be condemned throughout the world. Olympic officials took the only action they could in suspending the games for 24 hours, but world officials must take immediate remedial action against these cowardly criminals who have grievously sinned against humanity.

WORDS OF CONDEMNATION ARE NOT ENOUGH

(Mr. KOCH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KOCH. Mr. Speaker, today the world is witnessing another act of brutal terrorism. It is tragic that the Olympic spirit of good will and brotherhood has been marred by this act of barbarism and murder, but an even greater tragedy is that this act continues the series of brutalities that have been committed against the people of Israel. This assault against Israel's athletes will be condemned, but after it is over little will be done to stop the Arab terrorists that are left to roam the world and strike where they will.

Airplanes have been hijacked and destroyed, innocent passengers have been killed at Israel's Lod airport, and civilians have been injured in the streets of Jerusalem and Tel Aviv—all by Arab terrorists. Immediately after these atrocities there have been words of outrage by the nations of the world; and yet those countries that could take steps to stop the guerrillas refuse to acknowledge their responsibility, say nothing of acting to stop these unconscionable transgressions.

The Security Council refuses to condemn the Arab nations from which these terrorists operate. France refuses to acknowledge its responsibility for having allowed a plane destined for Lod airport to be loaded without security precautions. And in the instance of a more subtle form of brutality, many of the free nations of the world fail to condemn the Soviet Union for first denying its citizens the right of free emigration and then placing an unconscionable ransom on each individual wishing to leave.

Yes, Mr. Speaker, leaders of the world's nations condemn this latest act of terrorism, as one that transgresses the spirit of the Olympics but their exhortations are of little consequence for their protestations of today will be belied by their failure to act tomorrow.

THE SUSPENSION OF THE OLYMPIC GAMES

(Mr. BOGGS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BOGGS. Mr. Speaker, and Members of the House: I concur in the statements, very strong statements, that have been made here by the past several speakers with respect to what has happened in Munich. I was particularly impressed by the remarks made by the gentleman from New York (Mr. KOCH). Violence, unfortunately, is found in too many places in the world today, and despite the reliance that we have on the United Nations, and other peacekeeping organizations, we find very little performance in action against violent agitators anywhere.

This particular violence, because it affects the Olympic games, which have attracted international attention and in which many nations are participating, is brought more forcibly to the attention of the American people. Of course, the committee was absolutely right in susspending the Olympics until such time as this violence ceases.

However, I think more than that, Mr. Speaker, is the need to adopt international sanctions that will prevent and will punish violence of this nature all over the world, wherever practiced.

I have been surprised to see the reluctance on the part of some nations to subscribe to a treaty now being perfected, having to do with hijacking in the air throughout the world, and the return of those who engage in those practices.

Mr. Speaker, I concur in the remarks that have been made, but I also say, as the gentleman from New York said, that words are rather meaningless unless they are followed through with concrete action.

CONFERENCE REPORT ON H.R. 13089, ACCELERATED REFORESTATION OF NATIONAL FORESTS

Mr. FOLEY. Mr. Speaker, I call up the conference report on the bill (H.R. 13089) to provide for acceleration of programs for the planting of trees on national forest lands in need of reforestation, and for other purposes, and ask unanimous consent that the statement of the managers be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Washington?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of August 14, 1972.)

Mr. FOLEY. Mr. Speaker, I yield to the distinguished gentleman from Iowa (Mr. KYL), the author of the legislation, for the purpose of explaining the action of the conferees.

Mr. KYL. Mr. Speaker, I thank the gentleman from Washington for yielding.

Mr. Speaker, when this bill passed the House on May 3 of this year by a vote of 371 to 5, it was designed to establish a supplemental national reforestation fund. It did that by earmarking a portion of the $65 to $75 million of funds collected on import duties pursuant to section 32 of the act passed August 24, 1935. There is a great deal of discussion about the proper methods of forest management in the United States, but both Houses of the Congress know that if we do not plant trees to harvest in the future there will be none to harvest and therefore this reforestation is important. We are about 5 million acres behind in reforestation. We have additional millions of acres on which trees were never planted.

When the other body passed the bill unanimously, it amended by deleting all references to section 32 and calling for direct appropriation not to exceed $65 million annually.

There are two points worth noting. First of all, although the other body did delete any reference to section 32, under the existing law the Appropriations Committees of the two bodies can transfer funds from section 32 to other appropriations processes, and therefore it is still possible that section 32 funds can be transferred for reforestation.

The $65 million figure is realistic. The Forest Service can utilize that much money in trying to catch up and keep up with the reforestation problems. The House conferees receded. The conferees of both bodies insisted, in total agreement, that if we did not get adequate funding through this process, we would return again to some earmarking program so that we can move forward the programs which are deemed absolutely essential.

I recommend that the conference report be adopted.

Mr. FOLEY. Mr. Speaker, I do not desire to take extensive time but I do wish to point out, as has been indicated by the gentleman from Iowa, that it was the position of the conferees that they would like to have a reasonable time for the appropriation process to be permitted to function in an effort to provide adequate funds for the reforestation which this bill seeks to accomplish.

I direct the attention of the Members of the House to the conference report which indicates that the conferees have agreed to this conventional appropriation process with the clear understanding that this approach should first be tried for a reasonable period of time, and if the evidence indicates that the high priority needed for reforestation effort is not being made, a search for more direct financing methods will continue.

Mr. Speaker, I concur in the motion of the gentleman from Iowa that the conference report be adopted.

Mr. GOODLING. Mr. Speaker, I rise in strong support of H.R. 13089, legislation designed to set up a fund to promote reforestation in our National Forest System. I am a cosponsor of this legislation.

That reforestation is needed in our national forest system is evidenced by the fact that forestry experts estimate that our country is about 5 million acres behind in tree seeding and planting in our national forests.

Something should be done expeditiously to correct this situation, because the trees of our national forests are a valuable natural resource, serving many purposes. Some of these trees will lend a beauty to our American landscape, while others will make a wonderful contribution to the lumber supply that is vital to various phases of our construction industry.

H.R. 13089 is unique in that it would promote a sustained-yield forest management program. This would have the effect of gradually taking up the slack in our lax tree seeding and planting program of the present and establishing a dynamic program of reforestation that will keep us current and in tune with our needs of the future.

The legislation before us would implement a dynamic reforestation program by setting up a Supplemental National Forest Reforestation Fund. This fund would be supported through money which is now made available to carry out various programs popularly referred to as section 32 programs; that is, programs designed to encourage the exportation, consumption, and diversion of agricultural commodities. Funds obtained from imports serve as a guideline for money applied to these activities. In the case of the Supplemental National Forest Reforestation Fund, the amount of money directed to this fund would be equal to the gross receipts from duties under our custom laws on wood and paper and printed matter.

The approach used in H.R. 13089 for raising funds for reforestation is, I feel, superior to various other fund-raising approaches, for most of these are based on a base of timber sales, which involves timber cutting. H.R. 13089, however, gets away from the concept of stimulating the cutting of timber to obtain funds for reforestation practices and, in the process, encourages uniform rather than accelerated timber cutting.

The legislation also contains the beneficial feature of requiring the Secretary of Agriculture to report to the Congress with respect to the "scope of the total national forest reforestation needs, and a planned program for reforesting such lands, including a description of the extent to which funds authorized by this act are to be applied to the program." This would have the effect of providing the Congress with an accurate perspective on the needs for reforestation in our national forest system, along with keeping the funds generated by H.R. 13089 properly oriented in the reforestation program.

H.R. 13089 is constructive legislation. It deserves your support.

Mr. VANIK. Mr. Speaker, I opposed the passage of this legislation in the House on May 3. I feel I must oppose the passage of this conference report.

The bill, as it originally passed the House of Representatives, provided between $65 and $75 million per year for reforestation of national forest lands. This money was to have been supplied out of the section 32 funds, a provision which I objected to since there are several vital child feeding programs dependent on section 32 funds which, at the present time, are not being adequately funded. The conference committee dropped this provision, and now the money will be supplied out of direct appropriations.

I still object to this bill. It is a complete subsidy of the timber industry at taxpayer expense. It provides $65 million in the first year for timber replanting to repair the mistakes and failures of the timber industry to properly reforest cut-over lands. Why should the taxpayers of America pay to restore forests which were cut and ravaged to provide easy profits for the lumber industry. Reforestation should be a contractual liability of those who cut and spoil forest lands. This bill simply bails out the giant timber companies and saves them from the expense of attempting to restore the lands they cut.

On August 26, I received a very vivid description of the clear-cutting and logging practices which the Forest Service is permitting on some Western forests. Mrs. Virginia Aveni of Lyndhurst, Ohio, in my congressional district described some of the logging practices which she saw on her recent vacation to the Teton Forest area:

> August 24, 1972.
>
> Hon. Charles A. Vanik,
> *House of Representatives,*
> *Washington, D.C.*
>
> Dear Mr. Vanik: I hesitated to break into my vacation by driving down the road, only a mile or two away, from our house to look at the clearcutting on Teton Forest, but as the logging trucks were rolling past the house almost daily during the week, I finally broke down and drove up the Mosquito Creek logging road to survey the scene.
>
> On two occasions we followed two roads about fourteen or fifteen miles (six or seven miles on each road) and saw about a dozen swathes which have been cut in the last three or four years. There was no replanting in evidence on any of these areas, those freshly cut or several years old.
>
> A local lumberman told us that thousands of seedling pines had been bought (perhaps raised) in Idaho by the Forest Service, transplanted in the early spring when the snow was still deep at an elevation five thousand feet higher and naturally colder (the sap would have been flowing in the seedlings, of course), and consequently most of them had died! At any rate, we didn't even find them, though we were told we had driven past the transplanted area . . . and let me add that one does not drive over 15 or 20 miles an hour on those roads.
>
> The Mosquito Creek area has steep slopes, thin topsoil, and I'd say a significant amount of that is ending up in the creek and the Snake River in the spring. Isn't protection of the water shed part of the Forest Service's charge? Who is recording the run-off?
>
> Another area I observed is the Brooks Lake section of Shoshone Forest. A clear-cut strip from perhaps 100 feet to 300 feet wide and at least three miles long (we followed it that far on road and by foot before turning around) showed the same damage to an adjacent stream.
>
> These are the only two forests, and relatively small areas at that, which we saw. My neighbor, however, hiked in the Targhee Forest west of the Tetons and returned one afternoon to tell me it was the worst area "aesthetically" she had seen. She told me that they seemed to be cutting "at a terrific rate."
>
> A local geologist . . . described an area in the Wind River Indian Reservation where one can drive for half a day through a clear-cut.

The type of massive clear cutting described in this letter should not be permitted in the first place—and in the second place, the public should not be made to pay for the corrective reforestation. Some may say that this bill is a "conservation measure." It has a conservation effect—but the wrong persons are paying the cost. I am in favor of reforestation; I am for a ban on further clear cutting—but I am also in favor of having those who are responsible for this massive damage to our public lands pay for the repair of that damage.

Mr. DON H. CLAUSEN. Mr. Speaker, I rise to express once again my strong support for the creation of a positive and effective means to finance the reforestation requirements of our national forests.

I am pleased to be a cosponsor of this legislation with its prime mover, the distinguished gentleman from Iowa (Mr. Kyl). We have worked closely with other of our colleagues who are interested in and knowledgeable about the national reforestation problem.

While I must confess to having mixed feelings about the fact that we were unable to obtain the precise method of financing the accelerated reforestation program that was included in our original bill, I do consider this legislation a vital and significant step forward and, most importantly, formal congressional recognition of the need to increase the speed of our reforestation efforts.

Modern, scientific tree management practices can insure trees forever in a way that combines the utilization of forest products with recreational esthetic and ecological enhancement. However, foresighted management requires adequate funding support. The National Accelerated Reforestation Act can provide that funding level even though we face a 10-million acre backlog.

The benefits to be gained from a major reforestation program are great while the costs are relatively small. We must make this investment and the sooner, the better.

The SPEAKER. Without objection, the previous question is ordered on the conference report.

There was no objection.

The SPEAKER. The question is on the conference report.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. GERALD R. FORD. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members, and the Clerk will call the roll.

The question was taken; and there were—yeas 303, nays 1, not voting 127, as follows:

Mr. Seiberling with Mr. Dowdy.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Arrington, one of the clerks, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 12350) entitled "An act to provide for the continuation of programs authorized under the Economic Opportunity Act of 1964, and for other purposes."

GENERAL LEAVE

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to extend their remarks in the RECORD on the conference report just agreed to.

The SPEAKER. Is there objection to the request of the gentleman from Washington?

There was no objection.

PERSONAL EXPLANATION

Mr. DAVIS of South Carolina. Mr. Speaker, I entered the chamber just after the conclusion of the last rollcall.

Had I been present to answer my name, I would have voted "yea."

CONFERENCE REPORT ON H.R. 12350, ECONOMIC OPPORTUNITY AMENDMENTS OF 1972

Mr. PERKINS. Mr. Speaker, I call up the conference report on the bill (H.R. 12350) to provide for the continuation of programs authorized under the Economic Opportunity Act of 1964, and for other purposes, and ask unanimous consent that the statement of the managers be read in lieu of the report.

The Clerk read the title of the bill.

The **SPEAKER.** Is there objection to the request of the gentleman from Kentucky?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of August 18, 1972.)

Mr. PERKINS (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the statement be dispensed with.

The **SPEAKER.** Is there objection to the request of the gentleman from Kentucky?

There was no objection.

The **SPEAKER.** The gentleman from Kentucky is recognized for 30 minutes.

Mr. PERKINS. Mr. Speaker, it is my privilege to bring before the House today the conference report on H.R. 12350, the Economic Opportunity Amendments of 1972. This report has but one principal purpose, and that is to extend for an additional 3 years, until June 30, 1975, the basic provisions of the Economic Opportunity Act passed in 1964.

This is the fourth occasion that I have brought a conference report on economic opportunity legislation before you since becoming chairman of the Committee on Education and Labor. I ask myself, in the words of the old World War II slogan, "Is this trip necessary?"

This particular trip is necessary because the President on last December 9 vetoed the bill approved by the House in 1971. So we had to start the proceedings all over again this year.

The Committee on Education and Labor reported its bill on February 1, and on February 17, it was approved by the House by a vote of 234 to 127.

The conference report before us today authorizes the appropriation of $2,359,300,000 for fiscal 1973, and $2,448,000,000 for fiscal 1974, to carry out the purposes of the Economic Opportunity Act.

Subsequent to the President's veto of S. 2007 last December, both the House and Senate made an honest effort to meet his objections.

In his words:

> The most deeply flawed provision of this legislation is Title V, Child Development Programs.

We have met that objection, Mr. Speaker, by eliminating this section entirely. To make it perfectly clear, I will say again, there is no new child development program in the conference report before us today.

The President objected to the legislation passed last fall on the ground that it took away his flexibility to delegate OEO programs to other departments, and prevented him from spinning off successful and continuing programs to the service agencies.

The conference report contains no prohibition on the President's spinoff authority, and the conferees consider that objection as fully satisfied.

The veto message listed two objections to the title of the 1971 act dealing with the Legal Services Corporation. The conference report deletes the entire title, and provides for no change in the existing structure of the Legal Services program.

Mr. Speaker, these were the principal objections stated by the President in his December 10 veto message. More than half of that message dealt with the Child Development title which is no longer in the legislation.

I personally feel that the conference report is good legislation. And, if it does not go as far as I would like to have gone in some programs—the Job Corps and Headstart for instance—I recognize the need for accommodation and compromise in the legislative process.

The Senate and House conferees met in full and free discussion, and this report represents an earnest effort to reach agreement. It is a fair and reasonable agreement, and I unreservedly commend it to you.

I am pleased, Mr. Speaker, that it seems no longer required that we come before the House to defend the philosophy and the concept of the Economic Opportunity Act. Congress and the Nation have accepted it as just and right. Eight years ago, this was a near-revolutionary piece of legislation, dedicated to the proposition that, with a little help, poor people would work themselves out of poverty. The prime requirement was that the door of opportunity be opened.

Congress has tried to open the door. Unfortunately, the tide of inflation and demands for war spending have counttered our efforts in many instances. We simply have not been able to make the kind of spending effort necessary to accomplish the job fully. We still have a long way to go.

Only last month, on July 12, the Bureau of the Census confirmed this unhappy fact. The Bureau reported that the number of Americans in poverty remained essentially unchanged last year.

The number rose in 1970 for the first time in a decade. It had fallen every year from 1961 through 1969.

The Bureau reported that 25.6 million Americans were below the poverty level in March of 1971. The number was 25.4 million a year earlier. Naturally these figures are estimates, and are based on samplings of the population. The poverty level last year was established at an income level of $4,137 for a nonfarm family of four.

These are, of course, shameful figures. No one can take comfort or satisfaction from having 25.6 million of his fellow Americans in poverty. But in 1960, there were 39.8 million below the poverty threshold. We apparently have done something right, somewhere, even if it has not been enough.

Mr. Speaker, I intend to mention only a few of the ongoing programs dealt with by the conference report. I spoke at some length about the OEO programs last February when the bill was before the House. I do, however, want to comment on some of the major ones.

DEPARTMENT OF LABOR PROGRAMS

To carry out the work and training programs created by title I of the Economic Opportunity Act, the conference agreement authorizes the appropriation of $900 million for fiscal 1973 and $950 million for fiscal 1974.

These funds provide for the continued operation of the Neighborhood Youth Corps, a universally popular program.

It also provides funds for the continued operation of the Job Corps—an agency whose downgrading by the Department of Labor I genuinely deplore.

Granted, there were some faults in the original Jobs Corps organization, but by 1969 we had most of them worked out and were beginning to see some real dividends from the program. Centers at Camp Breckinridge in Kentucky and the Gary Center in San Marcos, Tex., are outstanding. Just at that point, an ill-advised decision was made to transfer the Jobs Corps operation to the Department of Labor, and to reduce drastically its scope. The administration fumed and complained about the cost per enrollee, and said it could do better with some little shirttail operations called mini-centers. I don't know how many of those mini-centers they have in operation right now—the last figure I saw indicated something like 23,000 enrollees. But I doubt we are even approaching the 35,000 trainees we once had in the Job Corps before the hatchet work began. Some cost studies I have seen indicate that the mini-centers are even more expensive than the old Job Corps, which looks better all the time.

In a contract study undertaken earlier this year by the Institute of Naval Studies, Center for Naval Analysis, these findings were reported:

> The New Job Corps Centers established after the program redirection of 1969 appear to have higher cost per man month than the previously established centers. The cost differential is due to a large extent to the high costs of off-site training and basic education. In addition to the higher costs, the new centers are at best as effective as the older centers.

The study went on to say that the length of time an enrollee remains on the job appears to bear a strong positive relationship to job placement, wage rates and relocation of trainees outside of their original community. You will remember that a sharply reduced training period was one of the features of the redirected mini-center program.

The report stated:

> Given the importance of the length of time an individual stays in the program, it is significant that the proportion of individuals who complete the Job Corps program has declined sharply between FY 1968 and FY 1972. In addition, the new centers have the lowest completion rates of all center types.

These Department of Labor programs also include mainstream and the concentrated employment program. Both of these have been of great benefit to many sections of the country, and deserve continuance.

There is ample testimony in the files and in hearings on the worth of the Neighborhood Youth Corps. It has performed well for youngsters in the in-school, out-of-school, and summer programs. The broadening of this program contemplated by the conference report is well deserved, and I know the House is in agreement.

HEADSTART

Probably the most significant expansion in funding in this conference report is that involving Headstart, which is surely one of the most popular programs ever undertaken by the Federal Government.

At the time the House acted on the Economic Opportunity legislation last winter, the best estimate we could find was that approximately 1.6 million children were then in need of Headstart services. There is no evidence that the number has decreased today. We are going on the assumption that we are now serving only 1 in 5 of these children. Because of this, the conference report recommends the authorization for Headstart be increased to $485,000,000 for fiscal 1973, and $500,000,000 for fiscal 1974.

FOLLOW THROUGH

To make sure there is a continuity of the learning process produced by Headstart, the conference report also recommends broadening Follow Through, with the authorization being set at $100,000,000 for each of the next 2 fiscal years.

OFFICE OF ECONOMIC OPPORTUNITY PROGRAMS

To fund the programs being carried out by the OEO itself, the conference report recommends the expenditure of $840,000,000 for fiscal 1973 and $870,000,000 for fiscal 1974.

Of this total, $328,900,000 is set aside for local initiative for each of the next 2 fiscal years. This is to cover the operations of the community action agencies. Another $71,500,000 annually for the legal services program is included in that total figure.

COMPREHENSIVE HEALTH

In my opinion, some of the most effective work in the entire antipoverty programs has been done in the field of health care. Poverty is hard enough to bear. But poverty complicated by illness is much worse. With this in mind, the conference agreed to a $100,000,000 authorization for both fiscal 1973 and fiscal 1974.

EMERGENCY FOOD

It has been demonstrated that, even with all of our various feeding programs, we still are not reaching all of the people who need help. The $23,500,000 appropriation for fiscal 1972 just was not getting the job done. There was not enough to go around. And the administrations fiscal 1973 request for $3,500,000 was totally unrealistic in view of the need. For this reason, the conferees agreed that $30,000,000 should be spent annually for emergency feeding programs undertaken by the OEO.

SOS

A program called senior opportunities and services has been especially beneficial among the elderly poor of this country. This is a group all too often forgotten in a youth-oriented society. The conferees recommend spending at the $8,800,000 level for the next 2 years, recognizing that this is but a token operation in comparison to the work to be done in this area.

ENVIRONMENTAL ACTION

The conference report does contain the new program which the House bill proposed last year—a program in the field of environmental action. This is a special emphasis program, providing for payment to low-income people to work on projects designed to combat pollution and to clean up a rapidly degenerating physical environment in America.

I feel the poor can be usefully employed in removing solid wastes, in clearing streams, in carting away all of the unsightly old automobile bodies that choke the roadways and creeks in many places. They can work on projects designed to upgrade the water supplies and improve the processing of sewage. They can plant trees, improve our parks, and help reclaim lands which have sustained ecological damage from mining operations and other forms of man-generated or natural destruction. The conference report recommends a modest $5 million for this new program.

RURAL HOUSING

I am happy to say that the conference report retains the new program of rural housing which the House bill initiated last year. The recommended authorization is $15 million for fiscal 1973, and $20 million for fiscal 1974.

This program could fill a genuine need among the isolated and the poverty bound of the Nation. I know the House agrees.

These, Mr. Speaker, are but a few of the major programs involved in this conference. Members have had an opportunity to study the report, and to see what we have done.

Eight years ago, Congress committed itself to a plan to eliminate poverty for those who want to improve their lot through their own efforts. It has sometimes seemed that we have had to run very fast indeed—as Alice in Wonderland said—to keep from standing still.

We all know that there is much suffering in the land that is keyed directly to poverty. We all want to do something about it. This is simply one more opportunity for us to act.

If we continue to tolerate poverty and the status quo in America, we must know that we shall have to pay a price. The cost of the economic opportunity program is insignificant alongside the long-range cost of maintaining poverty.

I include the following:

[In millions]

	1972 appropriation	1973 budget request	1973 conference report	1974 conference report
Department of Labor programs	$802.9	$900.3	$900.3	$950.0
Headstart	376.3	393.6	485.0	500.0
Follow Through	60.1	57.7	70.0	70.0

Add-ons: Title VIII (VISTA)			16.0	
Total	2,003.7	2,168.2	2,359.3	2,448.0

Mr. ZWACH. Mr. Speaker, will the gentleman yield?

Mr. PERKINS. I yield to the distinguished gentleman from Minnesota.

Mr. ZWACH. Mr. Speaker, I thank the gentleman for yielding, and I note that there is an appropriation for family planning of $20 million. The law still holds that this money cannot be used to promote abortions as pertaining to family planning; is that correct?

Mr. PERKINS. Mr. Speaker, first of all let me say to my distinguished colleague, the gentleman from Minnesota (Mr. ZWACH) that I personally have never been much impressed with the family planning program, but it is in the bill, and it has been in the legislation for several years. The conferees and the minority members supported this provision to a greater extent I think than did the chairman of the committee, but nevertheless it is in here. I am not well versed in this field, but a majority of the Congress felt it worth while when they enacted the legislation. And the Nixon administration recommended $15,000,000 for it in this fiscal year.

Mr. ZWACH. I thank the gentleman.

Mr. PERKINS. Let me say that I am not here advocating abortions, or anything of that kind. And this legislation was never intended to be useful in promoting abortions. I do not believe in that philosophy.

Mr. RANDALL. Mr. Speaker, will the gentleman yield?

Mr. PERKINS. I yield to the distinguished gentleman from Missouri.

Mr. RANDALL. Mr. Speaker, as the chairman of the committee will recall, when we had the OEO bill before us in the House I joined with the gentleman from New York (Mr. SCHEUER) to try to get the committee on both sides of the aisle to accept an amendment for the aging which we felt was most worthwhile.

We proceeded to offer our amendment upon the assumption that it is bad enough to be poor and then a little worse to be old and also poor but the very worst combination is to be old and poor, and add to that the isolation that comes from living in a rural area. The gentleman from Kentucky may recall that the amendment added $50 million, which divided equally would be only about $1 million per State for projects for the elderly poor in rural areas. This was the first time some pinpointed assistance had been directed to these most worthy recipients.

We are advised that the other body continued to carry this $50 million for these special programs, and yet if I recall the wording of the conference report correctly—and I do not have it before me—that the words "elderly" or "senior citizens" or "older Americans," as the Older American Act calls our "senior citizens," has been stricken from the conference report and the only reference is at page 9 of the report which permits the Director to provide assistance for projects to assist older persons.

We understand that the conferees agreed on the merit of these special programs for our older persons. But I am asking the chairman at this time if that paragraph on page 9 in the report has reference to the Scheuer and Randall amendment? Is this the paragraph which survived the conference—after both bodies had their own separate amendment to provide special projects for the aging?

Mr. PERKINS. It is my understanding that it does have reference to the authorization. In behalf of the older Americans, I certainly agree with the gentleman from Missouri that the Congress has not done enough for older Americans, and we should have done much more in this conference report.

But there was a tendency to cut back on all authorizations and this is one area where we should not have cut back. We gave the administration flexibility, however, as to where they can make an expenditure for the older Americans if it so desires. It is left entirely to the administration—to the people who administer the programs.

Mr. RANDALL. Mr. Speaker, if the gentleman will yield further—the intent of this body was there—the legislative history was written at the time the OEO authorization passed the House. If it was the intent of the other body that $50 million be earmarked for the elderly then regardless of the paragraph on page 9 of the report no matter how it is worded then it remains the legislative intent of both bodies of the Congress that special assistance programs means programs for older persons who may or may not reside in low-income areas and who are not served by other programs?

I thank the gentleman.

Mr. PERKINS. Mr. Speaker, let me mention the comprehensive health program. We have had some of the most effective work in the entire antipoverty programs in the field of health care. With this in mind, the conference agreed to the $100 million authorization for both the fiscal year 1973 and the fiscal year 1974, and hope this will allow for the expansion of these valuable programs.

In further answer to the gentleman from Missouri, the program called "the senior opportunities and service program" has been especially beneficial among the elderly poor of this country. This is a group that is all too often forgotten in a youth oriented society. The conferees recommended spending at the $8,800,000 level for the next 2 years, recognizing that this is but a token operation in comparison to the work to be done in this area.

Mr. RANDALL. Mr. Speaker, will the gentleman yield?

Mr. PERKINS. I yield to the gentleman.

Mr. RANDALL. Is the so-called SOS program specifically funded at the amount of $8 million, what has long been known as the Senior Opportunities Services?

Mr. PERKINS. That is correct.

Mr. RANDALL. I thank the gentleman and may I be permitted to add that in our congressional district these SOS programs have been of great benefit to our older citizens.

Mr. PERKINS. Mr. Speaker, we should have provided more money for these programs, but there was a tendency to do a lot of penny-pinching on the part of the conferees to make sure that we got a conference report. That was the reason that many of these programs have been cut to the bone. It is the best we could do with the view that we may be able to obtain a conference report and make it veto-proof.

Mr. Speaker, I yield to the gentleman from Minnesota (Mr. QUIE).

(Mr. QUIE asked and was given permission to revise and extend his remarks, and to include extraneous matter.)

Mr. QUIE. I thank the gentleman for yielding.

As the gentleman knows, we have had some questions on section 19 of the bill, which provides that there shall not be lower standards set on the day-care programs than were established in the Federal Interagency Day Care Requirements of 1968.

Mr. Speaker, on August 31, I received the following letter from the Secretary of HEW Richardson regarding section 19 of the legislation we are considering here today:

WASHINGTON, D.C.,
August 31, 1972.

Hon. ALBERT H. QUIE,
House of Representatives,
Washington, D.C.

DEAR MR. QUIE: I understand that Section 19 of the proposed Economic Opportunity Act Amendments would require that the 1968 Federal Day Care Requirements be minimum requirements. The 1968 Requirements have made an appreciable contribution toward the development of quality child care. However, I believe that comprehensive review and revision of the requirements is now in order for a number of reasons. As you may know the Department, in conjunction with parent groups and child care specialists within and outside government, is currently undertaking such an effort.

The 1963 FDCR were designed primarily for care delivered in day care centers. However, the bulk of all day care today continues to be delivered in a child's own residence or in a small family day care home. The proposed revised standards recognizes the special features of all three major day care settings (centers, family day care homes, and in-home care) and define specific requirements for each to ensure quality care regardless of setting.

One major weakness of the 1968 Requirements has been the difficulty of ascertaining compliance with the standards. The specific standards are frequently imprecise and hard to measure. The proposed revision of the Requirements would not eliminate all of these difficulties, but the new version would increase significantly the Federal Government's ability to effectively measure and enforce the standards. For example:

Definitions have been clarified and made more precise.

Each Federal requirement is accompanied by one or more measurable criteria for evidence of satisfactory compliance.

The components of safe, healthy, and developmental care have been changed, where possible, from general pronouncements of intent to specific criteria.

The revised standards are designed to reflect Federal experience with day care since 1968. For example, on the key issue of staff/child ratios, the 1968 ratios measured the number of *adults* per child, whether or not the adults were qualified caregivers and regardless of whether or not they provided care to the children. Thus secretaries, bus drivers, and custodians could be included. Based on our experience since 1968, there is general agreement among child development specialists that the ratios are more appropriate when defined in terms of the actual hours of qualified *care* provided per child, rather than an arbitrary number of adults present in the facility. We therefore would not want Section 19 to limit our flexibility in dealing with this problem.

Thus our primary concern over the interpretation of Section 19 arises in instances in which a quantitative measure in the 1968 requirements may be lowered in a revised version but would not in any way endanger the quality of care involved. Because we expect revised standards to improve the clarity, enforceability, and specificity of the 1968 requirements, no lowering in quality of care would occur. We would like, therefore, through a colloquy on the House floor, to make it quite clear that designation of the 1968 requirements as minimum requirements does not mean that every revised standard must be as stringent in quantitative measure. Rather the object of designating the 1968 requirements as minimum is to maintain quality.

I believe that our revised standards will represent a significant improvement over the 1968 version—an improvement that will increase both the quality and the quantity of Federal day care programs.

I therefore urge you to utilize the enclosed colloquy to insure a degree of flexibility in the revision of the 1968 standards.

With kindest regards.

Sincerely,

ELLIOT RICHARDSON,
Secretary.

Mr. QUIE. Mr. Speaker, in light of the request from Secretary Richardson, and because it was not the intention of the House through this provision to tie the hands of HEW; for the purpose of establishing legislative history, I would like to ask the Chairman of the Full Committee a question. As you know, experience with the 1968 Federal Interagency Day Care Requirements over the past several years has shown that in some cases the measurement or standard which was promulgated at that time has not really helped to insure the proper quality of care. In many instances, the standard has proven too vague for effective enforcement. In other cases, compliance with the quantitative measure which was chosen has not necessarily resulted in the high quality of care which that measure was intended to foster. As a result of the experience gained since 1968, the Department of Health, Education, and Welfare, is now in the process of reconsidering the 1968 standards, and the expectation is that several of them will need revising in light of that experience. Since we in the Congress recognize that standards must be readjusted over time to respond to changing needs in the rapidly developing field of early childhood, and in considering amendments to the Economic Opportunity Act, we felt it important to include in those amendments a provision, which was written into section 19, insuring that any new standards would maintain at least the level of quality prescribed by the 1968 standards. My question to the gentleman concerns the possible flexibility which HEW and OEO may have to revise the standards. Would this provision prohibit the revision of any standard which has been found to be an ineffective or imprecise measurement of the quality of care or conditions of a day care center?

Mr. PERKINS. Mr. Speaker, let me say to my distinguished colleague, this is designed to give the administration considerable flexibility.

Section 19 of H.R. 12350 requires that any future standards which are adopted by HEW and OEO be no less comprehensive than the 1968 standards. According to the House committee report, this means that the 1968 standards are minimum standards. But the committee did not intend section 19 arbitrarily to prohibit changes and modifications designed to clarify the 1968 standards or to improve their ease of applicability and enforceability. If a particular standard or quantitative measurement in the 1968 requirements was ill-conceived or has been ineffective in meeting its purpose, another approach should be developed. However, there can be no changing of requirements which would have the effect of lowering the quality of care which would be permissible under Federal standards.

In this connection, Mr. Speaker, I am specifically concerned about Secretary Richardson's intentions, as expressed in his letter, with respect to child-staff ratios. While we certainly do not intend that bus drivers, secretaries, and custodians be counted as staff and would welcome clarifications in that regard, the majority conferees would view any reduction in the child-staff ratios contained in the 1968 agreement as lowering the quality of care.

Mr. QUIE. I thank the able chairman.

Mr. Speaker, this is another provision in the OEO conference report that I would also like to highlight at this time, because I feel that it is a very significant and meaningful step forward in our dealing with the handicapped children of this Nation. The conference report contains the following new section:

> (2) The Secretary of Health, Education, and Welfare shall establish policies and procedures designed to assure that not less than 10 percentum of the total number of enrollment opportunities in the Nation in the Headstart program shall be available for handicapped children (as defined in paragraph (1) of section 602 of the Elementary and Secondary Education Act of 1965, as amended) and that services shall be provided to meet their special needs. The Secretary shall implement his responsibilities under this paragraph in such a manner as not to exclude from any project any child who was participating in the program during the fiscal year ending June 30, 1972. Within six months after the date of enactment of this Act, and at least annually thereafter, the Secretary shall report to the Congress on the status of handicapped children in Headstart programs, including the number of children being served, their handicapping conditions, and the services being provided such children.

This section, although part of the Senate bill, represents a culmination of years of activity and interest in behalf of many Members of Congress in both the House and Senate and it reflects our concern that the handicapped be afforded every opportunity that every other citizen is entitled to. This provision is particularly significant in that it is the first time the Congress has directed that opportunities be extended to handicapped individuals as part of regular Headstart programs. It has long been my feeling that although some handicapped children need special services, many severely handicapped youngsters with minimum accommodations and a maximum of understanding can fit into regular programs for normal children.

I want to emphasize that this provision means handicapped under the Federal definition as defined in paragraph 1 of section 602 of the Elementary and Secondary Education Act and not merely individuals who have "handicapping conditions." Throughout the existence of the Headstart program, through its medical component, it has found thousands and thousands of children who have handicapping conditions such as visual problems which require eyeglasses or children with a slight hearing loss speech disorders, or emotional problems. These children have been served under the Headstart programs and will and rightly should continue to be served under this program. It is now hoped that as a result of this amendment that Headstart will serve children who are totally blind, totally deaf, and severely physically and mentally handicapped.

It has been said for years that a child who is poor is handicapped. I would add to that that a child who is poor and also severely handicapped is doubly handicapped and there can be no greater service than to help these youngsters to truly gain a headstart, giving them the opportunity to participate, to grow, and hopefully, benefit through this program.

I think it is important to emphasize the provision which specifies that children who participated in the program last year will not be excluded from participation in the program this year if they are still qualified for enrollment. Since Headstart normally enrolls 4- and 5-year-olds, and there is a general turnover of about 50 percent each year, I can anticipate no problems in meeting the requirements of this section as new enrollment opportunities in programs throughout the Nation open up. It is my hope that Headstart programs throughout the country will actively work with community based organizations for the handicapped as well as schools, universities, and agencies serving the handicapped in every State in an effort to identify, recruit, and assist in helping to place handicapped children in local Headstart programs. I can see no circumstances under which a handicapped child should be denied entrance to a Headstart program if he is qualified and his parents want him to participate.

So that my colleagues can understand the scope of this amendment and how it affects each State, I am inserting at this point in the RECORD a chart produced by the Office of Child Development for Project Headstart showing the new obligational authorities, the number of children, the number of grants, and the number of centers in each State for fiscal years 1971, 1972 and a projected estimate for fiscal 1973:

It it my hope that within the next year there will be 37,900 handicapped children participating with normal children in Headstart programs throughout the Nation. Further, I hope that the Office of Child Development will work closely with the Bureau of Education for the Handicapped so that their expertise and experience can be utilized to enrich not only the new handicapped students but the entire Headstart program.

In my years here in the Congress and in the State legislature I have come to know handicapped children and their parents. I have learned from them the terrible impact that being excluded from the benefits of our society has upon their self-identity. To open the door through legislation such as this is an important beginning but I call upon my colleagues and all those concerned about the handicapped throughout the Nation to actively work to make the intent of this law a reality for these children.

I would think all the Members could support this legislation. There were two very strong objections by the administration, I understand, to the conference report as we first agreed on it. One was with respect to the Legal Services Corporation. Rather than work out a Legal Services Corporation in the conference, as the chairman has indicated, we just dropped the Legal Services Corporation and we left the legal services exactly as it is in the present law. I still have a desire for a Legal Services Corporation and my own feeling is the administration wants it, but we can bring such legislation up in the next Congress.

My own feeling is that there ought to be a separate corporation and that the issue of accountability be thoroughly considered. There was always a question as we considered the corporation legislation this time as to whether board members selection procedures in both the House- and Senate-passed bills would be free to vote their independent, personal feelings, or would be bound to reflect the views, interests, or official positions of their organizations. At best they would have been irrevocably bound by formal resolution.

The President, in my opinion, should be free to choose the most qualified persons available. Obviously, he should look to bar leadership both for advice and for talent, but in the final analysis be free to decide not to appoint an individual if he feels that that individual would bring unnecessary controversy to the board, inject partisan politics, or be antagonistic to legal services.

There was a difference of opinion on this issue and rather than get into that fight here I think we did the right thing by dropping it out of the conference report which was the right of conferees under the rules of the House.

Second, the authorization figures were much higher than the administration had asked for, and we cut those back to almost the administration's budget request; $200 million over the budget rather than $900 million per year. I think this legislation gives OEO flexibility and I hope we can pass it so that the people in the OEO and all the Community Action agencies can know what the authorization is they are going to operate under for 2 years. During the last year they operated without an authorization and have been under an appropriation which presumed authorization.

Mr. PERKINS. Let me say in response to the gentleman from Minnesota, we went way out in the majority party to meet the objections of the President. I personally witnessed while we were going on under the continuing resolution, that some of the better programs, such as the emergency food and medical care program, for instance, were being entirely phased out in certain sections of the country and we were not able to do anything about it.

Mr. PERKINS. Mr. Speaker, I yield 10 minutes to the distinguished gentleman from Washington (Mr. MEEDS).

Mr. MEEDS. Mr. Speaker, this is the first conference report that I have failed to sign in the number of times I have been a conferee on bills before the Committee on Education and Labor of the House, and this will be the first time that I will vote against the authorization for OEO contained in this conference report.

I do so as a symbol of my extreme displeasure at the manner in which both Houses of the Congress are being bludgeoned—and I use the word advisedly—bludgeoned by the White House on this bill, and particularly with regard to the Legal Services Corporation which was in the original OEO bill.

I would like to take time to explain the history of that legislation and then leave it to history to determine who really killed the Legal Services Corporation.

Mr. Speaker, back in March—March 18, to be exact—of 1971, 100 Members of this body and of the other body introduced a bill, which was in the House H.R. 6361. We introduced the bill because it was our feeling that the legal services program in OEO, while one of the most successful of all the OEO programs, ought to be insulated from political pressure, but not isolated from the needs of the poor.

We recognized, and I believe anyone who has studied this legislation and the activity carried on under it recognized, that the legal services program is a controversial program.

By its very nature it is controversial. All the more reason to insulate it from political pressure if it is going to work correctly. So we set out to do this.

Incidentally, Mr. Speaker, to do this after the recommendation of the Ash Commission of President Nixon and after the recommendations of the American Bar Association, the National Bar Association, the Legal Aid Defenders Association, and every other recognized bar association in the United States.

At the time we introduced that bill the administration also had a bill introduced which created an independent Legal Services Corporation. These two bills varied in some respects, primarily in two.

First of all, there were, by the testimony of almost all of the experts who appeared before our committee, some very serious shortcomings in the administration bill insofar as there were many instances which would provide interference between the individual Legal Services Corporation lawyers and their clients. My recollection is there were at least four instances in which we had testimony that even a lawyer accepting employment with the Legal Service Corporation under these circumstances might well constitute a violation of the professional code of ethics.

These two bills varied in one other very important respect, which is with regard to the appointment of the board of directors, that is, the people who ran or were to run the Legal Services Corporation.

The bill introduced by the 100 Members with strong bipartisan support, provided primarily that some of the selections—I think five of them at that time—were to be made by the President with the advice and consent of the Senate, one was to be made by the Chief Justice of the U.S. Supreme Court, and others were to be made on recommendations of the client and the community and the Legal Services Corporation lawyers, and others were to be made because those people were heads of national bar associations and were recognized as having supported and worked for this legislation.

Under the administration proposal all of the board of directors were to have been appointed by the President with the advice and consent of the Senate. The only admonition was that no more than six of the 11 could have been from any one political party.

We had extensive hearings not only here in Washington, but we traveled, as I recall it, into Louisiana, California, and a number of other places and heard testimony on this legislation. We received the word from the White House that the bill that the 100 Members, the bipartisan bill, had agreed to, was unacceptable particularly because of the composition of this board. We recognize it might provide some problems to the President in exercising his prerogative. We entered into rather intensive negotiations between some of the Members on the Democratic side and some of the Members on the Republican side. These negotiations were carried on in entire good faith on both sides. Particularly I wish to commend the gentleman from Wisconsin (Mr. Steiger), the gentleman from Minnesota (Mr. Quie), the gentleman from Illinois (Mr. Erlenborn), for the fine cooperation and good will which they exercised in attempting to reach a compromise that we felt would be acceptable.

We did reach that compromise. We reached a compromise which we felt would preserve the prerogatives of the President and yet make the Legal Services Corporation a truly independent corporation in the sense that it would be insulated from political activity and political pressure. We brought that bill to the House of Representatives and passed it as a part of the OEO bill by a very substantial margin.

Indeed, we defeated an amendment to cut it out by an overwhelming majority. And it is my recollection, and the gentleman can correct me if I am wrong, that the minority leader of the House voted for this proposal as it went through the House.

It was part of the OEO bill which was vetoed by the President. As the chairman stated earlier, the major objection the President had to that OEO bill, as we all know, was the early childhood development program, but he also had a few choice words for the Legal Services Corporation, indicating his displeasure again and in fact saying we had not gone far enough in protecting his prerogatives on the appointment of this board.

So after the veto we went back to the drawing board again with the same people, and sought a further compromise to further elevate the prerogatives of the President and to lower what we considered to be the insulation for a fully independent Legal Services Corporation, and we brought that back to the House.

We were told that the prerogatives of the President had to be preserved so that only he could appoint people to the board of directors—that was the only way that we could maintain a separation of powers.

I just happen to have before me about six illustrations, the Railroad Retirement Board, the Appalachian Regional Commission, the Farmers Land Bank, the communications satellite program the Federal National Mortgage Association, and others, in which the President has not insisted on his complete prerogative with regard to the appointment of Commissioners. So I think that argument is invalid.

But in any event we made further compromises and we brought that bill back to the House with those compromises, and passed it again through the House, and the Senate was doing the same thing, a bill very similar to ours was being again passed through the Senate. We went into conference and reached agreement again, after compromising and, I might say, we even went beyond the scope of the House and Senate bills to reach that compromise, we went further in the President's direction than either the House or the Senate bills, and would have had a bill here, which provided even more concessions to the President.

After a while, during which some extreme pressures were brought upon the Senate by the White House, the Senate asked for another conference—

The SPEAKER. The time of the gentleman from Washington has expired.

Mr. PERKINS. Mr. Speaker, I yield 3 additional minutes to the gentleman from Washington (Mr. Meeds).

Mr. MEEDS. As I started to say, the Senate asked for a further conference, the conferees were again appointed, and we went back to conference without having brought this bill even to the floor. At that time we were informed that the White House indicated that the Legal Services Corporation, even in the shape it was in then, was still unacceptable, and that if it passed in that form the President would veto it—and we had this on pretty good authority. My preference would have been to pass the bill and let the President veto it, because, you know, if he is going to kill the legal services program it ought at least be buried in the White House, and not here in the Congress, but I was a minority of the conferees. The conferees agreed rather than going as far as the President wanted to go with his appointment of the board, to cut out the legal services program entirely.

Now, it is a kind of a bad choice of alternatives, but I must say that, presented with the alternatives that the President laid down, and the type of board he wanted, and the type of program that presently exists, the present program is probably the best because we at least have some oversight authority.

But to do so—to go as far as the President wanted to go to sign the bill, it seems to me would be to abandon the very reason for creating an independent Legal Services Corporation because it would not be independent at that time.

I do not fault my colleagues on either side of this aisle. Indeed, I have high praise for some of the Members on the Republican side who worked very hard, especially the gentleman from Wisconsin (Mr. Steiger), the gentleman from Illinois (Mr. Erlenborn), and the gentleman from Minnesota (Mr. Quie) to get a bill and to get an acceptable Legal Services Corporation. But I do fault the President of the United States for the pressure that was brought on these conferees to knock this Legal Services Corporation out.

I think the record ought to be amply clear that the total responsibility for killing in 1972 the Legal Services Corporation is the responsibility of the White House—and not the Congress.

The SPEAKER. The time of the gentleman has expired.

Mr. QUIE. Mr. Speaker, one of the problems that we have with the Legal Services Corp., of course, is trying to insulate it from political pressure—and that is what we want to do and what we have done in the past to insulate similar organizations from political pressure is to have the board members appointed by the President and then that they be confirmed by the Senate. This is what the Presidents Corporation would have done.

There is another question of accountability as well. While we have high regard for organizations such as the American Bar Association, the Association of American Law Schools, the National Bar Association, the National Legal Aid and Defenders Association and the American Trial Lawyers Association—there is still the question of their accountability.

In our governmental system, we usually make those who are responsible for administering a program for which Federal funds are appropriated accountable through us to the taxpayers. We have, of course, the General Accounting Office as an arm of the Congress. But the basic argument is accountability during administration not a checkup afterwards.

The administration wanted their legal services corporation—and that is what they wanted in place of what we had agreed to originally in conference. They felt that that would provide for the accountability. But as the gentleman from Washington indicated, we could not agree in conference on the kind of corporation that could get by both the Congress and the White House and, therefore, it was a move on the part of the conferees to drop the corporation at this time—and not the White House.

That was the only thing that we could agree on in conference—that could be agreed on both in conference and in the White House. That is why we bring this report to you now.

Next year, as I indicated earlier, I would like to see us work out a corporation, but there is still going to be an issue before us—the issue of accountability—who will be responsible or how will they be responsible to the taxpayers who put up the money for these programs?

Legal services attorneys are different from other attorneys. Other attorneys in private practice are responsible to their clients and to their law firm, if they belong to a law firm.

But in this case, they are being paid by the Federal Government and in this way we are writing really a new chapter each year as this program develops. I believe it is an absolute necessity for the poor to be able to have the legal services or the services of an attorney just like anyone else who can afford it. That is why I am pleased that we have embarked on this experiment. The last chapter has not been written yet, and I think we will just have to wait for the next Congress to do it.

This bill is much better than the House passed bill from my view. As I said, it drops the corporation, so we do not have that conflict before us now and it reduces substantially the authorization for appropriations.

As I was going over the figures, I see that we have $2,369.3 billion for fiscal year 1973 as compared to $3,090 billion in the first conference reported bill. This represents a reduction of over $700 million.

It is well within the budget ball park. I am satisfied with this legislation.

I did not vote for the bill when it went through the House, but I think it is such a vast improvement over what we passed in the House, that I am certainly constrained not only to vote for it but I urge my colleagues to vote for it.

Mr. GERALD R. FORD. Mr. Speaker, will the gentleman yield?

Mr. QUIE. I shall be happy to yield to the distinguished minority leader, the gentleman from Michigan.

Mr. GERALD R. FORD. Mr. Speaker, I appreciate the gentleman from Minnesota's yielding.

I should like to clarify, if I might, the figures that have been used here. As I understand it, the budget request of appropriations for fiscal year 1973 was $2,168.2 million?

Mr. QUIE. The gentleman is correct.

Mr. GERALD R. FORD. In the conference report which is before us now, the authorization is $2,369.3 million?

Mr. QUIE. The gentleman is correct.

Mr. GERALD R. FORD. And the conference report that was originally proposed but never acted on by the House was for $3,090.2 million?

Mr. QUIE. As I read it over, that is a correct figure from the conference report.

Mr. GERALD R. FORD. The net result is that the conference report for the authorization before us now is roughly $700 million less than the originally proposed conference report?

Mr. QUIE. The gentleman is correct.

Mr. GERALD R. FORD. And roughly $200 million in authorization above the proposed appropriation for fiscal year 1973?

Mr. QUIE. The gentleman is correct.

I would also say to the gentleman that our committee has probably done better on this conference report in staying close to the budget request than on any piece of legislation we have brought before the House.

Mr. PERKINS. Mr. Speaker, I yield to the gentleman from Missouri.

Mr. RANDALL. Mr. Speaker, the gentleman from Washington (Mr. MEEDS), who was in the well a moment ago deplored the fact that provision for the Legal Services Corporation, had been stricken from the conference report. Next, I listened carefully to the ranking minority member of the Committee on Education and Labor, Mr. QUIE—who stated that one of the faults with the corporation was its lack of accountability to the Congress. I agree with the latter view. The Legal Services Corporation provides for little or no control by Congress.

Some of my colleagues may be wondering why I am taking this time. The reason is that I just want to be sure and certain that the Legal Services Corporation is dead. It is sort of like visiting a funeral home, not to pay your respects or condolences, but to be certain and positive that the reports of the demise of the alleged deceased is accurate.

I want to be sure that there is no Legal Services Corporation in this conference report; is that correct, Mr. Chairman?

Mr. PERKINS. That is gone. We go back to the old law, the present law.

Mr. RANDALL. Well I want to add that the Congress has had a most unfortunate experience with creating corporations. In the matter of the Postal Corporation or Postal Service as it is sometimes called we created something like a corporation replete with officers and directors but the Congress lost all contact and control. Today the Service can bring people from anywhere in the United States and put them into postal jobs in any of our districts.

As we understand, this Legal Services Corporation, it is completely beyond accountability to the Congress. They could appoint someone like the notorious William Kunstler, or a person with similar views and pay him a salary of $100,000 a year and none of us in the Congress could do anything about it; is that correct?

Mr. PERKINS. I do not think it would have gone that far.

Mr. RANDALL. You would agree there is the possibility; is that correct?

Mr. PERKINS. I hardly think so. The Legal Services Corporation is a dead duck now.

Mr. RANDALL. Thank you very much, Mr. Chairman.

One more comment. When this bill was before the House I was with the gentleman on the funding for our older citizens; yet with this improvement we still have some grave doubts about the administration of portions of the program. Perhaps the gentleman knows, and I hope my fellow Members know, that we happen to have had the job of chairing the Subcommittee on Government Operations which has been looking into the matter of 60 students who are traveling over in Europe on poverty funds. I can report we will continue this inquiry next week. At this point it looks like nearly half of those or at least more than a third did not come from families within the established poverty guidelines. Also there is some evidence that those who made the trip were related to employees and/or members of the board of directors of the Monmouth, N.J., community action program.

We all recognize the worthwhile overall goals of the poverty program. Is it the gentleman's conclusion, and you have been familiar with the program for years that the administration and management have improved over the years, with the exceptions, of course, of some few incidents like these students improperly traveling abroad? It has been my observation the administration of the poverty program has come a long way in its improvement since the early days when we had the LeRoy Jones Theatre—the "hate-white theatre"—in New York, and other things of that kind.

Mr. PERKINS. Let me state to my distinguished colleague that the Congress in my judgment never intended any such administration of any program of that type. It was an error on the part of someone. As I understand the situation, as soon as the Office of Economic Opportunity found out about the proposal, they canceled out the grant, which they should have done forthwith. That is what I understand, that they did this.

Mr. RANDALL. That points up the importance of the Governor of a State retaining a veto over such programs as legal services. As I understand it the Governor of New Jersey vetoed or canceled the funds for grants for the 60 students to travel abroad as a part of the poverty program.

Mr. PERKINS. The gentleman is correct.

Mr. QUIE. Mr. Speaker, I yield such time as he may consume to the gentleman from Iowa (Mr. KYL).

Mr. KYL. Mr. Speaker, I take this time to inquire about the language which we find on page 15 of this report, entitled "Rural Programs." Under this legislation we have listed a series of activities that the OEO can carry on as a supplement to existing similar programs under agricultural law.

The first question I would like to ask the chairman of the committee is this: How does this program differ from the Farmers Home Administration law on the books or the new Rural Development Act which was signed into law last week?

Mr. Speaker, I am talking about the language on page 15 of the report, part B—"Rural Programs," starting with the "Statement of Purpose" and then I will get to the "Financial Assistance" part of it. How does this differ from existing law under the Farmers Home or the new Rural Development Act?

Mr. PERKINS. Mr. Speaker, if the gentleman will yield, this is a provision that was in the Senate bill. It was not in the House bill. The conferees agreed to it in conference.

Mr. KYL. But how does it differ from existing law? I do not care where it started. I want to know what it means. I am talking about section 722(a) which says:

> The Director is authorized to provide financial assistance including loans . . .

Mr. Speaker, does it include grants? It says "including loans."

Mr. PERKINS. I construe that to mean loans as well as grants.

Mr. KYL. It is the gentleman's opinion and the committee's opinion that these funds will all be disbursed as loans and not grants?

Mr. PERKINS. I construe this sentence, even though it uses the words "including loans" to mean both.

Mr. KYL. If that is firm in legislative history, let us move forward. Is it assumed OEO would consolidate the Farmers Home Administration loans?

Mr. PERKINS. The Farmers Administration administers this program here, as I understand, through delegations. This has made some change from the present program, presently administered by the Farmers Home Administration.

Mr. KYL. Is this an amendment to the Farmers Home Administration Act?

Mr. PERKINS. No. It is the OEO amendment, but the program is currently operated by the Farmers Home Administration.

Mr. KYL. But all this language on page 15 involving all this action could be administered by Farmers Home Administration? And it will be administered by OEO?

Mr. PERKINS. Section 28 of the conference report specifically prohibits the delegation of title VII.

Mr. KYL. May I ask a further question?

Mr. PERKINS. Let me say to my distinguished colleague that from the outset the Economic Opportunity Act when first enacted into law in 1964 had a rural program in the bill, and that program was delegated to the Farmers Home Administration to administer. This makes some amendments.

Mr. KYL. May I ask the gentleman further, when it comes to establishing new industries, and so forth, is there an antipiracy provision attached to this legislation?

Mr. PERKINS. Let me say to my distinguished colleague that there is no such provision, as I read it. We have very little industry in the rural areas. This is an incentive, as I see it, to try to attract industry to those areas.

Mr. KYL. This originated in the Senate or in the House or somewhere else. Does the gentleman say that if a new industry is set up in a new area, we will pay no attention to whether they steal that industry from some other area of the country or not?

Mr. PERKINS. Let me make this statement. There is no piracy here involved. This is trying to make loans for the purpose of establishing some industry where they do not have industry. I do not believe we are robbing Peter to pay Paul with a provision of this kind.

Mr. KYL. When the rural development bill was before the House, the House apparently did not buy that, and insisted that we have a strong provision.

A moment ago the chairman said that these were all loans, not grants. If the gentleman will look at subparagraph (b), he will see it says:

> The Director is authorized to provide financial assistance to local cooperative associations—

And so on, and then this language:

> for the purpose of defraying all or part of the costs of establishing and operating cooperative programs for farming, purchasing, marketing, processing—

And so forth.

Are those loans, or are they grants?

Mr. PERKINS. The costs which may be defrayed are specifically listed in section 722(b).

The SPEAKER. The time of the gentleman from Iowa has expired.

Mr. QUIE. Mr. Speaker, I yield the gentleman 3 additional minutes.

Mr. KYL. Mr. Speaker, I yield further to the gentleman from Kentucky.

Mr. PERKINS. This is broader language. It could be a defraying of all or part of the costs of establishing and operating cooperative programs for farming, purchasing, marketing, processing, and to improve their income as producers, et cetera. It also says:

> Costs which may be defrayed shall include but not be limited to—
>
> (1) administrative costs of staff and overhead;
>
> (2) costs of planning and developing new enterprises;
>
> (3) costs of acquiring technical assistance; and
>
> (4) initial capital where it is determined by the Director that the poverty of the families participating in the program and the social conditions of the rural area require such assistance.

Mr. KYL. Let me ask the chairman another question.

If I get 15 low-income farmers together in my area, and they decide to form a cooperative for the purpose of buying and selling, am I to understand that under this language the Government can pay all of their administrative costs, staffing, overhead, and development costs of the enterprise, as well as the costs of acquiring technical assistance and initial capital? Could all of that come forth under this program?

Mr. PERKINS. Under the language it is broad enough to make loans to cover the whole situation.

Mr. KYL. Loans or grants?

Mr. PERKINS. Loans and grants to cover the situation.

Mr. KYL. Are these loans or grants, or are they both?

Mr. PERKINS. It is my construction of the whole section that loans and grants are intended.

Mr. KYL. May I ask the gentleman from Minnesota his construction of the language in this bill? Is it all loans with no grants?

Mr. QUIE. I cannot read it that way myself, because I see it is left open.

The gentleman from Kentucky refers to the fact that this is like the old law. That I have not refreshed myself on, as to whether that is a law which provides for grants or not.

On the aid to cooperatives, groups of poor farmers can get together now under what was the law. We do not have a present law under OEO, because that all expired. Under that law, they could run a cooperative. I doubt they were limited to loans.

Mr. PERKINS. Mr. Speaker, if the gentleman will yield further, we have had loans in the original act ever since we enacted the act in 1964. I do not know whether they intended any grants here or not. In my judgment, it is loose language.

Mr. QUIE. I suggest, from a reading of the articles of the cooperatives, there was grant money involved. I would be glad to stand corrected, but that is my recollection. It seems to me this authority was the salvation of all the authorities in the present law. There is some additional authority, because if you will turn over to part C on the support program, it spells out there in section 731(c) that the director shall provide directly or through grants, contracts, or other arrangements such technical assistance and training of personnel, and so forth. There it is clear and it is spelled out, and we know what they are talking about. You are referring to part (b) of section 722 where the director is authorized to provide financial assistance to local cooperative associations. It was my assumption that it was being done the way it was under the old law and therefore I thought it was being done through grants.

Mr. KYL. Will the gentleman from Minnesota say that the administration under this act would be under the Agriculture Department unless there was specific delegation to the OEO?

Mr. QUIE. I would say it would be under the OEO unless there was a specific delegation by the OEO to the Department of Agriculture.

Mr. Speaker, I yield such time as he may consume to the gentleman from Illinois (Mr. FINDLEY).

Mr. FINDLEY. I thank the gentleman for yielding me this time.

On that same point—and I hope the gentleman from Iowa will stay here for this discussion—I would like to point out that it would be entirely possible for 15 well-to-do farmers to form a cooperative under the language, at least as a casual reading would so interpret it, because it does not limit participation in the cooperatives to low-income farmers but simply says that these may be assisted in rural areas containing concentrations or substantial numbers of low-income persons. The "low income" refers to areas and not to those eligible to take part in the cooperative's formation. I do not see how this can be read other than to authorize a grant of substantial amounts of money to cooperatives. It says all or part of the cost of establishing and operating the cooperative programs for abstract purposes.

Mr. STEIGER of Wisconsin. Will the gentleman yield to me?

Mr. FINDLEY. I yield to the gentleman.

Mr. STEIGER of Wisconsin. May I again go back to the point that the gentleman from Minnesota made? This is not new authority. Since its inception in the Economic Opportunity Act it has had authority in rural areas and in those sections of the country with substantial concentrations of low-income families, such as in Hawaii, New Mexico, Alabama, and a number of States across the country in which cooperatives have been formed and loans have been granted.

Mr. FINDLEY. Can the gentleman say with certainty that this is the language that has been on the books previously, or is it a redraft of this language?

Mr. STEIGER of Wisconsin. No, I cannot say with certainty, because I do not have a copy of the OEO Act in front of me, but without being able to tell you for certain which words have changed, it is a restatement of the present act. I do understand, however, that the present act authorizes loans only.

Mr. FINDLEY. It seems to me to be wide open authority. Of course, there is a limitation of funds, but within the money available it permits the director of OEO certainly to finance a multitude of operations in areas where cooperatives may be formed.

Mr. PERKINS. Will the gentleman yield to me?

Mr. FINDLEY. Yes. I am glad to yield to the gentleman.

Mr. PERKINS. The intent of this program was to help the poor farmers and cooperatives and not permit the well-to-do cooperatives or farmers to operate under this program. It specifically refers to low-income farmers. Of course, that is reasonable, that a farmer would be able to receive something under this act if he qualifies.

This is an amendment to the original bill. And if you will notice in that paragraph there, section 722, it is clearly loans, and especially section 722(a) where we provide financial assistance "including loans having a maximum maturity of 15 years and in amounts not resulting in an aggregate principal indebtedness of more than $3,500 at any one time, to any low-income rural family where, in the judgment of the Director, such financial assistance has a reasonable possibility of effecting a permanent increase in the income of such families."

That is clearly a loan, and cannot be made to wealthy farmers.

Mr. FINDLEY. The language to which I referrred was subsection (b), and as far as I can see there is no direct relationship between (a) and (b). Subsection (b) authorizes very clearly the granting of sums to provide all or part of the cost of operating cooperatives, and it does not restrict such cooperatives to low-income persons.

Mr. PERKINS. It says:

> The Director is authorized to provide financial assistance to local cooperative associations in rural areas containing concentrations or substantial numbers of low-income persons for the purpose—

And so forth.

Mr. FINDLEY. That refers to the area and is not a qualification for participation in the cooperative.

Mr. QUIE. Mr. Speaker, if the gentleman will yield, I would say that if you go down to where it says:

> Costs which may be defrayed shall include but not be limited to—

And then go to (4), it says:

> initial capital where it is determined by the Director that the poverty of the families participating in the program and the social conditions of the rural area require such assistance.

I think the interpretation of that would be that, first, the family has to be in poverty and, secondly, it has to be in an area where there is a general condition of poverty. It cannot be where there are some poor families in areas where there is affluence, if there is such a thing in rural areas.

Mr. FINDLEY. I want to say to the gentleman further that that may be the intention, but the least that can be said about this section is that it was very sloppily drawn because the words which precede items (1), (2), (3), and (4) say "Costs which may be defrayed shall include but not be limited to—".

Mr. QUIE. I know.

Mr. PERKINS. Mr. Speaker, will the gentleman yield further?

Mr. FINDLEY. I yield further to the gentleman from Kentucky.

Mr. PERKINS. Mr. Speaker, section 723(a) under "Limitations on Assistance" says:

> No financial assistance shall be provided under this part unless the Director determines that—

and I think this clarifies it—

> (1) any cooperative association receiving assistance has a minimum of fifteen active members, a majority of which are low-income rural persons;

That is a limitation that applies to the whole of section 722(a) and 722(b).

Mr. PERKINS. Mr. Speaker, I yield 5 minutes to the disinguished gentlewoman from Oregon (Mrs. GREEN).

Mrs. GREEN of Oregon. Mr. Speaker, I thank the gentleman for yielding me this time so that I may ask three questions.

First, the chairman, the gentleman from Kentucky (Mr. PERKINS), I am sure recalls the amendment which he offered in committee for a new housing program under OEO for the poor in rural America.

Mr. PERKINS. That is correct.

Mrs. GREEN of Oregon. Is that still in the conference report?

Mr. PERKINS. That is in the conference report?

Mrs. GREEN of Oregon. Is there any provision for coordinating this new housing program for rural people with the multiplicity of other housing programs we already have for rural America?

Mr. PERKINS. Let me say to the gentlewoman from Oregon that this was suggested, planned, and formulated by rural Americans from North Carolina, Wisconsin, and other States who came before the committee saying that the present rural housing programs were completely inadequate and not working, and there was just enough money here in the authorization for the $10 million for an experiment by the OEO. The rural areas of the country by and large have been bypassed completely by the Federal housing efforts.

Mrs. GREEN of Oregon. I remember, the time the gentleman offered it, I called the Committee on Banking and Currency and asked how many housing programs we had for rural America and the answer from the chief of staff was—"Oh, a slew of them."

I said, "How much did we spend last year?" It was several hundred million dollars—I have forgotten how much.

Does the gentleman feel that with the several programs we already have and with several hundred million dollars being spent that if they will not work, that now with a new program under a new agency—OEO— with $10 million it will work. It will eat up new administrative costs in the new bureau or agency—that we can be sure of.

Mr. PERKINS. This is more or less an experiment. I think the money will be well expended and I hope the money is appropriated in order to allow some demonstration projects that will prove beneficial to rural America insofar as housing is concerned.

In my area, the Appalachian area, housing is the greatest problem that we have and the other programs have not worked in the rural Appalachian area.

Mrs. GREEN of Oregon. I thank the chairman. Though, I am not persuaded a "war on poverty" housing program will better insure good programs than HUD or Farmers Home Administration housing programs. The second question goes to the tendency on the part of the OEO experts to transport youngsters to various parts of the world with taxpayers' dollars. The most recent one which has created a great deal of press comment is in regard to the 67 youngsters from New Jersey who were taken on a trip to Europe and to Africa with "War on Poverty" funds. The chairman may recall that a few years ago the OEO took a group of youngsters to South America for the summer months and the explanation from the Director of the OEO at that time was to give them cultural advantages—that rich young people traveled abroad—why was it not all right for poor children to have the same opportunities?

If the chairman recalls, I offered an amendment designed to stop this traveling abroad at taxpayers expense—unless it was to become Federal policy to provide funds for all young people to travel abroad courtesy of the American taxpayers.

Then there was a more recent incident where the OEO brought presidential scholars who qualified under the poverty guidelines—brought them to Washington with all their expenses paid while other presidential scholars in my area and in other areas had to work during the summer picking beans and berries and working in various kinds of activities to pay for their trip back here and to pay for their expenses even though they were also presidential scholars. But OEO paid for the selected ones.

I can recall these three instances and I suspect that for everyone that we know about, there are others that happen.

Would the chairman tell me—is there anything in the conference report that would prevent—I mean an affirmative action or statement on the part of the conferees that the OEO is forbidden from spending poverty funds to take youngsters to foreign countries for the summer or other times, or paying their expenses back here to Washington on trips which other young people pay for with the money they earned? It seems to me very unfair that middle-income kids have to work to pay their expenses—but individuals under the Office of Economic Opportunity have the free ride.

Is there any language that would prevent these kinds of expenditures in the future?

Mr. PERKINS. Let me say to the gentlewoman, in my area not one-third of the youngsters who are eligible to participate in the poverty programs have that opportunity. It was never intended that the program be administered in the way that the gentlewoman describes—traveling abroad and paying expenses—was not the intention of the committee or the part of the Congress.

Mrs. GREEN of Oregon. I thank the gentleman.

Mr. PERKINS. I think it is an arbitrary decision where the administrators of a program make decisions of that type and I think they are clearly violating the intention of the Congress and of the law. I do not know of any specific provision in the bill prohibiting traveling abroad because it was intended that these funds be to benefit the poor in the United States.

Mrs. GREEN of Oregon. Then the answer of the chairman is that there is no language that actually would prohibit them from doing this in the future?

Mr. PERKINS. Well, I have not heard of that many instances, but I do know the Governor of New Jersey, our former colleague, vetoed it just as soon as he learned of the situation and as I understand, the grant was canceled because it went far beyond the intent of the Congress.

Mrs. GREEN of Oregon. The third question I would like to ask is this.

During hearings in the committee on the ACTION program, and ACTION sponsored programs connected with colleges and universities where college and university students are doing volunteer work in a community, if the chairman will recall, I brought to the attention of the committee that ACTION required as a criteria for eligibility for Federal funds that any institution of higher education must agree to give students academic credit at that university for community work the students did. If the chairman recalls, I introduced an amendment which would prohibit the OEO from requiring as an eligibility criteria the granting of credit to students. The committee and the House approved this amendment.

The reason I offered the amendment was because it seemed to me that this is a very unwise departure on the part of the Federal Government and of the Congress to get into the internal operation of a college or university and require it to give credit for a specific program for which the university or college itself might or might not want to grant credit.

Mr. PERKINS. I certainly agree with the gentlewoman from Oregon.

Mrs. GREEN of Oregon. Is this provision in the conference report?

Mr. PERKINS. I never have disagreed with the gentlewoman along that line. It is not intended that the OEO interfere with the workings of any college.

Mrs. GREEN of Oregon. But my question, Mr. Chairman: Is that amendment that I offered and that was approved by the House—is that a part of the conference report, or was it deleted?

Mr. PERKINS. I am not certain, but I know that I supported your position. I supported the gentlewoman on that amendment in committee.

Mrs. GREEN of Oregon. I want to direct the attention of the chairman to page 25 of the conference report, it refers to this:

> The House bill prohibited any funds appropriated for programs administered by the Office of Economic Opportunity or ACTION from being used to finance any activity in which students in higher education perform voluntary or community service where, as a condition for eligibility for funds, an institution is required to award credit to students for training or experience derived from such voluntary or community service. There was no comparable Senate provision. The House recedes.

So, I must assume that the House did recede and that it is not a part of the conference report.

Mr. PERKINS. I have had my recollection refreshed by counsel. He tells me, and it is true, that the universities in the country requested that we drop the program because they felt that they could not give credit for the university year for ACTION program, and at the urging of the universities the section was dropped in conference.

Mrs. GREEN of Oregon. You say the universities felt that they could not give credit? That is what my amendment provided—that ACTION or no other agency could require a university to give academic credit for community work.

Mr. PERKINS. If your amendment was adopted, that is correct.

Mrs. GREEN of Oregon. But as a result ACTION may continue to require universities to give credit now because my amendment was deleted in conference.

Mr. PERKINS. No, they are not required to give credit.

Mrs. GREEN of Oregon. You just said, "No, they are not required to give credit"—and yet the House receded on the amendment, so I must assume that ACTION is free to continue its policy to require a college or university to give credit to students funded by Federal programs under ACTION's jurisdiction or the university will not receive the funds.

Mr. PERKINS. It is not required. It is my hope that the universities will work out an agreement with ACTION to their mutual satisfaction and that no one will be forced to do anything against their will.

Mrs. GREEN of Oregon. The chairman says "it is not required"—but neither is it prohibited. I read from the conference report just a moment ago and I fear the conference action will now be interpreted as congressional approval of ACTION's policy in the past. Mr. Speaker, for these three reasons and others, I find myself in a position where I cannot support the conference report. Some individuals may view any vote against "war on poverty" funds the same as a vote against "God, mother, or country." Yet when millions and millions of dollars appropriated to try to end poverty—are indeed spent for other purposes—it seems to me, at a minimum hypocritical, and even a betrayal of the interests of the poor to allow funds to be continually wasted or misspent. In Federal, State, and local funds, this country is spending more than $40 billion a year on programs designed exclusively for the poor; this includes welfare, public housing, food stamps, medical services for ADC, et cetera; programs for which middle-income Americans are not eligible. The OEO or war on poverty funds comprise only a fraction of the total—but of all the other programs to help the poor, I know of few examples that can match OEO in waste, inefficiency and in some instances outright misuse of moneys appropriated.

It is high time we reviewed the duplication, the overlapping, the waste and put money only in those programs that have an affirmative record of accomplishment.

The SPEAKER. The time of the gentlewoman from Oregon has expired.

Mr. PERKINS. Mr. Speaker, I yield such time as he may consume to the gentleman from Michigan (Mr. William D. Ford).

Mr. WILLIAM D. FORD. Mr. Speaker, I did sign the conference report, and I shall not therefore today vote against the conference report. If I detect the sentiment of the House, it is weary of the efforts to secure passage of legislation extending the Economic Opportunity Act in such a fashion that it will incur no veto by the President. In all honesty I must say that such an appoach is unbecoming the role of an independent legislative branch of the Government.

The conference report authorizations have been reduced to levels below those which can make a meaningful commitment to a major domestic problem; also 2 years' effort to establish a procedure by which legal services programs could be insulated from political manipulation and effectively administered with inputs of professional standards and the needs of poor clients has been thwarted by the threat to the conference that if the Legal Services Corporation were retained in the bill and the funding levels for poverty programs were not substantially reduced, the President would veto the poverty bill for the second time.

Mr. Speaker, George Orwell's prediction for 1984 has missed the mark by 12 years. It is here now just as in the name of peace we are waging war; just as we are repudiating the "welfare ethic" we are doubling the welfare roll during the current administration; just as we have been "moving in the direction of full employment" we have doubled unemployment.

Mr. Speaker, in this stage of events the administration apparently feels free to ignore even recent history for its actions of the day. In connection with the Legal Services Corporation, let me remind my colleagues that on May 5, 1971, with great fanfare the administration submitted its proposal to establish a Legal Services Corporation. The bill, H.R. 8163, was introduced on May 6 by Mr. Quie for himself and Mr. Gerald R. Ford, Mr. Erlenborn, Mr. Dellenback, and Mr. Poff.

That measure called for the formation of an independent Legal Services Corporation governed by an 11-member Board of Directors appointed by the President with the advice and consent of the Senate. No more than six members of the Board could be a member of any one political party.

In this respect the proposal differed markedly from bipartisan legislation introduced by me and by 102 other Members of the House on March 18. There was a marked difference because the legislation of March 18, H.R. 6360 and H.R. 6361, would have truly insulated the Corporation from political manipulation by requiring a 19-member Board of Directors to be composed of six legal organization members—that is the president of the American Bar Association, the president-elect of the American Bar Association, the president of the National Legal Aid and Defender Association, the president of the American Association of Law Schools, the president of the American Trial Lawyers Association and the president of the National Bar Association—six members, three selected by the Clients' Advisory Council and three selected by the Project Attorneys' Advisory Council; five members appointed by the President; one member appointed by the Chief Justice of the United States and one member to be the Executive Director of the Corporation selected by the Board.

Such a composition, in my judgment and in the judgment of the numerous cosponsors of this legislation, would have truly insulated the Legal Services Corporation from political manipulation but at the same time assuring the formulation of sound and effective policies governing the provision of legal services to the poor.

In my judgment, these strong provisions in H.R. 6360 were substantially diluted in the process of clearing the measure through the Education and Labor Committee, when the Legal Services Corporation became a new section in H.R. 10351 reported by the Education and Labor Committee on September 8, 1971 (H. Rept. 92–471).

Mr. Speaker, the legislation to create a Legal Services Corporation received careful study and consideration by the committee. Hearings were held for 6 days in March of 1971, 11 days in April, 10 days in May, and 2 days in June. Subsequently, the proposal was debated and amended in five open legislative sessions of the committee in July.

As the measure passed the House, the Legal Services Corporation Board of Directors was to be appointed largely at the discretion of the President. In this respect the appointing power read as follows:

> Sec. 1004. (a) The Corporation shall have a board of directors consisting of seventeen individuals appointed by the President, by and with the consent of the Senate, one of whom shall be elected annually by the board to serve as chairman. Members of the board shall be appointed as follows:
>
> (1) one member shall be appointed from lists of nominees submitted by the Judicial Conference of the United States;
>
> (2) seven members shall be appointed from among individuals in the general public, no fewer than three of whom shall be members of the bar of the highest court of a jurisdiction;
>
> (3) two members shall be appointed from among individuals who are eligible for assistance under this title after due consideration is given to the recommendations of the client members of the Advisory Council as established in 1003(c);
>
> (4) two members shall be appointed from among former legal services project attorneys after due consideration is given to the recommendations of the attorney members of the Advisory Council;
>
> (5) one member shall be appointed from lists of nominees submitted by the Association of American Law Schools;
>
> (6) four members shall be appointed from lists of nominees submitted by the American Bar Association, the National Bar Association, the National Legal Aid and Defender Association, and the American Trial Lawyers Association. Members appointed under this clause subsequent to the initial board shall be from lists submitted by the American Bar Association, the National Bar Association, the National Legal Aid and Defender Association, and the American Trial Lawyers Association in accordance with procedures established by the board of directors.

Following passage by the Senate, the ensuing conference report gave the President greater control who was to serve on the Board. In this regard the conference report (H. Rept. 92–682) provided:

> "Sec. 904. (a) The Corporation shall have a board of directors consisting of seventeen individuals appointed by the President, by and with the consent of the Senate, one of whom shall be elected annually by the board to serve as chairman. Members of the board shall be appointed as follows:
>
> "(1) Six members shall be appointed from among individuals in the general public, not less than three of whom shall be members of the highest court of a State.
>
> "(2) Two members shall be appointed from lists of nominees submitted by the Judicial Conference of the United States.
>
> "(3) Two members shall be appointed from among individuals who are eligible for assistance under this title from lists of nominees submitted by the Clients Advisory Council.
>
> "(4) Two members shall be appointed from among former legal services project attorneys from lists of nominees submitted by the Project Attorneys Advisory Council.
>
> "(5) Five members shall be appointed as follows—
>
> "(A) one member from lists of nominees submitted by the American Bar Association;
>
> "(B) one member from lists of nominees submitted by the Association of American Law Schools;
>
> "(C) one member from lists of nominees submitted by the National Bar Association;
>
> "(D) one member from lists of nominees submitted by the National Legal Aid and Defender Association; and
>
> "(E) one member from lists of nominees submitted by the American Trial Lawyers Association.
>
> Each initial list and any subsequent list shall include at least three and not more than ten names for each position to be filled.

Despite this, though both Houses approved the conference report extending the Economic Opportunity Act and making provision for the Legal Services Corporation, the President vetoed the measure on December 9, 1971.

On February 2, 1972, following additional hearings and markup of new legislation, the Education and Labor Committee reported H.R. 12350, the Economic Opportunity Amendments of 1972. Again, the measure included provisions for the creation of a National Legal Services Corporation vesting in the President largely the power to appoint the Board of Directors but not vesting in him the total discretion which he had called for in H.R. 8163.

Upon Senate passage of H.R. 12350, House and Senate conferees diligently hammered out the differences in the bill and in a conference report filed on July 26, 1972, made provisions for the creation of a Legal Services Corporation vesting far more discretion in the President in appointing the Board of Directors than was provided in either the House or Senate-passed versions of H.R. 12350.

I had grave misgivings about the propriety and most certainly the legislative wisdom of giving the President more power in the appointment of Directors than either the full House or the full Senate had been willing to do in their original treatment of H.R. 12350. Nevertheless, we were bluntly told by those who were purported to know the wishes of the White House that unless this kind of power and authority over the Board were given to the President there was a very good chance that the President would again veto an extension of the Economic Opportunity Act.

Mr. Speaker, sooner than the ink was dry on this conference report (H. Rept. 92-1246), the rumors were prevalent that the conference report faced almost certain Presidential veto. Undoubtedly this influenced the recommital by the Senate of the conference report.

Mr. Speaker, the new conference report on H.R. 12350 (H. Rept. 92-1367) filed on August 18, 1972, contains a "bare bones" extension of the Economic Opportunity Act. Deleted are the additional authorizations for the Economic Opportunity Act which cleared the House of Representatives in both previous bills. Authorizations for Headstart are sharply reduced and provisions to create a Legal Services Corporation have been deleted entirely.

Mr. PERKINS. Mr. Speaker, I yield the remainder of my time to the distinguished gentleman from New York (Mr. SCHEUER).

Mr. SCHEUER. Mr. Speaker, I wish to address my remarks to one specific section of the conference report.

Section 16, "Special Assistance," empowers the Director to provide financial assistance for programs designed to serve low-income individuals, particularly the elderly, who are not being effectively served by other OEO programs.

This section is the direct result of an amendment I offered on the floor of the House on February 17, 1972. The amendment in turn was a result of hearings held by Field Subcommittee No. 1 of the Education and Labor Committee in New York in June, 1971.

Testimony was presented to this subcommittee by S. Elly Rosen representing the Association of Jewish Antipoverty Workers. Mr. Rosen contended that the Jewish poor in New York City were not being served by the poverty program.

Upon the conclusion of the hearings, I asked both OEO and the New York City Human Resources Administration, to conduct separate investigations of Mr. Rosen's charges.

These investigations subsequently confirmed the substance of Mr. Rosen's allegations. The reports concluded that large numbers of the poor in New York City resided in areas other than the 20 officially designated poverty neighborhoods and were not, therefore, eligible to participate in OEO-sponsored programs. The reports also noted that the vast majority of OEO programs were designated to serve the young and that the elderly poor who did in fact live in the 20 poverty neighborhoods were not being served by these programs.

New York City reacted to these findings in a positive way. A $1 million grant was obtained from the State for the Jewish Agency for Service for the Aged to establish a citywide program to serve the needs of the Jewish elderly poor whether or not they resided in officially designated poverty areas.

More recently, Human Resources Administrator Jule Sugarman met with representatives of other ethnic groups, Italians, Greeks, and Orientals, to devise programs which will serve the poor amongst them who are not currently being served by OEO programs.

Mr. Speaker, I have supported and will continue to support the Office of Economic Opportunity and its emphasis upon helping the youthful low-income population break the cycle of poverty.

However, there are low-income individuals, primarily the elderly, who are not currently receiving services from OEO either because they reside in areas not within the jurisdiction of community action agencies or because they are elderly and are not part of a prime target population of OEO.

I wonder if the gentleman from Minnesota (Mr. QUIE) would not also attest to the fact that it is the consensus of the Congress and the intent of the Congress that the elderly poor be served in meaningful ways?

Mr. QUIE. Mr. Speaker, if the gentleman will yield, the gentleman is correct. The elderly poor should be served in a meaningful way. But I do not say that we should include them here in a duplicatory program at all. The Older Americans Act is where we intended they be served, but if they are not being served in some instances there, at least there is authority to serve them here. But I hope the Director will not have duplicate programs that will duplicate programs under the Older Americans Act.

Mr. SCHEUER. None of us want duplicative programs, but it is clear that some of the elderly poor are not being served by any Federal program. It is my hope that section 16 will be used by the Director of OEO to support efforts, such as those of New York City, to remedy this situation.

Mr. QUIE. If the gentleman will yield further, another thing that bothers me, and I like it better here, in this language we do not lay out what we are going to do and then do not do it. I think one excellent program was in the nutrition bill but it included more people than we could ever fund. I think we ought to zero in on the target, and not promise to do more than we can do.

Mr. SCHEUER. I thank my colleague, the gentleman from Minnesota.

Mr. QUIE. Mr. Speaker, I yield such time as he may consume to the gentleman from Wisconsin (Mr. STEIGER).

(Mr. STEIGER of Wisconsin asked and was given permission to revise and extend his remarks and include extraneous matter.)

Mr. STEIGER of Wisconsin. Mr. Speaker, it is with mixed emotions that I rise in support of the conference report. Although the legislation contains many programs of vital importance to the quality of life in our Nation, I feel that we have missed the opportunity to significantly improve the delivery of legal services to the poor. The conferees voted to delete the provision for an independent nonprofit Legal Services Corporation only after making every reasonable attempt at compromise. After more than two intensive years developing the proposal for a corporation, I feel deeply disappointed that we will not see enactment of this measure during this session. Since the independent Legal Services Corporation has twice been approved by the House, I believe my colleagues deserve a full and detailed explanation of the attempt by the conferees to develop a workable compromise.

THE VALUE OF THE LEGAL SERVICES PROGRAM

There is no question, Mr. Speaker, that the legal services program has been one of the most controversial agencies of the Federal Government. That is to be expected, when thousands of heretofore unrepresented citizens gain access to the rights and remedies in law that have been designed for all Americans. Yet in spite of the critical attention focused on the program, it has generally enjoyed the support of leading citizens, both in and out of Government. As Vice President SPIRO T. AGNEW recently told the Texas Bar Association:

> Since the inception of the Legal Services Program, most members of the American Bar have demonstrated their continued and steadfast support for it. In a variety of ways, our profession has proven its sincere interest in providing legal assistance to the poor. This is indeed commendable.
>
> The Legal Services Program has done a great deal of good by furnishing poor people with legal counsel and effective access to the courts. The lawyers in the program have generally reflected great credit on our profession through their dedication to the concept of justice and their willingness to sacrifice self-interest in order to help poor people.
>
> I want to emphasize that I am very much in favor of providing legal services for the poor. Inability to afford counsel should not and must not affect one's right to justice. Furthermore, contrary to what you may have heard, I am not opposed to suits against government to redress grievances. Anyone with a legitimate grievance against a governmental agency or instrumentality should have the opportunity to obtain a resolution of that grievance.

THE PROPOSAL FOR AN INDEPENDENT CORPORATION

As the Vice President has noted, those with legitimate grievances against governmental instrumentalities must have an opportunity to obtain justice. Unfortunately, it has become all too clear that such a program cannot effectively preserve the attorney-client relationship if it is itself an ordinary instrumentality of the Federal Government.

In recognition of the problems created by locating legal services in the Office of Economic Opportunity, the President's Commission on Executive Reorganization declared:

> We believe strong that its (the Legal Services program) retention in the Executive Office of the President is inappropriate. At the same time, it is a unique Federal program which extends the benefits of the adversary process to many who do not have the ability to seek legal help.
>
> In our view, this program should be placed in an organizational setting which will permit it to continue serving the legal needs

> of the poor while avoiding the inevitable political embarrassment that the program may occasionally generate * * *
>
> Therefore, we recommend that the functions of the Legal Services program be transferred to a non-profit corporation chartered by the Congress.

The proposal to establish an independent corporation received the strong support of President Nixon in the spring of 1971:

> This program can provide a most effective mechanism for settling differences and securing justice within the system and not on the streets. For many of our citizens, legal services has reaffirmed faith in our government of laws. However, if we are to preserve the strength of the program, we must make it immune to political pressures and make it a permanent part of the system of justice.

MEETING THE CONCERNS OF THE PRESIDENT

Since that time, the debate has centered not on the question of whether there should be a Legal Services Corporation, but rather on the degree of independence that institution should be given. The Congress has felt that the highly respected bar associations and legal aid groups should play a specific role in selecting members for the Board of Directors. Such legislation has twice been approved by both the House and the Senate. The President, however, has expressed a desire to have a free hand to select the Board. Also, in vetoing the initial version of this legislation, the President asked that steps be taken to: first, insure the accountability of the corporation to the American people; second, establish a degree of control by our governmental authorities; and, third, confine the activities of program attorneys to the purposes for which the program was designed—legal representation of the indigent.

Both Houses gave detailed attention to the President's concerns during the spring. In the Senate, every administration-sponsored amendment was accepted on the floor. The conference committee met in July amidst speculation that unless we further altered the legislation, the bill would be vetoed. The veto rumors came only from low-level officials—never from the President himself. I contended that we should not make further changes, since we had been reasonable in giving the President freedom to directly appoint a majority of the Corporation's Board of Directors and to choose the rest from lists submitted by the Nation's highly respected professional bar and legal aid groups. I also argued that any further grant of power to the Executive over appointment to the Board of Directors would unnecessarily weaken the independence of the Corporation from the political process, the very problem this mechanism had been designed to deal with.

The Senate conferees, however, seemed less interested in designing a bill to meet the needs of the legal community than in setting up an organization to fit every requirement of the executive branch.

Mr. Speaker, careful consideration of the conference report submitted to this body on July 26 will demonstrate that the conferees had paid close attention to the issues raised by the President, and forthrightly met every objection. I shall include an analysis of that report in the RECORD following my remarks.

Basically, the conference granted the executive the power to appoint all members of the Board of Directors, removing the requirement that he choose some from mandatory lists submitted by the bar associations and legal aid groups. We insisted, however, that the legislation retain language allowing these knowledgeable organizations to make suggestions to the President for appointments to the Corporation's directorship. The conferees also placed strict prohibitions on lobbying and political activities, and provided for detailed oversight procedures for the Congress and the President.

The conference committee sent the bill back to both the House and Senate for final approval. We were set to vote and forward the bill to the President before the recess, when unexpectedly the Senate conferees decided to recommit the bill for further revisions—a highly unusual procedure.

We had no choice but to return to the conference, where the Senate's representatives told us they still feared a veto. They wanted us to remove even the provision which would allow the legal profession to submit nonbinding recommendations—which the President would be free to accept or reject—for membership on the Board of Directors.

I was convinced that the conference committee had already designed a bill the President could sign. I felt any further weakening of the legislation would break faith with the legal profession and the client community, seriously damaging the delivery of legal services to the needy. The Senate conferees, however, absolutely refused to approve any legislation unless it further undermined the independence of the Corporation. It became clear they had little interest in a strong legal services program, and that we would have no OEO bill unless some further compromise was achieved.

I then proposed that we keep the program within OEO and strengthen it by establishing an associate director for legal services, a prestigious advisory council, and removing the State's veto power. The House conferees agreed to this compromise, but the Senators still refused to go along.

At this point, the House conferees faced a dilemma: would the legal services effort be better off in a watered-down corporation, or would the program fare better by remaining unchanged in OEO? We consulted with a wide variety of project attorneys, client groups, and leaders of the American bar. It was their overwhelming opinion that the Senate's proposal was untenable, and that the program would be more successful in OEO than in an emasculated corporation. Acting on this advice, the proposal for the Legal Services Corporation was stricken from the bill.

Of course, despite this setback, the program will continue to function within the Office of Economic Opportunity. I continue to believe our original proposal was sound, and I remain heartened by the fact that it was twice accepted by both the House and the Senate. I am convinced that in time the administration and future conference committees will see the merit in approving a strong and independent Legal Services Corporation to serve people who cannot afford a lawyer.

The analysis referred to follows:

ANALYSIS OF HOW THE FIRST CONFERENCE REPORT (NO. 92–1246, JULY 26, 1972) MET THE OBJECTIONS EXPRESSED BY THE ADMINISTRATION

I. ACCOUNTABILITY

Both the President and the Congress were given the authority to inspect the records of the Corporation.

The Office of Management and the Budget, and the Office of Economic Opportunity were allowed to review and comment on the budget and other activities of the Corporation.

State Bar associations were given the opportunity to review and comment upon grants to be made in their states.

The Executive Committee was structured to require that three of the five members come from the public appointees of the President.

Advance notice was required of all Corporation meetings, and such sessions were to be open to the public.

The Corporation had to make annual reports to the Congress and the President.

There was to be an annual Congressional review of funding for the Corporation (and it should be noted that the Administration's bill called for three year authorizations.)

Independent audits were to be made annually.

II. CONTROL

The legislation gave the President complete authority to appoint all members of the Board of Directors, and removed all requirements for mandatory lists, retaining only language allowing the bar associations and legal aid groups to submit non-binding recommendations.

The Administration fully controlled the transition since the Director of OEO was made the incorporating trustee.

The authorization for the Corporation was limited to two years (again, it should be noted that the Administration bill offered less control, in that it created a permanent authority.)

III. RESTRICTIONS ON ACTIVITIES

The conferees retained the language of the gentleman from Texas (Mr. Cabell) concerning standards of eligibility for the client community.

A strict prohibition was made on the use of legal services funding for all partisan and non-partisan activities on behalf of political candidates.

All employees of the Corporation were to be covered by the Hatch Act.

Employees of the grantees were strictly prohibited from using their official status or facilities for their private political activities, and the Board was allowed to issue guidelines to circumscribe these activities.

Members of the Board were prohibited from participating in decisions which would have affected programs in which they had an interest.

The outside practice of law was prohibited except in cases of specifically authorized pro bono work.

Soliciting and advertising were prohibited (a concern which had been overlooked in the original administration proposal).

Guidelines for appeals were established.

Neither funds nor personnel were to be utilized in any criminal proceeding. Also, the substance of the amendment offered by the gentleman from Missouri (Mr. ICHORD) was retained, giving the Corporation the authority to limit suits against law enforcement officials arising out of actions or failures to act in connection with criminal convictions.

In addition, strict limitations were placed upon the manner in which legal services attorneys pursue their activities. As Vice-President Agnew has noted, law reform is a legitimate activity, while certain concerns should be kept in mind: "Law reform . . . should be pursued through responsible professional representation before legislatures and governmental agencies and through amicus briefs or intervention in existing cases—not through demonstrations or other high pressure tactics."

The bill reported by the conference committee on July 26 directly addressed the issues raised by the Vice-President:

The House accepted the strict, administration sponsored controls in the Senate bill on legislative advocacy, limiting the role of legal services employees to requests by a client or member of a legislative body.

The legislation also forbade the legal services attorney to identify the grantee or corporation with the cause at issue. This concept reflected the idea that even a private law firm does not necessarily "identify" itself with its client's goals, even though it would provide complete and unqualified representation for its client's interests.

Extra-legal activities, particularly so-called "confrontation politics" were rigidly proscribed. This provision included prohibitions on illegal picketing, boycotting, demonstrations, and any violent activity.

STRENGTHENING THE CORPORATION

Since even this compromise was dropped when the bill was recommitted, the language of the July 26 report is no longer of crucial importance. However, in the interest of clarifying future discussions, I should like to address several items in the July 26 report essential to the development of a viable Legal Services Corporation.

I. TRANSITION PERIOD

Even though the conferees had deleted from section 903 any statutory requirement for the Director of OEO (as trustee) to consult with the National Advisory Committee on Legal Services in carrying out his responsibilities, the conferees, as strongly indicated in the July 26 conference report, fully expected the Director to utilize the expertise of, and consult with the NAC in carrying out each and every responsibility under this section. It was expected that the NAC would be consulted on a regular and periodic basis and would be provided the necessary resources to assist in carrying out these important functions. The conferees were referring to the NAC as constituted on 15 April 1972 as was detailed in the Senate provision in this regard.

The functions of the Director of OEO, as trustee, during the initial approximate 90-day period (until the first meeting of the Board) were limited to the functions specifically outlined in Section 903 (as qualified in Section 905).

The Conferees, and members of the relevant committees felt that the nature, operations, personnel, and commitments of the program in OEO should remain stable during the entire transition period. In fact, Section 916(b) required all personnel employed by the Office of Legal Services in OEO to be transferred to the Corporation. In the opinion of the conferees, it was not intended that the Director of OEO alter the direction or nature of the program during this period. It was hoped that the Director and the Board would cooperate during the second 90 day period in carrying out these sentiments.

II. LEGAL SERVICES LAWYERS SEEKING REFORM ON BEHALF OF THEIR CLIENTS

The Conferees adopted a Senate Amendment slightly altering the language and policy section regarding "securing orderly change" and "resort to orderly means of change" be stricken in favor of "settlement of disputes". This was intended to remove the connotation that legal services attorneys are overly aggressive in seeking change and authorized to seek change by lawless and violent means. Senator Javits stated on page 23259 of the Congressional Record on 29 June 1972 "this is a process of peaceful rather than revolutionary change." Senator Cooper, the proponent of the amendment stated "when I raised this question, I certainly did not want my proposal to suggest any inhibitions upon the right to seek change." Senator Cooper stated further "of course, according to the Canons of Ethics lawyers would represent the people in every proper way that would be required to represent them."

In addition, it was seen as clear from the statute and the reports of both committees that the recipients of legal services must be guaranteed the right to seek any lawful objective through any legally permissible means granted under our system of law. As President Nixon stated on 5 May 1971 in a message to Congress urging the creation of a National Legal Services Corporation: "The legal problems of the poor are of sufficient scope that we should not restrict the right of their attorneys to bring any type of civil suit. Only in this manner can we maintain the integrity of the adversary process and fully protect the attorney-client relationship so essential to our judicial process."

III. REGULATION OF PRIVATE POLITICAL ACTIVITIES OF EMPLOYEES OF PROGRAMS ASSISTED BY THE CORPORATION

Section 907 allowed the Board to promulgate appropriate guidelines relating to the private activities of employees of programs assisted by the Corporation. This provision was originally placed in the bill by the previous House/Senate Conference in November 1971. It was tied to the legislatively enacted language regarding the identification of the program or the Corporation with the private political activities of employees. In fact, the Corporation's authority in this area was necessarily limited because a distinction had been made in the legislation between corporate employees who would have been subject to the Hatch Act, and employees of program assisted by the Corporation who would have been restricted only by subsections (1) and (2) of Section 1502(a) of Chapter 15 of Title 5 of the United States Code.

IV. CLIENT ELIGIBILITY

The Conferees accepted the House Amendment, Section 906(a) with regard to the establishment of eligibility standards for clients. This amendment was introduced by the gentleman from Texas (Mr. Cabell) on 17 February establishing the authority for the corporation to prescribe criteria for the establishment of eligibility standards. The statement by Mr. Cabell and the colloquy with other Members indicate clearly that these guidelines should be flexible in terms of criteria and area of the country, that local governing boards would have been allowed to establish their own guidelines under these circumstances, and that this amendment was a further amplification of Section 906(a) (8).

V. CONCLUSION

I should like to note that all the conferees—representing both parties and the full spectrum of views on legal services—signed the July 26 conference report.

Mr. QUIE. Mr. Speaker, in answer to the colloquy with the gentleman from Iowa (Mr. KYL), I indicated to the gentleman that part B on page 15 of the conference report would go to the Office of Economic Opportunity unless the Director delegated it to the Department of Agriculture. When I sat down I realized I had not answered correctly, and on page 20 of the report there is a prohibition against the transfer of title VII of this act to another agency. Therefore it would be administered only by OEO and it would take congressional action in order for the Secretary to transfer it over.

Another comment I would like to make, since the gentlewoman from Oregon raised the question of sending young people to another country, I recall other instances of that nature, and as far as I am concerned one way we could help eliminate some of what I call mismanagement in the operation throughout the years would be to abolish the regional offices.

I do not like the regional offices, because they are not answerable to anyone. OEO finds out after it is done, here in Washington, and then they have the scandal or mismanagement on their hands.

I have always felt that regional office responsibilities ought to be handled through the States. Then if there were a situation like that, the Governor of New Jersey would have been responsible, because the administration in the State would have been under his auspices or under the State auspices. The Governor and the State legislature are answerable to the people of the State.

That is one of the problems with respect to this whole organization and the way it has been operated through the years, that the regional offices are not answerable to the people.

So long as that is the case, we are going to have trouble.

The Federal Government, in its effort to decentralize, moved to regional offices. It decentralized some of the operations, but that has not been effective.

The people in the regional office, when there is an important decision, turn it over to Washington. But the regional offices makes so many mistakes and is just not sufficiently attuned to the needs of the people as they are peculiar to a State.

I have said before in the committee, and back home, and I say here on the House floor, we ought to abolish the regional offices, and then we would have a better administration of Federal programs when the Federal Government deals through State offices.

Mrs. GREEN of Oregon. Mr. Speaker, will the gentleman yield?

Mr. QUIE. I yield to the gentlewoman from Oregon.

Mrs. GREEN of Oregon. I certainly agree that I would much rather see State administration. Then we might have a much better chance for success.

Would the gentleman also agree that if the Congress just wrote into the law that none of these funds were to be spent for travel of young people outside of the States that would cure it?

Also, at one time we had a $150 a month limitation on what could be spent for a disadvantaged young person, and that was first interpreted by the Federal Agency to mean $1,800 a year but more than $150 might be spent in any given month. Later, as I understand it Congress even removed the $150 a month limitation.

If the Congress would provide these provisions in the law itself—it would perhaps put a stop to the nonsense we are constantly confronted with.

Mr. QUIE. I would say the gentlewoman is absolutely correct.

Mrs. GREEN of Oregon. I am sorry it was not in the conference report a few years ago when the first abuses were called to the attention of Congress.

May I ask the gentleman from Minnesota his understanding of the provision so far as institutions of higher education are concerned. As I understand it now, if ACTION has a program and they pay students to work in a community effort—or a voluntary effort for pay, whatever they want to call it, OEO is now in a position to say to the university or the college, "Unless you give these youngsters academic credit at your institution of higher education for the work they have done, you are not eligible for any funds under the program."

Mr. QUIE. I believe we are talking about ACTION now, as having voluntary programs. Other than that caveat, I would say the gentlewoman is correct.

Mrs. GREEN of Oregon. Does the gentleman know of any time in the area of higher education when the Congress has gone into the internal management of colleges and universities and made a requirement that they give credit for specific programs funded by outside agencies?

Mr. QUIE. I would say the Teacher Corps is the one program I am aware of where it is necessary, if they are going to take part in the program, that they get a master's degree as a result of the Teacher Corps program.

Mrs. GREEN of Oregon. That is where they give a degree under the Educational Professions Development Act. But never have we gone to a university and said, "For this particular program of community work—you shall give credit."

Mr. QUIE. No, I do not know of any program where that is said. Of course, we are not saying that in the legislation here, either.

The question the gentlewoman had was whether the authority then remains to do it, and I would say yes, the authority remains. I do not believe they would be going contrary to law if ACTION set up a program and said that as a result of it they had to give credit for it.

I hope they will not operate that way. I hope it will be done on a cooperative basis, so that it is something the institution of higher education wants to do, rather than being something mandated on the part of the Government.

Mrs. GREEN of Oregon. I thank the gentleman.

Mr. PERKINS. Mr. Speaker, will the gentleman yield?

Mr. QUIE. I yield to the gentleman from Kentucky.

Mr. PERKINS. In the present law there is a prohibition of Federal control. Section 614 states:

> Nothing contained in this Act shall be construed to authorize any department, agency, officer, or employee of the United States to exercise any direction, supervision, or control over the curriculum, program of instruction, administration, or personnel of any educational institution or school system.

That is in the present Economic Opportunity Act, and remains unchanged.

Mr. COLLIER. Mr. Speaker, will the gentleman yield?

Mr. QUIE. I yield to the gentleman from Illinois.

Mr. COLLIER. I have listened to the series of inquiries made by the gentlewoman from Oregon, and I have sensed a great deal of doubletalk here.

One question she asked is why you could not write into this a specific prohibition.

Mr. QUIE. I would say to the gentleman that you can write it in legislation but not here, because this is the conference report. The other body already passed it. We do not have any means of getting at that. We could have done it when the bill passed the House.

Mr. COLLIER. That I understand, but the point is it is not there.

Mr. QUIE. Yes.

Mr. COLLIER. And it could be there. It could be clarified, and we would not have to engage in a lot of doubletalk.

Mr. QUIE. That is right. The scandal occurred too late for us to get it done when the House passed the bill.

Mrs. MINK. Mr. Speaker, I rise in support of H.R. 12350, the Economic Opportunity Amendments of 1972.

As a member of the committee of conference on this important legislation, I support the bill and urge its approval by my colleagues. The basic purpose of the measure is to continue the programs first authorized by the Economic Opportunity Act of 1964, with revisions.

The bill extends the antipoverty program for 3 more years so that our Nation can continue its efforts to help improve the lot of the poor. For all programs administered by the Office of Economic Opportunity, the bill authorizes $840 million for fiscal year 1973 and $870 million for fiscal year 1974, with not less than $328,900,000 reserved for local initiative programs for each fiscal year and $71,500,000 reserved for legal service programs for each fiscal year. In all, $2.36 billion is authorized for fiscal year 1973.

Also provided are funds for alcoholic counseling and recovery, emergency food and medical services, comprehensive health, family planning, senior opportunities, drug rehabilitation, environmental action, rural housing, consumer action, design and planning, youth recreation and sports, training and technical assistance, migrant programs, administration and evaluation, and community economic development.

Of particular importance to me are the funds authorized for the Headstart program. Within the conference committee I offered a motion increasing the Headstart program by $35 million to a total of $485 million in the current fiscal year. I am happy that the conference agreed to this increase.

We must not permit a reduction in the support for Headstart, which has proven its value in helping to offset the educational disadvantage of children from low-income families. The great benefits of Headstart should be offered to more children, not less. The conference bill includes the House provision for the establishment of fee schedules for the Headstart participation of non-low-income children. I hope that this can bring the child development benefits of Headstart to children not now eligible to participate.

Deleted from the legislation are provisions to establish a National Legal Services Corporation. Instead, the existing legal services program will be retained.

I urge the adoption of this greatly needed legislation.

Mr. ROYBAL. Mr. Speaker, I rise in support of the Economic Opportunity Amendments, H.R. 12350, which represents a comprehensive legislative program to aid low-income groups in this country.

The number of economically disadvantaged people in the United States today is 25.9 million people or more than 12.8 percent of the country's population. The vast majority of people living in poverty are children, women, the elderly, and the minority groups.

I have consistently sponsored legislation of this type and supported the Equal Opportunity Act proposed during both sessions of this Congress. I would hope that this bill would now receive bipartisan support and that the President would reconsider his past vetoes of similar measures and sign this reasonable compromise into law.

This bill continues the Legal Services program which has provided low-income Americans with greater access to attorneys and appropriate institutions for the orderly resolutions of disputes within our system of justice. The passage of this act will help this country move away from a situation where the size of a person's pocketbook determines not only the quality of legal representation that a person receives but also whether he receives any at all.

This bill also calls for an expanded Headstart program for low- and middle-income children. This will help to promote social interaction between children of all economic backgrounds at a much earlier age.

Next, the passage of the bill will expand the drug rehabilitation program by setting up special programs to promote employment opportunities for rehabilitated addicts and to assist employers who hire former addicts in dealing with addiction and drug abuse among former hard core unemployed. This program gives special priority to veterans and those employers hiring a significant number of veterans.

The bill also provides for an environmental action program whereby persons of low income will be paid for work on projects designed to combat pollution and improve the environment.

Next the bill approves further funding for the Job Corps, the Neighborhood Youth Corps and Vista program.

Last the bill starts an entirely new program known as rural housing development and rehabilitation. It is designed to assist low-income families in rural areas to construct and acquire ownership of adequate housing, to rehabilitate or repair substandard units, and to assist families in obtaining standard housing.

This bill represents a compendium of assistance to the low income and poor of our society and I urge its immediate passage.

Mrs. ABZUG. Mr. Speaker, I rise in support of the OEO conference report, which would extend for 2 years the Economic Opportunity Act of 1964 and initiate sorely needed improvements in the Headstart program.

It is unfortunate that we must consider this particular report today. A bill superior to this one, which provided for a far-reaching child development program and more substantial funding for OEO programs, was passed by the last session of Congress. As you all know, that bill was killed by a cruel and insensitive presidential veto. In its wake, we are left with the improved Headstart program contained in this bill.

The conference agreement before us authorizes appropriations of $3.07 billion for the current fiscal year and $2.9 billion for the coming fiscal year. These appropriations are barely adequate, compared to the original, vetoed funding—and especially compared to the amount of funding that OEO so desperately needs. According to Frank Carlucci, the former Director of OEO, the agency's programs reach only about 11 million of the 24 million Americans the administration admits live below the poverty line; even those who do receive assistance from already understaffed and underfunded OEO programs do not get adequate aid.

It is inconceivable that in the wealthiest nation in the world, with a defense budget in excess of $73 billion, agencies designed to aid the poor should be so impoverished, crippled with a meager budget of $3 billion. We have a responsibility to our forgotten poor, and especially to our children, in whom rest our hopes for a better future.

H.R. 12350 does not include a comprehensive child care program. I had hoped that the Headstart program, its weak substitute, would at least have received more funds. Once again we have a program that appears on paper to be more substantial than reduced funding suggests: Headstart appropriations have been cut from the $1 billion in the House bill to $700 million for the 1973 fiscal year. Reduction of funds means reduction of opportunity, and the end result will be the unrealized potential of many Americans.

I was astounded and dismayed at the action of the conferees in deleting the provisions of the bill providing for the establishment of a National Legal Services Corporation. Such an independent corporation would free legal services from the everyday pressures exerted by politicians and bureaucrats and allowed it to do its great work without such interference. The often-expressed hostility of Mr. Nixon and his friends to OEO legal services makes me fear for its future if it is left within his easy reach.

Other OEO services benefits somewhat from the conference report. The increase in authorized appropriations for VISTA, emergency food, and alcoholic counseling, for example, are welcome, even though they do not begin to approach the amount of funding needed in order for them to be truly effective.

Despite the funding reductions in H.R. 12350, Mr. Chairman, OEO provides vital services to individuals and communities, and I see in the conference report the hope of sustaining financial support, for its programs. Despite President Nixon's veto of comprehensive child care and his harsh and ill-advised criticisms of appropriations basic to minimal maintenance of OEO programs, I urge the adoption of the report.

Mr. PERKINS. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER. The question is on the conference report.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. HALL. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members, and the Clerk will call the roll.

The question was taken; and there were—yeas 223, nays 97, not voting 111, as follows:

[Roll No. 351]

So the conference report was agreed to.

The Clerk announced the following pairs:

On this vote:

Mr. Rooney of New York for, with Mr. Colmer against.

Mr. Addabbo for, with Mr. Hull against.

Mr. Rostenkowski for, with Mr. Nichols against.

Mr. Price of Illinois for, with Mr. Baring against.

Mr. Dent for, with Mr. Dowdy against.

Mr. Reid for, with Mr. Fuqua against.

Mr. Delaney for, with Mr. Henderson against.

Mr. Widnall for, with Mr. Betts against.

Mr. Horton for, with Mr. Camp against.

Mr. Wampler for, with Mr. Dickinson against.

Mr. Robison of New York for, with Mr. Eshleman against.

Mr. Mosher for, with Mr. Kuykendall against.

Mr. Hillis for, with Mr. Schmitz against.

Mr. Schwengel for, with Mr. Veysey against.

Mr. Mailliard for, with Mr. Spence against.

Mr. Hays for, with Mr. Michel against.

Mr. Dingell for, with Mr. Scherle against.

Mr. Blatnik for, with Mr. Schneebeli against.

Mr. Yatron for, with Mr. Davis of Wisconsin against.

Mr. Ruppe for, with Mr. McEwen against.

Mr. Winn for, with Mr. Wiggins against.

Until further notice:

Mr. Celler with Mr. Bow.

Mr. Hébert with Mr. Edwards of Alabama.

Mr. Bingham with Mr. Broomfield.

Mr. Badillo with Mr. McDonald of Michigan.

Mr. James V. Stanton with Mr. Whalley.

Mr. Jones of Alabama with Mr. Pelly.

Mr. Shipley with Mr. Springer.

Mr. Jones of Tennessee with Mr. Halpern.

Mrs. Hansen of Washington with Mrs. Dwyer.

Mr. Pepper with Mr. Pirnie.

Mr. Leggett with Mr. Mathias of California.

Mr. Stokes with Mr. Riegle.

Mr. Van Deerlin with Mr. Shoup.

Mr. Reuss with Mr. Lujan.

Mr. Green of Pennsylvania with Mr. Hastings.

Mr. Pucinski with Mr. Lloyd.

Mr. Dellums with Mr. Gallagher.

Mr. Hawkins with Mr. Hathaway.

Mr. Sisk with Mr. Abourezk.

Mr. Alexander with Mr. Byrne of Pennsylvania.

Mr. Carney with Mr. Caffery.

Mr. Davis of Georgia with Mr. Corman.

Mr. Danielson with Mr. Mikva.

Mrs. Mink with Mr. Miller of California.

Mr. Mollohan with Mr. McMillan.

Mr. Moss with Mr. Dorn.

Mr. Evins of Tennessee with Mr. Eckhardt.

Mr. Ryan with Mr. Galifianakis.

Mr. White with Mr. Seiberling.

Mr. Aspinall with Mr. McCormack.

Mr. Kyros with Mr. Steed.

Mr. Ashley with Mr. Mills of Arkansas.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. MAZZOLI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks on the conference report just agreed to.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

PERSONAL EXPLANATION

Mrs. ABZUG. Mr. Speaker, on August 18, 1972, I was detained on business and missed rollcall No. 346. In the announcement of my position on this vote at pages 29126–27 of that day's CONGRESSIONAL RECORD, the printer inadvertently referred to it as rollcall No. 329.

To set the matter straight. I missed rollcall No. 346, on which I would have voted "yea" had I been present. I was present on rollcall No. 329 and am correctly recorded as having voted "nay" on that occasion.

PERSONAL EXPLANATION

Mr. RONCALIO. Mr. Speaker, I was unavoidably detained in my district and missed the previous rollcall No. 350. Had I been present, I would have voted "yea."

BEVILL OPPOSES GRANTING AMNESTY TO DRAFT DODGERS

(Mr. BEVILL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BEVILL. Mr. Speaker, I understand that a Subcommittee on Administration Practice and Procedure of the U.S. Senate has held hearings on granting amnesty to draft dodgers.

A few weeks ago I cosponsored House Concurrent Resolution 543 which states in substance that no amnesty be enacted by the Congress or exercised by the President.

Mr. Speaker, I am strongly opposed to efforts being made to grant amnesty to draft evaders and deserters from our Armed Forces.

Such a move would be grossly unfair to the hundreds of thousands of young men who met their responsibilities and served their country with honor.

Granting amnesty would mean that the 70,000 young men who dodged the draft and are now living in exile in Canada, Sweden, and other foreign countries would be immune from prosecution. It would mean the release of more than 500 draft resisters now serving in Federal prisons. And it would mean releasing the 9,500 soldiers either serving sentences in military stockades or confined there awaiting trial for violation of the Military Code.

Many young men who served in Vietnam did not agree with our Government's decision to send them there. But they went anyway. Thousands of these men were wounded, many were killed, and some were taken prisoner. Granting amnesty to draft dodgers and deserters would be a grave injustice to those who made such great sacrifices.

It is foolish, in my estimation, to think that the majority of those who refused service did so, because of some high moral purpose. Rather, I believe it was a display of total irresponsibility and cowardice.

In my opinion, it is completely out of order to even consider granting amnesty to anyone while we still have men fighting and dying in Vietnam and while there are men being held prisoner by the Communists.

To grant amnesty would set a dangerous precedent which could have grave consequences in future emergency situations which call for military mobilization.

It would also undermine our system of justice by rewarding those who violated our laws and shirked their duty.

Our Nation is a great nation. And one of the reasons it is great is because courageous men and women, down through the years, have taken up arms when it was necessary to fight for those basic rights which America stands for.

Mr. Speaker, I believe it is time to reassess our values and restate our priorities. Let us turn our attention to those who have served; let us meet their needs and help them readjust to civilian life and stop giving so much time and attention to those who turned their back on their country when they were needed.

CONGRATULATIONS TO WINNERS OF OLYMPIC GAMES

(Mr. LATTA asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. LATTA. Mr. Speaker, I take this time to congratulate all of our winners in the Olympic games. They have performed superbly and brought great honor to this country. However, I particularly wish to single out a winner from Bowling Green State University, David James Wottle, for special praise and commendation. This young man won the 800 meters in 1 minute and 49 seconds. He ran like the champion he is and was so taken in by his win—and rightly so—that he did not remember that he had his hat on when they played our national anthem. When this omission was later called to his attention by the media, he was noticeably shaken and publicly apologized to the people of the United States and further commented that this omission subtracted from the personal satisfaction of his win.

Mr. Speaker, this was an expression of the feelings of a truly great American as well as that of a truly great champion being expressed at the high point of his athletic career and I wish to say to David Wottle that he should not feel badly for his unintentional omission at a time like this. It is only human to forget and this young man may be longer remembered for his heartfelt spontaneous apology to the American people for his forgetfulness at the time of his greatest triumph than he will be for the triumph itself.

AMERICAN GRAIN SALES TO THE SOVIET UNION

(Mr. ROUSH asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. ROUSH. Mr. Speaker, I rise today to protest a situation that has come into the news while the Congress was in recess for the Republican Convention. This is the partially revealed situation regarding American grain sales to the Soviet Union and the resultant effects on the farmers in this country and the whole consumer population.

I was one of those strongly supporting the grain export to Russia when this was announced by the President. I felt that this would be of significant help to the farmer and the American economy given our grain surpluses. But since that time a number of revelations have been forthcoming regarding effects of the purchase, the way in which it has been handled, the kind of favoritism practiced, and the accompanying costs to the American farmer and consumer. These have made me very uncomfortable, and disappointed to say the least. Because I believe this trade could have been a total gain; instead it seems to have had some serious ill effects.

It seems now likely that certain large grain export companies have been privy to advance information concerning the extent of Government subsidy and credit arrangements on export sales of wheat—at least it seems that they have been privy to special and valuable information not given to others equally involved, such as the farmers who grow the crops. Accordingly these companies could purchase wheat before prices went up.

It is estimated that the Russian wheat deal has cost wheat farmers in early harvest areas an estimated $100 million in Government wheat certificate payments. Largely because the rising wheat market could raise the average price to $1.75 per bushel during the July to November marketing period. This will have the effect of reducing the Federal subsidy by approximately 40 cents a bushel. Farmers receive the difference between the average price during that 5-month marketing period and 100 percent of parity, now estimated at $3.03 per bushel, on that portion of their wheat used in domestic markets. Those who sold in July receiving $1.30 to $1.35 per bushel, will find their wheat certificates amounting to only $1.28 per bushel, if the average for the 5-month period is $1.75—making their total return about 40 cents a bushel less than the full parity price. Had they known about the details of the trade expectations, which surely the Department of Agriculture had information on, this need not have happened.

Now, to make matters worse, the USDA has announced that subsidies are getting too high, but they at the same time raised the subsidy from 38 to 47 cents for a period ending 2 days before their announcement. Thus they protected the profits of traders who had been buying on a rising market, but they certainly did not have the farmer in mind.

Upon my return I found a news release from the USDA stating that—

> Every farm region benefited from the record exports of $8.05 billion in fiscal 1972.

The news release went on to say that the 1971–72 export market accounted for at least two-fifths of the U.S. production of wheat.

This is heartening, but I believe, given the story above, it is only a part of the picture. I have some questions I would like the Department to answer about the sale of wheat to Russia:

How much wheat has been sold to Russia?

What price was paid?

Who received the export subsidy and in what amounts over what period of time?

What are the credit terms?

Who pays shipping charges and other costs incidental to the export of the wheat?

What amount of export subsidy is planned for the future? Will it fluctuate with domestic consumption or not?

How does this affect our domestic supply, including our surplus supply?

How much is wheat expected to rise in domestic prices as a result?

I would like to say finally, that I do not object to private corporations carrying out the trade negotiated by the Government. But I do object to their doing so at the expense of: The farmer-producer; of all those processors, such as millers and bakers who rely on wheat; and the American consumer who foots the bill for the subsidy given those selling on the cheaper world market; of the American consumer who suffers a higher cost for domestic wheat products while those buying enjoy a lower cost. So I would like these questions answered. I have today sent a letter to Secretary Butz asking these same questions, but if answers are not forthcoming, I would recommend a congressional investigation of this whole matter.

JACK KEMP PAYS TRIBUTE TO THE MOST REVEREND JAMES A. McNULTY, BISHOP OF THE DIOCESE OF BUFFALO

(Mr. KEMP asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KEMP. Mr. Speaker, the people of Western New York and our country have lost an outstanding spiritual leader as the result of the death Monday of the Most Reverend James A. McNulty, bishop of the eight-county Roman Catholic Diocese of Buffalo.

His death is a great personal loss not only to us in Western New York, but to mankind. He loved and served both with a total and tireless commitment. At the same time, however, we offer thanks for the great legacy this man of God left behind after his 72 years of life, 47 of them as an ordained servant of God and his fellow human beings.

Mr. Speaker, Bishop McNulty epitomized all that is good in America and those of the cloth who serve it, and his leadership will continue through his words and works.

Born in New York City and reared in modest circumstances in a family with six children, he was an outstanding student who graduated with honors from Seton Hall College in South Orange, N.J.

At the age of 25, he was ordained into priesthood at the University of Louvain in Belgium.

Even as an assistant pastor of St. Joseph's Church in Jersey City, his leadership, his gift as a speaker, and his concern for people, community and country quickly became evident.

A lifetime advocate of educational opportunity, he was the executive secretary for the Immaculate Conception Seminary fund drive in New Jersey in 1937. Years later, following his installation in 1963 as the 10th bishop of the Buffalo Diocese, he pioneered "Social Christianity," a project to instill a mature and modernized concept of the Christian faith among high school seniors attending public schools.

With other religious leaders, he endorsed a lecture series entitled "Your Neighbor's Faith" to educate the citizens of Western New York in the tenets of various religious beliefs.

In November 1969, he proclaimed that the first, new Roman Catholic Mass in 400 years would be held in the Buffalo Diocese, a year ahead of the national deadline in 1971.

His ecumenical leadership caused Terence Cardinal Cooke, archbishop of New York to observe in 1970 that Bishop McNulty "life is devoted to the cause of unity. His prayers and his works have for their purpose the strengthening of the unity of God's family on earth."

Throughout his career, Bishop McNulty showed compassion and worked for the downtrodden and oppressed.

He impressed upon his followers the urgency of providing opportunity and dignity to America's blacks and declared that the church is "the best friend of the entire Negro community in Buffalo."

When he was auxiliary bishop of Newark, N.J., he chose the poorest parish in that community among the blacks and other economically disadvantaged groups. He carried his concerns for the poor to Buffalo where, among other actions, he inaugurated drives for money and gifts and recruited for priests, nuns, and volunteers to minister to the people of Latin America.

As a result of his efforts, he was named vice chairman of the U.S. Bishops Committee for Latin America.

Bishop McNulty not only spread the word of God in his sermons, but was a leader in the art of religious communication.

In 1951, he founded the Advocate, the official newspaper of the Archdiocese of Newark. During his spiritual leadership of the Buffalo Diocese, the weekly diocesan newspaper, the Magnificat, became one of the leading religious journals in the United States.

Mr. Speaker, Bishop McNulty was faithful to his God, his community, his country, and his fellow man.

We will miss him as a friend. But all of us are grateful for the time he was among us and for the contributions and inspiration he has left behind.

At this point, Mr. Speaker, I extend my remarks by including tributes to the late Most Reverend James A. McNulty which were carried today in the Buffalo Courier-Express:

Leaders in Many Fields Pay Homage to Bishop McNulty

The late Most Rev. A. McNulty, bishop of the eight-county Roman Catholic Diocese of Buffalo since 1963, was described as a deeply religious and dedicated prelate who had great warmth for his fellow man and outstanding qualities of leadership which inspired his diocese.

He was also called "a saint," and a bishop who will "best be remembered for his concern for the poor and needy."

These tributes were among the following eulogies issued in memory of Bishop McNulty:

The Rt. Rev. Harold R. Robinson, bishop of the Episcopal Diocese of Western New York:

"I wish to convey my sympathy to the family and friends of Bishop McNulty. He was a courteous and conscientious man, completely dedicated to his convictions and the traditions of the Roman Catholic Church.

"He was gracious in offering the use of St. Joseph's New Cathedral for my consecration in 1968. This, along with the other kindnesses he has shown to me and other members of the Episcopal Diocese, will not be forgotten. May God rest his soul and bestow abundant blessings upon him."

The Rt. Rev. Msgr. Joseph E. Schieder, pastor of St. Andrew's Church, Town of Tonawanda.

"It has been my privilege to be a personal friend and confidant of Bishop McNulty's for close to 33 years. I have found him to be a brillant scholar, a gentleman under all conditions, genteel, and a master in the practice of Christian charity. Forever dedicated to the teachings of Christ and the Catholic Church, his passing is a severe blow to me leaving a void in my priestly life.

Richard F. Torrey, president of the Buffalo Area Chamber of Commerce:

"Bishop McNulty's death leaves a deep void—a void which will be felt not only by the Catholic Diocese but by the entire Western New York community. He guided his own church during a demanding era of profound change, personally typifying the spirit of religious ecumenism.

"This outstanding spiritual leader brought to the secular community great wisdom, performing an extremely influential role in the field of business, labor and education. Citizens of all faiths mourn his passing."

George L. Wessel, president of the Buffalo AFL-CIO Council:

"I feel that the death of the Bishop is a great loss to the community and I feel that in the years that he has served here as our bishop he provided the spiritual leadership that is necessary in a community of our type with a predominantly Catholic population. I express my regrets and those of the labor movement to the bishop's family."

Sister Mary Charlotte Barton, GNSH, president of D'Youville College:

"The president, the sister and lay faculty members and the staff of D'Youville College join with the Diocese of Buffalo in expressing bereavement on the death of their spiritual leader, the Most Rev. James A. McNulty, bishop of Buffalo. During the period of his guardianship of the diocese, this dedicated prelate patiently and kindly fostered the church, earnestly serving God's people in one of the most trying eras in the development of the Catholic Church.

"Bishop McNulty strove to protect the best interests of the clergy and the people of Buffalo. Perhaps our deceased bishop will be best remembered for his concern for the poor and needy. He was ardent in promoting the annual charity drive which brought results comparable to his concern. We mourn our loss of his gentle leadership while we rejoice in the released and the reward he will receive from almighty God whom he faithfully served."

Dr. Charles A. Banda, Knight of St. Gregory, president-elect of National Federation of Catholic Physicians Guild:

"The Catholic community of Western New York has lost a great prelate. Bishop McNulty was a deeply religious man who worked diligently for the spiritual enlightenment for the members of his diocese."

Dr. Albert Semit, executive vice president of University of Buffalo, in the absence of Dr. Robert L. Ketter, the president:

"The community will mourn his passing. In passing, however, he has left substantial foundation on which a successor can build."

William G. Armstrong, supreme captain general, Ancient and Illustrious Order, Knights of Malta, and a retired Penn Central Railroad employee:

"It is a tragedy to lose such a great man. My prayers certainly go out to him."

Walter J. Thisegron, a Knight of St. Gregory, a trustee of Catholic Charities of Buffalo and member of the budget committee and retired Western Division public relations director, Niagra Mohawk Power Corp.:

"In this age of changes, within and without the church, the role of the bishop in a diocese of the size and magnitude of Buffalo is a staggering one. Bishop McNaulty fulfilled his role as ordinary of the diocese with courage, wisdom and dignity. He was truly a great shepherd of his flock."

John J. Conaiff, director of Catholic Charities:

"If I were asked to describe our beloved Bishop McNaulty in one word, it would be 'charity'—the charity that Christ Himself spoke of. The lay people of this diocese have lost a noble leader, and I have lost a cherished friend."

Charles R. Turner, a Knight of St. Gregory, chairman of the Buffalo Board of Parking and former president of the Area Council on Alcoholism:

"Bishop McNulty was a saint. His knowledge of and dedication to community services was unfailing, especially in the alcoholic field."

Sister Alice Huber, SSJ, president of Medaille College:

"Bishop McNulty probably has lived through one of the most difficult times in the history of the church in America. The rapidly changing society together with the call for renewal in the Church since Vatican II demanded courage and adjustment of both the clergy and the laity. However, I knew him better in affairs of higher education. Bishop McNulty, like his deceased brother (Msgr. John L. McNulty) who had been president of Seton Hall University, was interested in the problems of higher education. Bishop McNulty was concerned for the need for cooperation among area colleges. He had the joy of seeing this dream fulfilled through the establishment of the Western New York Consortium of public and private colleges. My sympathy is extended to his family."

John G. Wick, Knights of St. Gregory, Knights of Holy Sepulchre, President of Merchants Mutual Insurance Co.:

"It is with a deep sense of personal loss that we mark the passing of Bishop McNulty. History will record his accomplishments in the Western New York diocese as one of the most outstanding of a long line of leading churchmen. He was a shepherd to all his flock in the truest sense, and we were most fortunate to have had his sturdy hand at the helm as he steered the Catholic Church through new and uncharted waters. We should should all join in prayerful thanks to him for a job well done."

The Rt. Rev. Msgr. John J. Conniff, director of the diocese's Catholic Charities:

"The death of Bishop McNulty is a great blow to thousands of workers and the clients of Catholic Charities. In every way, he was the bishop of charity and we will greatly miss his support and counsel and encouragement."

Sebastian J. Bellome, Chief Buffalo City Court Judge:

"The passing away of Bishop McNulty is a great loss not only to the Catholic diocese but to the entire community of Western New York. He was a humanitarian without equal and, as the administrator of the Catholic Church in the Buffalo area, his name will go down in history as among the very best. I will greatly miss him personally because he was a good and revered friend."

Rabbi Isaac Klein, Temple Shaarey Zedek:

"With the passing away of Bishop McNulty, the people of Greater Buffalo regardless of race, creed or color lost a friend and a great force for good. A saintly person with a face that radiated gentleness, wisdom and love, he was a source of blessing to the entire community that went beyond the boundaries of the church that he had served so faithfully. Because he was of great spiritual stature, he was respected and loved by all. We of the Jewish community share the sorrow with our Catholic brethren and wish to express to them our deepest sympathy for the loss of a prince of the Church."

HON. RICHARD H. POFF

The SPEAKER. Under a previous order of the House, the gentleman from Illinois (Mr. CRANE) is recognized for 5 minutes.

Mr. CRANE. Mr. Speaker, it is with humility that I join my colleagues in saluting one of the outstanding Members of this body upon his retirement after more than 19 years of service.

This is a great loss for us all, because our good friend and colleague, the Honorable Richard H. Poff, is commonly admitted by the Members of the House on both sides of the aisle as the outstanding expert on constitutional law in Congress.

Because of the exceptional background which Mr. Poff applies unswervingly to his voting participation here in the Congress, his voting pattern comes through as one of knowledge, principle, and integrity.

Some will probably say that we should have more like him—I can only say that there will never be another like him, who can combine all the manners and grace of a true Southern gentleman with a keen understanding of our most cherished living document—the Constitution—and be able to apply it consistently to his every action in this body of the people.

I salute my colleague, my mentor, and my friend, and Arlene joins me in wishing him and Jo Ann every happiness in the future as he takes up his position on the highest Court of the Commonwealth of Virginia.

A REPORT OF THE 92D CONGRESS

The SPEAKER. Under a previous order of the House, the gentleman from Pennsylvania (Mr. WILLIAMS) is recognized for 10 minutes.

Mr. WILLIAMS. Mr. Speaker, the U.S. economy is continuing strong and is becoming stronger. One year after the President exercised the economic stabilization measures given to him by Congress, it is obvious that they are working. Unemployment is currently 5.5 percent. This 5.5-percent unemployment is lower than it was in the pre-Vietnam war years. As an example, the unemployment rate in 1961 was 6.7 percent.

The inflation rate, which was up to 6 percent annually when President Nixon took office has been reduced to an annual increase of 2.2 percent. It is inflation that steals from the income of everyone and jeopardizes the value of the U.S. dollar.

During the past year, total civilian employment has increased by 2.4 million people, one of the largest 4-quarter increases on record. The Department of Labor has reported that the output per man-hour has increased faster than pay per man-hour for the first time since 1965.

Today, there are 81.7 million people employed, an increase of 5 million over the 76.7 million people that were employed at the end of 1968. Since President Nixon took office, our total armed service personnel strength has been reduced by over 1,300,000, and virtually all of these veterans have been placed in civilian jobs. This rapid increase in civilian employment is higher than the largest increases recorded in the 1960's.

The improvement in our economy is enabling U.S. manufacturers to get back into the world market, and should eliminate the unfavorable balance of trade the United States had in 1971, for the first time in this century. President Nixon's power to impose wage and price controls expires on April 30, 1973, and it is hoped that it will not be necessary to renew this legislation.

Plans for a series of "An Evening With Your Congressman" are being made in an effort to keep me informed of the views of the people. I am planning to spend a series of evenings in the various municipalities of the district to meet with all interested citizens. The evenings will consist of a short talk on the current issues before the Congress, followed by an open question-and-answer period.

The number of U.S. troops in South Vietnam has now been reduced to under 40,000. This means that President Nixon has withdrawn 510,000 American ground troops since he took office, and over 180,500 U.S. ground troops have been withdrawn in the past year.

On August 10, 1972, the House passed a $2.1 billion foreign military assistance bill, H.R. 16029. I voted for this bill to help maintain the military strength of our allies. However, I voted with the majority to strike one section of the bill which directed the President to withdraw all U.S. forces from Vietnam by October 1, 1972, subject to the release of the U.S. POW's held by North Vietnam, the accounting by Hanoi for those reported missing in action, and a cease-fire.

The language which was struck from H.R. 16029 was cruel and misleading to the American people. It held out false assurance of securing the safe return of our missing servicemen and indicated that a U.S. pullout would end the war in Southeast Asia. Neither assumption is reasonable. Any fixed withdrawal date only gives hope to the North Vietnamese, and hinders sensitive attempts at peace negotiations when there is evidence that Moscow and Peking are reducing their aid to North Vietnam.

The language which was struck from H.R. 16029 does not guarantee the return of our missing men and would not end the war, only American involvement in it. President Nixon will have all U.S. ground troops out of South Vietnam this year. However, as long as Communist aggression continues against South Vietnam, we must be able to aid South Vietnam with naval and air support.

All of us desire peace and we want our prisoners released. Those advocating a fixed withdrawal date have no evidence to show that this will be successful. They ignore the past record of Communist aggression, with enslavement of the people of the countries they have taken over.

Early in 1972, Ralph Nader announced that he was going to undertake an investigation of Congress. Since developing some valuable information on automobile safety, Ralph Nader and his graduate students, known as "Nader's Raiders," seem to have become experts on every subject. Since almost everything relating to a Congressman is a matter of public record, most Congressmen assumed that Nader and his student volunteers would simply research the public record.

It was astonishing to learn that one of Nader's interviewers had come to my office to interview me without even making an appointment and at a time when the Banking and Currency Committee, on which I serve, was working on the new housing bill and new disaster loan legislation. When the interviewer learned that I was not available, she left a huge questionnaire with 633 detailed questions to be filled out and stated she would return at a later date for a personal interview. I learned from other Congressman that these interviews took up to 3 hours.

Since I serve on the House Banking and Currency Committee, the House Committee on Standards of Official Conduct, the National Commission on Consumer Finance, and the American Revolution Bicentennial Commission, and usually work 7 days a week serving the needs of my constituents, I informed Mr. Nader that I did not have 3 hours to waste with his interviewer and that I was not going to take the time to answer a questionnaire with the asinine number of 633 questions.

If 15 or 20 individuals or groups decided to investigate the Congress, Congressmen would only have time to give interviews and fill out questionnaires. I believe that the people of the Seventh Congressional District of Pennsylvania want a working Congressman, not a time-waster.

I do meet with my constituents whenever they visit Washington and in my Delaware County office when I am home each weekened in an effort to solve their problems and keep them informed.

President Nixon has hailed "the best news yet on the crime front" the news that serious crime rose only 1 percent in the first quarter of this year—the lowest percentage gain in 11 years. "This represents truly significant progress in this administration's determination to roll back the wave of crime that swept our Nation in the 1960's." In the years from 1961 to 1968, serious crime rose over 100 percent throughout the United States.

Congress has worked hard to provide the necessary tools and weapons for the war on crime. With my support, the Congress has passed a series of important acts including the Omnibus Crime Control Act which improved the organization and management of the Law Enforcement Assistance Administration, the main vehicle for distributing Federal anticrime grants to State and local authorities, the Organized Crime Control Act and several important drug abuse control measures.

Figures showing that we are halting soaring crime rates have been released by Attorney General Kleindienst. A year ago, the rate of increase was 6 percent and in 1970, it was 13 percent. Kleindienst also reported that 80 of the Nation's largest cities report actual reductions in serious crime in the first quarter of 1972. I assure you that I will continue to strongly support all measures that come before the Congress which will help reduce criminal activity.

Effective September 1, 1972, a 20 percent increase in social security recently enacted by the Congress, H.R. 15390, will benefit some 28.7 million Americans. This increas means the social security benefits will have been increased by 58 percent since 1968.

On August 9, 1972, the House passed H.R. 15927, which increases railroad retirement benefits by 20 percent. Just as soon as this bill is passed by the Senate and signed into law by the President, it will mean an increase of 45 percent in railroad retirement since 1970.

Inflation is cruelest to those on fixed incomes, and these increased benefits are to offset the pressure of rising prices on those who are receiving benefits under social security and railroad retirement. While these increases of 20 percent in benefits may seem large, the benefits for an average retired couple will be increased from $223 to $270 monthly.

SOVIET EXTORTION FOR JEWS' EMIGRATION

The SPEAKER. Under a previous order of the House, the gentlewoman from New York (Mrs. ABZUG) is recognized for 10 minutes.

Mrs. ABZUG. Mr. Speaker, I was appalled to learn of a decision by the Government of the Soviet Union that citizens with higher educations who wish to emigrate must pay retroactively for the cost of their education. Reportedly, this amount will run between $5,000 and $25,000 for each such individual.

It is bad enough in any case for a nation to become a petty extortionist, but in light of the fact that the United Nations Declaration of Human Rights recognizes the basic human right of emigration from one's country and article 121 of the Soviet Constitution purports to grant free education to all Soviet citizens, this action is nothing short of outrageous.

This is clearly an issue which belongs before the United Nations, and I have asked that organization's human rights arm to investigate this matter and, if the reports of it are accurate, to condemn a policy that puts a price tag on so basic a right as the freedom of the individual to live where he or she chooses.

The people of the United States must join with the rest of civilized humanity in condemning this policy, and I call upon the President to express our disapproval in the strongest possible terms.

Mr. Speaker, I include the text of my letter to the United Nations and the text of a message I sent to a recent rally in New York on this issue at the conclusion of my remarks, and I yield back the balance of my time.

The articles follow:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C., August 29, 1972.
Ambassador E. KULAGA,
Chairman, United Nations Human Rights Commission, New York, N.Y.

DEAR SIR: I have been appalled to read of a reported decision by the government of the U.S.S.R. to require educated citizens, including Jews, to pay huge fees for exit visas ostensibly to reimburse the state for the cost of their education.

I trust that your Commission will investigate this report immediately and, if it is substantiated, issue a formal condemnation of a policy that puts a price tag on human freedom. The United Nations Charter recognizes the right of emigration from one's country as a basic human right. To require Soviet citizens to pay retroactively for their education makes a mockery of this right and clearly is designed to impose an impossible condition upon Jews and others who wish to emigrate.

The continued silence of the United Nations Human Rights Commission in the face of increasingly severe restrictions of political and religious freedom imposed upon Soviet Jews undermines confidence in the objectivity of our world organization. As one who has never hesitated to protest governmental and private discrimination against minorities and oppressed groups within my own country, I urge you to act immediately on an issue that is arousing anxiety among all those who cherish individual freedom.

Sincerely yours,
BELLA S. ABZUG,
Member of Congress.

MAILOGRAM

Rabbi GILBERT KLAPERMAN,
Greater New York Conference on Soviet Jewry, New York, N.Y.:

I regret that I cannot be present at the rally today. I would appreciate your reading the following message to the assembly: I join with you in protesting the USSR's appalling policy requiring educated Jews to pay ransom for the right to emigrate to Israel. I have called on the United Nations Human Rights Commission to condemn this latest and most shocking violation of individual rights and I pledge to raise this issue before Congress when it reconvenes next week. The American people and American government must join in condemning a policy that places a price tag on human freedom and formally demand that the Soviet government rescind its ransom decree and allow all those wishing to emigrate to do so without impediment and with full dignity and security.

Congresswoman BELLA S. ABZUG.

OUR DAILY BREAD

The **SPEAKER**. Under a previous order of the House, the gentleman from Pennsylvania (Mr. GAYDOS) is recognized for 10 minutes.

Mr. GAYDOS. Mr. Speaker, the sale of 400 million bushels of U.S. wheat to the Soviet Union was hailed at the time of its public announcement as a major breakthrough in the relation of the two countries and the first stage of a burgeoning trade between them.

It is hoped that this analysis and prediction both will prove to be true. Future world peace will depend in large part on the ability of the major military powers to become mutually benefiting trade partners. But, in the interests of truth, the wheat deal now needs an agonizing reappraisal. How well did we Americans make out?

Part of the answer has come now in the appeal of the American baking industry to the Cost of Living Council for approval of an immediate across-the-board increase in bread prices to cover its rising costs. The major cost hike to it is in flour which has jumped from $5.40 to $6.70 per hundredweight under the impact of the heavy Soviet wheat purchases.

Baking industry spokesmen contend that the higher flour cost has placed most breadmakers in a "deficit position" and that a 2- or 3-cent increase is mandatory in each pound loaf of bread sold in the retail bakeries and supermarkets. The result, of course, will be that the already price-harassed American housewife will find herself in the ironic position of taking money from her strained food budget to help feed those once difficult Russians.

Not only this, but the American people already are making tremendous donations to their former cold war opponents in other phases of the wheat deal. Government subsidies paid exporters to hold the U.S. export price at the world market level have climbed according to the Associated Press, from 11 cents a bushel a month ago to around 38 cents now. By rule of thumb, the 38-cent figure works out to $152 million of our tax money in subsidies on the 400 million bushels which the Russians are buying, under terms of the agreement, at the world price which prevailed when the deal was made. We are locked in on this price while the world price currently is climbing rapidly in reaction to the Soviet purchases.

But this is not all by any means. Also to be considered is the fact that the bulk of the Soviet-bought wheat is coming out of storage here—storage for which our Government has paid private elevators 12 cents a bushel per year. Added to the 38-cent subsidy, this means the Russians are getting our wheat at 50 cents a bushel less than it cost us. And this does not include the Government paid interest through the Commodity Credit Corporation on its wheat investments. Some experts place this amount at around 6½ cents a bushel which is added, also would lift our loss per bushel to 56½ cents.

Did we sell our wheat too cheaply? If wheat were in long supply in today's world—if the big wheat producers all were hunting customers—then there could be an argument that any bargain-basement sale would be to our long-range advantage, saving us further storage and interest costs. However, this is far from the case. Wheat is becoming a scarce commodity on the international market. Russia is facing a poor wheat crop this year and consequently needs our grain very badly to feed her people. A recent AP dispatch from Moscow tells of a drive underway there against wasting flour with the quaint slogan, "It is necessary to respect every piece of bread." Australia has had a disappointing harvest. Canada's below-average 1972 yield is sold out. It was necessary, therefore, for the Soviets to turn to us, the only Nation with a wheat surplus. Why then, in view of this, was it in our interest to give Russia a below-cost price?

The wheat deal can be looked at from another angle. By sparing Russia the necessity of paying the full costs of our wheat we have left her with funds for other purposes—funds which can continue to go for arms to North Vietnam, for Soviet missile development, and for Soviet adventures throughout the world—all expenditures to our disadvantage and, in the case of North Vietnam, to our great and tragic cost.

The hopes for a booming United States-Soviet trade to come need not obscure these matters to the American public, or excuse any further deals in which the U.S. housewife, to say nothing of the burdened taxpayer, finds herself shortchanged at the checkout counter. Neither should the wheat deal be sold to us as a diplomatic triumph when in reality it is nothing more than another attempt to use U.S. tax dollars to buy goodwill abroad, an illusionary effort which has cost us so dearly in other giveaway programs.

Mr. MAZZOLI. Mr. Speaker, will the gentleman yield?

Mr. GAYDOS. I yield to the gentleman.

Mr. MAZZOLI. Mr. Speaker, I would simply like to take this time to commend the gentleman for his well stated remarks concerning this grain sale to the Soviet Union. I join the gentleman and I would like to endorse his remarks.

I would also join with him in seeking some answers for these very difficult and very profound questions, because on the surface this appears to be an excellent, right and proper business arrangement.

But, as the gentleman so aptly pointed out, below the surface there is turbulence and I congratulate the gentleman for taking this time to advise the House and to advise the Nation of these very serious problems.

Mr. GAYDOS. Mr. Speaker, I wish to thank my friend for his interest and commend him for his support. We hope that the State Department will respond and analyze this entire situation, again keeping the interest of the American housewife and the purchaser who pays the 2 or 3 cents increase and keep their interest at heart and hopefully work this situation out and possibly remove the subsidy.

MAJ. GEN. LEO HENRY SCHWEITER

The SPEAKER. Under a previous order of the House, the gentleman from Mississippi (Mr. GRIFFIN) is recognized for 10 minutes.

Mr. GRIFFIN. Mr. Speaker, I rise to pay honor and tribute to a great patriot and soldier, Maj. Gen. Leo Henry Schweiter, who passed away August 23, 1972.

Hank Schweiter was a neighbor of mine in Arlington, Va., for several years where I got to know him as a brilliant man, devoted husband and father who had an intense pride in America and who was totally loyal to his country.

Hank Schweiter had an outstanding military career, and at the time of his forced retirement because of cancer, he served as Chief of Staff, U.S. Army, Vietnam.

Born in Wichita, Kans., on April 16, 1917, General Schweiter graduated from Kansas State College in 1939 with honors and with membership in the national honor society, Phi Kappa Phi. He entered the military service in 1941 after obtaining a master of arts degree and serving as an instructor at the University of Missouri. He was integrated into the Regular Army in 1946.

After his early service as an administrative and tactical officer at various Army Air Corps flying schools in California, he attended the Parachute School at Fort Benning, Ga., in November 1942. Subsequently he served with the 511th Parachute Infantry in the United States and then with the 101st Airborne Division in Europe. While a member of the 101st Airborne Division he made combat parachute jumps behind enemy lines in Normandy the night before D-day, and in Holland; additionally, he participated in the defense of Bastogne. At the end of the war in Europe, when the 101st Airborne Division was inactivated, he was Assistant Chief of Staff, G2.

Back in the United States in 1946 he served with the 82d Airborne Division until September 1947 when he was assigned to Headquarters, Army Ground Forces at Fort Monroe, Va. In 1949 he attended the Command and General Staff College, Fort Leavenworth, Kans. Upon graduation in July 1950 he was assigned to the staff of the X Corps in Korea. While in this assignment he participated in the amphibious landings at Inchon and Wonson and the subsequent evacuation from the Hamhung-Hungnam perimeter in North Korea in December 1950. Later, still in combat in Korea, he served as a battalion commander in the 32d Infantry Regiment, 7th Infantry Division. In October 1951 then Lieutenant Colonel Schweiter returned to Fort Bragg, N.C., where he was assigned to the Joint Airborne Troop Board and to the 82d Airborne Division. While in the 82d Airborne Division he commanded an airborne infantry battalion and the Provisional Reconnaissance Troop, Sky Cavalry, the first air cavalry unit of the U.S. Army.

In March 1956 he was assigned to the newly reactivated 101st Airborne Division at Fort Campbell, Ky. as Assistant chief of staff, G–3. He attended the Army War College at Carlisle Barracks, Pa., during the 1957-58 school year. Upon graduation he moved to Europe where he served as a staff officer in the G–3 Division, Headquarters, USAREUR and as chief of staff of the 8th Infantry Division.

In 1959, he began a 3-year assignment at Fort Bragg, N.C., which successively included duties as G–2 of XVIII Airborne Corps and the Strategic Army Corps, commanding officer of the 2d Airborne Battle Group, 504th Infantry and the first commanding officer of the newly activated 5th Special Forces Group (Airborne).

In July of 1962, he was transferred to Washington, D.C., and served in the Office of the Special Assistant for Counterinsurgency and Special Activities, Office of the Joint Chiefs of Staff. Two years later he was assigned to Headquarters, Department of the Army, Office of the Deputy Chief of Staff for Military Operations, where he became Director of Special Operations.

In January 1967, he became assistant division commander of the 101st Airborne Division at Fort Campbell, Ky.

In the Republic of Vietnam from August 1967 to March 1968 General Schweiter commanded the 173d Airborne Brigade. During November 1967, while under his command, the 173d Airborne Brigade was engaged in bitter fighting around Dak To. In March 1968, General Schweiter was assigned as chief of staff of XXIV Corps which directed U.S. military operations below the DMZ in the northern provinces of South Vietnam. Upon returning to the United States in December 1968 he became deputy commanding general of the U.S. Army Combat Developments Command at Fort Belvoir, Va., the position in which he served until his return to Vietnam for a second tour. General Schweiter's final active duty assignment was as Chief of Staff, U.S. Army, Vietnam, between September 1971 and April 1972.

During his distinguished military career, he won the following awards and decorations:

Distinguished Service Medal with one oak leaf cluster;

Silver Star Medal with one oak leaf cluster;

Legion of Merit with one oak leaf cluster;

Distinguished Flying Cross;

Bronze Star Medal with three oak leaf clusters;

Air Medal with "V" Device and 24 oak leaf clusters;

Army Commendation Medal;

Purple Heart with one oak leaf cluster;

Presidential Unit Citation with one oak leaf cluster;

Order of Orange Nassau, degree of officer, Netherlands;

National Order of Vietnam, Fifth degree;

Vietnamese Army Distinguished Service Order, First class;

Vietnamese Cross of Gallantry with palm;

Vietnamese Chung My Medal, First class;

Presidential Unit Citation, Republic of Korea;

Orange Lanyard, Netherlands;

Fourragere, Belgium;

Fourragere, 1st ARVN Division;

Combat infantryman badge with star; and

Master parachutist badge.

General Schweiter is survived by his mother, Mrs. Bertha Schmid Schweiter, his wife, the former Virginia Pflaum of Wauwatosa, Wisc., and four children, Henry, Gail, Mary Jean, and Caroline.

To all of them, Mr. Speaker, I extend my deep sympathy.

As a part of my remarks, I include the following article which appeared in the Washington Post on August 28, 1972:

EX-ARMY STAFF CHIEF IN VIETNAM

Retired Army Maj. Gen. Leo H. Schweiter, 55, who was chief of staff of the Army in Vietnam at the time of his retirement last May, died Wednesday in Dunham Army Hospital at Carlisle Barracks, Pa.

Born in Wichita, Kan., Gen. Schweiter was a graduate of Kansas State College and held a master's degree from the University of Missouri.

He enlisted in the Army Air Corps in 1941 and served in the European theater with the 101st airborne division during World War II.

Gen. Schweiter was assigned to the 82d Airborne Division in 1945 and after combat during the Korean War was a member of the joint airborne troop board.

In 1959, after a tour of duty in Europe, he was named chief of staff of the 8th Infantry Division. He later was assistant chief of staff, G2, headquarters, XVII Airborne Corps.

In 1961, he was named commanding officer of the 5th Special Airborne Force group, 1st Special Forces.

Gen. Schweiter served in Washington from 1962 to 1964 in the office of special assistant for counterinsurgency and special activities for the Joint Chiefs of Staff. During the next two years, he was in the office of the deputy chief of staff for operations.

He later was at Ft. Campbell, Ky., then was sent to Vietnam. He returned to this country in 1969 to become deputy commanding general of the Army combat developments command at Ft. Belvoir, Va., before becoming chief of staff of the Army in Vietnam.

His many decorations included the Distinguished Service Medal, the Silver Star, the Distinguished Flying Cross and the Bronze Star.

He is survived by his wife, Virginia, and four children, James, Gail, Mary Jean and Caroline, all of Carlisle, and his mother, Mrs. Otto Schweiter, of Wichita.

INTRODUCING AN AMENDMENT TO THE NATIONAL FLOOD INSURANCE ACT OF 1968

The SPEAKER. Under a previous order of the House, the gentleman from Pennsylvania (Mr. FLOOD) is recognized for 10 minutes.

Mr. FLOOD. Mr. Speaker, I am introducing today a bill which is important in each and every congressional district in the Nation. The bill, an amendment to the National Flood Insurance Act of 1968, is intended as a safeguard against future flood disasters where entire flood-prone communities have gone uninsured and have thus required huge expenditures of Federal energy and money for disaster relief which otherwise would not be spent. If adequate flood insurance under the federally subsidized program had been in effect in the areas stricken by Hurricane Agnes—I think we all know who she is by now—if such insurance had been in effect, the savings to the Federal Government would be in millions of dollars and countless manhours of time. Thus the aim of this bill—improve the attractiveness of the current Federal flood insurance program while at the same time encouraging local communities to utilize its provisions.

As I said before, this bill is important to us all. None of us are seers, no one can tell the future. As an example of this lack of foresight I present the city of Harrisburg, capital of the State of Pennsylvania. In the entire city, which lies upon the Susquehanna River Basin, nobody had flood insurance; 70 percent of the flood damage from Hurricane Agnes—need I repeat again, the greatest civil disaster in the history of the republic—70 percent of the damage was in Pennsylvania, and 70 percent of the damage in Pennsylvania was in the Wilkes-Barre and the Wyoming Valley. And in that entire valley, only two people had flood insurance.

This is not a condemnation of the program. This is not a condemnation of the communities who failed to take the necessary actions to qualify for such insurance, nor do I mean to condemn those individuals who were eligible, yet failed to take advantage of it. The problem this time is not in ourselves, but in the stars—no one had the foresight to imagine that they would be stricken. It was Sinclair Lewis who penned a novel in the thirties entitled "It Can't Happen Here", but it can, and it did, and it will. The disaster he was talking about was social and political, this one is natural—and remember this, it can happen to you, and it did happen to me, and it will happen to some of you in the years to come.

The bill I am introducing today would quadruple the statutory flood insurance coverage limits. It would quadruple both the subsidized limits on various types of buildings and their contents, as well as quadrupling the maximum limits of flood insurance coverage. Currently, the subsidized limits on single family residential units are inadequate at a figure of $17,500—my bill raises that limit to $70,000. The limits on other residential units, double blocks, et cetera, and nonresidential structures would be increased from $30,000 to $120,000. The coverage for the contents of a residence would be raised from a maximum of $5,000 to the $20,000 level. I am particularly distressed at the current limit for businesses struck by flooding, oftentimes a completely devastating experience.

The limit for the contents of a business at $5,000 is totally unrealistic. Therefore, my legislation would increase that coverage to $120,000. In each case listed above, nonsubsidized flood insurance could be obtained in an amount double that of the subsidized maximum, at actuarial rates.

To encourage individuals to purchase flood insurance when they reside in a flood-prone area, the bill requires that all individuals, as a condition precedent to receiving Farmers Home, VA, or FHA mortgage insurance, must purchase flood insurance under the Federal program. These flood-prone areas are currently defined by the Department of Housing and Urban Development as any area which has a 1-percent annual chance of flooding.

As a further incentive—this time for the communities—the bill provides that those communities which have been identified as special flood zone areas would be required to participate in the national flood insurance program at the risk of penalty. The penalties are severe—future Federal financial assistance for construction programs such as urban renewal would be reduced, with increasing penalties as a community's failure to act continued.

Beginning July 1, 1976, the VA, Farmers Home Administration, and FHA mortgage insurance and new construction guarantee programs would be curtailed. By 1977, funds for programs such as open space, community facilities, community development, model cities, and so forth, would be reduced by 10 percent. By 1978, another 20-percent reduction would take place; with 30 percent in 1979, and in 1980, 40 percent. Thus, the total reduction amounts to 100 percent in 4 years.

These severe penalties are only, and strictly, for those cities, townships, and boroughs which fail to participate in the flood insurance program and which are located in flood hazard areas. It only makes sense, that if the Federal Government is going to provide Federal funds to build in flood-prone areas, the local communities should be required to take steps to reduce the impact of the flooding.

In addition, this bill broadens the availability of flood insurance to anyone who wishes to obtain it. At the same time, in order to encourage local communities to sign up for the flood insurance program and meet Federal land-use requirements, the premium rates on policies issued in communities which have not been approved for flood insurance would be 25 percent above the subsidized rate offered to residents of approved communities.

One last note, the bill I have introduced will expand the Federal flood insurance program. And you can be sure that in the wake of Hurricane Agnes, it would have expanded of its own accord. As a result, I feel that a $20 billion statutory limit for total coverage in force under the national flood insurance program is an appropriate figure.

H.R. 16521

A bill to amend the National Flood Insurance Act of 1968

Be it enacted by the Senate and House of Representatives of the United States of America in Congress Assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "National Flood Insurance Act Amendments of 1972".

INSURANCE LIMITS

SEC. 2. (a) Section 1306(b)(1)(A) of the National Flood Insurance Act of 1968 is amended by striking out "$17,500", "$30,000", and "$5,000" and inserting in lieu thereof "$70,000", "$120,000", and "$20,000", respectively.

(b) Section 1306(b)(1)(B) of such Act is amended by striking out "$30,000" (each place it appears) and "$5,000" and inserting in lieu thereof "$120,000" and "$120,000", respectively.

(c) Section 1306(b)(1)(C) of such Act is amended by striking out "$30,000" and "$5,000" and inserting in lieu thereof "$120,000", and "$120,000", respectively.

PROGRAM LIMITATION

SEC. 3. Section 1319 of the National Flood Insurance Act of 1968 is amended by striking out "$2,500,000,000" and inserting in lieu thereof "$20,000,000,000"

SEC. 4. (a) Chapter I of the National Flood Insurance Act of 1968 is amended by adding at the end thereof the following new section:

"REQUIREMENT OF FLOOD INSURANCE COVERAGE FOR FEDERALLY INSURED OR FEDERALLY GUARANTEED MORTGAGES

"SEC. 1321. (a) No officer or agency of the United States shall insure or guarantee or enter into a contract or commitment for the insurance or guaranty of any mortgage or real estate loan if the property to which such mortgage or loan relates is situated in a flood-prone area as determined by the Secretary under section 1360, unless such property is covered by the flood insurance program under this title (to the extent that such program applies or has been extended to property of the type involved under section 1305 (a) and (b)).

"(b) For purposes of subsection (a), the terms 'insure or guarantee' and 'insurance or guaranty', with respect to mortgages or real estate loans, include or refer to the insurance of any mortgage (or financial institution) under the National Housing Act or title V of the Housing Act of 1949, the insurance or guaranty of any loan under chapter 37 of title 38, United States Code, and any other insurance or guaranty issued under Federal law with respect to a mortgage on real estate or with respect to a loan made to finance the purchase, acquisition, or rehabilitation of real property."

(b) The amendment made by subsection (a) of this section shall apply with respect to mortgages executed and loans made on or after the first day of the seventh month which begins after the date of enactment of this Act (except that such amendment shall not apply with respect to any such mortgage or loan which is executed pursuant to a contract or commitment entered into before such first day).

PROVISION OF FLOOD INSURANCE IN CERTAIN AREAS NOT MEETING REQUIREMENTS OF PROGRAM

SEC. 5. The National Flood Insurance Act of 1968 is amended—

(1) by striking out "The" in section 1305 (c) and inserting in lieu thereof "Except as provided in section 1322, the";

(2) by striking out "After" in section 1315 and inserting in lieu thereof "Except as provided in section 1322, after"; and

(3) by inserting after section 1321 (added by section 4 of this Act) a new section as follows:

"FLOOD INSURANCE COVERAGE IN NONQUALIFYING AREAS

"SEC. 1322. Notwithstanding any other provision of this Act flood insurance coverage may be provided under this title in any State or area (or subdivision thereof) which has not complied with the requirements of section 1305(c) or 1315 if—

"(1) the property with respect to which the insurance is sought is eligible for coverage under section 1305 (a) or (b); and

"(2) the premium charged for the coverage provided is at a rate which exceeds by 25 per centum the rate which would otherwise be chargeable on similar property in a State or area (or subdivision thereof) meeting the requirements of section 1305(c) and 1315."

REDUCTION OF CERTAIN FEDERAL BENEFITS IN THE CASE OF COMMUNITIES NOT PARTICIPATING IN THE FLOOD INSURANCE PROGRAM

SEC. 6. (a) Notwithstanding any other provision of law, in the case of any unit of local government which is determined by the Secretary of Housing and Urban Development under section 1360 of the National Flood Insurance Act of 1968 to be located in an area which has special flood hazards, and which is not participating in the flood insurance program established under such Act, the Secretary of Housing and Urban Development, the Secretary of Agriculture, and the Administrator of Veterans' Affairs shall reduce the aggregate Federal benefits for such unit of local government by 10 per centum on July 1, 1977, by an additional 20 per centum on July 1, 1978, by an additional 30 per centum on July 1, 1979, and by an additional 40 per centum on July 1, 1980.

(b) For the purpose of subsection (a), a reduction of the aggregate Federal benefits of a unit of local government shall be carried out by applying the percentages referred to in such subsection to each of the following:

(1) The aggregate dollar amount obligated or expended in connection with any contract or other agreement entered into by such unit under title I of the Housing Act of 1949, title I of the Demonstration Cities and Metropolitan Development Act of 1966, title VII of the Housing and Urban Development Act of 1965, title VII of the Housing and Urban Development Act of 1970, and title VII of the Housing Act of 1961 during the fiscal year ending on June 30, 1977;

(2) The number of dwelling units covered by mortgages insured under section 203 of the National Housing Act in the jurisdiction of such unit which were purchased during the fiscal year ending June 30, 1977;

(3) The number of dwelling units with respect to which the Administrator of Veterans' Affairs furnished financial assistance under chapter 37 of title 38, United States Code, which were purchased during the fiscal year ending June 30, 1977; and

(4) The number of dwelling units with respect to which the Secretary of Agriculture furnished financial assistance under title V of the Housing Act of 1949 during the fiscal year ending June 30, 1977.

POLITICAL PIOUSNESS?

(Mr. BARRETT asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. BARRETT. Mr. Speaker, piousness is depicted in this morning's Washington Post newspaper. I include the following editorial at this point in the RECORD for the edification of the Members of the House:

MR. NIXON'S SUNDAY ADDRESS

There is a great deal of talk about elitism in politics these days. In its most commonplace and superficial meaning the term has to do with social class and caste and who went to school where and who is urging whom to do what that he himself is exempted from as a matter of social or financial privilege. Another kind of elitism, however, seems to us to require at least as much attention, being both more pernicious and more easily disguised than the obvious kind that goes with being a "limousine liberal." It is the elitism of men in government who hold that you can do one thing and say another and that the people (ever manipulable) will never be the wiser, that what you confide to the Washington press and governmental elite is quite another matter from what you pitch to the public at large. It holds, in other words, that the people are in fact too dumb to recognize distortions of the truth and too mean-minded in any event to respond to anything but an appeal to prejudice.

Cynicism would be another name for this form of elitist thinking. For almost four years now it has run through Nixon administration attempts to explain to the Washington press corps (and to each other) how it is that you can only "sell" a worthwhile program by pretending that it is something quite different from what it is. We bring it up because it reached new heights in the President's address to the people on Sunday.

Thus, Mr. Nixon, who lists as his top legislative priority passage of a welfare reform bill that would at least double the number of persons receiving welfare benefits, inveighs against the "welfare ethic" and those who favor a policy of "income redistribution"— which is exactly what his welfare program is. Again, the man whose administration has, on alternate days of the week, worked to bring us many of the big busing cases before the courts, now demands new laws to turn them back, even laws that could have the side effect of undoing much of the orderly desegregation that occurred in the South before he came to office. Finally, the President whose Labor Department brought us the Philadelphia Plan for hiring fixed numbers of blacks, now calls such schemes "as artificial and unfair a yardstick as has ever been used to deny opportunity to anyone."

If Mr. Nixon really means to run against his own administration this way on the theory that no one will be bright enough to notice, we submit that he will be undertaking a perilous and boomerang-laden course. You can only sermonize for so long on the supposed collapse of the "work ethic," after all, before people start wondering what that has to do with the high rate of unemployment in this country that has been tolerated by the present administration—except, perhaps, as a rather crude diversion. And if you persit in alluding to something called the "welfare ethic" that is indulged by those who want something for nothing and who get it out of the working man's taxes, well the first thing you know there's going to be talk about Lockheed loans and rich farmers' subsidies and milk price supports that rise with campaign contributions and oil depletion allowances and God knows what all else—maybe even the fact that the administration has yet to come forward with any specific proposals of its own for tax reform. Indeed, it is not even inconceivable that what with the Watergate affair and all those hundreds of thousands of dollars shuffling around from bank to bank, the better part of valor might be for this administration not to introduce the subject of ethics at all—work, welfare or otherwise.

The pity of it is that, given the showing of current political polls and the failure of the McGovern campaign to get off to much of a start so far, Mr. Nixon has the luxury of pursuing a straight arrow, straight talk campaign if he wants to. That is, he can dispense with this elitist nonsense—and he should. It's not just that people aren't dumb. They don't like to be talked to as if they were.

VICIOUS ACTS BY ARAB TERRORISTS AT MUNICH, GERMANY

(Mr. DANIELS of New Jersey asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. DANIELS of New Jersey. Mr. Speaker, I am very hard put to find words to describe my shock and outrage at the vicious acts of terrorism perpetrated this morning by Arab terrorists at Munich, Germany.

I cannot recall any act so wanton and so devoid of decency, and one more certain to call down upon its perpetrators total condemnation from the world community.

Mr. Speaker, for too long a time Arab terrorists have enjoyed sanctuary from nations whose borders are contiguous to Israel.

Mr. Speaker, it is time for this Nation, and all other nations in the world community, to take whatever action is necessary to see that the Israeli athletes now prisoners are freed and this contemptible act is never repeated.

Specifically, Mr. Speaker, I call upon the Soviet Union which has lent aid and encouragement to the Arab bloc to use its influence in the Middle East to bring the terrorist campaign to a halt. For a long time, the Soviets have encouraged anti-Israel feelings and supplied men and munitions for still another aggression against Israel. In a large measure, their encouragement of Arab terror is at the root of the crisis. It is time for the Soviet Union to put all pressure upon its client states in the Middle East to end the reign of terror.

DISTRESS UPON MURDER AT OLYMPIC GAMES

(Mr. DONOHUE asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. DONOHUE. Mr. Speaker, I want to join with my colleagues here this afternoon in publicly expressing our deepest common distress and dismay upon the news of the almost unbelievable armed Arab guerrilla band's murderous invasion of the Israeli quarters of the Olympic Athletes' Village in Munich, Germany.

According to the reports, at least one member of the Israeli group has been killed, another has apparently been seriously wounded, and 13 other members of the Israeli athlete teams are being held as hostages with the threat of being killed outright unless certain demands of these terrorists are met.

Mr. Speaker, it is very difficult, indeed, to even try to find words to express the extent of our feeling of outrage in learning about this horrible incident and the circumstances of the place where an occasion upon which it has been committed make it unique in the world annals of criminal violence.

It is nearly impossible for any normal, ordinary, peaceful, law abiding person, anywhere on earth, to understand what these terrorists hope to gain by such an awful deed, but whatever it is, they have certainly made the worst possible approach toward achieving it.

The will and the conscience of all other people everywhere in the civilized world has been turned against them by this senseless barbarism and they are succeeding only in generating a tremendous and united international enmity against whatever cause they may think they are espousing.

Mr. Speaker, as our sense of outrage heightens at this atrocious action, I know we all join in our prayers that this horrendous experience being visited upon innocent Israeli athletes and their supervisors may very, very soon be ended with no further bloodshed, that the perpetrators of this terrible crime will be subdued and properly punished and that appropriate steps will be taken to insure that the possibility of such uncivilized terror to recur again at Olympic games or any other peaceful international assembly will be eliminated.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. Corman, for Tuesday, September 5, 1972, on account of official business.

Mrs. Hansen of Washington (at the request of Mr. Boggs), for today through September 22, on account of official business.

Mr. Camp (at the request of Mr. Gerald R. Ford), through September 14, on account of official business.

Mr. Mathias of California (at the request of Mr. Gerald R. Ford), through September 11, on account of official business.

Mr. Ryan (at the request of Mr. McFall), for this week, on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. Goldwater) and to revise and extend their remarks and include extraneous matter:)

Mr. Crane, today, for 5 minutes.
Mr. Williams, today, for 10 minutes.

(The following Members (at the request of Mr. Mazzoli) to revise and extend their remarks and include extraneous material:)

Mr. Gonzalez, for 5 minutes, today.
Mrs. Abzug, for 10 minutes, today.
Mr. Gaydos, for 10 minutes, today.
Mr. Griffin, for 10 minutes, today.
Mr. Flood, for 10 minutes, today.

Mr. Hechler of West Virginia, for 10 minutes, today, and to revise and extend his remarks and include extraneous matter.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. Perkins, to revise and extend his remarks and to appear after the calling up of the conference report on H.R. 12350 today.

Mr. Quie and to include extraneous matter with his remarks on the conference report on H.R. 12350.

(The following Members (at the request of Mr. Goldwater) and to include extraneous matter:)

Mr. Buchanan.
Mr. Veysey.
Mr. Schwengel.
Mr. Derwinski in two instances.
Mr. Hosmer in two instances.
Mr. Hansen of Idaho.
Mr. Bray in three instances.
Mr. Young of Florida in five instances.
Mr. Coughlin.
Mr. Forsythe.
Mr. Miller of Ohio in six instances.
Mr. Crane.

(The following Members (at the request of Mr. Mazzoli) and to include extraneous matter:)

Mr. Griffin in two instances.
Mr. Rarick in three instances.
Mr. Gonzalez in three instances.
Mr. Rodino.
Mrs. Abzug in 10 instances.
Mr. Jacobs.
Mr. Nix.
Mr. Udall in 10 instances.
Mr. Waldie in three instances.
Mr. Hungate.
Mr. Flood.
Mr. Stokes in two instances.
Mr. Pucinski in five instances.
Mr. Cabell.
Mr. Flowers in three instances.
Mr. Harrington.

SENATE BILLS AND JOINT RESOLUTION REFERRED

Bills and a joint resolution of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 173. An act for the relief of Mrs. Naoyo Campbell, to the Committee on the Judiciary.

S. 2483. An act to provide a national program in order to make the international metric system the predominant but not exclusive system of measurement in the United States and to provide for converting to the general use of such system within 10 years; to the Committee on Science and Astronautics.

S. 2741. An act to amend the act of September 7, 1957, authorizing aircraft loan guarantees, in order to expand the program pursuant to such act; to the Committee on Interstate and Foreign Commerce.

S. 2816. An act for the relief of Mary Danos Nayak; to the Committee on the Judiciary.

S. 3252. An act for the relief of Renato M. Dioquino; to the Committee on the Judiciary.

S. 3583. An act for the relief of Gerald Vincent Bull; to the Committee on the Judiciary.

S. 3671. An act to amend the Administrative Conference Act; to the Committee on the Judiciary.

S. 3835. An act for the relief of Reynaldo Canias Baecher; to the Committee on the Judiciary.

S. 3858. An act to amend the Public Health Service Act to improve the program of medical assistance to areas with health manpower shortages, and for other purposes; to the Committee on Interstate and Foreign Commerce.

S.J. Res. 202. Joint resolution to express the sense of Congress that a White House Conference on the Handicapped be called by the President of the United States; to the Committee on Education and Labor.

ENROLLED BILL SIGNED

Mr. HAYS, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H.R. 13089. An act to provide for acceleration of programs for the planting of trees on national forest lands in need of reforestation, and for other purposes.

BILLS PRESENTED TO THE PRESIDENT

Mr. HAYS, from the Committee on House Administration, reported that that committee did on the following days present to the President, for his approval, bills and a joint resolution of the House of the following titles:

On August 18, 1972:

H.R. 755. An Act to amend the Shipping Act, 1916, and the Intercoastal Shipping Act, 1933, to convert criminal penalties to civil penalties in certain instances, and for other purposes;

H.R. 2394. An act for the relief of Antonio Benavides;

H.R. 2703. An act for the relief of Mrs. Concepcion Garcia Balauro;

H.R. 5158. An act for the relief of Maria Rosa Martins;

H.R. 5814.An act to amend section 2735 of title 10, United States Code, to provide for the finality of settlement effected under section 2733, 2734, 2734a, 2734b, or 2737;

H.R. 12392. An act to amend title 28, United States Code, section 1491, to authorize the Court of Claims to implement its judgments for compensation;

H.R. 12931. An act to provide for improving the economy and living conditions in rural America; and

H.J. Res. 1278. A resolution making further continuing appropriations for the fiscal year 1973, and for other purposes.

On August 19, 1972:

H.R. 15580. An act to amend the District of Columbia Police and Firemen's Salary Act of 1958 to increase salaries, and for other purposes;

H.R. 3413. An act for the relief of Dr. David G. Simons, lieutenant colonel, U.S. Air Force (retired);

H.R. 8549. An act to amend title 10, United States Code, to broaden the authority of the Secretaries of the military departments to settle certain admiralty claims administratively, and for other purposes;

H.R. 9256. An act for the relief of Kyong Ok Goodwin (Nee Won);

H.R. 10310. An act to establish the Seal Beach National Wildlife Refuge;

H.R. 10713. An act for the relief of Wilma Busto Koch;

H.R. 11185. An act to amend the Internal Revenue Code of 1954 with regard to the exempt status of veterans' organizations, and for other purposes; and

H.R. 15474. An act to amend the Public Health Service Act to provide assistance for programs for the diagnosis, prevention, and treatment of, and research in, Cooley's anemia.

ADJOURNMENT

Mr. MAZZOLI. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 3 o'clock and 25 minutes p.m.), the House adjourned until tomorrow, Wednesday, September 6, 1972, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2270. A communication from the President of the United States, transmitting notice of his intention to exercise the authority granted him under section 614(a) of the Foreign Assistance Act of 1971 to waive the requirements of section 514 of the act as it applies to our military assistance programs for fiscal year 1973 to two countries in east Asia, pursuant to section 652 of the act; to the Committee on Foreign Affairs.

2271. A letter from the Deputy Secretary of Defense, transmitting two reports of violation of section 3679, Revised Statutes, and

Department of Defense Directive 7200.1, "Administrative Control of Appropriations Within the Department of Defense," pursuant to section 3679(1)(2), Revised Statutes; to the Committee on Appropriations.

2272. A letter from the Assistant Secretary of State for Congressional Relations, transmitting reports showing the Laos assistance-related funds expended during the fourth quarter of fiscal year 1972, revised figures for the first half-year estimates and for the third quarter, and the totals for the entire fiscal year, pursuant to section 505 of the act of November 17, 1971; to the Committee on Armed Services.

2273. A letter from the Secretary of Commerce, transmitting the 100th quarterly report on export control, covering the second quarter of 1972, pursuant to the Export Administration Act of 1969; to the Committee on Banking and Currency.

2274. A letter from the Commissioner of Social Security, Department of Health, Education, and Welfare, transmitting a copy of the notice of proposed rulemaking concerning black lung benefits published in the Federal Register on September 2, 1972; to the Committee on Education and Labor.

2275. A letter from the Assistant Secretary of State for Congressional Relations, transmitting reports showing the Cambodian assistance-related funds obligated during the fourth quarter of fiscal year 1972, and for the entire fiscal year, and on the value of Defense Department excess material transferred to Cambodia during the fiscal year, pursuant to section 655 of the Foreign Assistance Act of 1971; to the Committee on Foreign Affairs.

2276. A letter from the Secretary of the Treasury and the Director of the Office of Management and Budget, transmitting the second annual report on the performance of functions and duties imposed on the Office of Management and Budget and the Department of the Treasury by sections 201 and 202 of the Legislative Reorganization Act of 1970, pursuant to section 202(b) of the act; to the Committee on Government Operations.

2277. A letter from the Deputy Director, U.S. Information Agency, transmitting an annual report for fiscal year 1972 on the Agency's disposal of excess foreign property, pursuant to section 404(d) of the Federal Property and Administrative Services Act of 1949; to the Committee on Government Operations.

2278. A letter from the Secretary of the Interior, transmitting a report on prototype desalting plants, pursuant to the Saline Water Conversion Act of 1971; to the Committee on Interior and Insular Affairs.

2279. A letter from the Assistant Secretary of the Interior, transmitting notice of the receipt of project proposals with applications for loans from the De Luz Heights Municipal Water District, Fallbrook, Calif., and the Farmington Area Pressurized Irrigation District, Farmington, Utah, pursuant to section 10 of the Small Reclamation Projects Act of 1956; to the Committee on Interior and Insular Affairs.

2280. A letter from the Acting Assistant Secretary of the Interior, transmitting a copy of a proposed concession contract for the continued provision of overnight accommodations, food and beverages, and merchandising, marine, and automobile service station facilities and services for the public at the Temple Bar site within Lake Mead National Recreation Area, Nev., for a 15-year term ending December 31, 1986, pursuant to 67 Stat. 271 and 70 Stat. 543; to the Committee on Interior and Insular Affairs.

2281. A letter from the Chairman, Indian Claims Commission, transmitting a report of the final determination of the Commission in docket No. 275, *The Creek Nation, Plaintiff*, v. *The United States of America, Defendant*, pursuant to 25 U.S.C. 70(t); to the Committee on Interior and Insular Affairs.

2282. A letter from the Chairman, Indian Claims Commission, transmitting a report of the final determination of the Commission in docket No. 342–E, *The Seneca Nation of Indians, Plaintiffs*, v. *The United States of America, Defendant*, pursuant to 25 U.S.C. 70(t); to the Committee on Interior and Insular Affairs.

2283. A letter from the Chairman, Commission on Railroad Retirement, transmitting the report of the Commission, pursuant to Public Laws 91–377 and 92–46 (H. Doc. No. 92–350); to the Committee on Interstate and Foreign Commerce and ordered to be printed with illustrations.

2284. A letter from the Chairman, Federal Communications Commission, transmitting a draft of proposed legislation to amend the Communications Act of 1934, as amended, with respect to penalties and forfeitures; to the Committee on Interstate and Foreign Commerce.

2285. A letter from the vice president for public affairs, National Railroad Passenger Corp., transmitting a financial report of the corporation covering the month of April 1972, pursuant to section 308(a)(1) of the Rail Passenger Service Act of 1970, as amended; to the Committee on Interstate and Foreign Commerce.

2286. A letter from the vice president for public affairs, National Railroad Passenger Corp., transmitting a financial report of the corporation covering the month of May 1972, pursuant to section 308(a)(1) of the Rail Passenger Service Act of 1970, as amended; to the Committee on Interstate and Foreign Commerce.

2287. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting reports concerning visa petitions approved according certain beneficiaries third and sixth preference classification, pursuant to section 204(d) of the Immigration and Nationality Act, as amended; to the Committee on the Judiciary.

2288. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders entered in the cases of certain aliens found admissible to the United States, pursuant to section 212(a)(28)(I)(ii) of the Immigration and Nationality Act; to the Committee on the Judiciary.

2289. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders entered in cases in which the authority contained in section 212(d)(3) of the Immigration and Nationality Act was exercised in behalf of certain aliens, together with a list of the persons involved, pursuant to section 212(d)(6) of the act; to the Committee on the Judiciary.

2290. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders suspending deportation, together with a list of the persons involved, pursuant to section 244(a)(1) of the Immigration and Nationality Act, as amended; to the Committee on the Judiciary.

2291. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders suspending deportation, together with a list of the persons involved, pursuant to section 244(a)(2) of the Immigration and Nationality Act, as amended; to the Committee on the Judiciary.

2292. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders entered in the cases of certain aliens under the authority contained in section 13(b) of the act of September 11, 1957, pursuant to section 13(c) of the act; to the Committee on the Judiciary.

2293. A letter from the Secretary of Commerce, transmitting a report, together with legislative recommendations, reflecting the results of a study of ways and means to provide reasonable insurance rates for shippers and vessels engaged in waterborne commerce on the Great Lakes and St. Lawrence Seaway beyond the present navigation season, pursuant to section 107(c) of Public Law 91–611; to the Committee on Merchant Marine and Fisheries.

2294. A letter from the Secretary of Commerce, transmitting a draft of proposed legislation to authorize the Secretary of Commerce to permit not more than 30 persons at a time from foreign countries to receive instructions at the U.S. Merchant Marine Academy; to the Committee on Merchant Marine and Fisheries.

2295. A letter from the Secretary of Transportation, transmitting a draft of proposed legislation to deduct from gross tonnage in determining net tonnage those spaces on board vessels used for waste materials; to the Committee on Merchant Marine and Fisheries.

2296. A letter from the Acting Administrator of General Services, transmitting a request for the withdrawal of approval of various postal construction projects previously approved by the Public Works Committees of Congress, since they will be financed and constructed by the Postal Service under its own authority; to the Committee on Public Works.

2297. A letter from the Acting Administrator of General Services, transmitting a draft of proposed legislation to amend the Public Buildings Act of 1959, as amended, and for other purposes; to the Committee on Public Works.

2298. A letter from the Secretary of Labor, transmitting the third annual report on the work incentive program (WIN), pursuant to section 440 of the Social Security Act, as amended; to the Committee on Ways and Means.

RECEIVED FROM THE COMPTROLLER GENERAL

2299. A letter from the Comptroller General of the United States, transmitting a report on problems of the Atomic Energy Commission associated with the regulation of users of radioactive materials for industrial, commercial, medical, and related purposes; to the Committee on Government Operations.

2300. A letter from the Comptroller General of the United States, transmitting a report on the need for impartial cost-effectiveness studies by the Department of Defense in selecting new weapons; to the Committee on Government Operations.

2301. A letter from the Comptroller General of the United States, transmitting a report on the U.S. system for appraising and evaluating Inter-American Development Bank projects and activities; to the Committee on Government Operations.

2302. A letter from the Comptroller General of the United States, transmitting a report on the opportunity for greater efficiency and savings through the use of evaluation techniques in the Federal Government's computer operations; to the Committee on Government Operations.

2303. A letter from the Comptroller General of the United States, transmitting a report on economies available through increased use of the Federal Telecommunications System by military installations; to the Committee on Government Operations.

2304. A letter from the Comptroller General of the United States, transmitting a report on the need for further improvements in Department of Defense controls over Government-owned plant equipment in the custody of contractors; to the Committee on Government Operations.

2305. A letter from the Acting Comptroller General of the United States, transmitting a report on achievements, administrative problems, and costs in paying black lung benefits to coal miners and their widows under the Federal Coal Mine Health and Safety Act of 1969 (30 U.S.C. 801); to the Committee on Government Operations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. **HALEY**: Committee on Interior and Insular Affairs. H.R. 2327. A bill to authorize the sale and exchange of certain lands on the Coeur d'Alene Indian Reservation, and for other purposes; with an amendment (Rept. No. 92–1368). Referred to the Committee of the Whole House on the State of the Union.

Mr. **HALEY**: Committee on Interior and Insular Affairs. H.R. 6067. A bill to provide for the disposition of funds appropriated to pay judgment in favor of the Mississippi Sioux Indians in Indian Claims Commission dockets Nos. 359, 360, 361, 362, and 363, and for other purposes; with an amendment (Rept. No. 92–1369). Referred to the Committee of the Whole House on the State of the Union.

Mr. **HALEY**: Committee on Interior and Insular Affairs. H.R. 6318. A bill to declare that certain federally owned lands shall be held by the United States in trust for the Burns Indian Colony, Oregon, and for other purposes; with amendments (Rept. No. 92–1370). Referred to the Committee of the Whole House on the State of the Union.

Mr. **HALEY**: Committee on Interior and Insular Affairs. H.R. 8063. A bill to provide for financing the economic development of Indians and Indian organizations, and for other purposes; with amendments (Rept. No. 92–1371). Referred to the Committee of the Whole House on the State of the Union.

Mr. **HALEY**: Committee on Interior and Insular Affairs. H.R. 9294. A bill to authorize the Secretary of the Interior to convey trust title of U.S. Government land within the Devils Lake Sioux Reservation to the Devils Lake Sioux Tribe; with amendments (Rept. No. 92–1372). Referred to the Committee of the Whole House on the State of the Union.

Mr. **HALEY**: Committee on Interior and Insular Affairs. H.R. 10330. A bill to provide for the distribution of judgment funds to the Cheyenne River Sioux Tribe; with amendments (Rept. No. 92–1373). Referred to the Committee of the Whole House on the State of the Union.

Mr. **HALEY**: Committee on Interior and Insular Affairs. H.R. 10489. A bill to provide for the disposition of funds to pay a judgment in favor of the Shoshone-Bannock Tribes of Indians of the Fort Hall Reservation, Idaho, as representatives of the Lemhi Tribe, in Indian Claims Commission docket No. 326–I, and for other purposes; with an amendment (Rept. No. 92–1374). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ANNUNZIO (for himself and Mr. Pucinski):

H.R. 16516. A bill to amend section 109 of title 38, United States Code, to provide hospital and medical care to certain members of the armed forces of nations allied or associated with the United States in World War I or World War II; to the Committee on Veterans' Affairs.

By Mr. CARTER:

H.R. 16517. A bill to amend the Controlled Substances Act to provide for the registration of practitioners conducting narcotic treatment programs; to the Committee on Interstate and Foreign Commerce.

By Mr. CHAMBERLAIN:

H.R. 16518. A bill to provide for disciplined and responsible action in the consideration and execution of the Federal budget; to the Committee on Government Operations.

By Mr. DRINAN:

H.R. 16519. A bill to amend title II of the Social Security Act to provide that no reduction shall be made in the amount of any old-age insurance benefit to which an individual is entitled if such individual has 120 quarters of coverage, and to provide that an individual with 120 quarters of coverage may become entitled to medicare benefits at age 62; to the Committee on Ways and Means.

By Mr. FISH (for himself and Mr. Peyser):

H.R. 16520. A bill to provide that no State development agency shall be entitled to receive Federal financial assistance in any form unless it provides satisfactory assurance that it will take no action inconsistent with local zoning laws; to the Committee on Banking and Currency.

By Mr. FLOOD:

H.R. 16521. A bill to amend the National Flood Insurance Act of 1968; to the Committee on Banking and Currency.

By Mr. GRAY (for himself, Mr. Morgan, Mr. Garmatz, Mr. Belcher, Mr. Staggers, Mr. Nix, Mr. Leggett, Mr. Van Deerlin, Mr. Pepper, Mr. Anderson of Tennessee, Mr. Brown of Michigan, Mr. Brasco, Mr. Roe, and Mr. Dellums):

H.R. 16522. A bill to amend the Public Buildings Act of 1959, as amended, to provide for the construction of a civic center in the District of Columbia, and for other purposes; to the Committee on Public Works.

By Mr. RARICK:

H.R. 16523. A bill to amend the Internal Revenue Code of 1954 to allow a deduction from gross income for social agency, legal, and related expenses incurred in connection with the adoption of a child by the taxpayer; to the Committee on Ways and Means.

By Mr. SYMINGTON:

H.R. 16524. A bill to provide for the humane care, treatment, habilitation and protection of the mentally retarded in residential facilities through the establishment of strict quality operation and control standards and the support of the implementation of such standards by Federal assistance, to establish State plans which require a survey of need for assistance to residential facilities to enable them to be in compliance with such standards, seek to minimize inappropriate admissions to residential facilities and develop strategies which stimulate the development of regional and community programs for the mentally retarded which include the integration of such residential facilities, and for other purposes; to the Committee on Interstate and Foreign Commerce.

H.R. 16525. A bill to amend chapter 44 of title 18 of the United States Code (respecting firearms) to penalize the use of firearms in the commission of any felony and to increase the penalties in certain related existing provisions; to the Committee on the Judiciary.

H.R. 16526. A bill to amend the Omnibus Crime Control and Safe Streets Act of 1968 to enable units of general local government to increase the numbers of police; to the Committee on the Judiciary.

By Mr. WHALEN:

H.R. 16527. A bill to assure the free flow of information to the public; to the Committee on the Judiciary.

By Mr. WYATT:

H.R. 16528. A bill to clarify the meaning of section 357(c) of the Internal Revenue Code of 1954 with respect to the basis of certain unrealized receivables; to the Committee on Ways and Means.

By Mr. PEYSER (for himself and Mr. Kemp):

H.J. Res. 1294. Joint resolution condemning the actions of the Arab guerrillas at the Olympic Village on September 5, 1972; to the Committee on Foreign Affairs.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

421. By the **SPEAKER**: Memorial of the Senate of the State of Maryland (House concurring), ratifying the proposed amendment to the Constitution of the United States relative to equal rights for men and women; to the Committee on the Judiciary.

422. Also, memorial of the House of Representatives of the State of Maryland, (Senate concurring), ratifying the proposed amendment to the Constitution of the United States relative to equal rights for men and women; to the Committee on the Judiciary.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. STEELE:

H.R. 16529. A bill for the relief John C. Mayoros; to the Committee on the Judiciary.

By Mr. WRIGHT:

H.R. 16530. A bill for the relief of Arturo Aguirre-Alvarado, his wife, Soledad Labra de Aguirre, and their children Graciela Agiurre Labra, Guadalupe Aguirre Labra, Alma Rosa Aguirre Labra, Arturo Aguirre Labra, Jr., Alberto Aguirre Labra, and Beatriz Aguirre Labra; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

274. By the **SPEAKER**: Petition of Ethel W. Satterthwait, Yardley, Pa., et al., relative to the agreements negotiated by the President in Moscow; to the Committee on Foreign Affairs.

275. Also, petition of the Board of Supervisors, Amador County, Calif., relative to the service of Congressman Harold T. "Bizz" Johnson; to the Committee on House Administration.

276. Also, petition of the Committee To Save the People's Downtown, Washington, D.C., relative to the Pennsylvania Avenue Development Corporation Act of 1972 (H.R. 10751); to the Committee on Interior and Insular Affairs.

277. Also, petition of James L. Braley, Bell, Calif., relative to amendments to the Constitution of the United States; to the Committee on the Judiciary.

278. Also, petition of the Board of Supervisors, Milwaukee County, Wis., relative to welfare reforms; to the Committee on Ways and Means.

279. Also, petition of the Board of Directors, Chamber of Commerce of the Americas, relative to trade restrictions; to the Committee on Ways and Means.

EXTENSIONS OF REMARKS

ROY AND ELLEN BRIGMAN

HON. ROBERT P. GRIFFIN

OF MICHIGAN

IN THE SENATE OF THE UNITED STATES

Tuesday, September 5, 1972

Mr. GRIFFIN. Mr. President, two of the finest, most dedicated people I have ever known are Roy and Ellen Brigman, who make it possible each year for many handicapped children to enjoy the experience of camping.

A good friend and Traverse City neighbor, Dr. Robert H. Chase, recently authored an article for the magazine, Lady's Circle, which appropriately pays tribute to these two outstanding Americans and their Camp Roy-El.

Mr. President, I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

GEE, WASN'T I LUCKY I HAD POLIO!

(By Dr. Robert H. Chase)

"Gee, wasn't I lucky I had polio!" The pretty little 11-year-old blonde girl who made this remark surprised none of the people circled around her, for they knew what she meant. She had just finished her first week at Camp Roy-El, a camp for handicapped children in northern Michigan. She'd had a ball. For the first time in her polio-stricken life she had spent seven glorious days living just exactly like other girls not handicapped. She had missed nothing. She had spent these days in the company of other youngsters also handicapped, some worse, some not as bad. The people who listened, with tears in their eyes, as she bade them goodbye, were staff members, "teen-aiders," and other campers who had been to Camp Roy-El before. They all knew what she meant, for this special camp was and is something warm and wonderful, and all who have come in contact with it in any capacity share with the campers the affection and gratitude they have for the founders of Camp Roy-El, Roy and Ellen Brigman.

Twenty years ago Roy and Ellen had a dream. Quite simply, it was a dream in which handicapped children could go to a camp, without charges of any kind, and do all the things unafflicted children do, and lots more. Their dream came into being that year, 1952.

The Brigmans' interest in such a camp had been far from casual. Both in their thirties, Roy was a skilled physical therapist at Munson Hospital in Traverse City, Mich., and Ellen was an elementary grade school teacher at St. Francis School and director of the local Girl Scout camp. Both had seen the effects of disease on young people, particularly the ravages of polio during those days when it was at its worst. Too many times, Roy had seen children crippled by disease or accident limp through life living, or attempting to, in a world of normal, healthy people.

"I learned many years ago," Roy explains, "that sometimes my patients didn't respond as well as I knew they could, and sometimes the reason was that they felt left out and, like any of us, were inclined to feel sorry for themselves. When you're the only handicapped person in a family, in a school, or even in a small community, you're not expected to do the things an unafflicted child can do, and that includes partaking of sports, hobbies, and even work." Then, running his hand through his short-cropped sandy hair, Roy adds, "Ellen and I figured if we could start a camp for youngsters, all handicapped, some hopeless wheel-chair cripples, some even destined to die before they were 15 years old, that this intermingling would provide a healthy atmosphere for both body and soul. Here each youngster would soon realize he wasn't the only one who'd been victimized by fate, and that he too could have some measure of fun."

Their job wasn't easy, but there are few people like Roy and Ellen Brigman. Roy, a former pilot in the Air Force (now a reserve colonel), was more than familiar with the intricate planning that would be necessary to make the camp more than just a dream. Ellen, the teacher knowing how important discipline is in a classroom, realized it would be doubly important in a camp of this kind, for even handicapped children would have to obey such rules as getting to bed on time and being on time for meals and excursions. Quiet and efficient, Ellen was a natural for the job as co-director of the camp. Though never raising her voice, she speaks with the authority of a marine drill sergeant, but is listened to far more carefully. The campers and teenagers alike refer to her affectionately as "Mrs. B," and to Roy, with the same fondness, as "Mr. B."

Home of Camp Roy-El is Gilbert Lodge on beautiful Twin Lakes just eight miles west of Traverse City. Gilbert Lodge is supervised and controlled by the Twin Lakes 4–H Cub, and is rented by them to Camp Roy-El for two weeks every year, usually the last week in July and the first week in August. The rest of the summer, various 4–H and youth groups from around the state also rent it; so the facilities are in use through the entire camping season. The campers live either in cabins or in the lodge proper.

The campers themselves are between the ages of 8 and 21 and come from a variety of communities in the northern half of the Lower Peninsula of Michigan. All of them have some handicap or disability, and the younger ones attend the first week while the teen-age group attends the second week. All are identified as "Handicampers" and their disabilities include those caused by polio, cerebral palsy, muscular dystrophy and other illnesses. Some children are blind or deaf, while others may wear braces, use crutches or be in wheel chairs. Approximately one hundred Handicampers are provided for each summer. Since Roy and Ellen feel there should be a teenaider or staffer for each, that is all they have room for.

As indefatigable as Roy and Ellen are, they still are only two people, and hence they welcome the help of another hardworking couple, Clare and Dorothy Wilder. Dorothy works at the Central Methodist Church in Traverse City during the year and Clare is a brakeman for the C. & O. Railroad. For the last 12 years both Clare and Dorothy have, like Roy and Ellen, given up their entire vacation time to be at Camp Roy-El for both the first and the second weeks. Dorothy is chief cook for the camp, and this means cooking three meals a day for more than a hundred people, half of whom are ravenously hungry, food-destroying boys. Clare is in charge of the craft shop, where the campers may work on projects to take home at camp's end. Over the years the campers have made leather wallets, weather-vanes, stools, bulletin boards, mailboxes and many other things, all finished in a highly competent way. Most of the campers work on craft projects. They don't have to, but they do, even though they may have prosthetic devices instead of arms and even though they may be blind. There are always extra hands and eyes to help them, and they are usually Clare's.

The camp itself has grown, in these 20 years, from 15 campers in 1952 to 110 (for two weeks) in 1971. In 1952, there were 15 teen-aiders (teen-age helpers, both boys and girls, who bathe, dress and even feed the more severely handicapped, or who serve as buddies and helping hands to the less fortunate). In 1971, there were 45. The staff, (all unpaid volunteers, including Roy and Ellen, who receive no renumeration of any kind) has risen from five in 1952 to 38 in 1971, while the budget of $200 in 1952 has mushroomed to $1,000 for the year 1971.

In spite of the 20-fold increase in the budget, Camp Roy-El is in no financial trouble. It is so well received in the Grand Traverse area for the good it does that it has never had a fund-raising drive or had to solicit money in any way. In fact, during 1971 alone, 183 different groups and individuals made cash contributions, the largest being from the state Easter Seal campaign in the name of all the chapters in the area served by Camp Roy-El, and the smallest, 13 cents, from the four-year-old brother of a teen-aider.

While money is no real problem now, how about the year it was started? "Well that first year," Roy says, "we were rather small, ran only one week, camped outdoors and had very little expense. We anticipated a need for $300. We asked the March of Dimes, the Easter Seal campaign and one other agency for $100 each. The other agency wanted to give us the whole $300 or nothing, but we preferred that the support be broader, so we accepted the $200 from March of Dimes and Easter Seal and made it that first year with $6 left over."

The governing body of Camp Roy-El is the Camp Committee, comprised of 12 couples representing all walks of life in the Traverse City area. The committee meets three or four times during the year either to review the just-completed camp session or to start planning for the next year. While some things—meal planning, hours of camp, etc.—remain constant year in and year out, other things are changed from year to year for variety's sake. For example, the committee attempts to rotate the excursions so that each year there are new ones (with the exception of the trip to the Sand Dunes and the boat ride on the bay, which are regulars).

"It isn't always easy to find new and different excursions," says pert Mimi Dixon, for years publicity director of the camp and a member of the Camp Committee. "We really wrack our brains to come up with different things each year. Each camper has his favorite, but the one I think was the most fun for all was the chairlift ride at Crystal Mountain Ski Area. The kids really ate that up, I noticed."

The annual meeting of the Camp Committee is in the spring, where the first order of business is the election of the camp directors. To nobody's surprise, except Roy and Ellen's, they are annually re-elected as directors of the camp for the coming year. This means that while the Camp Committee meets three or four times during the year and works as staff during camp time, the year-around responsibilities of camp, such as corresponding with campers, talking to service clubs, setting up physical exams for the campers by local physicians, etc., are handled by Roy and Ellen. Thus, in addition to the arduous two weeks of camp itself, Roy and Ellen devote the rest of the year to it in one form or another.

Four couples remain from the original Camp Committee—Mrs. Lloyd Kohn, representing herself and her recently deceased husband, the Gordon Grapes, the Harold Hendges and the Ed Perketts. Ed, postmaster of Traverse City, tells why he and his wife Helen have stayed on through the years.

"We both love to help people and have seen the inspiration the camp has been to teenaiders like our two daughters, one of whom is now a physician."

This is an example of the way in which Camp Roy-El benefits not only the Handicampers but the teenaiders who help out. Says Ellen, brushing an imaginary hair back in place, "Roy and I are constantly amazed to see how many of our former teenaiders end up in occupational therapy, physical therapy, schools for the blind and in other related fields. Mostly because of their association with handicapped children. It's wonderful."

Two of Camp Roy-El's best friends and long-time supporters are Governor William G. Milliken and Senator Robert P. Griffin, both of whom have visited the camp many times.

"Camp Roy-El is a remarkable example of American compassion at work," Bob Griffin says. "When you see what is being done there, as Marge and I have, you can't help but be impressed by the actions of the many people who work to make Camp Roy-El possible—people whose only motivation is to help other less fortunate beings."

Governor Milliken, a native of Traverse City, had this to say in a congratulatory telegram on the occasion of Camp Roy-El's 20th birthday. "I've been tremendously impressed with the heart-warming work of Camp Roy-El over the years. It's a highly commendable undertaking in the best American tradition of community initiative and support."

Why such acceptance of a camp for handicapped children? Well, in the first place, people think it's great because it's completely free to the children. They have only to bring their own linens, and to arrange their own transportation to and from camp—they're even given a stamped post card each the day they arrive to mail back to their parents or friends. So, what else? Well, where else could you shoot an actual submachine gun, if you're blind, that is, with a Michigan State Trooper as your instructor? Where else could you make a wallet for your father in the craft shop, particularly when you have no forearms or hands, but prosthetic devices instead? Where else could you square dance to a real live polka band, where else indeed except at Camp Roy-El, on square dance night, all squares are composed of kids in wheel chairs, with teenaiders pushing them through the dosey-do's? Where else could you go on excursions like boat rides on yachts in Grand Traverse Bay and "dunesmobile" rides over the Sleeping Bear Sand Dunes (soon to be a national park)? Where else a train ride with a real steam engine, complete with a real live hold-up along the way? Or where else could you go on a fishing trip to a privately stocked trout pond where you fished till you caught something, and they had it cooked for your supper?

Where else could all this happen but at Camp Roy-El? There are camps and there are camps, and most of us went to them in our youth, and usually tired of them after a year or two. Not so at Camp Roy-El. Whether you're just beginning at eight years of age, or an old hand at 21 (actually some of the campers are older than 21, and are raised to the lofty status of "staff"), you can't wait for the fall, winter and spring to pass, because, with the summer, comes camp time. It's here at Camp Roy-El that, at least for a week, you can leave your world behind and join your fellow handicapped in fun, crafts, excursions, sports and games, all carefully planned by the Camp Committee months before. It's here you do everything an unafflicted child can do, and more. To you, Camp Roy-El is a little bit of heaven, a little bit of something to take the sting out of those Michigan winters, a little bit of something to look forward to for 11 months. It's really the beginning and end of everything in your young life. And, if you're 11 and crippled, and have just spent your first week at Camp Roy-El, that is why you say, "Gee, wasn't I lucky I had polio."

ALIMONY AND EQUAL RIGHTS

HON. JEROME R. WALDIE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 5, 1972

Mr. WALDIE. Mr. Speaker, at this time I would like to enter the following article in the Congressional Record. It was written by two dedicated Los Angeles women, Trude Forsher and Marian P. Winston, and appeared in the Los Angeles Times on July 16 of this year. Here Trude Forsher and Marian P. Winston neatly summarized their months of intensive research into the problems of alimony in this country today. It is in the best interest of all of us interested in the current unjust situation to read this article, but it is especially in the interest of those of us who are not concerned.

The article follows:

On Equal Rights: The Myth of the Easy Life on Alimony

(By Marian P. Winston and Trude Forsher)

Now that an Equal Rights Amendment to the Constitution has been passed by Congress, and ratified by 20 of the necessary 38 states, one often hears—over bridge tables, coffee cups, and typewriters—a woman's voice saying:

"Who wants equal rights? I like to have my husband support me. If the women who want equal rights get their way, women will have to support their children themselves, and they won't have any alimony if they get divorced."

In saying so, these women are showing a sense of false security, based on a mistaken impression of the protection that present laws give them. The general impression of the legal rights of women and children to support from husbands and fathers is almost completely at variance with the facts.

What actually are a wife's legal rights to support from her husband during the marriage? "The rights to support of women and children are much more limited than is generally known," reports the President's Citizens' Advisory Council on the Status of Women. It is custom, not law, that causes millions of men to provide for their wives and children.

The Nebraska Supreme Court explains the legal viewpoint as follows: "As long as the home is maintained and the parties are living as husband and wife, it may be said (i.e., the court will say) that the husband is legally supporting his wife and the purpose of the marriage relation is carried out."

In other words, a married woman living with her husband can, with certain exceptions, get only what he chooses to give her. If he fails to provide the necessities of life, she has no recourse except to leave him.

What happens when a marriage does break up? You'd never guess it from the many magazine articles claiming that men are "exploited" and "victimized" by wives who bleed them for huge alimony payments, but an ex-wife's chance of obtaining alimony are statistically very small, except among the wealthy.

Mothers do obtain custody of children in about 90% of the cases, but this is hardly a victory, since very few fathers have any desire to assume the burden of child care. About 10% of divorced fathers receive custody now; when appropriate, the mothers pay money toward the children's support.

An attorney specializing in obtaining custody for men admits that 75% of men clients never express any interest in obtaining custody. In other words, the percentage of cases in which custody represents a victory for the mother is rather low. However, an equal rights law would remove any arbitrary preference for the mother, so that custody cases would be decided on the basis of the best for the children.

March, 1971, census figures (the latest available) show that 6 million families with children under 18 are headed by women—about 12% of all American families. For years the figure stood constant at 10%, but the huge increase in divorces (715,000 in 1970) is making the fatherless family commonplace.

Nine-tenths of women family heads are divorced, separated, or widowed; only a tenth have never been married. These women are raising at least 20 million children—not counting the legally adult children of 18 or older whom the mothers are putting through college.

Not only have the number and proportion of mother-headed families increased, but fatherless families have been getting poorer and poorer, on the average. During the prosperous 1960s, the proportion of men and male-headed families in poverty dropped to an all-time low of 6%, while the proportion of mother-child families in poverty went up to 36%.

The reason, clearly, is that more and more housewives were set adrift by divorce, separation, or desertion, with the children on their hands to support as well as to care for.

The proportion of nonpoor fathers who condemn their children to poverty by providing little or no support has been going up, regardless of good times or bad. California State Social Welfare Board figures for 1966 show that 70% of welfare children received no support from their fathers. Now the figure is about 90%—and the welfare families are only the tip of the iceberg.

But what about alimony and child support payments? Divorced men are supposed to be supporting their ex-wives in parasitic idleness, according to the usual myth. And equal rights would certainly eliminate any such one-sided arrangement based on sex alone. But do women have the privilege of alimony now?

Among the very wealthy—the cases that get into the papers—alimony is certainly a reality, and the amounts may be quite large. But for the rest, alimony is a myth. In well over 90% of all divorce cases in the United States, the wives don't even ask for alimony, and when they do, they often don't get it.

In 12,000 Chicago divorces, for instance, only 7% of the wives even asked for postdivorce alimony. In 1942–43, when the Kansas State Judicial Council published alimony statistics, the Kansas courts awarded alimony in about one case out of 100.

A California judge estimates that in his county not more than 2% of women are granted postdivorce alimony and 10% are awarded temporary alimony during divorce proceedings. The same story is reported by the 575 domestic relations judges and commissioners surveyed by an American Bar Assn. committee in 1965: Alimony is seldom requested and even more seldom granted.

Moreover, in the few cases that involve something called alimony, the grant is often not really alimony but money given to the wife to pay her husband's debts. Out of six "alimony" awards in a series of cases studied in Kansas, three were for the purpose of paying such debts.

We know of several cases in California where the wife's company credit union financed a car or other large purchase for the husband. After the divorce, the husbands arranged to make the payments to their ex-wives to transmit to the credit union—and called the payments "alimony."

If a man is in a taxable bracket, he has a financial incentive to pay "alimony" instead of child support. Alimony, if paid for 10 years or more, is excluded from the man's taxable income and the woman must pay the taxes on it. The same is not true of "child support," on which the man pays the taxes.

In some cases, the wives are not aware of the tax burden they are accepting by agreeing to alimony rather than child support. Of course, their attorneys should warn them.

Why do so many people believe that the alimony burden is prevalent? We have no answer.

Is it because alimony used to be common, when wives were nearly all dependent? No, because alimony was not common then. The Census Bureau kept statistics on alimony until 1922. At the turn of the century, alimony was requested in only 13.4% of the divorces and was granted in 9.3%. The all-time high apparently was in 1922, when alimony was decreed in 14.7% of cases.

We say "awarded" or "decreed," not "paid" because monetary divorce awards—meaning alimony and child support—are the least complied with and the least enforced of all cases outside small claims court. Prof. Henry Foster of the New York University Law School told the Practicing Law Institute that 50% to 90% of New York court orders for alimony and child support are never enforced. Although national statistics are lacking, this degree of nonenforcement seems to be typical.

In a 10-year study of child support orders issued in 1955 in Wisconsin, 79% of the fathers simply did not obey the court orders. Only 13% were in full compliance, and 8% made some payment, however small. Approximately 90% of the men in white-collar occupations and 80% in blue-collar occupations were in defiance of the court order at some time.

By the end of 10 years, only 36% of those defying the court order had any legal action taken against them. Similar results are reported from Ohio and other states.

Many men do, of course, comply with support awards. Conscientious fathers manage to make support payments even during periods of unemployment, as reflected in the fact that support-nonsupport figures show no relationship to unemployment figures.

But does this relieve the mother of the financial burden? Not really, because most "child support" awards represent about half the actual cost of the child's expenses. The average award in California is about $75 per month, which is less than half what the public pays to support children in nonprofit institutions and foster homes. Thus the mothers are supplying half or more of the money, as well as all the care, and are doing this on salaries that average half of what a man earns.

Far from eliminating the right of children to support from absent parents, the Equal Rights Amendment might well increase them. The Citizens' Advisory Council on the Status of Women states: "A case could be made under the equal rights amendment that courts must require divorced spouses to contribute in a fashion that would not leave the spouse with children in a worse financial situation than the other spouse."

Lawyers report that many judges say that if women want to be equal they should not ask for alimony or child support—this despite the fact that equality is not yet the law, and that child support is a right of the child, not of the parent. Ironically, the women these judges are penalizing are the unliberated housewives and mothers who have devoted themselves to their families for 15 or 20 years or more instead of developing their earning power.

A recent change in the California divorce law would probably be found in violation of equal rights. The Hayes-Stacey amendment to the 1970 Family Law Act, which passed the Assembly unanimously, makes two changes in the former method of dividing community property. Both of them work to the disadvantage of wives.

A woman's earnings while separated from her husband used to be her sole and separate property; now they are community property, liable for her husband's debts. That in itself might seem a step toward equality—but the amendment also provides that a wife's expenses during the period before the divorce are to be subtracted from her half of the community property, not from the community property as a whole. The husband's expenditures continue to be subtracted from both halves.

As a result, says attorney Amy White Fixler, a conscientious lawyer can only advise the wives to file for divorce at the first inkling of marital trouble. "You just can't tell a woman to hang in there, hoping for a reconciliation, and use up her half of the property," says Mrs. Fixler, "knowing that there isn't going to be anything left to use in rearranging her life and supporting her children."

Where did the idea ever come from that women have the economic advantages in marriage and divorce? Probably from the same place that spread the equally false notion that women own a disproportionate share of the wealth of the country.

Actually, of course, the 51% majority of women receives about one-quarter of all the income, owns 26% of the shares of stock, similar shares of the real estate, and far less of the business proprietorships, and leaves estates that average half of what men leave.

PENNSYLVANIA JOINT COMMITTEE REPORT ON TOCKS ISLAND

HON. HUGH SCOTT

OF PENNSYLVANIA

IN THE SENATE OF THE UNITED STATES

Tuesday, September 5, 1972

Mr. SCOTT. Mr. President, I come forth to acknowledge and applaud the report on the Tocks Island multipurpose development recently approved by our Pennsylvania General Assembly Joint Legislative Air and Water Pollution Control and Conservation Committee.

This Pennsylvania committee was created over 4½ years ago out of our concern for enhancing our human environment. The committee is comprised of 18 members, nine from the senate and nine from the house. It is thoroughly bipartisan in its makeup and includes some of our outstanding Pennsylvania conservationists.

Last fall the committee toured the site of the authorized Tocks Island development on and around the Delaware River between Pennsylvania and New Jersey. It also held 2 days of public hearings, receiving testimony from some 50 different parties, both governmental and nongovernmental. It then conducted its own further analyses, and has followed and evaluated continuing developments to the present concerning Tocks Island. Its report approved August 16, 1972 is a model of mature, responsible deliberation.

It establishes that there are certain fixed human water resource needs in and around the Delaware basin and, as shown by the area's recent history, that the environmental effect of not meeting them, or deferring the undertakings necessary to do so, is fraught with disaster. It enumerates and evaluates the various alternatives proposed for meeting these urgent needs, and sets forth a complete and clear description of the authorized Tocks Island development. It is the committee's conclusion that none of the various alternatives "meet those essential human needs adequately, as appropriately, or as economically as the authorized Tocks Island water conservation project." It is also the committee's conclusion that this project "be carried out to avoid significant adverse effects," and to this end it recommends several steps in the interest of enhancing fish values and providing reasonable assurance against pollution of Tocks Island Reservoir's waters.

Mr. President, I recommend the committee report to all concerned with our need to develop and conserve our essential water resources in order to sustain the lives of our people and enhance the quality of their human environment. I ask unanimous consent that the report and its transmittal letter be printed in the RECORD.

There being no objection, the report and letter were ordered to be printed in the RECORD, as follows:

COMMONWEALTH OF PENNSYLVANIA,
Harrisburg, Pa., August 16, 1972.

Hon. MILTON J. SHAPP,
Governor, Commonwealth of Pennsylvania, Main Capitol, Harrisburg, Pa.

DEAR GOVERNOR SHAPP: Attached is a copy of a report on the Tocks Island Project that was adopted this date by the Joint Legislative Air and Water Pollution Control and Conservation Committee.

It is the hope of the Committee that Pennsylvania affirms its commitment to bear its appropriate share of the cost of the regional water pollution control program presently under consideration by the Delaware River Basin Commission. Further, that Pennsylvania take adequate measures to insure that the fishery of these waters will be enhanced through proper construction of terraced fish passage pools and that all other environmental considerations mentioned therein are properly fulfilled.

Respectfully,

JOHN F. LAUDADIO, Sr.,
Chairman.
R. BUDD DWYER,
Vice Chairman.

[Joint Legislative Air and Water Pollution Control and Conservation Committee]

REPORT ON AUTHORIZED TOCKS ISLAND MULTIPURPOSE DEVELOPMENT, UPPER DELAWARE RIVER, PENNSYLVANIA, NEW JERSEY, AND NEW YORK

Last fall members of the Committee toured the site of the authorized Tocks Island Project, on and around the Upper Delaware River between Pennsylvania and New Jersey, and held two mornings of public hearings on it in Stroudsburg, Pennsylvania.

The Committee received statements, testimony and related data from some fifty different parties representing diverse points of view on Tocks Island. These materials, from National, State and local interests, both governmental and nongovernmental, have been studied by the Committee and partly summarized by staff. The members conducted additional analyses and have followed continuing developments involving Tocks Island.

PROJECT BACKGROUND, STATUS

The Delaware River drains portions of the States of Pennsylvania, New Jersey, New York and Delaware. The matter of equitable sharing of its interstate waters has been extensively litigated (e.g., *State of New Jersey* v. *State of New York, Commonwealth of Pennsylvania, Intervenor*, 283 U.S. 336 (1931), 347 U.S. 995 (1954))), and extensively studied over the years. A major portion of this State's population, and its capital investment, economy and labor force depend on the waters of the Delaware River.

The authorized Tocks Island Project is the key structure in the approved Plan for conservation of those waters, prepared by Federal and State agencies and adopted by Congress and by the Federal-interstate Delaware River Basin Compact Commission. Due to the importance of these waters to Pennsylvania, and to the Delaware River's destructive vagaries, ranging from drought disaster to flood devastation, Tocks Island Project has been supported by all Pennsylvania Governors and Senate and House congressional delegations concerned, many of whom played leading roles in its inception, authorization and appropriations.

Tocks Island was authorized under President Kennedy in 1962, following extensive studies under President Eisenhower after the River's disastrous floodings of the nineteen fifties. Its preconstruction planning was accelerated under President Johnson following the River's disastrous droughts of the 'sixties. Its National Recreation Area was authorized in 1965. Combined development of its hydroelectric purpose by underground generation and transmission was authorized under President Nixon in 1970.

About 29 percent of the land needed for the Project's Dam, Reservoir and Beach Area, and about 46 percent of that needed for its National Recreation Area, has been acquired. The Dam is now ready for construction, pending clearance by the President's Council on Environmental Quality (noted below). DRBC is processing the application for administrative approval of its power aspects. Tocks Island's scheduled completion date is 1980.

PROJECT DESCRIPTION

The authorized Tocks Island Project consists of its Dam at River mile 217 six miles above Delaware Water Gap, its Reservoir Lake extending 37 miles up to Matamoras, its Beach Area of 10,000 acres surrounding its 100-mile Reservoir shoreline, and its National Recreation Area preserving another 47,000 acres from the Water Gap around the outer boundaries of the Beach Area. Also, as now proposed by DRBC and other agencies, the remaining upper 80 miles of the Delaware, from the top of the Reservoir at Matamoras up to Hancock, New York, would be preserved as a wild and scenic river.

Dam. Tocks Island Dam will resemble a sloping hill, rising 160 feet from River bed to elevation 455 feet MSL. It will be 3,200 feet long from shore to shore and vegetated on its downstream face. Its New Jersey side will have a series of terraced fish passage pools, overflow spillway, underground River passage conduits, underground power generating facilities (these latter also connected by underground conduits to an enlarged existing hydroelectric pool on the ridge beside the Dam), and underground transmission lines.

Reservoir. Including 2,500 acres now occupied by the River, the Reservoir's normal water surface will cover 12,500 acres, at elevation 410 feet MSL. As shown by upstream flow records, downstream water requirements and Project purposes, Reservoir lake level will vary seasonally and with the daily vagaries of the weather. In ninety (90) percent of the years: it will rise from elevation 410 to higher levels on brief occasions during the spring rain and snowmelt season. Those occasional rises will be brief, as between every April 1 through July 1 all excess inflows are released (within River channel limits) for shellfish downstream. During summer dry season its level starts declining from elevation 410 as releases are made to augment River low flows downstream and to make Reservoir flood storage space available by late summer-early fall flood season. From July 1 through Labor Day it will decline about seven feet to about elevation 403. In winter it will reach its lowest annual level, about elevation 393, and then start rising back to its springtime normal at elevation 410. Excluding occasional rises from these levels due to heavy rains, during average water years Reservoir annual seasonal variation thus will total 18 feet.[1]

Beach Recreation Area. This is to develop Tocks Island's direct or water recreation potential. This Area, to have fourteen major beach developments, comprises about 10,000 acres with Reservoir at normal elevation 410. As it declines to elevation 403 by the end of the recreation season, this will expose 1,240 acres; its decline to its annual winter low at elevation 393 will expose another 2,100 acres. Beaches will be sanded down to elevation 385 feet MSL. Any objectionable flats will be eliminated by dredging. Operation of the underground power facilities, involving underground exchange of certain water between the Reservoir and the enlarged existing pool, will cause a gradual decline in Tocks Reservoir level in the evening, and a corresponding gradual rise in it during Reservoir daytime recreation hours. During recreation season this daily variation will total about nine inches, or about the same as the existing daily variation in this part of the River.

National Recreation Area. This is to develop Tocks Island's indirect or land recreation potential. This Area preserves another 47,700 acres outside the Beach Recreation Area.

Access to the Reservoir and Recreation Areas will be controlled at National Recreation Area entrance roads. Together the Beach and Recreation Areas will accommodate 4 million visitor-days annually (one person present for part or all of a day). As additional recreation facilities can be funded in years ahead, it is estimated that after 1990 the two Areas together will accommodate as many as 10 million visitor-days annually. This latter means a combined maximum of 141,000 people within the 110-square mile Project Reservoir and Recreation Areas on a summer Sunday. About 47 of those square miles are in Pennsylvania.

PROJECT PURPOSES

There are acknowledged public needs in and around the Basin for flood protection, water supply, water recreation, and electric energy. The way Tocks Island Project meets these is noted below.

Flood Control. Protection is needed against disasterous flooding of the Delaware Valley. The floodings of 1955 caused untold damage along the River and tributaries from above Matamoras to below Trenton, *Presidential Disaster Declarations,* (August 20, 22, 1955). Whole communities and parts of communities were wiped out. The most concentrated property loss occurred around the Delaware-Lehigh confluence, 34 River miles below Tocks Island. Tocks Island gives protection against this menace.

Water Supply. Over 20 million people in and around the Basin depend on Delaware River waters. The 1961–1967 Delaware Basin drought necessitated a *Presidential Disaster Declaration* (August 18, 1965). All forecasts show a substantial increase in this area's consumptive water requirements. DRBC's forecasts show they will more than double over the next fifty years. Conservation storage of Delaware River water is need to supply this increased requirement, and to provide sustained River flow to keep sea water back from Philadelphia's Delaware River water supply intakes and Southern New Jersey's underground fresh water sources. Tocks Island, with a steady water supply yield of 630 million gallons a day or 980 cubic feet a second, provides 60 percent of this required conservation storage.

Water Recreation. There is great increase in the water recreation need of the public within or within a short distance of the Delaware Basin. According to the U.S. Interior Department, no section of the country has greater need for the water recreation Tocks Island Reservoir provides.

Electric Energy. New capacity for supplying peak public electric needs and system reliability is needed. (Peak public needs are those occurring daily, of a few or more hours duration, in excess of baseload plants output.) Tocks Island provides 1.3 million kilowatts of hydroelectric capacity for supplying peak public needs and pickup of baseload plant load in the event of outage. This capacity is subject to several statutory requirements for protection of the Damsite environment, including underground powerhouse, transmission lines and water conduit facilities, preservation of Sunfish Pond and Kittatinny ridge, and enlargement and use of the existing hydroelectric pool near the Dam.

PROJECT COST

Tocks Island Project's Federal cost is (1971 prices): Dam, Reservoir, Beach Recreation Area: $257 million.[2] About half of this is to be repaid, $74 million by water supply and at least $50 million by power, for a net Federal cost of not more than $133 million. None of this $133 million, for Tocks Island flood control and direct recreation, is repayable by State or local governments.

National Recreation Area: $87 million.[3] None of this, for Tocks Island indirect recreation, is repayable by State or local governments.

Additional cost assignable to Tocks Island may be some share of the cost of any regional water pollution control program (noted at p. 11) that will also protect its water quality. Additional income is annual tax revenues of $5.5 million to $6 million produced by its power.

As of Fiscal year 1973, commencing July 1, 1972, Congress has appropriated $50 million for the Dam, Reservoir, and Beach Recreation Area; and $37.4 million for National Recreation Area land. For Fiscal year '73 President Nixon requested and Congress appropriated $14.8 million for the Dam, Reservoir and Beach Area. Nothing was requested or appropriated this year for the National Recreation Area, as its appropriation authorization of $37.4 million for land is exhausted.

PROJECT ALTERNATIVES

The existence of those public water resource needs met by Tocks Island is not denied. The possible alternative ways urged by some for meeting them are collected and noted below.

Flood Control. A series of smaller dams on the tributaries. These would not supply the needed level of protection and would cost more than Tocks Island flood control. Flood plain zoning, i.e., preventing new development in areas vulnerable to destructive floodings, will not protect existing communities and plant investment.

Water Supply. (A) Hudson River, (B) Flood Skimming, (C) Desalination, (D) Restrict Water Use.

(A) Hudson River. By court allocation New York can withdraw up to 800 million gallons daily (mgd) of Delaware Basin water from NY's reservoirs in its part of the upper Basin—provided it operates them to insure a dependable Delaware mainstem flow (1130 mgd) down at the NY border. For this purpose NY constructed three large reservoirs,

---

Footnotes at end of article.

the last in 1967, and elaborate aqueduct, systems. These collect Delaware tributary flood flows early in the year for release throughout the year, partly to the NYC area, and partly to the mainstem downstem. (In dry periods the required release to the mainstem provides as much as two-thirds of its total flow down at the NY border, and the release to NYC can supply only 482 of the 800 mgd authorized.) As this arrangement delivers certain Delaware Basin water from NY's part of the Basin to New Yorkers living outside of it (in the Hudson River watershed), some maintain that water should flow to downstream Basin States instead, and NYC should draw all of its supply from the Hudson. This alternative maintains it would substitute for Tocks Island to meet increased requirements downstream. This is contradicted by studies now completed under the recent Northeastern Water Supply Act of 1965. In any event such an alternative would be expensive: this NY reservoir system, financed by NY alone, is valued at many hundreds of millions of dollars; Tocks Island water supply storage costs $74 million. This alternative presents legal problems also.[4]

(B) Flood Skimming. By court allocation NJ can withdraw up to 100 mgd of Delaware Basin water for consumption outside its part of the Basin. If NJ provides Delaware Basin water storage for releasing to the mainstem such water as will compensate for NJ withdrawals in excess of 100 mgd, NJ can withdraw additional Basin water "without limitation" for non-Basin consumption.[5] Water demand already exceeds dependable supply in parts of NJ, that State has determined the increased needs of Northeastern NJ must be met by Delaware Basin storage, and has declared its need for 300 mgd of Tocks Island storage. The "flood skimming" alternative to Tocks Island some urge for NJ involves electrically pumping the Delaware's flood flows through large conduits to enlarged or new reservoirs built inland by NJ to meet its increased non-Basin requirements. This is rejected as unreliable, inadequate to meet demands, and uneconomical by NJ State and DRBC analyses, most recently by the U.S. Geologic Survey, and by studies completed under the Northeast Water Supply Act. Also it fails to meet increased water supply needs of Southeastern Pennsylvania and the Wilmington, Delaware area, and to provide Basin storage releases to the mainstem required to compensate for any additional NJ trans-Basin withdrawals.

(C) Desalination. This has been conducted on small, experimental bases and some urge it as an alternative to Tocks Island. This would involve large plants at or off the coast, extensive piping running inland therefrom, and new power facilities for pumping that water to diverse delivery points. Corps, DRBC and Northeast Water Supply Act studies show this has major technological and environmental constraints. It is also inordinately expensive. DRBC studies show that for 300 mgd of water, desalination costs 33 cents, Tocks Island 4.2 cents.

(D) Restrict Water Use. Conservation of water has become a national priority. Methods urged to reduce its consumption include raising its price, increased use of water meters, reducing its use in household chores and food preparation, installing or modifying toilets, dishwashers and washing machines to use less water, and re-use of waste water. However necessary, and encouraged, these do not materially reduce or eliminate increased future need. The possibilities of the other method urged, reducing consumption of water available for cooling electric plants, depend on public electric requirements, improvements in generator efficiency and waterway capacity to dissipate heat without adverse effect.

Water Recreation. Tocks Island Reservoir will have a water surface covering nearly twenty square miles with a 100-mile shoreline, all accessible to the public. According to Interior: there is an acute public need for water recreation in the area, Tocks Reservoir has tremendous water recreation potential, and no comparable publicly owned water recreation resource, or opportunity for one, exists in the area. A possible plan primarily for non-water recreation, briefly sketched by National Park Service personnel at the Council of Environmental Quality's request, involves eliminating Tocks Reservoir and using its land only for an enlarged Recreation Area. This would entail enormously increased, additional non-reimbursable expenditures for a land Recreation Area. It would not meet public need for water recreation or other known water resource requirements. It would require statutory change.

Electric Energy. Tocks Island has substantial power potential: it provides one of the area's most needed commodities (peaking power) largely by facilities also required for other purposes. Some urge construction and operation of numerous new natural gas or oil-fired combustion turbine or combined cycle peaking power installations instead. A detailed environmental, economic, technical comparison of Tocks Island and its peaking alternatives is a matter before and will be made by the administrative licensing agencies.

COMMITTEE VIEWS

The Delaware River Basin service area is the most populous, heavily industrialized area in the country. It is subject to disastrous flooding, disastrous drought, pressing public needs for energy and for water recreation. The environmental effects of failing to meet this area's water resource requirements are out of the question.

The Tocks Island Project to supply those urgent water resource requirements "significantly affects the quality of the human environment" of this area (PL 91–190, National Environmental Policy Act). The Committee is satisfied that the alternatives explored do not meet those essential human needs adequately, as appropriately, or as economically as the authorized Tocks Island water conservation Project.

The Committee is insistent that Tocks Island Project be carried out to avoid significant adverse effects, and to this end makes the following recommendations:

I. The U.S. Fish and Wildlife Service reevaluation of Tocks Island (July 1971) establishes that the difference in fish with and without Tocks Island is not large, that resident fish in its Reservoir will "increase substantially", that there will be "small but significant improvements in River fishing both below and above the Dam, and "that no fish and wildlife-related basis is apparent that justifies objecting to construction of either the Tocks Island Dam and Reservoir or" its recently authorized hydroelectric development. It is also now established that a series of terraced fish passage pools will be constructed (costing over $7 million) between the Dam's overflow spillway and the ridge on its New Jersey side, and that the Fish and Wildlife Coordination Act provisions are adequate to insure its recently authorized power facilities are so designed to prevent significant adverse effect on fish. It is the Committee's position that in the construction of Tocks Island Project all appropriate arrangements be incorporated for the preservation and enhancement of fish.

II. Concern has been expressed that migration of fish through the Reservoir may be hampered or prevented by inappropriate water currents. It is the Committee's position that efforts to insure such migration be sustained and expanded, as appropriate.

III. Concern has been expressed that Pennsylvanians will not enjoy unrestricted access to fishing opportunities on the New Jersey shore of the Reservoir. The proposed Reservoir fishery management plan provides a fishing license from either State will entitle a person to fish anywhere in the Reservoir or along its shores. It is the Committee's position that this proposed plan be adopted.

IV. Earlier this year, after completing its analyses of Tocks Island's revised comprehensive environmental report, the Council on Environmental Quality recommended its construction not begin before the Governors affirm their States will pay their share of a water pollution control program providing reasonable assurance that the eutrophication potential of Tocks Island Reservoir will be minimized. This should not cause undue delay, CEQ noted.[6] The Congressional reports accompanying the Act appropriating the money President Nixon requested this year for Tocks Island's construction also recommended (June 1972) it not begin before the Governors provide that affirmation. It is now established that the cost of this program is $53 million, and that the State and local share of it is substantially reduced by the financial assistance provisions of the Federal Water Pollution Control Act. This program's regional approach has been commended by both the CEQ and the Environmental Protection Agency. The Committee appreciates that regional water pollution control will be required for this area regardless of the presence of Tocks Island, and that implementation of the approved program including Tocks Island may provide certain water pollution control economies for Pennsylvanians and other people of this region not available without it. In the interest of minimizing the Pennsylvania State and local share of the cost of this $53 million program, it is the Committee's position that the Federal government assume the maximum Federal portion of that cost allowed by Federal Water Pollution Control law. It is also the Committee's position that the State, through DRBC or otherwise, affirm it will bear its appropriate share of the cost of this program providing reasonable assurance that the eutrophication potential of Tocks Island Reservoir will be minimized.

FOOTNOTES

[1] In wet years it could total as little as two feet. Once in 100 years, in drought, it could total as much as 54 feet, down to a winter low at elevation 356 Basin water is not replenished.

[2] Excluding $38 million for the originally authorized above ground power plant, saved by underground development of the Project's hydroelectric pumped storage and streamflow power by non-Federal interests recently authorized by Congress.

[3] Assuming congressional enactment of legislation authorizing another $31.4 million expenditure for land within the Recreation Area's boundaries, but excluding increased costs for required recreation facilities.

[4] The Supreme Court pointed out respecting this New York diversion "from the watershed of that [Delaware] river to the watershed of the Hudson River in order to increase the water supply of the City of New York", that: "The removal of water to a different watershed obviously must be allowed at times unless States are to be deprived of the most beneficial use on formal grounds. In fact it has been allowed repeatedly and has been practiced by the States" (*State of New Jersey v. State of New York and City of New York, Commonwealth of Pennsylvania, Intervenor*, 283 U.S. 336, 343).

[5] The compensating storage releases are needed downstream for keeping sea water back from Philadelphia and southern NJ's fresh water sources, for pollution control flows, and for shellfish.

[6] The remaining environmental question earlier raised by CEQ, involving Reservoir seasonal variation (p. 3, above), was satisfactorily clarified.

LARRY ROBINSON IS "BULLISH" ON CLEVELAND

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 5, 1972

Mr. STOKES. Mr. Speaker, Larry Robinson believes in the old concept of "boosterism" for the city of Cleveland, Ohio, and it is impossible to remain unaffected by his contagious optimism about Cleveland's potential. His optimism, moreover, is channeled into innumerable, constructive community activities. He puts his principles to work every day of the year.

On July 19, 1972, Larry Robinson received much-deserved kudos in a local magazine, Our Town. I would like to share this brief—but important—article with my colleagues today:

LARRY ROBINSON

Larry Robinson believes in the future of Cleveland. "I grew up here—this is my home—that's why I want to do something about it."

Larry is President of J. B. Robinson Co., Jewelers, an eight-store chain with its main offices in downtown Cleveland on the eighth floor of the Euclid-Ninth Street tower.

His list of community activities reads like a book—President of the City Club, a trustee of the Greater Cleveland Growth Association, and a trustee of the Cleveland Institute of Music.

In addition, he is a director of the University Circle Development Foundation, the Cleveland Convention and Visitors Bureau, the Cleveland Chapter of Phi Beta Kappa, and served on the Cleveland Area Arts Council, and . . . well the list goes on and on.

He explains his involvement this way, "The businessman is always solving problems. I felt that people skilled at solving problems professionally might become more involved at solving problems of the city and the state."

Larry first began to make his presence felt in this city little more than ten years ago when his father died and left him a small, three-man, jewelry wholesaling business in downtown Cleveland.

Despite the fact that he was then working for a large corporation whose holdings then included the Empire State Building, Larry left it all behind to go into business for himself.

"Well, you know, the difference between a small business and a giant corporation is basically a matter of adding zeroes to the annual volume.

"The independent retailer does everything the Corporate President does only he doesn't work through a comptroller, a sales marketing man, a personnel director and the rest. He does it all himself."

And Cleveland is the place to be in business for yourself according to Larry. "It's a great expanding market of good, solid people. Among chain operations, this is a lower credit risk area which makes it a good area to do business in."

Once his business was established, Larry turned in the mid-1960s to civic involvement.

"Visitors judge a whole city by its downtown," he explained, and so expends a great deal of effort on downtown Cleveland starting with his own store which, according to Larry, carries the selection of at least five average jewelry stores.

To Larry, downtown represents a definite cycle that has led to his deep involvement in the City Club. "The City Club is the oldest forum in Cleveland designed to stimulate thought about Downtown Cleveland.

"And a healthy Downtown will help to bring together different thoughts and people from all professions." This, in turn, will bring to light more ways to improve the Downtown area and the City in general . . . which will in turn stimulate further thought, and so on.

"There must be more awareness of Greater Cleveland's potential," he went on to explain.

And Cleveland's potential is limitless as J. B. Robinson's recent growth shows. Starting as that small, three-man wholesale jeweler, Robinson's in the last twelve years has grown to ten times the original volume to one of the largest retail jewelers in the country.

"We did it with only one rule—to try and understand what customers want and to satisfy those desires."

The formula worked very well, especially when combined with hard work and perseverance.

The same virtues Larry applies in his approach to finding ways and means of helping improve the quality of big cities.

Especially the one he grew up in.

SOME CENTRAL PLANNING HINTS

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 5, 1972

Mr. CRANE. Mr. Speaker, as my colleagues know, I have not failed to express my differences with the administration on those subjects where we disagree. One of these areas is the question of whether or not wage and price controls were a wise decision when they were implemented last year.

I did not believe it was wise then, and I do not believe it will solve the problem today.

The following editorial from the Wall Street Journal of August 31, in several succinct paragraphs gives a graphic example of why wage and price controls will not, and cannot, work in a specific area—that is, the automobile industry.

I insert the editorial at this point in the CONGRESSIONAL RECORD:

SOME CENTRAL PLANNING HINTS

A few suggestions on how to run the auto industry from Washington:

1. Require the manufacturers to install costly emission control and safety devices.

2. When the companies apply for price increases to cover the costs of these devices, ask them not to.

3. Even if they trim their demands, have the Price Commission deny the increases to General Motors and Ford, since these two appear to be going through the permissible profit-margin ceiling.

4. Chrysler and American Motors can't be denied on the profit-margin gambit, so give them the increases they want. It won't matter because either:

a) They won't want their prices to get out of line with GM and Ford, so will be forced by free-enterprise type competition to hold prices steady even though their profits fall further behind those of GM and Ford. Or

b) They will effect the price increase, in which case they will sell fewer cars than GM or Ford, due to the free-enterprise type price system taking hold. In which case,

5. To preserve free enterprise, have the Justice Department bring antitrust proceedings against GM and Ford for having gobbled up an unconsciopably high percentage of the market. After these giants are broken up into smaller, less efficient but more competitive units, in the interests of the free enterprise system, repeat the cycle by,

6. Require the manufacturers to install costly emission control and safety devices.

JACKSON: MISSISSIPPI'S CAPITAL CITY

HON. CHARLES H. GRIFFIN

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 5, 1972

Mr. GRIFFIN. Mr. Speaker, in 1792, a young French-Canadian, Louis LeFleur, established a trading post on a bluff of the Pearl River. Thirty years later in 1822, the Mississippi Legislature elected to establish its new capital city on this site. Thus, the long colorful story of Jackson, Miss., began 150 years ago.

Jackson has over the past 150 years grown to become a modern, progressive metropolitan city striving to meet the challenge of a great future.

All Mississippians are indeed proud of their capital city, its past and its future. And in this sesquicentennial year we join in saluting the great progress that has been a part of Jackson and look to even greater years ahead.

I take pride today in sharing with my colleagues the interesting and colorful story of Jackson and its potential for the future that recently appeared in the magazine, Mississippi News & Views.

JACKSON—150 YEARS

(By Dr. R. A. McLemore)

The rolling forested hills that were to become the site of Mississippi's capital city were untouched by Europeans in 1821. The Indians lived in the forests and won a livelihood from its denizens and the creatures of the gently flowing streams. They loved the beauty of the land but were finally forced to cede it to their white brothers. The white man wanted the land because he knew it would produce an abundance of cotton, the "white gold" of that era.

The unresolved question of the Constitutional Convention of 1817 and of subsequent legislative sessions was the location of a capital. The legislature wisely sought a site near the center of the state. The searching party sent out by the legislature in 1821 looked at many sites, but their preference was LeFleur's Bluff on Pearl River. Their convincing arguments for this choice location won the approval of the legislature. The site was ordered surveyed, a capitol erected, and the name of the hero Major General Andrew Jackson given the embryonic city.

Jackson welcomed its first legislative session in December, 1822, and though living accommodations were primitive the state's business was transacted and the lawmakers departed. The lands on the bluffs around Pearl River were not as productive as the loess soils farther westward, nor was it as easy to get cotton to market as it was from other areas. Since the economic health of a community depended upon the amount of cotton produced in its vicinity, Jackson grew slowly. The city was almost abandoned in 1828, and the legislature considered removing the capital to a more favored area. The difficulty of reaching an agreement and opening of Indian lands to the north saved the city and provided opportunities for growth.

The railroads laid their lines to reach Jackson, and thus the capital became the crossroads of the iron horse in the state. The city's central position made it the center of commerce for the interior. By the outbreak of the Civil War, Jackson had become a respectable city of over 3,000 souls. There were many of the amenities of life, such as gas lights, good hotels, a beautiful capitol building, many elegant homes, including the governor's mansion, and an abundance of churches, newspapers, professional people, and a few manufacturing establishments.

The pleasant tenor of life in Jackson was wrecked by the tragedies of the Civil War. The city was occupied on four different occasions by enemy forces. On the second occupation in 1863, the facilities that supported the war effort were systematically destroyed and the stricken city was referred to as "Chimneyville." The difficulties of earning a livelihood made recovery from the war a slow and tedious process. The railroads were rebuilt, and new ones were added. The factories were gradually restored, and new enterprises began to develop. The manufacture of lumber took on new importance as the market became more lucrative. The cotton seed was utilized in the manufacture of various oil products. Millsaps College and Belhaven College were opened to give the capital city prestige as an educational center. The cultural life of the city was enhanced by the formation of drama groups, choral organizations, study clubs, and the presentation of traveling artists. Life in Jackson had become again rich and satisfying when the twentieth century opened.

Perhaps Jackson's greatest asset in its rise of the dominant municipal area in Mississippi was the concentration of governmental agencies in the city. At the beginning of the twentieth century government was relatively unimportant as an employer of labor and conductor of enterprises. The new century was characterized by a tremendous change. The state and federal governments entered many new fields of service and consequently expanded the labor force in governmental agencies. Their development had a greater impact on Jackson than on any other city. Another change that influenced the growth of the city was the migration of farm workers to the city. The growth of the population made it necessary for the city to promote an active industrialization program in order to provide jobs for the people. The intensive industry building program resulted in Jackson becoming one of the most highly industrialized areas in the state. This in turn increased the population of the city.

Jackson also became the principal finance center in the state during the twentieth century. The banking industry began a healthy growth in the early part of the century but met reverses during the depression of the 1930s. This was followed by a reorganization of the banking system and new growth that placed the city in the forefront of the financial communities of the state. Banking growth was supplemented by the development of insurance companies. Mississippi had been negligent in taking advantage of the opportunities of this industry, but the twentieth century witnessed a healthy growth in this field. Another field was the rise of savings and loan associations. These organizations stimulated thrift and savings among the citizens and provided funds for housing and other projects.

The cultural life of Jackson was enriched by many activities. Jackson State College became a public institution and established a record as one of the fastest growing institutions of higher learning in the state. Mississippi College, Belhaven College, Millsaps College, and Tougaloo College were centers of cultural activity. Hinds Junior College began its service in the 1920s and became a particularly important force in the technical life of the area. The Jackson Symphony Orchestra, the Little Theatre, the Opera Guild, the Art Association, the Ballet Guild, the Choral Society, the Junior League, the Old Capitol Museum, and many other organizations contributed to the cultural growth of the city. Jackson became the principal medical center of the state with the University Medical School, Baptist Hospital, St. Dominic's Hospital, Veterans' Hospital, Hinds General Hospital, and Doctors' Hospital providing leadership in the field. These developed the largest concentration of medical personnel in Jackson of any center in the state.

The religious life of the citizens was strengthened by the numerous church organizations that served the community.

The 150th anniversary of the founding of Jackson marks the realization of dreams that far exceeded the wildest expectations of the first settlers. If comparable achievements are to mark the years ahead, heavy responsibilities rest upon the citizens of today.

LETTER TO SENATOR KENNEDY

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 5, 1972

Mr. DERWINSKI. Mr. Speaker, last week in a major mailing, a letter from Senator Edward Kennedy was evidently directed to hundreds of thousands of individuals in support of Senator McGovern.

The tone of the letter was more anti-Nixon than pro-McGovern and that is understandable given the intellectual bankruptcy of the McGovern campaign and the ill-disguised animosity of the Kennedys for the President.

Usually when a mailing of this sort is misdirected, a number of Members take to the floor to answer. In this case, I was spared the task of preparing a reply since a dedicated Illinois taxpayer, Mr. Jim Reichardt of Carol Stream, Ill., was kind enough to send me a copy of his response to the senior Senator from Massachusetts.

The letter follows:

Carol Stream, Ill., *August 31, 1972.*

Hon. Edward M. Kennedy,
U.S. Senate,
Washington, D.C.

Dear Friend: Thank you for your kind invitation to join the McGovern Million Member Club. Since I am one of your typical poverty people, I cannot afford the dues. I am sure that you will not discriminate against me because of my financial status, and thereby exclude me from the club. So, I am asking you, as a friend, to pay my dues for me. I'm sure you can afford the $25, and after all, you did address me as friend.

A word of criticism. Membership in the club only entitles one to a membership card and a button. I think we should also get a secret decoding ring. This way, members of the club, who have a special "in" in the McGovern campaign, could use their rings to find out what the good Senator means when he indicates he is behind someone 1,000%, or when he promises everyone $1,000. (By the way, what ever happened to that? I could have used the dough to become a member of the club!)

Thanks again for your letter. It isn't every day that I get a letter from a Famous Personage who considers me a friend. You are certainly a good friend to have, because I happen to know that you are worth several million clams and are intensely interested in helping us poverty folk.

Let me know how the club goes and make sure that I get an invitation to the first meeting. I am anxious to get to know the other 999,999 members. They must be a great bunch of guys.

Sincerely,

Jim Reichardt.

GUARANTEED STUDENT LOAN PROGRAM

HON. ALBERT H. QUIE

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1972

Mr. QUIE. Mr. Speaker, the Congress is solving the most current problems related to the guaranteed student loan programs, with Senate Joint Resolution 260, but this resolution delays the implementation of the recent guaranteed student loan amendments only until March 1, 1973. In the meantime, we must plan for the period beyond March 1.

Some individuals—including Members who participated in the conference on the Education Amendments of 1972—have been suggesting that the new amendments to the guaranteed student loan do not require a so-called needs analysis. It is true that the conference report—now Public Law 92–318—does not mention a needs test specifically. But I can say as one who was very much involved in our negotiations with the other body that some form of a needs analysis was clearly intended.

Under the old provisions, there was an arbitrary ceiling of $15,000 adjusted family income beyond which no student could receive Federal interest subsidies on any guaranteed loan. Those below this arbitrary ceiling received a Federal interest subsidy on every guaranteed loan. For a family of four, this adjusted income of $15,000 amounts to a gross income of closer to $19,000. The adjusted figure does not reflect the number of children one family has in postsecondary education at one time. This is a shortcoming of such an approach.

There were two major concerns of the conferees. One was to open up the interest subsidy provisions to some students above the adjusted $15,000 who could demonstrate real need. The father might have recently became unemployed. There might be a serious medical or business setback. Whatever the reason, it was argued that some students above $15,000 were actually in greater need of the subsidy than some students below that level.

The second major concern was the fact that many students under $15,000 could get no-interest loans for non-education purposes through periods up to 7 or 8 years. It has not been rare to hear of students using these loans for trips abroad, cars, honeymoons and even investments. Indeed, many parents jump at the chance to get $1,500 interest free money each year during the time their children are in college.

The conferees attempted to meet both of these problems. First, we allowed the educational institution to declare that a student whose adjusted family income was above $15,000 to be "in need," thus qualifying him for a subsidized loan.

Second, we agreed that for all students—those whose need was "presumed" because their income was less than $15,000 and those whose need was specifically "determined" by the educational institution—the educational institution would make a recommendation as to the amount of the subsidized loan each student needed.

The way this recommendation is determined is spelled out in the law. The financial aid officer determines the total cost of attending the institution. I should mention here that the conference report mistakenly restricted the definition of "cost." I hope technical amendments will soon correct this so that "total costs" will reflect all legitimate expenses related to attendance.

From this total cost figure for each student is subtracted "the expected family contribution with respect to such student plus any other resources or student aid reasonably available to such student." The "other resources" include grants, scholarships, other loans, and so forth.

Much of the controversy in recent weeks has centered on the required determination of "expected family contribution." This determination has been made for many years as part of the other Federal student aid programs. It has never been part of the guaranteed student loan program until the recent amendments. I do not know how anyone can comply with the law and not go through some sort of analysis of family income and assets. This is more popularly referred to as a "needs test."

The Office of Education, in its July 18 interim regulations, told the schools to use any of the several needs tests which have been approved for the other programs. That meant for thousands of students a rather complex parental confidential statement that took several weeks to process. My own hope is that OE can find a much simpler needs analysis system. That would solve most of the problems we have seen since July.

Mr. Speaker, I should also say that one major assumption behind the changes in the law was the assumption that students could continue to receive nonsubsidized guaranteed loans. We should not restrict the availability of guaranteed loans. We should only restrict the amount of loans for which the Federal Government pays the interest. These interest costs are growing rapidly, as the following table indicates:

Fiscal year:	
1970	$96,558,000
1971	150,341,000
1972	192,062,000
1973 (estimate)	215,000,000

What we intended with the recent amendments was that these interest subsidies would go to students to the extent they showed a need. So naturally some students who received large subsidized loans in the past without this needs determination would now qualify for smaller subsidized loans. But we did not intend to cut them off from guaranteed loans of which they paid the 7-percent interest.

I understand that the fact of the situation is that few banks are willing to exceed the institution's recommendation for a subsidized loan and that few banks are willing to make nonsubsidized loans at all. The reason for this latter problem is that banks find it much easier and less costly to bill the Government for one large sum rather than bill each individual student for the interest.

Something must be done to solve this problem. Many students are absolutely dependent on receiving a guaranteed loan. And they are willing to pay 7-percent interest. If the banks continue to discriminate against those students who do not qualify for a subsidy, then we should consider eliminating the subsidy for all students since it is usually the student who pays off the loan once he becomes a wage earner rather than the family. We should look into the question of who actually repays these loans and whether or not an interest subsidy based on the student's family's income makes any sense at all.

ADM. HAROLD R. STARK, U.S. NAVY—1880–1972

HON. DANIEL J. FLOOD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 5, 1972

Mr. FLOOD. Mr. Speaker, my home State of Pennsylvania has produced many military and naval leaders who have risen to high positions in the Armed Forces, among them Adm. Harold R. Stark of my hometown of Wilkes-Barre, whom I knew for many years and always held in the highest esteem.

A graduate of the U.S. Naval Academy in 1903, he was promoted through grades to the rank of admiral, a rank obtained on August 1, 1939, when appointed as Chief of Naval Operations in the crucial period preceding the outbreak of World War II in Europe. A dedicated naval officer of outstanding ability with the background of a distinguished career afloat and ashore, he was a leader for naval preparedness before the attack on Pearl Harbor.

Because of his high position he was in the vortex of intrigue and propaganda that preceded U.S. entry into the war and dealing with forces beyond his control he unavoidably became involved in the consequences of Pearl Harbor but was supported by such eminent naval leaders as Adm. Ernest J. King.

After being relieved as Chief of Naval Operations, in March 1942, he became the Commander of U.S. Naval Forces in Europe—the same position held during World War I by Adm. William S. Sims on whose staff he has served, 1917–19.

Admiral Stark continued in the European command until August 1945, and gained distinction. He retired from active duty on April 1, 1946.

Admiral Stark died on August 20, 1972, at the age of 91. In order that the details of his life and career as reported in two newspapers of our Nation's Capital may be recorded in the permanent annals of the Congress and thus be made readily available for historians, I quote the obituaries as parts of my remarks as follows:

[From the Washington Post, Aug. 21, 1972]

ADM. HAROLD R. STARK, FORMER NAVAL CHIEF, DIES

(By Martin Weil)

Adm. Harold R. Stark, chief of naval operations when the Japanese attacked Pearl Harbor, died yesterday after a heart attack at his home here. He was 91.

Admiral Stark earned much praise and many decorations for his service before Pearl Harbor and after it, but the attack on Dec. 7, 1941 cast a shadow over his career that was not quickly dispelled.

Shortly after Pearl Harbor, Adm. Stark was relieved of his duties as chief of naval operations, and given the lesser post of commander of American naval forces in European waters.

His command included American Naval forces involved in the Normandy landings of June, 1944, and for this service, he received the distinguished service medals of both the Navy and the Army.

However, on June 13, 1944, Fleet Adm. Ernest E. King, wartime chief of Naval Operations, signed a statement saying that Adm. Stark, and Adm. Husband E. Kimmel, the commander of the Pacific Fleet during Pearl Harbor, "lack the superior judgment necessary for exercising command commensurate with their rank and their assigned duties."

On Aug. 13, 1945, three months after the surrender of Germany, Adm. Stark received a testimonial dinner from the British Admiralty Lords. He sailed for home, Aug. 17 and arrived on Aug. 21.

But a few days later a Navy board report on Pearl Harbor criticized him and Secretary of Defense Forestal directed that he be barred from any future position of responsibility.

At this time, Adm. King protested bitterly in Adm. Stark's behalf. However, after several months of service in the office of chief of naval operations here, Adm. Stark was detached from all active duty, on April 1, 1946, and ordered to the retired list.

In a book published six years later, Adm. King came vigorously to the defense of both Adms. Stark and Kimmel and the Army commander in Hawaii at the time of Pearl Harbor, Gen. Walter C. Short.

Adm. King called them "scapegoats . . . sacrified to political expediency."

Adm. Stark himself had been a fervent advocate of preparedness after becoming chief of Naval Operations in 1939.

"We must translate our potential strength into immediate readiness, and . . . we must stay ready," he said in a 1940 speech. "My position is that we should have a Navy second to none," he said in testimony before Congress.

In a broadcast on Oct. 27, Navy Day, 1940, he said that the nation should prepare for "the possibility of simultaneous attacks on either or both oceans."

Adm. Stark was born at Wilkes-Barre, Pa. in 1880, graduated in 1903 from Annapolis where he was a member of the crew.

In one of his early assignments, he served aboard the USS Minnesota when the battleship made a round the world cruise that ended in 1909 with a fleet review by President Theodore Roosevelt.

Afterwards came several destroyer commands. It was in 1914 when he commanded the destroyer Patterson that the future admiral, then a lieutenant, met his future commander in chief, Franklin D. Roosevelt.

Mr. Roosevelt, then assistant secretary of the Navy, was on board the Patterson off the Maine coast when he saw Lt. Stark at the helm. Describing himself as an experienced navigator who knew the coast, Mr. Roosevelt asked to relieve the young officer.

Lt. Stark reportedly replied: "I am in command here and responsible for the ship. I doubt your authority to supersede me. If you can offer any helpful suggestions I should be glad to hear."

It was 25 years later that Mr. Roosevelt, who apparently was impressed by the young officer's response, picked Adm. Stark over 59 others who outranked him for the Navy's No. 1 post.

In the interim, Adm. Stark distinguished himself in a number of posts. During World

War 1, he won the Distinguished Service Medal for taking a flotilla of reconditioned, broken-down destroyers from Philippine waters to the Mediterranean, where they harassed German and Austrian submarines.

His later posts included service as aide to two Navy Secretaries, commander of Navy cruisers, and chief of the bureau of ordnance in the Navy Department, where he became known as a believer in the theory that victory went to the side with the biggest guns.

He lived here at 4900 Glenbrook Rd. NW. Survivors include two daughters.

[From the Washington Star and News, Aug. 21, 1972]

ADM. HAROLD STARK, 91, DIES; FIGURE IN PEARL HARBOR ROW

Retired Adm. Harold R. Stark, 91, whose role as chief of naval operations at the time of the attack on Pearl Harbor later embroiled him in national controversy; died yesterday at his home on Glenbrook Road NW.

Despite having been awarded four Distinguished Service Medals—including one for his role as chief of naval operations—during his four decades in the Navy, Adm. Stark was a prominent figure in the search for a culprit during several post-war investigations of the surprise Japanese attack on Pearl Harbor in 1941.

A 1945 Navy Court of Inquiry criticized Adm. Stark and Rear Adm. Husband E. Kimmel for being "inadequate in emergency, due to the lack of superior judgment necessary for exercising command . . ."

But in 1948, Adm. Ernest J. King, who headed the inquiry, asked that the critical section of his report be withdrawn.

Four months after Pearl Harbor, President Franklin D. Roosevelt replaced Adm. Stark with Adm. King as chief of naval operations.

Adm. Stark went on, however, to distinction as commander of U.S. naval forces in Europe before and during the 1944 D-Day Allied invasion of Normandy.

For his role in that campaign, he received two Distinguished Service Medals—one an Army citation awarded by Gen. Dwight D. Eisenhower.

He retired in 1946 from active duty. His death came after a long illness, including a stroke last January.

A native of Wilkes-Barre, Pa., Adm. Stark entered the U.S. Navy Academy in 1899. There he acquired his career nickname, "Betty"—which stuck after he was required as a plebe, or freshman, to recite repeatedly a quotation attributed to one of his military ancestors: "We must win today, or Betty Stark will be a widow tonight."

During World War I, he earned his first Distinguished Service Medal as commander of a squadron of small and old destroyers hurriedly fitted out in the Philippines and dispatched to the Mediterranean at a season when the southwest monsoon was at its height.

Stark's efficient leadership in spite of many difficulties, in a time much shorter than had been considered possible, and the squadron arrived in the Mediterranean in excellent condition in time to take an active and efficient part in the antisubmarine campaign there and in the Atlantic, the citation said.

After World War I, he held posts of increasing responsibility on land and at sea, including serving as aide to two Navy secretaries here. He was named chief of the bureau of ordnance and rear admiral in 1934 after commanding the battleship U.S.S. West Virginia for a year.

When President Roosevelt chose Adm. Stark as chief of naval operations in 1939, he jumped over 59 officers with more seniority.

It was a time of buildup for war and Stark was a leader in pressing for a strong Navy. In a nationwide radio broadcast in 1940, he warned of "the possibility of simultaneous attacks in either or both oceans."

Later, his Distinguished Service Medal for his service as CNO from 1939 to 1942 cited his efforts "to effect a high state of training for war and the building of a 'two-ocean Navy.'"

After commanding the naval forces in Europe during the American campaign there, he returned to Washington for about six months in the office of the chief of naval operations, spending most of his time preparing testimony for Navy and congressional inquiries into Pearl Harbor.

His many U.S. awards and decorations were supplemented by a long list of honors from foreign governments, including Britain, France, Brazil, Norway, Poland, the Netherlands and Belgium.

Stark Field at Terminal Island, Long Beach, Calif. was named in honor of him in 1941.

Adm. Stark was a member of the Westmoreland Club in Wilkes-Barre, the New York Yacht Club and the Army and Navy Club, the Army-Navy Country Club, and the Chevy Chase Club here. He was also active in a variety of Navy organizations, including the Navy Relief Society.

His wife, the former Katherine Rhoads, died previously. He leaves two daughters, Mrs. Edwin W. Semans and Mrs. Harold P. Gillespie, both of Washington, three grandchildren and two great-grandchildren.

OPERATION DRUG ALERT

HON. WILLIAM L. HUNGATE

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 5, 1972

Mr. HUNGATE. Mr. Speaker, at a time when we are all concerned with drug abuse, I would like to call the attention of my colleagues of the resolution adopted by Kiwanis International at its 57th annual convention in Atlantic City, N.J., in connection with the continued outstanding success of "Operation Drug Alert."

DRUGS AND ENVIRONMENT

A Resolution adopted by the delegates to the 57th Annual Convention of Kiwanis International in Atlantic City, New Jersey, June 21, 1972.

Kiwanis is dedicated to the idea that to build means to grow.

To meet new challenges, we must continuously expand our horizons while promoting the activities and programs which have been the measure of our growth.

While we have made excellent progress with Operation Drug Alert and a good beginning on Project Environment, the need for and importance of these programs continue.

Therefore be it resolved, That we re-endorse the sponsorship of Operation Drug Alert and Project Environment, urging all Kiwanians to increase their efforts to implement these programs.

Be it further resolved, that we oppose the legalization of the manufacture, distribution, or use of marijuana and hashish, except for scientific or medical purposes.

And further, in the absence of self imposed controls by the legitimate drug manufacturers, we support legislation at federal, state, provincial and municipal levels, aimed at controlling the production, importation, exportation and distribution of amphetamines and barbiturates except to meet the realistic requirements of the medical profession.

And in keeping with our concern for our youth,

Be it further resolved, that a youthful first offender who is only involved in possession of, or use of less than one ounce of marijuana, be charged with a misdemeanor offense according to the state or provincial law.

Be it further resolved, that a second offender, a grower, a transporter or a proven pusher or seller shall be filed upon as a felony and be held under the felony laws of each respective state or province.

PRACTICES WHAT HE PREACHES

HON. EARLE CABELL

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 5, 1972

Mr. CABELL. Mr. Speaker, a personal friend and excellent staff writer of the Dallas Times Herald, OT Hampton, has written a most interesting article on the career of Col. Gordon A. Foubister who leads the Texas Salvation Army. I have admired Colonel Foubister for many years and know him to be a man who combines his religious faith with a humanistic and direct approach to solving the problems of our society. The article is as follows:

PRACTICES WHAT HE PREACHES

(By OT Hampton)

"Charity can put a new suit on a man, but it takes the grace of God to put a new man in the suit."

Col. Gordon A. Foubister peddles that kind of personal philosophy as he goes about the day-by-day, night-by-night job of keeping the Salvation Army in Texas in marching shape.

He's a sincerely religious man, yet, since he joined up with the "Army" in 1936, he's learned to rely heavily on his Scotch-like common sense to help the needy help themselves.

"I've found, in my long dealings with people and their problems, you can never change a man's circumstances until you change the man," he said. "Preaching the gospel is part of it. Then you've got to get out there where the problems are and do something about them."

Foubister practices what he preaches.

He "gets out there where the problems are," even though he's the Salvation Army's top officer in Texas. He still has a youthful zeal for work.

While being interviewed by The Times Herald, he interrupted himself three times to give advice to a mobile field crew he'd just dispatched to the Snyder flood scene in West Texas.

"Those flood victims can't wait," he explained. "Their needs have to be filled today."

Foubister grew up with other people's problems. He's the fourth generation member of his family in the army and his daughter, Capt. Ted Dalberg, has already started a fifth-generation tradition.

"I can still see my father and mother standing in front of saloons, conducting street meetings," the colonel said. "I was there, too, playing my cornet and mandolin. It wasn't easy, believe me. Times were hard in those days and our problems were many."

He said the Army kept his parents on the move most of the time, making it necessary for him to attend 12 different schools.

"We were always moving," he said. "I never did have time to spend much time with my friends."

Finally, after graduation from high school and business college, Foubister made up his mind about his future.

"I told father I wanted to devote my life to the Salvation Army," he recalled. "He signed me up immediately. He said he and mother had prayed that would be my decision. They were really thrilled."

After a long course in the Salvation Army's training school in Chicago, Foubister was sent to the Citadel Corps in Omaha in 1936. Then, like clockwork, he advanced up through the ranks in Illinois, Iowa, Michigan, Minnesota and Missouri.

WORK ETHIC RECEIVES LABOR DAY TRIBUTE

HON. LAWRENCE COUGHLIN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 5, 1972

Mr. COUGHLIN. Mr. Speaker, in commemorating Labor Day, I think it is appropriate that we join the President in paying tribute to the work ethic which has impelled Americans and their forebears for many generations.

Working men and women who are formally honored on Labor Day have contributed significantly through the years in helping the United States reach its status of the one nation in history that has done so much for so many people. Their continued contributions will help us reach the full potential of which this Nation is capable.

I insert in the CONGRESSIONAL RECORD this editorial published in the Philadelphia Inquirer on Labor Day, September 4, 1972, which indicates the depth of commitment to their jobs of working people in the United States:

[From the Philadelphia Inquirer, Sept. 4, 1972]

"MAN IS MADE TO WORK"—AND THERE LIES SATISFACTION

This being Labor Day, it seems an appropriate time—even at the risk of sounding a bit old fashioned—to say a good word for work.

The work ethic, to get more formal about it, is by no means dead in this country. But it does seem to be ailing.

Workers today, says Wickham Skinner, a professor of business administration at Harvard, "have a fundamentally different ethic about what a person ought to do with his life. The typical worker is . . . more anxious to get away from the job."

And that's particularly true of the young, according to Frederick Herzberg, a professor of management at the University of Utah and an expert on industrial psychology. Many younger workers, he says, feel "no personal obligation for productivity, work quality or work discipline."

It doesn't take an expert in industrial psychology to sense this, of course.

We had a phone call recently, for example, from a businessman who was puzzled by the fact that he had had just one answer—in this period of high unemployment—to an advertisement for a machine shop trainee who would start at $5,200 a year. plus generous benefits, and have good opportunities for advancement.

We also had an applicant of our own who wrote not to ask for a job but something called "a valid journalistic work experience." In case we missed the point, he explained that "it is of utmost concern to me that I not be burdened, for very long, with the trivial types of reporting that so many new prospects are confronted with at the outset of their jobs."

Why? Why it is that an increasing number of people don't want to work at all, or want to work as little as possible, or don't want to be "burdened" with anything they consider trivial?

One popular explanation in that in this highly automated and increasingly impersonal society of ours too many jobs have become dull, boring, routine and monotonous.

That assumes, however, that in the good old days there were no such jobs. But that assumption is just as erroneous as another many workers make, namely that there's nothing but glamor in the executive suites. They'd be surprised how many hours the boss spends on routine details.

There is some validity, all right, to change in work patterns noted by Dr. Hans Selye, director of the University of Montreal's Institute of Medicine and Experimental Surgery and author of the book "The Stress of Life." "Formerly a craftsman would make a table from beginning to end and get a great deal of satisfaction. Today, one person makes the legs, another the top and still another paints so that no one person has made the article and no one is gratified."

But it is also true, as Prof. Herzberg reminds us, that there were plenty of dull jobs in the past, too. So what has changed? The typical worker, then, he says, "would bear his life on a Mickey Mouse job and gather his psychological income from social traditions, ethnic traditions, religious traditions, and family traditions." But now many of those traditions, religious traditions, and of those * * * and more workers are discontented with their lives as a whole.

Which is exactly why work itself needs to be understood as something not to be avoided or, at best, endured but something to be pursued as a source of satisfaction.

"Man is made to work, to do something that makes demands on him," says Dr. Selye. "With the decline of so many other values and nothing new to replace them, work is one of the few areas where man can find a sense of worth and enjoyment."

That doesn't mean that everybody has to be president of the company, either.

"There's just as much satisfaction in being a bricklayer and building walls well as there is in being a scientist," Dr. Selye concludes. "Everybody, no matter how low he may be in the scale of mental development, has something to give, something that he wants to express, some valve for letting off steam."

It's called work, and it remains a value which merits our individual and national respect.

RED CROSS CERTIFICATE OF MERIT

HON. LAWRENCE J. HOGAN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 5, 1972

Mr. HOGAN. Mr. Speaker, recently the American National Red Cross honored one of my constituents, Miss Catherine A. Bohn, 19, by presenting the Red Cross Certificate of Merit, its highest award.

Miss Bohn received the award because of her quick-thinking and knowledgeable actions in an emergency. She saved the life of a man who had been bitten by a copperhead snake.

While many people would panic or find themselves helplessly immobilized in such an extreme crisis, Miss Bohn quickly put into action her Red Cross training and drew on her own courage and resourcefulness. She applied a constricting band above the wound, used a bobby pin to make the fang punctures bleed, and sucked the wound to remove as much venom as she could.

Miss Bohn was later informed by medical authorities that without her first aid the victim in all probability would have died.

In this era when people spend so much time criticizing the younger generation, oftentimes unfairly, it is my pleasure to be able to commend Miss Bohn for actions which are a credit to her generation and to any generation. To my mind, such courage and heroism in a person of any age are truly humbling. One wonders how one would react in an emergency, and though some people believe themselves to be calm enough to handle such crises, it is indeed a rare person who has the combination of the first aid knowledge and quick thinking calmness that Miss Bohn has shown. Our society is truly in debt to those few.

CONGRESSMAN REPORTS SURVEY RESULTS

HON. EDWIN B. FORSYTHE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 5, 1972

Mr. FORSYTHE. Mr. Speaker, earlier this summer I asked my constituents to respond to questions soliciting their views on major issues facing our Nation.

Hoping that their feelings will be of interest to my colleagues, I am including the results of my questionnaire in the RECORD at this point:

RESULTS OF QUESTIONNAIRE

1. Southeast Asia: What is the best policy to follow?

1. Reintroduce ground troops and take necessary action to win the war, 8%.

2. Continue withdrawal, but provide air and naval power to help curb North Vietnam's invasion of the South, 44%.

3. Publicly set a date for absolute withdrawal of all U.S. forces from Southeast Asia, in return for all U.S. prisoners of war, 41%.

4. Continue President's withdrawal program, but not provide air and sea support regardless of military efforts made by North Vietnam, 7%.

2. War Powers: Do you support legislation restricting the President's use of armed forces in combat for more than 30 days without prior Congressional approval?

1. Yes, 55%.
2. No, 36%.
3. Undecided, 8%.

3. Military Spending: How would you characterize present U.S. expenditures for defense?

1. Too high, 60%.
2. Too low, 12%.
3. About right, 28%.

4. Economy: Do you believe the Economic Stabilization Program is:

1. Stopping the rise in inflation and improving employment, 22%.

2. Reducing inflation only, 14%.

3. Improving employment only, 3%.

4. Not having a positive effect upon either factor in the economy, 61%.

5. Pollution: What do you consider most important in combatting pollution?

1. Finding ways to reduce the number of motor vehicles using the highways, 10%.

2. Initiating a "pollution tax" based on

the amount of pollutant discharged by industry into the atmosphere, 14%.

3. Enacting stricter anti-pollution laws, 53%.

4. Requiring industry to control pollution, with the cost reflected in the price of the production, 23%.

6. Elderly: Do you believe Congress should:

1. Provide better retirement benefits, 32%.

2. Improve medical benefits, 10%.

3. Find ways to reduce tax burdens for senior citizens, 38%.

4. Concentrate on other services and needs, such as nursing homes, special food programs, transportation and recreation, 19%.

7. National Health Program: Which would you prefer?

1. No national health insurance program, 20%.

2. A program financed by tax revenue and operated by the federal government with benefits for all citizens, 29%.

3. A federally-mandated program financed by employer and employee contributions, 14%.

4. A program financed by tax revenue and operated by the federal government with benefits only for persons in need and for catastrophic illness, 11%.

5. A mandatory program financed with a combination of tax revenue, employee and employer contributions, 27%.

8. Welfare: Which of the following do you favor:

1. Establishing a minimum annual income for every American, with strict job training and work requirements, 35%.

2. Maintaining the present welfare system, 1%.

3. Reduce welfare benefits, limiting food stamp program, and establish government work program for those who are able, 64%.

9. Transportation: In what area would you prefer concentration of transportation funds?

1. Operating funds for mass transit systems, such as bus and train lines, 15%.

2. Construction and improvement of highway system, 14%.

3. Development of new mass transportation systems, and expansion of facilities like the Philadelphia-Lindenwald High Speed Line, 71%.

10. School Desegregation: What is the best way to resolve the problem of school desegregation?

1. Adopt President Nixon's moratorium on school busing and enact his recommended Equal Educational Opportunities Act, 21%.

2. Adopt a constitutional amendment prohibiting busing to achieve racial balance, 28%.

3. Using busing as a means of integrating schools in hopes of providing equal education, 6%.

4. Reform the tax system to remove the reliance of school districts from the property tax and equalize spending for education, 45%.

11. School Financing: If you agree that public education should be less dependent upon the local property tax, which would you prefer:

1. A value-added (national sales) tax, 39%.

2. Increased federal income tax, 13%.

3. State Income Tax, 19%.

4. Combination of above, 27%.

12. Age:

1. 18–20, 5%.

2. 21–35, 27%.

3. 36–45, 18%.

4. 46–55, 22%.

5. 56–64, 14%.

6. 65 and over, 13%.

13. Do you consider yourself a:

1. Republican, 39%.

2. Democrat, 16%.

3. Independent, 45%.

14. County of Residence:

1. Burlington, 51%.

2. Camden, 33%.

3. Ocean, 17%.

IDAHO—"THE SPARKLING LAND"

HON. ORVAL HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 5, 1972

Mr. HANSEN of Idaho. Mr. Speaker, each year additional thousands of Americans and visitors from other lands are seeing Idaho for the first time as they vacation in our rugged and magnificent State. While all of them are inspired to conversational superlatives in describing the attractions of Idaho, few have the opportunity of seeing their high thoughts in print. One of the outstanding exceptions is Emma Louise Philabaum whose accomplished writing on Idaho as "The Sparkling Land" appeared in the August 26 issue of the Christian Science Monitor.

IDAHO—"THE SPARKLING LAND"

The mountains of Idaho have beckoned us for a long time, even though there are pine-clad hills only two hours from our home. Finally it was decided; we must see these unfamiliar highlands that have lured travelers and trappers as long as men roamed the mountain west.

We journeyed over this state of wide contrasts from southern to northern border, through farmlands and desert plains, river valleys and mountain fastnesses. From now on, as long as memory lasts, we shall think of Idaho as the sparkling land.

The sparkle is no illusion. It is everywhere . . . luminous, radiant, adding extra grandeur to the already grand mountains and sage-blue flatlands.

Mountain air always has a crystal quality, yet this alone cannot explain the light burnishing the Idaho landscape.

Most of this brightness comes from the incandescent sun that blazes in a sky so fiercely blue that eyes ache to view it. Then the land and all that grows upon it also seem to snatch at the light, to catch it, collect it . . . and flash it back in myriad ways and colors.

Mile on mile the highways follow twisting creeks turned into long silver ribbons tying together the broad meadows. And the magnificent rivers—the placid Snake and the furious Salmon—have that same shimmer all along their white-capped breadths. The rocky gorges they have carved shine in infinite colors, layered evidence of the earth's shaping in aeons past.

Trees always have seemed creators of shade, yet here they become sources of light. Golden glints spark from the needles of breeze-stirred evergreens. Aspen leaves flash on-and-off spots of reflected sun against the patterned ground.

Across the face of a shimmering meadow, pink-tasseled grasses blush. And light from the weaving emerald blades riffles onto wildflowers of endless variety.

The flowers make their own bright points of neon hue. A whole valley turns golden with daisies and black-eyed Susans. Deep blue lupine and pentstemon make tall spikes of pigment along the roadside. Lacy yarrow—three times as large as that blooming at home—tosses back a white reflection. And there are more—vermillion cups, purple bells, magenta torches—whose names we do not know but whose luster we shall not forget.

The water glistens most—and illumines the land. Every bend in the road brings us to another canyon . . . and another tumbling shaft of silver liquid. Spring comes late to the high country, and these cascading streams we see in every crevice still hold the icy light of the thawing heights. High above we glimpse the glow cast from the last snow patches. And on the smooth, tree-lined swaths, now spring green, we envision the white flame that must radiate from ski slopes wrapped in winter.

Stopping to picnic by one of these sunny streams, we see a dozen tints reflected from the agate- and crystal-strewn creek bed. The static rocks are as many-hued as the blossoms that dip their heads along the water's edge.

The sun, a clear, all-encompassing white through the long day-light hours, takes on a new quality at sunset. We see it begin to break and splinter and finally dissolve. Each atom of air becomes a single dot of glit, bathing the folded beige hills in golden mist.

Even on blackest nights, the light leaves tardily, outlining the pines in dusky silhouette against the blue-black horizon. Though the sky keeps an almost daytime brightness, stars appear in such piercing profusion that the universe seems to stretch its boundaries.

At dawn, the abrupt Idaho sunrise startles the earth with its suddenness and brilliance. All the trees stir with the orange light and the breeze that seems always to accompany it. The small creatures of the forest scurry about, their fur alight with morning flame.

Each bright day brings renewed radiance to the sparkling land.

MAKES OLYMPIC QUARTER FINALS

HON. ANDREW JACOBS, JR.

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 5, 1972

Mr. JACOBS. Mr. Speaker, I am sure all Americans are proud of the outstanding performances these past several days by members of the U.S. Olympic team in Munich, Germany. And the people of Indianapolis, Ind., can take special pride in the tremendous abilities of native son Marvin Johnson, a graduate of Crispus Attucks High School.

Last night Americans had the opportunity to see this young man perform, with the grace and skill recalling the world's great boxers, in his march to the gold medal in the middleweight finals. With the brilliant coach and trainer, Mr. Colin Chaney of St. Rita's, in his corner, this young athlete brought the fans to their feet in defeating the 29-year-old West German, Ewald Jarmer.

I'm sure my colleagues will indulge my own pride in sharing with them the following news item from this morning's Indianapolis Star:

MAKES OLYMPIC QUARTER FINALS

Middle-weight Marvin Johnson of Indianapolis, Indiana, punished West Germany's Ewald Jarmer for three rounds to gain a unanimous decision and advance to the Olympic boxing quarter finals yesterday.

The eighteen-year-old American belted his scar-faced opponent about the ring with a dangerous left uppercut. But Johnson, a southpaw, failed to floor his more experienced opponent. Jarmer, twenty-nine, seemed to have only one thing in mind, to reach the final bell without a knockout. Johnson, who won thirty-nine of his fifty-seven previous fights, gained the decision on all five score cards by a wide margin. His next opponent will be Alejandro Montoya of Cuba who beat Britain's William Knight by a second round technical knockout.

CARL T. ROWAN COMMENTS ON "WATERGATE CAPER"

HON. ROBERT N. C. NIX

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 5, 1972

Mr. NIX. Mr. Speaker, the Philadelphia Evening Bulletin on Monday, September 4, carried an excellent commentary by Mr. Carl T. Rowan, who asked: Do we really care? The caption over the commentary was: "Little public outcry over 'Watergate caper'". I believe the theme of the article and the points made are most worthy of note and should be called to the attention of all Americans.

LITTLE PUBLIC OUTCRY OVER "WATERGATE CAPER"

(By Carl T. Rowan)

WASHINGTON.—It would be in the spirit of charity to give everyone the benefit of doubt and say that a secret $25,000 gift to the Nixon reelection fund had nothing to do with the grant of a new Minnesota bank charter to the donor, Dwayne Andreas.

But the evidences of big favors for big money keep piling up in this Administration. I call your attention again to that remarkable, almost incredible, revelation on "Meet the Press" two weeks ago by Clark MacGregor, the former Minnesota congressman, who heads Mr. Nixon's reelection campaign.

MACGREGOR STORY

MacGregor said the lawyer for a generous Democratic donor had awakened him at half-past midnight to plead with him not to reveal his client's name. Keeping "faith" with people like this donor was MacGregor's justification for not revealing those who gave $10 million to the Nixon campaign through last-minute maneuverings, just in time to beat the new campaign reporting law.

Was it Andreas' lawyer who telephoned MacGregor? Andreas had reasons to fear embarrassment. Here was the friend and No. 1 supporter of Sen. Hubert H. Humphrey, playing financial footsie with "the enemy."

If it wasn't Andrea's lawyer who telephoned MacGregor with the plea for secrecy, then it means someone else among the givers of that secret $10 million has something to hide. And that only deepens the pall of shame that lies about this fund, part of which former Commerce Secretary Maurice Stans funneled through Mexico so as not to reveal the name of the donors.

OTHER CASES

If the Andreas case stood alone, one could be accused of politicking for suggesting there is a scandal here. But there are other cases of this Administration's ladling out favors to persons connected with campaign contributions.

The ITT affair, involving a donation of $200,000 to the cost of the Republican convention (if held in San Diego) at the same time the Justice Department was dropping court action to block ITT mergers, has faded from the headlines. But the memory lingers on.

There was the matter of dairy price supports which I wrote about. Through various channels, the dairy people pumped at least $329,000 (in 1971) into the fund to reelect Mr. Nixon. Suddenly, then-Secretary of Agriculture Clifford Hardin decreed a hike in price supports worth at least $400 million a year to the dairy industry.

LAW AND ORDER?

It is manifestly clear to me that this Administration is about as sanctimonious over "law and order" as the next one. Imagine the No. 1 fund-raiser for a President of the United States with a secret slush fund of at least $350,000 in his personal safe. At least $114,000 from that fund winds up in the Miami bank account of a man arrested with, and believed to be the leader of, a team of accused burglars bugging Democratic Party headquarters.

Imagine Stans claiming "no knowledge" of how $114,000 from his slush fund is spent. It is more than any sane American can swallow.

Yet, Stans offers only evasive talk in which he tries to discredit a report by the General Accounting Office. The White House also offers only silence.

Americans are left only to hope that Attorney General Kleindienst is going to order a vigorous investigation which opens the way to indictment of officials in the Committee to Reelect the President. To suggest that this is likely, however, is to insult the intelligence of the people.

On the other hand, there is pathetically little public outcry. It is as though the people have become inured to corruption, considering it the new American way of life, as it long has been in some Asian lands.

INTERNATIONAL OUTRAGE

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 5, 1972

Mr. CRANE. Mr. Speaker, the horrifying tragedy that has befallen the innocent civilians representing the State of Israel at the Olympic games in Munich offends the sensibilities of all civilized men. And yet, in quantitative terms, this cowardly and reprehensible deed does not compare with the violence at Lod international airport earlier this year. The truth of the matter, Mr. Speaker, is that this is but one more outrage in a chain of outrages perpetrated by terrorist fanatics against innocent civilians, many of whom at the Tel Aviv Airport were not even Israelis. But, such is the nature of terrorism.

It is high time all civilized nations rise up in condemnations of such atrocities. Nations of the world should refuse sanctuary to such elements. A desirable first step would be to reach an international agreement refusing sanctuary anywhere to skyjackers. In the Middle East, the Arab States which still permit terrorist organizations to operate within their borders should take the initiative in purging themselves of such elements with a vengeance.

The problems between Arabs and Israelis are complex and delicate. Hopefully, in time, they will be resolved without further conflict. But atrocities such as this most recent one can only injure efforts at reaching an amicable settlement and simultaneously bring shame and mortification to all responsible Arabs in whose name these self-styled leaders in the war against Israel conduct their barbarous activities. If the Arab countries sheltering terrorist organizations act with dispatch, they can restore lost prestige, ease international tensions, and hopefully, prevent repetitions of these senseless tragedies by those at war with all standards of decency and humanity.

TEAMSTERS SET LETTUCE DEBATE STRAIGHT

HON. VICTOR V. VEYSEY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 5, 1972

Mr. VEYSEY. Mr. Speaker, in Extensions of Remarks, August 3, 1972 (page 26779 I corrected some misinformation circulated to the Members in a letter July 31 by one of our colleagues urging the boycott of lettuce not bearing the seal of the United Farm Workers—UFW.

On August 9, our colleague attempted a refutation of my principal points that: no lettuce workers are on strike in California or Arizona, and since all lettuce marketed in the East is harvested under union contract, we are being asked to take sides in a jurisdictional dispute between the Teamsters and the UFW.

I was happy to note that our colleague conceded:

> It is understood that there is no strike in progress at the present time.

Unfortunately, he persists in denying that a jurisdictional dispute between two unions exists. He stated,

> The jurisdictional dispute that did arise soon after the termination of the grape strike was settled over 16 months ago on March 26, 1971, in Los Angeles, Calif. This information was reconfirmed by conversations with representatives of the two unions here in Washington and with officers of the Western Conference of Teamsters in California.

Our colleague does not identify which officers of the western conference of Teamsters are the source of his information, but I would like to insert a letter below dated August 21, 1972, from the international director of the western conference of Teamsters at my request narrating the inability of all parties in the lettuce dispute to come to an acceptable agreement following an arrangement worked out May 7, 1971, between the Teamsters, the UFW, and the AFL–CIO.

I draw particular attention to the last sentence:

> As a consequence, the Teamsters consider their contracts with the growers to be both valid and in full force.

If two unions contesting over the organization of the same workforce does not constitute a "jurisdictional dispute," what does?

The letter follows:

WESTERN CONFERENCE OF TEAMSTERS,
Burlingame, Calif., August 21, 1972.

Hon. VICTOR V. VEYSEY,
U.S. Congressman,
Washington, D.C.

DEAR CONGRESSMAN VEYSEY: On May 7, 1971, I and some of my associates in the Teamsters Union met with Albert Woll and Joseph Keenan as representatives of the AFL–CIO, Cesar Chavez and aides from the United Farm Workers and Herb Fleming, Andrew Church and others representing growers with Teamster contracts.

On that occasion the Teamsters proposed, and it was agreed to by the other participants, that the growers sit down with representatives of the AFL–CIO and United Farm Workers in an attempt to work out an agreement that would be acceptable to all parties. In the event this was done, the Teamsters agreed they would turn over to the United Farm Workers all of the approximately 170 contracts in existence between them and the growers.

Representatives of the concerned parties met at intervals during the next several months but failed to come to any solution or acceptable agreement. As a consequence, the Teamsters consider their contracts with the growers to be both valid and in full force.

Very truly yours,

EINAR O. MOHN,
International Director.

HEALTH CARE—THE 92D CONGRESS

HON. FRED SCHWENGEL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 5, 1972

Mr. SCHWENGEL. Mr. Speaker, since I first came to Congress, I have had a strong interest in health care. I have been a member of the Republican Task Force on National Health since it was created and we have studied the problem, trying to devise an effective program to decide how our health care dollars can best be applied.

Of course, this is a very complex, interrelated area. We can rarely isolate and attack a problem, expect it to disappear, and then attack another problem. A comprehensive approach is obviously needed and too often lacking.

Listed are the bills concerning health care which have at least had hearings during this Congress and which I support. As you can see, there is a strong emphasis on research and study. I have faith in our ability to find new cures and treatments for damaging disease, such as cancer and sickle-cell anemia, as well as the troublesome common cold.

Unfortunately, the social problems of increasing health costs and lack of care in rural areas and for the poor will not yield as easily. Often we do not define or understand the causes of a problem before we propose a hasty or dramatic solution. Action on many fronts is needed, from the training of more personnel to the social causes of drug and alcohol abuse. There are no reasons why a Nation as rich as ours cannot afford to provide health care to all the people at reasonable cost.

The list referred to follows:

HEALTH CARE, 92D CONGRESS

Public Law 92–13, H.R. 5674 (House Report 92–121) Commission on Marihuana and Drug Abuse: During the 91st Congress, the Commission on Marihuana was established to study the extent of marihuana use in the United States, the efficiency of existing marihuana laws, the pharmacology of the drug, its immediate and long-term effects physically and phychologically, its relationship to aggressive behavior and crime, its relationship to other drugs, and the international control of the drug. There was an original expenditure limit of $1 million, however, subsequent amendments expanded the duties of the Commission.

The Commission's duties now consist of an intensive study of such subjects as the relationship of drug abuse to personality traits, especially as regards a tendency to be prone to drug abuse, the relationship of peer group, and family relationships to susceptibility to drug abuse, and the degree to which social tensions locally and nationally (such as poverty, war, social permissiveness, availability of drugs, leisure time activities, personal and family use of alcoholic beverages, media exposure, especially rock music and underground papers) contribute to drug abuse.

The Commission will employ experts in various areas and will conduct hearings across the country. Also as a key to stopping drugs, the Commission will meet with officials from countries where drugs originate.

Public Law 92–255, H.R. 12089 (House Report 92–775) Action Office for Drug Abuse Prevention: This bill sets forth the national policy toward controlling drugs and drug addiction. The government recognizes that education, treatment, rehabilitation, research, training of personnel, and law enforcement are all interrelated with the drug problem. The Action Office for Drug Abuse Prevention will be the focal point in the Federal government for coordination of comprehensive, long-term programs aimed at combatting the drug abuse now prevalent in the United States.

The Office is set up as a component of the Executive Office of the President. It is the duty of the Director to establish the objectives and implement the policies which will govern Federal drug abuse prevention programs.

The bill authorizes the Director to recommend changes in other Departments to overcome bureaucratic apathy. The Director is expected to act decisively and promptly and is given wide powers to do so. By giving him these powers it is expected that new or modified programs will be more effective in combatting drug abuse. As a final method of causing action, the Director is given powers similar to those held by OMB over drug related programs.

Research and development are to be encouraged and facilities can be provided. The Director is given broad budget powers to speed programs he deems especially productive. This Act also provides for the treatment of drug problems in Mental Health Centers, Veterans Hospitals and public health facilities.

H.R. 9936 (House Report 92437) Drug Listing Act of 1971: Awaiting Conference.

This Act would require the drug companies to list with the Secretary of Health, Education and Welfare, the drugs currently marketed. It would have to be updated semiannually. It would provide information including ingredients, labels, advertising, etc. Secretary would be able to determine better if the drug fell under the jurisdiction of a new law. Could be used as a source to check if labelling was deficient.

It is basically a consumer protection plan.

MEDICAL PERSONNEL

Public Law 92–52 (H.R. 7736, House Report 92–249) Medical Student Loan Extension Act of 1972: Extends the student loan and scholarship provisions of the Public Health Service Act. This allows that the 35% of entering medical students who need aid beyond what is normally granted to receive that aid necessary in order to allow qualified but disadvantaged students to continue pursuit of the understaffed medical profession.

PERSONNEL

H.R. 15859 (not voted yet).

Emergency Medical Services Act of 1972 (Report Ordered Filed 8/15/72): Provides that the Secretary may determine the feasibility of establishing through expansion and improvement of existing services or otherwise and operating emergency medical service system for an area through projects (one per area) which are undertaken by public and/or private groups or individuals.

Allows the Secretary to make grants for projects to plan the establishment of a workable system.

$5 million authorized to be appropriated for fiscal year 1973 and $10 million for fiscal year 1974.

Allows the Secretary to make grants to cover up to 50% of the operating cost of such a system during the first two years of operation. Grants under this authority are not to exceed $150 million. Allows the Secretary to make grants for research into emergency care methods. Grants under this authority are not to exceed $10 million in 1973; $20 million in 1974.

May make grants to cover up to 50% of the cost of expansion or improvement of existing facilities, but not to exceed $10 million.

Secretary shall create an Inter-Agency Technical Committee to evaluate programs and proposals.

H.R. 8629 (House Report 92–258, conference report 92–578, Public Law 92–187) Comprehensive Health Manpower Training Act of 1971: Act extends the grant assistance provided for construction of research and teaching facilities and adds loan guarantees and interest subsidy authority for teaching facilities.

Schools may apply for funds to update facilities.

Private schools may be eligible for assistance.

Portions of affiliated hospitals and outpatient facilities which are geared to teaching are eligible for assistance.

Provides the schools with grants based on the number of students enrolled.

Provides grants to allow a two-year medical school to convert to a full school of medicine.

Provides grants to schools of veterinary medicine.

Provides grants to schools of pharmacy, optometry, and podiatry.

Sets requirements a school must meet to qualify for a grant—application required.

Provides loan forgiveness for students who will serve in under-staffed areas.

Authorizes grants for the training of teachers in health fields.

Provides draft exemption to those who practice in shortage areas for more than four years.

Public Law 92–158, H.R. 8630 (House Report 92–259, Conference Report 92–577) Nurses Training Act of 1971: Provides money for grants for construction or expansion of nurses training centers.

Also provides loan guarantees.

Allows for construction of interim teaching facilities.

Provides for start up grants for new schools.

Provides up to 85% loan forgiveness over a 5-year period for service to a non-profit agency; 85% over three years for shortage area.

DISEASE CONTROL

H.R. 13592 (House Report 92–923, Public Law 92–294) Sickle Cell Anemia Control Act: Secretary can make grants to develop information, and research project relating to sickle cell anemia.

H.R. 11302 (House Report 92–659, Conference Report 92–722, P.L. 92–218) National Cancer Attack Act of 1971: Provides that all programs aimed at conquest of cancer will be coordinated.

Establishes a National Cancer Institute—Accelerates the attack on cancer.

Sets up a date bank to collect and disseminate cancer date—worldwide.

Eliminates a hold of funds by anyone except the President (overrides OMB).

Sets up a National Cancer Advisory Board.

Authorizes the President to request additional appropriations beyond the original authorization.

H.R. 13501 (House Report 92–940, Public Law 92–305) National Institute of Arthritis, Metabolism, and Digestive Disease: Places consideration of digestive disease under the Institute by changing the title.

Expedites consideration of digestive Disease Research.

H.R. 15081 (House Report 92–1108) National Heart, Blood Vessel, Lung and Blood Act of 1972 (In Conference): Enlarges the authority of the National Heart and Lung Institution to advance the attack against heart, blood vessel, lung and blood disease.

Coordinates the programs relating to the research and treatment.

Authorizes up to $1.2 billion over a three-year period.

Places emphasis on informing the public of the effect of reduction of known risk factors.

H.R. 14455 (House Report 92–1107) (In Conference) Communicable Disease Control Programs: Extends the Public Health Service Act provisions which authorizes grants to state and local government for communicable disease programs.

Authorizes money for control of tuberculosis, measles, VD, and other communicable diseases.

H.R. 15475 (House Report 92–1185) (not voted on yet) (Passed House) National Advisory Commission on MS: Establishes a National Advisory Commission on multiple sclerosis to determine the most effective means of finding causes and cures and treatments of MS.

Directs the study of the possible means of financial support to research.

H.R. 15474 (House Report 92–1184) (not voted on yet) (Passed House) National Cooley's Anemia Control Act: Establishes a national program to provide support for research into Cooley's Anemia.

Sets up agency to test, screen, and counsel those susceptible.

Distribution set up for information on the disease.

AGING

H.R. 14424 (House Report 92–1026) (Passed House, pending in Senate) National Institute of Aging: National Institute of Aging is established.

Purpose—to research the aging process, and special health problems of the aged.

Allows for treatment of aged in mental health facilities.

Noise Control Act of 1972 (H.R. 11021, H.R. 92–842): Requires all Federal agencies to promote noise control.

EPA given consultant status with all noise regulations decisions—may order review of lenient regulations.

Requires publication of noise information.

Requires publication of a list of major products constituting a noise hazard.

Enables the Administrator to set standards for new products.

Leave the State to control the operation or movement of products covered under this statute.

Can request review of standards set by the Federal Aviation Agency.

Requires labeling of noisy products.

Allows penalties of up to $25,000 per violation of noise standards.

Allows citizen to file court action.

Requires manufacturers to keep record of the tests they run to check compliance.

Directs the Administrator to find low emission products and push for use by Federal agencies.

MUNICH OLYMPIC TRAGEDY

HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 5, 1972

Mr. ROSENTHAL. Mr. Speaker, mere indignation and condemnation by the international community over the wanton slaughter of two members of the Israeli Olympic team and the seizure of others in Munich today are no longer sufficient responses if this type of outrage is to be prevented in the future. The unwillingness of the international community to respond in a meaningful way to previous incidents of this kind is as responsible for the present tragedy as the madness of the assassins themselves.

I am today asking the Secretary of State to advise the House Foreign Affairs Committee on what steps the United States intends to take—itself and with other nations—to punish any government which offers sanctuary or encouragement to international murderers and air pirates.

Positive steps can and must be taken by the United States, the United Nations, and other individual countries to end once and for all the actual or threatened murder of totally innocent civilians for political or other purposes. International accords must be reached which provide for the mandatory punishment of any nation which offers refuge to international outlaws, including expulsion from the U.N. and stern economic sanctions by members of that body. Anything less deserves scorn and condemnation by all those throughout the world who respect the sanctity of life and the rule of law.

TOO MUCH CONCERN

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 5, 1972

Mr. DERWINSKI. Mr. Speaker, in my judgment, taxpayers of the country are not being deceived by the demagogues who preach of tax reform and who, in the same breath, envision new Government spending programs.

The evergrowing, costly Federal bureaucracy has clearly become too much of a burden on the average American.

A very effective, timely editorial commentary in the press publications of August 18, should, I believe, be read by all the Members, especially since we have all returned from our districts and, I am sure, are now aware of the wrath of the taxpayers.

The editorial follows:

TOO MUCH CONCERN

Congresswoman Edith Green of Oregon asked the Library of Congress to compile the total amount of funds a family could receive if that family took advantage of all public assistance programs available. On the basis of two hypothetical families—one a mother with four children ranging in age from preschool to the college level and the other a mother with eight children ranging from preschool to college—Mrs. Green was advised that the first family could collect a total of $11,513 a year under various programs of federal aid ranging from health care to scholarships. The second family, if all available federal programs were utilized, could have an annual income of over $21,000. Commented Mrs. Green, "Now for those people across the country who are saying this is a government that does not have any concern for the poor . . . I suggest they look at these programs."

A lot of taxpayers are also looking at the programs and do nct like what they see—a country that is being overwhelmed by the adverse ratio between producers and non-producers.

TAX CREDIT FOR HIGH SCHOOL AND GRADE SCHOOL TUITION

HON. THADDEUS J. DULSKI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 5, 1972

Mr. DULSKI. Mr. Speaker, the question of tax assistance for parents and guardians of students attending non-public schools is a subject of wide interest.

The House Committee on Ways and Means has resumed hearings on this vital matter and a witness at Tuesday's hearing was Charles J. Ruppert of Buffalo, N.Y., representing two parents' organizations from my district.

Mr. Ruppert was the founder about three years ago of the organization of parents of high school students, the Parents' Council of Independent Schools. He is a past president and now serves the group as secretary. Mr. Ruppert also appeared on behalf of the parents of elementary school students whose organization is known as the Federation of Home School Associations.

In his testimony, Mr. Ruppert spells out very well the case for providng a tax credit for those parents of elementary or high school students who pay tuition. There are several suggested formulas for the tax credit, including the one I proposed last May. And on which I testified before the committee on August 17.

The need for help for those families is clear and a tax credit obviously is the best approach. In view of the developing support for action, I am hopeful that the committee will make recommendations promptly.

Mr. Speaker, as part of my remarks, I include the text of Mr. Ruppert's excellent testimony today:

TESTIMONY OF CHARLES J. RUPPERT AT HEARING BEFORE HOUSE COMMITTEE ON WAYS AND MEANS, SEPT. 5, 1972

Mr. Chairman, Honorable ladies and gentlemen:

I am Charles J. Ruppert and I am speaking on behalf of the Parents' Council of Independent Schools and the Federation of Home School Associations of the Diocese of Buffalo. These organizations represent over 100,000 parents of approximately 70,000 children in the non-public schools in the Western New York area. I am Secretary and past-President of the Parents' Council of Independent Schools and father of eight children, all of whom have been or are presently being educated in the Buffalo Catholic School System.

I would like to speak briefly on the necessity of maintaining freedom of choice in education, secondly, the economic problems afflicting parents who exercise this choice by sending their children to non-public schools and, thirdly, the urgent need for financial relief for parents via some form of tax credit.

While our Constitution and courts have guaranteed us this freedom of choice, it is more and more becoming an economic impossibility to exercise this choice. The need to preserve this freedom of choice is highlighted by the fact that in many underprivileged areas, parents choose to send their children to non-public schools.

As an example, in a recently consolidated Inner City parochial school in the City of Buffalo, approximately 80% of the 800 students are non-Catholic and their parents are paying $60 per year to exercise this freedom of choice.

DIVERSITY IN EDUCATION

The non-public schools provide a diversity which our educational system would otherwise lack. They not only provide knowledge but also a system of values which inform the moral and ethical choices one must make throughout his life.

The more one appreciates the quality of education provided by the typical non-public school, the more urgent their preservation becomes. In the Diocese of Buffalo, for example, standard tests demonstrate that children in Catholic elementary schools exceed the national average by an ever-increasing margin as they progress from kindergarten through grade eight. This phenomenon occurs despite the fact that the distribution of IQ's among the student population is normal.

Inasmuch as a pluralistic society has been part and parcel of this country since its very inception, it is absolutely necessary that a realistic freedom of choice in education be maintained. It appears that Russia and the United States are the only two countries that discriminate against non-public schools.

The economic problems afflicting parents who exercise this freedom of choice of education by sending their children to non-public schools continue to mount. These parents make many sacrifices to support the two school systems.

For the average working man and the underprivileged this freedom of choice is fast disappearing. The inflationary pressure afflicting non-public schools with a resultant increase in the cost of tuition is fast making the exercise of this precious freedom an economic impossibility for more and more parents.

Mothers are going to work, fathers are working two jobs, and discrimination is occurring within families where some children are sent to non-public schools and others must attend the public schools because of a shortage in family funds.

Present unemployment rates of 11% in Niagara County and 9½% in Erie County serve to compound these economic problems.

SPIRIT OF FAIR PLAY

All Americans are enjoying the benefits produced by both school systems but the fact that some Americans are penalized by exercising this freedom of choice offends the Americans spirit of fair play.

For example, it costs the Catholic community in New York State approximately $172 million a year to operate the parochial schools. In New York State alone, it would cost taxpayers over $400 million to absorb the students in these schools.

In the span of five years, it has been necessary to increase tuition in our diocesan high schools from $150 to $400, further increases in tuition are inevitable. More and more, the average family can no longer afford to send their children to non-public schools.

The average per pupil cost in the Buffalo Diocese in $216 in the elementary schools and $550 in the secondary schools. This is well below the average per pupil expenditure of $1,400 in New York State's public schools. Obviously, a tax credit of only a few hundred dollars would help restore balance to our plural educational system.

RECOMMENDS TAX CREDIT

It is therefore our recommendation that some form of tax credit be given directly to the parents. It is my understanding that over fifty tax credit bills have been submitted to this Committee and it is our hope and prayer that you will see fit to recommend one that most suits our immediate needs.

It is also our recommendation that tax credit for tuition be extended only to the parents whose children attend schools meeting State and Federal educational standards and conforming to the Civil Rights Act of 1964. All the non-public schools represented by our organizations have been approved by the New York Education Department.

It is not our intention, now or in the future, to expect government to support the entire cost of tuition for non-public schools. However, we must keep in mind that time is of the essence and too little or too late could be chaotic.

In closing, I wish to thank this Committee for your interest and concern and I trust you will submit a tax credit bill that will enable us to maintain our freedom of choice in education.

BEN CHERNER—A GREAT LOSS FOR ALABAMA

HON. WALTER FLOWERS

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 5, 1972

Mr. FLOWERS. Mr. Speaker, our State of Alabama lost a great public servant in the untimely death of Ben Cherner on August 27. A two term member of the Alabama Legislature, he was one of its acknowledged leaders. Whatever Ben Cherner participated in, he did so with enthusiasm and ability.

It was a privilege for me to have known him well as a friend, and I know that he will be greatly missed by all.

I include in the RECORD two articles appearing recently in the Bessemer News and the Birmingham Post-Herald:

[From the Bessemer News, Aug. 27, 1972]

BENNETT CHERNER

Bessemer people who had worked with Bennett Cherner on local-level projects knew we had something special in this young man.

And the shock waves that erupted here at his untimely, sudden death Sunday afternoon were felt in the four corners of the state, as he had made his unusual talent for getting things done known statewide in his tenure as a member of the Legislature.

Such a pity that such a brainy, knowledgeable man as Ben Cherner was taken by death, at barely half of his Biblically-allotted three score and ten years.

He never sought publicity, although he was thankful for what he got, and thus it may be that many Bessemer citizens probably are not aware of the really effective civic work he did for us.

At the time of his death he was busy promoting a "Sell Bessemer" plan to create an industrial park at the new airport, he being a member of the Airport and Industrial Park Authority.

The other projects in which Mr. Cherner was interested, business and civic, are too numerous to mention here, but it can truthfully be said these interests covered an extremely wide and varied area.

Ben's ability to see through extraneous matters to the core of a problem was perhaps his greatest asset. Our city, our state, can ill afford to lose such a promising mind coupled with unusual ability.

No man is irreplaceable, of course, but Ben Cherner comes close.

As Shakespeare wrote: "Now cracks a noble heart. Good night, sweet prince."

[From the Birmingham Post-Herald, Aug. 27, 1972]

BEN CHERNER

Although he was a very modern model of a legislator, State Rep. Ben Cherner, whose sudden death on Sunday diminishes this entire community, was an exemplar of the best of all the old time traditions of public service.

For one thing, Mr. Cherner was probably as hard-working a Legislator as has ever sat in the state capitol. He also was as well informed on public affairs in general and the operation of the State Legislature in particular as any legislator in memory.

Candidates seek public office for a variety of reasons, personal and otherwise. Generally, however, most of them will say that they merely seek only an opportunity to serve. Ben Cherner said that, too, when he first ran for the Legislature. What set him so distinctively apart was that he really did seek an opportunity to serve. And he did serve well.

Reporters and other observers of the Legislature soon learned that if they wanted to understand a piece of legislation or a course of action they would be wise to check with Ben Cherner. He always knew. From his first day in the Legislature he made it his business to understand every proposition made to the Legislature and to determine for himself a course of action which, in his opinion, would best serve the people of Jefferson County.

A fine intelligence and a creative spirit distinguished all of Ben Cherner's service in the State Legislature. He will be sorely missed by his fellow legislators and by all whom he represented so well. It cannot be said of many but it certainly can be said of Ben Cherner: he left his community and his state better than he found them and his example of service should inspire office seekers for a long time to come.

ARAB TERRORISTS STRIKE AGAIN

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 5, 1972

Mr. RODINO. Mr. Speaker, the shock has worn off a bit now. The cruel message of this morning's radio commentator has ended: The initial attack occurred at 4:30 a.m.; the Israeli wrestling coach was immediately killed; an additional team member was fatally wounded; all 14 members of the Israeli Olympic team are being held hostage. The captors have stated that if their demands are not met, one hostage will be killed every 2 hours. The Black September terrorist organization, the most violent of all Palestinian groups, has acknowledged responsibility for these acts. Once again, Arab terrorists have taken innocent lives and used them as objects for protest and for pawn.

The Bonn cabinet has already met and stated that they will come through with all demands asked of them. They have offered money for the ransom of these Israeli prisoners but their offer has been coldly truned down. I am told that seven of the hostages were former inmates in concentration camps a few miles from where this morning's injustice took place.

Prime Minister Golda Meir has called for the suspension of the Olympic games. Early this afternoon her request was granted.

I am deeply distressed and extremely frustrated by this brutal behavior. Whatever terrorist activities take place, no action, no settlement has yet been strong enough to stop the Palestinian destruction of life. I pray for an end to this unfair method of resolving differences while I remain with all the world anxiously awaiting further news of this horrid situation.

WHY WE SERVE

HON. JOHN BUCHANAN

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 5, 1972

Mr. BUCHANAN. Mr. Speaker, during the Fourth of July festivities in Birmingham, Ala., a city which it is my privilege to represent in the Congress, Brig. Gen. R. C. Cartwright, one of this Nation's finest military officers, delivered an outstanding address which well answers the strident voice of cynicism in the United States.

General Cartwright is currently assistant commander of the 3rd Infantry Division, now stationed in Germany. He holds an A.B. degree from San Francisco State College and an M.B.A. from the University of Missouri. The general has a distinguished record in Vietnam, having served as commander of the 108th Artillery Group stationed along the Demilitarized Zone and later as deputy commanding officer of the U.S. Army Support Command at Cam Ranh Bay. Prior to his current assignment, he was special assistant to the Comptroller of the Army in Washington, where he was Director of Management, Review, and Analysis.

General Cartwright's words of encouragement are particularly fitting in this day when we hear prophets of gloom continually expounding about this Nation's problems. The address of this distinguished black American points to a hope for the future, which so many in our country feel today, and to a spirit which must be kept alive if we are to conquer the problems we face.

I include the text of General Cartwright's remarks, because they represent but another aspect of what is right with America:

WHY WE SERVE

(By Brig. Gen. R. C. Cartwright)

Congressman Buchanan, distinguished guests, and members of WBRC–TV audience.

It is a distinct honor to be here today to represent the Army in this outstanding 4th of July celebration. During my Army career, I have seen many 4th of July celebrations—but none like this. It is most impressive and I am proud to be a part of it. I congratulate the city of Birmingham and station WBRC for this truly fine effort.

Flying here from Europe yesterday, on my way to Birmingham, I looked down on this great land of ours through the window of the plane. I saw the green farmlands—the cities and towns—the beautiful hills and woods—and the lakes and streams as they passed beneath the plane. And I couldn't help but recall those great poetic lines:

Breathes there a man with soul so dead
Who never to himself has said
This is my own—my native land!

These lines by Sir Walter Scott are to me what this celebration is all about. We are saying that we are proud of our great country—proud to be a part of it. It is our country—for better or worse. And it is this undefinable feeling of pride and patriotism that we express today.

Americans have always had this feeling of pride in our land—from our beginning days as a colony. We have had to make our own destiny, and often against heavy odds. To recall a little of the flavor of those early days, a prominent Englishman named Samuel Johnson said in March 1775, "The American Colonists are a race of convicts and ought to be thankful for anything we allow them short of hanging." This was the prevailing attitude among our British rulers at the time.

It is small wonder that American Colonists—patriots like George Washington, Jefferson, Adams, Hancock and many others—reacted negatively to the British view, and to British actions. In June of 1776, the Continental Congress passed a resolution that said,

"Resolved that six companies of expert riflemen be raised in Pennsylvania, two in Maryland and two in Virginia; that each company consist of a captain, three lieutenants, four sergeants, four corporals, a drummer or trumpeter and sixty-eight privates; that each company as soon as completed shall march and join the Army near Boston, there to be employed as light infantry under the command of the Chief Soldier of the Army." With this resolution, the United States Army was born.

From this humble beginning, the Army—lacking in supplies, in manpower, in food and weapons—even in shoes—in fact, lacking in everything but courage and fortitude—went on to force the British to surrender at Yorktown in 1781.

In the years that followed, the Army and our sister services whose representatives are here on the platform with me today, have compiled a magnificent record protecting the American people and the American way of life from its foreign enemies. We exist for one purpose—to serve the American people in defense of their liberty and freedom. As one of our senior leaders said, "The Army belongs to the people, and it is made up of the people. It draws its officers and soldiers from every walk of life—from every part of America. The Army—and all of the Armed Services—are cross sections of American life."

In today's world, The Armed Services are stationed across the United States, and around the world, protecting our precious freedoms. The Seventh Army in Europe is one of these units. It is part of NATO—the North Atlantic Treaty Organization. NATO is the military shield in which Army, Navy and Air units of the United States combine with forces from 14 other nations against the threat of Communist aggression. The Third Infantry Division, of which I am a part, is one of the four and one-third U.S. divisions in Europe making up part of the NATO shield. We are there to protect the United States. We are there because it is cheaper, easier and safer to protect our country from east of the Rhine River—working together with the joint forces of 14 other nations—than it would be to do it alone, from somewhere on the eastern coast of America.

The Third Infantry Division is called the "Marne Division" because of its unyielding defense of a sector along the Marne River during World War One. Through more than 50 years—and three major wars—the Marne Division has compiled a combat record unsurpassed in American military history, as attested by the 49 Marnemen who have won their nation's highest award, the Medal of Honor.

Today, in Europe we are in a constant state of combat readiness as part of the deterrent to the spread of Communism. This calls for highly motivated, well trained soldiers, dedicated to the principles of freedom. These men reflect in their professionalism and pride the finest spirit of our American life.

As symbols of this commitment of service to you, two Marne men are here with me today. Staff Sergeant Stanley P. Lowry, who is holding the Third Division flag with its 26 battle streamers and 3 Presidential Unit Citations is a native of Birmingham. Staff Sergeant James A. Miller, holding the national colors, is a native of Sumter, South Carolina. These outstanding noncommissioned officers are two of your representatives in Europe, protecting your freedom—and you have every right to be proud of them today—and of all of the soldiers, sailors and airmen who are manning the outposts of freedom here and overseas.

But pride is not enough—and the military cannot do everything. For we have some problems in America that must be faced. I have read many statements that America is in real trouble. And I must admit that in some ways, it seems true. Old Glory has never fallen so close to earth. Some of our embassies and installations have been stoned and attacked, we've been involved in a number of conflicts on foreign soil. Our young men have died for ideals which don't seem to mean much to some Americans.
